ORION ENERGY SYSTEMS, INC. AND SUBSIDIARIES

UNAUDITED NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

NOTE A DESCRIPTION OF BUSINESS

Organization

The Company includes Orion Energy Systems, Inc., a Wisconsin corporation, and all of its consolidated subsidiaries. The Company is a developer, manufacturer and seller of lighting and energy management systems and a seller and integrator of renewable energy technologies to commercial and industrial businesses, predominantly in North America.

See Note I Segment Reporting of these financial statements for further discussion of our reportable segments.

The Company's corporate offices and manufacturing operations are located in Manitowoc, Wisconsin and an operations facility occupied by Orion Engineered Systems is located in Plymouth, Wisconsin.

NOTE B SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Principles of Consolidation

The condensed consolidated financial statements include the accounts of Orion Energy Systems, Inc. and its wholly-owned subsidiaries. All significant intercompany transactions and balances have been eliminated in consolidation.

Reclassifications

Where appropriate, certain reclassifications have been made to prior years' financial statements to conform to the current year presentation.

Basis of Presentation

The accompanying unaudited condensed consolidated financial statements of the Company have been prepared in accordance with accounting principles generally accepted in the United States (GAAP) for interim financial information and with the rules and regulations of the Securities and Exchange Commission. Accordingly, they do not include all of the information and footnotes required by GAAP for complete financial statements. In the opinion of management, all adjustments, consisting of normal recurring adjustments, considered necessary for a fair presentation have been included. Interim results are not necessarily indicative of results that may be expected for the year ending March 31, 2013 or other interim periods.

The condensed consolidated balance sheet at March 31, 2012 has been derived from the audited consolidated financial statements at that date but does not include all of the information required by GAAP for complete financial statements.

The accompanying unaudited condensed consolidated financial statements should be read in conjunction with the audited consolidated financial statements and footnotes thereto included in the Company's Annual Report on Form 10-K for the fiscal year ended March 31, 2012 filed with the Securities and Exchange Commission on June 14, 2012.

Use of Estimates

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements and reported amounts of revenues and expenses during that reporting period. Areas that require the use of significant management estimates include revenue recognition, inventory obsolescence and bad debt reserves, accruals for warranty expenses, income taxes and certain equity transactions. Accordingly, actual results could differ from those estimates.

The Company's valuation allowance for deferred tax assets is based upon estimates of future taxable income.

Cash and Cash Equivalents

The Company considers all highly liquid, short-term investments with original maturities of three months or less to be cash equivalents.

Table of Contents**Short-Term Investments**

The amortized cost and fair value of short-term investments, with gross unrealized gains and losses, as of March 31, 2012 and September 30, 2012 were as follows (in thousands):

	March 31, 2012			Fair Value	Cash and Cash Equivalents	Short-Term Investments
	Amortized Cost	Unrealized Gains	Unrealized Losses			
Money market funds	\$ 486	\$	\$	\$ 486	\$ 486	\$
Bank certificate of deposit	1,016			1,016		1,016
Total	\$ 1,502	\$	\$	\$ 1,502	\$ 486	\$ 1,016

	September 30, 2012			Fair Value	Cash and Cash Equivalents	Short-Term Investments
	Amortized Cost	Unrealized Gains	Unrealized Losses			
Money market funds	\$ 486	\$	\$	\$ 486	\$ 486	\$
Bank certificate of deposit	1,019			1,019		1,019
Total	\$ 1,505	\$	\$	\$ 1,505	\$ 486	\$ 1,019

As of March 31, 2012 and September 30, 2012, the Company's financial assets described in the table above were measured at cost which approximates fair value due to the short-term nature of the investment (level 1 inputs).

Fair Value of Financial Instruments

The Company's financial instruments consist of cash and cash equivalents, short-term investments, accounts receivable, accounts payable, accrued liabilities and long-term debt. The carrying amounts of the Company's financial instruments approximate their respective fair values due to the relatively short-term nature of these instruments, or in the case of long-term, because of the interest rates currently available to the Company for similar obligations. Valuation techniques used to measure fair value must maximize the use of observable inputs and minimize the use of unobservable inputs. GAAP describes a fair value hierarchy based on the following three levels of inputs, of which the first two are considered observable and the last unobservable, that may be used to measure fair value:

Level 1 Valuations are based on unadjusted quoted prices in active markets for identical assets or liabilities.

Level 2 Valuations are based on quoted prices for similar assets or liabilities in active markets, or quoted prices in markets that are not active for which significant inputs are observable, either directly or indirectly.

Level 3 Valuations are based on prices or valuation techniques that require inputs that are both unobservable and significant to the overall fair value measurement. Inputs reflect management's best estimate of what market participants would use in valuing the asset or liability at the measurement date.

Accounts Receivable

The majority of the Company's accounts receivable are due from companies in the commercial, industrial and agricultural industries, as well as wholesalers. Credit is extended based on an evaluation of a customer's financial condition. Generally, collateral is not required for end users; however, the payment of certain trade accounts receivable from wholesalers is secured by irrevocable standby letters of credit and/or guarantees. Accounts receivable are generally due within 30-60 days. Accounts receivable are stated at the amount the Company expects to collect from outstanding balances. The Company provides for probable uncollectible amounts through a charge to earnings and a credit to an allowance for doubtful accounts based on its assessment of the current status of individual accounts. Balances that are still outstanding after the Company has used reasonable collection efforts are written off through a charge to the allowance for doubtful accounts and a credit to accounts receivable.

Table of Contents**Financing Receivables**

The Company considers its lease balances included in consolidated current and long-term accounts receivable from its Orion Throughput Agreement, or OTA, sales-type leases to be financing receivables. Additional disclosures on the credit quality of the Company's financing receivables are as follows:

Aging Analysis as of September 30, 2012 (in thousands):

	Not past due	1-90 days past due	Greater than 90 days past due	Total past due	Total sales-type leases
Lease balances included in consolidated accounts receivable - current	\$ 3,060	\$ 125	\$ 45	\$ 170	\$ 3,230
Lease balances included in consolidated accounts receivable - long-term	5,126				5,126
Total gross sales-type leases	8,186	125	45	170	8,356
Allowance		(3)	(33)	(36)	(36)
Total net sales-type leases	\$ 8,186	\$ 122	\$ 12	\$ 134	\$ 8,320

Allowance for Credit Losses on Financing Receivables

The Company's allowance for credit losses is based on management's assessment of the collectability of customer accounts. A considerable amount of judgment is required in order to make this assessment, including a detailed analysis of the aging of the lease receivables and the current credit worthiness of the Company's customers and an analysis of historical bad debts and other adjustments. If there is a deterioration of a major customer's credit worthiness or if actual defaults are higher than historical experience, the estimate of the recoverability of amounts due could be adversely affected. The Company reviews in detail the allowance for doubtful accounts on a quarterly basis and adjusts the allowance estimate to reflect actual portfolio performance and any changes in future portfolio performance expectations. The Company believes that there is no impairment of the receivables for the sales-type leases. The Company incurred \$59,000 and \$0 of write-offs or credit losses against its OTA sales-type lease receivable balances in fiscal 2012 and for the six months ended September 30, 2012, respectively.

Inventories

Inventories consist of raw materials and components, such as ballasts, metal sheet and coil stock and molded parts; work in process inventories, such as frames and reflectors; and finished goods, including completed fixtures and systems, and wireless energy management systems and accessories, such as lamps, meters and power supplies. All inventories are stated at the lower of cost or market value with cost determined using the first-in, first-out (FIFO) method. The Company reduces the carrying value of its inventories for differences between the cost and estimated net realizable value, taking into consideration usage in the preceding 12 months, expected demand, and other information indicating obsolescence. The Company records as a charge to cost of product revenue the amount required to reduce the carrying value of inventory to net realizable value. As of March 31, 2012 and September 30, 2012, the Company had inventory obsolescence reserves of \$1.5 million and \$1.8 million, respectively.

Costs associated with the procurement and warehousing of inventories, such as inbound freight charges and purchasing and receiving costs, are also included in cost of product revenue.

Inventories were comprised of the following (in thousands):

	March 31, 2012	September 30, 2012
Raw materials and components	\$ 10,466	\$ 10,909
Work in process	969	934
Finished goods	6,697	6,568

\$ 18,132 \$ 18,411

Table of Contents***Deferred Contract Costs***

Deferred contract costs consist primarily of the costs of products delivered, and services performed, that are subject to additional performance obligations or customer acceptance. These deferred contract costs are expensed at the time the related revenue is recognized. Current deferred costs amounted to \$2.2 million and \$4.8 million as of March 31, 2012 and September 30, 2012, respectively.

Prepaid Expenses and Other Current Assets

Prepaid expenses and other current assets consist primarily of prepaid insurance premiums, prepaid license fees, purchase deposits, advance payments to contractors, unbilled revenue, prepaid taxes and miscellaneous receivables.

Property and Equipment

Property and equipment were comprised of the following (in thousands):

	March 31, 2012	September 30, 2012
Land and land improvements	\$ 1,545	\$ 1,562
Buildings and building improvements	14,717	15,601
Furniture, fixtures and office equipment	11,000	11,819
Leasehold improvements	54	58
Equipment leased to customers under Power Purchase Agreements	4,997	4,997
Plant equipment	9,990	10,182
Construction in progress	1,080	772
	43,383	44,991
Less: accumulated depreciation and amortization	(13,158)	(15,222)
Net property and equipment	\$ 30,225	\$ 29,769

Depreciation is provided over the estimated useful lives of the respective assets, using the straight-line method. Depreciable lives by asset category are as follows:

Land improvements	10 - 15 years
Buildings and building improvements	3 - 39 years
Leasehold improvements	Shorter of asset life or life of lease
Furniture, fixtures and office equipment	2 - 10 years
Plant equipment	3 - 10 years

Patents and Licenses

Patents and licenses are amortized over their estimated useful life, ranging from 7 to 17 years, using the straight line method.

Long-Term Receivables

The Company records a long-term receivable for the non-current portion of its sales-type capital lease OTA contracts. The receivable is recorded at the net present value of the future cash flows from scheduled customer payments. The Company uses the implied cost of capital from each individual contract as the discount rate.

Also included in other long-term receivables are amounts due from a third party finance company to which the Company has sold, without recourse, the future cash flows from OTAs entered into with customers. Such receivables are recorded at the present value of the future cash flows discounted between 8.8% and 11%. As of September 30, 2012, the following amounts were due from the third party finance company in

Edgar Filing: ORION ENERGY SYSTEMS, INC. - Form 10-Q

future periods (in thousands):

Fiscal 2013	\$ 616
Fiscal 2014	1,011
Fiscal 2015	955
Fiscal 2016	309
Fiscal 2017	9
Total gross long-term receivable	2,900
Less: amount representing interest	(402)
Net long-term receivable	\$ 2,498

Table of Contents**Long-Term Inventories**

The Company records long-term inventory for the non-current portion of its wireless controls inventory. All inventories are stated at the lower of cost or market value with cost determined using the FIFO method.

Other Long-Term Assets

Other long-term assets include long-term security deposits, prepaid licensing costs, a note receivable, deferred costs for a long-term contract, and deferred financing costs. Other long-term assets include \$87,000 and \$73,000 of deferred financing costs as of March 31, 2012 and September 30, 2012. Deferred financing costs related to debt issuances are amortized to interest expense over the life of the related debt issue (5 to 10 years).

Accrued Expenses

Accrued expenses include warranty accruals, accrued wages and benefits, accrued vacation, sales tax payable and other various unpaid expenses. Accrued expenses include \$31,000 and \$1.8 million of accrued reorganization costs and contractual commitments as of March 31, 2012 and September 30, 2012.

The Company generally offers a limited warranty of one year on its own manufactured products in addition to those standard warranties offered by major original equipment component manufacturers. The manufacturers' warranties cover lamps and ballasts, which are significant components in the Company's products.

Changes in the Company's warranty accrual were as follows (in thousands):

	Three Months Ended		Six Months Ended	
	September 30,		September 30,	
	2011	2012	2011	2012
Beginning of period	\$ 59	\$ 90	\$ 59	\$ 84
Provision to product cost of revenue	28	126	59	141
Charges	(22)	(129)	(53)	(138)
End of period	\$ 65	\$ 87	\$ 65	\$ 87

Revenue Recognition

The Company offers a financing program, called an OTA, for a customer's lease of the Company's energy management systems. The OTA is structured as a sales-type lease and upon successful installation of the system and customer acknowledgement that the system is operating as specified, revenue is recognized at the Company's net investment in the lease, which typically is the net present value of the future cash flows.

The Company offers a financing program, called a power purchase agreement, or PPA, for the Company's renewable energy product offerings. A PPA is a supply side agreement for the generation of electricity and subsequent sale to the end user. Upon the customer's acknowledgement that the system is operating as specified, product revenue is recognized on a monthly basis over the life of the PPA contract, which is typically in excess of 10 years.

For sales of solar photovoltaic systems, which are governed by customer contracts that require the Company to deliver functioning solar power systems and are generally completed within three to 15 months, the Company recognizes revenue from fixed price construction contracts using the percentage-of-completion method in accordance with ASC 605-35, Construction-Type and

Table of Contents

Production-Type Contracts. Under this method, revenue arising from fixed price construction contracts is recognized as work is performed based upon the percentage of incurred costs to estimated total forecasted costs. The Company has determined that the appropriate method of measuring progress on these sales is measured by the percentage of costs incurred to date of the total estimated costs for each contract as materials are installed. The percentage-of-completion method requires revenue recognition from the delivery of products to be deferred and the cost of such products to be capitalized as a deferred cost and asset on the balance sheet. The Company performs periodic evaluations of the progress of the installation of the solar photovoltaic systems using actual costs incurred over total estimated costs to complete a project. Provisions for estimated losses on uncompleted contracts, if any, are recognized in the period in which the loss first becomes probable and reasonably estimable.

Revenue is recognized on the sales of our lighting and related energy efficiency systems and products when the following four criteria are met:

persuasive evidence of an arrangement exists;

delivery has occurred and title has passed to the customer;

the sales price is fixed and determinable and no further obligation exists; and

collectability is reasonably assured

These four criteria are met for the Company's product-only revenue upon delivery of the product and title passing to the customer. At that time, the Company provides for estimated costs that may be incurred for product warranties and sales returns. Revenues are presented net of sales tax and other sales related taxes.

For sales of the Company's lighting and energy management technologies, consisting of multiple elements of revenue, such as a combination of product sales and services, the Company determines revenue by allocating the total contract revenue to each element based on their relative selling prices. In such circumstances, the Company uses a hierarchy to determine the selling price to be used for allocating revenue to deliverables: (1) vendor-specific objective evidence (VSOE) of fair value, if available, (2) third-party evidence (TPE) of selling price if VSOE is not available, and (3) best estimate of the selling price if neither VSOE nor TPE is available (a description as to how the Company determined VSOE, TPE and estimated selling price is provided below).

The nature of the Company's multiple element arrangements for the sale of its lighting and energy management technologies is similar to a construction project, with materials being delivered and contracting and project management activities occurring according to an installation schedule. The significant deliverables include the shipment of products and related transfer of title and the installation.

To determine the selling price in multiple-element arrangements, the Company established VSOE of the selling price for its HIF lighting and energy management system products using the price charged for a deliverable when sold separately. In addition, the Company records in service revenue the selling price for its installation and recycling services using management's best estimate of selling price, as VSOE or TPE evidence does not exist. Service revenue is recognized when services are completed and customer acceptance has been received. Recycling services provided in connection with installation entail the disposal of the customer's legacy lighting fixtures. The Company's service revenues, other than for installation and recycling that are completed prior to delivery of the product, are included in product revenue using management's best estimate of selling price, as VSOE or TPE evidence does not exist. These services include comprehensive site assessment, site field verification, utility incentive and government subsidy management, engineering design, and project management. For these services and for installation and recycling services, management's best estimate of selling price is determined by considering several external and internal factors including, but not limited to, pricing practices, margin objectives, competition, geographies in which the Company offers its products and services and internal costs. The determination of estimated selling price is made through consultation with and approval by management, taking into account all of the preceding factors.

Deferred revenue relates to advance customer billings, investment tax grants received related to PPAs and a separate obligation to provide maintenance on OTAs, and is classified as a liability on the Consolidated Balance Sheet. The fair value of the maintenance is readily determinable based upon pricing from third-party vendors. Deferred revenue related to maintenance services is recognized when the services are delivered, which occurs in excess of a year after the original OTA is executed.

Table of Contents**Income Taxes**

The Company recognizes deferred tax assets and liabilities for the future tax consequences of temporary differences between financial reporting and income tax basis of assets and liabilities, measured using the enacted tax rates and laws expected to be in effect when the temporary differences reverse. Deferred income taxes also arise from the future tax benefits of operating loss and tax credit carryforwards. A valuation allowance is established when management determines that it is more likely than not that all or a portion of a deferred tax asset will not be realized. For the three months ended September 30, 2012, the Company recorded a full valuation allowance of \$5.6 million against its deferred tax assets.

ASC 740, *Income Taxes*, also prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of tax positions taken or expected to be taken in a tax return. For those benefits to be recognized, a tax position must be more-likely-than-not to be sustained upon examination. The Company has classified the amounts recorded for uncertain tax benefits in the balance sheet as other liabilities (non-current) to the extent that payment is not anticipated within one year. The Company recognizes penalties and interest related to uncertain tax liabilities in income tax expense. Penalties and interest are immaterial and are included in the unrecognized tax benefits.

Deferred tax benefits have not been recognized for income tax effects resulting from the exercise of non-qualified stock options. These benefits will be recognized in the period in which the benefits are realized as a reduction in taxes payable and an increase in additional paid-in capital. For the six months ended September 30, 2011 and 2012, realized tax benefits from the exercise of stock options were \$0.8 million and \$27,000, respectively.

Stock Option Plans

The fair value of each option grant for the three and six months ended September 30, 2011 and 2012 was determined using the assumptions in the following table:

	Three Months Ended September 30,		Six Months Ended September 30,	
	2011	2012	2011	2012
Weighted average expected term	6.8 years	6.0 years	5.7 years	5.6 years
Risk-free interest rate	1.64%	0.9%	1.83%	0.8%
Expected volatility	70%	73%	70%	74.2%
Expected forfeiture rate	11.4%	15.1%	11.4%	15.1%

Net Income (Loss) per Common Share

Basic net income (loss) per common share is computed by dividing net income (loss) attributable to common shareholders by the weighted-average number of common shares outstanding for the period and does not consider common stock equivalents.

Diluted net income (loss) per common share reflects the dilution that would occur if warrants and employee stock options were exercised. In the computation of diluted net income (loss) per common share, the Company uses the treasury stock method for outstanding options and warrants. Diluted net income (loss) per common share is the same as basic net income (loss) per common share for the periods ended September 30, 2012, because the effects of potentially dilutive securities are anti-dilutive. The effect of net income (loss) per common share is calculated based upon the following shares (in thousands except share amounts):

	Three Months Ended September 30,		Six Months Ended September 30,	
	2011	2012	2011	2012
Numerator:				
Net income (loss) (in thousands)	\$ 1,358	\$ (9,659)	\$ 566	\$ (11,599)
Denominator:				
Weighted-average common shares outstanding	22,989,502	21,075,624	22,955,655	21,814,321
Weighted-average effect of assumed conversion of stock options and warrants	380,018		424,720	

Edgar Filing: ORION ENERGY SYSTEMS, INC. - Form 10-Q

Weighted-average common shares and common share equivalents outstanding	23,369,520	21,075,624	23,380,375	21,814,321
---	------------	------------	------------	------------

Net income (loss) per common share:								
Basic	\$	0.06	\$	(0.46)	\$	0.02	\$	(0.53)
Diluted	\$	0.06	\$	(0.46)	\$	0.02	\$	(0.53)

Table of Contents

The following table indicates the number of potentially dilutive securities as of the end of each period:

	September 30, 2011	September 30, 2012
Common stock options	4,018,917	4,321,571
Restricted shares		163,750
Common stock warrants	38,980	38,980
Total	4,057,897	4,524,301

Concentration of Credit Risk and Other Risks and Uncertainties

The Company previously depended on one supplier for a number of components necessary for its products, including ballasts and lamps. Purchases from this supplier accounted for 10% and 12% of total cost of revenue for the three and six months ended September 30, 2011, respectively. Currently, the Company has been able to obtain these components from multiple suppliers. For the three months ended September 30, 2012, purchases from two suppliers accounted for 11% and 12% of total cost of revenue. For the six months ended September 30, 2012, no supplier accounted for more than 10% of total cost of revenue.

The Company previously purchased a majority of its solar panels from one supplier for its sales of solar generating systems through its Orion Engineered Systems Division. Purchases from this supplier accounted for 15% and 25% of total cost of revenue for the three and six months ended September 30, 2011, respectively. Currently, the Company has been able to obtain panels from multiple suppliers. For the three and six months ended September 30, 2012, panel purchases from one supplier accounted for 11% and 6% of total cost of revenue, respectively.

For the three and six months ended September 30, 2011, two customers accounted for 21% of revenue and two customers accounted for 15% and 14% of revenue, respectively. For the three and six months ended September 30, 2012, no customer accounted for more than 10% of revenue.

As of March 31, 2012, one customer accounted for 11% of accounts receivable. As of September 30, 2012, one customer accounted for 15% of accounts receivable.

Recent Accounting Pronouncements

In May 2011, the FASB issued ASU No. 2011-04 *Fair Value Measurements (Topic 820): Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in US GAAP and International Financial Reporting Standards (IFRS)* (ASU 2011-04). ASU 2011-04 represents the converged guidance of the FASB and the IASB (the Boards) on fair value measurements. The collective efforts of the Boards and their staffs, reflected in ASU 2011-04, have resulted in common requirements for measuring fair value and for disclosing information about fair value measurements, including a consistent meaning of the term fair value. The Boards have concluded the common requirements will result in greater comparability of fair value measurements presented and disclosed in financial statements prepared in accordance with GAAP and IFRSs. The amendments in this ASU are required to be applied prospectively, and are effective for interim and annual periods beginning after December 15, 2011. The adoption of ASU 2011-04 did not have a significant impact on the Company's consolidated financial statements.

In June 2011, the FASB issued ASU No. 2011-05, *Comprehensive Income (ASC Topic 220): Presentation of Comprehensive Income*, (ASU 2011-05) which amends current comprehensive income guidance. This accounting update eliminates the option to present the components of other comprehensive income as part of the statement of shareholders' equity. Instead, the Company must report comprehensive income in either a single continuous statement of comprehensive income which contains two sections, net income and other comprehensive income, or in two separate but consecutive statements. ASU 2011-05 will be effective for public companies during the interim and annual periods beginning after December 15, 2011 with early adoption permitted. However, in December 2011, the FASB issued ASU No. 2011-12, *Deferral of the Effective Date for Amendments to the Presentation of Items Out of Accumulated Other Comprehensive Income in Accounting Standards Update No. 2011-05* (ASU 2011-12), which deferred the guidance on whether to require entities to present reclassification adjustments out of accumulated other comprehensive income by

Table of Contents

component in both the statement where net income is presented and the statement where other comprehensive income is presented for both interim and annual financial statements. ASU 2011-12 reinstated the requirements for the presentation of reclassifications that were in place prior to the issuance of ASU 2011-05 and did not change the effective date for ASU 2011-05. For public entities, the amendments in ASU 2011-05 and ASU 2011-12 are effective for fiscal years, and interim periods within those years, beginning after December 15, 2011, and should be applied retrospectively. The adoption of ASU 2011-05 and ASU 2011-12 did not have a significant impact on the Company's consolidated statements as it only requires a change in the format of the current presentation.

In December 2011, the FASB issued ASU No. 2011-11, Balance Sheet: Disclosures about Offsetting Assets and Liabilities. ASU 2011-11 requires entities to disclose information about offsetting and related arrangements of financial instruments and derivative instruments and will be applied retrospectively for all comparative periods presented. ASU 2011-11 is effective for annual reporting periods beginning on or after January 1, 2013, and interim periods within those annual periods. The Company is currently evaluating the impact of ASU 2011-11.

NOTE C RELATED PARTY TRANSACTIONS

During the six months ended September 30, 2011 and 2012, the Company purchased goods and services from an entity in the amounts of \$23,000 and \$0, respectively, for which a director of the Company serves as a member of the board of directors. The terms and conditions of such relationship are believed to be not materially more favorable to the Company or the entity than could be obtained from an independent third party.

NOTE D DEBT

Long-term debt as of March 31, 2012 and September 30, 2012 consisted of the following (in thousands):

	March 31, 2012	September 30, 2012
Term note	\$ 532	\$ 400
Customer equipment finance notes payable	6,568	5,483
First mortgage note payable	776	736
Debenture payable	765	743
Other long-term debt	854	874
Total long-term debt	9,495	8,236
Less current maturities	(2,791)	(2,871)
Long-term debt, less current maturities	\$ 6,704	\$ 5,365

New Debt Arrangement

In September 2012, the Company entered into a combination note and security agreement with First Business Equipment Finance, LLC (First Business) to finance the remaining payments on one of its operating leases with First Business. The note matures on February 15, 2013 and bears interest at 4.5%. The note is secured by the equipment originally leased.

Revolving Credit Agreement

The Company has a credit agreement (Credit Agreement) with JP Morgan Chase Bank, N.A. (JP Morgan). The Credit Agreement provides for a revolving credit facility (Credit Facility) that matures on June 30, 2013. Borrowings under the Credit Facility are limited to (i) \$15.0 million or (ii) during periods in which the outstanding principal balance of outstanding loans under the Credit Facility is greater than \$5.0 million, the lesser of (A) \$15.0 million or (B) the sum of 75% of the outstanding principal balance of certain accounts receivable of the Company and 45% of certain inventory of the Company. The Credit Agreement contains certain financial covenants, including minimum unencumbered liquidity requirements and requirements that the Company maintain a total liabilities to tangible net worth ratio not to exceed 0.50 to 1.00 as of the last day of any fiscal quarter. The Credit Agreement also contains certain restrictions on the ability of the Company to make capital or lease expenditures over prescribed limits, incur additional indebtedness, consolidate or merge, guarantee obligations of third parties, make loans or advances, declare or pay any dividend or distribution on its stock, redeem or repurchase shares of its stock or pledge assets. The Company also may cause JP Morgan to issue letters of credit for the Company's account in the aggregate principal amount of up to \$2.0 million, with the dollar

Table of Contents

amount of each issued letter of credit counting against the overall limit on borrowings under the Credit Facility. As of September 30, 2012, the Company had outstanding letters of credit totaling \$1.7 million, primarily for securing collateral requirements under equipment operating leases. There were no borrowings by the Company under the Credit Agreement as of March 31, 2012 or September 30, 2012. We were not in compliance with all covenants in the credit agreement as of September 30, 2012 and expect to receive a waiver from our bank for the covenant defaults.

The Credit Agreement is secured by a first lien security interest in the Company's accounts receivable, inventory and general intangibles, and a second lien priority in the Company's equipment and fixtures. All OTAs, PPAs, leases, supply agreements and/or similar agreements relating to solar PV and wind turbine systems or facilities, as well as all accounts receivable and assets of the Company related to the foregoing, are excluded from these liens.

The Credit Agreement provides that the Company has the option to select whether borrowings under the Credit Facility will bear interest at either (i) a daily borrowing LIBOR rate tied to a one-month maturity or (ii) a LIBOR rate tied to a maturity corresponding to an interest period selected by the Company plus, in the case of either (i) or (ii), a per annum rate spread of 2.00%, 2.50% or 3.00%, depending on the ratio of (A) earnings before interest, taxes, depreciation and amortization less income taxes paid in cash less 50% of depreciation expense to (B) the sum of interest expense paid in cash in respect of indebtedness for borrowed money plus scheduled principal payments made with respect to indebtedness for borrowed money, all as determined for the 12-month period ending as of the end of the applicable fiscal quarter.

The Company must pay a fee of 0.25% on the average daily unused amount of the Credit Facility and a fee of 2.00% on the daily average face amount of undrawn issued letters of credit. The fee on unused amounts is waived if the Company or its affiliates maintain funds on deposit with JP Morgan or its affiliates above a specified amount. The deposit threshold requirement was met as of September 30, 2012.

NOTE E INCOME TAXES

The income tax provision for the six months ended September 30, 2012 was determined by applying an estimated annual effective tax rate of 53.8% to income (loss) before taxes. For the three months ended September 30, 2012, the Company has recorded a valuation allowance of \$5.6 million, equaling the net deferred tax asset due to the uncertainty of its realization value in the future. ASC 740, *Income Taxes*, requires that a deferred tax asset be reduced by a valuation allowance if there is less than a 50% chance that it will be realized. The determination of the realization of deferred tax assets requires considerable judgment. ASC 740 prescribes the consideration of both positive and negative evidence in evaluating the need for a valuation allowance. Negative evidence for the Company includes a cumulative three year operating loss and limited visibility into future earnings. While the Company has positive evidence with a strong backlog of orders, the Company has determined that the current negative evidence outweighs the current positive evidence and has concluded that the conservative approach is to record a valuation allowance. The estimated effective income tax rate was determined by applying statutory tax rates to pretax income (loss) adjusted for certain permanent book to tax differences and tax credits.

Below is a reconciliation of the statutory federal income tax rate and the effective income tax rate:

	Six Months Ended September 30,	
	2011	2012
Statutory federal tax rate	34.0%	(34.0)%
State taxes, net	9.2%	(2.4)%
Federal tax credit	(11.6)%	(2.0)%
State tax credit	(5.9)%	0.4%
Change in valuation reserve	5.9%	92.7%
Permanent items	10.0%	1.2%
Change in tax contingency reserve	0.8%	(0.1)%
Other, net	1.0%	(2.0)%
Effective income tax rate	43.4%	53.8%

The Company is eligible for tax benefits associated with the excess of the tax deduction available for exercises of non-qualified stock options, or NQSOs, over the amount recorded at grant. The amount of the benefit is based on the ultimate deduction reflected in

Table of Contents

the applicable income tax return. Benefits of \$1.0 million were recorded in fiscal 2012 as a reduction in taxes payable and a credit to additional paid in capital based on the amount that was utilized during the year. Benefits of \$21,000 were recorded for the six months ended September 30, 2012.

As of September 30, 2012, the Company had federal net operating loss carryforwards of approximately \$11.5 million, of which \$3.2 million are associated with the exercise of NQSOs that have not yet been recognized by the Company in its financial statements. The Company also has state net operating loss carryforwards of approximately \$6.7 million, of which \$2.1 million are associated with the exercise of NQSOs. The Company also has federal tax credit carryforwards of approximately \$1.3 million and state tax credits of \$0.5 million. For the three months ended September 30, 2012, the Company has recorded a valuation allowance of \$5.6 million, equaling the net deferred tax asset due to the uncertainty of its realization value in the future. The Company considers future taxable income and ongoing prudent and feasible tax planning strategies in assessing the need for the valuation allowance. In the event that the Company determines that the deferred tax assets are able to be realized, an adjustment to the deferred tax asset would increase income in the period such determination is made.

Uncertain Tax Positions

As of September 30, 2012, the balance of gross unrecognized tax benefits was approximately \$0.4 million, all of which would reduce the Company's effective tax rate if recognized. The Company does not expect this amount to change during fiscal 2013 as none of the issues are currently under examination, the statutes of limitations do not expire within the period, and the Company is not aware of any pending litigation. Due to the existence of net operating loss and credit carryforwards, all years since 2002 are open to examination by tax authorities.

The Company has classified the amounts recorded for uncertain tax benefits in the balance sheet as other liabilities (non-current) to the extent that payment is not anticipated within one year. The Company recognizes penalties and interest related to uncertain tax liabilities in income tax expense. Penalties and interest are immaterial as of the date of adoption and are included in the unrecognized tax benefits. For the six months ended September 30, 2011 and 2012, the Company had the following unrecognized tax benefit activity (in thousands):

	Six Months Ended		Six Months Ended	
	September 30, 2011		September 30, 2012	
Unrecognized tax benefits as of beginning of period	\$	399	\$	401
Additions based on tax positions related to the current period positions		1		
Unrecognized tax benefits as of end of period	\$	400	\$	401

NOTE F COMMITMENTS AND CONTINGENCIES**Operating Leases and Purchase Commitments**

The Company leases vehicles and equipment under operating leases. Rent expense under operating leases was \$0.5 million and \$0.4 million for the three months ended September 30, 2011 and 2012, respectively; and \$1.0 million and \$0.9 million for the six months ended September 30, 2011 and 2012, respectively. The Company enters into non-cancellable purchase commitments for certain inventory items in order to secure better pricing and ensure materials are on hand to meet anticipated order volume and customer expectations, as well as for capital expenditures. As of September 30, 2012, the Company had entered into \$11.6 million of purchase commitments related to fiscal 2013, including \$1.2 million for operating lease commitments and \$10.4 million for inventory purchase commitments. As of September 30, 2012, the Company had entered into an agreement to repurchase \$1.5 million of its outstanding common stock.

NOTE G SHAREHOLDERS EQUITY**Shareholder Rights Plan**

On January 7, 2009, the Company's Board of Directors adopted a shareholder rights plan and declared a dividend distribution of one common share purchase right (a "Right") for each outstanding share of the Company's common stock. The issuance date for the distribution of the Rights was February 15, 2009 to shareholders of record on February 1, 2009. Each Right entitles the registered holder to purchase from the Company one share of the Company's common stock at a price of \$30.00 per share, subject to adjustment (the "Purchase Price").

Table of Contents

The Rights will not be exercisable (and will be transferable only with the Company's common stock) until a Distribution Date occurs (or the Rights are earlier redeemed or expire). A Distribution Date generally will occur on the earlier of a public announcement that a person or group of affiliated or associated persons (an Acquiring Person) has acquired beneficial ownership of 20% or more of the Company's outstanding common stock (a Shares Acquisition Date) or 10 business days after the commencement of, or the announcement of an intention to make, a tender offer or exchange offer that would result in any such person or group of persons acquiring such beneficial ownership.

If a person becomes an Acquiring Person, holders of Rights (except as otherwise provided in the shareholder rights plan) will have the right to receive that number of shares of the Company's common stock having a market value of two times the then-current Purchase Price, and all Rights beneficially owned by an Acquiring Person, or by certain related parties or transferees, will be null and void. If, after a Shares Acquisition Date, the Company is acquired in a merger or other business combination transaction or 50% or more of its consolidated assets or earning power are sold, proper provision will be made so that each holder of a Right (except as otherwise provided in the shareholder rights plan) will thereafter have the right to receive that number of shares of the acquiring company's common stock which at the time of such transaction will have a market value of two times the then-current Purchase Price.

Until a Right is exercised, the holder thereof, as such, will have no rights as a shareholder of the Company. At any time prior to a person becoming an Acquiring Person, the Board of Directors of the Company may redeem the Rights in whole, but not in part, at a price of \$0.001 per Right. Unless they are extended or earlier redeemed or exchanged, the Rights will expire on January 7, 2019.

Employee Stock Purchase Plan

In August 2010, the Company's board of directors approved a non-compensatory employee stock purchase plan, or ESPP. The ESPP authorizes 2,500,000 shares to be issued from treasury or authorized shares to satisfy employee share purchases under the ESPP. All full-time employees of the Company are eligible to be granted a non-transferable purchase right each calendar quarter to purchase directly from the Company up to \$20,000 of the Company's common stock at a purchase price equal to 100% of the closing sale price of the Company's common stock on the NYSE MKT exchange on the last trading day of each quarter. The ESPP allows for employee loans from the Company, except for Section 16 officers, limited to 20% of an individual's annual income and no more than \$250,000 outstanding at any one time. Interest on the loans is charged at the 10-year loan IRS rate and is payable at the end of each calendar year or upon loan maturity. The loans are secured by a pledge of any and all the Company's shares purchased by the participant under the ESPP and the Company has full recourse against the employee, including offset against compensation payable. The Company had the following shares issued from treasury as of March 31, 2012 and for the six months ended September 30, 2012:

	Shares Issued Under ESPP Plan	Closing Market Price	Shares Issued Under Loan Program	Dollar Value of Loans Issued	Repayment of Loans
Cumulative through March 31, 2012	102,810	\$2.38 - 4.04	86,148	\$ 279,350	\$ 58,876
Quarter Ended June 30, 2012	9,232	\$2.20	7,955	17,500	1,600
Quarter Ended September 30, 2012	27,467	\$1.98	25,606	50,700	4,060
Total as of September 30, 2012	139,509	\$1.98 - 4.04	119,709	\$ 347,550	\$ 64,536

Loans issued to employees are reflected on the Company's balance sheet as a contra-equity account.

Share Repurchase Program

In October 2011, the Company's Board of Directors approved a share repurchase program authorizing the Company to repurchase in aggregate up to a maximum of \$1.0 million of the Company's outstanding common stock. In November 2011, the Company's Board of Directors approved an increase to the share repurchase program authorizing the Company to repurchase in aggregate up to a maximum of \$2.5 million of the Company's outstanding common stock. In April 2012, the Company's Board approved another increase to the share repurchase program authorizing the Company to repurchase in aggregate up to a maximum of \$7.5 million of the Company's outstanding common stock. As of September 30, 2012, the Company had repurchased a total of 2.4 million shares of common stock at a total cost of \$5.3 million under the program.

Table of Contents**NOTE H STOCK OPTIONS, RESTRICTED SHARES AND WARRANTS**

The Company grants stock options under its 2003 Stock Option and 2004 Stock and Incentive Awards Plans (the Plans). Under the terms of the Plans, the Company has reserved 13,500,000 shares for issuance to key employees, consultants and directors. The options generally vest and become exercisable ratably between one month and five years although longer and shorter vesting periods have been used in certain circumstances. Exercisability of the options granted to employees are contingent on the employees' continued employment and non-vested options are subject to forfeiture if employment terminates for any reason. Options under the Plans have a maximum life of 10 years. In the past, the Company has granted both ISOs and NQSOs, although in July 2008, the Company adopted a policy of thereafter only granting NQSOs. Certain non-employee directors have elected to receive stock awards in lieu of cash compensation pursuant to elections made under the Company's non-employee director compensation program. The Plans also provide to certain employees accelerated vesting in the event of certain changes of control of the Company as well as under other special circumstances.

In fiscal 2011, the Company converted all of its existing ISO awards to NQSO awards. No consideration was given to the employees for their voluntary conversion of ISO awards.

In June 2012, the Compensation Committee of the Board of Directors approved the issuance of restricted shares under the Plans to key employees to provide an opportunity for such employees to earn long-term equity incentive awards. The restricted shares are settled in Company stock when the restriction period ends. Compensation cost for restricted shares granted to employees is recognized ratably over the vesting term, which is between three to five years. Settlement of the shares is contingent on the employees' continued employment and non-vested shares are subject to forfeiture if employment terminates for any reason. An aggregate of 138,750 of restricted shares were granted on June 18, 2012 valued at a price per share of \$2.00, which was the closing market price as of the grant date. Additionally, 25,000 restricted shares were granted on September 27, 2012 valued at a price per share of \$1.80, which was the closing market price as of the grant date.

For the three and six months ended September 30, 2012, the Company issued zero and 13,547 shares under the 2004 Stock and Incentive Awards Plan to certain non-employee directors who elected to receive stock awards in lieu of cash compensation. The shares were valued at \$2.03 per share, the closing market price as of the issuance date. Additionally, during the three and six months ended September 30, 2012, the Company issued zero and 3,000 shares to a consultant as part of a consulting compensation agreement. The shares were valued at \$2.03 per share, the closing market price as of the issuance date.

The following amounts of stock-based compensation were recorded (in thousands):

	Three Months Ended September 30,		Six Months Ended September 30,	
	2011	2012	2011	2012
Cost of product revenue	\$ 35	\$ 26	\$ 77	\$ 57
General and administrative	140	269	296	419
Sales and marketing	124	102	272	279
Research and development	7	7	12	15
Total	\$ 306	\$ 404	\$ 657	\$ 770

As of September 30, 2012, compensation cost related to non-vested common stock-based compensation, excluding restricted share awards, amounted to \$3.9 million over a remaining weighted average expected term of 6.8 years.

The following table summarizes information with respect to the Plans:

	Equity Awards Outstanding				
	Shares Available for Grant	Number of Shares	Weighted Average Exercise Price	Weighted Average Remaining Contractual Term (in years)	Aggregate Intrinsic Value
Balance at March 31, 2012	1,406,090	3,697,633	\$ 3.76	6.64	

Edgar Filing: ORION ENERGY SYSTEMS, INC. - Form 10-Q

Granted stock options	(795,876)	795,876	2.04		
Granted shares	(16,547)				
Restricted shares	(163,750)				
Forfeited	151,938	(151,938)	3.80		
Exercised		(20,000)	2.25		
Balance at September 30, 2012	581,855	4,321,571	\$ 3.45	6.82	\$ 22,140
Exercisable at September 30, 2012		2,077,991	\$ 3.97	4.98	\$ 22,140

Table of Contents

The aggregate intrinsic value represents the total pre-tax intrinsic value, which is calculated as the difference between the exercise price of the underlying stock options and the fair value of the Company's closing common stock price of \$1.98 as of September 30, 2012.

A summary of the status of the Company's outstanding non-vested stock options as of September 30, 2012 was as follows:

Non-vested at March 31, 2012	1,810,249
Granted	795,876
Vested	(210,607)
Forfeited	(151,938)
Non-vested at September 30, 2012	2,243,580

During the first half of fiscal 2013, the Company granted restricted shares to key employees as follows (which are included in the above stock plan activity tables):

Shares issued	163,750
Per share price on grant date	\$ 1.80 - 2.00
Compensation expense	\$ 16,000

As of September 30, 2012, the amount of deferred stock-based compensation related to grants of restricted shares, to be recognized over a remaining period of 4.75 years, was approximately \$0.3 million.

The Company has previously issued warrants in connection with various private placement stock offerings and services rendered. The warrants granted the holder the option to purchase common stock at specified prices for a specified period of time. No warrants were issued in fiscal 2012 or during the six months ended September 30, 2012.

A summary of outstanding warrants at September 30, 2012 follows:

	Number of Shares	Exercise Price	Expiration
Balance at March 31, 2012	38,980	\$ 2.25	Fiscal 2015
Balance at September 30, 2012	38,980	\$ 2.25	Fiscal 2015

NOTE I SEGMENTS

The descriptions of the Company's segments and their summary financial information are presented below.

Energy Management

The Energy Management Division develops, manufactures, integrates and sells commercial HIF and other lighting systems and energy management systems.

Engineered Systems

The Engineered Systems Division sells and integrates alternative renewable energy systems, such as solar and wind systems.

Table of Contents

Corporate and Other

Corporate and Other is comprised of selling, general and administrative expenses not directly allocated to the Company's segments and adjustments to reconcile to consolidated results, which primarily include intercompany eliminations.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion and analysis of our financial condition and results of operations should be read together with our unaudited condensed consolidated financial statements and related notes included elsewhere in this Form 10-Q as well as our audited consolidated financial statements and related notes included in our Annual Report on Form 10-K for the fiscal year ended March 31, 2012.

Cautionary Note Regarding Forward-Looking Statements

Any statements in this Quarterly Report on Form 10-Q about our expectations, beliefs, plans, objectives, prospects, financial condition, assumptions or future events or performance are not historical facts and are forward-looking statements as that term is defined under the federal securities laws. These statements are often, but not always, made through the use of words or phrases such as believe, anticipate, should, intend, plan, will, expects, estimates, projects, positioned, strategy, outlook and similar words. You should read the statements that contain words carefully. Such forward-looking statements are subject to a number of risks, uncertainties and other factors that could cause actual results to differ materially from what is expressed or implied in such forward-looking statements. There may be events in the future that we are not able to predict accurately or over which we have no control. Potential risks and uncertainties include, but are not limited to, those discussed in Part I, Item 1A. Risk Factors in our fiscal 2012 Annual Report filed on Form 10-K for the fiscal year ended March 31, 2012 and elsewhere in this Quarterly Report. We urge you not to place undue reliance on these forward-looking statements, which speak only as of the date of this report. We do not undertake any obligation to release publicly any revisions to such forward-looking statements to reflect events or uncertainties after the date hereof or to reflect the occurrence of unanticipated events.

Recent Management Change and Strategic Refocus

In September 2012, our Board of Directors elected John H. Scribante as our new Chief Executive Officer. Prior to his appointment, Mr. Scribante was the President of our Orion Engineered Systems division and had also served in executive sales management positions. As a result of this management change, we are refocusing our strategic initiatives to include: (i) enhancing and refocusing our sales organization with an emphasis on expanding our direct sales efforts; (ii) streamlining our product development initiatives with a focus on activities that will deliver the greatest return on our investment and disciplined product control releases versus a process of continuous development; and (iii) cost reduction initiatives to deliver profitability.

During the fiscal 2013 second quarter, we recorded operating expenses related to reorganization costs and contractual commitments of \$2.1 million, which included \$1.7 million to general and administrative expenses and \$0.4 million to sales and marketing expenses. Additionally, we recorded a \$5.6 million non-cash income tax expense to establish a valuation allowance against our deferred tax assets.

As part of our cost reduction initiatives, we recently identified additional cost containment initiatives which we believe will result in annualized cost reductions of \$4.0 million. These initiatives include headcount reductions, material and component cost savings in our HIF lighting products and reductions in consulting and other discretionary spending. We intend to implement these cost reductions during the second half of fiscal 2013.

Overview

We design, manufacture, market and implement energy management systems consisting primarily of high-performance, energy efficient lighting systems, controls and related services and market and implement renewable energy systems consisting primarily of solar generating photovoltaic, or PV, systems and wind turbines. We operate in two business segments, which we refer to as our Energy Management Division and our Engineered Systems Division.

We typically generate the majority of our revenue from sales of high intensity fluorescent, or HIF, lighting systems and related services to commercial and industrial customers. We typically sell our HIF lighting systems in replacement of our customers' existing high intensity discharge, or HID, fixtures. We call this replacement process a retrofit. We frequently engage our customers' existing electrical contractor to provide installation and project management services. We also sell our HIF lighting systems on a wholesale basis, principally to electrical contractors and value-added resellers to sell to their own customer bases.

Table of Contents

We have more recently increased our product development activities surrounding light emitting diode, or LED, lighting and energy management systems. We believe that we have taken a responsible approach to this emerging technology. Based upon recent improvements, including drastic reduction of chip prices, availability of name-brand drivers and the integration with our Intelite controls offerings, we believe that LED will become a larger part of our overall interior lighting strategy in the future.

We have sold and installed more than 2,391,000 of our HIF lighting systems in over 8,477 facilities from December 1, 2001 through September 30, 2012. We have sold our products to 145 Fortune 500 companies, many of which have installed our HIF lighting systems in multiple facilities. Our top direct customers by revenue in fiscal 2012 included Coca-Cola Enterprises, Inc., International Paper Company, U.S. Foodservice, SYSCO Corp., and United Stationers, Inc.

Our fiscal year ends on March 31. We call our prior fiscal year which ended on March 31, 2012, fiscal 2012. We call our current fiscal year, which will end on March 31, 2013, fiscal 2013. Our fiscal first quarter ended on June 30, our fiscal second quarter ended on September 30, our fiscal third quarter ends on December 31 and our fiscal fourth quarter ends on March 31.

Because of the recessed state of the global economy since 2009, especially as it has impacted capital equipment manufacturers, our results for the first half of fiscal 2013 continued to be adversely affected by lengthened customer sales cycles and sluggish customer capital spending. To address these difficult economic conditions, we implemented several cost reduction initiatives. During the first quarter of fiscal 2010, we implemented \$3.2 million of annualized cost reductions. These cost containment initiatives included reductions related to headcount, work hours and discretionary spending and began to show results in the second half of fiscal 2010 and the first half of fiscal 2011. During the second quarter of fiscal 2011, we identified an additional \$1 million of annualized cost reductions related to decreased product costs, improved manufacturing efficiencies and reduced operating expenses. We realized these cost reductions beginning during the fiscal 2011 third quarter through reduction in general and administrative expenses and improved product margins for our HIF lighting systems. During fiscal 2012, in recognition of an improving economy compared to the previous year, we focused our efforts on activities to increase revenue. These investments included the creation of a telemarketing call center for the purpose of customer lead generation, the establishment of a sales office and hiring of personnel in Houston, Texas and headcount additions to our retail sales force and our Engineered Systems Division. Despite these recent investments into revenue generating activities, we have continued to experience a difficult capital spending environment during the first half of fiscal 2013.

In response to the constraints on our customers' capital spending budgets, we have been aggressively promoting the advantages to our customers of purchasing our energy management systems through our Orion Throughput Agreement, or OTA, financing program. Our OTA financing program provides for our customer's purchase of our energy management systems without an up-front capital outlay. During fiscal 2012, we entered into an arrangement with a national equipment finance company to provide immediate non-recourse funding of pre-credit approved OTA finance contracts upon project completion and customer acceptance. Additionally, we completed a \$5.0 million OTA line of credit, of which we borrowed \$3.2 million, for the purpose of funding OTA projects upon project completion and customer acceptance, for which we chose to hold the contracts internally. The OTA line of credit expired in September 2012 for new financing, but not for drawn amounts. We now have secured multiple funding sources for our OTA projects. In the future, we expect to use our external sources of funding for OTA projects that are available to us and reduce the number of projects funded internally or funded through bank debt. We expect that the number of customers who choose to purchase our systems by using our OTA financing program will increase in future periods. Additionally, we have provided a financing program to our alternative renewable energy system customers called a solar Power Purchase Agreement, or PPA, as an alternative to purchasing our systems for cash. The PPA is a supply side agreement for the generation of electricity and subsequent sale to the end user. We do not intend to use our own cash balances to fund future PPA opportunities and have been able to secure several external sources of funding for PPAs on behalf of our customers.

Despite these recent economic challenges, we remain optimistic about our long-term financial performance. Our long-term optimism is based upon the considerable size of the existing market opportunity for lighting retrofits, the continued development of our new products and product enhancements, the opportunity for additional revenue from sales of renewable technologies through our Orion Engineered Systems Division, our cost reduction initiatives and the opportunity to increase gross margins through the leverage of our under-utilized manufacturing capacity.

Our annual report on Form 10-K for the fiscal year ended March 31, 2012 provides additional information about our business and operations.

Table of Contents

Revenue and Expense Components

Revenue. We sell our energy management products and services directly to commercial and industrial customers, and indirectly to end users through wholesale sales to electrical contractors and value-added resellers. We currently generate the majority of our revenue from sales of HIF lighting systems and related services to commercial and industrial customers. While our services include comprehensive site assessment, site field verification, utility incentive and government subsidy management, engineering design, project management, installation and recycling in connection with our retrofit installations, we separately recognize service revenue only for our installation and recycling services. Our service revenues are recognized when services are complete and customer acceptance has been received. In fiscal 2010 and 2011, we increased our efforts to expand our value-added reseller channels, including through developing a partner standard operating procedural kit, providing our partners with product marketing materials and providing training to channel partners on our sales methodologies. These wholesale channels accounted for approximately 64% of our total revenue in fiscal 2012, not taking into consideration our renewable technologies revenue generated through our Orion Engineered Systems Division. During the first half of fiscal 2013, wholesale revenues accounted for approximately 58% of our total revenue, not taking into consideration our renewable technologies revenue generated through our Orion Engineered Systems Division, compared to 62% for the first half of fiscal 2012. In fiscal 2012, we focused our expansion efforts on our direct retail sales channel through the creation of a telemarketing call center for the purpose of customer lead generation, the establishment of a sales office and personnel in Houston, Texas and headcount additions to our retail sales force and our Engineered Systems Division. In the future, we intend to continue to selectively build out our retail sales force, focusing on geographic markets where we do not have a strong wholesale presence and the market contains a larger number of commercial and industrial facilities.

Additionally, we offer our OTA sales-type financing program under which we finance the customer's purchase of our energy management systems. The OTA program was established to assist customers who are interested in purchasing our energy management systems but who have capital expenditure budget limitations. Our OTA contracts are capital leases under GAAP and we record revenue at the present value of the future payments at the time customer acceptance of the installed and operating system is complete. Our OTA contracts under this sales-type financing are either structured with a fixed term, typically 60 months, and a bargain purchase option at the end of term, or are one year in duration and, at the completion of the initial one-year term, provide for (i) one to four automatic one-year renewals at agreed upon pricing; (ii) an early buyout for cash; or (iii) the return of the equipment at the customer's expense. The revenue that we are entitled to receive from the sale of our lighting fixtures under our OTA financing program is fixed and is based on the cost of the lighting fixtures and applicable profit margin. Our revenue from agreements entered into under this program is not dependent upon our customers' actual energy savings. We recognize revenue from OTA contracts at the net present value of the future cash flows at the completion date of the installation of the energy management systems and the customer's acknowledgement that the system is operating as specified. Upon completion of the installation, we may choose to sell the future cash flows and residual rights to the equipment on a non-recourse basis to third party finance companies in exchange for cash and future payments.

In fiscal 2012, we recognized \$10.2 million of revenue from 139 completed OTA contracts. For the three months ended September 30, 2012, we recognized \$1.6 million of revenue from 33 completed contracts compared to \$3.6 million from 29 completed contracts during the three months ended September 30, 2011. For the six months ended September 30, 2012, we recognized \$3.4 million of revenue from 52 completed contracts compared to \$6.5 million from 82 completed contracts for the six months ended September 30, 2011. In the future, we expect an increase in the volume of OTA contracts as our customers take advantage of the value proposition without incurring any up-front capital cost.

Our PPA financing program provides for our customer's purchase of electricity from our renewable energy generating assets without an upfront capital outlay. Our PPA is a longer-term contract, typically in excess of 10 years, in which we receive monthly payments over the life of the contract. This program creates an ongoing recurring revenue stream, but reduces near-term revenue as the payments are recognized as revenue on a monthly basis over the life of the contract versus upfront upon product shipment or project completion. In fiscal 2012, we recognized \$0.6 million of revenue from completed PPAs. In the first half of fiscal 2013, we recognized \$0.4 million of revenue from completed PPAs. As of September 30, 2012, we had signed one customer to two separate PPAs representing future potential discounted revenue streams of \$2.7 million. We discount the future revenue from PPAs due to the long-term nature of the contracts, typically in excess of 10 years. The timing of expected future discounted GAAP revenue recognition and the resulting operating cash inflows from PPAs, assuming the systems perform as designed, was as follows as of September 30, 2012 (in thousands):

Fiscal 2013	\$ 205
Fiscal 2014	465
Fiscal 2015	277
Fiscal 2016	277
Fiscal 2017	276
Beyond	1,217

Total expected future discounted revenue from PPAs	\$ 2,717
--	----------

Table of Contents

For sales of our solar PV systems, which are governed by customer contracts that require us to deliver functioning solar power systems and are generally completed within three to 15 months, we recognize revenue from fixed price construction contracts using the percentage-of-completion method. Under this method, revenue arising from fixed price construction contracts is recognized as work is performed based upon the percentage of incurred costs to estimated total forecasted costs. We have determined that the appropriate method of measuring progress on these sales is measured by the percentage of costs incurred to date of the total estimated costs for each contract as materials are installed. The percentage-of-completion method requires revenue recognition from the delivery of products to be deferred and the cost of such products to be capitalized as a deferred cost and current asset on the balance sheet. We perform periodic evaluations of the progress of the installation of the solar PV systems using actual costs incurred over total estimated costs to complete a project. Provisions for estimated losses on uncompleted contracts, if any, are recognized in the period in which the loss first becomes probable and reasonably estimable.

We recognize revenue on product only sales of our lighting and energy management systems at the time of shipment. For lighting and energy management systems projects consisting of multiple elements of revenue, such as a combination of product sales and services, we recognize revenue by allocating the total contract revenue to each element based on their relative selling prices. We determine the selling price of products based upon the price charged when these products are sold separately. For services, we determine the selling price based upon management's best estimate giving consideration to pricing practices, margin objectives, competition, scope and size of individual projects, geographies in which we offer our products and services and internal costs. We recognize revenue at the time of product shipment on product sales and on services completed prior to product shipment. We recognize revenue associated with services provided after product shipment, based on their relative selling price, when the services are completed and customer acceptance has been received. When other significant obligations or acceptance terms remain after products are delivered, revenue is recognized only after such obligations are fulfilled or acceptance by the customer has occurred.

Our dependence on individual key customers can vary from period to period as a result of the significant size of some of our solar PV projects. Our top 10 customers accounted for approximately 35% and 30% of our total revenue for the first half of fiscal 2012 and fiscal 2013, respectively. Two customers, individually, accounted for 14% and 15% of our total revenue in the first half of fiscal 2012. No customer accounted for more than 10% of our total revenue in the first half of fiscal 2013. To the extent that large solar PV projects become a greater component of our total revenue, we may experience more customer concentration in given periods. The loss of, or substantial reduction in sales volume to, any of our significant customers could have a material adverse effect on our total revenue in any given period and may result in significant annual and quarterly revenue variations.

Our level of total revenue for any given period is dependent upon a number of factors, including (i) the demand for our products and systems, including our OTA and PPA programs and any new products, applications and service that we may introduce through our Orion Engineered Systems Division; (ii) the number and timing of large retrofit and multi-facility retrofit, or roll-out, projects; (iii) the level of our wholesale sales; (iv) our ability to realize revenue from our services; (v) market conditions; (vi) our execution of our sales process; (vii) our ability to compete in a highly competitive market and our ability to respond successfully to market competition; (viii) the selling price of our products and services; (ix) changes in capital investment levels by our customers and prospects; and (x) customer sales and budget cycles. As a result, our total revenue may be subject to quarterly variations and our total revenue for any particular fiscal quarter may not be indicative of future results.

Backlog. We define backlog as the total contractual value of all firm orders received for our lighting and solar products and services where delivery of product or completion of services has not yet occurred as of the end of any particular reporting period. Such orders must be evidenced by a signed proposal acceptance or purchase order from the customer. Our backlog does not include PPAs or national contracts that have been negotiated, but under which we have not yet received a purchase order for the specific location. As of September 30, 2012, we had a backlog of firm purchase orders of approximately \$46.7 million, which included \$41.6 million of solar PV orders, compared to \$50.5 million as of June 30, 2012, which included \$44.3 million of solar PV orders. We currently expect approximately \$18.0 million of our September 30, 2012 backlog to be recognized as revenue in the second half of fiscal 2013 and the remainder in future fiscal years. We typically expect the non-solar portion of our backlog to be recognized as revenue within 90 days from receipt of order. Our solar PV orders are typically longer-term construction type projects and we expect revenue to be recognized over a period of between three and 24 months from receipt of order, dependent upon the size and complexity of the project. As a result of the increased volume of our solar PV orders, the continued lengthening of our customer's purchasing decisions because of current recessed economic conditions and related factors, the continued shortening of our installation cycles and the number of projects sold through OTAs, a comparison of backlog from period to period is not necessarily meaningful and may not be indicative of actual revenue recognized in future periods.

Table of Contents

Cost of Revenue. Our total cost of revenue consists of costs for: (i) raw materials, including sheet, coiled and specialty reflective aluminum; (ii) electrical components, including ballasts, power supplies and lamps; (iii) materials for sales of solar PV systems through our Engineered Systems Division, including solar panels, inverters and wiring; (iv) wages and related personnel expenses, including stock-based compensation charges, for our fabricating, coating, assembly, logistics and project installation service organizations; (v) manufacturing facilities, including depreciation on our manufacturing facilities and equipment, taxes, insurance and utilities; (vi) warranty expenses; (vii) installation and integration; and (viii) shipping and handling. Our cost of aluminum can be subject to commodity price fluctuations, which we attempt to mitigate with forward fixed-price, minimum quantity purchase commitments with our suppliers. We also purchase many of our electrical components through forward purchase contracts. We buy most of our specialty reflective aluminum from a single supplier. Previously, we purchased most of our ballast and lamp components from a single supplier. Purchases from this supplier accounted for 12% of total cost of revenue for the first half of fiscal 2012. Currently, we purchase these components from multiple suppliers. For the first half of fiscal 2013, purchases from two suppliers accounted for 16% of total cost of revenue. Previously, we purchased most of our solar panels from one supplier for sales of our solar generating systems. Purchases from this supplier accounted for 25% of total cost of revenue for the first half of fiscal 2012. Currently, we have been able to obtain panels from multiple suppliers. For the first half of fiscal 2013, panel purchases from one supplier accounted for 6% of total cost of revenue. Our cost of revenue from OTA projects is recorded upon customer acceptance and acknowledgement that the system is operating as specified. Our production labor force is non-union and, as a result, our production labor costs have been relatively stable. We have been expanding our network of qualified third-party installers to realize efficiencies in the installation process. During fiscal 2011 and fiscal 2012, we reduced headcounts and improved production product flow through the reengineering of our assembly stations.

Gross Margin. Our gross profit has been, and will continue to be, affected by the relative levels of our total revenue and our total cost of revenue, and as a result, our gross profit may be subject to quarterly variation. Our gross profit as a percentage of total revenue, or gross margin, is affected by a number of factors, including: (i) our level of solar PV sales which have greater margin volatility due to recent decreases in product costs versus our traditional energy management systems; (ii) our mix of large retrofit and multi-facility roll-out projects with national accounts; (iii) the level of our wholesale and partner sales (which generally have historically resulted in lower relative gross margins, but higher relative net margins, than our sales to direct customers); (iv) our realization rate on our billable services; (v) our project pricing; (vi) our level of warranty claims; (vii) our level of utilization of our manufacturing facilities and production equipment and related absorption of our manufacturing overhead costs; (viii) our level of efficiencies in our manufacturing operations; and (ix) our level of efficiencies from our subcontracted installation service providers.

Operating Expenses. Our operating expenses consist of: (i) general and administrative expenses; (ii) sales and marketing expenses; and (iii) research and development expenses. Personnel related costs are our largest operating expense. In fiscal 2012, we increased headcount in our sales areas for telemarketing and direct sales employees. In 2013, we expect to continue to selectively increase headcount in our sales areas.

Our general and administrative expenses consist primarily of costs for: (i) salaries and related personnel expenses, including stock-based compensation charges related to our executive, finance, human resource, information technology and operations organizations; (ii) public company costs, including investor relations, external audit and internal audit; (iii) occupancy expenses; (iv) professional services fees; (v) technology related costs and amortization; (vi) asset impairment charges; and (vii) corporate-related travel.

Our sales and marketing expenses consist primarily of costs for: (i) salaries and related personnel expenses, including stock-based compensation charges related to our sales and marketing organization; (ii) internal and external sales commissions and bonuses; (iii) travel, lodging and other out-of-pocket expenses associated with our selling efforts; (iv) marketing programs; (v) pre-sales costs; (vi) bad debt; and (vii) other related overhead.

Our research and development expenses consist primarily of costs for: (i) salaries and related personnel expenses, including stock-based compensation charges, related to our engineering organization; (ii) payments to consultants; (iii) the design and development of new energy management products and enhancements to our existing energy management system; (iv) quality assurance and testing; and (v) other related overhead. We expense research and development costs as incurred.

In fiscal 2012, we invested in sales expansion initiatives, including the creation of a telemarketing call center for the purpose of customer lead generation, the establishment of a sales office and hiring of personnel in Houston, Texas and headcount additions to our

Table of Contents

retail sales force and our Engineered Systems Division. We expense all pre-sale costs incurred in connection with our sales process prior to obtaining a purchase order. These pre-sale costs may reduce our net income in a given period prior to recognizing any corresponding revenue. In the future, we intend to continue to invest in headcount additions to our retail sales force dependent upon geographic market opportunities and availability of sales talent. We also intend to continue investing in our research and development of new and enhanced energy management products and services.

We recognize compensation expense for the fair value of our stock option and restricted stock awards granted over their related vesting period. We recognized \$0.7 million for both the first half of fiscal 2012 and fiscal 2013. As a result of prior option and restricted stock grants, we expect to recognize an additional \$4.2 million of stock-based compensation over a weighted average period of approximately seven years, including \$0.7 million in the last six months of fiscal 2013. These charges have been, and will continue to be, allocated to cost of product revenue, general and administrative expenses, sales and marketing expenses and research and development expenses based on the departments in which the personnel receiving such awards have primary responsibility. A substantial majority of these charges have been, and likely will continue to be, allocated to general and administrative expenses and sales and marketing expenses.

Interest Expense. Our interest expense is comprised primarily of interest expense on outstanding borrowings under long-term debt obligations, including the amortization of previously incurred financing costs. We amortize deferred financing costs to interest expense over the life of the related debt instrument, ranging from five to ten years.

Interest Income. We report interest income earned from our financed OTA contracts and on our cash and cash equivalents and short term investments.

Income Taxes. As of September 30, 2012, we had net operating loss carryforwards of approximately \$11.5 million for federal tax purposes and \$6.7 million for state tax purposes. Included in these loss carryforwards were \$3.2 million for federal and \$2.1 million for state tax purposes of compensation expenses that were associated with the exercise of nonqualified stock options. The benefit from our net operating losses created from these compensation expenses has not yet been recognized in our financial statements and will be accounted for in our shareholders' equity as a credit to additional paid-in capital as the deduction reduces our income taxes payable. We also had federal tax credit carryforwards of approximately \$1.3 million and state credit carryforwards of approximately \$0.5 million. A valuation allowance of \$5.6 million equaling the net deferred tax assets was established during the second quarter of fiscal 2013 due to the uncertainty of its realization value in the future. The determination of the realization of deferred tax assets requires considerable judgment including both positive and negative evidence in evaluating the need for a valuation allowance. Our negative evidence included a cumulative three year operating loss, an expected loss for fiscal year 2013 and limited visibility into future earnings. Our positive evidence included a strong backlog of orders; however, we determined that the current negative evidence outweighed the current positive evidence. We considered future taxable income and ongoing prudent and feasible tax planning strategies in assessing the need for the valuation allowance. In the event that we determine that the deferred tax assets are able to be realized, an adjustment to the deferred tax asset would increase income in the period such determination is made. A valuation allowance of \$0.4 million had been previously set up for our state tax credits due to our state apportioned income and the potential expiration of the state tax credits due to the carryforward period. These federal and state net operating losses and credit carryforwards are available, subject to the discussion in the following paragraph, to offset future taxable income and, if not utilized, will begin to expire in varying amounts between 2019 and 2032.

Generally, a change of more than 50% in the ownership of a company's stock, by value, over a three-year period constitutes an ownership change for federal income tax purposes. An ownership change may limit a company's ability to use its net operating loss carryforwards attributable to the period prior to such change. There was no limitation that occurred for fiscal 2011 or fiscal 2012.

Table of Contents**Results of Operations**

The following table sets forth the line items of our consolidated statements of operations on an absolute dollar basis and as a relative percentage of our total revenue for each applicable period, together with the relative percentage change in such line item between applicable comparable periods set forth below (dollars in thousands):

	Three Months Ended September 30,					Six Months Ended September 30,				
	2011		2012		% Change	2011		2012		% Change
	Amount	% of Revenue	Amount	% of Revenue		Amount	% of Revenue	Amount	% of Revenue	
Product revenue	\$ 30,111	90.0%	\$ 16,931	87.2%	(43.8)%	\$ 47,472	91.8%	\$ 30,511	87.9%	(35.7)%
Service revenue	3,364	10.0%	2,477	12.8%	(26.4)%	4,224	8.2%	4,207	12.1%	(0.4)%

Income tax expense	1,040	3.1%	5,631	29.0%	441.4%	434	0.8%	4,057	11.7%	834.8%
Net income (loss)	\$ 1,358	4.1%	\$ (9,659)	(49.8)%	(811.3)%	\$ 566	1.1%	\$ (11,599)	(33.4)%	(2,149.3)%

Revenue. Product revenue decreased from \$30.1 million for the fiscal 2012 second quarter to \$16.9 million for the fiscal 2013 second quarter, a decrease of \$13.2 million, or 44%. The decrease in product revenue was a result of decreased sales of our renewable energy systems and HIF lighting systems. During the first half of fiscal 2012, we had two large solar PV projects under construction and did not have similar size projects under construction during the first half of fiscal 2013. Service revenue decreased from \$3.4 million for the fiscal 2012 second quarter to \$2.5 million for the fiscal 2013 second quarter, a decrease of \$0.9 million, or 26%. The decrease in service revenue was a result of the related service revenue from the decrease in sales of solar renewable energy systems. Total revenue from renewable energy systems was \$2.8 million for the fiscal 2013 second quarter compared to \$16.0 million for the fiscal 2012 second quarter, a decrease of \$13.2 million or 83%. Product revenue decreased from \$47.5 million for the first half of fiscal 2012 to \$30.5 million for the first half of fiscal 2013, a decrease of \$17.0 million, or 36%. Service revenue of \$4.2 million for the first half of fiscal 2012 was similar to service revenue for the first half of fiscal 2013. Total revenue from renewable energy systems was \$5.5 million for the first half of fiscal 2013 compared to \$17.2 million for the first half of fiscal 2012, a decrease

Edgar Filing: ORION ENERGY SYSTEMS, INC. - Form 10-Q

of \$11.7 million, or 68%.

Cost of Revenue and Gross Margin. Our cost of product revenue decreased from \$21.4 million for the fiscal 2012 second quarter to \$11.9 million for the fiscal 2013 second quarter, a decrease of \$9.6 million, or 45%. Our cost of service revenue decreased from \$2.6 million for the fiscal 2012 second quarter to \$1.7 million for the fiscal 2013 second quarter, a decrease of \$0.9 million, or 34%. Gross margin increased from 28.0% for the fiscal 2012 second quarter to 29.9% for the fiscal 2013 second quarter. For the fiscal 2013 second quarter, our gross margin percentage increased due to improved margins on solar PV projects from our Orion Engineered Systems Division. Our gross margin percentage on renewable revenues from this division was 27.1% during the fiscal 2013 second quarter compared to 19.0% for the fiscal 2012 second quarter. Gross margin from our HIF integrated systems revenue for the 2013 second quarter was 30.4% compared to 36.3% for the fiscal 2012 second quarter. Our cost of product revenue decreased from \$33.0 million for the first half of fiscal 2012 to \$21.5 million for the first half of fiscal 2013, a decrease of \$11.6 million, or 35%. Our cost of service revenue decreased from \$3.3 million for the first half of fiscal 2012 to \$3.1 million for the first half of fiscal 2013, a decrease of \$0.2 million, or 6%. Total gross margin decreased from 29.8% for the first half of fiscal 2012 to 29.3% for the first half of fiscal 2013. For the first half of fiscal 2013, our decrease in total gross margin on product revenues versus the first half of fiscal 2012 was due to the reduced revenue from sales of our energy management systems and the impact of our fixed manufacturing costs on lower unit volumes of our HIF lighting energy management systems. Gross margins from the sale of our solar PV systems were 31.0% for the fiscal 2013 first half compared to 18.5% for the fiscal 2012 first half and our gross margins from the sale of our HIF energy management systems were 29.0% for the fiscal 2013 first half compared to 35.4% for the fiscal 2012 first half.

General and Administrative. Our general and administrative expenses increased from \$2.7 million for the fiscal 2012 second quarter to \$4.6 million for the fiscal 2013 second quarter, an increase of \$1.9 million, or 70%. The increase in expenses was due to reorganization costs of \$1.9 million related to management changes and cost reduction initiatives. Our general and administrative expenses increased from \$5.8 million for the first half of fiscal 2012 to \$7.9 million for the first half of fiscal 2013, an increase of \$2.1 million, or 37%. The increase for the first half was due to reorganization expenses resulting from cost reduction initiatives and increased legal and audit expenses of \$0.2 million related to the re-audit of our fiscal 2011 financial statements.

Sales and Marketing. Our sales and marketing expenses increased from \$3.7 million for the fiscal 2012 second quarter to \$4.6 million for the fiscal 2013 second quarter, an increase of \$0.9 million, or 24%. Our sales and marketing expenses increased from \$7.5 million for the first half of fiscal 2012 to \$8.5 million for the first half of fiscal 2013, an increase of \$1.0 million, or 13%. The increase was due to reorganization expenses of \$0.4 million and the full year impact of headcount additions from of our prior year investment into the formation and staffing of our telemarketing function, the establishment and staffing of our Houston technology center, headcount additions for retail sales and sales and project management to support the increase in our solar PV backlog. Total sales and marketing headcount was 93 and 115 at September 30, 2011 and 2012, respectively.

Table of Contents

Research and Development. Our research and development expenses increased from \$0.6 million for the fiscal 2012 second quarter to \$0.7 for the fiscal 2013 second quarter, an increase of \$0.1 million, or 20%. Our research and development expenses increased from \$1.2 million for the first half of fiscal 2012 to \$1.4 million for the first half of fiscal 2013, an increase of \$0.2 million, or 16%. The increase was due to increased compensation expenses related to the development of new product offerings, including our light emitting diode, or LED, product and energy management controls initiatives.

Interest Expense. Our interest expense decreased from \$150,000 for the fiscal 2012 second quarter to \$142,000 for the fiscal 2013 second quarter, a decrease of \$8,000, or 5%. Our interest expense increased from \$237,000 for the first half of fiscal 2012 to \$303,000 for the first half of fiscal 2013, an increase of \$66,000, or 28%. The increase in our interest expense was due to the full year impact of additional debt funding completed during fiscal 2012 for the purpose of financing our OTA projects.

Interest Income. Interest income increased slightly from \$214,000 for the fiscal 2012 second quarter to \$218,000 for the fiscal 2013 second quarter, an increase of \$4,000 or 2%. Interest income increased from \$368,000 for the first half of fiscal 2012 to \$443,000 for the first half of fiscal 2013, an increase of \$75,000 or 20%. Interest income increased due to an increase in the number and dollar amount of completed OTA contracts and the related interest income under the financing terms.

Income Taxes. Our income tax expense increased from \$1.0 million for the fiscal 2012 second quarter to \$5.6 million for the fiscal 2013 second quarter, an increase of \$4.6 million or 441%. Our income tax expense increased from \$0.4 million for the first half of fiscal 2012 to \$4.1 million for the first half of fiscal 2013, an increase of \$3.6 million or 835%. During the fiscal 2013 second quarter, we recorded a valuation reserve against our deferred tax assets in the amount of \$5.6 million due to the amount of our operating loss from operations for the fiscal 2013 first half and uncertainty of the realization value of these assets in the future. Our effective income tax rate for the first half of fiscal 2012 was 43.4%, compared to 53.8% for the half of fiscal 2013.

Energy Management Segment

The following table summarizes our Energy Management segment operating results:

(dollars in thousands)	For the Three Months Ended September 30,		For the Six Months Ended September 30,	
	2011	2012	2011	2012
Revenues	\$ 17,503	\$ 16,652	\$ 34,517	\$ 29,252
Operating income (loss)	\$ 1,944	\$ (453)	\$ 2,601	\$ (2,211)
Operating margin	11.1%	(2.7)%	7.5%	(7.6)%

Energy Management segment revenue decreased \$0.8 million, or 5%, from \$17.5 million for the fiscal 2012 second quarter to \$16.7 million for the fiscal 2013 second quarter. Energy Management segment revenue decreased \$5.3 million, or 15%, from \$34.5 million for the first half of fiscal 2012 to \$29.3 million for the first half of fiscal 2013. The decrease in revenue for both the fiscal 2013 second quarter and year-to-date was due to reduced sales of our HIF lighting systems to our national account and wholesale customers due to a difficult capital spending environment.

Energy Management segment operating income decreased \$2.4 million, or 123%, from operating income of \$1.9 million for the fiscal 2012 second quarter to operating loss of \$0.5 million for the fiscal 2013 second quarter. Energy Management segment operating income decreased \$4.8 million, or 185%, from operating income of \$2.6 million for the first half of fiscal 2012 to operating loss of \$2.2 million for the first half of fiscal 2013. The decrease in operating income for both the fiscal 2013 second quarter and year-to-date was a result of decreased revenue, the negative gross margin impact of fixed costs in our manufacturing facility on reduced production volumes and the increase in selling expenses for our telemarketing and retail sales headcount additions.

Engineered Systems Segment

The following table summarizes our Engineered Systems segment operating results:

(dollars in thousands)	For the Three Months Ended September 30,		For the Six Months Ended September 30,	
	2011	2012	2011	2012
Revenues	\$ 15,972	\$ 2,756	\$ 17,179	\$ 5,466

Edgar Filing: ORION ENERGY SYSTEMS, INC. - Form 10-Q

Operating income (loss)	\$	1,590	\$	(661)	\$	795	\$	(1,057)
Operating margin		10.0%		(24.0)%		4.6%		(19.3)%

Table of Contents

Engineered Systems segment revenue decreased \$13.2 million, or 83%, from \$16.0 million for the fiscal 2012 second quarter to \$2.8 million for the fiscal 2013 second quarter. Engineered Systems segment revenue decreased \$11.7 million, or 68%, from \$17.2 million for the first half of fiscal 2012 to \$5.5 million for the first half of fiscal 2013. The decrease was due to decreased sales of solar renewable technologies for the fiscal 2013 second quarter and the first half of fiscal 2013. During the same periods of fiscal 2012, we had two large solar PV projects under construction.

Engineered Systems segment operating income decreased \$2.3 million, or 142%, from operating income of \$1.6 million for the fiscal 2012 second quarter to operating loss of \$0.7 million for the fiscal 2013 second quarter. Engineered Systems segment operating income decreased \$1.9 million, or 233%, from operating income of \$0.8 million for the first half of fiscal 2012 to operating loss of \$1.1 million for the first half of fiscal 2013. The increase in operating loss for both the quarter and year-to-date was a result of the decreased revenue volume and resulting contribution margin from sales of solar renewable energy systems.

Liquidity and Capital Resources*Overview*

We had approximately \$13.2 million in cash and cash equivalents and \$1.0 million in short-term investments as of September 30, 2012, compared to \$23.0 million and \$1.0 million at March 31, 2012. Our cash equivalents are invested in money market accounts with maturities of less than 90 days and an average yield of 0.24%. Our short-term investment account consists of a bank certificate of deposit in the amount of \$1.0 million with an expiration date of December 2012 and a yield of 0.50%. Additionally, as of September 30, 2012, we had \$13.3 million of borrowing availability under our revolving credit agreement. Our OTA credit agreement expired September 30, 2012 for new borrowings, but not for amounts previously drawn. We did not borrow on the OTA credit agreement during the first half of fiscal 2013. During the first half of fiscal 2013, we repurchased \$4.5 million of our common stock and have a commitment to repurchase \$1.5 million of our common stock during our fiscal 2013 third quarter. We do not intend to continue to repurchase our common stock in the near-term. We believe that our existing cash and cash equivalents, our anticipated cash flows from operating activities and our borrowing capacity under our revolving credit facility will be sufficient to meet our anticipated cash needs for at least the next 12 months, dependent upon our growth opportunities with our cash and finance customers.

Cash Flows

The following table summarizes our cash flows for the six months ended September 30, 2011 and 2012 (in thousands):

	Six Months Ended September 30,	
	2011	2012
Operating activities	\$ 1,384	\$ (2,327)
Investing activities	(2,133)	(1,774)
Financing activities	4,748	(5,696)
Increase (decrease) in cash and cash equivalents	\$ 3,999	\$ (9,797)

Cash Flows Related to Operating Activities. Cash used in operating activities for the first half of fiscal 2013 was \$2.3 million and consisted of net cash provided by changes in operating assets and liabilities of \$2.4 million and a net loss adjusted for non-cash expense items of \$4.7 million. Cash provided by changes in operating assets and liabilities consisted of a decrease of \$0.5 million in total accounts receivable due to customer collections and reduced revenue during the first half, an increase in accounts payable of \$0.9 million due to vendor payment terms, an increase in accrued expenses of \$2.0 million due to the timing of payments and a \$1.2 million increase in deferred revenue due to customer deposit payments received. Cash used from changes in operating assets and liabilities included a \$0.2 million increase in inventory for purchases of raw material components and a \$2.6 million increase in deferred contract costs for product costs incurred on projects where the performance criteria for revenue recognition has not yet occurred.

Cash provided by operating activities for the first half of fiscal 2012, was \$1.4 million and consisted of net cash of \$1.3 million used for changes in operating assets and liabilities offset by net income adjusted for non-cash expense items of \$2.7 million. Cash

Table of Contents

provided by changes in operating assets and liabilities consisted of a decrease of \$3.3 million in total accounts receivable due to customer payments received during the quarter and a \$6.7 million decrease in deferred contract costs due to project completions and cost recognition on solar PV systems. Cash used for changes in operating assets and liabilities included a \$3.2 million increase in inventory for purchases of solar panel inventory and increases in our work-in-process and lighting fixture inventories for orders that are expected to ship during the fiscal 2012 third quarter, a \$2.3 million increase in prepaid and other expenses related to deferred customer billings, a \$3.9 million decrease in deferred revenue to project completions and a \$2.1 million decrease in accounts payable due to vendor payments.

Cash Flows Related to Investing Activities. For the first half of fiscal 2013, cash used in investing activities was \$1.8 million. This included \$1.7 million for capital improvements related to our product development, information technology systems, manufacturing improvements and facility investments and \$0.1 million for investment in patent activities.

For the first half of fiscal 2012, cash used in investing activities was \$2.1 million. This included \$2.0 million for capital improvements related to our information technology systems, manufacturing and tooling improvements and facility investments and \$0.1 million for investment in patent activities.

Cash Flows Related to Financing Activities. For the first half of fiscal 2013, cash flows used in financing activities were \$5.7 million. This included \$4.5 million used for common share repurchases and \$1.4 million for repayment of long-term debt. Cash flows provided by financing activities included \$0.2 million in debt proceeds and \$0.1 million received from stock option exercises and for excess tax benefits from stock-based compensation.

For the first half of fiscal 2012, cash flows provided by financing activities were \$4.7 million. This included \$4.6 million in new debt borrowings to fund OTAs, \$0.8 million for excess tax benefits from stock-based compensation and \$0.1 million received from stock option and warrant exercises. Cash flows used in financing activities included \$0.7 million for repayment of long-term debt and \$0.1 million for debt closing costs.

Working Capital

Our net working capital as of September 30, 2012 was \$30.3 million, consisting of \$58.6 million in current assets and \$28.3 million in current liabilities. Our net working capital as of March 31, 2012 was \$44.5 million, consisting of \$67.2 million in current assets and \$22.7 million in current liabilities. Our current accounts receivables increased from fiscal 2012 year-end by \$0.3 million and our inventories increased from our fiscal 2012 year-end by \$0.3 million due to an increase in lighting raw material inventories. During fiscal 2012, we had increased our inventories of fluorescent lamps due to concerns over shortages of rare earth minerals used in the production of fluorescent lamps. We believe that these supply shortage concerns have stabilized, but we continue to monitor them through conversations with our key vendors. Our accounts payable increased from our fiscal 2012 year end by \$0.9 million due to increased inventory purchases and the timing of vendor payment terms.

We generally attempt to maintain at least a three-month supply of on-hand inventory of purchased components and raw materials to meet anticipated demand, as well as to reduce our risk of unexpected raw material or component shortages or supply interruptions. Our accounts receivables, inventory and payables may increase to the extent our revenue and order levels increase.

For the second half of fiscal 2013, we intend to focus our efforts to preserve cash by reducing expenses and by implementing conservative inventory purchasing strategies and reducing our overall inventories.

Indebtedness

Revolving Credit Agreement

We have a credit agreement (Credit Agreement) with JP Morgan Chase Bank, N.A. (JP Morgan). The Credit Agreement provides for a revolving credit facility (Credit Facility) that matures on June 30, 2013. Borrowings under the Credit Facility are limited to (i) \$15.0 million or (ii) during periods in which the outstanding principal balance of outstanding loans under the Credit Facility is greater than \$5.0 million, the lesser of (A) \$15.0 million or (B) the sum of 75% of the outstanding principal balance of certain accounts receivable and 45% of certain inventory. The Credit Facility contains certain financial covenants, including minimum unencumbered liquidity requirements and requirements that the Company maintain a total liabilities to tangible net worth ratio not to exceed 0.50 to 1.00 as of the last day of any fiscal quarter. The Credit Facility also contains certain restrictions on our ability to make capital or lease

Table of Contents

expenditures over prescribed limits, incur additional indebtedness, consolidate or merge, guarantee obligations of third parties, make loans or advances, declare or pay any dividend or distribution on our stock, redeem or repurchase shares of our stock or pledge assets. We also may cause JP Morgan to issue letters of credit for our account in the aggregate principal amount of up to \$2.0 million, with the dollar amount of each issued letter of credit counting against the overall limit on borrowings under the Credit Facility. As of September 30, 2012, we had outstanding letters of credit totaling \$1.7 million, primarily for securing collateral requirements under equipment operating leases. We had no outstanding borrowings under the Credit Facility as of March 31, 2012 or September 30, 2012. We were not in compliance with all covenants in the credit agreement as of September 30, 2012 and expect to receive a waiver from our bank for the covenant defaults.

The Credit Agreement is secured by a first lien security interest in our accounts receivable, inventory and general intangibles, and a second lien priority in our equipment and fixtures. All OTAs, PPAs, leases, supply agreements and/or similar agreements relating to solar PV and wind turbine systems or facilities, as well as all of our accounts receivable and assets related to the foregoing, are excluded from these liens.

The Credit Agreement provides that we have the option to select whether borrowings under the Credit Facility will bear interest at either (i) a daily borrowing LIBOR rate tied to a one-month maturity or (ii) a LIBOR rate tied to a maturity corresponding to an interest period selected plus, in the case of either (i) or (ii), a per annum rate spread of 2.00%, 2.50% or 3.00%, depending on the ratio of (A) earnings before interest, taxes, depreciation and amortization less income taxes paid in cash less 50% of depreciation expense to (B) the sum of interest expense paid in cash in respect of indebtedness for borrowed money plus scheduled principal payments made with respect to indebtedness for borrowed money, all as determined for the 12-month period ending as of the end of the applicable fiscal quarter.

We must pay a fee of 0.25% on the average daily unused amount of the Credit Facility and a fee of 2.00% on the daily average face amount of undrawn issued letters of credit. The fee on unused amounts is waived if we maintain funds on deposit with JP Morgan or its affiliates above a specified amount. The deposit threshold requirement was met as of September 30, 2012.

OTA Credit Agreement

We have a credit agreement with JP Morgan that provides us with \$5.0 million immediately available to fund completed customer contracts under our OTA finance program. We had one-year from the date of the commitment to borrow under the credit agreement, which expired on September 30, 2012 for new borrowing. Through September 2012, we have \$2.4 million outstanding against the credit agreement. There were no new borrowings during the first half of fiscal 2013. The loan amount is collateralized by the OTA-related equipment and the expected future monthly payments under the supporting 39 individual OTA customer contracts. The current loan amount under the credit agreement bears interest at LIBOR plus 4% and matures in December 2016. The credit agreement includes certain financial covenants, including funded debt to EBITDA and debt service coverage ratios. We were not in compliance with all covenants in the credit agreement as of September 30, 2012 and expect to receive a waiver from our bank for the covenant defaults.

Capital Spending

Capital expenditures totaled \$1.7 million during the first half of fiscal 2013 due to investments in new product development, information technologies, training and research facility additions, as well as facility investments. We expect to incur approximately \$0.6 to \$0.8 million in capital expenditures during the remainder of fiscal 2013, excluding capital to support expected OTA growth. Our capital spending plans predominantly consist of further cost improvements in our manufacturing facility, new product development and investment in information technology systems. We expect to finance these capital expenditures primarily through our existing cash, equipment secured loans and leases, to the extent needed, long-term debt financing, or by using our available capacity under our credit facility.

Table of Contents**Contractual Obligations and Commitments**

The following table is a summary of our long-term contractual obligations as of September 30, 2012 (dollars in thousands):

	Total	Less than 1 Year	1-3 Years	3-5 Years	More than 5 Years
Bank debt obligations	\$ 8,236	\$ 2,871	\$ 4,225	\$ 706	\$ 434
Cash interest payments on debt	984	388	340	62	194
Operating lease obligations	7,020	1,133	1,883	1,648	2,356
Purchase obligation(2)	1,477	1,477			
Purchase order and cap-ex commitments(1)	12,642	10,422	2,220		
Total	\$ 30,359	\$ 16,291	\$ 8,668	\$ 2,416	\$ 2,984

(1) Reflects non-cancellable purchase order commitments in the amount of \$12.6 million for certain inventory items entered into in order to secure better pricing and ensure materials on hand.

(2) Reflects \$1.5 million for contractual agreement to repurchase outstanding common stock.

Off-Balance Sheet Arrangements

We have no off-balance sheet arrangements.

Inflation

Our results from operations have not been, and we do not expect them to be, materially affected by inflation.

Critical Accounting Policies and Estimates

The discussion and analysis of our financial condition and results of operations is based upon our consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States. The preparation of our consolidated financial statements requires us to make certain estimates and judgments that affect our reported assets, liabilities, revenue and expenses, and our related disclosure of contingent assets and liabilities. We re-evaluate our estimates on an ongoing basis, including those related to revenue recognition, inventory valuation, the collectability of receivables, stock-based compensation, warranty reserves and income taxes. We base our estimates on historical experience and on various assumptions that we believe to be reasonable under the circumstances. Actual results may differ from these estimates. A summary of our critical accounting policies is set forth in the Critical Accounting Policies and Estimates section of our Management's Discussion and Analysis of Financial Condition and Results of Operations contained in our Annual Report on Form 10-K for the year ended March 31, 2012. There have been no material changes in any of our accounting policies since March 31, 2012.

Recent Accounting Pronouncements

For a complete discussion of recent accounting pronouncements, refer to Note B in the condensed consolidated financial statements included elsewhere in this report.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Our exposure to market risk was discussed in the Quantitative and Qualitative Disclosures About Market Risk section contained in our Annual Report on Form 10-K for the year ended March 31, 2012. There have been no material changes to such exposures since March 31, 2012.

ITEM 4. CONTROLS AND PROCEDURES**Evaluation of Disclosure Controls and Procedures**

Edgar Filing: ORION ENERGY SYSTEMS, INC. - Form 10-Q

We maintain a system of disclosure controls and procedures designed to provide reasonable assurance as to the reliability of our published financial statements and other disclosures included in this report. Our management evaluated, with the participation of our Chief Executive Officer and our Chief Financial Officer, the effectiveness of the design and operation of our disclosure controls and procedures as of the end of the quarter ended September 30, 2012 pursuant to Rule 13a-15(b) of the Exchange Act of 1934 (the Exchange Act). Our Chief Executive Officer and our Chief Financial Officer concluded that our disclosure controls and procedures were effective as of September 30, 2012.

There was no change in our internal control over financial reporting that occurred during the quarter ended September 30, 2012 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

Table of Contents**PART II OTHER INFORMATION****ITEM 1. LEGAL PROCEEDINGS**

As previously disclosed, in August 2012, the Company received a subpoena issued by the staff of the Securities and Exchange Commission ("SEC") requesting certain documents and information generally related to the Company's financial reporting of its sales of solar photovoltaic systems, among other matters. The Company continues to cooperate with the SEC regarding this non-public, fact-finding inquiry. The SEC has informed the Company that this inquiry should not be construed as an indication that any violations of law have occurred or that the SEC has any negative opinion of any person, entity or security.

ITEM 1A. RISK FACTORS

We operate in a rapidly changing environment that involves a number of risks that could materially affect our business, financial condition or future results, some of which are beyond our control. In addition to the other information set forth in this Quarterly Report on Form 10-Q, the risks and uncertainties that we believe are most important for you to consider are discussed in Part I Item 1A under the heading "Risk Factors" in our Annual Report on Form 10-K for the fiscal year ended March 31, 2012, which we filed with the SEC on June 14, 2012. During the six months ended September 30, 2012, there were no material changes to the risk factors that were disclosed in Part I Item 1A under the heading "Risk Factors" in our Annual Report on Form 10-K for the fiscal year ended March 31, 2012.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS**(c) Purchases of Equity Securities**

The table below summarizes stock repurchases for the three-month period ended September 30, 2012.

Period	Total		Total Number of	Approximate Dollar Value of Shares that May Yet Be Purchased Under the Plans or Programs(1)
	Number of Shares Purchased	Average Price Paid per Share	Shares Purchased as Part of Publicly Announced Plans or Programs(1)	
July 1 - July 31, 2012	333,402	\$ 2.24	333,402	\$ 3,551,000
August 1 - August 31, 2012	572,450	\$ 2.23	572,450	\$ 2,277,000
September 1 - September 30, 2012	19,000	\$ 1.81	19,000	\$ 2,242,000
	924,852		924,852	

- (1) On April 27, 2012, we announced that our board of directors had authorized the repurchase, in the aggregate, of a maximum of \$7.5 million of our outstanding common stock. We have a commitment to repurchase \$1.5 million of our common stock during our fiscal 2013 third quarter. Following the \$1.5 million repurchase, we do not intend to continue to repurchase our common stock in the near-term.

Table of Contents**ITEM 5. OTHER INFORMATION****Statistical Data**

The following table presents certain statistical data, cumulative from December 1, 2001 through September 30, 2012, regarding sales of our HIF lighting systems, total units sold (including HIF lighting systems), customer kilowatt demand reduction, customer kilowatt hours saved, customer electricity costs saved, indirect carbon dioxide emission reductions from customers' energy savings, and square footage we have retrofitted. The assumptions behind our calculations are described in the footnotes to the table below.

	Cumulative From December 1, 2001 Through September 30, 2012 (in thousands, unaudited)
HIF lighting systems sold (1)	2,391
Total units sold (including HIF lighting systems)	3,284
Customer kilowatt demand reduction (2)	758
Customer kilowatt hours saved (2)(3)	23,389,645
Customer electricity costs saved (4)	\$ 1,799,874
Indirect carbon dioxide emission reductions from customers' energy savings (tons) (5)	15,367
Square footage retrofitted (6)	1,241,271

- (1) HIF lighting systems includes all HIF units sold under the brand name Compact Modular and its predecessor, Illuminator.
- (2) A substantial majority of our HIF lighting systems, which generally operate at approximately 224 watts per six-lamp fixture, are installed in replacement of HID fixtures, which generally operate at approximately 465 watts per fixture in commercial and industrial applications. We calculate that each six-lamp HIF lighting system we install in replacement of an HID fixture generally reduces electricity consumption by approximately 241 watts (the difference between 465 watts and 224 watts). In retrofit projects where we replace fixtures other than HID fixtures, or where we replace fixtures with products other than our HIF lighting systems (which other products generally consist of products with lamps similar to those used in our HIF systems, but with varying frames, ballasts or power packs), we generally achieve similar wattage reductions (based on an analysis of the operating wattages of each of our fixtures compared to the operating wattage of the fixtures they typically replace). We calculate the amount of kilowatt demand reduction by multiplying (i) 0.241 kilowatts per six-lamp equivalent unit we install by (ii) the number of units we have installed in the period presented, including products other than our HIF lighting systems (or a total of approximately 3.3 million units).
- (3) We calculate the number of kilowatt hours saved on a cumulative basis by assuming the demand (kW) reduction for each fixture and assuming that each such unit has averaged 7,500 annual operating hours since its installation.
- (4) We calculate our customers' electricity costs saved by multiplying the cumulative total customer kilowatt hours saved indicated in the table by \$0.077 per kilowatt hour. The national average rate for 2011, which is the most current full year for which this information is available, was \$0.1002 per kilowatt hour according to the United States Energy Information Administration.
- (5) We calculate this figure by multiplying (i) the estimated amount of carbon dioxide emissions that result from the generation of one kilowatt hour of electricity (determined using the Emissions and Generation Resource Integration Database, or EGrid, prepared by the United States Environmental Protection Agency), by (ii) the number of customer kilowatt hours saved as indicated in the table.
- (6) Based on 3.3 million total units sold, which contain a total of approximately 16.5 million lamps. Each lamp illuminates approximately 75 square feet. The majority of our installed fixtures contain six lamps and typically illuminate approximately 450 square feet.

Departure of Directors or Certain Officers; Election of Directors; Appointment of Certain Officers; Compensatory Arrangements of Certain Officers.

Executive Employment and Severance Agreements

Effective November 9, 2012, Orion Energy Systems, Inc. (the Company) entered into an Executive Employment and Severance Agreement (the Employment Agreement) with Scott R. Jensen, the Company's Chief Financial Officer, Chief Accounting Officer and Treasurer.

Edgar Filing: ORION ENERGY SYSTEMS, INC. - Form 10-Q

The Employment Agreement is for an initial term through September 30, 2013, after which the Employment Agreement will be renewed for successive one-year periods unless the Company provides notice of non-renewal prior to the end of the applicable term. The Employment Agreement provides for an annual base salary of \$255,000 and for participation by Mr. Jensen in the Company's annual and/or long-term bonus plans as well as the Company's employee benefit plans made available to other senior executives.

The Employment Agreement also provides that Mr. Jensen is entitled to certain severance payments and other benefits upon a qualifying employment termination, including certain enhanced protections under such circumstances occurring after a Change of Control (as defined in the Employment Agreement) of the Company. If Mr. Jensen's employment is terminated without Cause (as defined in the Employment Agreement) or for Good Reason (as defined in the Employment Agreement) prior to the end of the employment period, Mr. Jensen will be entitled to a severance benefit payable over an 18-month period equal to the sum of his base salary plus the average of the prior three years' bonuses and COBRA premiums at the active employee rate for the duration of the executive's COBRA continuation coverage period. If Mr. Jensen is terminated without Cause or for Good Reason following a Change of Control prior to the end of the employment period, Mr. Jensen will be entitled to a severance benefit payable over an 18-month

Table of Contents

period equal to two times the sum of his base salary plus the average of the prior three years' bonuses and COBRA premiums at the active employee rate for the duration of the executive's COBRA continuation coverage period. To receive these benefits, Mr. Jensen must execute and deliver to the Company (and not revoke) a general release of claims. The Employment Agreement also requires Mr. Jensen not to, during the term of the employment and for following the termination of employment, (i) disclose any confidential information of the Company, (ii) compete with the Company (for a term of 18 months following termination of employment) or (iii) solicit the employees or other persons with business relationships with the Company (for a term of 18 months following termination of employment).

Also effective November 9, 2012, the Company entered into a letter agreement (the Letter Agreement) with Michael J. Potts, the Company's President and Chief Operating Officer, amending the Executive Employment and Severance Agreement, dated February 21, 2008, between the Company and Mr. Potts. The Letter Agreement increased the base salary of Mr. Potts from \$275,000 to \$280,000, waived any prior or existing Good Reason termination right that Mr. Potts may have had under the Executive Employment and Severance Agreement and amended and restated the definition of Good Reason in the Executive Employment and Severance Agreement. Except as expressly modified by the Letter Agreement, the Executive Employment and Severance Agreement will continue in effect in accordance with its terms.

A copy of the Employment Agreement and Letter Agreement are attached hereto as Exhibits 10.13 and 10.14, respectively, and are incorporated by reference herein.

Second Half of Fiscal 2013 Incentive Cash Bonus Program

Effective November 9, 2012, the Company's Compensation Committee approved a new incentive cash bonus program for the second half of fiscal 2013 in replacement of the existing fiscal 2013 incentive bonus program. The new incentive cash bonus program provides a cash bonus opportunity to named executive officers and other key employees based on the Company's relative achievement, in the second half of fiscal 2013, of target operating income (before bonuses and other extraordinary or unusual items) and target cost containment initiatives.

Under the new program, 50% of the target bonus payments will be based on the Company's relative achievement of its cost containment target of \$1.48 million for the second half of fiscal 2013. For every \$1.00 of cost containment achieved, a bonus pool of \$0.167 will be earned, up to a maximum total bonus pool of \$247,000 for all employees. The other 50% of the target bonus payments will be based on the Company achieving operating income (before bonuses and other extraordinary or unusual items) of \$500,000 for the second half of fiscal 2013. For every \$1.00 of operating profit achieved, a bonus pool of \$0.50 will be earned, up to a maximum total bonus pool of \$247,000 for all employees. The Compensation Committee established a target maximum bonus for each of the Company's named executive officers as follows:

Name	Target Maximum Bonus	Cost Containment (50%)	Operating Income (50%)
John Scribante			
Chief Executive Officer	\$ 230,000	\$ 115,000	\$ 115,000
Mike Potts			
President and Chief Operating Officer	70,000	35,000	35,000
Scott Jensen			
Chief Financial Officer, Chief Accounting Officer and Treasurer	44,625	22,313	22,313
Other Key Performers (as determined by Chief Executive Officer)	150,000	75,000	75,000
TOTAL	\$ 494,625	\$ 247,313	\$ 247,313

The financial targets described above are not a prediction of how the Company will perform during fiscal year 2013. The purpose of the targets is to provide appropriate financial metrics to determine amounts of compensation under the Company's incentive compensation program. The targets are not intended to serve, and should not be relied upon, as guidance or any other indication of the Company's expected future performance.
