UNITED STATES
SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 10-K

(Mark One)

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended December 1, 2012

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission file number: 001-09225

H.B. FULLER COMPANY

(Exact name of registrant as specified in its charter)

Minnesota
(State or other jurisdiction of

incorporation or organization)

1200 Willow Lake Boulevard, St. Paul, Minnesota
(Address of principal executive offices)

41-0268370
(I.R.S. Employer

Identification No.)

55110-5101
(Zip Code)

Edgar Filing: FULLER H B CO - Form 10-K

Registrant's telephone number, including area code: (651) 236-5900

Securities registered pursuant to Section 12(b) of the Act:

Title of each class	Name of each exchange on which registered
Common Stock, par value \$1.00 per share	New York Stock Exchange
Preferred Stock Purchase Rights	New York Stock Exchange

Securities registered pursuant to Section 12(g) of the Act: none

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to the Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer", "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer
 Non-accelerated filer (Do not check if a smaller reporting company) Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes No

Edgar Filing: FULLER H B CO - Form 10-K

The aggregate market value of the Common Stock, par value \$1.00 per share, held by non-affiliates of the registrant as of June 2, 2012 was approximately \$1,437,657,442 (based on the closing price of such stock as quoted on the New York Stock Exchange of \$29.98 on such date).

The number of shares outstanding of the Registrant's Common Stock, par value \$1.00 per share, was 49,944,727 as of January 11, 2013.

DOCUMENTS INCORPORATED BY REFERENCE

Part III incorporates information by reference to portions of the registrant's Proxy Statement for the Annual Meeting of Shareholders to be held on April 11, 2013.

PART I

Item 1. Business

H.B. Fuller Company was founded in 1887 and incorporated as a Minnesota corporation in 1915. Our stock is traded on the New York Stock Exchange (NYSE) under the ticker symbol FUL. As used herein, H.B. Fuller, we, us, our, management or company includes H.B. Fuller subsidiaries unless otherwise indicated.

We are a leading worldwide formulator, manufacturer and marketer of adhesives, sealants and other specialty chemical products. Sales operations span 40 countries in North America, Europe, Latin America, the Asia Pacific region, India, the Middle East and Africa. Industrial adhesives represent our core product offering. Customers use our adhesives products in manufacturing common consumer and industrial goods, including food and beverage containers, disposable diapers, windows, doors, flooring, appliances, sportswear, footwear, multi-wall bags, water filtration products, insulation and textiles. Our adhesives help improve the performance of our customers' products or improve their manufacturing processes. We also provide our customers with technical support and unique solutions designed to address their specific needs. We have established a variety of product offerings for residential construction markets, such as tile-setting adhesives, grout, sealants and related products. These products are sold primarily in our Construction Products operating segment.

Recent Acquisitions and Divestitures

On March 5, 2012 we completed the acquisition of the global industrial adhesives and synthetic polymers business of Forbo Holding AG for 370.0 million Swiss francs or \$404.7 million. We acquired the Forbo Group subsidiaries that operate the industrial adhesives business and directly purchased certain assets used in the industrial adhesives business that were not owned by the former Forbo Group subsidiaries on a cash-free and debt-free basis. The Forbo industrial adhesives business acquired is known for the breadth of its product line in all of our core markets, particularly packaging and durable assembly. The acquisition gives us added product technology, people and skills that will enhance the competitiveness of our business. The global industrial adhesives business acquired operated 17 manufacturing facilities in 10 countries and employed more than 1,100 people globally. The acquired business is being integrated into our existing North America Adhesives, EIMEA, Latin America Adhesives and Asia Pacific operating segments. The integration involves a significant amount of restructuring and capital investment to optimize the new combined operating segments. In addition, in July of 2011 we announced our intentions to take a series of actions in our existing EIMEA operating segment to improve the profitability and future growth prospects of this operating segment. We have combined these two initiatives into a single project which we refer to as the Business Integration Project.

On September 10, 2012 we acquired the outstanding shares of Engent, Inc., a provider of manufacturing, research and development services to the electronics industry, based in Norcross, Georgia for \$7.9 million. The acquisition added state-of-art development capabilities, testing resources and technical support infrastructure, which increased our capabilities in a wide range of microelectronic assembly technologies.

On August 6, 2012 we sold our Central America Paints business for cash proceeds of \$118.5 million and recorded a gain of \$66.2 million (\$51.1 million, net of tax). After the sale of our Central America Paints business, we now have five reportable segments: North America Adhesives, Construction Products, EIMEA, Latin America Adhesives and Asia Pacific. Prior periods have been restated for the removal of our Latin America Paints operating segment which is now considered discontinued operations. Corporate expenses, which are fully allocated to each operating segment, have been reallocated to the remaining reportable operating segments.

Operating Segment Information

Our business is reported in five operating segments: North America Adhesives, Construction Products, EIMEA (Europe, India, Middle East and Africa), Latin America Adhesives and Asia Pacific. As a percentage of total net

Table of Contents

revenue by operating segment, North America Adhesives was 36 percent, Construction Products 8 percent, EIMEA 36 percent, Latin America Adhesives 8 percent and Asia Pacific 12 percent.

Our North America Adhesives, EIMEA, Latin America Adhesives and Asia Pacific operating segments produce and supply industrial adhesives products for applications in various markets including assembly (appliances, filters, construction, etc.), packaging (food and beverage containers, flexible packaging, consumer goods, package integrity and re-enforcement, durable and non-durable goods, etc.), converting (corrugation, tape and label, paper converting, envelopes, books, multi-wall bags and sacks), nonwoven and hygiene (disposable diapers, feminine care, medical garments, tissue and towel), performance wood (windows, doors, wood flooring) and textile (footwear, sportswear, etc.).

The North America Adhesives operating segment includes a full range of specialty adhesives such as thermoplastic, thermoset, reactive, water-based and solvent-based products. Sales are made primarily through a direct sales force with a smaller portion of sales through distributors.

The Construction Products operating segment includes products used for tile setting (adhesives, grouts, mortars, sealers, levelers, etc.), heating, ventilation and air conditioning and insulation applications (duct sealants, weather barriers and fungicidal coatings, block fillers, etc.). Construction Product sales are made primarily through distributors and to a lesser extent big box retailers and a direct sales force.

The EIMEA operating segment is comprised of an adhesives component with the same range of products as the North America Adhesives operating segment. EIMEA adhesives sales are made through both a direct sales force and distributors.

The Latin America Adhesives operating segment is similar to that of the North America Adhesives operating segment and sales are made primarily through a direct sales force.

The Asia Pacific operating segment is similar to that of the North America Adhesives operating segment, with one exception. The Asia Pacific operating segment also includes caulks and sealants for the consumer market and professional trade, sold through retailers. Other adhesives sales are made through a direct sales force and distributors.

Financial information with respect to our operating segments and geographic areas is set forth in Note 15 to the Consolidated Financial Statements.

Non-U.S. Operations

The principal markets, products and methods of distribution outside the United States vary with each of our regional operations generally maintaining integrated business units that contain dedicated supplier networks, manufacturing, logistics and sales organizations. The vast majority of the products sold within any region are produced within the region, and the respective regions do not import significant amounts of product from other regions. At the end of 2012, we had sales offices and manufacturing plants in 22 countries outside the United States and satellite sales offices in another 18 countries.

Edgar Filing: FULLER H B CO - Form 10-K

We have adopted policies and processes, and conduct employee training, all of which are intended to ensure compliance with various economic sanctions and export controls, including the regulations of the U.S. Treasury Department's Office of Foreign Assets Control (OFAC). We do not conduct any business in countries that are subject to U.S. economic sanctions such as Cuba, Iran, North Korea, Sudan and Syria, whether through subsidiaries, joint ventures or other direct or indirect arrangements, nor do we have any assets, employees or operations in these countries.

Table of Contents

Competition

Many of our markets are highly competitive. However, we compete effectively due to the quality and breadth of our adhesives, sealants and specialty chemical portfolio and the experience and expertise of our commercial organizations. Within the adhesives and other specialty chemical markets, we believe few suppliers have comparable global reach and corresponding ability to deliver quality and consistency to multinational customers. Our competition is made up generally of two types of companies: (1) similar multinational suppliers and (2) regional or specialty suppliers that typically compete in only one region or within a narrow geographic area within a region. The multinational competitors typically maintain a broad product offering and range of technology, while regional or specialty companies tend to have limited or more focused product ranges and technology.

Principal competitive factors in the sale of adhesives and other specialty chemicals are product performance, supply assurance, technical service, quality, price and customer service.

Customers

We have cultivated strong, integrated relationships with a diverse set of customers worldwide. Our customers are among the technology and market leaders in consumer goods, construction, and industrial markets. We pride ourselves on long-term, collaborative customer relationships and a diverse portfolio of customers in which no single customer accounted for more than 10 percent of consolidated net revenue.

Our leading customers include manufacturers of food and beverages, hygiene products, clothing, major appliances, filters, construction materials, wood flooring, furniture, cabinetry, windows, doors, tissue and towel, corrugation, tube winding, packaging, labels and tapes.

Our products are delivered to customers primarily from our manufacturing plants, with additional deliveries made through distributors and retailers.

Backlog

No significant backlog of unfilled orders existed at December 1, 2012 or December 3, 2011.

Raw Materials

We use several principal raw materials in our manufacturing processes, including tackifying resins, polymers, synthetic rubbers, vinyl acetate monomer and plasticizers. We generally avoid sole source supplier arrangements for raw materials.

Edgar Filing: FULLER H B CO - Form 10-K

The majority of our raw materials are petroleum/natural gas based derivatives. Under normal conditions, raw materials are available on the open market. Prices and availability are subject to supply and demand market mechanisms. Raw material costs are primarily determined by the balance of supply against the aggregate demand from the adhesives industry and other industries that use the same raw material streams. The cost of crude oil and natural gas, the primary feedstocks for our raw materials, can also impact the cost of our raw materials.

Patents, Trademarks and Licenses

Much of the technology we use in our products and manufacturing processes is available in the public domain. For technology not available in the public domain, we rely on trade secrets and patents when appropriate to protect our competitive position. We also license some patented technology from other sources. Our business is not materially dependent upon licenses or similar rights or on any single patent or group of related patents.

Table of Contents

We enter into agreements with many employees to protect rights to technology and intellectual property. Confidentiality commitments also are routinely obtained from customers, suppliers and others to safeguard proprietary information.

We own numerous trademarks and service marks in various countries. Trademarks, such as H.B. Fuller®, Swift®, Advantra®, Adalis®, Clarity®, Sesame®, TEC®, Plasticola®, Foster®, Rakoll®, Rapidex®, Full-Care™, Liquamelt®, Thermonex® and Tile-Perfect® are important in marketing products. Many of our trademarks and service marks are registered. U.S. trademark registrations are for a term of ten years and are renewable every ten years as long as the trademarks are used in the regular course of trade.

Research and Development

Our investment in research and development creates new and innovative adhesive technology platforms, enhances product performance, ensures a competitive cost structure and leverages available raw materials. New product development is a key research and development outcome, providing higher-value solutions to existing customers or meeting new customers' needs. Projects are developed in local laboratories in each region, where we understand our customer base the best. Platform developments are coordinated globally through our network of laboratories.

Through designing and developing new polymers and new formulations, we expect to continue to grow in our current markets. We also develop new applications for existing products and technologies, and improve manufacturing processes to enhance productivity and product quality. Research and development efforts are closely aligned to customer needs, but we do not engage in customer sponsored activities. We foster open innovation, seek supplier-driven new technology and use relationships with academic and other institutions to enhance our capabilities.

Research and development expenses were \$21.3 million, \$20.8 million and \$19.1 million in 2012, 2011 and 2010, respectively. Research and development costs are included in selling, general and administrative expenses.

Environmental, Health and Safety

We comply with applicable regulations relating to environmental protection and workers' safety. This includes regular review of and upgrades to environmental, health and safety policies, practices and procedures as well as improved production methods to minimize our facilities' outgoing waste, based on evolving societal standards and increased environmental understanding.

Environmental expenditures to comply with environmental regulations over the next two years are estimated to be approximately \$8.0 million, including approximately \$1.8 million of capital expenditures. See additional disclosure under Item 3. Legal Proceedings.

Seasonality

Edgar Filing: FULLER H B CO - Form 10-K

Our North America Adhesives, Construction Products and EIMEA operating segments have historically had lower net revenue in winter months, which is primarily our first fiscal quarter, partially due to the seasonal decline in construction activities. There also are many international holidays in our first quarter, reducing available shipping days.

Employees

Approximately 3,700 individuals were employed on December 1, 2012, of which approximately 1,400 were in the United States.

Table of Contents**Executive Officers of the Registrant**

The following table shows the name, age and business experience for the past five years of the executive officers as of January 11, 2013. Unless otherwise noted, the positions described are positions with the company or its subsidiaries.

Name	Age	Positions	Period Served
James J. Owens	48	President and Chief Executive Officer	November 2010-Present
		Senior Vice President, Americas	January 2010-November 2010
		Senior Vice President, North America	September 2008-January 2010
		Senior Vice President, Henkel Corporation (global manufacturer of adhesives, sealants and surface treatments)	April 2008-August 2008
		Corporate Vice President and General Manager, National Starch & Chemical Company, Adhesives Division (manufacturer of adhesives, sealants, specialty synthetic polymers and industrial starches)	December 2004-April 2008
James R. Giertz	55	Senior Vice President, Chief Financial Officer	March 2008-Present
		Senior Managing Director, Chief Financial Officer, GMAC ResCap (real estate finance company)	2006-2007
Kevin M. Gilligan	46	Vice President, Global Operations	December 2011-Present
		Vice President, Asia Pacific	March 2007-November 2011
Traci L. Jensen	46	Vice President, Americas Adhesives	November 2011-Present
		Vice President, North America	2010-2011
		President and General Manager, Global Adalis	2009-2010
		European Business Director, Packaging and Converting Adhesives, National Starch & Chemical Company	2006-2008
Timothy J. Keenan	55	Vice President, General Counsel and Corporate Secretary	December 2006-Present
Steven Kenny	51	Senior Vice President, Europe, India, Middle East and Africa (EIMEA)	October 2009-Present
		President, Specialty Packaging Division, Pregis Corporation (international manufacturer, marketer, and supplier of protective packaging products and specialty packaging solutions)	August 2008-September 2009

Edgar Filing: FULLER H B CO - Form 10-K

		Corporate Vice President and General Manager, Europe, Middle East and Africa, National Starch & Chemical Company, Adhesives Division	2005-2008
James C. McCreary, Jr.	56	Vice President, Corporate Controller	February 2008-Present and November 2000-February 2007
		Interim Chief Financial Officer, Vice President and Corporate Controller	February 2007-February 2008
Ann B. Parriott	54	Vice President, Human Resources	January 2006-Present

Table of Contents

Name	Age	Positions	Period Served
Patrick J. Trippel	53	Senior Vice President, Construction Materials Senior Vice President and General Manager, Global General Industries, Henkel Corporation (global manufacturer of adhesives, sealants and surface treatments) President and General Manager, Global Electronic Materials, Henkel Corporation	April 2011-Present 2009-2011 2002-2009

The Board of Directors elects the executive officers annually.

Available Information

For more information about us, visit our website at: www.hbfuller.com.

We file annual, quarterly and current reports, proxy statements and other information with the Securities and Exchange Commission (SEC) via EDGAR. Our SEC filings are available free of charge to the public at our website as soon as reasonably practicable after they have been filed with or furnished to the SEC.

Item 1A. Risk Factors

As a global manufacturer of adhesives, sealants and other specialty chemical products, we operate in a business environment that is subject to various risks and uncertainties. Below are the most significant factors that could adversely affect our business, financial condition and results of operations.

Adverse conditions in the global economy could negatively impact our customers and therefore our financial results.

An economic downturn in the businesses or geographic areas in which we sell our products could reduce demand for these products and result in a decrease in sales volume that could have a negative impact on our results of operations. Product demand often depends on end-use markets. Economic conditions that reduce consumer confidence or discretionary spending may reduce product demand. Challenging economic conditions may also impair the ability of customers to pay for products they have purchased, and as a result, our reserves for doubtful accounts and write-offs of accounts receivable may increase.

Increases in prices and declines in the availability of raw materials could negatively impact our financial results.

Raw materials needed to manufacture products are obtained from a number of suppliers and many of the raw materials are petroleum-based derivatives, minerals and metals. Under normal market conditions, these raw materials are generally available on the open market from a variety of producers. While alternate supplies of most key raw materials are available, supplier production outages may lead to strained supply-demand

Edgar Filing: FULLER H B CO - Form 10-K

situations for certain raw materials. The substitution of key raw materials requires us to identify new supply sources, reformulate, retest and may require seeking re-approval from our customers using those products. From time to time, the prices and availability of these raw materials may fluctuate, which could impair our ability to procure necessary materials, or increase the cost of manufacturing products. If the prices of raw materials increase in a short period of time, we may be unable to pass these increases on to our customers in a timely manner and could experience reductions to our profit margins.

Uncertainties in foreign political and economic conditions and fluctuations in foreign currency may adversely affect our results.

Approximately 57 percent, or \$1,084 million, of our net revenue was generated outside the United States in 2012. International operations could be adversely affected by changes in political and economic conditions, trade

Table of Contents

protection measures, restrictions on repatriation of earnings, differing intellectual property rights and changes in regulatory requirements that restrict the sales of products or increase costs. Also, fluctuations in exchange rates between the U.S. dollar and other currencies could potentially result in increases or decreases in earnings and may adversely affect the value of our assets outside the United States. Although we utilize risk management tools, including hedging, as appropriate, to mitigate market fluctuations in foreign currencies, any changes in strategy in regard to risk management tools can also affect sales revenue, expenses and results of operations and there can be no assurance that such measures will result in cost savings or that all market fluctuation exposure will be eliminated.

We experience substantial competition in each of the operating segments and geographic areas in which we operate.

Our wide variety of products are sold in numerous markets, each of which is highly competitive. Our competitive position in markets is, in part, subject to external factors. For example, supply and demand for certain of our products is driven by end-use markets and worldwide capacities which, in turn, impact demand for and pricing of our products. Many of our direct competitors are part of large multinational companies and may have more resources than we do. Any increase in competition may result in lost market share or reduced prices, which could result in reduced profit margins. This may impair the ability to grow or even to maintain current levels of revenues and earnings. While we have an extensive customer base, loss of certain top customers could adversely affect our financial condition and results of operations until such business is replaced, and no assurances can be made that we would be able to regain or replace any lost customers.

Failure to develop new products and protect our intellectual property could negatively impact our future performance and growth.

Ongoing innovation and product development are important factors in our competitiveness. Failure to create new products and generate new ideas could negatively impact our ability to grow and deliver strong financial results. We continually apply for and obtain U.S. and foreign patents to protect the results of our research for use in our operations and licensing. We are party to a substantial number of patent licenses and other technology agreements. We rely on patents, confidentiality agreements and internal security measures to protect our intellectual property. Failure to protect this intellectual property could negatively affect our future performance and growth.

We may be required to record impairment charges on our long-lived assets.

Weak demand may cause underutilization of our manufacturing capacity or elimination of product lines; contract terminations or customer shutdowns may force sale or abandonment of facilities and equipment; or other events associated with weak economic conditions or specific product or customer events may require us to record an impairment on tangible assets, such as facilities and equipment, as well as intangible assets, such as intellectual property or goodwill, which would have a negative impact on our financial results.

We have lawsuits and claims against us with uncertain outcomes.

Our operations from time to time are parties to or targets of lawsuits, claims, investigations and proceedings, including product liability, personal injury, asbestos, patent and intellectual property, commercial, contract, environmental, antitrust, health and safety, and employment matters, which are handled and defended in the ordinary course of business. The results of any future litigation or settlement of such lawsuits and claims are inherently unpredictable, but such outcomes could be adverse and material in amount. See Item 3. Legal Proceedings for a discussion of current litigation.

Table of Contents

Costs and expenses resulting from compliance with environmental laws and regulations may negatively impact our operations and financial results.

We are subject to numerous environmental laws and regulations that impose various environmental controls on us or otherwise relate to environmental protection, the sale and export of certain chemicals or hazardous materials, and various health and safety matters. The costs of complying with these laws and regulations can be significant and may increase as applicable requirements and their enforcement become more stringent and new rules are implemented. Adverse developments and/or periodic settlements could negatively impact our results of operations and cash flows. See Item 3. Legal Proceedings for a discussion of current environmental matters.

Distressed financial markets may result in dramatic deflation of asset valuations and a general disruption in capital markets.

Adverse equity market conditions and volatility in the credit markets could have a negative impact on the value of our pension trust assets and our future estimated pension liabilities, and other post-retirement benefit plans. In addition, we could be required to provide increased pension plan funding. As a result, our financial results could be negatively impacted. Reduced access to capital markets may affect our ability to invest in strategic growth initiatives such as acquisitions. In addition, the reduced credit availability could limit our customers' ability to invest in their businesses, refinance maturing debt obligations, or meet their ongoing working capital needs. If these customers do not have sufficient access to the financial markets, demand for our products may decline.

Catastrophic events could disrupt our operations or the operations of our suppliers or customers, having a negative impact on our financial results.

Unexpected events, including natural disasters and severe weather events, fires or explosions at our facilities or those of our suppliers, acts of war or terrorism, supply disruptions or breaches of security of our information technology systems could increase the cost of doing business or otherwise harm our operations, our customers and our suppliers. Such events could reduce demand for our products or make it difficult or impossible for us to receive raw materials from suppliers and deliver products to our customers.

The inability to attract and retain qualified personnel could adversely impact our business.

Sustaining and growing our business depends on the recruitment, development and retention of qualified employees. The inability to recruit and retain key personnel or the unexpected loss of key personnel may adversely affect our operations.

The acquisition of the global industrial adhesives business of Forbo Group may present certain risks to our business and operations.

Certain risks continue to exist after the closing of the acquisition on March 5, 2012, including, among other things:

Edgar Filing: FULLER H B CO - Form 10-K

the mix of markets served and business operations of the acquired business differ somewhat from our markets and our business operations, and the combined business will have a different business mix than our business prior to the acquisition, presenting different operational risks and challenges;

we may be unable to integrate successfully the business of the acquired business and realize the anticipated benefits of the merger;

the acquisition integration may involve unexpected costs, unexpected liabilities or unexpected delays;

our business may suffer as a result of uncertainty surrounding the acquisition and disruptions from the acquisition may harm relationships with customers, suppliers and employees;

evaluation of, and estimation of potential losses arising from lawsuits, claims, contingencies and legal proceedings could prove to be inaccurate.

Table of Contents

The inability to make or effectively integrate future acquisitions may affect our results.

As part of our growth strategy, we intend to pursue additional acquisitions of complementary businesses or products and joint ventures. The ability to grow through acquisitions or joint ventures depends upon our ability to identify, negotiate, complete and integrate suitable acquisitions or joint venture arrangements. If we fail to successfully integrate acquisitions into our existing business, our results of operations and cash flows could be adversely affected.

Item 1B. Unresolved Staff Comments

None.

Table of Contents**Item 2. Properties**

Principal executive offices and central research facilities are located in the St. Paul, Minnesota area. These facilities are company-owned and contain 247,630 square feet. Manufacturing operations are carried out at 22 plants located throughout the United States and at 27 plants located in 21 other countries. In addition, numerous sales and service offices are located throughout the world. We believe that the properties owned or leased are suitable and adequate for our business. Operating capacity varies by product line, but additional production capacity is available for most product lines by increasing the number of shifts worked. The following is a list of our manufacturing plants as of December 1, 2012 (each of the listed properties are owned by us, unless otherwise specified):

Item 3. Legal Proceedings

Environmental Matters. From time to time, we are identified as a potentially responsible party (PRP) under the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) and/or similar state laws that impose liability for costs relating to the clean up of contamination resulting from past spills, disposal or other release of hazardous substances. We are also subject to similar laws in some of the countries where current and former facilities are located. Our environmental, health and safety department monitors compliance with applicable laws on a global basis.

Currently we are involved in various environmental investigations, clean up activities and administrative proceedings and lawsuits. In particular, we are currently deemed a PRP in conjunction with numerous other parties, in a number of government enforcement actions associated with hazardous waste sites. As a PRP, we may be required to pay a share of the costs of investigation and clean up of these sites. In addition, we are engaged in environmental remediation and monitoring efforts at a number of current and former operating facilities, including remediation of environmental contamination at our Sorocaba, Brazil facility. Soil and water samples were collected on and around the Sorocaba facility, and test results indicated that certain contaminants, including carbon tetrachloride and other solvents, exist in the soil and in the groundwater at both the Sorocaba facility and some neighboring properties. We are continuing to work with Brazilian regulatory authorities to implement and operate a remediation system at the site. As of December 1, 2012, \$0.5 million was recorded as a liability for our best estimate of expected remediation expenses remaining for this site. Depending on the results of the testing of our current remediation actions, it is reasonably possible that we may be required to record additional liabilities related to remediation costs at the Sorocaba facility. Based on our analysis, the high end of our range for reasonably possible projected costs to remediate the Sorocaba site is \$0.8 million, inclusive of the existing accrual of \$0.5 million.

From time to time, we become aware of compliance matters relating to, or receive notices from, federal, state or local entities regarding possible or alleged violations of environmental, health or safety laws and regulations. We review the circumstances of each individual site, considering the number of parties involved, the level of potential liability or contribution of us relative to the other parties, the nature and magnitude of the hazardous substances involved, the method and extent of remediation, the estimated legal and consulting expense with respect to each site and the time period over which any costs would likely be incurred. To the extent we can reasonably estimate the amount of our probable liabilities for environmental matters, we establish a financial provision. As of December 1, 2012, we had reserved \$1.9 million, which represents our best estimate of probable liabilities with respect to environmental matters, inclusive of the accrual related to the Sorocaba facility as described above. It is reasonably possible that we may have additional liabilities related to these known environmental matters. The high end of our range for reasonably possible projected costs to remediate all known environmental matters is \$2.5 million, inclusive of the existing accrual of \$1.9 million. However, the full extent of our future liability for environmental matters is difficult to predict because of uncertainty as to the cost of investigation and clean up of the sites, our responsibility for such hazardous substances and the number of and financial condition of other potentially responsible parties.

While uncertainties exist with respect to the amounts and timing of the ultimate environmental liabilities, based on currently available information, we have concluded that these matters, individually or in the aggregate, will not have a material adverse effect on our results of operations, financial condition or cash flow. However, adverse developments and/or periodic settlements could negatively impact the results of operations or cash flows in one or more future periods.

Other Legal Proceedings. From time to time and in the ordinary course of business, we are a party to, or a target of, lawsuits, claims, investigations and proceedings, including product liability, personal injury, contract, patent and intellectual property, health and safety and employment matters. While we are unable to predict the outcome of these matters, we have concluded, based upon currently available information, that the ultimate resolution of any pending matter, individually or in the aggregate, including the asbestos litigation described in

Table of Contents

the following paragraphs, will not have a material adverse effect on our results of operations, financial condition or cash flow. However, adverse developments and/or periodic settlements could negatively impact the results of operations or cash flows in one or more future periods.

We have been named as a defendant in lawsuits in which plaintiffs have alleged injury due to products containing asbestos manufactured more than 25 years ago. The plaintiffs generally bring these lawsuits against multiple defendants and seek damages (both actual and punitive) in very large amounts. In many cases, plaintiffs are unable to demonstrate that they have suffered any compensable injuries or that the injuries suffered were the result of exposure to products manufactured by us. We are typically dismissed as a defendant in such cases without payment. If the plaintiff presents evidence indicating that compensable injury occurred as a result of exposure to our products, the case is generally settled for an amount that reflects the seriousness of the injury, the length, intensity and character of exposure to products containing asbestos, the number and solvency of other defendants in the case, and the jurisdiction in which the case has been brought.

A significant portion of the defense costs and settlements in asbestos-related litigation continues to be paid by third parties, including indemnification pursuant to the provisions of a 1976 agreement under which we acquired a business from a third party. Historically, this third party routinely defended all cases tendered to it and paid settlement amounts resulting from those cases. In the 1990s, the third party sporadically reserved its rights, but continued to defend and settle all asbestos-related claims tendered to it by us. In 2002, the third party rejected the tender of certain cases and indicated it would seek contributions for past defense costs, settlements and judgments. However, this third party is defending and paying settlement amounts, under a reservation of rights, in most of the asbestos cases tendered to the third party. As discussed below, during the fourth quarter of 2007, we and a group of other defendants, including the third party obligated to indemnify us against certain asbestos-related claims, entered into negotiations with certain law firms to settle a number of asbestos-related lawsuits and claims.

In addition to the indemnification arrangements with third parties, we have insurance policies that generally provide coverage for asbestos liabilities (including defense costs). Historically, insurers have paid a significant portion of our defense costs and settlements in asbestos-related litigation. However, certain of our insurers are insolvent. We have entered into cost-sharing agreements with our insurers that provide for the allocation of defense costs and, in some cases, settlements and judgments, in asbestos-related lawsuits. Under these agreements, we are required in some cases to fund a share of settlements and judgments allocable to years in which the responsible insurer is insolvent. In addition, to delineate our rights under certain insurance policies, in October 2009, we commenced a declaratory judgment action against one of our insurers in the United States District Court for the District of Minnesota. Additional insurers have been brought into the action to address issues related to the scope of their coverage.

As referenced above, during the fourth quarter of 2007, we and a group of other defendants entered into negotiations with certain law firms to settle a number of asbestos-related lawsuits and claims over a period of years. In total, we had expected to contribute up to \$4.1 million, based on a present value calculation, towards the settlement amounts to be paid to the claimants in exchange for full releases of claims. Of this amount, our insurers had committed to pay \$2.0 million based on the probable liability of \$4.1 million. Our contributions toward settlements from the time of the agreement through the end of fiscal year 2011 were \$2.2 million with insurers paying \$1.2 million of that amount. Based on this experience we reduced our reserves in the fourth quarter of 2011 to an undiscounted amount of \$0.3 million with insurers expected to pay \$0.2 million. There were no contributions or insurance payments during 2012, therefore our reserves for this agreement and our insurance receivable remained unchanged from the previous year-end. These amounts represent our best estimate for the settlement amounts yet to be paid related to this agreement. Our reserve is recorded on an undiscounted basis.

Table of Contents

In addition to the group settlement referenced above, a summary of the number of and settlement amounts for asbestos-related lawsuits and claims is as follows:

(\$ in millions)	Year Ended December 1, 2012	Year Ended December 3, 2011	Year Ended November 27, 2010
Lawsuits and claims settled	9	7	4
Settlement amounts	\$ 0.5	\$ 0.5	\$ 0.5
Insurance payments received or expected to be received	\$ 0.4	\$ 0.4	\$ 0.4

We do not believe that it would be meaningful to disclose the aggregate number of asbestos-related lawsuits filed against us because relatively few of these lawsuits are known to involve exposure to asbestos-containing products that we manufactured. Rather, we believe it is more meaningful to disclose the number of lawsuits that are settled and result in a payment to the plaintiff.

To the extent we can reasonably estimate the amount of our probable liabilities for pending asbestos-related claims, we establish a financial provision and a corresponding receivable for insurance recoveries. As of December 1, 2012, our probable liabilities and insurance recoveries related to asbestos claims, excluding those related to the group settlement discussed above, were \$0.2 million and \$0.2 million, respectively. These amounts relate to three pending cases and three settled cases for which final insurance payouts have not yet been made. We have concluded that it is not possible to reasonably estimate the cost of disposing of other asbestos-related claims (including claims that might be filed in the future) due to our inability to project future events. Future variables include the number of claims filed or dismissed, proof of exposure to our products, seriousness of the alleged injury, the number and solvency of other defendants in each case, the jurisdiction in which the case is brought, the cost of disposing of such claims, the uncertainty of asbestos litigation, insurance coverage and indemnification agreement issues, and the continuing solvency of certain insurance companies.

Based on currently available information, we have concluded that the resolution of any pending matter, including asbestos-related litigation, individually or in the aggregate, will not have a material adverse effect on our results of operations, financial condition or cash flow. However, adverse developments and/or periodic settlements could negatively impact the results of operations or cash flows in one or more future periods.

In addition to product liability claims discussed above, we are involved in other claims or legal proceedings related to our products, which we believe are not out of the ordinary in a business of the type and size in which we are engaged.

Item 4. Mine Safety Disclosures

Not applicable.

Table of Contents**Part II.****Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities**

Our common stock is traded on the New York Stock Exchange under the symbol FUL. As of January 11, 2013, there were 2,196 common shareholders of record for our common stock. The following table shows the high and low sales price per share of our stock and the dividends declared for the fiscal quarters.

	High and Low Sales Price				Dividends (Per Share)	
	2012		2011		2012	2011
	High	Low	High	Low		
First quarter	\$ 31.62	\$ 21.10	\$ 23.75	\$ 19.67	\$ 0.075	\$ 0.070
Second quarter	33.48	28.96	22.11	19.61	0.085	0.075
Third quarter	31.94	28.11	25.41	19.41	0.085	0.075
Fourth quarter	34.52	29.43	23.50	16.92	0.085	0.075

There are no significant contractual restrictions on our ability to declare or pay dividends. We currently expect that comparable dividends on our common stock will continue to be paid in the future.

Issuer Purchases of Equity Securities

Information on our purchases of equity securities during the fourth quarter of 2012 follows:

Period	(a) Total Number of Shares Purchased ¹	(b) Average Price Paid per Share	(c) Total Number of Shares Purchased as Part of a Publicly Announced Plan or Program	(d) Maximum Approximate Dollar Value of Shares that may yet be Purchased Under the Plan or Program (thousands)
September 2, 2012 - October 6, 2012	604	\$ 30.70		\$ 89,510
October 7, 2012 - November 3, 2012		\$		\$ 89,510
November 4, 2012 - December 1, 2012		\$		\$ 89,510

¹ The total number of shares purchased relates to shares withheld to satisfy the employees' withholding taxes upon vesting of restricted stock. There were no shares purchased in the fourth quarter of 2012 under the 2010 share repurchase plan. See Note 10 to the Consolidated Financial Statements for more information.

Upon vesting of restricted stock awarded to employees, shares are withheld to cover the employees' minimum withholding taxes.

Table of Contents**Total Shareholder Return Graph**

The line graph below compares the cumulative total shareholder return on our common stock for the last five fiscal years with cumulative total return on the S&P SmallCap 600 Index and Dow Jones U.S. Specialty Chemicals Index. This graph assumes a \$100 investment in each of H.B. Fuller, the S&P SmallCap 600 Index and the Dow Jones U.S. Specialty Chemicals Index at the close of trading on December 1, 2007, and also assumes the reinvestment of all dividends.

Item 6. Selected Financial Data

The following selected financial data has been derived from our audited Consolidated Financial Statements and should be read in conjunction with Management's Discussion and Analysis of Financial Condition and Results of Operations and the Consolidated Financial Statements and related notes included elsewhere in the Form 10-K.

(Dollars in thousands, except per share amounts)	Fiscal Years ³				
	2012	2011 ²	2010	2009	2008
Net revenue	\$ 1,886,239	\$ 1,444,085	\$ 1,256,825	\$ 1,135,762	\$ 1,280,004
Income from continuing operations ¹	\$ 68,287	\$ 80,215	\$ 64,293	\$ 82,478	\$ 18,673
Percent of net revenue	3.6	5.6	5.1	7.3	1.5
Total assets	\$ 1,786,320	\$ 1,227,709	\$ 1,153,457	\$ 1,100,445	\$ 1,081,328
Long-term debt, excluding current maturities	\$ 475,112	\$ 179,611	\$ 200,978	\$ 162,713	\$ 204,000
Total H.B. Fuller stockholders' equity	\$ 778,273	\$ 705,204	\$ 631,934	\$ 591,354	\$ 535,611
Per Common Share:					
Income from continuing operations:					
Basic	\$ 1.37	\$ 1.64	\$ 1.33	\$ 1.71	\$ 0.37
Diluted	\$ 1.34	\$ 1.61	\$ 1.31	\$ 1.68	\$ 0.36
Dividends declared and paid	\$ 0.3300	\$ 0.2950	\$ 0.2780	\$ 0.2700	\$ 0.2625
Book value ⁴	\$ 15.60	\$ 14.26	\$ 12.85	\$ 12.15	\$ 11.06
Number of employees	3,727	2,754	2,621	2,380	2,328

Table of Contents

- 1 2012 includes after-tax charges of \$35.4 million related to special charges, net. 2008 includes after-tax charges of \$54.3 million related to the write-off of goodwill in our Construction Products operating segment and other impairment charges.
- 2 2011 contained 53 weeks
- 3 All amounts have been adjusted for discontinued operations.
- 4 Book value is calculated by dividing total H.B. Fuller stockholders' equity by the number of common stock shares outstanding as of our fiscal year end.

Table of Contents

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

Overview

H.B. Fuller Company is a global formulator, manufacturer and marketer of adhesives and other specialty chemical products. We are managed through five operating segments – North America Adhesives, Construction Products, EIMEA (Europe, India, Middle East and Africa), Latin America Adhesives and Asia Pacific.

North America Adhesives, EIMEA, Latin America Adhesives and Asia Pacific operating segments manufacture and supply adhesives products in the assembly, packaging, converting, nonwoven and hygiene, performance wood, flooring, textile, flexible packaging, graphic arts and envelope markets. Construction Products operating segment provides floor preparation, grouts and mortars for tile setting as well as sealants and related products for HVAC installations.

We completed the acquisition of the global industrial adhesives and synthetic polymers business of Forbo Holding AG on March 5, 2012. The Forbo industrial adhesives business acquired is referred to as the acquired business and the legacy H.B. Fuller business is referred to as the legacy business in the Management's Discussion and Analysis. See Item 1. Business and Note 2 to the Consolidated Financial Statements.

We divested our Latin America Paints business on August 6, 2012. In accordance with Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) 205-20, Discontinued Operations we have classified the results of this business as discontinued operations. See Item 1. Business and Note 2 to the Consolidated Financial Statements.

Total Company: When reviewing our financial statements, it is important to understand how certain external factors impact us. These factors include:

Changes in the prices of our raw materials that are primarily derived from refining crude oil and natural gas

Global supply of and demand for raw materials

Economic growth rates, and

Currency exchange rates compared to the U.S. dollar

We purchase thousands of raw materials, the majority of which are petroleum/natural gas derivatives. With over 75 percent of our cost of sales accounted for by raw materials, our financial results are extremely sensitive to changing costs in this area. In addition to the impact from feedstock prices, the supply of and demand for raw materials also have a significant impact on our costs. As demand increases in high-growth areas, such as the Asia Pacific region, the supply of key raw materials may tighten, resulting in certain materials being put on allocation. Natural disasters, such as hurricanes, also can have an impact as key raw material producers are shut down for extended periods of time. We continually monitor capacity utilization figures, market supply and demand conditions, feedstock costs and inventory levels, as well as derivative and

Edgar Filing: FULLER H B CO - Form 10-K

intermediate prices, which affect our raw materials.

In 2012, we generated 43 percent of our net revenue in the U.S. and 36 percent in EIMEA. The pace of economic growth in these areas directly impacts certain industries to which we supply products. For example, adhesives-related revenues from durable goods customers in areas such as appliances, furniture and other woodworking applications tend to fluctuate with the overall economic activity. In business components such as Construction Products and insulating glass, revenues tend to move with more specific economic indicators such as housing starts and other construction-related activity.

The movement of foreign currency exchange rates as compared to the U.S. dollar impacts the translation of the foreign entities' financial statements into U.S. dollars. As foreign currencies strengthen against the dollar, our

Table of Contents

revenues and costs increase as the foreign currency-denominated financial statements translate into more dollars. The fluctuations of the Euro against the U.S. dollar have the largest impact on our financial results as compared to all other currencies. In 2012, the currency fluctuations had a negative impact on net revenue of \$41.4 million as compared to 2011.

Key financial results and transactions for 2012 included the following:

Net revenue increased 30.6 percent from 2011 primarily driven by the acquired business.

Gross profit margin decreased to 27.4 percent from 28.0 percent in 2011 and 28.5 percent in 2010 mostly due to lower gross profit margins of the acquired business.

Cash flow generated from operating activities was \$108.6 million in 2012 as compared to \$88.1 million in 2011 and \$72.2 million in 2010.

Acquired the global industrial adhesives and synthetic polymers business of Forbo Holding AG for 370.0 million Swiss francs or \$404.7 million. Inclusion of the acquired business increased net revenue by \$423.4 million.

Divested our Central America Paints business for cash proceeds of \$118.5 million. As part of this transaction, we recorded an after-tax gain of \$51.1 million.

Acquired Engent, Inc. on September 10, 2012 for \$7.9 million.

The global economic conditions showed little or no improvement in 2012. Our total year organic sales growth, which we define as the combined variances from product pricing and sales volume, was 4.2 percent for 2012 compared to 2011. The inclusion of a 53rd week in 2011 negatively impacted 2012 organic sales growth by approximately 2.0 percent. Lower gross profit margins of the acquired business contributed to a decrease in gross profit margin compared to 2011.

In 2012 our diluted earnings per share from continuing operations was \$1.34 per share compared to \$1.61 per share in 2011 and \$1.31 per share in 2010. The most significant factors affecting 2012 results were the 30.6 percent increase in net revenue, the acquisition of the acquired business and special charges, net of \$52.5 million for costs related to the Business Integration Project. On an after-tax basis, the special charges, net resulted in a \$35.4 million negative impact on net income and a negative \$0.70 effect on diluted earnings per share. See Note 5 to the Consolidated Financial Statements for more information.

In 2011 we had special charges, net of \$7.5 million related to the pending acquisition of the acquired business. On an after-tax basis, this was a negative \$5.8 million impact on net income and a \$0.12 negative effect on diluted earnings per share. In 2010 we had exit costs and impairment charges to exit our European polysulfide-based insulating glass product line, which resulted in a pre-tax loss of \$11.4 million. On an after-tax basis, this was a negative \$8.4 million impact on net income and a \$0.17 negative effect on diluted earnings per share.

2013 Outlook

For 2013, we expect to achieve modest organic revenue growth from our key focus markets of hygiene, packaging and durable assembly and by taking advantage of higher growth opportunities in emerging economies where consumer spending is growing at a higher rate than the overall global economy. In addition, we expect some margin expansion as we realize more of the synergy benefits from the Business Integration Project that began after the purchase of the acquired business. We expect our cost of raw materials in 2013 to be similar to 2012. Despite the continued high cost of raw materials, our gross margin should improve as we continue to manage pricing actions, reformulations and product substitutions. We also expect operating expenses to be leveraged to enhance our operating margin in 2013.

Table of Contents

Our capital spending plans for 2013 are much higher than actual spending in previous years as a significant portion of the investment for the Business Integration Project is completed. This reflects our confidence in our business and the opportunities we see to improve the productivity of our business and our prospects for growth.

Critical Accounting Policies and Significant Estimates: Management's discussion and analysis of our results of operations and financial condition are based upon Consolidated Financial Statements, which have been prepared in accordance with accounting principles generally accepted in the United States of America (U.S. GAAP). The preparation of these financial statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses and related disclosure of contingent assets and liabilities. We believe the critical accounting policies and areas that require the most significant judgments and estimates to be used in the preparation of the Consolidated Financial Statements are pension and other postretirement plan assumptions; goodwill impairment assessment; long-lived assets recoverability; product, environmental and other litigation liabilities; and income tax accounting.

Pension and Other Postretirement Plan Assumptions: We sponsor defined-benefit pension plans in both the U.S. and non-U.S. entities. Also in the U.S. we sponsor other postretirement plans for health care and life insurance benefits. Expenses and liabilities for the pension plans and other postretirement plans are actuarially calculated. These calculations are based on our assumptions related to the discount rate, expected return on assets, projected salary increases and health care cost trend rates. Note 11 to the Consolidated Financial Statements includes disclosure of assumptions employed in these measurements for both the non-U.S. and U.S. plans.

The discount rate assumption is determined using an actuarial yield curve approach, which enables us to select a discount rate that reflects the characteristics of the plan. The approach identifies a broad universe of corporate bonds that meet the quality and size criteria for the particular plan. We use this approach rather than a specific index that has a certain set of bonds that may or may not be representative of the characteristics of our particular plan. A lower discount rate increases the present value of the pension obligations. The discount rate for the U.S. pension plan was 3.83 percent at December 1, 2012, as compared to 5.07 percent at December 3, 2011 and 5.49 percent at November 27, 2010. Net periodic pension cost for a given fiscal year is based on assumptions developed at the end of the previous fiscal year. A discount rate reduction of 0.5 percentage points at December 1, 2012 would increase U.S. pension and other postretirement plan expense approximately \$0.3 million (pre-tax) in fiscal 2013. Discount rates for non-U.S. plans are determined in a manner consistent with the U.S. plan.

The expected long-term rate of return on plan assets assumption for the U.S. pension plan was 8.00 percent in 2012 compared to 8.00 percent for 2011 and 7.90 for 2010. Our expected long-term rate of return on U.S. plan assets was based on our target asset allocation assumption of 60 percent equities and 40 percent fixed-income. Management, in conjunction with our external financial advisors, determines the expected long-term rate of return on plan assets by considering the expected future returns and volatility levels for each asset class that are based on historical returns and forward-looking observations. For 2012 the expected long-term rate of return on the target equities allocation was 9.0 percent and the expected long-term rate of return on the target fixed-income allocation was 5.5 percent. The total plan rate of return assumption included an estimate of the impact of diversification and the plan expense. For 2013, the expected long-term rate of return on assets will be 7.75 percent with an expected long-term rate of return on the target equities allocation of 8.5 percent and an expected long-term rate of return on target fixed-income allocation of 5.0 percent. A change of 0.5 percentage points for the expected return on assets assumption would impact U.S. net pension and other postretirement plan expense by approximately \$1.9 million (pre-tax).

Management, in conjunction with our external financial advisors, uses the actual historical rates of return of the asset categories to assess the reasonableness of the expected long-term rate of return on plan assets. The most

Table of Contents

recent 10-year and 20-year historical equity returns are shown in the table below. Our expected rate of return on our total portfolio is consistent with the historical patterns observed over longer time frames.

U.S. Pension Plan

Historical actual rates of return	Total Portfolio	Equities	Fixed Income
10-year period	8.9%	7.7%	(*)10.9%
20-year period	8.6%	8.0%	(*)10.9%

(*) Beginning in 2006, our target allocation migrated from 100 percent equities to our current allocation of 60 percent equities and 40 percent fixed-income. The historical actual rate of return for the fixed income of 10.9 percent is since inception (6 years).

The expected long-term rate of return on plan assets assumption for non-U.S. pension plans was a weighted-average of 6.08 percent in 2012. The expected long-term rate of return on plan assets assumption used in each non-U.S. plan is determined on a plan-by-plan basis for each local jurisdiction and is based on expected future returns for the investment mix of assets currently in the portfolio for that plan. Management, in conjunction with our external financial advisors, develops expected rates of return for each plan, considers expected long-term returns for each asset category in the plan, reviews expectations for inflation for each local jurisdiction, and estimates the impact of active management of the plan's assets. Our largest non-U.S. pension plans are in Germany and the United Kingdom respectively. The expected long-term rate of return on plan assets for Germany was 5.8 percent and the historical rate of return since inception (15 years) for the total asset portfolio in Germany was 3.7 percent. The expected rate of return on our German portfolio of 5.8 percent assumes that market returns will improve in the future to be more in line with historical market patterns observed over longer time frames. In addition, we have modified our investment strategy for the German plan to include a more diversified pool of equity and fixed-income investments and, therefore, we currently expect the performance of the plan assets to improve going forward. The expected long-term rate of return on plan assets for the United Kingdom was 6.6 percent and the historical rate of return since inception (16 years) for the total asset portfolio in the United Kingdom was 6.5 percent. Management, in conjunction with our external financial advisors, uses actual historical returns of the asset portfolio to assess the reasonableness of the expected rate of return for each plan. Since both of these non-U.S. plans have been in existence for less than 20-years, the historical rate of return for each plan has been affected by a period of very poor market conditions by any longer term standards. The rates of return that have been earned by these plans over this shorter time is not what management or our external advisors expect in more normal economic times and over the long period these assets will be invested.

During 2011, we announced significant changes to our U.S. Pension Plan (the Plan). The changes included: benefits under the Plan were locked-in using service and salary as of May 31, 2011, participants no longer earn benefits for future service and salary as they had in the past, affected participants receive a three percent increase to the locked-in benefit for every year they continue to work for us and we are making a retirement contribution of three percent of eligible compensation to the 401(k) Plan for those participants. These changes to the Plan represented a plan curtailment as there is no longer a service cost component in the net periodic pension cost as all participants are considered inactive in the Plan.

The projected salary increase assumption is based on historic trends and comparisons to the external market. Higher rates of increase result in higher pension expenses. As this rate is also a long-term expected rate, it is less likely to change on an annual basis. In the U.S., we have used the rate of 5.0 percent for 2012, 4.17 percent for 2011 and 4.19 percent for 2010.

Goodwill: Goodwill is the excess of cost of an acquired entity over the amounts assigned to assets acquired and liabilities assumed in a purchase business combination. Goodwill is assigned to reporting units at the date the goodwill is initially recorded. Once goodwill has been assigned to a reporting unit, it no longer retains its association with a particular acquisition, and all the activities within a reporting unit are available to support the value of goodwill. Accounting standards require us to test goodwill for impairment annually or more often if circumstances or events indicate a change in the estimated fair value.

Table of Contents

The goodwill impairment analysis is a two-step process. The first step used to identify potential impairment involves comparing each reporting unit's estimated fair value to its carrying value, including goodwill. We use a discounted cash flow approach to estimate the fair value of our reporting units. Our judgment is required in developing the assumptions for the discounted cash flow model. These assumptions include revenue growth rates, profit margin percentages, discount rates, perpetuity growth rates, future capital expenditures and working capital requirements. If the estimated fair value of a reporting unit exceeds its carrying value, goodwill is considered to not be impaired. If the carrying value exceeds estimated fair value, there is an indication of potential impairment and the second step is performed to measure the amount of impairment.

The second step of the process involves the calculation of an implied fair value of goodwill for each reporting unit for which step one indicated impairment. The implied fair value of goodwill is determined similar to how goodwill is calculated in a business combination, by measuring the excess of the estimated fair value of the reporting unit as calculated in step one, over the estimated fair values of the individual assets, liabilities and identifiable intangibles as if the reporting unit was being acquired in a business combination. If the implied fair value of goodwill exceeds the carrying value of goodwill assigned to the reporting unit, there is no impairment. If the carrying value of goodwill assigned to a reporting unit exceeds the implied fair value of the goodwill, an impairment charge is recorded for the excess. An impairment loss cannot exceed the carrying value of goodwill assigned to a reporting unit, and the loss establishes a new basis in the goodwill. Subsequent reversal of goodwill impairment losses is not permitted.

In the fourth quarter of 2012, we conducted the required annual test of goodwill for impairment. We performed the goodwill impairment analysis on our reporting units by using a discount rate at the high end of our range. There were no indications of impairment in any of our reporting units. Of the goodwill balance of \$254.3 million as of December 1, 2012, \$147.3 million is allocated to the EIMEA reporting unit and \$58.7 million is allocated to the North America Adhesives reporting unit. In both of these reporting units, the calculated fair value substantially exceeded the carrying value of the net assets. The Construction Products reporting unit had a goodwill balance of \$13.3 million as of December 1, 2012. The calculated fair value of this reporting unit exceeded its carrying value by approximately 26 percent. The goodwill balance in the Latin America Adhesives reporting unit is \$7.5 million as of December 1, 2012 and the calculated fair value exceeded its carrying value by approximately 28 percent. The goodwill balance in the Asia Pacific reporting unit is \$27.5 million as of December 1, 2012. The calculated fair value exceeded its carrying value by approximately 68 percent. In all three of these reporting units, the calculated fair value exceeded the carrying value by a reasonable margin.

The Construction Products reporting unit continues to be the reporting unit with the least amount of excess fair value over carrying value. The residential construction market in the U.S. stabilized in 2011 and in 2012 our Construction Products reporting unit had net revenue growth of 9.3 percent over 2011, mainly due to increased sales volume. Projected cash flows used in the fair value calculation in the fourth quarter of 2012 were based on continued growth in 2013 of 8.1 percent. For years beyond 2013, net revenue projections assume continued growth in the mid-single digits through 2017 with a leveling off in the low-single digits for the remaining years. Operating income for the Construction Products reporting unit is projected to grow primarily due to revenue growing at a higher rate than selling, general and administrative (SG&A) expenses thereby providing better leverage in earnings in future years and manufacturing capacity efficiency improvements in 2014 and beyond. Although we believe the assumptions used to estimate the fair value of the Construction Products reporting unit are realistic, another slowdown or decline in the U.S. residential construction industry could have an adverse impact on Construction Products' future cash flows.

The Latin America Adhesives reporting unit had net revenue growth of 5.8 percent in 2012 compared to 2011. Projected cash flows used in the fair value calculation in the fourth quarter of 2012 were based on continued growth in 2013 of 7.1 percent. For years beyond 2013, net revenue projections assume continued growth in the low-single digits for the remaining years. Operating earnings for the Latin America Adhesives reporting unit are projected to grow primarily due to revenue growing at a higher rate than SG&A expenses.

Table of Contents

The Asia Pacific reporting unit had net revenue growth of 14.8 percent in 2012 compared to 2011. Projected cash flows used in the fair value calculation in the fourth quarter of 2012 were based on continued growth in 2013 of 13.9 percent. For years beyond 2013, net revenue projections assume continued growth in the low-double digits through 2016 with a leveling off in the mid-single digits for the remaining years. Operating earnings for the Asia Pacific reporting unit are projected to grow primarily due to revenue growing at a higher rate than SG&A expenses.

If the economy or business environment falter and we are unable to achieve our assumed revenue growth rates or profit margin percentages, our projections used would need to be remeasured, which could impact the carrying value of our goodwill in one or more of our reporting units. See Note 7 to the Consolidated Financial Statements.

Recoverability of Long-Lived Assets: The assessment of the recoverability of long-lived assets reflects our assumptions and estimates. Factors that we must estimate when performing impairment tests include sales volume, prices, inflation, currency exchange rates, tax rates and capital spending. Significant judgment is involved in estimating these factors, and they include inherent uncertainties. The measurement of the recoverability of these assets is dependent upon the accuracy of the assumptions used in making these estimates and how the estimates compare to the eventual future operating performance of the specific businesses to which the assets are attributed.

Judgments made by us include the expected useful lives of long-lived assets. The ability to realize undiscounted cash flows in excess of the carrying amounts of such assets is affected by factors such as the ongoing maintenance and improvement of the assets, changes in economic conditions and changes in operating performance.

In 2010 we exited our polysulfide-based insulating glass product line in Europe. In accordance with accounting standards, we determined that the carrying amount of this asset group was not recoverable and was therefore impaired. We calculated the fair value of the asset group using a discounted cash flow approach. As a result of this analysis, we recorded pre-tax asset impairment charges of \$8.8 million to write-down the value of amortizable intangible assets.

Product, Environmental and Other Litigation Liabilities: As disclosed in Item 3. and in Note 1 and Note 13 to the Consolidated Financial Statements, we are subject to various claims, lawsuits and other legal proceedings. Reserves for loss contingencies associated with these matters are established when it is determined that a liability is probable and the amount can be reasonably estimated. The assessment of the probable liabilities is based on the facts and circumstances known at the time that the financial statements are being prepared. For cases in which it is determined that a liability is probable but only a range for the potential loss exists, the minimum amount of the range is recorded and subsequently adjusted as better information becomes available.

For cases in which insurance coverage is available, the gross amount of the estimated liabilities is accrued, and a receivable is recorded for any probable estimated insurance recoveries. As of December 1, 2012, we have accrued \$0.5 million for potential liabilities and \$0.5 million for potential insurance recoveries related to asbestos litigation. We also have recorded \$1.9 million for environmental investigation and remediation liabilities, including \$0.5 million for environmental remediation and monitoring activities at our Sorocaba, Brazil facility as of December 1, 2012. A discussion of environmental, product and other litigation liabilities is disclosed in Item 3. and Note 13 to the Consolidated Financial Statements.

Based upon currently available facts, we do not believe that the ultimate resolution of any pending legal proceeding, individually or in the aggregate, will have a material adverse effect on our long-term financial condition. However, adverse developments and/or periodic settlements could negatively affect our results of operations or cash flows in one or more future quarters.

Income Tax Accounting: As part of the process of preparing the Consolidated Financial Statements, we are required to estimate income taxes in each of the jurisdictions in which we operate. The process involves

Table of Contents

estimating actual current tax expense along with assessing temporary differences resulting from differing treatment of items for book and tax purposes. These temporary differences result in deferred tax assets and liabilities, which are included in the Consolidated Balance Sheets. We record a valuation allowance to reduce our deferred tax assets to the amount that is more-likely-than-not to be realized. We have considered future taxable income and ongoing tax planning strategies in assessing the need for the valuation allowance. Increases in the valuation allowance result in additional expense to be reflected within the tax provision in the Consolidated Statements of Income. As of December 1, 2012, the valuation allowance to reduce deferred tax assets totaled \$12.3 million.

We recognize tax benefits for tax positions for which it is more-likely-than-not that the tax position will be sustained by the applicable tax authority at the largest amount of tax benefit that is greater than fifty percent likely of being realized upon ultimate settlement. We do not recognize a financial statement benefit for a tax position that does not meet the more-likely-than-not threshold. We believe that our liabilities for income taxes reflect the most likely outcome. It is difficult to predict the final outcome or the timing of the resolution of any particular tax position. Future changes in judgment related to the resolution of tax positions will impact earnings in the quarter of such change. We adjust our income tax liabilities related to tax positions in light of changing facts and circumstances. Settlement with respect to a tax position would usually require cash. Based upon our analysis of tax positions taken on prior year returns and expected tax positions to be taken for the current year tax returns, we have identified gross uncertain tax positions of \$4.9 million as of December 1, 2012.

We have not recorded U.S. deferred income taxes for certain of our non-U.S. subsidiaries undistributed earnings as such amounts are intended to be indefinitely reinvested outside of the U.S. Should we change our business strategies related to these non-U.S. subsidiaries, additional U.S. tax liabilities could be incurred. It is not practical to estimate the amount of these additional tax liabilities. See Note 9 to the Consolidated Financial Statements for further information on income tax accounting.

Results of Operations**Net revenue:**

(\$ in millions)	2012	2011	2010	2012 vs 2011	2011 vs 2010
Net revenue	\$ 1,886.2	\$ 1,444.1	\$ 1,256.8	30.6%	14.9%

Net revenue in 2012 of \$1,886.2 million increased \$442.1 million or 30.6 percent from 2011 net revenue of \$1,444.1 million. Every five or six years we have a 53rd week in our fiscal year. 2011 was a 53-week year which contributed approximately 2.0 percent to net revenue in 2011, primarily related to volume. The 2011 net revenue was \$187.3 million or 14.9 percent higher than the net revenue of \$1,256.8 million in 2010. We review variances in net revenue in terms of changes related to product pricing, sales volume, changes in foreign currency exchange rates and acquisitions. The following table shows the net revenue variance analysis for the past two years:

	2012 vs 2011	2011 vs 2010
Product pricing	4.8%	9.8%
Sales volume	(0.6)%	1.3%
Currency	(2.9)%	2.9%
Acquisitions	29.3%	0.9%
	30.6%	14.9%

Edgar Filing: FULLER H B CO - Form 10-K

Organic sales growth, which we define as the combined variances from product pricing and sales volume, increased 4.2 percent in 2012 as compared to 2011. The inclusion of a 53rd week in 2011 negatively impacted 2012 organic sales growth by approximately 2.0 percent. The 4.2 percent organic sales growth in 2012 was led by 9.3 percent growth in Construction Products, 5.4 percent growth in EIMEA, 4.1 percent growth in Latin America Adhesives and 3.8 percent growth in North America Adhesives. Substantially all of the negative

Table of Contents

currency impact was driven by the weakening of the Euro against the U.S. dollar. The acquired business increased net revenue by \$423.4 million.

Organic sales growth increased 11.1 percent (positive 9.8 percent from selling prices and 1.3 percent from sales volume) in 2011 as compared to 2010. The 2011 sales volume included approximately 2.0 percent in incremental net revenue related to the 53rd week. Four of our five operating segments had double digit organic sales growth in 2011 compared to 2010. The 11.1 percent organic sales growth was driven by 13.3 percent growth in Latin America Adhesives, 12.5 percent growth in Asia Pacific, 11.7 percent growth in EIMEA, 10.1 percent growth in Construction Products and 9.6 percent growth in North America Adhesives. The net revenue variance from acquisitions was mainly due to the Revertex Finewaters acquisition in the third quarter of 2010.

Cost of sales:

(\$ in millions)	2012	2011	2010	2012 vs 2011	2011 vs 2010
Raw materials	\$ 1,084.3	\$ 821.1	\$ 687.7	32.1%	19.4%
Other manufacturing costs	284.7	219.2	211.0	29.9%	3.9%
Cost of sales	\$ 1,369.0	\$ 1,040.3	\$ 898.7	31.6%	15.8%
Percent of net revenue	72.6%	72.0%	71.5%		

Cost of sales increased 31.6 percent in 2012 compared to 2011. The increase in raw materials is primarily attributed to the incremental volume of the acquired business combined with a slight increase in raw material costs. Raw material cost as a percentage of net revenue increased 60 basis points as the inclusion of the acquired business that generates lower margins relative to the legacy business more than offset the benefit of higher average sales prices on this ratio. Cost of sales as a percent of net revenue increased by 60 basis points in 2012.

The cost of sales increased 15.8 percent in 2011 compared to 2010. The increase was driven primarily by the increases in raw material cost due to supply shortages. Each of our five operating segments was impacted by the rising raw material costs. The shortages were driven by refineries reducing the supply of the by-products that are used as raw materials in the production of adhesives and increased demand in adjacent industries. The 2010 cost of sales included \$1.8 million of charges related to the exit of the window polysulfide-based product line in our EIMEA operating segment. Cost of sales as a percent of net revenue increased to 72.0 percent in 2011 compared to 71.5 percent in 2010.

Gross profit:

(\$ in millions)	2012	2011	2010	2012 vs 2011	2011 vs 2010
Gross profit	\$ 517.3	\$ 403.8	\$ 358.2	28.1%	12.7%
Percent of net revenue	27.4%	28.0%	28.5%		

Gross profit increased by \$113.5 million compared to 2011, however, gross profit margin decreased by 60 basis points. The inclusion of the acquired business which generates lower margins relative to the legacy business was the primary reason for both the increase in gross profit and the lower margin percentage.

Edgar Filing: FULLER H B CO - Form 10-K

Our gross profit margin decreased to 28.0 percent in 2011 from 28.5 percent in 2010. The lower gross profit margin for 2011 as compared to 2010 was due to the increases in raw material costs which were not completely offset by our price increases implemented in 2011.

Table of Contents**Selling, general and administrative (SG&A) expenses:**

(\$ in millions)	2012	2011	2010	2012 vs 2011	2011 vs 2010
SG&A	\$ 354.7	\$ 286.9	\$ 263.6	23.7%	8.8%
Percent of net revenue	18.8%	19.9%	21.0%		

Our SG&A expenses increased \$67.8 million or 23.7 percent compared to 2011. This increase is primarily attributable to the addition of the acquired business. The lower relative cost structure of the acquired business and the increase in net revenue for the legacy business resulted in the 110 basis point decrease in SG&A expense as a percentage of net revenue.

SG&A expenses increased \$23.3 million in 2011 compared to 2010, but decreased as a percent of revenue to 19.9 percent in 2011 from 21.0 percent in 2010. The increased expense in 2011 was largely due to higher costs associated with adding resources to our sales and technical organizations, currency effects and a full year of the Revertex Finewaters business costs, which we acquired in 2010.

Special Charges, net

(\$ in millions)	2012	2011	2010
Special Charges, net	\$ 52.5	\$ 7.5	\$

The following table provides detail of special charges, net:

(\$ in millions)	2012	2011
Acquisition and transformation related costs:		
Professional services	\$ 24.7	\$ 4.4
Financing availability costs	4.3	
Foreign currency option contract	0.8	3.1
Gain on foreign currency forward contracts	(11.6)	
Other related costs	2.0	
Restructuring costs:		
Workforce reduction costs	28.1	
Facility exit costs	4.2	
Special charges, net	\$ 52.5	\$ 7.5

We completed the acquisition of the acquired business on March 5, 2012. The integration of this business involves a significant amount of restructuring and capital investment to optimize the new combined entity. In addition, in July of 2011 we announced our intentions to take a series of actions in our existing EIMEA operating segment to improve the profitability and future growth prospects of this operating segment. We have combined these two initiatives into a single project which we refer to as the Business Integration Project. During the years ended December 1, 2012 and December 3, 2011, we incurred special charges, net of \$52.5 million and \$7.5 million respectively, for costs related to the Business Integration Project.

Edgar Filing: FULLER H B CO - Form 10-K

Acquisition and transformation related costs of \$24.7 million for the year ended December 1, 2012 include costs related to organization consulting, investment advisory, financial advisory, legal and valuation services necessary to acquire and integrate the acquired business into our existing operating segments. For the year ended December 1, 2012, we also incurred other costs related to the acquisition including an expense of \$4.3 million to make a bridge loan available if needed and an expense of \$0.8 million related to the purchase of a foreign currency option to hedge a portion of the acquisition purchase price. For the year ended December 3, 2011, we incurred acquisition and transformation related costs of \$4.4 million for investment advisory, financial advisory, legal and valuation services necessary to acquire the acquired business and an expense of \$3.1 million related to the purchase of a foreign currency option to hedge a portion of the acquisition purchase price.

Table of Contents

During the first quarter of 2012, we entered into forward currency contracts maturing on March 5, 2012 to purchase 370.0 million Swiss francs at a blended forward rate of 1.06245 USD/CHF. Our objective was to economically hedge the purchase price for the pending acquisition of the global industrial adhesives business of Forbo Group after the price was established. The currency contracts were not designated as hedges for accounting purposes. When the acquisition closed on March 5, 2012, the forward currency contracts were settled at a rate of 1.09385 USD/CHF. For the year ended December 1, 2012, the net gain on the forward currency contracts was \$11.6 million which partially offset other acquisition and transformation related costs.

For the year ended December 1, 2012, we incurred workforce reduction costs of \$28.1 million, facility exit costs of \$4.2 million and other costs of \$2.0 million related to the Business Integration Project.

The Business Integration Project is a broad-based transformation plan involving all major processes in three of our existing operating segments. The integration strategy and execution plan is unique for each operating segment reflecting the differences within the legacy operating segments as well as differences within the acquired business in each geographic region. In the North America Adhesives operating segment, the integration work is essentially a consolidation of two similar businesses. The customer facing portion of the two businesses (sales, marketing and technical) has been combined into a new, streamlined organization that is designed to be more efficient and more responsive to customer needs. The production capacity of the two organizations is being optimized mostly by transferring volume from the acquired business to existing facilities within the legacy North America Adhesives operating segment. Since capacity already exists within the receiving facilities, the capital investment required to transfer this production and the time required to affect these transfers will be minimized.

In the EIMEA operating segment, the Business Integration Project impacts more aspects of the business and is more complex. The two businesses being combined have similar inefficiencies and opportunities for improved productivity, generally due to excess complexity within the core processes of each of the businesses. Similar to the North America Adhesives project, the customer facing organizations have been optimized by combining the two organizations into one new, streamlined organization that is more efficient and more responsive to the unique customer groups we serve. In addition, the support and administrative functions of both businesses are in the process of being reorganized and in many cases relocated to create more efficient functions. The integration of the production assets will be more complicated in EIMEA because both the legacy business manufacturing network and the acquired business manufacturing network are inefficient and in need of upgrades. In this region the restructuring of the production footprint will be more extensive with several existing plants closed and new, enhanced production facilities constructed to provide greater operating efficiencies and a solid foundation for future growth. This portion of the project will require more capital investment, higher restructuring and severance costs and a longer time frame when compared to the North America Adhesives portion of the project.

In the Asia Pacific operating segment, the Business Integration Project is less complex because the acquired business in that region was relatively small. The focus of the integration work in this region is to build a solid foundation for growth in the commercial and technical areas and, over time, create a more efficient production network in China.

The benefits of the Business Integration Project are expected to be substantial. We have plans to create annual cash cost savings and other cash pre-tax profit improvement benefits aggregating to \$90.0 million when the various integration activities are completed in 2014. By 2015, the Business Integration Project activities are expected to improve the EBITDA margin of the global business from just under 11 percent in 2011 to a target level of 15 percent. The project incorporates many different work streams each of which has a specific timeline for completion and delivery of benefits. Some of the initiatives, such as raw material cost reductions, have delivered immediate benefits while other initiatives, such as facility closures, will take longer to implement and the related cost savings will be achieved later in the project. Taking the expected impact of all initiatives into account, the profit improvement benefits from the project and the resulting improvement in EBITDA margin should occur in generally equal increments over the eight quarters commencing in the third quarter of 2012 through the second quarter of 2014.

Table of Contents

The total costs, excluding capital expenditures, to achieve these benefits are expected to be approximately \$121.0 million of which \$60.0 million have been expensed since inception of the Business Integration Project in 2011. The remaining expected costs of approximately \$61.0 million will occur over the next several quarters through the end of 2014. The following table provides detail of costs incurred and future expected costs of the Business Integration Project:

(\$ in millions)	As of December 1, 2012		
	Costs Incurred Inception-to-Date	Expected Costs Remaining	Total Expected Costs
Acquisition and transformation related costs	\$ 25.7	\$ 9.3	\$ 35.0
Other related costs	2.0	8.0	10.0
Work force reduction costs	28.1	24.9	53.0
Cash facility exit costs	1.0	16.0	17.0
Non-cash facility exit costs	3.2	2.8	6.0
Business Integration Project	\$ 60.0	\$ 61.0	\$ 121.0

The remaining expected Business Integration Project costs of \$61.0 million will be incurred over several quarters as the measures are implemented, and will total approximately \$44.0 million in fiscal year 2013 and approximately \$17.0 million in fiscal year 2014. The costs associated with the acquisition integration and the cash costs of the restructuring are incremental cash outlays that will be funded with existing cash and cash generated from operations. Non-cash costs are primarily related to accelerated depreciation of long-lived assets.

The capital expenditures related to the Business Integration Project will be significant. Our initial estimates made at the time of the acquisition, were that annual capital expenditures would increase to approximately \$65.0 million for fiscal years 2012, 2013 and 2014, a significant increment above our normal spending rate of approximately \$50.0 million. In 2012 we spent less than \$40.0 million in capital expenditures. As the project has progressed and the scope of the various projects are more fully defined, we have changed our forecasts. Going forward, we expect capital expenditures to reach \$110.0 million in 2013 and the aggregate of spending in the years 2014 and 2015 is expected to be \$100.0 million. This updated capital spending forecast for all projects including the Business Integration Project is consistent with our original forecast, only modified to reflect better estimates of the timing of capital expenditures. This capital spending program will be funded from the operating cash flows of the business and if necessary, from available cash and short-term borrowing.

Going forward, we plan to report our progress on achieving our profit improvement initiatives each quarter. We will focus on three key metrics which capture the bulk of the Business Integration Project objectives: (1) cost savings achieved through workforce reductions, (2) cost reductions achieved through facility closures and consolidation, and (3) the EBITDA margin of the business relative to our expected trend over the timeframe of the project. In addition, the costs to achieve these benefits will be reported relative to the \$121.0 million total expected cost estimate in each reporting period.

For the year ended December 1, 2012, we achieved cost savings of \$5.1 million related to workforce reductions and \$1.6 million related to facility closures and consolidations. The above cost savings represent benefits from selected activities included in the Business Integration Project. EBITDA margin for the fourth quarter of 12.4 percent exceeded our plan.

The specific work streams of the Business Integration Project which have been approved by management and recorded in our results of operations are as follows:

In January 2012, we initiated a facility closure and transfer plan as part of our previously announced actions in our existing EIMEA operating segment, including the closure of facilities in Wels, Austria and Borgolavezzaro,

Table of Contents

Italy and the transfer of shared services functions to a single location in Mindelo, Portugal. We expected to incur total exit costs of approximately \$22.4 million related to these actions. In May 2012, we announced an additional plan for the integration of the acquired business in our EIMEA operating segment, including the closure of three additional production facilities located in Chatteris, United Kingdom; Pirmasens, Germany and Vigo, Spain. We expect to incur additional exit costs of approximately \$51.1 million related to these actions. The total exit costs of \$73.5 million for this portion of the Business Integration Project include expenditures of approximately \$49.0 million primarily for severance and employee related costs, approximately \$19.4 million for other associated cash costs primarily related to facility shut downs and non-cash charges of approximately \$5.1 million, primarily related to accelerated depreciation of long-lived assets. This portion of the Business Integration Project began in the first quarter and is expected to be completed by the end of fiscal year 2014.

In April 2012, we approved a plan for the integration of the acquired business in our North America Adhesives operating segment, including the closure of six production facilities located in Pointe-Claire, Quebec; Morris, Illinois; Kansas City, Kansas; Eugene, Oregon; Jackson, Tennessee and Dallas, Texas. We expect to incur exit costs of approximately \$12.7 million related to these actions. The exit costs for this portion of the Business Integration Project include expenditures of approximately \$5.0 million for severance and related employee costs and approximately \$7.7 million for other associated cash costs, primarily related to facility shutdowns. This portion of the Business Integration Project began in the second quarter and is expected to be completed by the end of fiscal year 2013.

In October of 2012, we approved a plan for the integration of the acquired business in our Asia Pacific operating segment, including the closure of two production facilities located in Shanghai and Guangzhou, China. Production from these facilities will be moved to other existing production facilities in the Shanghai and Guangzhou areas. We expect to incur exit costs of approximately \$3.0 million related to these actions. The exit costs for this portion of the Business Integration Project include expenditures of approximately \$0.9 million for severance and related employee costs, approximately \$0.8 million for other associated cash costs, primarily related to facility shutdowns and non-cash charges of approximately \$1.3 million primarily associated with accelerated depreciation of long-lived assets. This portion of the Business Integration Project began in the fourth quarter and is expected to be completed by the end of fiscal year 2014.

Asset impairment charges:

(\$ in millions)	2012	2011	2010
Asset impairment charges	\$ 1.5	\$ 0.3	\$ 8.8

In 2012, we recorded pre-tax asset impairment charges of \$1.5 million to write down the value of two of our cost basis investments to fair value.

During 2011, we discontinued production of the polymer used in certain resin products that had been produced in our EIMEA operating segment. In accordance with accounting standards, we determined that the carrying amount of the trademarks and trade names used in these resin products was impaired. We calculated the fair value using a discounted cash flow approach. As a result of this analysis, we recorded pre-tax asset impairment charges of \$0.3 million related to the impairment of trademarks and trade names used in the abandoned resin products.

In 2010 we exited our polysulfide-based insulating glass product line in Europe. In accordance with accounting standards, we determined that the carrying amount of this asset group was not recoverable and was therefore impaired. We calculated the fair value of the asset group using a discounted cash flow approach. As a result of this analysis, we recorded pre-tax asset impairment charges of \$8.8 million to write-down the value of intangible assets.

Table of Contents**Other income (expense), net:**

(\$ in millions)	2012	2011	2010
Other income (expense), net	\$ 0.8	\$ 4.1	\$ 1.2

Interest income was \$1.7 million in 2012 compared to \$2.3 million in 2011 and \$0.9 million in 2010. Lower interest rates in EIMEA and a change in mix from cash held in countries with higher interest rates to countries with lower interest rates both contributed to the decreased interest income in 2012 as compared to 2011. Higher interest rates in EIMEA and slightly higher average cash balances both contributed to the increased interest income in 2011 as compared to 2010. Currency transaction and remeasurement losses were \$1.2 million, \$1.5 million and \$0.1 million in 2012, 2011 and 2010, respectively. Gains on disposal of fixed assets were \$0.6 million, \$1.7 million and \$0.6 million in 2012, 2011 and 2010, respectively.

Interest expense:

(\$ in millions)	2012	2011	2010	2012 vs 2011	2011 vs 2010
Interest expense	\$ 19.8	\$ 10.8	\$ 10.4	83.1%	3.8%

Interest expense was \$19.8 million in 2012 compared to \$10.8 million in 2011. The higher interest expense in 2012 was due to increased debt obtained to purchase the acquired business on March 5, 2012. Interest expense was slightly higher in 2011 compared to 2010 due to higher interest rates partially offset by lower average debt levels.

Income taxes:

(\$ in millions)	2012	2011	2010
Income taxes	\$ 30.5	\$ 31.2	\$ 20.3
Effective tax rate	34.0%	30.5%	26.5%

Income tax expense in 2012 of \$30.5 million included \$2.0 million of discrete tax expense in both the U.S. and foreign jurisdictions. Excluding discrete items, the overall effective tax rate increased by 3.1 percentage points in 2012 as compared to the 2011. The increase in the tax rate is principally due to a change in the geographic mix of pre-tax earnings and reduced tax benefit for special charges, net.

Income tax expense in 2011 of \$31.2 million included \$2.0 million of discrete tax expense in both the U.S. and foreign jurisdictions. Excluding discrete items, the overall effective tax rate increased by 4.9 percentage points in 2011 as compared to the 2010 rate without discrete tax benefits and charges associated with the polysulfide-based insulating glass product line exit. The increase in the tax rate is principally due to a change in the geographic mix of pre-tax earnings and the impact of foreign tax credits in the U.S. as compared to 2010.

Income from equity method investments:

Edgar Filing: FULLER H B CO - Form 10-K

(\$ in millions)	2012	2011	2010	2012 vs 2011	2011 vs 2010
Income from equity method investments	\$ 9.2	\$ 9.0	\$ 8.0	2.4%	12.5%

The income from equity method investments relates to our 50 percent ownership of the Sekisui-Fuller joint venture in Japan. The results reflect the higher net income recorded by the joint venture in 2012 compared to 2011 and 2010.

Income from discontinued operations, net of tax:

(\$ in millions)	2012	2011	2010
Income from discontinued operations, net of tax	\$ 57.6	\$ 8.8	\$ 6.1

Table of Contents

The income from discontinued operations, net of tax, relates to the results of operations and the gain on the sale of the Central America Paints business, which we sold August 6, 2012. The \$57.6 million in 2012 includes the after-tax gain on the sale of our Central America Paints business of \$51.1 million.

Net (income) loss attributable to non-controlling interests:

(\$ in millions)	2012	2011	2010
Net (income) loss attributable to non-controlling interests	\$ (0.2)	\$ 0.1	\$ 0.5

At the end of 2011, we repurchased the 20 percent holding that Sekisui Chemical had in our China entities. For 2012 net (income) loss attributable to non-controlling interests relates to the 10 percent redeemable non-controlling interest in HBF Turkey. For 2011 net (income) loss attributable to non-controlling interests related to the 20 percent holding that Sekisui Chemical had in our China entities and the 10 percent redeemable non-controlling interest in HBF Turkey. For 2010 it relates to the 20 percent holding that Sekisui Chemical had in our China entities.

Net income attributable to H.B. Fuller:

(\$ in millions)	2012	2011	2010	2012 vs 2011	2011 vs 2010
Net income attributable to H.B. Fuller	\$ 125.6	\$ 89.1	\$ 70.9	41.0%	25.7%
Percent of net revenue	6.7%	6.2%	5.6%		

Net income attributable to H.B. Fuller was \$125.6 million in 2012 compared to \$89.1 million in 2011 and \$70.9 million in 2010. Fiscal year 2012 included \$52.5 million of special charges, net (35.4 million after-tax and a negative \$0.70 effect on diluted earnings per share) for costs related to the Business Integration Project compared to \$7.5 million (\$5.8 million after-tax) in 2011. 2012 included \$57.6 million of income from discontinued operations, net of tax, inclusive of an after-tax gain on the sale of discontinued operations of \$51.1 million. Diluted earnings per share, from continuing operations, was \$1.34 per share for 2012, \$1.61 per share for 2011 and \$1.31 per share for 2010.

The \$89.1 million reported for 2011 included after-tax special charges, net of \$5.8 million (\$0.11 per diluted share). The 2010 net income attributable to H.B. Fuller included \$8.4 million (\$0.17 per diluted share) of after-tax charges related to exiting the polysulfide insulating glass product line in Europe.

Operating Segment Results

We are required to report segment information in the same way that management internally organizes its business for assessing performance and making decisions regarding allocation of resources. For segment evaluation by the chief operating decision maker, segment operating income is defined as gross profit less SG&A expenses. Segment operating income excludes special charges, net and asset impairment charges. Inter-segment revenues are recorded at cost plus a markup for administrative costs. Corporate expenses are fully allocated to each operating segment. Our operations are managed through five reportable segments: North America Adhesives, Construction Products, EIMEA, Latin America Adhesives and Asia Pacific. Prior periods have been restated for the removal of the Latin America Paints operating segment which is now considered discontinued operations. Corporate expenses, which are fully allocated to each operating segment, have been reallocated to the remaining reportable operating segments.

Table of Contents

The tables below provide certain information regarding the net revenue and segment operating income of each of our operating segments.

Net Revenue by Segment:

(\$ in millions)	2012		2011		2010	
	Net Revenue	% of Total	Net Revenue	% of Total	Net Revenue	% of Total
North America Adhesives	\$ 683.0	36%	\$ 489.9	34%	\$ 445.1	35%
Construction Products	147.1	8%	134.6	9%	122.2	10%
EIMEA	672.4	36%	473.8	33%	404.8	32%
Latin America Adhesives	155.6	8%	147.1	10%	129.8	11%

Asia Pacific	7.4	5%	7.8	7%	5.3	6%
Total	\$ 162.5	100%	\$ 116.9	100%	\$ 94.6	100%

The following table provides a reconciliation of segment operating income to income from continuing operations before income taxes and income from equity method investments, as reported on the Consolidated Statements of Income.

(\$ in millions)	2012	2011	2010
Segment operating income	\$ 162.5	\$ 116.9	\$ 94.6
Special charges, net	(52.5)	(7.5)	
Asset impairment charges	(1.5)	(0.3)	(8.8)
Other income, net	0.8	4.1	1.2
Interest expense	(19.8)	(10.8)	(10.4)
Income from continuing operations before income taxes and income from equity method investments	\$ 89.5	\$ 102.4	\$ 76.6

North America Adhesives

Edgar Filing: FULLER H B CO - Form 10-K

(\$ in millions)	2012	2011	2010	2012 vs 2011	2011 vs 2010
Net revenue	\$ 683.0	\$ 489.9	\$ 445.1	39.4%	10.1%
Segment operating income	\$ 99.2	\$ 73.5	\$ 68.3	34.9%	7.7%
Segment profit margin %	14.5%	15.0%	15.3%		

Table of Contents

The following tables provide details of North America Adhesives net revenue variances:

	2012 vs 2011	2011 vs 2010
Organic growth	3.8%	9.6%
Currency	(0.1)%	0.5%
Acquisitions	35.7%	
Total	39.4%	10.1%

Net revenue increased 39.4 percent in 2012 compared to 2011. The increase in organic sales growth was attributable to a 7.6 percent increase in pricing offset by a 3.8 percent decrease in sales volume compared to last year. Sales volume was negatively impacted by approximately 2.0 percent in 2012 compared to last year due to the extra week in 2011. The acquired business added \$175.1 million to net revenue. The increase in pricing reflects the impact of price increases implemented to offset raw material cost inflation. Overall, we believe we maintained our market share as end market demand for the markets we serve was weak in 2012. Segment operating income increased 34.9 percent compared to 2011, but segment profit margin decreased by 50 basis points. Raw material cost as a percentage of net revenue increased 150 basis points as the inclusion of the acquired business that generates lower margins relative to the legacy business more than offset the benefit of higher pricing on this ratio. Conversely, the lower cost structure of the acquired business was the primary driver of the 60 basis point reduction in SG&A cost as a percentage of net revenue.

Net revenue increased 10.1 percent in 2011 compared to 2010. Organic sales growth of 9.6 percent was driven by increased average selling prices offset by lower sales volume compared to last year. The extra week added approximately 2.0 percent to the 2011 net revenue as compared to 2010. Raw material costs continued to increase as the global demand for feedstocks which are the basis of many of our raw materials, continued to increase. This resulted in a significant increase in our raw material costs in 2011. Despite implementing selling price increases and reducing manufacturing expenses, we had not been able to completely offset the rising raw material costs. As a result, gross margin decreased slightly in 2011 compared to 2010. SG&A expenses increased in 2011 as compared to 2010 but at a lower percentage rate than the increase in net revenue. Segment operating income increased 7.7 percent in 2011 compared to 2010 as a result of net revenue growth and the control of manufacturing and SG&A expenses. Segment operating income as a percent of net revenue was 15.0 percent in 2011 compared to 15.3 percent in 2010.

Construction Products

(\$ in millions)	2012	2011	2010	2012 vs 2011	2011 vs 2010
Net revenue	\$ 147.1	\$ 134.6	\$ 122.2	9.3%	10.1%
Segment operating income	\$ 8.3	\$ 3.0	\$ 2.1	178.6%	44.4%
Segment profit margin %	5.7%	2.2%	1.7%		

The following tables provide details of Construction Products net revenue variances:

	2012 vs 2011	2011 vs 2010
Organic growth	9.3%	10.1%

Edgar Filing: FULLER H B CO - Form 10-K

Net revenue increased 9.3 percent in 2012 compared to 2011 driven by sales growth in the retail and distribution channels. Organic sales growth was driven by a 7.2 percent increase in sales volume combined with a 2.1 percent increase in average selling prices. Sales volume was negatively impacted by approximately 2.0 percent in 2012 compared to last year due to the extra week in 2011. Segment operating income increased 178.6 percent compared to 2011 and segment profit margin increased by 350 basis points. Raw material cost as a percentage of net revenue increased 40 basis points primarily due to lower margins associated with the growth in the retail and distribution channels. Higher sales volume and the control of manufacturing expenses improved gross profit

Table of Contents

margin by 80 basis points. SG&A expenses increased in 2012 as compared to 2011 but at a significantly lower rate than net revenue resulting in a 260 basis point reduction in SG&A as a percentage of net revenue.

Net revenue increased 10.1 percent in 2011 compared to 2010 due to sales increases in the retail and distribution channels. Higher sales volume and to a lesser extent higher average selling prices drove the increase in net revenue compared to the prior year. The extra week added approximately 2.0 percent to the 2011 net revenue as compared to 2010. Selling price increases were not enough to completely offset the increases in raw material costs and as a result our gross profit margins declined slightly in 2011 compared to 2010. SG&A expenses increased in 2011 as compared to 2010 but at a lower percentage rate than the increase in net revenue. Net revenue growth was the primary driver of the 44.4 percent increase in segment operating income in 2011 compared to 2010. Segment operating income as a percent of net revenue was 2.2 percent in 2011 compared to 1.7 percent in 2010.

EIMEA

(\$ in millions)	2012	2011	2010	2012 vs 2011	2011 vs 2010
Net revenue	\$ 672.4	\$ 473.8	\$ 404.8	41.9%	17.0%
Segment operating income	\$ 34.4	\$ 24.6	\$ 12.0	40.2%	105.3%
Segment profit margin %	5.1%	5.2%	3.0%		

The following table provides details of the EIMEA net revenue variances:

	2012 vs 2011	2011 vs 2010
Organic growth	5.4%	11.7%
Currency	(8.7)%	5.3%
Acquisitions	45.2%	
Total	41.9%	17.0%

Net revenue increased 41.9 percent in 2012 compared to 2011. Organic sales growth was attributable to a 4.1 percent increase in pricing combined with a 1.3 percent increase in sales volume compared to last year. Sales volume was negatively impacted by approximately 2.0 percent in 2012 compared to last year due to the extra week in 2011. The weaker Euro compared to the U.S. dollar had a negative 8.7 percent impact on net revenue. The acquired business added \$214.4 million to net revenue. The increase in pricing reflects the impact of price increases implemented to offset raw material cost inflation. Significant volume growth was generated in the emerging markets of the operating segment, especially Egypt, India and Turkey, however, this growth was mitigated by lower sales volume in core Europe reflecting the generally soft end market conditions in this region. Segment operating income increased 40.2 percent compared to 2011 while segment profit margin was flat. Raw material cost as a percentage of net revenue increased 80 basis points primarily due to the inclusion of the acquired business that generates lower margins relative to the legacy business. Conversely, the lower cost structure of the acquired business is the primary driver of the 80 basis point reduction in SG&A cost as a percentage of net revenue.

Net revenue increased 17.0 percent in 2011 compared to 2010. Both higher average selling prices and sales volume contributed to the 11.7 percent increase in organic sales growth. The extra week added approximately 2.0 percent to the 2011 net revenue as compared to 2010. The stronger Euro in 2011 as compared to 2010 had a favorable 5.3 percent impact on net revenue. Gross profit margin increased slightly in 2011 compared to 2010 as higher average selling prices offset increased raw material costs and lower margin polymer and windows product lines were eliminated. SG&A expenses increased in 2011 as compared to 2010 but at a lower percentage than the increase in net revenue. In 2010

Edgar Filing: FULLER H B CO - Form 10-K

segment operating income included a \$2.6 million charge related to the exit of the polysulfide-based insulating glass product line and a \$1.8 million charge related to a product liability claim. Net revenue growth and the non-recurring charges included in 2010 were the primary drivers of the 105.3 percent

Table of Contents

increased segment operating income in 2011 compared to 2010. The increase in gross profit margin and the lower rate of growth in SG&A expenses also contributed to the increase. Segment operating income as a percent of net revenue was 5.2 percent in 2011 compared to 3.0 percent in 2010.

Latin America Adhesives

(\$ in millions)	2012	2011	2010	2012 vs 2011	2011 vs 2010
Net revenue	\$ 155.6	\$ 147.1	\$ 129.8	5.8%	13.3%
Segment operating income	13.2	8.0	6.9	65.2%	15.2%
Segment profit margin %	8.5%	5.4%	5.3%		

The following table provides details of Latin America Adhesives net revenue variances:

	2012 vs 2011	2011 vs 2010
Organic growth	4.1%	13.3%
Acquisitions	1.7%	
Total	5.8%	13.3%

Net revenue increased 5.8 percent in 2012 compared to 2011. The organic sales growth was fully attributable to a 4.1 percent increase in average selling prices compared to last year. Sales volume was negatively impacted by approximately 2.0 percent in 2012 compared to last year due to the extra week in 2011. The acquired business added \$2.5 million to net revenue. Segment operating income increased 65.2 percent compared to 2011 and segment profit margin increased by 310 basis points. Raw material cost as a percentage of net revenue decreased 290 basis points due to the combination of product pricing actions and lower raw material costs. Raw material costs in this operating segment are more favorable relative to other operating segments as this segment uses a higher proportion of natural sourced resins compared to hydrocarbon based resins used in other segments. SG&A expenses increased in 2012 as compared to 2011 but at a lower rate than net revenue resulting in a 90 basis point reduction in SG&A as a percentage of net revenue.

Net revenue increased 13.3 percent in 2011 compared to 2010. The net revenue growth was driven by increased average selling prices and better economic conditions in Latin America. The extra week added approximately 2.0 percent to the 2011 net revenue as compared to 2010. The gross profit margin decreased in 2011 compared to 2010 due to the significant increase in raw material costs. Pricing actions taken in 2011 helped offset the increasing raw material costs. SG&A expenses increased in 2011 compared to 2010 at a slower pace than the increase in net revenue. Net revenue growth was the primary driver of the 15.2 percent increase in segment operating income in 2011 compared to 2010. Segment operating income as a percent of net revenue was 5.4 percent in 2011 compared to 5.3 percent in 2010.

Asia Pacific

(\$ in millions)	2012	2011	2010	2012 vs 2011	2011 vs 2010
Net revenue	\$ 228.1	\$ 198.7	\$ 154.9	14.8%	28.3%
Segment operating income	\$ 7.4	\$ 7.8	\$ 5.3	(6.5)%	47.1%
Segment profit margin %	3.2%	4.0%	3.5%		

Table of Contents

The following table provides details of Asia Pacific net revenue variances:

	2012 vs 2011	2011 vs 2010
Organic growth	(1.3)%	12.5%
Currency	0.3%	8.6%
Acquisitions	15.8%	7.2%
Total	14.8%	28.3%

Net revenue increased 14.8 percent in 2012 compared to 2011. Lower organic sales were the result of a 3.2 percent decrease in sales volume partially offset by a 1.9 percent increase in pricing compared to last year. Sales volume was negatively impacted by approximately 2.0 percent in 2012 compared to last year due to the extra week in 2011. The acquired business added \$31.4 million to net revenue. Sales volume declined in Australia and Southeast Asia compared to 2011 while China continues to post volume growth, but the growth rate has slowed as end market conditions softened in 2012. In Australia, we have maintained our market share while end market demand in these markets has been weak. In Southeast Asia, our sales volume has declined due to generally less favorable end market conditions as well as the loss of some market share as we work to strategically shift our business toward higher value products. Segment operating income decreased by 6.5 percent compared to 2011 and segment profit margin declined by 80 basis points. Raw material cost as a percentage of net revenue increased 120 basis points as the inclusion of the acquired business that generates lower margins relative to the legacy business more than offset the impact of price increases and lower raw material costs on this ratio. Conversely, the lower cost structure of the acquired business is the primary driver of the 30 basis point reduction in SG&A cost as a percentage of net revenue.

Net revenue increased 28.3 percent in 2011 compared to 2010. The net revenue growth was the result of the expansion and investments we have been making in this operating segment. Both average selling prices and sales volume contributed to the 12.5 percent increase in organic sales growth. The extra week added approximately 2.0 percent to the 2011 net revenue as compared to 2010. Our acquisition of Revertex Finewaters in Malaysia added 7.2 percent to the net revenue growth for the year. Positive currency effects contributed 8.6 percent to the net revenue growth in 2011. The currency effect was driven largely by the strengthening of the Australian dollar as compared to the U.S. dollar. SG&A expenses were higher in 2011 compared to 2010 due to the additional investments made in sales, marketing and technical personnel to support the business growth and a full year results of Revertex Finewaters. Segment operating income increased 47.1 percent in 2011 compared to 2010 primarily due to the increase in net revenue. Segment operating income as a percent of net revenue was 4.0 percent in 2011 as compared to 3.5 percent in 2010.

Financial Condition, Liquidity and Capital Resources

Total cash and cash equivalents as of December 1, 2012 were \$200.4 million as compared to \$154.6 million as of December 3, 2011. Total long and short-term debt was \$520.2 million as of December 1, 2012 and \$232.3 million as of December 3, 2011.

We believe that cash flows from operating activities will be adequate to meet our ongoing liquidity and capital expenditure needs. In addition, we believe we have the ability to obtain both short-term and long-term debt to meet our financing needs for the foreseeable future. Cash available in the United States has historically been sufficient and we expect it will continue to be sufficient to fund U.S. operations and U.S. capital spending and U.S. pension and other post retirement benefit contributions in addition to funding U.S. acquisitions, dividend payments, debt service and share repurchases as needed. In the third quarter of 2012, we prepaid \$80.0 million of long-term debt with the proceeds from the sale of our Central America Paints business, to reduce outstanding debt. For those international earnings considered to be reinvested indefinitely, we currently have no intention to, and plans do not indicate a need to, repatriate these funds for U.S. operations.

Table of Contents

Our credit agreements include restrictive covenants that, if not met, could lead to a renegotiation of our credit lines and a significant increase in our cost of financing. At December 1, 2012, we were in compliance with all covenants of our contractual obligations.

Covenant	Debt Instrument	Measurement	Result as of December 1, 2012
TTM EBITDA/TTM Interest Expense	All Debt Instruments	Not less than 2.5	12.5
Total Indebtedness/TTM EBITDA	All Debt Instruments	Not greater than 3.5	2.1

TTM = trailing 12 months

EBITDA for covenant purposes is defined as consolidated net income, plus (i) interest expense, (ii) taxes, (iii) depreciation and amortization, (iv) non-cash impairment losses, (v) extraordinary non-cash losses incurred other than in the ordinary course of business, (vi) nonrecurring extraordinary non-cash restructuring charges, (vii) cash expenses for advisory services and for arranging financing for the acquired business (including the non-cash write-off of deferred financing costs and any loss or expense on foreign exchange transactions intended to hedge the purchase price for the acquired business) with cash expenses not to exceed \$25.0 million, and (viii) cash expenses incurred during fiscal years 2011 through 2014 in connection with facilities consolidation, restructuring and integration, discontinuance of operations, work force reduction, sale or abandonment of assets other than inventory, and professional and other fees incurred in connection with the acquired business or the restructuring of the Company's Europe, India, Middle East and Africa operations, not to exceed \$85.0 million in the aggregate, and (x) not to exceed \$65.0 million during fiscal year 2012 and (y) not to exceed \$65.0 million during fiscal years 2013 and 2014 combined, minus extraordinary non-cash gains incurred other than in the ordinary course of business. For the Total Indebtedness / TTM EBITDA ratio, TTM EBITDA is adjusted for the pro forma results from Material Acquisitions and Material Divestitures as if the acquisition or divestiture occurred at the beginning of the calculation period. Additional detail is provided in the Form 8-K dated March 5, 2012.

We believe we have the ability to meet all of our contractual obligations and commitments in fiscal 2013.

Net Financial Assets

(\$ in millions)	2012	2011
Financial Assets:		
Cash and cash equivalents	\$ 200.4	\$ 154.6
Debt:		
Notes payable	22.6	28.3
Long-term debt	497.6	204.0
 Total debt (including current maturities)	 520.2	 232.3
 Net financial debt	 \$ 319.8	 \$ 77.7

Of the \$200.4 million in cash and cash equivalents as of December 1, 2012, \$184.5 million was held outside the U.S. Of the \$184.5 million of cash held outside the U.S., earnings on \$182.2 million are permanently reinvested outside of the U.S. It is not practical for us to determine the U.S. tax implications of the repatriation of these funds.

Edgar Filing: FULLER H B CO - Form 10-K

There are no contractual or regulatory restrictions on the ability of consolidated and unconsolidated subsidiaries to transfer funds in the form of cash dividends, loans or advances to us, except for: 1) a credit facility limitation restricting investments, loans, advances or capital contributions from the U.S. parent corporation, the Irish financing subsidiary, and the Construction Products subsidiary in excess of \$75.0 million, 2) a credit facility limitation that provides total investments, loans, advances or guarantees not otherwise permitted in the credit

Table of Contents

agreement for all subsidiaries shall not exceed \$75.0 million in the aggregate and 3) typical statutory restrictions, which prohibit distributions in excess of net capital or similar tests. The Forbo acquisition and any investments, loans, and advances established to consummate the Forbo acquisition are excluded from the credit facility limitations described above. Additionally, we have taken the income tax position that the majority of our cash in non-U.S. locations is permanently reinvested.

We rely on operating cash flow, short-term borrowings and long-term debt to provide for the working capital needs of our operations. We believe that we have the ability to obtain both short-term and long-term debt to meet our financing needs for the foreseeable future.

Debt Outstanding and Debt Capacity

Notes Payable: Notes payable were \$22.6 million at December 1, 2012. This amount mainly represented various short-term borrowings that were not part of committed lines. The weighted-average interest rates on these short-term borrowings were 11.3 percent for both 2012 and 2011.

Long-Term Debt: Long-term debt consisted of senior notes and term loans. The Series A and Series B senior notes bear a fixed interest rate of 5.13 percent and mature in fiscal year 2017. The Series C and Series D senior notes bear a fixed interest rate of 5.61 percent and mature in fiscal year 2020. The Series E senior notes bear a fixed interest rate of 4.12 percent and mature in fiscal year 2022. We are subject to prepayment penalties on our senior notes. As of December 1, 2012, make-whole premiums were estimated to be, if the entire debt were paid off, \$86.3 million. We currently have no intention to prepay any senior notes. The term loan A bears a floating interest rate of the London Interbank Offered Rate (LIBOR) plus a spread of 62.5 basis points and matures in 2013. The term loan B bears a floating interest rate of LIBOR plus 150 basis points and matures in 2017. There are no prepayment penalties on the term loans. See the discussion below regarding borrowings on our lines of credit.

We executed interest rate swap agreements for the purpose of obtaining a floating rate of interest on \$75.0 million of the \$150.0 million senior notes. We have designated the \$75.0 million of senior note debt as the hedged item in a fair value hedge. As required by the accounting standards, we recorded an asset for the fair value of the interest rate swaps (hedging instruments) totaling \$9.5 million and recognized a liability of \$8.9 million for change in the fair value of the senior notes attributable to the change in the risk being hedged. This calculation resulted in \$158.9 million being recorded in long-term debt related to these senior notes as of December 1, 2012. For further information related to long-term debt see Note 8 to Consolidated Financial Statements.

Lines of Credit: We have a revolving credit agreement with a consortium of financial institutions at December 1, 2012. This credit agreement creates an unsecured multi-currency revolving credit facility that we can draw upon for general corporate purposes up to a maximum of \$200.0 million. Interest is payable at LIBOR plus 1.275 percent. A facility fee of 0.225 percent is payable quarterly. The interest rate and the facility fee are based on a rating grid. The credit facility expires on March 5, 2017.

Goodwill and Other Intangible Assets

As of December 1, 2012, goodwill totaled \$254.3 million (14 percent of total assets) and other intangible assets, net of accumulated amortization, totaled \$233.4 million (13 percent of total assets).

Table of Contents

The components of goodwill and other identifiable intangible assets, net of amortization, by segment at December 1, 2012 are as follows:

(\$ in millions)	North America Adhesives	Construction Products	EIMEA	Latin America Adhesives	Asia Pacific	Total
Goodwill	\$ 58.7	\$ 13.3	\$ 147.3	\$ 7.5	\$ 27.5	\$ 254.3
Purchased technology & patents	20.2		13.0		4.1	37.3
Customer relationships	17.9	87.0	52.3	0.3	6.3	163.8
Other finite-lived intangible assets ¹	9.9	7.8	6.7	1.7	5.6	31.7
Indefinite-lived intangible assets ²			0.6			0.6

1 Other finite-lived intangible assets are related to operating segment trademarks.

2 Indefinite-lived intangible assets are related to EIMEA operating segment trademarks.

Selected Metrics of Liquidity and Capital Resources

Key metrics we monitor are net working capital as a percent of annualized net revenue, trade account receivable days sales outstanding (DSO), inventory days on hand, free cash flow and debt capitalization ratio.

	December 1, 2012	December 3, 2011
Net working capital as a percentage of annualized net revenue ¹	17.8%	14.3%
Accounts receivable DSO ²	56 Days	53 Days
Inventory days on hand ³	53 Days	41 Days
Free cash flow ⁴	\$56.3 million	\$40.7 million
Debt capitalization ratio ⁵	40.1%	24.8%

1 Current quarter net working capital (trade receivables, net of allowance for doubtful accounts plus inventory minus trade payables) divided by annualized net revenue (fourth quarter, 2011 adjusted for extra week, multiplied by four).

2 Trade receivables net of allowance for doubtful accounts multiplied by 56 (8 weeks) for 2012 and 63 (9 weeks) for 2011 and divided by the net revenue for the last 2 months of the quarter.

3 Total inventory multiplied by 56 for 2012 and 63 for 2011 and divided by cost of sales (excluding delivery costs) for the last 2 months of the quarter.

4 Net cash provided by operations less purchased property, plant and equipment and dividends paid.

5 Total debt divided by (total debt plus total stockholders' equity).

Another key metric is the return on invested capital, or ROIC. The calculation is represented by total return divided by total invested capital.

Edgar Filing: FULLER H B CO - Form 10-K

Total return is defined as: gross profit less SG&A expenses, less taxes at the effective tax rate plus income from equity method investments. Total return is calculated using trailing 12 month information.

Total invested capital is defined as the sum of notes payable, current maturities of long-term debt, long-term debt, redeemable non-controlling interest and total equity.

ROIC was introduced because we believe it provides a true measure of return on capital invested. We believe it is an effective way to internally measure performance and it is focused on the long term. The ROIC calculated at

Table of Contents

December 1, 2012 was 9.5 percent and at December 3, 2011 was 9.6 percent. The following table shows the ROIC calculation as of December 1, 2012 and December 3, 2011 based on the definition above:

(\$ in millions)	Trailing 12 months as of December 1, 2012	Trailing 12 months as of December 3, 2011
Gross profit	\$ 517.3	\$ 403.8
Selling, general and administrative expenses	(354.7)	(286.9)
Income taxes at effective rate	(48.2)	(35.2)
Income from equity method investments	9.2	9.0
Total return	\$ 123.6	\$ 90.7
Total invested capital	1,302.9	941.8
Return on invested capital	9.5%	9.6%

Summary of Cash Flows**Cash Flows from Operating Activities from Continuing Operations:**

(\$ in millions)	2012	2011	2010
Net cash provided by operating activities	\$ 108.6	\$ 88.1	\$ 72.2

Net income including non-controlling interest was \$125.9 million in 2012, \$89.0 million in 2011 and \$70.4 million in 2010. Depreciation and amortization expense totaled \$57.4 million in 2012 compared to \$39.1 million in 2011 and \$38.8 million in 2010. The higher expense in 2012 was directly related to the acquired business.

Changes in net working capital (trade receivables, inventory and trade payables) accounted for a use of cash of \$39.2 million, \$20.8 million and \$26.9 million in 2012, 2011 and 2010, respectively. Following is an assessment of each of the net working capital components:

Trade Receivables, net Changes in trade receivables resulted in a \$17.3 million use of cash in 2012 as compared to \$18.4 million use of cash in 2011 and a \$13.8 million use of cash in 2010. The DSO was 56 days at December 1, 2012, 53 days at December 3, 2011 and 55 days at November 27, 2010.

Inventory Changes in inventory resulted in a \$17.1 million use of cash in 2012 as compared to a use of cash of \$11.0 million in 2011 and a use of cash of \$4.1 million in 2010. Inventory days on hand were 53 days at the end of 2012 as compared to 41 days and 44 days at the end of 2011 and 2010, respectively. The higher use of cash and higher days on hand in 2012, compared to previous years, are both related to the increase in inventory after the downward management of inventory in the fourth quarter of 2011 and 2010 whereas in 2012 inventory levels have increased in order to support the manufacturing transitions that are underway as part of the Business Integration Project.

Trade Payables Changes in trade payables resulted in a use of cash of \$4.8 million in 2012 and a source of cash of \$8.7 million in 2011 and a use of cash of \$9.1 million in 2010. The use of cash of \$4.8 million in 2012 compared to the source of cash of \$8.7 million in 2011 was related to the increases in inventory in 2012 after the downward management in the fourth quarter of 2011.

Edgar Filing: FULLER H B CO - Form 10-K

Income from discontinued operations, net of tax reduced cash flows from operating activities by \$57.6 million, \$8.8 million and \$6.1 million in 2012, 2011 and 2010, respectively. The \$57.6 million in 2012 includes an after-tax gain on the sale of our Central America Paints business of \$51.1 million. Contributions to our pension and other postretirement benefit plans were \$9.8 million, \$11.9 million and \$15.1 million in 2012, 2011 and 2010, respectively. Changes in deferred income taxes resulted in a use of cash of \$16.8 million in 2012 compared to a source of cash of \$5.7 million in 2011 and a source of cash of \$9.5 million in 2010. The 2012 change compared to 2011 was related to the accrual of Business Integration Project expenses. Income taxes payable resulted in a source of cash of \$15.2 million, \$6.5 million and \$2.1 million in 2012, 2011 and 2010, respectively. The 2012 change compared to 2011 was related to the timing of U.S. estimated tax payments. Accrued compensation was a

Table of Contents

source of cash of \$21.0 million in 2012, a use of cash of \$3.4 million in 2011 and a source of cash of \$2.8 million in 2010 and other liabilities was a source of cash of \$3.5 million in 2012 and a use of cash of \$2.9 million and 10.5 million in 2011 and 2010, respectively. The source of cash in 2012 for accrued compensation and other liabilities were related to the accrual of severance and other related costs as part of our Business Integration Project that have not been paid at the end of 2012.

Cash Flows from Investing Activities from Continuing Operations:

(\$ in millions)	2012	2011	2010
Net cash used in investing activities	\$ (446.8)	\$ (36.3)	\$ (57.0)

Purchases of property plant and equipment were \$35.9 million in 2012 as compared to \$32.8 million in 2011 and \$31.7 million in 2010. We do not anticipate significant repair and maintenance activities on existing property, plant and equipment as a result of current or past capital spending policies.

We acquired the global industrial adhesives business of Forbo Holding AG for \$404.7 million and the outstanding shares of Engent, Inc. for \$7.9 million in 2012. In 2011, we acquired the principal assets and certain liabilities of Liquamelt Corp. for \$6.0 million. In 2010 we acquired the outstanding shares of Revertex Finewaters for \$26.8 million and we paid the first year earn out of Nordic Adhesive Technology of \$0.8 million. See Note 2 to the Consolidated Financial Statements for further information on acquisitions.

Cash Flows from Financing Activities from Continuing Operations:

(\$ in millions)	2012	2011	2010
Net cash provided by (used in) financing activities	\$ 273.9	\$ (42.8)	\$ 24.4

Proceeds from long-term debt in 2012 were \$584.2 million of which \$400.0 million was used for financing the acquisition. Included in the 2012 proceeds of long-term debt was our note purchase agreement under which we issued \$250.0 million in aggregate principal amount of senior unsecured notes and a draw down of our \$150.0 million term loan. Repayment of long-term debt in 2012 was \$292.3 million which included prepayment of \$80.0 million of long-term debt with proceeds from the sale of our Central America Paints business. Long-term debt proceeds and payments netted to a source of cash of \$192.9 million in 2012. Long-term debt proceeds of \$218.0 million and payments of \$240.5 million, netted to a use of cash of \$22.5 million in 2011. In 2010, long-term debt proceeds of \$345.0 million and payments of \$329.6 million netted to a source of cash of \$15.4 million. Included in the 2010 proceeds of long-term debt is our note purchase agreement under which we issued \$150.0 million in aggregate principal amount of senior unsecured notes.

Cash generated from the exercise of stock options was \$7.4 million in 2012, \$7.7 million in 2011 and \$4.0 million in 2010. The \$7.4 million in 2012 was driven by higher average stock price. The higher amount in 2011 was primarily due to exercises by our former CEO as his departure required the exercise of certain stock option awards. Repurchases of common stock were \$4.3 million in 2012 compared to \$8.5 million in 2011 and \$0.4 million in 2010. We repurchased \$3.0 million in 2012 and \$7.5 million in 2011 from our 2010 share repurchase program. In 2011 we repurchased the 20 percent non-controlling interest that Sekisui Chemical held in our China entities for \$8.6 million.

Cash Flows from Discontinued Operations:

Edgar Filing: FULLER H B CO - Form 10-K

(\$ in millions)	2012	2011	2010
Cash provided by (used in) operating activities of discontinued operations	\$ (13.9)	\$ 13.5	\$ (1.0)
Cash provided by (used in) investing activities of discontinued operations, including proceeds from sale of business	120.2	(1.5)	(0.3)
Net cash provided by (used in) discontinued operations	\$ 106.3	\$ 12.0	\$ (1.2)

Table of Contents

Cash flows from discontinued operations includes the proceeds from the sale of \$118.5 million in 2012 and cash generated from operations and investing activities of the Central America Paints business.

Contractual Obligations

Due dates and amounts of contractual obligations follow:

(\$ in millions)	Total	Payments Due by Period			
		Less than 1 year	1-3 years	3-5 years	More than 5 years
Long-term debt	\$ 497.6	\$ 22.5	\$	\$ 121.3	\$ 353.8
Interest payable on long-term debt ¹	152.4	18.7	37.9	37.1	58.7
Operating leases	17.3	7.6	7.1	1.8	0.8
Pension contributions ²	7.8	7.8			
Purchase obligation contracts ³	4.9	3.6	1.3		
Total contractual obligations	\$ 680.0	\$ 60.2	\$ 46.3	\$ 160.2	\$ 413.3

¹ Some of our interest obligations on long-term debt are variable based on LIBOR. Interest payable for the variable portion is estimated based on a forward LIBOR curve.

² Pension contributions are only included for fiscal 2013. We have not determined our pension funding obligations beyond 2013 and thus, any potential future contributions have been excluded from the table.

³ Represents a contract to provide us with information technology services. See Note 13 to Consolidated Financial Statements for further information.

We expect to make cash outlays in the future related to uncertain tax positions. However, due to the uncertainty of the timing of future cash flows, we are unable to make reasonably reliable estimates of the period of cash settlement, if any, with the respective taxing authorities. Accordingly, gross unrecognized tax benefits of \$4.9 million as of December 1, 2012, have been excluded from the contractual obligations table above. For further information related to unrecognized tax benefits see Note 9 to Consolidated Financial Statements.

We expect 2013 capital expenditures to be approximately \$110.0 million.

Off-Balance Sheet Arrangements

There are no relationships with any unconsolidated, special-purpose entities or financial partnerships established for the purpose of facilitating off-balance sheet financial arrangements.

Recently Issued Accounting Pronouncements

See Note 1 to the Consolidated Financial Statements for information concerning new accounting standards and the impact of the implementation of these standards on our financial statements.

Forward-Looking Statements and Risk Factors

The Private Securities Litigation Reform Act of 1995 provides a safe harbor for forward-looking statements. This Annual Report on Form 10-K contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. These statements may be identified by the use of words like plan, expect, aim, believe, project, anticipate, intend, estimate, will, should, could (including variations thereof) and other expressions that indicate future events and trends. These plans and expectations are based upon certain underlying assumptions, including those mentioned with the specific statements. Such assumptions are in turn based upon internal estimates and analyses of current market conditions and trends, our

Table of Contents

plans and strategies, economic conditions and other factors. These plans and expectations and the assumptions underlying them are necessarily subject to risks and uncertainties inherent in projecting future conditions and results. Actual results could differ materially from expectations expressed in the forward-looking statements if one or more of the underlying assumptions and expectations proves to be inaccurate or is unrealized. In addition to the factors described in this report, Item 1A. Risk Factors identifies some of the important factors that could cause our actual results to differ materially from those in any such forward-looking statements. In order to comply with the terms of the safe harbor, we have identified these important factors which could affect our financial performance and could cause our actual results for future periods to differ materially from the anticipated results or other expectations expressed in the forward-looking statements. These factors should be considered, together with any similar risk factors or other cautionary language that may be made elsewhere in this Annual Report on Form 10-K.

The list of important factors in Item 1A. Risk Factors does not necessarily present the risk factors in order of importance. This disclosure, including that under Forward-Looking Statements and Risk Factors, and other forward-looking statements and related disclosures made by us in this report and elsewhere from time to time, represents our best judgment as of the date the information is given. We do not undertake responsibility for updating any of such information, whether as a result of new information, future events, or otherwise, except as required by law. Investors are advised, however, to consult any further public company disclosures (such as in filings with the SEC or in our press releases) on related subjects.

Item 7A. Quantitative and Qualitative Disclosures about Market Risk

Market Risk: We are exposed to various market risks, including changes in interest rates, foreign currency rates and prices of raw materials. Market risk is the potential loss arising from adverse changes in market rates and prices, such as interest rates and foreign currency exchange rates.

Our financial performance has been, and may continue to be, negatively affected by unfavorable economic conditions. Continued or further recessionary economic conditions may have an adverse impact on our sales volumes, pricing levels and profitability. As domestic and international economic conditions change, trends in discretionary consumer spending also become unpredictable and subject to reductions due to uncertainties about the future. A general reduction in consumer discretionary spending due to a recession in the domestic and international economies, or uncertainties regarding future economic prospects, could have a material adverse effect on our results of operations.

Interest Rate Risk: Exposure to changes in interest rates results primarily from borrowing activities used to fund operations. Committed floating rate credit facilities are used to fund a portion of operations. We believe that probable near-term changes in interest rates would not materially affect financial condition, results of operations or cash flows. The annual impact on interest expense of a one-percentage point interest rate change on the outstanding balance of our variable rate debt as of December 1, 2012 would be approximately \$1.3 million or \$0.03 per diluted share.

Foreign Exchange Risk: As a result of being a global enterprise, there is exposure to market risks from changes in foreign currency exchange rates, which may adversely affect operating results and financial condition. Approximately 57 percent of net revenue was generated outside of the United States in 2012. Principal foreign currency exposures relate to the Euro, British pound sterling, Canadian dollar, Chinese renminbi, Japanese yen, Australian dollar, Swiss franc, Argentine peso, Brazilian real, Colombian peso, Mexican peso, Turkish lira, Egyptian pound, Indian rupee, and Malaysian ringgit.

Our objective is to balance, where possible, local currency denominated assets to local currency denominated liabilities to have a natural hedge and minimize foreign exchange impacts. We enter into cross border transactions through importing and exporting goods to and from different countries and locations. These transactions generate foreign exchange risk as they create assets, liabilities and cash flows in currencies other

Table of Contents

than the local currency. This also applies to services provided and other cross border agreements among subsidiaries.

We take steps to minimize risks from foreign currency exchange rate fluctuations through normal operating and financing activities and, when deemed appropriate, through the use of derivative instruments. We do not enter into any speculative positions with regard to derivative instruments.

From a sensitivity analysis viewpoint, based on 2012 financial results and foreign currency balance sheet positions as of December 1, 2012, a hypothetical overall 10 percent change in the U.S. dollar would have resulted in a change in net income of approximately \$4.9 million or \$0.10 per diluted share.

Raw Materials: The principal raw materials used to manufacture products include resins, polymers, synthetic rubbers, vinyl acetate monomer and plasticizers. We generally avoid sole source supplier arrangements for raw materials. While alternate supplies of most key raw materials are available, unplanned supplier production outages may lead to strained supply-demand situations for several key raw materials such as ethylene and propylene, several polymers and other petroleum derivatives such as waxes.

The purchase of raw materials is our largest expenditure. Our objective is to purchase raw materials that meet both our quality standards and production needs at the lowest total cost. Most raw materials are purchased on the open market or under contracts that limit the frequency but not the magnitude of price increases. In some cases, however, the risk of raw material price changes is managed by strategic sourcing agreements which limit price increases to increases in supplier feedstock costs, while requiring decreases as feedstock costs decline. The leverage of having substitute raw materials approved for use wherever possible is used to minimize the impact of possible price increases.

Item 8. Financial Statements and Supplementary Data

Report of Independent Registered Public Accounting Firm

The Board of Directors and Stockholders

H.B. Fuller Company:

We have audited the accompanying consolidated balance sheets of H.B. Fuller Company and subsidiaries as of December 1, 2012 and December 3, 2011, and the related consolidated statements of income, total equity, and cash flows for each of the fiscal years in the three-year period ended December 1, 2012. We also have audited H.B. Fuller Company's internal control over financial reporting as of December 1, 2012, based on criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). H.B. Fuller Company's management is responsible for these consolidated financial statements, for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control of Financial Reporting. Our responsibility is to express an opinion on these consolidated financial statements and an opinion on the Company's internal control over financial reporting based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement and whether effective internal control over financial reporting was maintained in all material respects. Our audits of the consolidated financial statements included examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of H.B. Fuller Company and subsidiaries as of December 1, 2012 and December 3, 2011, and the results of their operations and their cash flows for each of the fiscal years in the three-year period ended December 1, 2012, in conformity with U.S. generally accepted accounting principles. Also in our

opinion, H.B. Fuller Company maintained, in all material respects, effective internal control over financial reporting as of

Table of Contents

December 1, 2012, based on criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

H.B. Fuller Company and Subsidiaries

(In thousands, except share and per share amounts)

Note 1: Nature of Business and Summary of Significant Accounting Policies

Nature of Business: H.B. Fuller Company and its subsidiaries formulate, manufacture and market adhesives, sealants and other specialty chemical products globally, with sales operations in 40 countries in North America, Europe, Latin America, the Asia Pacific region, India, the Middle East and Africa. Our business is reported in five operating segments: North America Adhesives, Construction Products, EIMEA (Europe, India, Middle East and Africa), Latin America Adhesives and Asia Pacific. Of the 2012 net revenue, North America Adhesives operating segment accounted for 36 percent, Construction Products 8 percent, EIMEA 36 percent, Latin America Adhesives 8 percent and Asia Pacific 12 percent.

The North America Adhesives, EIMEA, Latin America Adhesives and Asia Pacific operating segments produce and supply industrial and performance adhesives products for applications in various markets, including assembly (appliances, filters, construction, etc.), packaging (food and beverage containers, consumer goods, durable and non-durable goods, etc.), converting (corrugation, tape and label, paper converting, multi-wall bags and sacks, etc.), nonwoven and hygiene (disposable diapers, feminine care, medical garments, tissue and towel, etc.), performance wood (windows, doors, wood flooring, etc.), textile (footwear, sportswear, etc.), flexible packaging, graphic arts and envelope.

The Construction Products operating segment includes products used for tile setting (adhesives, grouts, mortars, sealers, levelers, etc.) and HVAC and insulation applications (duct sealants, weather barriers and fungicidal coatings, block fillers, etc.).

On August 6, 2012 we sold our Central America Paints business for cash proceeds of \$118,459 and recorded a gain of \$66,179 (\$51,060, net of tax). After the sale of our Central America Paints business, we now have five reportable segments: North America Adhesives, Construction Products, EIMEA, Latin America Adhesives and Asia Pacific. Prior periods have been restated for the removal of our Latin America Paints operating segment which is now considered discontinued operations. Corporate expenses, which are fully allocated to each operating segment, have been reallocated to the remaining reportable operating segments.

Principles of Consolidation: The Consolidated Financial Statements include the accounts of H.B. Fuller Company and its wholly-owned and majority-owned subsidiaries. All significant intercompany transactions and accounts have been eliminated. Investments in affiliated companies in which we exercise significant influence, but which we do not control, are accounted for in the Consolidated Financial Statements under the equity method of accounting. As such, consolidated net income includes our equity portion in current earnings of such companies, after elimination of intercompany profits. Investments in which we do not exercise significant influence (generally less than a 20 percent ownership interest) are accounted for under the cost method.

Our 50 percent ownership in Sekisui-Fuller Company, Ltd., our Japan joint venture, is accounted for under the equity method of accounting as we do not exercise control over the company. For fiscal years 2012 and 2011, this equity method investment exceeded the 10 percent threshold but not the 20 percent threshold test for a significant subsidiary as defined in Rule 1-02(w) of Regulation S-X under the Securities Exchange Act of 1934. As such, summarized financial information as of December 1, 2012 and December 3, 2011 for Sekisui-Fuller Company, Ltd. is as follows:

	As of December 1, 2012	As of December 3, 2011
Current assets	\$ 117,597	\$ 117,701
Non-current assets	25,704	28,018
Current liabilities	48,298	53,599
Non-current liabilities	2,653	3,331

Table of Contents

	For the year ended December 1, 2012	For the year ended December 3, 2011
Net revenue	\$ 222,589	\$ 217,427
Gross profit	63,596	64,300
Net income	18,436	18,012

Our fiscal year ends on the Saturday closest to November 30. Fiscal year-end dates were December 1, 2012, December 3, 2011 and November 27, 2010 for 2012, 2011 and 2010, respectively. Every five or six years we have a 53rd week in our fiscal year. 2011 was a 53-week year for us.

Use of Estimates: Preparation of the Consolidated Financial Statements in conformity with U.S. generally accepted accounting principles (U.S. GAAP) requires us to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

Revenue Recognition: For shipments made to customers, title generally passes to the customer when all requirements of the sales arrangement have been completed, which is generally at the time of delivery. Revenue from product sales is recorded when title to the product transfers, no remaining performance obligations exist, the terms of the sale are fixed and collection is probable. Shipping terms include both FOB shipping point and FOB destination. Stated terms in sale agreements also include payment terms and freight terms. Net revenues include shipping revenues as appropriate.

Provisions for sales returns are estimated based on historical experience, and are adjusted for known returns, if material. Customer incentive programs (primarily volume purchase rebates) and arrangements such as cooperative advertising, slotting fees and buy-downs are recorded as a reduction of net revenue in accordance with Financial Accounting Standards Board (FASB) Accounting Standard Codification (ASC) 605-50, Customer Payments and Incentives. Rebates recorded in the Consolidated Statements of Income were \$9,707, \$14,751 and \$18,151 in 2012, 2011 and 2010, respectively.

For certain products, consigned inventory is maintained at customer locations. For these products, revenue is recognized in the period that the inventory is consumed. Sales to distributors also require a distribution agreement or purchase order. As a normal practice, distributors do not have a right of return.

Cost of Sales: Cost of sales includes raw materials, container costs, direct labor, manufacturing overhead, shipping and receiving costs, freight costs, depreciation of manufacturing equipment and other less significant indirect costs related to the production of our products.

Selling, General and Administrative (SG&A) Expenses: SG&A expenses include sales and marketing, research and development, technical and customer service, finance, legal, human resources, general management and similar expenses.

Income Taxes: The income tax provision is computed based on the pre-tax income included in the Consolidated Statements of Income before income from equity method investments. The asset and liability approach is used to recognize deferred tax assets and liabilities for the expected future tax consequences of temporary differences between the carrying amounts and the tax bases of assets and liabilities. Enacted statutory tax rates applicable to future years are applied to differences between the financial statement carrying amounts and the tax basis of existing assets

Edgar Filing: FULLER H B CO - Form 10-K

and liabilities. The effect on deferred taxes of a change in tax rates is recognized in income in the period that includes the enactment date. Valuation allowances reduce deferred tax assets when it is not more-likely-than-not that a tax benefit will be realized. See Note 9 to Consolidated Financial Statements.

Cash Equivalents: Cash equivalents are highly liquid instruments with an original maturity of three months or less.

Table of Contents

Restrictions on Cash: There were no restrictions on cash as of December 1, 2012. There are no contractual or regulatory restrictions on the ability of consolidated and unconsolidated subsidiaries to transfer funds in the form of cash dividends, loans or advances to us, except for typical statutory restrictions which prohibit distributions in excess of net capital or similar tests. However, the majority of our cash in non-U.S. locations is considered permanently reinvested.

Trade Receivable and Allowances: Trade receivables are recorded at the invoiced amount and do not bear interest. Allowances are maintained for doubtful accounts, credits related to pricing or quantities shipped and early payment discounts. The allowance for doubtful accounts includes an estimate of future uncollectible receivables based on the aging of the receivable balance and our collection experience. The allowance also includes specific customer accounts when it is probable that the full amount of the receivable will not be collected. Invoices are written off against the allowance when the invoice is 18 months past terms. See Note 4 to Consolidated Financial Statements for more information.

Inventories: Inventories recorded at cost (not in excess of market value) as determined by the last-in, first-out method (LIFO) represent approximately 32 percent of consolidated inventories. During 2012 there was no liquidation of LIFO inventory layers. During 2011 and 2010 reductions in inventory quantities resulted in liquidations of LIFO inventory layers causing an increase in net pre-tax income of \$273 and \$1,349, respectively. The remaining inventories, which include all non-U.S. operations, are valued at the lower of cost (mainly weighted-average actual cost) or market value.

Investments: Investments with a value of \$9,794 represent the cash surrender value of life insurance contracts on December 1, 2012. These assets are held to primarily support supplemental pension plans and are recorded in other assets in the Consolidated Balance Sheets. The corresponding gain or loss associated with these contracts is reported in earnings each period as a component of Other income (expense), net.

Investments in Equity Securities Carried at Cost: Fair value of cost method investments is assessed according to accounting standards. During 2012, we determined the fair value of one of our cost basis investments was lower than the investment value on our balance sheet based on investor approval of a buy-out offer from the majority shareholder; and, the fair value of another of our cost basis investments was lower than the investment value on our balance sheet based on a recently completed round of additional financing. Since both of these impairments that were considered other than temporary, we recorded non-cash charges associated with these impairments of \$1,517. We did not have any impairment of our cost method investments for the years ended December 3, 2011 or November 27, 2010. The book value of the cost method investments as of December 1, 2012 was \$2,085 and 3,571 as of December 3, 2011.

Property, Plant and Equipment: Property, plant and equipment are carried at cost and depreciated over the useful lives of the assets using the straight-line method. Estimated useful lives range from 20 to 40 years for buildings and improvements, 3 to 20 years for machinery and equipment, and the shorter of the lease or expected life for leasehold improvements. Fully depreciated assets are retained in property and accumulated depreciation accounts until removed from service. Upon disposal, assets and related accumulated depreciation are removed. Upon sale of an asset, the difference between the proceeds and remaining net book value is charged or credited to other income (expense), net on the Consolidated Statements of Income. Expenditures that add value or extend the life of the respective assets are capitalized, while expenditures that are typical recurring repairs and maintenance are expensed as incurred. Interest costs associated with construction and implementation of property, plant and equipment of \$151, \$114 and \$240 were capitalized in 2012, 2011 and 2010, respectively.

Goodwill: We test goodwill for impairment annually during the fourth quarter and whenever events occur or changes in circumstances indicate that impairment may have occurred. Impairment testing is performed for each of our reporting units by comparing the reporting unit's estimated fair value to its carrying amount, including goodwill. We use a discounted cash flow approach to estimate the fair value of our reporting units. Our judgment

Table of Contents

is required in developing the assumptions for the discounted cash flow model. These assumptions include revenue growth rates, profit margin percentages, discount rates, perpetuity growth rates, future capital expenditures and working capital requirements. If the estimated fair value of a reporting unit exceeds its carrying value, goodwill is considered to not be impaired. If the carrying value exceeds estimated fair value, there is an indication of potential impairment, and we calculate an implied fair value of goodwill. The implied fair value is calculated as the difference between the fair value of the reporting unit and the fair value of the individual assets and liabilities of the reporting unit, excluding goodwill. An impairment charge is recorded for any excess of the carrying value over the implied fair value. Based on our 2012 annual assessment, we determined that none of our goodwill was impaired.

Intangible Assets: Intangible assets include patents and other intangible assets acquired from independent parties and are amortized on a straight-line basis with estimated useful lives ranging from 3 to 20 years. The straight-line method of amortization of these assets reflects an appropriate allocation of the costs of the intangible assets to earnings in proportion to the amount of economic benefits obtained in each reporting period.

Impairment of Long-Lived Assets: Our long-lived assets are tested for impairment whenever events or circumstances indicate that a carrying amount of an asset (asset group) may not be recoverable. An impairment loss would be recognized when the carrying amount of an asset (asset group) exceeds the estimated undiscounted future cash flows expected to result from the use of the asset (asset group) and its eventual disposition. The impairment loss to be recorded would be the excess of the asset's carrying value over its fair value. Fair value is generally determined using a discounted cash flow analysis or other valuation technique. Costs related to internally developed intangible assets are expensed as incurred. See Note 6 to Consolidated Financial Statements for additional information.

Foreign Currency Translation: Assets and liabilities of non-U.S. functional currency entities are translated to U.S. dollars at period-end exchange rates, and the resulting gains and losses arising from the translation of those net assets are recorded as a cumulative translation adjustment, a component of accumulated other comprehensive income (loss) in stockholders' equity. Revenues and expenses are translated using average exchange rates during the year. Foreign currency transaction gains and losses are included in other income (expense), net in the Consolidated Statements of Income.

We consider a subsidiary's sales price drivers, currency denomination of sales transactions and inventory purchases to be the primary indicators in determining a foreign subsidiary's functional currency. Our subsidiaries in Latin America and certain European countries have a functional currency different than their local currency. All other foreign subsidiaries, which are located in North America, Europe and Asia, have the same local and functional currency.

Pension and Other Postretirement Benefits: We sponsor defined-benefit pension plans in both the U.S. and non-U.S. entities. Also in the U.S. we sponsor other postretirement plans for health care and life insurance benefits. Expenses and liabilities for the pension plans and other postretirement plans are actuarially calculated. These calculations are based on our assumptions related to the discount rate, expected return on assets, projected salary increases and health care cost trend rates. The discount rate assumption is determined using an actuarial yield curve approach, which enables us to select a discount rate that reflects the characteristics of the plan. The approach identifies a broad universe of corporate bonds that meet the quality and size criteria for the particular plan. We use this approach rather than a specific index that has a certain set of bonds that may or may not be representative of the characteristics of our particular plan. Our expected long-term rate of return on U.S. plan assets was based on our target asset allocation assumption of 60 percent equities and 40 percent fixed-income. Management, in conjunction with our external financial advisors, determines the expected long-term rate of return on plan assets by considering the expected future returns and volatility levels for each asset class that are based on historical returns and forward-looking observations. The expected long-term rate of return on plan assets assumption used in each non-U.S. plan is determined on a plan-by-plan basis for each local jurisdiction and is based on expected future returns for the investment mix of assets currently in the portfolio for that

Table of Contents

plan. Management, in conjunction with our external financial advisors, develops expected rates of return for each plan, considers expected long-term returns for each asset category in the plan, reviews expectations for inflation for each local jurisdiction, and estimates the impact of active management of the plan's assets. Note 11 to the Consolidated Financial Statements includes disclosure of assumptions employed in these measurements for both the non-U.S. and U.S. plans.

During 2010, we made a decision to limit the postemployment benefits coverage to a period of twelve months after active employment ends. The result of this decision was a one-time benefit of \$2,534 that was recorded in the SG&A expense line of the Consolidated Statements of Income in 2010.

Asset Retirement Obligations: We recognize asset retirement obligations (AROs) in the period in which we have an existing legal obligation associated with the retirement of a tangible long-lived asset, and the amount can be reasonably estimated. The ARO is recognized at fair value when the liability is incurred. Upon initial recognition of a liability, that cost is capitalized as part of the related long-lived asset and depreciated on a straight-line basis over the remaining estimated useful life of the related asset. We have recognized a liability related to special handling of asbestos related materials in certain facilities for which we have plans or expectation of plans to undertake a major renovation or demolition project that would require the removal of asbestos or have plans or expectation of plans to exit a facility. In addition, we have determined that we have facilities with some level of asbestos that will require abatement action in the future. Once the probability and timeframe of an action are determined, we apply certain assumptions to determine the related liability and asset. These assumptions include the use of inflation rates, the use of credit adjusted risk-free discount rates and the estimation of costs to handle asbestos related materials. The recorded liability is required to be adjusted for changes resulting from the passage of time and/or revisions to the timing or the amount of the original estimate. The asset retirement obligation liability was \$3,623 and \$1,400 at December 1, 2012 and December 3, 2011, respectively.

Environmental Costs: Environmental expenditures that relate to current operations are expensed or capitalized as appropriate. Expenditures that relate to an existing condition caused by past operations, and which do not contribute to current or future revenue generation, are expensed. Liabilities are recorded when environmental assessments are made, or remedial efforts are probable, and the costs can be reasonably estimated. The timing of these accruals is generally no later than the completion of feasibility studies.

Share-based Compensation: We have various share-based compensation programs, which provide for equity awards, including stock options and restricted stock. We use the straight-line method to recognize compensation expense associated with share-based awards based on the fair value on the date of grant, net of the estimated forfeiture rate. Expense is recognized over the requisite service period related to each award, which is the period between the grant date and the earlier of the award's stated vesting term or the date the employee is eligible for early retirement based on the terms of the plan. The fair value of stock options is estimated using the Black-Scholes option pricing model. All of our stock compensation expense is recorded in SG&A expenses in the Consolidated Statements of Income. See Note 3 to the Consolidated Financial Statements for additional information.

Earnings Per Share: Basic earnings per share is calculated by dividing net income attributable to H.B. Fuller by the weighted-average number of common shares outstanding during the applicable period. Diluted earnings per share is based upon the weighted-average number of common and common equivalent shares outstanding during the applicable period. The difference between basic and diluted earnings per share is attributable to share-based compensation awards. We use the treasury stock method to calculate the effect of outstanding awards, which computes total employee proceeds as the sum of (a) the amount the employee must pay upon exercise of the award, (b) the amount of unearned share-based compensation costs attributed to future services and (c) the amount of tax benefits, if any, that would be credited to additional paid-in capital assuming exercise of the award. Share-based compensation awards for which total employee proceeds exceed the average market price

Table of Contents

over the applicable period have an antidilutive effect on earnings per share, and accordingly, are excluded from the calculation of diluted earnings per share. The computations for basic and diluted earnings per share follows:

(shares in thousands)	2012	2011	2010
Net income attributable to H.B. Fuller	\$ 125,622	\$ 89,105	\$ 70,877
Weighted-average common shares basic	49,571	48,991	48,599
Equivalent shares from share-based compensation plans	1,047	875	1,009
Weighted-average common and common equivalent shares diluted	50,618	49,866	49,608

Share-based compensation awards for 7,372, 856,593 and 1,209,614 shares for 2012, 2011 and 2010, respectively, were excluded from the diluted earnings per share calculation because they were antidilutive.

Financial Instruments and Derivatives: Our objective is to balance, where possible, local currency denominated assets to local currency denominated liabilities to have a natural hedge and minimize foreign exchange impacts. We minimize risks from foreign currency exchange rate fluctuations through normal operating and financing activities and, when deemed appropriate, through the use of derivative instruments. Derivatives consisted primarily of forward currency contracts used to manage foreign currency denominated assets and liabilities. Because derivative instruments outstanding were not designated as hedges for accounting purposes, the gains and losses related to mark-to-market adjustments were recognized as other income or expense in the income statement during the periods the derivative instruments were outstanding. We do not enter into any speculative positions with regard to derivative instruments. See Note 12 to the Consolidated Financial Statements for further information.

Purchase of Company Common Stock: Under the Minnesota Business Corporation Act, repurchased stock is included in authorized shares, but is not included in shares outstanding. The excess of the repurchase cost over par value is charged to additional paid-in capital. When additional paid-in capital is exhausted, the excess reduces retained earnings. We repurchased 54,289, 48,675 and 17,804 shares of common stock in 2012, 2011 and 2010, respectively, in connection with the statutory minimum for the tax withholdings related to vesting of restricted shares.

On September 30, 2010, the Board of Directors authorized a new share repurchase program of up to \$100,000 of our outstanding common shares. During 2012, we repurchased 100,000 shares for \$2,999 and during 2011, we repurchased 345,446 shares for \$7,491 under this program. See Note 10 to the Consolidated Financial Statements for further information.

Recently Adopted Accounting Pronouncements: In May 2011, the FASB issued Accounting Standards Update (ASU) No. 2011-04, Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRS. This ASU does not extend the use of fair value but, provides guidance about how fair value should be applied where it already is required or permitted under U.S. GAAP or IFRS. For U.S. GAAP, most of the changes are clarifications of existing guidance or wording changes to align with IFRS 13. The adoption of these amendments did not have a material effect on our Consolidated Financial Statements.

In September 2011, the FASB issued ASU No. 2011-08, Testing Goodwill for Impairment which amended the guidance on goodwill impairment testing to allow companies to first assess qualitative factors to determine whether it is necessary to perform the two-step quantitative goodwill impairment test. If, as a result of the qualitative assessment, an entity determines that it is more-likely-than-not that the fair value of a reporting unit is less than its carrying amount, the quantitative impairment test is required. Otherwise, no further testing is required. The adoption of this amendment had no impact on our Consolidated Financial Statements.

Edgar Filing: FULLER H B CO - Form 10-K

In July 2012, the FASB issued ASU No. 2012-02, Testing Indefinite-Lived Assets for Impairment which amended the guidance on indefinite-lived intangible asset testing to allow companies to first assess qualitative

Table of Contents

factors to determine whether it is necessary to perform the quantitative impairment test for indefinite-lived assets. If, as a result of the qualitative assessment, a company determines that it is more-likely-than-not that the fair value of the indefinite-lived intangible asset is less than its carrying amount, the quantitative impairment test is required. Otherwise, no further testing is required. The amendment is effective for fiscal years beginning after September 15, 2012, which is our fiscal year 2013, but early adoption is permitted. The adoption of this amendment had no impact on our Consolidated Financial Statements.

New Accounting Pronouncements: In June 2011, the FASB issued ASU No. 2011-05, Presentation of Comprehensive Income. These updates require entities to present items of net income and other comprehensive income either in a single continuous statement, or in separate, but consecutive, statements of net income and other comprehensive income. The new requirements do not change which components of comprehensive income are recognized in net income or other comprehensive income, or when an item of other comprehensive income must be reclassified to net income. However, the current option under existing standards to report other comprehensive income and its components in the statement of changes in equity is eliminated. The updates are effective for fiscal years, and interim periods within those years, beginning after December 15, 2011 which is our fiscal year 2013. Since this standard impacts disclosure requirements only, its adoption will not have a material impact on our consolidated results of operations or financial condition.

Note 2: Acquisitions and Divestitures

Acquisitions

Engent, Inc.: On September 10, 2012 we acquired the outstanding shares of Engent, Inc., a provider of manufacturing, research and development services to the electronics industry, based in Norcross, Georgia. The acquisition added state-of-the-art development capabilities, testing resources and technical support infrastructure, which increased our capabilities in a wide range of microelectronic assembly technologies. The acquisition was a stock purchase and therefore encompassed all Engent, Inc. business operations and was recorded in our North America Adhesives operating segment.

The purchase price of \$7,881 was funded through existing cash. We incurred acquisition related costs of approximately \$74, which were recorded as selling, general and administrative expenses in the Consolidated Statements of Income.

In addition to the initial consideration, the former owners of the Engent, Inc. business are entitled to receive a series of annual cash payments based on certain financial performance criteria during the period September 10, 2012 through November 28, 2015 up to a maximum additional consideration of \$2,000. We used a probability-weighted present value technique based on expected future cash flows to estimate the fair value of the contingent consideration. The resulting fair value of the contingent consideration was \$1,200 which was recorded in other liabilities and increased goodwill. Each reporting period we determine the fair value of the contingent consideration liability and any changes in value are reflected in the Consolidated Statements of Income.

Table of Contents

Based on valuations we recorded:

Current assets	\$ 603
Property, plant and equipment	1,471
Goodwill	5,434
Other intangibles	
Customer relationships	2,300
Noncompetition agreements	400
Trademarks	300
Other assets	325
Current liabilities	(84)
Other liabilities	(1,668)
Contingent consideration liabilities	(1,200)
Total cash paid	 \$ 7,881

Our expected lives of the acquired intangible assets are as follows: customer relationships 10 years, non-competition agreements 5 years and trademarks 5 years.

Forbo Industrial Adhesives. On March 5, 2012 we completed the acquisition of the global industrial adhesives and synthetic polymers business of Forbo Holding AG. We acquired the Forbo Group subsidiaries that operate the industrial adhesives business and directly purchased certain assets used in the industrial adhesives business that were not owned by the former Forbo Group subsidiaries on a cash-free and debt-free basis. The purchase price was 370,000 Swiss francs or \$404,725 at the rate of 1.09385 USD/CHF when the acquisition closed. We financed the acquisition with the proceeds from our March 5, 2012 note purchase agreement under which we agreed to issue \$250,000 in 4.12 percent Senior Notes and a \$150,000 term loan at an initial interest rate of 1.75 percent.

The Forbo industrial adhesives business acquired is known for the breadth of its product line in all of our core markets, particularly packaging and durable assembly. The acquisition gives us added product technology, people and skills that will enhance the competitiveness of our business. The global industrial adhesives business acquired operated 17 manufacturing facilities in 10 countries and employed more than 1,100 people globally. The acquired business will be integrated into our existing North America Adhesives, EIMEA, Latin America Adhesives and Asia Pacific operating segments. The integration involves a significant amount of restructuring and capital investment to optimize the new combined operating segments. In addition, in July of 2011 we announced our intentions to take a series of actions in our existing EIMEA operating segment to improve the profitability and future growth prospects of this operating segment. We have combined these two initiatives into a single project which we refer to as the Business Integration Project. See Note 5 to Consolidated Financial Statements for additional information.

Table of Contents

The fair value measurement was preliminary at December 1, 2012, pending resolution of any purchase price adjustments. We expect the fair value measurement process to be completed in the first quarter of 2013. The following table summarizes the fair value measurement of the assets acquired and liabilities assumed as of the date of acquisition:

Current assets	\$ 172,345
Property, plant and equipment	92,443
Goodwill	136,658
Other intangibles	
Developed technology	42,190
Customer relationships	58,910
Trademarks/trade names	21,880
Other	479
Other assets	4,605
Current liabilities	(84,251)
Other liabilities	(40,534)
 Total purchase price	 \$ 404,725

Our expected lives of the acquired intangible assets are as follows: developed technology between 7 and 12 years, customer relationships between 12 and 13 years, trademarks/trade names 8 years and other 3 years.

Based on fair value measurement of the assets acquired and liabilities assumed, we allocated \$136,658 to goodwill for the expected synergies from combining the acquired business with our existing business. The goodwill was assigned to our existing operating segments as presented below.

North America Adhesives	\$ 31,563
EIMEA	97,466
Latin America Adhesives	1,584
Asia Pacific	6,045
 Total acquired goodwill	 \$ 136,658

The amount of goodwill deductible for tax purposes over a five year period is \$9,419 and over a fifteen year period is \$27,798. The goodwill non-deductible for tax purposes is \$99,441.

Our Consolidated Statements of Income for the year ended December 1, 2012 included net revenue of \$423,396 from the acquisition.

The following unaudited pro forma information gives effect to the acquisition of the Forbo industrial adhesives business acquired as if the acquisition occurred on November 28, 2010. The historical financial information has been adjusted to give effect to pro forma events that are directly attributable to the acquisition, supportable and expected to have a continuing impact on combined results. The unaudited pro forma results do not include any anticipated cost savings from operating efficiencies or synergies that could result from the acquisition. Accordingly, the unaudited pro forma results are not necessarily indicative of what actually would have occurred had the acquisition been in effect for the

periods presented. The unaudited pro forma information for the years

Table of Contents

ended December 1, 2012 and December 3, 2011, assuming that the acquisition occurred at the beginning of fiscal 2011, is presented below:

	Fiscal Years	
	December 1, 2012	December 3, 2011
Net revenue	\$ 2,019,103	\$ 2,015,362
Net income from continuing operations	71,946	83,216
Net income attributable to H.B. Fuller	129,281	92,106
Diluted earnings per share from continuing operations	\$ 1.42	\$ 1.67
Diluted earnings per share	2.55	1.85

Liquamelt Corp.: On April 15, 2011 we acquired the principal assets and certain liabilities of Liquamelt Corp., a manufacturer and marketer of adhesives and a unique adhesive dispensing system. Liquamelt Corp. was based in Lorain, Ohio. This innovative adhesive system delivers room temperature liquid adhesive to the point of application where it is activated and dispensed. It rapidly forms strong bonds over a wide variety of substrates.

The purchase price of \$6,000 was funded through existing cash. Under the terms of the agreement, the assets acquired included trade receivables, inventory, equipment and intangible assets. We assumed a small trade payables balance, but no debt was assumed. We also incurred acquisition related costs of approximately \$118, which were recorded as selling, general and administrative expenses in the Consolidated Statements of Income. The acquisition was recorded in our North America Adhesives operating segment.

In addition to the initial consideration, the former owners of the Liquamelt business, are entitled to receive a series of semi-annual cash payments based on certain financial performance criteria during the period April 15, 2011 through November 26, 2016 up to a maximum additional consideration of \$7,000. We used a present value technique based on expected future cash flows to estimate the fair value of the contingent consideration. The initial fair value of the contingent consideration was \$1,919 which was recorded in long-term liabilities and increased goodwill. Each reporting period we determine the fair value of the contingent consideration liability and any changes in value are recognized as SG&A expenses in the Consolidated Statements of Income. We have reduced the fair value of the contingent consideration liability to \$449 as of December 1, 2012.

Divestitures

Central America Paints. On May 7, 2012 we agreed to sell our Central America Paints business to Compania Global de Pinturas S.A., a company of Inversiones Mundial S.A. The sale was completed on August 6, 2012. Cash proceeds of \$118,459 included the \$120,000 sales price net of a purchase price adjustment of \$1,541 for cash in excess of target cash, a working capital adjustment to target and cash settlement of other balance sheet adjustments. The cash proceeds included settlement of our intercompany debt in the amount of \$25,325. As part of this transaction, we recorded a gain of \$66,179 (\$51,060 net of tax) which is net of direct external costs to sell of \$4,875 and a deferred gain of \$5,000 (\$3,135, net of tax), because a portion of the cash proceeds was determined to be contingent consideration, pending resolution of purchase agreement contingencies which we expect to be resolved in early 2014. The contingent consideration was valued at fair value based on level 3 inputs and is included in long-term liabilities of discontinued operations in the Consolidated Balance Sheets.

Edgar Filing: FULLER H B CO - Form 10-K

In accordance with ASC 205-20, Discontinued Operations we have classified the results of this business as discontinued operations. The operational results of this business are presented in the Income from discontinued operations, net of tax line item on the Consolidated Statements of Income. Also in accordance with ASC 205-20, we have not allocated general corporate charges to this business. The assets and liabilities of this business are presented on the Consolidated Balance Sheets as assets and liabilities of discontinued operations.

Table of Contents

Revenue and income from discontinued operations for the years ended December 1, 2012, December 3, 2011 and November 27, 2010 were as follows:

	December 1, 2012	Fiscal Years December 3, 2011	November 27, 2010
Net revenue	\$ 73,143	\$ 113,466	\$ 99,336
Income from operations	8,235	12,572	11,100
Gain on sale of discontinued operations	66,179		
Income taxes	(16,846)	(3,740)	(4,974)
Net income from discontinued operations	\$ 57,568	\$ 8,832	\$ 6,126

Income taxes for the year ended December 1, 2012 included \$15,119 of tax expense related to the gain on the sale of discontinued operations.

The major classes of assets and liabilities of discontinued operations as of December 1, 2012 and December 3, 2011 were as follows:

	December 1, 2012	December 3, 2011
Cash and cash equivalents	\$	\$ 1,500
Trade receivables, net		26,852
Inventories		19,549
Other current assets		4,583
Current assets of discontinued operations		52,484
Property, plant and equipment, net		13,296
Other assets	1,865	3,563
Long-term assets of discontinued operations	1,865	16,859
Trade payables	74	11,936
Income taxes payable		4,567
Other accrued expenses		6,097
Current liabilities of discontinued operations	74	22,600
Accrued pension liabilities		1,288
Other liabilities	5,000	1,456
Long-term liabilities of discontinued operations	5,000	2,744

Note 3: Accounting for Share-Based Compensation

Overview: We have various share-based compensation programs, which provide for equity awards including stock options, restricted stock and deferred compensation. These equity awards fall under several plans and are described below.

Edgar Filing: FULLER H B CO - Form 10-K

Share-based Compensation Plans: We currently grant stock options, restricted stock and stock-based units under equity compensation and deferred compensation plans.

Non-qualified stock options are granted to officers and key employees at prices not less than fair market value at the date of grant. These non-qualified options are generally exercisable beginning one year from the date of grant in cumulative yearly amounts of 25 percent or 33.3 percent and generally have a contractual term of 10 years. Options exercised represent newly issued shares.

Restricted stock awards are nonvested stock-based awards that may include grants of restricted stock shares or restricted stock units. Restricted stock awards are independent of option grants and are subject to forfeiture if

Table of Contents

employment terminates prior to the release of the restrictions. Such awards generally vest in three years from the date of grant or 33.3 percent per year for three years, depending on the grant. During the vesting period, ownership of the shares cannot be transferred.

Restricted stock shares granted represent newly issued shares and have the same cash dividend and voting rights as other common stock and are considered to be currently issued and outstanding. The cash dividends on restricted stock shares are forfeitable.

Restricted stock units have dividend equivalent rights equal to the cash dividend paid on restricted stock shares. However, restricted stock units do not have voting rights of common stock and are not considered issued and outstanding upon grant. Restricted stock units become newly issued shares when vested. The dividend equivalent rights for restricted stock units are forfeitable.

We expense the cost, which is the grant date fair market value, of both the restricted stock shares and the restricted stock units ratably over the period during which the restrictions lapse. The grant date fair value is our closing stock price on the date of grant.

Directors Deferred Compensation Plan: This plan allows non-employee directors to defer all or a portion of their retainer and meeting fees in a number of investment choices, including units representing shares of our common stock. We provide a 10 percent match on deferred compensation invested in these units. These units are required to be paid out in our common stock.

2009 Directors Stock Incentive Plan: This plan permits granting of (a) shares for amounts non-employee directors defer under the Directors Deferred Compensation Plan and (b) discretionary grants of restricted stock, stock options, stock appreciation rights, performance awards and other stock awards.

Year 2000 Stock Incentive Plan: This plan allows for granting of awards to employees. The plan permits granting of (a) stock options; (b) stock appreciation rights; (c) restricted stock awards; (d) performance awards; (e) dividend equivalents; and (f) other awards based on our common stock, including shares for amounts employees deferred under the Key Employee Deferred Compensation Plan.

Key Employee Deferred Compensation Plan: This plan allows key employees to defer a portion of their eligible compensation in a number of investment choices, including units representing shares of company common stock. We provide a 10 percent match on deferred compensation invested in these units.

Grant-Date Fair Value: We use the Black-Scholes option-pricing model to calculate the grant-date fair value of stock option awards. The fair value of options granted during 2012, 2011 and 2010 were calculated using the following assumptions:

	2012	2011	2010
Expected life (in years)	4.75	4.75	5
Weighted-average expected volatility	51.60%	52.13%	50.88%
Expected volatility range	48.79% - 51.76%	50.45% - 52.30%	50.80% - 51.60%
Risk-free interest rate	0.71%	1.87%	2.07%

Edgar Filing: FULLER H B CO - Form 10-K

Expected dividend yield		1.05%		1.31%		1.35%
Weighted-average fair value of grants	\$	11.52	\$	9.10	\$	8.49

Expected life We use historical employee exercise and option expiration data to estimate the expected life assumption for the Black-Scholes grant-date valuation. We believe that this historical data is currently the best estimate of the expected term of a new option. We use a weighted-average expected life for all awards.

Table of Contents

Expected volatility Volatility is calculated using our stock's historical volatility for the same period of time as the expected life. We have no reason to believe that its future volatility will differ from the past.

Risk-free interest rate The rate is based on the U.S. Treasury yield curve in effect at the time of the grant for the same period of time as the expected life.

Expected dividend yield The calculation is based on the total expected annual dividend payout divided by the average stock price.

Expense

We use the straight-line attribution method to recognize expense for all option awards with graded vesting and restricted stock awards with graded and cliff vesting. Expense is recognized over the requisite service period, which for us is the period between the grant date and the earlier of the award's stated vesting term or the date the employee is eligible for early vesting based on the terms of the plans.

Total share-based compensation expense was \$9,728, \$7,741 and \$6,405 for 2012, 2011 and 2010, respectively. No share-based compensation was capitalized. All share-based compensation was recorded as selling, general and administrative expense.

The benefits of tax deductions in excess of recognized compensation costs (excess tax benefits) are recorded as a financing cash inflow rather than a deduction of taxes paid. For 2012, 2011 and 2010, there was \$1,263, \$1,140 and \$509 of excess tax benefit recognized resulting from share-based compensation cost, respectively. Our additional paid in capital pool (APIC Pool) of excess tax benefits available to absorb tax deficiencies was \$12,826 at December 1, 2012 due to exercises of stock options, vesting of restricted stock and deferred compensation payouts in the year.

As of December 1, 2012, \$6,096 of unrecognized compensation costs related to unvested stock option awards is expected to be recognized over a weighted-average period of 1.4 years. Unrecognized compensation costs related to unvested restricted stock awards are \$5,657 as of December 1, 2012 and are expected to be recognized over a weighted-average period of 0.9 years.

Share-based Activity

The option activity for the years ended December 1, 2012 and December 3, 2011 is summarized below:

	Options	Weighted-Average Exercise Price
Outstanding at November 27, 2010	2,820,468	\$ 18.25

Edgar Filing: FULLER H B CO - Form 10-K

Granted	535,873	22.11
Exercised	(538,709)	14.75
Forfeited or cancelled	(394,266)	21.87
Outstanding at December 3, 2011	2,423,366	\$ 19.29
Granted	548,449	28.75
Exercised	(430,000)	17.42
Forfeited or cancelled	(112,065)	22.03
Outstanding at December 1, 2012	2,429,750	\$ 21.63

The fair value of options granted during 2012, 2011 and 2010 was \$6,318, \$4,878 and \$5,327, respectively. Total intrinsic value of options exercised during 2012, 2011 and 2010 was \$5,191, \$4,231 and \$3,542, respectively. Intrinsic value is the difference between our closing stock price on the respective trading day and the exercise

Table of Contents

price, multiplied by the number of options exercised. Proceeds received from option exercises during the year ended December 1, 2012 were \$7,401.

The nonvested restricted stock activity for the years ended December 1, 2012 and December 3, 2011, is summarized below:

	Units	Shares	Total	Weighted-Average Grant Date Fair Value	Weighted-Average Remaining Contractual Life (in Years)
Nonvested at November 28, 2010	111,940	365,829	477,769	\$ 19.17	1.7
Granted	82,492	145,038	227,530	22.38	2.2
Vested	(54,392)	(148,951)	(203,343)	21.87	
Forfeited	(12,923)	(90,154)	(103,077)	18.59	1.1
Nonvested at December 3, 2011	127,117	271,762	398,879	\$ 23.18	1.0
Granted	88,536	128,427	216,963	28.64	2.2
Vested	(52,788)	(134,810)	(187,598)	24.66	
Forfeited	(21,681)	(20,148)	(41,829)	24.78	1.6
Nonvested at December 1, 2012	141,184	245,231	386,415	\$ 25.41	0.9

Total fair value of restricted stock vested during 2012, 2011, and 2010 was \$4,626, \$4,447 and \$1,441, respectively. The total fair value of nonvested restricted stock at December 1, 2012 was \$9,820.

We repurchased 54,289, 48,675 and 17,804 restricted stock shares during 2012, 2011 and 2010, respectively, in conjunction with restricted stock share vestings. The repurchases relate to statutory minimum tax withholding.

Deferred compensation units are fully vested at the date of contribution. The deferred compensation units outstanding for the years ended December 1, 2012 and December 3, 2011 is summarized below:

	Non-employee		Total
	Directors	Employees	
Units outstanding November 27, 2010	277,345	88,798	366,143
Participant contributions	21,406	3,457	24,863
Company match contributions ¹	22,996	649	23,645
Payouts	(7,187)	(15,631)	(22,818)
Units outstanding December 3, 2011	314,560	77,273	391,833
Participant contributions	15,836	3,215	19,051

Edgar Filing: FULLER H B CO - Form 10-K

Company match contributions ¹	20,414	599	21,013
Payouts	(12,041)	(12,425)	(24,466)
Units outstanding December 1, 2012	338,769	68,662	407,431

¹ The non-employee directors' company match includes 18,030 and 19,452 deferred compensation units paid as discretionary awards to all non-employee directors in 2012 and 2011, respectively.

The fair value of non-employee directors' company matches for 2012, 2011 and 2010 was \$78, \$78 and \$66, respectively. The fair value of the non-employee directors' discretionary award was \$560 for 2012 and \$490 for 2011 and 2010. The fair value of employee company matches was \$14 for 2012 and \$14 for 2011 and \$15 for 2010.

Note 5: Special Charges, net

We completed the acquisition of the Forbo industrial adhesives business on March 5, 2012. The integration of this business will involve a significant amount of restructuring and capital investment to optimize the new combined entity. In addition, in July of 2011 we announced our intentions to take a series of actions in our existing EIMEA operating segment to improve the profitability and future growth prospects of this operating segment. We have combined these two initiatives into a single project which we refer to as the Business Integration Project. During the years ended December 1, 2012 and December 3, 2011, we incurred special charges, net of \$52,467 and \$7,499, respectively, for costs related to the Business Integration Project.

The following table provides detail of special charges, net:

	Fiscal Years	
	2012	2011
Acquisition and transformation related costs:		
Professional services	\$ 24,647	\$ 4,410
Financing availability costs	4,300	
Foreign currency option contract	841	3,089
Gain on foreign currency forward contracts	(11,621)	
Other related costs	2,010	
Restructuring costs:		
Workforce reduction costs	28,087	
Facility exit costs	4,203	
Special charges, net	\$ 52,467	\$ 7,499

Edgar Filing: FULLER H B CO - Form 10-K

Acquisition and transformation related costs of \$24,647 for the year ended December 1, 2012 include costs related to organization consulting, investment advisory, financial advisory, legal and valuation services necessary to acquire and integrate the Forbo industrial adhesives business into our existing operating segments. For the year ended December 1, 2012, we also incurred other costs related to the acquisition of the Forbo industrial adhesives business including an expense of \$4,300 to make a bridge loan available if needed and an expense of \$841 related to the purchase of a foreign currency option to hedge a portion of the acquisition purchase price. For the year ended December 3, 2011, we incurred acquisition and transformation related costs of \$4,410 for investment

Table of Contents

advisory, financial advisory, legal and valuation services necessary to acquire the Forbo industrial adhesives business and an expense of \$3,089 related to the purchase of a foreign currency option to hedge a portion of the acquisition purchase price.

During the first quarter of 2012, we entered into forward currency contracts maturing on March 5, 2012 to purchase 370,000 Swiss francs at a blended forward rate of 1.06245 USD/CHF. Our objective was to economically hedge the purchase price for the pending acquisition of the global industrial adhesives business of Forbo Group after the price was established. The currency contracts were not designated as hedges for accounting purposes. When the acquisition closed on March 5, 2012, the forward currency contracts were settled at a rate of 1.09385 USD/CHF. For the year ended December 1, 2012, the net gain on the forward currency contracts was \$11,621 which partially offset other acquisition and transformation related costs.

During 2012, we incurred workforce reduction costs of \$28,087, cash facility exit costs of \$1,033, non-cash facility exit costs of \$3,170 and other costs of \$2,010 related to the Business Integration Project.

For the year ended December 1, 2012, the activity in accrued restructuring costs associated with the Business Integration Project is as follows:

	Workforce Reduction Costs
Balance at December 3, 2011	\$
Restructuring charges	28,087
Cash payments	(5,308)
Foreign currency translation adjustment	(2,931)
Balance at December 1, 2012	\$ 19,848

Of the \$19,848 in accrued restructuring costs at December 1, 2012, \$16,511 was included in accrued compensation and \$3,337 was included in other liabilities on our Consolidated Balance Sheets as this portion is not expected to be paid within the next year. In Europe, the accrued restructuring charges included statutory minimum amounts for two sites for which final agreements have not been reached with the works councils as well as amounts being accrued ratably for three sites in which works council agreements have been reached. At the communication date to employees, final termination benefits will be measured and will be recognized ratably over the service period employees are required to work to be eligible for termination benefits. In North America and Asia, the benefits were accrued based primarily on the formal severance plans in place for the various locations. The restructuring costs are not allocated to our operating segments. See Note 15 to Consolidated Financial Statements.

Note 6: Impairment of Long-Lived Assets

In 2011 we discontinued production of the polymers used in certain resin products that had been produced in our EIMEA operating segment. As a result, we performed an impairment test on the trademarks and trade names used in resin products. In accordance with accounting standards, we calculated the fair value using a discounted cash flow approach. As a result of this analysis, we recorded pre-tax asset impairment charge of \$332.

Edgar Filing: FULLER H B CO - Form 10-K

In 2010 we exited our polysulfide-based insulating glass product line in Europe. In accordance with accounting standards, we determined that the carrying amount of this asset group was not recoverable and was therefore impaired. We calculated the fair value of the asset group using a discounted cash flow approach. As a result of this analysis, we recorded pre-tax asset impairment charges of \$8,785 to write-down the value of intangible assets.

Table of Contents**Note 7: Goodwill and Other Intangible Assets**

The operating segment goodwill balances as of December 1, 2012 and December 3, 2011, follow. Changes in the goodwill balances relate to changes in allocations, foreign currency exchange rates and activity from acquisitions. See Note 2 to the Consolidated Financial Statements for more information on acquisitions.

	2012	2011
North America Adhesives	\$ 58,722	\$ 27,476
Construction Products	13,337	13,337
EIMEA	147,318	47,871
Latin America Adhesives	7,464	5,481
Asia Pacific	27,504	20,730
Total	\$ 254,345	\$ 114,895

Additional details on the goodwill balance for 2012 and 2011 follow.

	2012	2011
Balance at beginning of year	\$ 114,895	\$ 108,970
Engent, Inc. acquisition (Note 2)	5,434	
Forbo Industrial Adhesives (Note 2)	136,658	
Liquamelt Corp. acquisition (Note 2)		4,882
Currency effect	(2,642)	1,043
Balance at end of year	\$ 254,345	\$ 114,895

In accordance with accounting standards, we test each of our reporting units for goodwill impairment annually and whenever events or changes in circumstances indicate that impairment may have occurred. In the fourth quarter of 2012, we conducted the required annual test of goodwill for impairment. We performed the goodwill impairment analysis on our reporting units by using a discount rate at the high end of our range. There were no indications of impairment in any of our reporting units.

In the North America Adhesives and EIMEA reporting units, the calculated fair value substantially exceeded the carrying value of the net assets. The calculated fair values of the Construction Products, Latin America Adhesives and Asia Pacific reporting units exceeded their carrying value by approximately 26 percent, 28 percent and 68 percent, respectively. In all three of these reporting units, the calculated fair value exceeded the carrying value by a reasonable margin.

See Note 1 to the Consolidated Financial Statements for further information of our impairment analysis.

Table of Contents

Balances of amortizable identifiable intangible assets, excluding goodwill and other non-amortizable intangible assets, follow:

Amortizable Intangible Assets	Purchased Technology & Patents	Customer Relationships	All Other	Total
As of December 1, 2012				
Original cost	\$ 43,304	\$ 226,478	\$ 42,838	\$ 312,620
Accumulated amortization	(5,924)	(62,727)	(11,170)	(79,821)
Net identifiable intangibles	\$ 37,380	\$ 163,751	\$ 31,668	\$ 232,799
Weighted-average useful lives (in years)	11	17	13	16
As of December 3, 2011				
Original cost	\$ 10,860	\$ 159,351	\$ 17,262	\$ 187,473
Accumulated amortization	(2,932)	(50,986)	(7,429)	(61,347)
Net identifiable intangibles	\$ 7,928	\$ 108,365	\$ 9,833	\$ 126,126
Weighted-average useful lives (in years)	12	19	15	18

Amortization expense with respect to amortizable intangible assets was \$18,703, \$10,162 and \$10,839 in 2012, 2011 and 2010, respectively.

Estimated aggregate amortization expense based on the current carrying value of amortizable intangible assets for the next five fiscal years follows:

Fiscal Year	2013	2014	2015	2016	2017	Thereafter
Amortization Expense	\$ 20,738	\$ 20,644	\$ 20,302	\$ 20,130	\$ 20,116	\$ 130,869

The above amortization expense forecast is an estimate. Actual amounts may change from such estimated amounts due to fluctuations in foreign currency exchange rates, additional intangible asset acquisitions, potential impairment, accelerated amortization, or other events.

Non-amortizable intangible assets at December 1, 2012 and December 3, 2011 totaling \$556 and \$584, respectively, relate to the trademarks and trade names. The change in non-amortizable assets in 2012 compared to 2011 was due to changes in currency exchange rates.

Note 8: Notes Payable, Long-Term Debt and Lines of Credit

Notes Payable: Notes payable were \$22,613 at December 1, 2012. This amount represents various other short-term borrowings that were not part of committed lines. The weighted-average interest rates on short-term borrowings were 11.3 percent, 11.3 percent and 8.6 percent in 2012, 2011 and 2010, respectively. Fair values of these short-term obligations approximate their carrying values due to their short maturity. There

were no funds drawn from the short-term committed lines at December 1, 2012.

Table of Contents**Long-Term Debt**

Long-Term Debt	Weighted-Average Interest Rate at	Fiscal Year Maturity Date	2012	2011
	December 1, 2012			
Revolving credit line	1.50%	2017	\$	\$
Term Loan A	0.88%	2013	22,500	46,875
Term Loan B	1.72%	2017	66,250	
Senior Notes, Series A ¹	2.11%	2017	18,646	18,403
Senior Notes, Series B ²	1.99%	2017	36,454	35,948
Senior Notes, Series C ³	3.25%	2020	38,762	37,760
Senior Notes, Series D ⁴	5.61%	2020	65,000	65,000
Senior Notes, Series E ⁵	4.12%	2022	250,000	
Total debt			497,612	203,986
Less: current maturities			(22,500)	(24,375)
Total long-term debt, excluding current maturities			\$ 475,112	\$ 179,611

On December 16, 2009, we entered into a note purchase agreement under which we agreed to issue \$150,000 in aggregate principal amount of senior unsecured notes to a group of private investors. The \$150,000 was split into four non-amortizing tranches, Series A-D. On March 5, 2012, we entered into a note purchase agreement under which we agreed to issue \$250,000 in aggregate principal amount of senior unsecured notes to a group of private investors. The \$250,000 is a non-amortizing tranche, Series E. Additional details are provided below:

- 1 Senior Notes, Series A, due December 16, 2016, \$17,000 5.13 percent, swapped to a variable rate of 6-month LIBOR (in arrears) plus 1.59 percent
- 2 Senior Notes, Series B, due February 24, 2017, \$33,000 5.13 percent fixed, swapped to a variable rate of 6-month LIBOR (in arrears) plus 1.47 percent
- 3 Senior Notes, Series C, due December 16, 2019, \$35,000 5.61 percent fixed, \$25,000 swapped to a variable rate of 6-month LIBOR (in arrears) plus 1.78 percent
- 4 Senior Notes, Series D, due February 24, 2020, \$65,000 5.61 percent fixed
- 5 Senior Notes, Series E, due March 5, 2022, \$250,000 4.12 percent fixed

On March 5, 2012, we entered into a credit agreement with a consortium of financial institutions under which we established a \$200,000 multi-currency revolving credit facility and a \$150,000 term loan (term loan B) that we can use to repay existing indebtedness, finance working capital needs, and for general corporate purposes. Interest on the revolving credit facility is payable at the LIBOR plus 1.275 percent. A facility fee of 0.225 percent is payable quarterly. The interest rate on term loan B is payable at the LIBOR rate plus 1.50 percent. The interest rates and the facility fee are based on a rating grid. The credit agreement replaced our existing revolving credit facilities and expires on March 5, 2017.

Edgar Filing: FULLER H B CO - Form 10-K

Long-term debt had an estimated fair value of \$562,010 and \$214,418 as of December 1, 2012 and December 3, 2011, respectively. The fair value of long-term debt is based on quoted market prices for the same or similar issues or on the current rates offered for debt of similar maturities. The estimated fair value of these long-term obligations is not necessarily indicative of the amount that would be realized in a current market exchange.

Lines of Credit

As of December 1, 2012, lines of credit were as follows:

	Term	Committed	Drawn	Unused
Long-term lines of credit		\$ 200,000	\$ 0	\$ 200,000

Table of Contents

A revolving credit agreement with a consortium of financial institutions accounted for the entire committed lines of credit. The credit agreement creates an unsecured multi-currency revolving credit facility that can be drawn upon for general corporate purposes up to a maximum of \$200,000. The credit agreement expires on March 5, 2017.

The most restrictive debt covenants place limitations on secured and unsecured borrowings, operating leases, and contain minimum interest coverage and maximum debt to trailing twelve months EBITDA requirements. In addition, we cannot be a member of any consolidated group for income tax purposes other than with our subsidiaries. At December 1, 2012 all financial covenants were met.

Maturities of long-term debt for the next five fiscal years follow:

Fiscal Year	2013	2014	2015	2016	2017	Thereafter
Long-term debt obligations	\$ 22,500	\$ 0	\$ 0	\$ 0	\$ 121,350	\$ 353,762

Note 9: Income Taxes

Total	\$ 30,479	\$ 31,211	\$ 20,333

Table of Contents

Deferred income tax balances at each year-end related to	2012	2011
Depreciation and amortization	\$ (32,731)	\$ (8,829)
Employee benefit costs	71,100	39,917
Foreign tax credit carryforward	13,510	2,259
Tax loss carryforwards	12,355	9,641
Other	22,669	9,316
	86,903	52,304
Valuation allowance	(12,325)	(3,737)
Net deferred tax assets	\$ 74,578	\$ 48,567

The difference between the change in the deferred tax assets in the balance sheet and the deferred tax provision is primarily due to the defined benefit pension adjustments.

Valuation allowances principally relate to foreign net operating loss carryforwards where the future potential benefits do not meet the more-likely-than-not realization test. The increase in the valuation allowance of \$8,588 during 2012 is primarily due to recording a valuation allowance on deferred tax assets in one of our legacy non-U.S. entities, as well as some of our purchased non-U.S. entities, that do not meet the more-likely-than-not realization test.

Deferred tax assets and liabilities are measured using the currently enacted tax rates that apply to taxable income in effect for the years in which those deferred tax assets and liabilities are expected to be realized or settled. We record a valuation allowance to reduce deferred tax assets to the amount that is believed more-likely-than-not to be realized. We believe it is more-likely-than-not that forecasted income, together with the tax effects of the deferred tax liabilities and tax planning strategies, will be sufficient to fully recover the net deferred tax assets. In the event that all or part of the net deferred tax assets are determined not to be realizable in the future, an adjustment to the valuation allowance would be charged to earnings in the period such determination is made.

U.S. income taxes have not been provided on approximately \$388,540 undistributed earnings of non-U.S. subsidiaries. We intend to indefinitely reinvest these undistributed earnings. In the event these earnings are later distributed to the U.S., such distributions would likely result in additional U.S. tax that may be offset, at least in part by associated foreign tax credits.

While non-U.S. operations have been profitable overall, there are cumulative tax losses of \$40,027 in twenty different countries. These tax losses can be carried forward to offset the income tax liabilities on future income in these countries. Cumulative tax losses of \$24,894 can be carried forward indefinitely, while the remaining \$15,133 of tax losses must be utilized during 2013 to 2020.

The U.S. has a foreign tax credit carryforward of \$13,510 which will expire between 2019 and 2022.

The table below sets forth the changes to our gross unrecognized tax benefit as a result of uncertain tax positions, excluding accrued interest, for fiscal year ended December 1, 2012. We do not anticipate that the total unrecognized tax benefits will change significantly within the next twelve months.

Edgar Filing: FULLER H B CO - Form 10-K

	2012
Balance at beginning of year	\$ 5,584
Tax positions related to the current year:	
Additions	1,215
Tax positions related to prior years:	
Additions	297
Reductions	(1,844)
Settlements	(67)
Lapses in applicable statutes of limitation	(299)
Balance at end of year	\$ 4,886

Table of Contents

Included in the balance of unrecognized tax benefits as of December 1, 2012, are potential benefits of \$4,310 that, if recognized, would affect the effective tax rate.

We report accrued interest and penalties related to unrecognized tax benefits in income tax expense. For the fiscal year ended December 1, 2012, we recognized a net expense for interest and penalties of \$25 relating to unrecognized tax benefits and had net accumulated accrued interest and penalties of \$666 as of December 1, 2012. For the fiscal year ended December 3, 2011, we recognized net benefit for interest and penalties of \$400 relating to unrecognized tax benefits and had net accumulated accrued interest and penalties of \$709 as of December 3, 2011.

We are subject to U.S. federal income tax as well as income tax in numerous state and foreign jurisdictions. We are no longer subject to U.S. federal tax examination for years prior to 2008 or Swiss income tax examination for years prior to 2008. There have been no Swiss income tax examinations for 2008 and subsequent years. We are in various stages of examination and appeal in several state and other foreign jurisdictions. Although the final outcomes of these examinations cannot currently be determined, we believe that we have adequate reserves with respect to these examinations.

Note 10: Stockholders Equity

Preferred Stock: The board of directors is authorized to issue up to 10,045,900 shares of preferred stock that may be issued in one or more series and with such stated value and terms as the board of directors may determine.

Common Stock: There were 160,000,000 shares of common stock with a par value of \$1.00 authorized and 49,903,266 and 49,449,579 shares issued and outstanding at December 1, 2012 and December 3, 2011, respectively. Dividends of \$0.330, \$0.295 and \$0.278 per share were declared and paid in 2012, 2011 and 2010, respectively.

On September 30, 2010, the Board of Directors authorized a new share repurchase program of up to \$100,000 of our outstanding common shares. Under the program, we are authorized to repurchase shares for cash on the open market, from time to time, in privately negotiated transactions or block transactions, or through an accelerated repurchase agreement. The timing of such repurchases is dependent on price, market conditions and applicable regulatory requirements. Upon repurchase of the shares, we reduce our common stock for the par value of the shares with the excess being applied against additional paid-in capital. During 2012, we repurchased 100,000 shares for \$2,999 and during 2011, we repurchased 345,446 shares for \$7,491 under this program.

Common Shares Outstanding	2012	2011	2010
Beginning balance	49,449,579	49,194,251	48,657,618
Stock options exercised	430,000	538,709	358,421
Shares swapped for stock option exercises	(3,619)	(11,017)	
Deferred compensation paid	19,389	17,233	37,862
Restricted units vested	53,927	49,640	13,370
Restricted shares granted	128,427	145,038	155,757
Shares withheld for taxes	(54,289)	(48,675)	(17,804)
Restricted shares forfeited	(20,148)	(90,154)	(10,973)
Shares repurchased under repurchase plan	(100,000)	(345,446)	
Ending balance	49,903,266	49,449,579	49,194,251

Shareholder Rights Plan: The shareholder rights plan provides each holder of a share of common stock a right to purchase one one-hundredth of a share of preferred stock for \$95, subject to adjustment. No fraction of a preferred share (other than fractions in integral multiples of one one-hundredth of a share) will be issued.

Table of Contents

Preferred shares purchased upon exercise of the rights will not be redeemable. Each preferred share will be entitled to a preferential quarterly dividend payment, a preferential liquidation payment, voting rights, and participation in any merger, consolidation or other transaction in which common shares are exchanged. These rights are not currently exercisable. In the event any person becomes an Acquiring Person (as defined in the rights plan), each holder of a right will thereafter have a right to receive, upon exercise thereof at the then current aggregate exercise price, in lieu of preferred shares, such number of common shares of ours having a current aggregate market price equal to twice the current aggregate exercise price. In the event that at any time after there is an Acquiring Person we are acquired in certain mergers or other business combination transactions or 50 percent or more of the assets or earning power of us and our subsidiaries (taken as a whole) are sold, holders of the rights will thereafter have the right to receive, upon exercise thereof at the then current aggregate exercise price, such number of common shares of the acquiring company (or, in certain cases, one of its affiliates) having a current aggregate market price equal to twice the current aggregate exercise price. Rights held by an acquiring person are void. We may redeem or exchange the rights in certain instances. Unless extended or redeemed, the rights expire on July 31, 2016.

At the end of 2011, we repurchased the 20 percent holding that Sekisui Chemical had in our China entities. The table below presents the effect of this repurchase on our stockholders' equity:

	2012	2011	2010
Net income attributable to H.B. Fuller	\$ 125,622	\$ 89,105	\$ 70,877
Decrease in additional paid-in-capital for repurchase of non-controlling interest		(6,610)	
Change from net income attributable to H.B. Fuller and transfers to non-controlling interest	\$ 125,622	\$ 82,495	\$ 70,877

Note 11: Pension and Postretirement Benefits**Defined Contribution Plan**

All U.S. employees have the option of contributing up to 75 percent of their pre-tax earnings to a 401(k) plan, subject to IRS limitations. We match up to the first 4 percent of each employee's pre-tax earnings, based on the employee's contributions. All employees are eligible for a separate annual retirement contribution to the 401(k) plan of 3 percent of pay, that is invested based on the election of the individual participant. The 3 percent contribution is in addition to our 4 percent matching contribution described above and is in lieu of participation in our defined benefit pension plan. The total contribution to the 401(k) plan for 2012 was \$6,606 which included the cost of the 4 percent company match of \$3,535 and the additional 3 percent contribution of \$3,071. The total contributions to the 401(k) plan were \$5,211 and \$3,602 in 2011 and 2010, respectively.

The defined contribution pension plan liability recorded in the Consolidated Balance Sheets was \$6,702 and \$4,084 in 2012 and 2011, respectively for the U.S. Plan and several statutorily required non-U.S. Plans.

Defined Benefit Plan

Noncontributory defined benefit pension plans cover all U.S. employees employed prior to January 1, 2007. Benefits for these plans are based primarily on each employee's years of service and average compensation. During 2011, we announced significant changes to our U.S. Pension

Edgar Filing: FULLER H B CO - Form 10-K

Plan (the Plan). The changes included: benefits under the Plan were locked-in using service and salary as of May 31, 2011, participants no longer earn benefits for future service and salary as they had in the past, affected participants receive a three percent increase to the locked-in benefit for every year they continue to work for us and we are making a retirement contribution of three percent of eligible compensation to the 401(k) Plan for those participants. These changes to the Plan represented a plan curtailment as there is no longer a service cost component in the net periodic pension cost as all participants are considered inactive in the Plan. The funding policy is consistent with the funding

Table of Contents

requirements of federal law and regulations. Plan assets consist principally of listed equity securities and bonds. Other U.S. postretirement benefits are funded through a Voluntary Employees' Beneficiaries Association Trust.

Health care and life insurance benefits are provided for eligible retired employees and their eligible dependents. These benefits are provided through various insurance companies and health care providers. Costs are accrued during the years the employee renders the necessary service.

Certain non-U.S. subsidiaries provide pension benefits for their employees consistent with local practices and regulations. These plans are primarily defined benefit plans covering substantially all employees upon completion of a specified period of service. Benefits for these plans are generally based on years of service and annual compensation.

Following is a reconciliation of the beginning and ending balances of the benefit obligation and the fair value of plan assets as of December 1, 2012 and December 3, 2011:

	Pension Benefits				Other Postretirement Benefits	
	U.S. Plans		Non-U.S. Plans		2012	2011
	2012	2011	2012	2011

Weighted-average assumptions used to	Pension Benefits						Other		
	U.S. Plans			Non-U.S. Plans			Postretirement Benefits		
Determine net costs for years ended	2012	2011	2010	2012	2011	2010	2012	2011	2010
Discount rate	5.05%	5.46%	5.69%	5.26%	5.10%	5.18%	4.73%	4.96%	5.30%
Expected return on plan assets	8.00%	8.00%	7.90%	6.08%	6.18%	6.68%	8.75%	8.75%	8.75%
Rate of compensation increase	5.00%	4.17%	4.19%	1.86%	2.13%	2.15%	N/A	N/A	N/A

¹ Benefits under the U.S. Pension Plan were locked-in as of May 31, 2011 and no longer include compensation increases. The 4.5 percent rate and 5.00 percent rate for 2012 and 2011 respectively, is for the supplemental executive retirement plan only.

The discount rate assumption is determined using an actuarial yield curve approach, which enables us to select a discount rate that reflects the characteristics of the plan. The approach identifies a broad universe of corporate bonds that meet the quality and size criteria for the particular plan. We use this approach rather than a specific index that has a certain set of bonds that may or may not be representative of the characteristics of our particular plan. A lower discount rate increases the present value of the pension obligations. The discount rate for the U.S. pension plan was 3.83 percent at December 1, 2012, as compared to 5.07 percent at December 3, 2011 and 5.49 percent at November 27, 2010. Net periodic pension cost for a given fiscal year is based on assumptions developed at the end of the previous fiscal year. A discount rate reduction of 0.5 percentage points at December 1, 2012 would increase pension and other postretirement plan expense approximately \$280 (pre-tax) in fiscal 2013. Discount rates for non-U.S. plans are determined in a manner consistent with the U.S. plan.

The expected long-term rate of return on plan assets assumption for the U.S. pension plan was 8.00 percent in 2012 compared to 8.00 percent for 2011 and 7.90 for 2010. Our expected long-term rate of return on U.S. plan assets was based on our target asset allocation assumption of 60 percent equities and 40 percent fixed-income. Management, in conjunction with our external financial advisors, determines the expected long-term rate of return on plan assets by considering the expected future returns and volatility levels for each asset class that are based on historical returns and forward-looking observations. For 2012 the expected long-term rate of return on the target equities allocation was 9.0 percent and the expected long-term rate of return on the target fixed-income allocation was 5.5 percent. The total plan rate of return assumption included an estimate of the impact of diversification and the plan expense. A change of 0.5 percentage points for the expected return on assets assumption would impact U.S. net pension and other postretirement plan expense by approximately \$1,874 (pre-tax).

Management, in conjunction with our external financial advisors, uses the actual historical rates of return of the asset categories to assess the reasonableness of the expected long-term rate of return on plan assets.

The expected long-term rate of return on plan assets assumption for non-U.S. pension plans was a weighted-average of 6.08 percent in 2012. The expected long-term rate of return on plan assets assumption used in each non-U.S. plan is determined on a plan-by-plan basis for each local jurisdiction and is based on expected future returns for the investment mix of assets currently in the portfolio for that plan. Management, in conjunction with our external financial advisors, develops expected rates of return for each plan, considers expected long-term returns for each asset category in the plan, reviews expectations for inflation for each local jurisdiction, and estimates the impact of active management of the plan's assets. Our largest non-U.S. pension plans are in Germany and the United Kingdom respectively. The expected long-term rate of return on plan assets for Germany was 5.8 percent and the expected long-term rate of return on plan assets for the United Kingdom was

Table of Contents

6.6 percent. Management, in conjunction with our external financial advisors, uses actual historical returns of the asset portfolio to assess the reasonableness of the expected rate of return for each plan.

Assumed health care trend rates	2012	2011	2010
Health care cost trend rate assumed for next year	7.25%	7.25%	7.00%
Rate to which the cost trend rate is assumed to decline (the ultimate trend rate)	5.00%	5.00%	5.00%
Fiscal year that the rate reaches the ultimate trend rate	2018	2018	2015

Sensitivity Information: A one-percentage point change in the health care cost trend rate would have the following effects on the December 1, 2012 service and interest cost and the accumulated postretirement benefit obligation at December 1, 2012:

	One-Percentage Point	
	Increase	Decrease
Effect on service and interest cost components annual	\$ 3	\$ (3)
Effect on accumulated postretirement benefit obligation	\$ 49	\$ (46)

The asset allocation for the company's U.S. and non-U.S. pension plans at the end of 2011 and 2010 follows.

Plan Asset Management

Plan assets are held in trust and invested in mutual funds, separately managed accounts and other commingled investment vehicles holding U.S. and non-U.S. equity securities, fixed income securities and other investment classes. We employ a total return approach whereby a mix of equities and fixed income investments are used to maximize the long-term return of plan assets for a prudent level of risk. Futures and options may also be used to enhance risk-adjusted long-term returns while improving portfolio diversification and duration. Risk management is accomplished through diversification across asset classes, utilization of multiple investment managers and general plan-specific investment policies. Risk tolerance is established through careful consideration of the plan liabilities, plan funded status and our assessment of our overall liquidity position. This asset allocation policy mix is reviewed annually and actual versus target allocations are monitored regularly and rebalanced on an as-needed basis. Plan assets are invested using a combination of active and passive investment strategies. Passive, or indexed strategies, attempt to mimic rather than exceed the investment performance of a market benchmark. The plans' active investment strategies

Edgar Filing: FULLER H B CO - Form 10-K

employ multiple investment management firms which in aggregate cover a range of investment styles and approaches. Performance is monitored and compared to relevant benchmarks on a regular basis.

Table of Contents

The U.S. pension plans consist of two plans: a pension plan and a supplemental executive retirement plan (SERP). There were no assets in the SERP in 2012 and 2011. Consequently, all of the data disclosed in the asset allocation table for the U.S. pension plans pertain to our U.S. pension plan.

During 2012 we maintained our assets within the allowed ranges of the target asset allocation mix of 60 percent equities and 40 percent fixed income plus or minus 5 percent and continued our focus to reduce volatility of plan assets in future periods and to more closely match the duration of the assets with the duration of the liabilities of the plan. We plan to maintain the portfolio at this target allocation in 2013.

The non-U.S. pension plans consist of all the pension plans administered by us outside the U.S., principally consisting of plans in Germany, the United Kingdom and Canada. During 2012 we acquired plans in the United Kingdom, Germany and France. During 2012 we maintained our assets for the non-U.S. pension plans at the specific target asset allocation mix determined for each plan plus or minus the allowed rate to reduce volatility of plan assets in future periods and to more closely match the duration of the assets with the duration of the liabilities of the individual plans. We plan to maintain the portfolios at their respective target asset allocations in 2013. For plans acquired in 2012, we plan to review the portfolios and adjust target asset allocations as needed.

Other postretirement benefits plans consist of two U.S. plans: a retiree medical health care plan and a group term life insurance plan. There were no assets in the group term life insurance plan for 2012 and 2011. Consequently, all of the data disclosed in the asset allocation table for other postretirement plans pertain to our retiree medical health care plan. Our investment strategy for other postretirement benefit plans is to own insurance policies that maintain an asset allocation nearly completely in equities. These equities are invested in a passive portfolio indexed to the S&P 500. Our large weighting to equities in these plans is driven by the investment options available and the relative underfunded status of the plans.

Fair Value of Plan Assets

The following table presents plan assets categorized within a three-level fair value hierarchy as described in Note 14 to the Consolidated Financial Statements.

U.S. Pension Plans	Level 1	Level 2	Level 3	Total Assets
Equities	\$ 121,792	\$ 78,920	\$	\$ 200,712
Fixed income	51,994	76,445	516	128,955
Cash	2,641			2,641
Total	\$ 176,427	\$ 155,365	\$ 516	\$ 332,308
Non-U.S. Pension Plans	Level 1	Level 2	Level 3	Total Assets
Equities	\$ 30,086	\$ 48,651	\$	\$ 78,737
Fixed income	46,340	32,937	514	79,791
Real Estate			1,768	1,768
Cash	3,790			3,790
Total	\$ 80,216	\$ 81,588	\$ 2,282	\$ 164,086

Edgar Filing: FULLER H B CO - Form 10-K

Other Postretirement Benefits	Level 1	Level 2	Level 3	Total Assets
Insurance	\$	\$	\$ 42,001	\$ 42,001
Cash	568			568
Total	\$ 568	\$	\$ 42,001	\$ 42,569

The definitions of fair values of our pension and other postretirement benefit plan assets at December 1, 2012 by asset category are as follows:

Table of Contents

Equities Primarily publicly traded common stock for purposes of total return and to maintain equity exposure consistent with policy allocations. Investments include: (i) U.S. and non-U.S. equity securities and mutual funds valued at closing prices from national exchanges; and (ii) commingled funds valued at unit values or net asset values provided by the investment managers, which are based on the fair value of the underlying investments.

Fixed income Primarily corporate and government debt securities for purposes of total return and managing fixed income exposure to policy allocations. Investments include (i) mutual funds valued at closing prices from national exchanges, (ii) corporate and government debt securities valued at closing prices from national exchanges, (iii) commingled funds valued at unit values or net asset value provided by the investment managers, which are based on the fair value of the underlying investments, and (iv) an annuity contract, the value of which is determined by the provider and represents the amount the plan would receive if the contract were cashed out at year-end.

Real Estate Property fund for purposes of total return. Investment is a comingled property fund valued at unit value provided by the investment manager, which is based on a valuation performed by a third party provider retained by the investment manager.

Insurance Insurance contracts for purposes of funding postretirement medical benefits. Fair values are the cash surrender values as determined by the providers which are the amounts the plans would receive if the contracts were cashed out at year end.

Cash Cash balances on hand, accrued income and pending settlements of transactions for purposes of handling plan payments. Fair values are the cash balances as reported by the Trustees of the plans.

The following is a roll forward of the Level 3 investments of our pension and postretirement benefit plan assets during the year ended December 1, 2012:

U.S. Pension Plans	Fixed Income	Total
Level 3 balance at beginning of year	\$ 591	\$ 591
Purchases, sales, issuances and settlements, net	(75)	(75)

As a result of being a global enterprise, our earnings, cash flows and financial position are exposed to foreign currency risk from foreign currency denominated receivables and payables. These items are denominated in various foreign currencies, including the Euro, British pound sterling, Canadian dollar, Chinese renminbi, Japanese yen, Australian dollar, Swiss franc, Argentine peso, Brazilian real, Colombian peso, Mexican peso, Turkish lira, Egyptian pound, Indian rupee, and Malaysian ringgit.

Our objective is to balance, where possible, local currency denominated assets to local currency denominated liabilities to have a natural hedge and minimize foreign exchange impacts. We take steps to minimize risks from foreign currency exchange rate fluctuations through normal operating and financing activities and, when deemed appropriate, through the use of derivative instruments. We do not enter into any speculative positions with regard to derivative instruments.

We enter into derivative contracts with a group of investment grade multinational commercial banks. We evaluate the credit quality of each of these banks on a periodic basis as warranted.

Effective March 5, 2012, we entered into two cross-currency swap agreements to convert a notional amount of \$151,598 of foreign currency denominated intercompany loans into US dollars. One of the cross-currency swaps matures in 2014 and the other swap matures in 2015. As of December 1, 2012, the combined fair value of the swaps were an asset of \$1,610 and were included in other assets in the Consolidated Balance Sheets. The swaps were designated as cash-flow hedges for accounting treatment. The lesser amount between the cumulative change in the fair value of the actual swaps and the cumulative change in the fair value of hypothetical swaps is recorded in accumulated other comprehensive income in the Consolidated Balance Sheets. The difference between the cumulative change in the fair value of the actual swaps and the cumulative change in the fair value of hypothetical swaps are recorded as other income (expense), net in the Consolidated Statements of Income. In a perfectly effective hedge relationship, the two fair value calculations would exactly offset each other. Any difference in the calculation represents hedge ineffectiveness. The ineffectiveness calculations as of December 1, 2012 resulted in additional pre-tax loss of \$15 year-to-date as the change in fair value of the cross-currency swaps was less than the change in the fair value of the hypothetical swaps. The amount in accumulated other comprehensive income (loss) related to cross-currency swaps was a loss of \$394 at December 1, 2012. The estimated net amount of the existing loss that is reported in accumulated other comprehensive income at December 1, 2012 that is expected to be reclassified into earnings within the next twelve months is \$ 214. At December 1, 2012, we do not believe any gains or losses will be reclassified into earnings as a result of the discontinuance of these cash flow hedges because the original forecasted transaction will not occur.

The following table summarizes the cross-currency swaps outstanding as of December 1, 2012:

	Fiscal Year of Expiration	Interest Rate	Notional Value	Fair Value
Pay EUR	2014	4.15%	\$ 52,860	\$ 782
Receive USD		4.30%		
Pay EUR	2015	4.30%	\$ 98,738	\$ 828
Receive USD		4.45%		
Total			\$ 151,598	\$ 1,610

Edgar Filing: FULLER H B CO - Form 10-K

Except for the two cross currency swap agreements listed above, foreign currency derivative instruments outstanding are not designated as hedges for accounting purposes. The gains and losses related to mark-to-market adjustments are recognized as other income or expense in the income statement during the periods in which the derivative instruments are outstanding. See Note 14 to Consolidated Financial Statements for fair value amounts of these derivative instruments.

Table of Contents

As of December 1, 2012, we had forward foreign currency contracts maturing between December 7, 2012 and November 1, 2013. The mark-to-market effect associated with these contracts, on a net basis, at each year end was a loss of \$126, \$160 and \$1,419 in 2012, 2011 and 2010, respectively. These losses were largely offset by the underlying transaction gains and losses resulting from the foreign currency exposures for which these contracts relate.

During the first quarter of 2012, we entered into forward currency contracts maturing on March 5, 2012 to purchase 370,000 Swiss francs. Our objective was to economically hedge the purchase price for the pending acquisition of the global industrial adhesives business of Forbo Group after the purchase agreement was signed. The currency contracts were not designated as hedges for accounting purposes. At maturity the mark-to-market adjustments were a gain of \$11,621 which was recognized as a special charge, net in the Consolidated Statements of Income. See Note 5 to Consolidated Financial Statements.

As of December 3, 2011, we had a \$100,000 notional amount foreign currency option to exchange U.S. Dollars for Swiss francs. Our objective was to mitigate the exposure on exchange rates on a portion of the proposed purchase price for the pending acquisition of the global industrial adhesives business of Forbo Group. The fair value of this derivative was \$841. The currency option was not designated as a hedge for accounting purposes and expired on January 10, 2012. The related expense was recognized as a special charge, net in the Consolidated Statements of Income. See Note 5 to Consolidated Financial Statements.

We have interest rate swap agreements to convert \$75,000 of our Senior Notes to variable interest rates. See Note 8 to Consolidated Financial Statements for additional information. The change in fair value of the Senior Notes, attributable to the change in the risk being hedged, was a liability of \$8,862 at December 1, 2012 and \$7,111 at December 3, 2011 and were included in long-term debt in the Consolidated Balance Sheets. The fair value of the swaps in total was an asset of \$9,473 at December 1, 2012 and \$7,360 at December 3, 2011 and were included in other assets in the Consolidated Balance Sheets. The swaps were designated for hedge accounting treatment as fair value hedges.

The changes in the fair value of the swap and the fair value of the Senior Notes attributable to the change in the risk being hedged are recorded as other income (expense), net in the Consolidated Statements of Income. In a perfectly effective hedge relationship, the two fair value calculations would exactly offset each other. Any difference in the calculation represents hedge ineffectiveness. The calculations as of December 1, 2012, December 3, 2011 and November 27, 2010 resulted in additional year-to-date pre-tax gains of \$362, \$456 and \$81, respectively as the fair value of the interest rate swaps increased by more than the change in the fair value of the Senior Notes attributable to the change in the risk being hedged.

Concentrations of credit risk with respect to trade accounts receivable are limited due to the large number of entities in the customer base and their dispersion across many different industries and countries. As of December 1, 2012, there were no significant concentrations of credit risk.

Note 13: Commitments and Contingencies

Leases: The minimum lease payments, related to buildings, equipment and vehicles, that are expected to be made in each of the years indicated based on operating leases in effect at December 1, 2012 are:

Fiscal Year	2013	2014	2015	2016	2017	Remainder	Total
-------------	------	------	------	------	------	-----------	-------

Edgar Filing: FULLER H B CO - Form 10-K

								Minimum Lease Payments
Operating Leases	\$ 7,613	\$ 4,245	\$ 2,813	\$ 1,392	\$ 436	\$	822	\$ 17,321

Rent expense for all operating leases, which includes minimum lease payments and other charges such as common area maintenance fees, was \$11,117, \$7,730 and \$7,194 in 2012, 2011 and 2010, respectively.

Table of Contents

Servicing Agreement: In 2005, we entered into an agreement to provide us with information technology services. The agreement is scheduled to run through 2014. Actual expenditures under the agreement for the years ended December 1, 2012, December 3, 2011 and November 27, 2010 were \$4,959, \$6,146 and \$6,506, respectively. Of the costs incurred, \$47, \$50 and \$29 were capitalized in 2012, 2011 and 2010, respectively. The future contractual obligations in each of the years indicated based on the contract in place at December 1, 2012 are:

Fiscal Year	2013	2014	Total Contractual Obligations
Servicing Agreement	\$ 3,594	\$ 1,280	\$ 4,874

Environmental Matters. From time to time, we are identified as a potentially responsible party (PRP) under the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) and/or similar state laws that impose liability for costs relating to the clean up of contamination resulting from past spills, disposal or other release of hazardous substances. We are also subject to similar laws in some of the countries where current and former facilities are located. Our environmental, health and safety department monitors compliance with applicable laws on a global basis.

Currently we are involved in various environmental investigations, clean up activities and administrative proceedings and lawsuits. In particular, we are currently deemed a PRP in conjunction with numerous other parties, in a number of government enforcement actions associated with hazardous waste sites. As a PRP, we may be required to pay a share of the costs of investigation and clean up of these sites. In addition, we are engaged in environmental remediation and monitoring efforts at a number of current and former operating facilities, including remediation of environmental contamination at our Sorocaba, Brazil facility. Soil and water samples were collected on and around the Sorocaba facility, and test results indicated that certain contaminants, including carbon tetrachloride and other solvents, exist in the soil and in the groundwater at both the Sorocaba facility and some neighboring properties. We are continuing to work with Brazilian regulatory authorities to implement and operate a remediation system at the site. As of December 1, 2012, \$543 was recorded as a liability for our best estimate of expected remediation expenses remaining for this site. Depending on the results of the testing of our current remediation actions, it is reasonably possible that we may be required to record additional liabilities related to remediation costs at the Sorocaba facility. Based on our analysis, the high end of our range for reasonably possible projected costs to remediate the Sorocaba site is \$836, inclusive of the existing accrual of \$543.

From time to time, we become aware of compliance matters relating to, or receive notices from, federal, state or local entities regarding possible or alleged violations of environmental, health or safety laws and regulations. We review the circumstances of each individual site, considering the number of parties involved, the level of potential liability or contribution of us relative to the other parties, the nature and magnitude of the hazardous substances involved, the method and extent of remediation, the estimated legal and consulting expense with respect to each site and the time period over which any costs would likely be incurred. To the extent we can reasonably estimate the amount of our probable liabilities for environmental matters, we establish a financial provision. As of December 1, 2012, we had reserved \$1,920, which represents our best estimate of probable liabilities with respect to environmental matters, inclusive of the accrual related to the Sorocaba facility as described above. It is reasonably possible that we may have additional liabilities related to these known environmental matters. The high end of our range for reasonably possible projected costs to remediate all known environmental matters is \$2,549, inclusive of the existing accrual of \$1,920. However, the full extent of our future liability for environmental matters is difficult to predict because of uncertainty as to the cost of investigation and clean up of the sites, our responsibility for such hazardous substances and the number of and financial condition of other potentially responsible parties.

While uncertainties exist with respect to the amounts and timing of the ultimate environmental liabilities, based on currently available information, we have concluded that these matters, individually or in the aggregate, will not have a material adverse effect on our results of operations, financial condition or cash flow.

Table of Contents

Other Legal Proceedings. From time to time and in the ordinary course of business, we are a party to, or a target of, lawsuits, claims, investigations and proceedings, including product liability, personal injury, contract, patent and intellectual property, health and safety and employment matters. While we are unable to predict the outcome of these matters, we have concluded, based upon currently available information, that the ultimate resolution of any pending matter, individually or in the aggregate, including the asbestos litigation described in the following paragraphs, will not have a material adverse effect on our results of operations, financial condition or cash flow.

We have been named as a defendant in lawsuits in which plaintiffs have alleged injury due to products containing asbestos manufactured more than 25 years ago. The plaintiffs generally bring these lawsuits against multiple defendants and seek damages (both actual and punitive) in very large amounts. In many cases, plaintiffs are unable to demonstrate that they have suffered any compensable injuries or that the injuries suffered were the result of exposure to products manufactured by us. We are typically dismissed as a defendant in such cases without payment. If the plaintiff presents evidence indicating that compensable injury occurred as a result of exposure to our products, the case is generally settled for an amount that reflects the seriousness of the injury, the length, intensity and character of exposure to products containing asbestos, the number and solvency of other defendants in the case, and the jurisdiction in which the case has been brought.

A significant portion of the defense costs and settlements in asbestos-related litigation continues to be paid by third parties, including indemnification pursuant to the provisions of a 1976 agreement under which we acquired a business from a third party. Historically, this third party routinely defended all cases tendered to it and paid settlement amounts resulting from those cases. In the 1990s, the third party sporadically reserved its rights, but continued to defend and settle all asbestos-related claims tendered to it by us. In 2002, the third party rejected the tender of certain cases and indicated it would seek contributions for past defense costs, settlements and judgments. However, this third party is defending and paying settlement amounts, under a reservation of rights, in most of the asbestos cases tendered to the third party. As discussed below, during the fourth quarter of 2007, we and a group of other defendants, including the third party obligated to indemnify us against certain asbestos-related claims, entered into negotiations with certain law firms to settle a number of asbestos-related lawsuits and claims.

In addition to the indemnification arrangements with third parties, we have insurance policies that generally provide coverage for asbestos liabilities (including defense costs). Historically, insurers have paid a significant portion of our defense costs and settlements in asbestos-related litigation. However, certain of our insurers are insolvent. We have entered into cost-sharing agreements with our insurers that provide for the allocation of defense costs and, in some cases, settlements and judgments, in asbestos-related lawsuits. Under these agreements, we are required in some cases to fund a share of settlements and judgments allocable to years in which the responsible insurer is insolvent. In addition, to delineate our rights under certain insurance policies, in October 2009, we commenced a declaratory judgment action against one of our insurers in the United States District Court for the District of Minnesota. Additional insurers have been brought into the action to address issues related to the scope of their coverage.

As referenced above, during the fourth quarter of 2007, we and a group of other defendants entered into negotiations with certain law firms to settle a number of asbestos-related lawsuits and claims over a period of years. In total, we had expected to contribute up to \$4,114, based on a present value calculation, towards the settlement amounts to be paid to the claimants in exchange for full releases of claims. Of this amount, our insurers had committed to pay \$2,043 based on the probable liability of \$4,114. Our contributions toward settlements from the time of the agreement through the end of fiscal year 2011 were \$2,224 with insurers paying \$1,243 of that amount. Based on this experience we reduced our reserves in the fourth quarter of 2011 to an undiscounted amount of \$250 with insurers expected to pay \$159. There were no contributions or insurance payments during 2012, therefore our reserves for this agreement and our insurance receivable remained unchanged from the previous year-end. These amounts represent our best estimate for the settlement amounts yet to be paid related to this agreement. Our reserve is recorded on an undiscounted basis.

Table of Contents

In addition to the group settlement referenced above, a summary of the number of and settlement amounts for asbestos-related lawsuits and claims is as follows:

	Year Ended December 1, 2012	Year Ended December 3, 2011	Year Ended November 27, 2010
Lawsuits and claims settled	9	7	4
Settlement amounts	\$ 540	\$ 537	\$ 458
Insurance payments received or expected to be received	\$ 391	\$ 417	\$ 366

We do not believe that it would be meaningful to disclose the aggregate number of asbestos-related lawsuits filed against us because relatively few of these lawsuits are known to involve exposure to asbestos-containing products that we manufactured. Rather, we believe it is more meaningful to disclose the number of lawsuits that are settled and result in a payment to the plaintiff.

To the extent we can reasonably estimate the amount of our probable liabilities for pending asbestos-related claims, we establish a financial provision and a corresponding receivable for insurance recoveries. As of December 1, 2012, our probable liabilities and insurance recoveries related to asbestos claims, excluding those related to the group settlement discussed above, were \$219 and \$201, respectively. These amounts relate to three pending cases and three settled cases for which final insurance payouts have not yet been made. We have concluded that it is not possible to reasonably estimate the cost of disposing of other asbestos-related claims (including claims that might be filed in the future) due to our inability to project future events. Future variables include the number of claims filed or dismissed, proof of exposure to our products, seriousness of the alleged injury, the number and solvency of other defendants in each case, the jurisdiction in which the case is brought, the cost of disposing of such claims, the uncertainty of asbestos litigation, insurance coverage and indemnification agreement issues, and the continuing solvency of certain insurance companies.

Based on currently available information, we have concluded that the resolution of any pending matter, including asbestos-related litigation, individually or in the aggregate, will not have a material adverse effect on our results of operations, financial condition or cash flow.

Table of Contents**Note 14: Fair Value Measurements**

The following table presents information about our financial assets and liabilities that are measured at fair value on a recurring basis as of December 1, 2012 and December 3, 2011, and indicates the fair value hierarchy of the valuation techniques utilized to determine such fair value. The hierarchy is broken down into three levels. Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities. Level 2 inputs include data points that are observable such as quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, and inputs (other than quoted prices) such as interest rates and yield curves that are observable for the asset or liability, either directly or indirectly. Level 3 inputs are unobservable data points for the asset or liability, and include situations where there is little, if any, market activity for the asset or liability.

Description	December 1, 2012	Fair Value Measurements Using:		
		Level 1	Level 2	Level 3
Assets:				
Marketable securities	\$ 15,499	\$ 15,499	\$	\$
Derivative assets	830		830	
Interest rate swaps	9,473		9,473	
Cash-flow hedges	1,610		1,610	
Liabilities:				
Derivative liabilities	\$ 956	\$	\$ 956	\$
Contingent consideration liabilities, continuing operations	1,649			1,649
Contingent consideration liabilities, discontinued operations	5,000			5,000

Description	December 3, 2011	Fair Value Measurements Using:		
		Level 1	Level 2	Level 3
Assets:				
Marketable securities	\$ 76,114	\$ 76,114	\$	\$
Derivative assets	1,862		1,862	
Interest rate swaps	7,360		7,360	
Liabilities:				
Derivative liabilities	\$ 1,181	\$	\$ 1,181	\$
Contingent consideration liabilities	1,893			1,893

We measure certain assets at fair value on a nonrecurring basis. These assets include assets acquired and liabilities assumed in an acquisition and tangible and intangible assets and cost basis investments that are written down to fair value when they are determined to be impaired. During 2012, we determined that the fair values of two of our cost basis investments were lower than the investment values on our balance sheet. As a result, we recorded an impairment charge of \$1,517.

During 2011, we discontinued production of the polymers used in certain resin products that had been produced in our EIMEA operating segment. As a result, we performed an impairment test on the non-amortizable trademarks and trade names used in resin products. In accordance with accounting standards, we calculated the fair value using a discounted cash flow approach. As a result of this analysis, we recorded an impairment charge of \$332 related to the impairment of non-amortizable trademarks and trade names used in the abandoned resin products.

Note 15: Operating Segments

Edgar Filing: FULLER H B CO - Form 10-K

We are required to report segment information in the same way that management internally organizes its business for assessing performance and making decisions regarding allocation of resources. We evaluate the performance

Table of Contents

of each of our operating segments based on segment operating income, which is defined as gross profit less selling, general and administrative (SG&A) expenses. Segment operating income excludes special charges, net and asset impairment charges. Corporate expenses are fully allocated to each operating segment. Corporate assets are not allocated to the segments. Inter-segment revenues are recorded at cost plus a markup for administrative costs. Operating results of each of these segments are regularly reviewed by our chief operating decision maker to make decisions about resources to be allocated to the segments and assess their performance.

The business components within each operating segment are managed to maximize the results of the overall operating segment rather than the results of any individual business component of the operating segment. Results of individual components of each operating segment are subject to numerous allocations of segment-wide costs that may or may not have been focused on that particular component for a particular reporting period. The costs for these allocated resources are not tracked on a where-used basis as financial performance is assessed at the total operating segment level.

After the sale of our Central America Paints business in 2012, we now have five reportable segments: North America Adhesives, Construction Products, EIMEA, Latin America Adhesives and Asia Pacific. Prior periods have been restated for the removal of our Latin America Paints operating segment which is now considered discontinued operations. Corporate expenses, which are fully allocated to each operating segment, have been reallocated to the remaining reportable operating segments.

The net revenue, inter-segment sales, segment operating income depreciation and amortization, total assets and capital expenditures of the industrial adhesives business, acquired in the second quarter of 2012, was recorded in our North America Adhesives, EIMEA, Latin America Adhesives and Asia Pacific operating segments.

Reportable operating segment financial information for all periods presented follows:

	2012	2011	2010
Net revenue			
North America Adhesives	\$ 682,981	\$ 489,903	\$ 445,081

Note 16: Redeemable Non-Controlling Interest

We account for the non-controlling interest in H.B. Fuller Kimya Sanayi Ticaret A.S. (HBF Kimya) as a redeemable non-controlling interest because both the non-controlling shareholder and H.B. Fuller have an option, exercisable beginning August 1, 2018, to require the redemption of the shares owned by the non-controlling shareholder at a price determined by a formula based on 24 months trailing EBITDA. Since the option makes the redemption of the non-controlling ownership shares of HBF Kimya outside of our control, these shares are classified as a redeemable non-controlling interest in temporary equity in the Consolidated Balance Sheets. The option is subject to a minimum price of 3,500. The redemption value of the option, if it were currently redeemable, is estimated to be 3,500.

HBF Kimya's results of operations are consolidated in our financial statements. Both the non-controlling interest and the accretion adjustment to redemption value are included in income or loss attributable to non-controlling interests in the Consolidated Statements of Income and in the carrying value of the redeemable non-controlling interest on the Consolidated Balance Sheets. HBF Kimya's functional currency is the Turkish lira and changes in exchange rates will affect the reported amount of the redeemable non-controlling interest. As of December 1, 2012 the redeemable non-controlling interest was:

Balance of Redeemable Non-controlling Interest at December 3, 2011	\$ 3,887
Net Income (loss) attributed to Redeemable Non-controlling Interest	208
Accretion adjustment to redemption value	1
Foreign currency translation adjustment	(115)
Balance of Redeemable Non-controlling Interest at December 1, 2012	\$ 3,981

As of December 3, 2011 the redeemable non-controlling interest was:

Edgar Filing: FULLER H B CO - Form 10-K

Initial measurement of Redeemable Non-controlling Interest	\$ 4,199
Net Income (loss) attributed to Redeemable Non-controlling Interest	16
Accretion adjustment to redemption value	26
Foreign currency translation adjustment	(354)
Balance of Redeemable Non-controlling Interest at December 3, 2011	\$ 3,887

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

None.

Item 9A. Controls and Procedures

Controls and Procedures

As of the end of the period covered by this report, we conducted an evaluation, under the supervision and with the participation of our president and chief executive officer and senior vice president, chief financial officer, of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934 (Exchange Act)). Based on this evaluation, the president and chief executive officer and the senior vice president, chief financial officer concluded that, as of December 1, 2012, our disclosure controls and procedures were effective (1) to ensure that information required to be disclosed by us in reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the SEC's rules and forms and (2) to ensure that information required to be disclosed by us in the reports that we file or submit under the Exchange Act is accumulated and communicated to us, including our principal executive and principal financial officers, as appropriate to allow timely decisions regarding required disclosure.

Changes in Internal Control over Financial Reporting

We acquired the industrial adhesives business of Forbo Holding AG in the second quarter of 2012 and it represented approximately 27 percent of our total assets as of December 1, 2012. In the fourth quarter of 2012, we expanded the scope of our assessment of the effectiveness of internal control over financial reporting to include the acquired business. There were no other changes in our internal control over financial reporting (as defined in Rule 13a-15(f) under the Exchange Act) during our most recently completed fiscal quarter that have materially affected or are reasonably likely to materially affect our internal control over financial reporting.

Management's Report on Internal Control over Financial Reporting

The management of H.B. Fuller Company is responsible for establishing and maintaining adequate internal control over financial reporting. H.B. Fuller Company's internal control system was designed to provide reasonable assurance to the company's management and the board of directors regarding the preparation and fair presentation of published financial statements.

All internal control systems, no matter how well designed, have inherent limitations. Therefore, even those systems determined effective can provide only reasonable assurance with respect to financial statement preparation and presentation.

H.B. Fuller Company management assessed the effectiveness of the company's internal control over financial reporting as of December 1, 2012. In making this assessment, it used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in *Internal Control - Integrated Framework*. Based on the assessment management believes that, as of December 1, 2012, the company's internal control over financial reporting was effective based on those criteria.

H.B. Fuller Company's Independent Registered Public Accounting Firm has issued an attestation report on the effectiveness of the company's internal control over financial reporting. This report appears on page 46.

Attestation Report of the Registered Public Accounting Firm

The report on the effectiveness of the company's internal control over financial reporting issued by KPMG LLP, the company's Independent Registered Public Accounting Firm, appears on page 46.

Item 9B. Other Information

None.

PART III

Item 10. Directors, Executive Officers and Corporate Governance

The information under the headings Proposal 1 Election of Directors, Section 16(a) Beneficial Ownership Reporting Compliance, and Corporate Governance Audit Committee contained in the company's Proxy Statement for the Annual Meeting of Shareholders to be held on April 11, 2013 (the 2013 Proxy Statement) is incorporated herein by reference.

The information contained at the end of Item 1. hereof under the heading Executive Officers of the Registrant is incorporated herein by reference.

Since the date of our 2012 Proxy Statement, there have been no material changes to the procedures by which shareholders may recommend nominees to our Board of Directors.

The company has a code of business conduct applicable to all of its directors and employees, including its principal executive officer, principal financial officer, principal accounting officer, controller and other employees performing similar functions. A copy of the code of business conduct is available under the Investor Relations section of the company's website at www.hbfuller.com. The company intends to disclose on its website information with respect to any amendment to or waiver from a provision of its code of business conduct that applies to its principal executive officer, principal financial officer, principal accounting officer, controller and other employees performing similar functions within four business days following the date of such amendment or waiver.

Item 11. Executive Compensation

The information under the headings Executive Compensation, and Director Compensation contained in the 2013 Proxy Statement is incorporated herein by reference.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters

The information under the headings Security Ownership of Certain Beneficial Owners and Management and Equity Compensation Plan Information contained in the 2013 Proxy Statement is incorporated herein by reference.

Item 13. Certain Relationships and Related Transactions and Director Independence

The information under the headings Certain Relationships and Related Transactions and Corporate Governance Director Independence contained in the 2013 Proxy Statement is incorporated herein by reference.

Item 14. Principal Accountant Fees and Services

The information under the heading "Fees Paid to Independent Registered Public Accounting Firm" contained in the 2013 Proxy Statement is incorporated herein by reference.
