**Table of Contents****3. Projections for the Fiscal Year Ending March 31, 2013**

(From April 1, 2012 to March 31, 2013)

	Millions of yen except per share amounts The full fiscal year	
		Changes
Net sales	1,920,000	(3.1)%
Operating income	230,000	(10.3)%
Income before income taxes and equity in earnings of affiliated companies	222,000	(11.1)%
Net income attributable to Komatsu Ltd.	138,000	(17.4)%
Net income attributable to Komatsu Ltd. per share (basic) (Yen)	¥ 144.91	

Notes: 1) Changes in the projected consolidated business results as of January 29, 2013: Yes

2) Percentages shown above represent the rates of change compared with the corresponding period a year ago.

**4. Others**

- (1) Changes in important subsidiaries during the nine months period under review: None
- (2) Use of simplified accounting procedures and adoption of specific accounting procedures for the preparation of consolidated quarterly financial statements: None
- (3) Changes in Significant Accounting Rules, Procedures and Presentation and Changes in Significant Accounting Policies and Estimates
  - 1) Changes in accounting policies due to the revision of accounting standards and other regulations: Yes The Company adopted the Accounting Standards Update (ASU) 2011-05, Presentation of Comprehensive Income, starting in the nine months period of FY2012, ending March 31, 2013. The Update requires an entity to report comprehensive income either in a single continuous financial statement (one-statement approach) or in two separate but consecutive statements (two-statement approach). Concerning ASU2011-12, Deferral of the Effective Date for Amendments to the Presentation of Reclassifications of Items out of Accumulated Other Comprehensive Income in ASU 2011-05, however, the effective date for amendments to the presentation of reclassification of items out of other comprehensive income has been deferred. ASU2011-05 being a disclosure regulation, such adoption did not have any impact on the Company's financial position and results of operations.
  - 2) Changes in other matters except for 1) above: None
- (4) Number of common shares outstanding
  - 1) The numbers of common shares issued (including treasury stock) were as follows:  
As of December 31, 2012: 983,130,260 shares

## Edgar Filing: KOMATSU LTD - Form 6-K

As of March 31, 2012: 983,130,260 shares

2) The numbers of shares of treasury were as follows:

As of December 31, 2012: 30,807,900 shares

As of March 31, 2012: 30,869,238 shares

3) The weighted average numbers of common shares outstanding were as follows:

Nine Months ended December 31, 2012: 952,321,093 shares

Nine Months ended December 31, 2011: 966,471,670 shares

**Table of Contents**
**Management Performance and Financial Conditions****(1) Outline of Operations and Business Results**

Under the Global Teamwork for Tomorrow mid-range management plan for three years, to be completed in the fiscal year ending March 31, 2013, Komatsu Ltd. ( Company ) and its consolidated subsidiaries (together Komatsu ) are focusing efforts on 1) promotion of ICT (Information and Communication Technology) applications to products and parts, 2) further advancement of environmental friendliness and safety in machine performance, 3) expansion of sales and service operations in Strategic Markets, and 4) promotion of continuous Kaizen (improvement) by strengthening workplace capability.

For the nine-month period (April 1 – December 31, 2012) of the fiscal year ending March 31, 2013, consolidated net sales declined by 6.8% from the corresponding period a year ago, to JPY1,350.5 billion (USD15,524 million, at USD1=JPY87). In the construction, mining and utility equipment business, total sales of construction equipment declined, as sales in China dropped to about half from the corresponding period a year ago. Meanwhile, sales increased in North America and Japan. With respect to mining equipment, while sales declined in Indonesia, as adversely affected by the falling price of coal, total sales increased, supported by steady sales, albeit on a softening note, of equipment for use in mines other than coal, as well as parts and service. All combined, however, nine-month sales in this business segment decreased from the corresponding period a year ago, as increased sales of mining equipment, parts and service fell short of compensating for lowered sales of construction equipment. In the industrial machinery and others business, while sales of large presses to the automobile manufacturing industry, as well as machine tools for use in automotive engine production, increased from the corresponding period a year ago, those of wire saws for use in slicing silicon ingots for the solar cell market sharply fell. As a result, nine-month sales in this business segment declined from the corresponding period a year ago.

With respect to profits, Komatsu focused continuous efforts to improve selling prices and production costs. Affected by a big drop in sales volume from the corresponding period a year ago, nine-month sales declined in both businesses of construction, mining and utility equipment as well as industrial machinery and others. Operating income declined by 21.6% from the corresponding period a year ago, to JPY150.4 billion (USD1,730 million) for the nine-month period under review. Operating income ratio decreased by 2.1 points to 11.1%, and income before income taxes and equity in earnings of affiliated companies declined by 21.6% to JPY145.5 billion (USD1,673 million). Net income attributable to Komatsu Ltd. amounted to JPY91.0 billion (USD1,047 million), a decline of 29.6% from the corresponding period a year ago.

Note: Sales and profit figures in this report show the respective sums of nine months from April 1 to December 31, 2012. Unless otherwise noted, all sales by segment in this report indicate the amounts before elimination of inter-segment transactions.

Business results by operation are described below.

**Construction, Mining and Utility Equipment**

With respect to construction equipment, while demand increased in North America and Japan from the corresponding period a year ago, Chinese demand for hydraulic excavators dropped to about half. As a result, global demand downturned in the nine-month period under review. On the mining equipment market, while demand for equipment declined centering on Indonesia, as adversely affected by the falling price of coal, demand increased steadily for equipment for use in mines other than coal, albeit on a softening note, parts and service from the corresponding period a year ago. With this background, consolidated net sales of construction, mining and utility equipment decreased by 4.8% from the corresponding nine-month period a year ago, to JPY1,207.6 billion (USD13,881 million). Segment profit declined by 17.1% to JPY148.3 billion (USD1,706 million).

To further reinforce its corporate strength, Komatsu continued efforts to improve selling prices, production costs and operations designed to flexibly respond to changes in foreign exchange rates and market demand. Komatsu also worked to reinforce its aftermarket business by improving its strategic parts operation which includes buckets and teeth, the demand for which is strong, especially in Strategic Markets and the mining industry, as well as its Reman and rebuild operations. In addition, Komatsu embarked on full-scale efforts to cut down power consumption at all plants in Japan during the current fiscal year.

With respect to products, following North America and Europe, Komatsu launched new emission standards-compliant models in Japan in July last year. Combined with these models, Komatsu began offering the KOMATSU CARE, a new service program designed to reduce the total lifecycle costs of these models and prolong their use. In October 2012, Komatsu introduced new emission standards-compliant models in Japan,

while continuing efforts to step up sales of HB205 and HB215LC hybrid hydraulic excavators around the world.

**Table of Contents**

[Sales to Outside Customers of Construction, Mining and Utility Equipment by Region]

<b>Total</b>	<b>1,205,655</b>	<b>1,265,104</b>	<b>(59,449)</b>	<b>(4.7)%</b>

\* Excluding Japan and China

Komatsu's operations by region are described below.

**Japan**

As the volume of used equipment in surplus exported from Japan, which had outnumbered demand for new equipment since around 2000, has bottomed out, demand has grown for construction equipment for use in restoration and reconstruction, centering on rental companies, since the Great East Japan Earthquake. As a result, demand steadily increased and nine-month sales increased from the corresponding period a year ago. Following new emission standards-compliant models launched in July 2012, Komatsu introduced new models in October to expand sales, while making proactive after-sales service efforts based on the KOMATSU CARE. In December 2012, Komatsu achieved cumulative sales of 1,000 hybrid hydraulic excavators in Japan.

**Americas**

In North America, demand increased from the corresponding period a year ago, supported by increased demand in the housing sector as well as strong demand in the rental and energy development industries. Komatsu has successfully been introducing new emission standards-compliant models and has generated effective results from service activities based on the KOMATSU CARE.

In Latin America, demand for mining equipment remained strong, centering on copper mines in Chile and Peru, while demand for construction equipment softened in Brazil, the largest market of the region. As a result, overall demand for equipment was steady, and nine-month sales in the Americas advanced from the corresponding period a year ago.

**Europe & CIS**

While economic uncertainty prevailed against the backdrop of sovereign-debt problems, demand increased steadily, albeit on a softening note, from the corresponding nine-month period a year ago in the major markets of Germany, France and the United Kingdom. In CIS, demand remained firm, especially in gold mines, as well as civil engineering and construction. However, as the Japanese yen appreciated higher against the euro than the corresponding period a year ago, sales in Europe and CIS decreased for the nine-month period under review.

## **Table of Contents**

In Europe, Komatsu continued efforts to expand sales of new emission standards-compliant models. In CIS, Komatsu has reached agreements with Pacific National University and Far Eastern Federal University to collaborate in human resource development for construction, mining and road construction equipment. In October 2012, Pacific National University began the first course.

### **China**

Although the government introduced credit easing measures, there were still no clear signs for new infrastructure development start-ups in the nine-month period under review. Demand for hydraulic excavators plunged to about half from the corresponding period a year ago, and nine-month sales dropped drastically.

In response to this sharp decline in demand, Komatsu focused its efforts on maintaining an appropriate level of inventories, mainly by maximizing the use of the KOMTRAX (Komatsu Machine Tracking System). As there are some signs of demand bottoming out, Komatsu has geared production to promptly increase production in response to the post Chinese New Year sales season in February this year.

### **Asia & Oceania**

In Asia, while demand advanced for use in the reconstruction of areas damaged by the flood last year in Thailand, demand remained sluggish for large, medium-sized small equipment for use in mines, particularly affected by the falling price of thermal coal in Indonesia, the largest market of Southeast Asia. In Australia, demand for large equipment for use in iron ore mines, as well as for construction equipment, remained steady. However, nine-month sales in Asia & Oceania decreased from the corresponding period a year ago, due to a large decline of sales in Asia.

### **Middle East & Africa**

Nine-month sales in the Middle East & Africa declined from the corresponding period a year ago, as demand slowed down for equipment for use in mines in Africa, as adversely affected by the falling price of minerals, coupled with political and social instability remaining in certain countries and regions. While demand for mining equipment remained steady, mainly in Africa, unstable political conditions continued in some countries.

In the Middle East, Komatsu opened a new distribution base in Dubai in October 2012 and promoted efforts to reduce its distributors' inventories and shorten delivery time. In Africa, Komatsu continued to strengthen its sales and product support operations by launching KOMTRAX-installed models and by opening parts depots jointly with its distributors in southern Africa.

### **Industrial Machinery and Others**

Sales of large presses to the automobile manufacturing industry, as well as machine tools for use in automotive engine production, increased for the nine-month period under review. Meanwhile, sales of wire saws for use in slicing silicon ingots for solar cells dropped sharply from the corresponding period a year ago. Extraordinary demand for temporary housing units came to an end. As a result, nine-month sales of the industrial machinery and others business declined by 20.5% from the corresponding period a year ago, to JPY150.6 billion (USD1,731 million). Segment profit decreased by 77.1% to JPY3.8 billion (USD44 million).

In the sheet-metal machinery business, by anticipating a growing market for laser cutting machines, Komatsu has developed a new fiber laser cutting machine which features an outstanding reduction of running costs, compact size and a built-in KOMTRAX.

---

**Table of Contents**
**(2) Financial Conditions**

As of December 31, 2012, total assets increased by JPY51.5 billion, to JPY2,372.1 billion (USD27,266 million) from the previous fiscal year-end, mainly due to the Japanese yen's higher appreciation compared to the previous fiscal year-end. Interest-bearing debt decreased by JPY56.3 billion from the previous fiscal year-end, to JPY704.1 billion (USD8,094 million). Komatsu Ltd. shareholders' equity increased by JPY84.4 from the previous fiscal year-end, to JPY1,094.1 billion (USD12,576 million). As a result, Komatsu Ltd. shareholders' equity ratio increased by 2.6 percentage points from the previous fiscal year-end, to 46.1 %. Net debt-to-equity ratio\* remained flat at 0.56 from the previous fiscal year-end.

\* *Net debt-to-equity ratio = (Interest-bearing debt - Cash and cash equivalents - Time deposits) / Komatsu Ltd. shareholders' equity*

For the nine-month period under review, net cash provided by operating activities totaled JPY129.0 billion (USD1,484 million), an increase of JPY68.2 billion from JPY60.8 billion for the corresponding period a year ago, mainly due to decreased use of working capital. Net cash used in investing activities amounted to JPY101.7 billion (USD1,170 million), an increase of JPY3.5 billion from the corresponding period a year ago, mainly due to the purchase of fixed assets and a manufacturer of forest machine attachments. Net cash used in financing activities amounted to JPY14.8 billion (USD171 million), compared to JPY62.0 billion for net cash provided for the corresponding period a year ago, mainly due to the payment of cash dividends. After adding the effects of foreign exchange rate fluctuations, cash and cash equivalents, as of December 31, 2012, totaled JPY95.0 billion (USD1,092 million), an increase of JPY11.9 billion from the previous fiscal year-end.

**(3) Projections for the Fiscal Year Ending March 31, 2013**

(From April 1, 2012 to March 31, 2013)

In the construction, mining and utility equipment business, Komatsu projects that demand of large, medium-sized and small equipment for use in mines in Indonesia, where Komatsu enjoys a large market share, will come under the estimation, as adversely affected by the falling price of thermal coal. In this light, Komatsu assumes that sales for the current fiscal year will fall short of the projection of July 31, 2012. Similarly, with respect to profits, while Komatsu can expect to benefit from effects of the Japanese yen's on-going depreciation in the fourth quarter period (January 1 - March 31, 2013), Komatsu predicts profits for the current fiscal year will be below the projections, as adverse effects of declined full-year volume of sales are considerable. Based on these conditions, Komatsu revises the projections of both consolidated net sales and profits for the fiscal year ending March 31, 2013 (April 1, 2012 - March 31, 2013) as follows.

Komatsu also revises the foreign exchange rates in the fourth quarter of the current fiscal year, which are preconditions for the current projections, as follows: USD1 = JPY88, EUR1 = JPY115 and RMB1 = JPY14.1. These rates translate into USD1 = JPY82, EUR1 = JPY106 and RMB1 = JPY13.0 as full-year average rates.

(For the previous projections: USD1 = JPY79, EUR1 = JPY99 and RMB1 = JPY12.6)

**Table of Contents**

## Consolidated Business Results

	Millions of yen except per share amounts				Results for FY ended March 31, 2012

**[Reference]****Projections of the Company for the Fiscal Year Ending March 31, 2013**

Similar to the revised projections for consolidated business results above, while the Company can expect to benefit from effects of the Japanese yen's on-going depreciation in the fourth quarter period (January 1 – March 31, 2013), it revises both net sales and profits of the projections of July 31, 2012 for non-consolidated business results for the fiscal year ending March 31, 2013 (April 1, 2012 – March 31, 2013) as follows. The current revision mainly reflects curtailed exports of construction and mining equipment from Japan against the backdrop of dropped sales in Indonesia and China.

## Non-consolidated Business Results

	Millions of yen except per share amounts				Results for FY ended March 31, 2012
