Annual Incentive Award

The annual incentive awards are cash awards tied to the financial performance of the Company using both earnings and corporate strategic and operational measures. For each of Messrs. Bernfield, Insoft and Lyman, 75% of the award will be tied to the Company's AFFO and 25% of the award will be tied to Strategic and Operational Performance. For Mr. Kovitz 50% of the award will be tied to AFFO, 30% of the award will be tied to Strategic and Operational Performance and 20% of the award will be tied to Individual MBOs (Management by Objectives).

As used herein, AFFO is the diluted FFO per share as defined by NAREIT, adjusted to exclude costs incurred in connection with the repayment of debt and non-cash interest on the exchangeable debentures, and impairment charges associated with asset values. Target AFFO shall be set forth in the Board-approved annual budget. Strategic and Operational Performance is the Committee's assessment of the Company's performance in coverage, investment, and management effectiveness. Individual MBOs include factors such as teamwork, leadership, and individual contribution and advancement.

The award may range from 50% to 200% of the target amount set forth above, and shall be capped at 200% of the target amount. Achieving 85% of the applicable metric shall equate to 50% of the target award, achieving 100% of the metric shall equate to 100% of the target award, achieving 115% of the metric shall equate to 200% of the target award, and award levels shall be extrapolated for achieving between 85% and 115% of the applicable metric.

Long-Term Incentive Award

The long-term incentive awards are awards of performance-based and time-based Restricted Stock Units (RSUs) under the Company's 2013 Long-Term Incentive Plan. The RSUs for the NEOs will be 75% performance-based and 25% time-based. The number of RSUs to be granted will be determined based on the target grant date values above using the closing share price on the date of grant, except for the initial grants, which will be based on the Company's initial public offering (IPO) price.

The performance-based RSUs are tied to levels of total shareholder return (TSR) over a two year and three year period (cliff vesting). Relative performance will be measured 50% against companies comprising the NAREIT Equity Index and 50% against the companies comprising the Bloomberg Healthcare REIT Index. Payouts will be based on percentile ranking as compared to the comparison group, with 200% of the target award granted for achieving the 75th percentile or above, 150% of the target award granted for achieving the 63rd percentile or above, 100% of the target award granted for achieving the 50th percentile or above and 50% of the target award granted for achieving the 30th percentile or above.

For purposes of measuring TSR, which is the sum of share price appreciation and dividends, an average of the closing share prices 10 trading days before and 10 trading days after the first of the year at the start of the performance cycle and 10 trading days before and 10 trading days after the ending date of the performance cycle. For the 2013 grants, the performance cycle will begin on the Company's IPO date for all companies and will not use this averaging mechanism.

The time-based RSUs vest if the NEO is still employed at the end of a three-year period (cliff vesting).

In addition, for purposes of phasing in this policy, the 2013 time-based and performance-based awards will vest ratably as follows: One half will be eligible to vest after 2014 with vesting based on continued employment and TSR performance from the IPO through the end of 2014. One half will be eligible to vest after 2015 with vesting based on continued employment and TSR performance from the IPO through the end of 2015.
