F.N.B. CORPORATION AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Dollars in thousands, except share data

(Unaudited)

March 31, 2014

BUSINESS

F.N.B. Corporation (the Corporation), headquartered in Hermitage, Pennsylvania, is a regional diversified financial services company operating in six states and three major metropolitan areas, including Pittsburgh, Pennsylvania, Baltimore, Maryland and Cleveland, Ohio. As of March 31, 2014, the Corporation had 283 banking offices throughout Pennsylvania, Ohio, Maryland and West Virginia. The Corporation provides a full range of commercial banking, consumer banking and wealth management solutions through its subsidiary network which is led by its largest affiliate, First National Bank of Pennsylvania (FNBPA). Commercial banking solutions include corporate banking, small business banking, investment real estate financing, business credit, capital markets and lease financing. Consumer banking products and services include deposit products, mortgage lending, consumer lending and a complete suite of mobile and online banking services. Wealth management services include asset management, private banking and insurance. The Corporation also operates Regency Finance Company (Regency), which had 72 consumer finance offices in Pennsylvania, Ohio, Kentucky and Tennessee as of March 31, 2014.

BASIS OF PRESENTATION

The Corporation's accompanying consolidated financial statements and these notes to the financial statements include subsidiaries in which the Corporation has a controlling financial interest. The Corporation owns and operates FNBPA, First National Trust Company, First National Investment Services Company, LLC, F.N.B. Investment Advisors, Inc., First National Insurance Agency, LLC, Regency, F.N.B. Capital Corporation, LLC and Bank Capital Services, LLC, and includes results for each of these entities in the accompanying consolidated financial statements.

The accompanying consolidated financial statements include all adjustments that are necessary, in the opinion of management, to fairly reflect the Corporation's financial position and results of operations in accordance with U.S. generally accepted accounting principles (GAAP). All significant intercompany balances and transactions have been eliminated. Certain prior period amounts have been reclassified to conform to the current period presentation. Events occurring subsequent to the date of the balance sheet have been evaluated for potential recognition or disclosure in the consolidated financial statements through the date of the filing of the consolidated financial statements with the Securities and Exchange Commission (SEC).

Certain information and note disclosures normally included in consolidated financial statements prepared in accordance with GAAP have been condensed or omitted pursuant to the rules and regulations of the SEC. The interim operating results are not necessarily indicative of operating results the Corporation expects for the full year. These interim consolidated financial statements should be read in conjunction with the audited consolidated financial statements and notes thereto included in the Corporation's Annual Report on Form 10-K filed with the SEC on February 28, 2014.

USE OF ESTIMATES

The accounting and reporting policies of the Corporation conform with GAAP. The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the amounts reported in the consolidated financial statements and accompanying notes. Actual results could materially differ from those estimates. Material estimates that are particularly susceptible to significant changes include the allowance for loan losses, securities valuations, goodwill and other intangible assets and income taxes.

SECURITIES OFFERINGS

On November 1, 2013, the Corporation completed a public offering of 4,693,876 shares of common stock at a price of \$12.25 per share, including 612,244 shares of common stock purchased by the underwriters pursuant to an over-allotment option, which the underwriters exercised in full. On November 1, 2013, the Corporation also completed a public offering of 4,000,000 Depositary Shares, each representing a 1/40th interest in the Non-Cumulative Perpetual Preferred Stock, Series E, of the Corporation, at a price of \$25.00 per share. On November 14, 2013, the underwriters exercised their over-allotment option of 435,080 additional Depositary Shares at the same terms. The net proceeds of the common and preferred stock offerings after deducting underwriting discounts and commissions and offering expenses were \$54,434 and \$106,882, respectively.

Table of Contents**MERGERS AND ACQUISITIONS***OBA Financial Services, Inc.*

On April 8, 2014, the Corporation announced the signing of a definitive merger agreement to acquire OBA Financial Services, Inc. (OBA), a bank holding company with approximately \$390,000 in total assets based in Germantown, Maryland. The transaction is valued at approximately \$94,000. Under the terms of the merger agreement, OBA shareholders will be entitled to receive 1.781 shares of the Corporation's common stock for each share of OBA common stock. OBA's banking affiliate, OBA Bank, will be merged into FNBPA. The transaction is expected to be completed in the third quarter of 2014, pending regulatory approvals, the approval of shareholders of OBA and the satisfaction of other closing conditions.

BCSB Bancorp, Inc.

On February 15, 2014, the Corporation completed its acquisition of BCSB Bancorp, Inc. (BCSB), a bank holding company based in Baltimore, Maryland. On the acquisition date, the estimated fair values of BCSB included \$596,795 in assets, \$308,389 in loans and \$532,197 in deposits. The acquisition was valued at approximately \$80,554 and resulted in the Corporation issuing 6,730,597 shares of its common stock in exchange for 3,235,961 shares of BCSB common stock. The Corporation also acquired the outstanding stock options of BCSB that became fully vested upon the acquisition. The assets and liabilities of BCSB were recorded on the Corporation's consolidated balance sheet at their preliminary estimated fair values as of February 15, 2014, the acquisition date, and BCSB's results of operations have been included in the Corporation's consolidated statement of comprehensive income since that date. BCSB's banking affiliate, Baltimore County Savings Bank, was merged into FNBPA on February 15, 2014. Based on a preliminary purchase price allocation, the Corporation recorded \$42,292 in goodwill and \$6,591 in core deposit intangibles as a result of the acquisition. These fair value estimates are provisional amounts based on third party valuations that are currently under review. None of the goodwill is deductible for income tax purposes.

PVF Capital Corp.

On October 12, 2013, the Corporation completed its acquisition of PVF Capital Corp. (PVF), a savings and loan holding company based in Solon, Ohio. On the acquisition date, the estimated fair values of PVF included \$686,401 in assets, \$512,566 in loans and \$627,046 in deposits. The acquisition was valued at \$109,856 and resulted in the Corporation issuing 8,893,598 shares of its common stock in exchange for 26,119,398 shares of PVF common stock. The Corporation also acquired the outstanding stock options of PVF that became fully vested upon the acquisition. The assets and liabilities of PVF were recorded on the Corporation's consolidated balance sheets at their preliminary estimated fair values as of October 12, 2013, the acquisition date, and PVF's results of operations have been included in the Corporation's consolidated statements of comprehensive income since that date. PVF's banking affiliate, Park View Federal Savings Bank, was merged into FNBPA on October 12, 2013. Based on a preliminary purchase price allocation, the Corporation recorded \$52,085 in goodwill and \$6,867 in core deposit intangibles as a result of the acquisition. These fair value estimates are provisional amounts based on third party valuations that are currently under review. None of the goodwill is deductible for income tax purposes.

Annapolis Bancorp, Inc.

On April 6, 2013, the Corporation completed its acquisition of Annapolis Bancorp, Inc. (ANNB), a bank holding company based in Annapolis, Maryland. On the acquisition date, the estimated fair values of ANNB included \$394,363 in assets, \$256,199 in loans and \$349,370 in deposits. The acquisition was valued at \$56,300 and resulted in the Corporation issuing 4,641,412 shares of its common stock in exchange for 4,060,802 shares of ANNB common

stock. The Corporation also acquired the outstanding stock options of ANNB that became fully vested upon the acquisition. Additionally, the Corporation paid \$609, or \$0.15 per share, to the holders of ANNB common stock as cash consideration due to the collection of a certain loan, as designated in the merger agreement. The assets and liabilities of ANNB were recorded on the Corporation's consolidated balance sheets at their preliminary estimated fair values as of April 6, 2013, the acquisition date, and ANNB's results of operations have been included in the Corporation's consolidated statements of comprehensive income since that date. ANNB's banking affiliate, BankAnnapolis, was merged into FNBPA on April 6, 2013. In conjunction with the acquisition, a warrant issued by ANNB to the U.S. Department of the Treasury (UST) under the Capital Purchase Program (CPP) was assumed by the Corporation and converted into a warrant to purchase up to 342,564 shares of the Corporation's common stock. The warrant expires January 30, 2019 and has an exercise price of \$3.57 per share. Based on the purchase price allocation, the Corporation recorded \$35,854 in goodwill and \$3,775 in core deposit intangibles as a result of the acquisition. None of the goodwill is deductible for income tax purposes.

Table of Contents**NEW ACCOUNTING STANDARDS***Troubled Debt Restructurings*

In January 2014, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2014-04, *Reclassification of Residential Real Estate Collateralized Consumer Mortgage Loans upon Foreclosure*, to clarify when an in-substance repossession or foreclosure occurs; that is, when a creditor should be considered to have received physical possession of residential real estate property collateralizing a consumer mortgage loan such that the loan should be derecognized and other real estate owned (OREO) recognized. This update requires a creditor to reclassify a collateralized consumer mortgage loan to OREO upon obtaining legal title to the real estate collateral, or the borrower voluntarily conveying all interest in the real estate property to the lender to satisfy the loan through a deed in lieu of foreclosure or similar legal agreement. The requirements of ASU 2014-04 are effective for reporting periods beginning after December 15, 2014. The adoption of this update will not have an impact on the financial statements, results of operations or liquidity of the Corporation since the Corporation already accounts for foreclosures according to the requirements of this update.

Investments in Qualified Affordable Housing Projects

In January 2014, the FASB issued ASU No. 2014-01, *Accounting for Investments in Qualified Affordable Housing Projects*, to revise the accounting for investments in qualified affordable housing projects. This update modifies the conditions that must be met to present the pretax effects and related tax benefits of such investments as a component of income taxes (net within income tax expense). It is expected that the new guidance will enable more investors to use a net presentation for investments in qualified affordable housing projects. Investors that do not qualify for net presentation under the new guidance will continue to account for such investments under the equity method or cost method, which results in losses recognized in pretax income and tax benefits recognized in income taxes (gross presentation of investment results). For investments that qualify for the net presentation of investment performance, the guidance introduces a proportional amortization method that can be elected to amortize the investment basis. If elected, the method is required for all eligible investments in qualified affordable housing projects. The requirements of ASU 2014-01 are effective for reporting periods beginning after December 15, 2014, with early adoption permitted. The adoption of this update is not expected to have a material effect on the financial statements, results of operations or liquidity of the Corporation.

Income Taxes

In July 2013, the FASB issued ASU No. 2013-11, *Presentation of an Unrecognized Tax Benefit When a Net Operating Loss Carryforward, a Similar Tax Loss, or a Tax Credit Carryforward Exists*, to provide guidance on the financial statement presentation of certain unrecognized tax benefits. An unrecognized tax benefit or a portion of an unrecognized tax benefit should be presented in the financial statements as a reduction to a deferred tax asset for a net operating loss carryforward, a similar tax loss or a tax credit carryforward with certain exceptions related to availability. The requirements of ASU 2013-11 are effective prospectively for reporting periods beginning after December 15, 2013, with early adoption permitted. The adoption of this update did not have a material effect on the financial statements, results of operations or liquidity of the Corporation.

Table of Contents

The Corporation classifies securities as trading securities when management intends to sell such securities in the near term. Such securities are carried at fair value, with unrealized gains (losses) reflected through the consolidated statements of comprehensive income. The Corporation classified certain securities acquired in conjunction with the BCSB, PVF and ANNB acquisitions as trading securities. The Corporation both acquired and sold these trading securities during the quarterly periods in which each of the acquisitions occurred. As of March 31, 2014 and December 31, 2013, the Corporation did not hold any trading securities.

Gross gains and gross losses were realized on securities as follows:

	Three Months Ended	
	March 31,	
	2014	2013
Gross gains	\$ 18,009	\$ 1,032
Gross losses	(8,548)	(348)
	\$ 9,461	\$ 684

During the first quarter of 2014, the Corporation strategically sold its entire portfolio of pooled trust preferred securities (TPS) with net proceeds of \$51,540 and a gain of \$13,766. Of the 23 pooled securities sold, one was determined to be a disallowed investment under the Volcker Rule (Section 619) of the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010 (Dodd-Frank Act), and as such, was required to be disposed of by July 2015. By selling these securities, the Corporation strengthened the risk profile of its investment portfolio, improved its capital levels due to lowered risk-weighted assets and generated leverageable capital to support future growth.

As of March 31, 2014, the amortized cost and fair value of securities, by contractual maturities, were as follows:

	Available for Sale		Held to Maturity	
	Amortized Cost	Fair Value	Amortized Cost	Fair Value
Due in one year or less	\$	\$	\$ 2,716	\$ 2,766
Due from one to five years	209,466	207,689	77,526	76,567
Due from five to ten years	82,024	80,998	85,763	86,428
Due after ten years	7,588	6,739	67,790	68,491
	299,078	295,426	233,795	234,252
Residential mortgage-backed securities:				
Agency mortgage-backed securities	352,209	355,941	725,154	733,866
Agency collateralized mortgage obligations	622,060	609,752	452,909	442,158
Non-agency collateralized mortgage obligations	1,661	1,679	6,352	6,376
Commercial mortgage-backed securities	9,153	9,129	2,236	2,342
Equity securities	1,444	2,143		
	\$ 1,285,605	\$ 1,274,070	\$ 1,420,446	\$ 1,418,994

Maturities may differ from contractual terms because borrowers may have the right to call or prepay obligations with or without penalties. Periodic payments are received on mortgage-backed securities based on the payment patterns of the underlying collateral.

At March 31, 2014 and December 31, 2013, securities with a carrying value of \$946,173 and \$909,548, respectively, were pledged to secure public deposits, trust deposits and for other purposes as required by law. Securities with a carrying value of \$811,881 and \$860,279 at March 31, 2014 and December 31, 2013, respectively, were pledged as collateral for short-term borrowings.

Table of Contents

	78	\$ 669,220	\$ (24,379)	2	\$ 15,674	\$ (711)	80	\$ 684,894	\$ (25,090)

The Corporation does not intend to sell the debt securities and it is not more likely than not the Corporation will be required to sell the securities before recovery of their amortized cost basis.

Table of Contents

The Corporation's unrealized losses on collateralized debt obligations (CDOs) as of December 31, 2013 related to investments in pooled TPS, all of which were sold during the first quarter of 2014 as previously noted. The Corporation's remaining portfolio of TPS consists of four single-issuer securities, which are primarily from money-center and large regional banks and are included in other debt securities. These single-issuer TPS had an amortized cost and estimated fair value of \$6,881 and \$6,020 at March 31, 2014, respectively. The Corporation has concluded from its analysis performed at March 31, 2014 that it is probable that the Corporation will collect all contractual principal and interest payments related to these securities.

Other-Than-Temporary Impairment

The Corporation evaluates its investment securities portfolio for other-than-temporary impairment (OTTI) on a quarterly basis. Impairment is assessed at the individual security level. The Corporation considers an investment security impaired if the fair value of the security is less than its cost or amortized cost basis. The following table presents a summary of the cumulative credit-related OTTI charges recognized as components of earnings for securities for which a portion of an OTTI is recognized in other comprehensive income:

	Collateralized Debt Obligations	Residential Non-Agency CMOs	Equities	Total
For the Three Months Ended March 31, 2014				
Beginning balance	\$ 17,155	\$	\$ 27	\$ 17,182
Loss where impairment was not previously recognized				
Additional loss where impairment was previously recognized				
Reduction due to credit impaired securities sold	(17,155)			(17,155)
Ending balance	\$	\$	\$ 27	\$ 27
For the Three Months Ended March 31, 2013				
Beginning balance	\$ 17,155	\$ 212		\$ 17,367
Loss where impairment was not previously recognized				
Additional loss where impairment was previously recognized				
Reduction due to credit impaired securities sold		(212)		(212)
Ending balance	\$ 17,155	\$		\$ 17,155

The Corporation did not recognize any impairment losses on securities for the three months ended March 31, 2014 or 2013.

States of the U.S. and Political Subdivisions

The Corporation's municipal bond portfolio of \$146,011 as of March 31, 2014 is highly rated with an average entity-specific rating of AA and 98.5% of the portfolio rated A or better. General obligation bonds comprise 98.9% of the portfolio. Geographically, municipal bonds support the Corporation's footprint as 80.9% of the securities are from municipalities located throughout Pennsylvania. The average holding size of the securities in the municipal bond portfolio is \$1,000. In addition to the strong stand-alone ratings, 69.2% of the municipalities have purchased credit enhancement insurance to strengthen the creditworthiness of their issue. Management also reviews the credit profile of each issuer on a quarterly basis.

FEDERAL HOME LOAN BANK STOCK

The Corporation is a member of the Federal Home Loan Bank (FHLB) of Pittsburgh. The FHLB requires members to purchase and hold a specified minimum level of FHLB stock based upon their level of borrowings, collateral balances and participation in other programs offered by the FHLB. Stock in the FHLB is non-marketable and is redeemable at the discretion of the FHLB. Both cash and stock dividends on FHLB stock are reported as income.

Members do not purchase stock in the FHLB for the same reasons that traditional equity investors acquire stock in an investor-owned enterprise. Rather, members purchase stock to obtain access to the low-cost products and services offered by the FHLB. Unlike equity securities of traditional for-profit enterprises, the stock of FHLB does not provide its holders with an opportunity for capital appreciation because, by regulation, FHLB stock can only be purchased, redeemed and transferred at par value.

Table of Contents

At March 31, 2014 and December 31, 2013, the Corporation's FHLB stock totaled \$24,636 and \$23,636, respectively, and is included in other assets on the balance sheet. The Corporation accounts for the stock in accordance with ASC 325, which requires the investment to be carried at cost and evaluated for impairment based on the ultimate recoverability of the par value. Due to the continued improvement of the FHLB's financial performance and stability over the past several years, the Corporation believes its holdings in the stock are ultimately recoverable at par value and, therefore, determined that FHLB stock was not other-than-temporarily impaired. In addition, the Corporation has ample liquidity and does not require redemption of its FHLB stock in the foreseeable future.

LOANS AND ALLOWANCE FOR LOAN LOSSES

Following is a summary of loans, net of unearned income:

	Originated Loans	Acquired Loans	Total Loans
March 31, 2014			
Commercial real estate	\$ 2,677,152	\$ 787,446	\$ 3,464,598
Commercial and industrial	1,848,332	116,733	1,965,065
Commercial leases	161,494		161,494
Total commercial loans and leases	4,686,978	904,179	5,591,157
Direct installment	1,386,940	80,618	1,467,558
Residential mortgages	688,038	447,752	1,135,790
Indirect installment	674,347	4,571	678,918
Consumer lines of credit	848,883	161,618	1,010,501
Other	59,212		59,212
	\$ 8,344,398	1,598,738	\$ 9,943,136
December 31, 2013			
Commercial real estate	\$ 2,640,428	\$ 604,781	\$ 3,245,209
Commercial and industrial	1,761,668	119,806	1,881,474
Commercial leases	158,895		158,895
Total commercial loans and leases	4,560,991	724,587	5,285,578
Direct installment	1,387,995	79,241	1,467,236
Residential mortgages	678,227	408,512	1,086,739
Indirect installment	649,701	5,886	655,587
Consumer lines of credit	832,668	133,103	965,771
Other	45,183		45,183
	\$ 8,154,765	\$ 1,351,329	\$ 9,506,094

The carrying amount of acquired loans at March 31, 2014 totaled \$1,593,642, including purchased credit-impaired (PCI) loans with a carrying amount of \$14,513, while the carrying amount of acquired loans at December 31, 2013 totaled \$1,345,429, including PCI loans with a carrying amount of \$21,192. The outstanding contractual balance receivable of acquired loans at March 31, 2014 totaled \$1,704,889, including PCI loans with an outstanding

contractual balance receivable of \$46,809, while the outstanding contractual balance receivable of acquired loans at December 31, 2013 totaled \$1,449,227, including PCI loans with an outstanding contractual balance receivable of \$56,500.

Commercial real estate includes both owner-occupied and non-owner-occupied loans secured by commercial properties. Commercial and industrial includes loans to businesses that are not secured by real estate. Commercial leases consist of loans for new or used equipment. Direct installment is comprised of fixed-rate, closed-end consumer loans for personal, family or household use, such as home equity loans and automobile loans. Residential mortgages consist of conventional and jumbo mortgage loans for non-commercial properties. Indirect installment is comprised of loans originated by third parties and underwritten by the Corporation, primarily automobile loans. Consumer lines of credit include home equity lines of credit (HELOC) and consumer lines of credit that are either unsecured or secured by collateral other than home equity. Other is comprised primarily of mezzanine loans and student loans.

The loan portfolio consists principally of loans to individuals and small- and medium-sized businesses within the Corporation's primary market area of Pennsylvania, eastern Ohio, Maryland and northern West Virginia. The commercial real estate portfolio also includes run-off loans in Florida, which totaled \$39,118 or 0.4% of total loans at March 31, 2014, compared to \$39,379 or 0.4% of total loans at December 31, 2013. Additionally, the total loan portfolio contains consumer finance loans to individuals in Pennsylvania, Ohio, Tennessee and Kentucky, which totaled \$171,228 or 1.7% of total loans at March 31, 2014, compared to \$179,970 or 1.9% of total loans at December 31, 2013. Due to the relative size of the consumer finance loan portfolio, they are not segregated from other consumer loans.

Table of Contents

As of March 31, 2014, 42.0% of the commercial real estate loans were owner-occupied, while the remaining 58.0% were non-owner-occupied, compared to 43.1% and 56.9%, respectively, as of December 31, 2013. As of March 31, 2014 and December 31, 2013, the Corporation had commercial construction loans of \$270,913 and \$252,842, respectively, representing 2.7% of total loans.

ASC 310-30 Loans

All loans acquired in the BCSB, PVF and ANNB acquisitions, except for revolving loans, are accounted for in accordance with ASC 310-30. Revolving loans are accounted for under ASC 310-20. The Corporation's allowance for loan losses for acquired loans reflects only those losses incurred after acquisition.

The following table reflects amounts at acquisition for all purchased loans subject to ASC 310-30 (impaired and non-impaired) acquired from PVF and ANNB in 2013. ASC 310-30 (impaired and non-impaired) loans acquired from BCSB in 2014 are not presented because their values are expected to be immaterial, are preliminary in nature and are subject to refinement as additional information becomes available.

	Acquired Impaired Loans	Acquired Performing Loans	Total
Acquired from PVF and ANNB in 2013			
Contractually required cash flows at acquisition	\$ 40,972	\$ 796,114	\$ 837,086
Non-accretable difference (expected losses and foregone interest)	(23,207)	(52,992)	(76,199)
Cash flows expected to be collected at acquisition	17,765	743,122	760,887
Accretable yield	(2,505)	(112,847)	(115,352)
Basis in acquired loans at acquisition	\$ 15,260	\$ 630,275	\$ 645,535

The following table provides a summary of change in accretable yield for all acquired loans, excluding loans from the BCSB acquisition.

	Acquired Impaired Loans	Acquired Performing Loans	Total
Three Months Ended March 31, 2014			
Balance at beginning of period	\$ 7,456	\$ 298,190	\$ 305,646
Acquisitions			
Reduction due to unexpected early payoffs		(12,694)	(12,694)
Reclass from non-accretable difference	332	436	768
Disposals/transfers	(759)	(185)	(944)
Accretion	(1,264)	(14,649)	(15,913)
Balance at end of period	\$ 5,765	\$ 271,098	\$ 276,863

Year Ended December 31, 2013			
Balance at beginning of period	\$ 778	\$ 253,375	\$ 254,153
Acquisitions	2,505	112,847	115,352
Reduction due to unexpected early payoffs		(42,582)	(42,582)
Reclass from non-accretable difference	8,097	8,296	16,393
Disposals/transfers	(368)	(224)	(592)
Accretion	(3,556)	(33,522)	(37,078)
Balance at end of period	\$ 7,456	\$ 298,190	\$ 305,646

Table of Contents*Purchased Credit-Impaired (PCI) Loans*

The Corporation has acquired loans for which there was evidence of deterioration of credit quality since origination and for which it was probable, at acquisition, that all contractually required payments would not be collected.

Following is information about PCI loans. The table below does not include impaired loans from the BCSB acquisition because their values are expected to be immaterial, are preliminary in nature and are subject to refinement as additional information becomes available.

	Outstanding Balance	Non-Accrutable Difference	Expected Cash Flows	Accrutable Yield	Recorded Investment
For the Three Months Ended March 31, 2014					
Balance at beginning of period	\$ 56,500	\$ (26,852)	\$ 29,648	\$ (7,456)	\$ 22,192
Acquisitions					
Accretion				1,264	1,264
Payments received	(8,040)	437	(7,603)		(7,603)
Reclass from non-accrutable difference		332	332	(332)	
Disposals/transfers	(2,520)	1,129	(1,391)	759	(632)
Contractual interest	869	(869)			
Balance at end of period	\$ 46,809	\$ (25,823)	\$ 20,896	\$ (5,765)	\$ 15,221
For the Year Ended December 31, 2013					
Balance at beginning of period	\$ 41,134	\$ (23,733)	\$ 17,401	\$ (778)	\$ 16,623
Acquisitions	42,031	(24,266)	17,765	(2,505)	15,260
Accretion				3,556	3,556
Payments received	(10,670)	1,345	(9,325)		(9,325)
Reclass from non-accrutable difference		8,097	8,097	(8,097)	
Disposals/transfers	(18,695)	14,405	(4,290)	368	(3,922)
Contractual interest	2,700	(2,700)			
Balance at end of period	\$ 56,500	\$ (26,852)	\$ 29,648	\$ (7,456)	\$ 22,192

The accretion in the table above includes \$242 in 2014 and \$440 in 2013 that primarily represents payoffs received on certain loans in excess of expected cash flows.

Credit Quality

Management monitors the credit quality of the Corporation's loan portfolio on an ongoing basis. Measurement of delinquency and past due status are based on the contractual terms of each loan.

Non-performing loans include non-accrual loans and non-performing troubled debt restructurings (TDRs). Past due loans are reviewed on a monthly basis to identify loans for non-accrual status. The Corporation places a loan on non-accrual status and discontinues interest accruals on originated loans generally when principal or interest is due and has remained unpaid for a certain number of days unless the loan is both well secured and in the process of

collection. Commercial loans are placed on non-accrual at 90 days, installment loans are placed on non-accrual at 120 days and residential mortgages and consumer lines of credit are generally placed on non-accrual at 180 days. When a loan is placed on non-accrual status, all unpaid interest is reversed. Non-accrual loans may not be restored to accrual status until all delinquent principal and interest have been paid and the ultimate ability to collect the remaining principal and interest is reasonably assured. TDRs are loans in which the borrower has been granted a concession on the interest rate or the original repayment terms due to financial distress. Non-performing assets also include debt securities on which OTTI has been taken in the current or prior periods that have not been returned to accrual status.

Table of Contents

Following is a summary of non-performing assets:

	March 31, 2014	December 31, 2013
Non-accrual loans	\$ 60,039	\$ 58,755
Troubled debt restructurings	19,384	18,698

(1) Past due information for loans acquired is based on the contractual balance outstanding at March 31, 2014 and December 31, 2013.

The Corporation utilizes the following categories to monitor credit quality within its commercial loan portfolio:

Rating**Category**

Pass in general, the condition of the borrower and the performance of the loan is satisfactory or better

Special Mention	in general, the condition of the borrower has deteriorated, requiring an increased level of monitoring
Substandard	in general, the condition of the borrower has significantly deteriorated and the performance of the loan could further deteriorate if deficiencies are not corrected
Doubtful	in general, the condition of the borrower has significantly deteriorated and the collection in full of both principal and interest is highly questionable or improbable

The use of these internally assigned credit quality categories within the commercial loan portfolio permits management's use of migration and roll rate analysis to estimate a quantitative portion of credit risk. The Corporation's internal credit risk grading system is based on past experiences with similarly graded loans and conforms with regulatory categories. In general, loan risk ratings within each category are reviewed on an ongoing basis according to the Corporation's policy for each class of loans. Each quarter, management analyzes the resulting ratings, as well as other external statistics and factors such as delinquency, to track the migration performance of the commercial loan portfolio. Loans within the Pass credit category or that migrate toward the Pass credit category generally have a lower risk of loss compared to loans that migrate toward the Substandard or Doubtful credit categories. Accordingly, management applies higher risk factors to Substandard and Doubtful credit categories.

Table of Contents

The following tables present a summary of the Corporation's commercial loans by credit quality category, segregated by loans originated and loans acquired:

	Commercial Loan Credit Quality Categories				
	Pass	Special Mention	Substandard	Doubtful	Total

Credit quality information for acquired loans is based on the contractual balance outstanding at March 31, 2014 and December 31, 2013. The increase in acquired loans in 2014 primarily relates to the BCSB acquisition on February 15, 2014.

The Corporation uses payment status and delinquency migration analysis within the consumer and other loan classes to enable management to estimate a quantitative portion of credit risk. Each month, management analyzes payment and volume activity, as well as other external statistics and factors such as unemployment, to determine how consumer loans are performing.

Table of Contents

Following is a table showing originated consumer loans by payment status:

	Consumer Loan Credit Quality by Payment Status		
	Performing	Non-Performing	Total
March 31, 2014			
Direct installment	\$ 1,374,893	\$ 12,047	\$ 1,386,940

Residential mortgages	664,214	14,013	678,227
Indirect installment	648,499	1,202	649,701
Consumer lines of credit	832,071	597	832,668
Other	45,183		45,183

Loans are designated as impaired when, in the opinion of management, based on current information and events, the collection of principal and interest in accordance with the loan contract is doubtful. Typically, the Corporation does not consider loans for impairment unless a sustained period of delinquency (i.e., 90-plus days) is noted or there are subsequent events that impact repayment probability (i.e., negative financial trends, bankruptcy filings, imminent foreclosure proceedings, etc.). Impairment is evaluated in the aggregate for consumer installment loans, residential mortgages, consumer lines of credit, commercial leases and commercial loan relationships less than \$500. For commercial loan relationships greater than or equal to \$500, a specific valuation allowance is allocated, if necessary, so that the loan is reported net, at the present value of estimated future cash flows using a market interest rate or at the fair value of collateral if repayment is expected solely from the collateral. Consistent with the Corporation's existing method of income recognition for loans, interest on impaired loans, except those classified as non-accrual, is recognized as income using the accrual method. Impaired loans, or portions thereof, are charged off when deemed uncollectible.

Table of Contents

Other				

Interest income is generally no longer recognized once a loan becomes impaired.

The above tables do not include PCI loans with a recorded investment of \$15,221 at March 31, 2014 and \$22,192 at December 31, 2013. These tables do not reflect the additional allowance for loan losses relating to acquired loans in the following pools and categories: commercial real estate of \$2,612; commercial and industrial of \$817; direct installment of \$906; residential mortgages of \$504; and indirect installment of \$257, totaling \$5,096 at March 31, 2014 and commercial real estate of \$3,093; commercial and industrial of \$786; direct installment of \$727; residential mortgages of \$970 and indirect installment of \$324, totaling \$5,900 at December 31, 2013.

Troubled Debt Restructurings

TDRs are loans whose contractual terms have been modified in a manner that grants a concession to a borrower experiencing financial difficulties. TDRs typically result from loss mitigation activities and could include the extension of a maturity date, interest rate reduction, principal forgiveness, deferral or decrease in payments for a period of time and other actions intended to minimize the economic loss and to avoid foreclosure or repossession of collateral.

Table of Contents

Following is a summary of the composition of total TDRs:

	March 31, 2014	December 31, 2013
Accruing:		
Performing	\$ 10,289	\$ 10,220
Non-performing	19,384	18,698
Non-accrual	12,389	12,705
	\$ 42,062	\$ 41,623

TDRs that are accruing and performing include loans that met the criteria for non-accrual of interest prior to restructuring for which the Corporation can reasonably estimate the timing and amount of the expected cash flows on such loans and for which the Corporation expects to fully collect the new carrying value of the loans. During the three months ended March 31, 2014, the Corporation returned to performing status \$3,194 in restructured loans, all of which were secured by residential mortgages that have consistently met their modified obligations for more than six months. TDRs that are accruing and non-performing are comprised of consumer loans that have not demonstrated a consistent repayment pattern on the modified terms for more than six months, however it is expected that the Corporation will collect all future principal and interest payments. TDRs that are on non-accrual are not placed on accruing status until all delinquent principal and interest have been paid and the ultimate collectability of the remaining principal and interest is reasonably assured. Some loan modifications classified as TDRs may not ultimately result in the full collection of principal and interest, as modified, and result in potential incremental losses which are factored into the allowance for loan losses.

Excluding purchased impaired loans, commercial loans over \$500 whose terms have been modified in a TDR are generally placed on non-accrual, individually analyzed and measured for estimated impairment based on the fair value of the underlying collateral. The Corporation's allowance for loan losses included specific reserves for commercial TDRs of \$523 and \$561 at March 31, 2014 and December 31, 2013, respectively, and pooled reserves for individual loans under \$500 of \$188 and \$193 for those same respective periods, based on historical loss experience. Upon default, the amount of the recorded investment in the TDR in excess of the fair value of the collateral less estimated selling costs is generally considered a confirmed loss and is charged-off against the allowance for loan losses.

All other classes of loans, which are primarily secured by residential properties, whose terms have been modified in a TDR are pooled and measured for estimated impairment based on the expected net present value of the estimated future cash flows of the pool. The Corporation's allowance for loan losses included pooled reserves for these classes of loans of \$1,026 and \$1,005 at March 31, 2014 and December 31, 2013, respectively. Upon default of an individual loan, the Corporation's charge-off policy is followed accordingly for that class of loan.

The majority of TDRs are the result of interest rate concessions for a limited period of time. Following is a summary of loans, by class, that have been restructured during the periods indicated:

Three Months Ended March 31, 2014	Three Months Ended March 31, 2013
--	--

	Number of Contracts	Pre-Modification Outstanding Recorded Investment	Post- Modification Outstanding Recorded Investment	Number of Contracts	Pre-Modification Outstanding Recorded Investment	Post- Modification Outstanding Recorded Investment

Consumer lines of credit				
Other				
	19	\$ 171	28	\$ 314

(1) The recorded investment is as of period end.

Allowance for Loan Losses

The allowance for loan losses is established as losses are estimated to have occurred through a provision charged to earnings. Loan losses are charged against the allowance for loan losses when management believes the uncollectibility of a loan balance is confirmed. Subsequent recoveries, if any, are credited to the allowance for loan losses.

Allowances for impaired loans are generally determined based on collateral values or the present value of estimated cash flows. Changes in the allowance for loan losses related to impaired loans are charged or credited to the provision for loan losses.

The allowance for loan losses is maintained at a level that, in management's judgment, is believed adequate to absorb probable losses associated with specifically identified loans, as well as estimated probable credit losses inherent in the remainder of the loan portfolio. Adequacy of the allowance for loan losses is based on management's evaluation of potential loan losses in the loan portfolio, which includes an assessment of past experience, current economic conditions in specific industries and geographic areas, general economic conditions, known and inherent risks in the loan portfolio, the estimated value of underlying collateral and residuals and changes in the composition of the loan portfolio. Determination of the allowance for loan losses is inherently subjective as it requires significant estimates, including the amounts and timing of expected future cash flows on impaired loans, estimated losses on pools of homogeneous loans based on historical loss experience and consideration of current environmental factors and economic trends, all of which are susceptible to significant change.

Credit impaired loans obtained through acquisitions are accounted for under the provisions of ASC 310-30. The Corporation also accounts for certain acquired loans considered performing at the time of acquisition by analogy to ASC 310-30. ASC 310-30 requires the initial recognition of acquired loans at the present value of amounts expected to be received. Any deterioration in the credit quality of acquired loans subsequent to acquisition would be considered in the allowance for loan losses.

Table of Contents

Following is a summary of changes in the allowance for loan losses, by loan class:

	Balance at Beginning of Period	Charge- Offs	Recoveries	Net Charge- Offs	Provision for Loan Losses	Balance at End of Period

BORROWINGS

Following is a summary of short-term borrowings:

	March 31, 2014	December 31, 2013
Securities sold under repurchase agreements	\$ 787,712	\$ 841,741
Federal funds purchased	300,000	270,000
Subordinated notes	128,912	129,498

\$ 1,216,624 \$ 1,241,239

Securities sold under repurchase agreements is comprised of customer repurchase agreements, which are sweep accounts with next day maturities utilized by larger commercial customers to earn interest on their funds. Securities are pledged to these customers in an amount equal to the outstanding balance.

Following is a summary of long-term debt:

	March 31, 2014	December 31, 2013
Federal Home Loan Bank advances	\$ 150,073	\$ 50,076
Subordinated notes	85,679	84,637
Other subordinated debt		8,637
Convertible debt		578
	\$ 235,752	\$ 143,928

Table of Contents

The Corporation's banking affiliate has available credit with the FHLB of \$3,574,396 of which \$150,073 was used as of March 31, 2014. These advances are secured by loans collateralized by 1-4 family mortgages and FHLB stock and are scheduled to mature in various amounts periodically through the year 2019. Effective interest rates paid on these advances ranged from 0.95% to 4.19% for the three months ended March 31, 2014 and 1.06% to 4.19% for the year ended December 31, 2013.

JUNIOR SUBORDINATED DEBT

The Corporation has three unconsolidated subsidiary trusts as of March 31, 2014 (collectively, the Trusts): F.N.B. Statutory Trust II, Omega Financial Capital Trust I and BCSB Capital Trust II. One hundred percent of the common equity of each Trust is owned by the Corporation. The Trusts were formed for the purpose of issuing Corporation-obligated mandatorily redeemable capital securities (TPS) to third-party investors. The proceeds from the sale of TPS and the issuance of common equity by the Trusts were invested in junior subordinated debt securities (subordinated debt) issued by the Corporation, which are the sole assets of each Trust. Since third-party investors are the primary beneficiaries, the Trusts are not consolidated in the Corporation's financial statements. The Trusts pay dividends on the TPS at the same rate as the distributions paid by the Corporation on the junior subordinated debt held by the Trusts. Omega Financial Capital Trust I and BCSB Capital Trust II were assumed as a result of acquisitions.

Distributions on the subordinated debt issued to the Trusts are recorded as interest expense by the Corporation. The TPS are subject to mandatory redemption, in whole or in part, upon repayment of the subordinated debt. The TPS are eligible for redemption, at any time, at the Corporation's discretion. The subordinated debt, net of the Corporation's investment in the Trusts, qualifies as tier 1 capital under the Board of Governors of the Federal Reserve System (FRB) guidelines. Under recently issued capital guidelines, these TPS obligations are subject to limitations when total assets of the Corporation exceed \$15,000,000. The Corporation has entered into agreements which, when taken collectively, fully and unconditionally guarantee the obligations under the TPS subject to the terms of each of the guarantees.

During the first quarter of 2014, the Corporation redeemed \$23,000 of the Corporation-issued TPS, including \$6,500 that the Corporation assumed as a result of the BCSB acquisition. During 2013, the Corporation redeemed \$130,000 of the Corporation-issued TPS. The Corporation proactively redeemed these Corporation-issued TPS, primarily using proceeds from the November 2013 capital raise, in anticipation of meeting the limitations as described above. Under applicable regulatory capital guidelines issued by the bank regulatory agencies, upon notice of redemption, the redeemed TPS no longer qualify as tier 1 capital for the Corporation. The BCSB Capital Trust II holders were redeemed and paid in full on April 7, 2014.

The following table provides information relating to the Trusts as of March 31, 2014:

	Trust Preferred Securities	Common Securities	Junior Subordinated Debt	Stated Maturity Date	Interest Rate	
F.N.B. Statutory Trust II	\$ 21,500	\$ 665	\$ 22,165	6/15/36	1.88%	Variable; LIBOR + 165 basis points (bps)
Omega Financial Capital Trust I	36,000	1,114	36,042	10/18/34	2.43%	Variable; LIBOR + 219 bps
BCSB Capital Trust II	10,000	310	10,310	10/07/33	3.24%	Variable; LIBOR + 300 bps

\$ 67,500 \$ 2,089 \$ 68,517

DERIVATIVE INSTRUMENTS

The Corporation is exposed to certain risks arising from both its business operations and economic conditions. The Corporation principally manages its exposures to a wide variety of business and operational risks through management of its core business activities. The Corporation manages economic risks, including interest rate risk, primarily by managing the amount, source, and duration of its assets and liabilities, and through the use of derivative instruments. Interest rate swaps are the primary derivative instrument used by the Corporation for interest rate management. The Corporation also uses derivative instruments to facilitate transactions on behalf of its customers.

Table of Contents*Commercial Borrower Derivatives*

The Corporation enters into interest rate swap agreements to meet the financing, interest rate and equity risk management needs of qualifying commercial loan customers. These agreements provide the customer the ability to convert from variable to fixed interest rates. The Corporation then enters into positions with a derivative counterparty in order to offset its exposure on the fixed components of the customer agreements. The credit risk associated with derivatives executed with customers is essentially the same as that involved in extending loans and is subject to normal credit policies and monitoring. The Corporation seeks to minimize counterparty credit risk by entering into transactions with only high-quality institutions. These arrangements meet the definition of derivatives, but are not designated as hedging instruments under ASC 815, *Derivatives and Hedging*. The interest rate swap agreement with the loan customer and with the counterparty is reported at fair value in other assets and other liabilities on the consolidated balance sheet with any resulting gain or loss recorded in current period earnings as other income or other expense.

Risk Management Derivatives

The Corporation entered into interest rate derivative agreements in order to manage its net interest income by increasing the stability of the net interest income over a range of potential interest rate scenarios. Interest rate swaps are also used to modify the interest rate characteristics of designated commercial loans from variable to fixed in order to reduce the impact of changes in future cash flows due to interest rate changes. These agreements are designated as cash flow hedges (i.e., hedging the exposure to variability in expected future cash flows). The effective portion of the derivative's gain or loss is initially reported as a component of other comprehensive income and subsequently reclassified into earnings in the same line item associated with the forecasted transaction when the forecasted transaction affects earnings. The ineffective portion of the gain or loss is reported in earnings immediately. Gains and losses from hedge ineffectiveness recognized in the consolidated statement of comprehensive income were not material for the three months ended March 31, 2014.

In accordance with the requirements of ASU No. 2011-04, the Corporation made an accounting policy election to use the portfolio exception with respect to measuring derivative instruments, consistent with the guidance in ASC 820. The Corporation further documents that it meets the criteria for this exception as follows:

The Corporation manages credit risk for its derivative positions on a counterparty-by-counterparty basis, consistent with its risk management strategy for such transactions. The Corporation manages credit risk by considering indicators of risk such as credit ratings, and by negotiating terms in its master netting arrangements and credit support annex documentation with each individual counterparty. Review of credit risk plays a central role in the decision of which counterparties to consider for such relationships and when deciding with whom it will enter into derivative transactions.

Since the effective date of ASC 820, the Corporation's management has monitored and measured credit risk and calculated credit valuation adjustments (CVAs) for its derivative transactions on a counterparty-by-counterparty basis. Management receives reports from an independent third-party valuation specialist on a monthly basis to assist in determining CVAs by counterparty for purposes of reviewing and managing its credit risk exposures. Since the portfolio exception applies only to the fair value measurement and not to the financial statement presentation, the portfolio-level adjustments are then allocated in a reasonable and consistent manner each period to the individual assets or liabilities

that make up the counterparty derivative portfolio, in accordance with the Corporation's accounting policy elections.

The Corporation notes that key market participants take into account the existence of such arrangements that mitigate credit risk exposure in the event of default. As such, the Corporation formally elects to apply the portfolio exception in ASC 820 with respect to measuring counterparty credit risk for all of its derivative transactions subject to master netting arrangements.

At March 31, 2014, the Corporation was party to 318 swaps with customers with notional amounts totaling \$840,190 and 284 swaps with derivative counterparties with notional amounts totaling \$1,040,190.

Table of Contents

Derivative assets are classified in the balance sheet under other assets and derivative liabilities are classified in the balance sheet under other liabilities. The following tables present information about derivative assets and derivative liabilities that are subject to enforceable master netting agreements as well as those not subject to enforceable master netting arrangements:

	Gross Amount	Gross Amounts Offset in the Balance Sheet	Net Amount Presented in the Balance Sheet
Offsetting of Derivative Assets:			
March 31, 2014			
Derivative assets subject to master netting arrangement:

Table of Contents

The following table presents the effect of the Corporation's derivative financial instruments on the income statement:

	Income Statement Location	Three Months Ended March 31,	
		2014	2013
Interest Rate Products	Other income	\$ (14)	\$ 136

The Corporation has agreements with each of its derivative counterparties that contain a provision where if the Corporation defaults on any of its indebtedness, including default where repayment of the indebtedness has not been accelerated by the lender, then the Corporation could also be declared in default on its derivative obligations. The Corporation also has agreements with certain of its derivative counterparties that contain a provision that if the Corporation fails to maintain its status as a well-capitalized institution, then the counterparty could terminate the derivative positions and the Corporation would be required to settle its obligations under the agreements. Certain of the Corporation's agreements with its derivative counterparties contain provisions where if a material or adverse change occurs that materially changes the Corporation's creditworthiness in an adverse manner, the Corporation may be required to fully collateralize its obligations under the derivative instrument.

Interest rate swap agreements generally require posting of collateral by either party under certain conditions. As of March 31, 2014 and December 31, 2013, the fair value of counterparty derivatives in a net liability position, which includes accrued interest but excludes any adjustment for non-performance risk related to these agreements, was \$37,545 and \$38,239, respectively. At March 31, 2014, the Corporation has posted collateral with derivative counterparties with a fair value of \$35,068 and cash collateral of \$3,472. At December 31, 2013, the Corporation had posted collateral with derivative counterparties with a fair value of \$37,427 and cash collateral of \$1,976. Additionally, if the Corporation had breached its agreements with its derivative counterparties it would be required to settle its obligations under the agreements at the termination value and would be required to pay an additional \$2,199 and \$2,224 as of March 31, 2014 and December 31, 2013, respectively, in excess of amounts previously posted as collateral with the respective counterparty.

The Corporation has entered into interest rate lock commitments to originate residential mortgage loans held for sale and forward commitments to sell residential mortgage loans to secondary market investors. These arrangements are considered derivative instruments. The fair values of the Corporation's rate lock commitments to customers and commitments with investors at March 31, 2014 and December 31, 2013 are not material.

COMMITMENTS, CREDIT RISK AND CONTINGENCIES

The Corporation has commitments to extend credit and standby letters of credit that involve certain elements of credit risk in excess of the amount stated in the consolidated balance sheet. The Corporation's exposure to credit loss in the event of non-performance by the customer is represented by the contractual amount of those instruments. The credit risk associated with loan commitments and standby letters of credit is essentially the same as that involved in extending loans to customers and is subject to normal credit policies. Since many of these commitments expire without being drawn upon, the total commitment amounts do not necessarily represent future cash flow requirements.

Following is a summary of off-balance sheet credit risk information:

	March 31, 2014	December 31, 2013
Commitments to extend credit	\$ 3,103,359	\$ 2,897,748
Standby letters of credit	118,281	114,298

At March 31, 2014, funding of 76.1% of the commitments to extend credit was dependent on the financial condition of the customer. The Corporation has the ability to withdraw such commitments at its discretion. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Based on management's credit evaluation of the customer, collateral may be deemed necessary. Collateral requirements vary and may include accounts receivable, inventory, property, plant and equipment and income-producing commercial properties.

Table of Contents

Standby letters of credit are conditional commitments issued by the Corporation that may require payment at a future date. The credit risk involved in issuing letters of credit is quantified on a quarterly basis, through the review of historical performance of the Corporation's portfolios and allocated as a liability on the Corporation's balance sheet.

The Corporation and its subsidiaries are involved in various pending and threatened legal proceedings in which claims for monetary damages and other relief are asserted. These actions include claims brought against the Corporation and its subsidiaries where the Corporation or a subsidiary acted as one or more of the following: a depository bank, lender, underwriter, fiduciary, financial advisor, broker or was engaged in other business activities. Although the ultimate outcome for any asserted claim cannot be predicted with certainty, the Corporation believes that it and its subsidiaries have valid defenses for all asserted claims. Reserves are established for legal claims when losses associated with the claims are judged to be probable and the amount of the loss can be reasonably estimated.

Based on information currently available, advice of counsel, available insurance coverage and established reserves, the Corporation does not anticipate, at the present time, that the aggregate liability, if any, arising out of such legal proceedings will have a material adverse effect on the Corporation's consolidated financial position. However, the Corporation cannot determine whether or not any claims asserted against it will have a material adverse effect on its consolidated results of operations in any future reporting period.

STOCK INCENTIVE PLANS

Restricted Stock

The Corporation issues restricted stock awards, consisting of both restricted stock and restricted stock units, to key employees under its Incentive Compensation Plans (Plans). The grant date fair value of the restricted stock awards is equal to the price of the Corporation's common stock on the grant date. For the three months ended March 31, 2014, the Corporation did not issue any restricted stock awards. For the three months ended March 31, 2013, the Corporation issued 295,705 restricted stock awards with aggregate weighted average grant date fair values of \$3,472, under these Plans. As of March 31, 2014, the Corporation had available up to 2,467,326 shares of common stock to issue under these Plans.

Under the Plans, more than half of the restricted stock awards granted to management are earned if the Corporation meets or exceeds certain financial performance results when compared to its peers. These performance-related awards are expensed ratably from the date that the likelihood of meeting the performance measure is probable through the end of a four-year vesting period. The service-based awards are expensed ratably over a three-year vesting period. The Corporation also issues discretionary service-based awards to certain employees that vest over five years.

The unvested restricted stock awards are eligible to receive cash dividends or dividend equivalents which are ultimately used to purchase additional shares of stock. Any additional shares of stock received as a result of cash dividends are subject to forfeiture if the requisite service period is not completed or the specified performance criteria are not met. These awards are subject to certain accelerated vesting provisions upon retirement, death, disability or in the event of a change of control as defined in the award agreements.

Share-based compensation expense related to restricted stock awards was \$532 and \$1,083 for the three months ended March 31, 2014 and 2013, the tax benefit of which was \$186 and \$379, respectively.

Table of Contents

The following table summarizes certain information concerning restricted stock awards:

	Three Months Ended March 31, 2014		2013	
	Awards	Weighted Average Grant Price	Awards	Weighted Average Grant Price
Unvested awards outstanding at beginning of period	1,729,033	\$ 10.23	1,913,073	\$ 9.17
Granted			295,705	11.74
Net adjustment due to performance	(19,002)	8.48		
Vested	(667,956)	9.01	(734,130)	7.90
Forfeited	(430)	10.69	(622)	9.23
Dividend reinvestment	9,612	13.01	12,008	11.78
Unvested awards outstanding at end of period	1,051,257	11.06	1,486,034	10.34

The total fair value of awards vested was \$8,631 and \$8,259 for the three months ended March 31, 2014 and 2013, respectively.

As of March 31, 2014, there was \$4,159 of unrecognized compensation cost related to unvested restricted stock awards, including \$56 that is subject to accelerated vesting under the Plan's immediate vesting upon retirement provision for awards granted prior to the adoption of ASC 718, *Compensation - Stock Compensation*. The components of the restricted stock awards as of March 31, 2014 are as follows:

	Service- Based Awards	Performance- Based Awards	Total
Unvested awards	262,189	789,068	1,051,257
Unrecognized compensation expense	\$ 1,390	\$ 2,769	\$ 4,159
Intrinsic value	\$ 3,516	\$ 10,574	\$ 14,090
Weighted average remaining life (in years)	1.91	2.02	1.99

Stock Options

The Corporation did not grant stock options during the three months ended March 31, 2014 or 2013. All outstanding stock options were granted at prices equal to the fair market value at the date of the grant, are primarily exercisable within ten years from the date of the grant and are fully vested. The Corporation issues shares of treasury stock or authorized but unissued shares to satisfy stock options exercised. Shares issued upon the exercise of stock options were 87,332 for the three months ended March 31, 2014. No stock options were exercised during the three months ended March 31, 2013.

The following table summarizes certain information concerning stock option awards:

	Three Months Ended March 31, 2014		2013	
	Shares	Weighted Average Exercise Price	Shares	Weighted Average Exercise Price
Options outstanding at beginning of period	533,524	\$ 11.50	640,050	\$ 13.21
Assumed from acquisition	304,785	5.77		
Exercised	(87,332)	6.05		
Forfeited	(48,172)	25.79	(263,589)	14.92
Options outstanding and exercisable at end of period	702,805	8.71	376,461	12.01

The intrinsic value of outstanding and exercisable stock options at March 31, 2014 was \$3,012.

Table of Contents*Warrants*

In conjunction with its participation in the UST's CPP, the Corporation issued to the UST a warrant to purchase up to 1,302,083 shares of the Corporation's common stock. Pursuant to Section 13(H) of the Warrant to Purchase Common Stock, the number of shares of common stock issuable upon exercise of the warrant was reduced in half to 651,042 shares on June 16, 2009, the date the Corporation completed a public offering. The warrant, which expires in 2019, has an exercise price of \$11.52 per share.

In conjunction with the Parkvale Financial Corporation (Parkvale) acquisition on January 1, 2012, the warrant issued by Parkvale to the UST under the CPP has been converted into a warrant to purchase up to 819,640 shares of the Corporation's common stock. This warrant, which was recorded at its fair value on January 1, 2012, expires in 2018 and has an exercise price of \$5.81 per share.

In conjunction with the ANNB acquisition, the warrant issued by ANNB to the UST under the CPP has been converted into a warrant to purchase up to 342,564 shares of the Corporation's common stock. The warrant, which was recorded at its fair value on April 6, 2013, expires in 2019 and has an exercise price of \$3.57 per share.

RETIREMENT PLANS

The Corporation sponsors the Retirement Income Plan (RIP), a qualified noncontributory defined benefit pension plan that covered substantially all salaried employees hired prior to January 1, 2008. The RIP covers employees who satisfied minimum age and length of service requirements. During 2006, the Corporation amended the RIP such that effective January 1, 2007 benefits were earned based on the employee's compensation each year. The Corporation's funding guideline has been to make annual contributions to the RIP each year, if necessary, such that minimum funding requirements have been met. The Corporation amended the RIP on October 20, 2010 to be frozen effective December 31, 2010.

The Corporation also sponsors two supplemental non-qualified retirement plans. The ERISA Excess Retirement Plan provides retirement benefits equal to the difference, if any, between the maximum benefit allowable under the Internal Revenue Code and the amount that would be provided under the RIP, if no limits were applied. The Basic Retirement Plan (BRP) is applicable to certain officers whom the Board of Directors designates. Officers participating in the BRP receive a benefit based on a target benefit percentage based on years of service at retirement and a designated tier as determined by the Board of Directors. When a participant retires, the basic benefit under the BRP is a monthly benefit equal to the target benefit percentage times the participant's highest average monthly cash compensation during five consecutive calendar years within the last ten calendar years of employment. This monthly benefit was reduced by the monthly benefit the participant receives from Social Security, the RIP, the ERISA Excess Retirement Plan and the annuity equivalent of the three percent automatic contributions to the qualified 401(k) defined contribution plan and the ERISA Excess Lost Match Plan. The BRP was frozen as of December 31, 2008. The ERISA Excess Retirement Plan was frozen as of December 31, 2010.

The net periodic benefit cost for the defined benefit plans includes the following components:

	Three Months Ended	
	March 31,	
	2014	2013
Service cost	\$ 16	\$ 18

Edgar Filing: FNB CORP/FL/ - Form 10-Q

Interest cost	1,596	1,427
Expected return on plan assets	(2,487)	(2,270)
Amortization:		
Unrecognized net transition asset	(5)	(23)
Unrecognized prior service cost (credit)	2	2
Unrecognized loss	337	557
Net periodic pension cost	\$ (541)	\$ (289)

Table of Contents

The Corporation's subsidiaries participate in a qualified 401(k) defined contribution plan under which employees may contribute a percentage of their salary. Employees are eligible to participate upon their first day of employment. Under this plan, the Corporation matches 100% of the first four percent that the employee defers. Additionally, substantially all employees receive an automatic contribution of three percent of compensation at the end of the year and the Corporation may make an additional contribution of up to two percent depending on the Corporation achieving its performance goals for the plan year. The Corporation's contribution expense was \$2,570 and \$2,335 for the three months ended March 31, 2014 and 2013, respectively.

The Corporation also sponsors an ERISA Excess Lost Match Plan for certain officers. This plan provides retirement benefits equal to the difference, if any, between the maximum benefit allowable under the Internal Revenue Code and the amount that would have been provided under the qualified 401(k) defined contribution plan, if no limits were applied.

INCOME TAXES

The Corporation bases its provision for income taxes upon income before income taxes, adjusted for the effect of certain tax-exempt income and non-deductible expenses. In addition, the Corporation reports certain items of income and expense in different periods for financial reporting and tax return purposes. The Corporation recognizes the tax effects of these temporary differences currently in the deferred income tax provision or benefit. The Corporation computes deferred tax assets or liabilities based upon the differences between the financial statement and income tax bases of assets and liabilities using the applicable marginal tax rate.

The Corporation must evaluate the probability that it will ultimately realize the full value of its deferred tax assets. Realization of the Corporation's deferred tax assets is dependent upon a number of factors including the existence of any cumulative losses in prior periods, the amount of taxes paid in available carry-back periods, expectations for future earnings, applicable tax planning strategies and assessment of current and future economic and business conditions. The Corporation establishes a valuation allowance when it is more likely than not that the Corporation will not be able to realize a benefit from its deferred tax assets, or when future deductibility is uncertain.

At March 31, 2014, the Corporation anticipates that it will not utilize state net operating loss carryforwards and other net deferred tax assets at certain of its subsidiaries and has recorded a valuation allowance against the state deferred tax assets. The Corporation believes that, except for the portion which is covered by the valuation allowance, it is more likely than not the Corporation will realize the benefits of its deferred tax assets, net of the valuation allowance, at March 31, 2014, based on the level of historical taxable income and taxes paid in available carry-back periods.

COMPREHENSIVE INCOME

The components of comprehensive income, net of related tax, are as follows:

	Three Months Ended March 31,	
	2014	2013
Net income	\$ 34,524	\$ 28,538
Other comprehensive income (loss):		
Securities available for sale:		

Edgar Filing: FNB CORP/FL/ - Form 10-Q

Unrealized gains (losses) arising during the period, net of tax expense (benefit) of \$5,681 and \$(99)	10,550	(184)
Reversal of non-credit related losses on debt securities not expected to be sold, net of tax expense of \$3,335	6,192	
Reclassification adjustment for gains included in net income, net of tax expense of \$3,311 and \$239	(6,150)	(445)
Derivative instruments:		
Unrealized gains (losses) arising during the period, net of tax expense (benefit) of \$1,117 and \$(373)	2,074	(694)
Pension and postretirement benefit obligations:		
Unrealized gains arising during the period, net of tax expense of \$117 and \$188	217	349
Other comprehensive income (loss)	12,883	(974)
Comprehensive income	\$ 47,407	\$ 27,564

Table of Contents

The following table presents changes in accumulated other comprehensive income, net of tax, by component:

	Unrealized Net Gains (Losses) on Securities Available for Sale	Non-Credit Related Loss on Debt Securities not Expected to be Sold	Unrealized Losses on Derivative Instruments	Unrecognized Pension and Postretirement Obligations	Total
Three Months Ended March 31, 2014					
Balance at beginning of period	\$ (11,874)	\$ (6,192)	\$ (6,586)	\$ (32,272)	\$ (56,924)
Other comprehensive income (loss) before reclassifications	10,550	6,192	2,074	217	19,033
Amounts reclassified from accumulated other comprehensive income	(6,150)				(6,150)
Net current period other comprehensive income (loss)	4,400	6,192	2,074	217	12,883
Balance at end of period	\$ (7,474)	\$	\$ (4,512)	\$ (32,055)	\$ (44,041)

The following table presents a summary of the reclassifications out of accumulated other comprehensive income:

Three Months Ended March 31, 2014

Details About Accumulated Other Comprehensive Income Component	Amount Reclassified from Other Comprehensive Income	Affected Line Item in the Statement where Net Income is Presented
Unrealized net gains on securities available for sale (1)	\$ (9,461)	Net securities gains
	(3,311)	Tax expense
	\$ (6,150)	

(1) For additional detail related to unrealized net gains on securities available for sale and related amounts reclassified from accumulated other comprehensive income see the Securities note in this Report.

EARNINGS PER COMMON SHARE

Basic earnings per common share is calculated by dividing net income available to common stockholders by the weighted average number of shares of common stock outstanding net of unvested shares of restricted stock.

Diluted earnings per common share is calculated by dividing net income available to common stockholders by the weighted average number of shares of common stock outstanding, adjusted for the dilutive effect of potential common shares issuable for stock options, warrants and restricted shares, as calculated using the treasury stock method. Adjustments to the weighted average number of shares of common stock outstanding are made only when such adjustments dilute earnings per common share.

Table of Contents

The following table sets forth the computation of basic and diluted earnings per common share:

	Three Months Ended March 31,	
	2014	2013
Net income	\$ 34,524	\$ 28,538
Preferred stock dividends	2,322	
Net income available to common stockholders	\$ 32,202	\$ 28,538
Basic weighted average common shares outstanding	162,186,395	139,650,495
Net effect of dilutive stock options, warrants, restricted stock and convertible debt	1,780,851	1,415,695
Diluted weighted average common shares outstanding	163,967,246	141,066,190
Earnings per common share:		
Basic	\$ 0.20	\$ 0.20
Diluted	\$ 0.20	\$ 0.20

For the three months ended March 31, 2014 and 2013, 51,641 and 71,555 shares of common stock, respectively, related to stock options and warrants were excluded from the computation of diluted earnings per common share because the exercise price of the shares was greater than the average market price of the common shares and, therefore, the effect would be anti-dilutive.

CASH FLOW INFORMATION

Following is a summary of supplemental cash flow information:

Three Months Ended March 31	2014	2013
Interest paid on deposits and other borrowings	\$ 10,576	\$ 13,489
Income taxes paid		
Transfers of loans to other real estate owned	4,849	3,271
Financing of other real estate owned sold		113

BUSINESS SEGMENTS

The Corporation operates in four reportable segments: Community Banking, Wealth Management, Insurance and Consumer Finance.

The Community Banking segment provides commercial and consumer banking services. Commercial banking solutions include corporate banking, small business banking, investment real estate financing, asset based lending, capital markets and lease financing. Consumer banking products and services include deposit products, mortgage lending, consumer lending and a complete suite of mobile and online banking services.

The Wealth Management segment provides a broad range of personal and corporate fiduciary services including the administration of decedent and trust estates. In addition, it offers various alternative products, including securities brokerage and investment advisory services, mutual funds and annuities.

The Insurance segment includes a full-service insurance agency offering all lines of commercial and personal insurance through major carriers. The Insurance segment also includes a reinsurer.

The Consumer Finance segment primarily makes installment loans to individuals and purchases installment sales finance contracts from retail merchants. The Consumer Finance segment activity is funded through the sale of the Corporation's subordinated notes at the finance company's branch offices.

Table of Contents

The following tables provide financial information for these segments of the Corporation. The information provided under the caption "Parent and Other" represents operations not considered to be reportable segments and/or general operating expenses of the Corporation, and includes the parent company, other non-bank subsidiaries and eliminations and adjustments which are necessary for purposes of reconciliation to the consolidated amounts.

	Community Banking	Wealth Management	Insurance	Consumer Finance	Parent and Other	Consolidated
At or for the Three Months Ended March 31, 2014						
Interest income	\$ 106,691	\$	\$ 25	\$ 9,365	\$ 1,799	\$ 117,880
Interest expense	8,248			846	961	10,055
Net interest income	98,443		25	8,519	838	107,825
Provision for loan losses	5,296			1,457	253	7,006
Non-interest income	31,913	7,323	4,210	660	(2,036)	42,070

Total intangibles	687,545	11,236	10,830	1,809		711,420

FAIR VALUE MEASUREMENTS

The Corporation uses fair value measurements to record fair value adjustments to certain financial assets and liabilities and to determine fair value disclosures. Securities available for sale and derivatives are recorded at fair value on a recurring basis. Additionally, from time to time, the Corporation may be required to record at fair value other assets on a non-recurring basis, such as mortgage loans held for sale, certain impaired loans, OREO and certain other assets.

Fair value is defined as an exit price, representing the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Fair value measurements are not adjusted for transaction costs. Fair value is a market-based measure considered from the perspective of a market participant who holds the asset or owes the liability rather than an entity-specific measure.

In determining fair value, the Corporation uses various valuation approaches, including market, income and cost approaches. ASC 820, *Fair Value Measurements and Disclosures*, establishes a hierarchy for inputs used in measuring fair value that maximizes the use of observable inputs and minimizes the use of unobservable inputs by requiring that observable inputs be used when available. Observable inputs are inputs that market participants would use in pricing the asset or liability, which are developed based on market data obtained from sources independent of the Corporation. Unobservable inputs reflect the Corporation's assumptions about the assumptions that market participants would use in pricing an asset or liability, which are developed based on the best information available in the circumstances.

Table of Contents

The fair value hierarchy gives the highest priority to unadjusted quoted market prices in active markets for identical assets or liabilities (Level 1 measurement) and the lowest priority to unobservable inputs (Level 3 measurement). The fair value hierarchy is broken down into three levels based on the reliability of inputs as follows:

Measurement Category**Definition**

Level 1	valuation is based upon unadjusted quoted market prices for identical instruments traded in active markets.
Level 2	valuation is based upon quoted market prices for similar instruments traded in active markets, quoted market prices for identical or similar instruments traded in markets that are not active and model-based valuation techniques for which all significant assumptions are observable in the market or can be corroborated by market data.
Level 3	valuation is derived from other valuation methodologies including discounted cash flow models and similar techniques that use significant assumptions not observable in the market. These unobservable assumptions reflect estimates of assumptions that market participants would use in determining fair value.

A financial instrument's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement.

Following is a description of the valuation methodologies the Corporation uses for financial instruments recorded at fair value on either a recurring or non-recurring basis:

Securities Available For Sale

Securities available for sale consists of both debt and equity securities. These securities are recorded at fair value on a recurring basis. At March 31, 2014, 99.8% of these securities used valuation methodologies involving market-based or market-derived information, collectively Level 1 and Level 2 measurements, to measure fair value. The remaining 0.2% of these securities were measured using model-based techniques, with primarily unobservable (Level 3) inputs.

The Corporation closely monitors market conditions involving assets that have become less actively traded. If the fair value measurement is based upon recent observable market activity of such assets or comparable assets (other than forced or distressed transactions) that occur in sufficient volume, and do not require significant adjustment using unobservable inputs, those assets are classified as Level 1 or Level 2; if not, they are classified as Level 3. Making this assessment requires significant judgment.

The Corporation uses prices from independent pricing services and, to a lesser extent, indicative (non-binding) quotes from independent brokers, to measure the fair value of investment securities. The Corporation validates prices received from pricing services or brokers using a variety of methods, including, but not limited to, comparison to secondary pricing services, corroboration of pricing by reference to other independent market data such as secondary broker quotes and relevant benchmark indices, and review of pricing by Corporate personnel familiar with market liquidity and other market-related conditions.

Derivative Financial Instruments

The Corporation determines its fair value for derivatives using widely accepted valuation techniques including discounted cash flow analysis on the expected cash flows of each derivative. This analysis reflects contractual terms of the derivative, including the period to maturity and uses observable market based inputs, including interest rate curves and implied volatilities.

The Corporation incorporates credit valuation adjustments to appropriately reflect both its own non-performance risk and the respective counterparty's non-performance risk in the fair value measurements. In adjusting the fair value of its derivative contracts for the effect of non-performance risk, the Corporation considers the impact of netting and any applicable credit enhancements, such as collateral postings, thresholds, mutual puts and guarantees.

Table of Contents

Although the Corporation has determined that the majority of the inputs used to value its derivatives fall within Level 2 of the fair value hierarchy, the credit valuation adjustments associated with its derivatives utilize Level 3 inputs, such as estimates of current credit spreads to evaluate the likelihood of default by itself and its counterparties. However, as of March 31, 2014, the Corporation has assessed the significance of the impact of the credit valuation adjustments on the overall valuation of its derivative positions and has determined that the credit valuation adjustments are not significant to the overall valuation of its derivatives. As a result, the Corporation has determined that its derivative valuations in their entirety are classified in Level 2 of the fair value hierarchy.

Residential Mortgage Loans Held For Sale

These loans are carried at the lower of cost or fair value. Under lower of cost or fair value accounting, periodically, it may be necessary to record non-recurring fair value adjustments. Fair value, when recorded, is based on independent quoted market prices and is classified as Level 2.

Impaired Loans

The Corporation reserves for commercial loan relationships greater than or equal to \$500 that the Corporation considers impaired as defined in ASC 310 at the time the Corporation identifies the loan as impaired based upon the present value of expected future cash flows available to pay the loan, or based upon the fair value of the collateral less estimated selling costs where a loan is collateral dependent. Collateral may be real estate and/or business assets including equipment, inventory and accounts receivable.

The Corporation determines the value of real estate based on appraisals by licensed or certified appraisers. The value of business assets is generally based on amounts reported on the business financial statements. Management must rely on the financial statements prepared and certified by the borrower or its accountants in determining the value of these business assets on an ongoing basis which may be subject to significant change over time. Based on the quality of information or statements provided, management may require the use of business asset appraisals and site-inspections to better value these assets. The Corporation may discount appraised and reported values based on management's historical knowledge, changes in market conditions from the time of valuation or management's knowledge of the borrower and the borrower's business. Since not all valuation inputs are observable, the Corporation classifies these non-recurring fair value determinations as Level 2 or Level 3 based on the lowest level of input that is significant to the fair value measurement.

The Corporation reviews and evaluates impaired loans no less frequently than quarterly for additional impairment based on the same factors identified above.

Other Real Estate Owned

OREO is comprised of commercial and residential real estate properties obtained in partial or total satisfaction of loan obligations plus some bank owned real estate. OREO acquired in settlement of indebtedness is recorded at the lower of carrying amount of the loan or fair value less costs to sell. Subsequently, these assets are carried at the lower of carrying value or fair value less costs to sell. Accordingly, it may be necessary to record non-recurring fair value adjustments. Fair value is generally based upon appraisals by licensed or certified appraisers and other market information and is classified as Level 2 or Level 3.

Table of Contents

The following table presents the balances of assets and liabilities measured at fair value on a recurring basis:

	Level 1	Level 2	Level 3	Total
March 31, 2014				
Assets measured at fair value				
Available for sale debt securities:

		\$ 43,369		\$ 43,369

There were no transfers of assets or liabilities between the hierarchy levels for 2014. During 2013, the Corporation transferred out of Level 2 and Level 3 equity securities that now trade on NASDAQ. At December 31, 2013, the securities are classified as Level 1. Additionally during 2013, the Corporation transferred out of Level 3 and into Level 2 four single name TPS.

Table of Contents

The following table presents additional information about assets measured at fair value on a recurring basis and for which the Corporation has utilized Level 3 inputs to determine fair value:

	Pooled Trust Preferred Collateralized Debt Obligations	Other Debt Securities	Equity Securities	Residential Non-Agency Collateralized Mortgage Obligations	Total
Three Months Ended March 31, 2014					
Balance at beginning of period	\$ 31,595		\$ 410	\$ 1,744	\$ 33,749
Total gains (losses) realized/unrealized:					
Included in earnings	13,766				13,766

Transfers into Level 3					
Balance at end of period	\$ 31,595	\$	\$ 410	\$ 1,744	\$ 33,749

The Corporation reviews fair value hierarchy classifications on a quarterly basis. Changes in the observability of the valuation attributes may result in reclassification of certain financial assets or liabilities. Such reclassifications are reported as transfers in/out of Level 3 at fair value at the beginning of the period in which the changes occur. See the Securities footnote in the Notes to Consolidated Financial Statements section of this Report for information relating to significant unobservable inputs used in determining Level 3 fair values.

Edgar Filing: FNB CORP/FL/ - Form 10-Q

For the three months ended March 31, 2014 and 2013, there were no gains or losses included in earnings attributable to the change in unrealized gains or losses relating to assets still held as of those dates. The total gains included in earnings are in the net securities gains line item in the Consolidated Statements of Comprehensive Income.

Table of Contents

In accordance with GAAP, from time to time, the Corporation measures certain assets at fair value on a non-recurring basis. These adjustments to fair value usually result from the application of the lower of cost or fair value accounting or write-downs of individual assets. Valuation methodologies used to measure these fair value adjustments were previously described. For assets measured at fair value on a non-recurring basis still held at the balance sheet date, the following table provides the hierarchy level and the fair value of the related assets or portfolios:

	Level 1	Level 2	Level 3	Total
March 31, 2014				
Impaired loans		\$ 9,422	\$	\$ 9,422
Other real estate owned		1,373	3,286	4,659
December 31, 2013				
Impaired loans		\$ 3,235	\$ 59	\$ 3,294
Other real estate owned		4,485	14,957	19,442

Impaired loans measured or re-measured at fair value on a non-recurring basis during the three months ended March 31, 2014 had a carrying amount of \$9,525 and an allocated allowance for loan losses of \$1,268 at March 31, 2014. The allocated allowance is based on fair value of \$9,422 less estimated costs to sell of \$1,165. The allowance for loan losses includes a provision applicable to the current period fair value measurements of \$622, which was included in the provision for loan losses for the three months ended March 31, 2014.

OREO with a carrying amount of \$4,946 was written down to \$4,099 (fair value of \$4,659 less estimated costs to sell of \$560), resulting in a loss of \$847, which was included in earnings for the three months ended March 31, 2014.

Fair Value of Financial Instruments

The following methods and assumptions were used to estimate the fair value of each financial instrument:

Cash and Cash Equivalents, Accrued Interest Receivable and Accrued Interest Payable. For these short-term instruments, the carrying amount is a reasonable estimate of fair value.

Securities. For both securities available for sale and securities held to maturity, fair value equals the quoted market price from an active market, if available, and is classified within Level 1. If a quoted market price is not available, fair value is estimated using quoted market prices for similar securities or pricing models, and is classified as Level 2. Where there is limited market activity or significant valuation inputs are unobservable, securities are classified within Level 3. Under current market conditions, assumptions used to determine the fair value of Level 3 securities have greater subjectivity due to the lack of observable market transactions.

Loans. The fair value of fixed rate loans is estimated by discounting the future cash flows using the current rates at which similar loans would be made to borrowers with similar credit ratings and for the same remaining maturities less an illiquidity discount. The fair value of variable and adjustable rate loans approximates the carrying amount. Due to the significant judgment involved in evaluating credit quality, loans are classified within Level 3 of the fair value hierarchy.

Bank Owned Life Insurance. The Corporation owns general account, separate account and hybrid account bank owned life insurance (BOLI). The fair value of the general account BOLI is based on the insurance contract cash surrender value. The separate account BOLI has a stable value protection (SVP) component that mitigates the impact of market

value fluctuations of the underlying account assets. The SVP component guarantees the book value, which is the insurance contract cash surrender value. The hybrid account BOLI also has a guaranteed book value, except it does not require a stable value protection component. Instead, the insurance carrier incurs the investment return risk, which is imbedded in their fee structure.

If the Corporation's separate account and hybrid account BOLI book value exceeds the market value of the underlying securities, then the fair value of the separate account and hybrid account BOLI is the cash surrender value. If the Corporation's separate account and hybrid account BOLI book value is less than the market value of the underlying securities, then the fair value of the separate account and hybrid account BOLI is the quoted market price of the underlying securities.

Table of Contents

Derivative Assets and Liabilities. The Corporation determines its fair value for derivatives using widely accepted valuation techniques including discounted cash flow analysis on the expected cash flows of each derivative. This analysis reflects contractual terms of the derivative, including the period to maturity and uses observable market based inputs, including interest rate curves and implied volatilities.

The Corporation incorporates credit valuation adjustments to appropriately reflect both its own non-performance risk and the respective counterparty's non-performance risk in the fair value measurements. In adjusting the fair value of its derivative contracts for the effect of non-performance risk, the Corporation considers the impact of netting and any applicable credit enhancements, such as collateral postings, thresholds, mutual puts and guarantees.

Although the Corporation has determined that the majority of the inputs used to value its derivatives fall within Level 2 of the fair value hierarchy, the credit valuation adjustments associated with its derivatives utilize Level 3 inputs, such as estimates of current credit spreads to evaluate the likelihood of default by itself and its counterparties. However, as of March 31, 2014, the Corporation has assessed the significance of the impact of the credit valuation adjustments on the overall valuation of its derivative positions and has determined that the credit valuation adjustments are not significant to the overall valuation of its derivatives. As a result, the Corporation has determined that its derivative valuations in their entirety are classified in Level 2 of the fair value hierarchy.

Deposits. The estimated fair value of demand deposits, savings accounts and certain money market deposits is the amount payable on demand at the reporting date because of the customer's ability to withdraw funds immediately. The fair value of fixed-maturity deposits is estimated by discounting future cash flows using rates currently offered for deposits of similar remaining maturities.

Short-Term Borrowings. The carrying amounts for short-term borrowings approximate fair value for amounts that mature in 90 days or less. The fair value of subordinated notes is estimated by discounting future cash flows using rates currently offered.

Long-Term and Junior Subordinated Debt. The fair value of long-term and junior subordinated debt is estimated by discounting future cash flows based on the market prices for the same or similar issues or on the current rates offered to the Corporation for debt of the same remaining maturities.

Loan Commitments and Standby Letters of Credit. Estimates of the fair value of these off-balance sheet items were not made because of the short-term nature of these arrangements and the credit standing of the counterparties. Also, unfunded loan commitments relate principally to variable rate commercial loans, typically are non-binding, and fees are not normally assessed on these balances.

Nature of Estimates. Many of the estimates presented herein are based upon the use of highly subjective information and assumptions and, accordingly, the results may not be precise. Management believes that fair value estimates may not be comparable to other financial institutions due to the wide range of permitted valuation techniques and numerous estimates which must be made. Further, because the disclosed fair value amounts were estimated as of the balance sheet date, the amounts actually realized or paid upon maturity or settlement of the various financial instruments could be significantly different.

Table of Contents

The fair values of the Corporation's financial instruments are as follows:

	Carrying Amount	Fair Value	Fair Value Measurements		
			Level 1	Level 2	Level 3
March 31, 2014					
Financial Assets					
Cash and cash equivalents	\$ 246,253	\$ 246,253	\$ 246,253	\$	\$

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Management's Discussion and Analysis represents an overview of the consolidated results of operations and financial condition of the Corporation and highlights material changes to the financial condition and results of operations at and for the three-month period ended March 31, 2014. This Discussion and Analysis should be read in conjunction with the consolidated financial statements and notes thereto contained herein and the Corporation's consolidated financial statements and notes thereto and Management's Discussion and Analysis included in its 2013 Annual Report on Form 10-K filed with the SEC on February 28, 2014. The Corporation's results of operations for the three months ended March 31, 2014 are not necessarily indicative of results to be expected for the year ending December 31, 2014.

IMPORTANT CAUTIONARY STATEMENT REGARDING FORWARD-LOOKING INFORMATION

The Corporation makes statements in this Report, and may from time to time make other statements, regarding its outlook for earnings, revenues, expenses, capital levels, liquidity levels, asset levels, asset quality and other matters regarding or affecting the Corporation and its future business and operations that are forward-looking statements within the meaning of the Private Securities Litigation Reform Act. Forward-looking statements are typically identified by words such as believe, plan, expect, anticipate, see, look, intend, outlook, project, goal, will, should and other similar words and expressions. Forward-looking statements are subject to numerous assumptions, risks and uncertainties, which change over time.

Forward-looking statements speak only as of the date made. The Corporation does not assume any duty and does not undertake to update forward-looking statements. Actual results or future events could differ, possibly materially, from those anticipated in forward-looking statements, as well as from historical performance.

The Corporation's forward-looking statements are subject to the following principal risks and uncertainties:

The Corporation's businesses, financial results and balance sheet values are affected by business and economic conditions, including the following:

Changes in interest rates and valuations in debt, equity and other financial markets.

Disruptions in the liquidity and other functioning of U.S. and global financial markets.

The impact on federal regulated agencies that have oversight or review of the Corporation's business and securities activities.

Actions by the FRB, UST and other government agencies, including U.S. fiscal debt, budget and tax matters and those that impact money supply and market interest rates.

Changes in customers, suppliers and other counterparties performance and creditworthiness which adversely affect loan utilization rates, delinquencies, defaults and counterparty ability to meet credit and other obligations.

Slowing or reversal of the current moderate economic recovery and uncertainty concerning unemployment levels.

Changes in customer preferences and behavior, whether due to changing business and economic conditions, legislative and regulatory initiatives, or other factors.

Effect of changes in the level of checking or savings account deposits on the Corporation's funding costs and net interest margin.

Ability to achieve expense management and revenue enhancement initiatives, including as a result of business and economic cyclicalities, seasonality, changes in the operating environment, growth of the Corporation's business and/or acquisitions, increased expenses/income restrictions related to regulatory changes and unexpected expenses related to litigation and other matters.

Legal and regulatory developments could affect the Corporation's ability to operate its businesses, financial condition, results of operations, competitive position, reputation, or pursuit of attractive acquisition opportunities. Reputational impacts could affect matters such as business generation and retention, liquidity, funding, and ability to attract and retain management. These developments could include:

Changes resulting from legislative and regulatory reforms, including broad-based restructuring of financial industry regulation; changes to laws and regulations involving tax, pension, bankruptcy, consumer protection, and other industry aspects; and changes in accounting policies and principles. The Corporation will continue to be impacted by extensive reforms provided for in the Dodd-Frank Act and otherwise growing out of the recent financial crisis, the precise nature, extent and timing of which, and their impact on the Corporation, remains uncertain.

Table of Contents

The impact on fee income opportunities resulting from the limit imposed under the Durbin Amendment of the Dodd-Frank Act on the maximum permissible interchange fee that banks may collect from merchants for debit card transactions.

Changes to regulations governing bank capital and liquidity standards, including due to the Dodd-Frank Act, Volcker rule and Basel III initiatives.

Impact on business and operating results of any costs associated with obtaining rights in intellectual property, the adequacy of the Corporation's intellectual property protection in general and rapid technological developments and changes. The Corporation's ability to anticipate and respond to technological changes can also impact its ability to respond to customer needs and meet competitive demands.

Business and operating results are affected by the Corporation's ability to identify and effectively manage risks inherent in its businesses, including, where appropriate, through effective use of third-party insurance, derivatives, swaps, and capital management techniques, and to meet evolving regulatory capital standards.

Increased competition, whether due to consolidation among financial institutions; realignments or consolidation of branch offices, legal and regulatory developments, industry restructuring or other causes, can have an impact on customer acquisition, growth and retention and on credit spreads and product pricing, which can affect market share, deposits and revenues.

As demonstrated by the ANNB, PVF and BCSB acquisitions and the pending acquisition of OBA, the Corporation grows its business in part by acquiring from time to time other financial services companies, financial services assets and related deposits. These acquisitions often present risks and uncertainties, including, the possibility that the transaction cannot be consummated; regulatory issues; cost, or difficulties, involved in integration and conversion of the acquired businesses after closing; inability to realize expected cost savings, efficiencies and strategic advantages; the extent of credit losses in acquired loan portfolios and extent of deposit attrition; and the potential dilutive effect to current shareholders. In addition, with respect to the acquisitions of ANNB, PVF, BCSB and the pending acquisition of OBA, the Corporation may experience difficulties in expanding into a new market area, including retention of customers and key personnel of ANNB, PVF, BCSB and OBA.

Competition can have an impact on customer acquisition, growth and retention and on credit spreads and product pricing, which can affect market share, deposits and revenues. Industry restructuring in the current environment could also impact the Corporation's business and financial performance through changes in counterparty creditworthiness and performance and the competitive and regulatory landscape. The Corporation's ability to anticipate and respond to technological changes can also impact its ability to respond to customer needs and meet competitive demands.

Business and operating results can also be affected by widespread disasters, dislocations, terrorist activities, cyber-attacks or international hostilities through their impacts on the economy and financial markets.

Failure in or breach of the Corporation's operational or security system or infrastructure, or those of third party vendors or other service providers, including as a result of cyber-attacks.

The Corporation provides greater detail regarding some of these factors in the Risk Factors section of the 2013 Annual Report on Form 10-K and subsequent SEC filings. The Corporation's forward-looking statements may also be subject to other risks and uncertainties, including those that may be discussed elsewhere in this Report or in SEC filings, accessible on the SEC's website at www.sec.gov and on the Corporation's website at www.fnbcorporation.com. The Corporation has included these web addresses as inactive textual references only. Information on these websites is not part of this document.

CRITICAL ACCOUNTING POLICIES

A description of the Corporation's critical accounting policies is included in the Management's Discussion and Analysis of Financial Condition and Results of Operations section of the Corporation's 2013 Annual Report on Form 10-K filed with the SEC on February 28, 2014 under the heading Application of Critical Accounting Policies. There have been no significant changes in critical accounting policies or the assumptions and judgments utilized in applying these policies since the year ended December 31, 2013.

Table of Contents**OVERVIEW**

The Corporation, headquartered in Hermitage, Pennsylvania, is a regional diversified financial services company operating in six states and three major metropolitan areas, including Pittsburgh, Pennsylvania, Baltimore, Maryland and Cleveland, Ohio. As of March 31, 2014, the Corporation had 283 banking offices throughout Pennsylvania, Ohio, Maryland and West Virginia. The Corporation provides a full range of commercial banking, consumer banking and wealth management solutions through its subsidiary network which is led by its largest affiliate, FNBPA. Commercial banking solutions include corporate banking, small business banking, investment real estate financing, business credit, capital markets and lease financing. Consumer banking products and services include deposit products, mortgage lending, consumer lending and a complete suite of mobile and online banking services. Wealth management services include asset management, private banking and insurance. The Corporation also operates Regency, which had 72 consumer finance offices in Pennsylvania, Ohio, Kentucky and Tennessee as of March 31, 2014.

RESULTS OF OPERATIONS***Three Months Ended March 31, 2014 Compared to the Three Months Ended March 31, 2013***

Net income available to common stockholders for the three months ended March 31, 2014 was \$32.2 million or \$0.20 per diluted common share, compared to net income available to common stockholders for the three months ended March 31, 2013 of \$28.5 million or \$0.20 per diluted common share. The increase in net income available to common stockholders is a result of an increase of \$14.7 million in net interest income, combined with an increase of \$8.5 million in non-interest income and a decrease of \$0.5 million in the provision for loan losses, partially offset by a \$15.4 million increase in non-interest expense and a \$2.3 million increase in preferred stock dividends. The results for the first quarter of 2014 reflect the BCSB, PVF and ANNB acquisitions that closed on February 15, 2014, October 12, 2013 and April 6, 2013, respectively, and included a total of \$5.3 million in merger costs, primarily relating to the BCSB acquisition. The results for the first quarter of 2013 included \$0.4 million in merger costs, primarily relating to the ANNB acquisition. Quarterly average common shares outstanding increased 22.9 million shares or 16.2% to 164.0 million shares for the first quarter of 2014, primarily as a result of the BCSB, PVF and ANNB acquisitions, combined with the common stock offering completed in November 2013.

For the three months ended March 31, 2014, the Corporation's return on average equity was 7.65% and its return on average assets was 1.00%, compared to 8.20% and 0.96%, respectively, for the three months ended March 31, 2013. The Corporation's return on average tangible equity was 14.57% and its return on average tangible assets was 1.11% for the first quarter of 2014, compared to 17.30% and 1.07%, respectively, for the same period of 2013. Average equity for the first quarter of 2014 reflects the impact of the BCSB, PVF and ANNB acquisitions, combined with the common and preferred stock offerings completed in November 2013.

In addition to evaluating its results of operations in accordance with GAAP, the Corporation routinely supplements its evaluation with an analysis of certain non-GAAP financial measures, such as return on average tangible equity and return on average tangible assets. The Corporation believes these non-GAAP financial measures provide information useful to investors in understanding the Corporation's operating performance and trends, and facilitate comparisons with the performance of the Corporation's peers. The non-GAAP financial measures used by the Corporation may differ from the non-GAAP financial measures other financial institutions use to measure their results of operations. Non-GAAP financial measures should be viewed in addition to, and not as an alternative for, the Corporation's reported results prepared in accordance with GAAP.

Table of Contents

The following tables summarize the Corporation's non-GAAP financial measures for the periods indicated derived from amounts reported in the Corporation's financial statements (dollars in thousands):

	Three Months Ended March 31,	
	2014	2013
<u>Return on average tangible equity:</u>		
Net income (annualized)	\$ 140,016	\$ 115,739
Amortization of intangibles, net of tax (annualized)	6,018	5,076
	\$ 146,034	\$ 120,815
Average total stockholders' equity	\$ 1,829,601	\$ 1,410,827
Less: Average intangibles	(827,344)	(712,467)
	\$ 1,002,257	\$ 698,360
Return on average tangible equity	14.57%	17.30%
<u>Return on average tangible assets:</u>		
Net income (annualized)	\$ 140,016	\$ 115,739
Amortization of intangibles, net of tax (annualized)	6,018	5,076
	\$ 146,034	\$ 120,815
Average total assets	\$ 13,989,304	\$ 12,004,759
Less: Average intangibles	(827,344)	(712,467)
	\$ 13,161,960	\$ 11,292,291
Return on average tangible assets	1.11%	1.07%

Table of Contents

The following table provides information regarding the average balances and yields earned on interest earning assets and the average balances and rates paid on interest-bearing liabilities (dollars in thousands):

	Three Months Ended March 31,					
	2014			2013		
	Average Balance	Interest Income/ Expense	Yield/ Rate	Average Balance	Interest Income/ Expense	Yield/ Rate
Assets						
Interest earning assets:						
Interest bearing deposits with banks	\$ 46,193	\$ 26	0.23%	\$ 30,071	\$ 14	0.19%
Taxable investment securities (1)	2,346,808	12,450	2.07	2,084,966	10,597	1.98
Non-taxable investment securities (2)	149,611	1,996	5.34	169,421	2,337	5.52
Residential mortgage loans held for sale	4,844	136	11.16	32,357	280	3.46
Loans (2) (3)	9,695,742	104,994	4.39	8,156,278	93,631	4.64
Total interest earning assets (2)	12,243,198	119,602	3.95	10,473,093	106,859	4.12
Cash and due from banks	189,619			172,969		
Allowance for loan losses	(110,385)			(104,838)		
Premises and equipment	160,111			138,694		
Other assets	1,506,761			1,324,841		
Total Assets	\$ 13,989,304			\$ 12,004,759		
Liabilities						
Interest-bearing liabilities:						
Deposits:						
Interest bearing demand	\$ 4,099,093	1,515	0.15	\$ 3,649,049	1,502	0.17
Savings	1,494,248	172	0.05	1,244,250	168	0.05
Certificates and other time	2,695,067	5,462	0.82	2,493,703	6,595	1.07
Customer repurchase agreements	827,851	462	0.22	806,806	485	0.24
Other short-term borrowings	390,707	732	0.75	208,541	622	1.19
Long-term debt	217,894	1,071	1.99	91,134	774	3.44
Junior subordinated debt	76,048	641	3.42	204,025	1,876	3.73
Total interest-bearing liabilities (2)	9,800,908	10,055	0.42	8,697,508	12,022	0.56
Non-interest bearing demand	2,222,786			1,744,465		
Other liabilities	136,009			151,959		
Total Liabilities	12,159,703			10,593,932		
Stockholders equity	1,829,601			1,410,827		
	\$ 13,989,304			\$ 12,004,759		

**Total Liabilities and Stockholders
Equity**

Excess of interest earning assets over interest-bearing liabilities	\$ 2,442,290	\$ 1,775,585
Fully tax-equivalent net interest income	109,547	94,837
Tax-equivalent adjustment	(1,722)	(1,741)
Net interest income	\$ 107,825	\$ 93,096
Net interest spread	3.53%	3.56%
Net interest margin (2)	3.62%	3.66%

- (1) The average balances and yields earned on taxable investment securities are based on historical cost.
- (2) The interest income amounts are reflected on a fully taxable equivalent (FTE) basis, a non-GAAP measure, which adjusts for the tax benefit of income on certain tax-exempt loans and investments using the federal statutory tax rate of 35% for each period presented. The yields on earning assets and the net interest margin are presented on an FTE and annualized basis. The rates paid on interest-bearing liabilities are also presented on an annualized basis. The Corporation believes this measure to be the preferred industry measurement of net interest income and provides relevant comparison between taxable and non-taxable amounts.
- (3) Average balances include non-accrual loans. Loans consist of average total loans less average unearned income. The amount of loan fees included in interest income on loans is immaterial.

Table of Contents*Net Interest Income*

Net interest income, which is the Corporation's principal source of revenue, is the difference between interest income from earning assets (loans, securities, interest bearing deposits with banks and federal funds sold) and interest expense paid on liabilities (deposits, customer repurchase agreements and short- and long-term borrowings). For the three months ended March 31, 2014, net interest income, which comprised 71.9% of net revenue (net interest income plus non-interest income) compared to 73.5% for the same period in 2013, was affected by the general level of interest rates, changes in interest rates, the shape of the yield curve, the level of non-accrual loans and changes in the amount and mix of interest earning assets and interest-bearing liabilities.

Net interest income, on an FTE basis, increased \$14.7 million or 15.5% from \$94.8 million for the first quarter of 2013 to \$109.5 million for the first quarter of 2014. Average earning assets increased \$1.7 billion or 16.9% and average interest-bearing liabilities increased \$1.1 billion or 12.7% from 2013 due to the acquisitions of BCSB, PVF and ANNB, combined with organic growth in loans and deposits and customer repurchase agreements. The Corporation's net interest margin was 3.62% for the first quarter of 2014, compared to 3.66% for the same period of 2013, as loan yields declined faster than deposit rates primarily as a result of the current low interest rate environment. Additionally, 3 basis points of the 4 basis point narrowing of the net interest margin was attributable to lower accretable yield benefit on acquired loans. Details on changes in tax equivalent net interest income attributed to changes in interest earning assets, interest-bearing liabilities, yields and cost of funds are set forth in the preceding table.

The following table sets forth certain information regarding changes in net interest income attributable to changes in the volumes of interest earning assets and interest-bearing liabilities and changes in the rates for the three months ended March 31, 2014 compared to the three months ended March 31, 2013 (in thousands):

	Volume	Rate	Net
Interest Income			
Interest bearing deposits with banks	\$ 9	\$ 3	\$ 12
Securities	1,166	346	1,512
Residential mortgage loans held for sale	(384)	240	(144)
Loans	17,725	(6,362)	11,363
	18,516	(5,773)	12,743
Interest Expense			
Deposits:			
Interest bearing demand	242	(229)	13
Savings	31	(27)	4
Certificates and other time	495	(1,628)	(1,133)
Customer repurchase agreements	12	(35)	(23)
Other short-term borrowings	100	10	110
Long-term debt	728	(431)	297
Junior subordinated debt	(1,090)	(145)	(1,235)
	518	(2,485)	(1,967)

Net Change	\$ 17,998	\$ (3,288)	\$ 14,710
------------	-----------	------------	-----------

- (1) The amount of change not solely due to rate or volume changes was allocated between the change due to rate and the change due to volume based on the net size of the rate and volume changes.
- (2) Interest income amounts are reflected on an FTE basis which adjusts for the tax benefit of income on certain tax-exempt loans and investments using the federal statutory tax rate of 35% for each period presented. The Corporation believes this measure to be the preferred industry measurement of net interest income and provides relevant comparison between taxable and non-taxable amounts.

Interest income, on an FTE basis, of \$119.6 million for the first quarter of 2014, increased \$12.7 million or 11.9% from the same quarter of 2013, primarily due to increased earning assets, partially offset by lower yields. During the first quarter of 2014 and 2013, the Corporation recognized a benefit of \$0.6 million and \$1.3 million, respectively, in accretable yield on acquired loans. The increase in earning assets was primarily driven by a \$1.5 billion or 18.9% increase in average loans, including \$588.5 million or 7.2% of organic growth, \$156.3 million in average loans added in the BCSB acquisition, \$535.7 million in average loans added in the PVF acquisition and \$258.9 million in average loans added in the ANNB acquisition. The yield on earning assets decreased 17 basis points from the first quarter of 2013 to 3.95% for the first quarter of 2014, reflecting the decreases in market interest rates, competitive pressures and the above-mentioned changes in accretable yield benefit on acquired loans.

Table of Contents

Interest expense of \$10.1 million for the first quarter of 2014 decreased \$2.0 million or 16.4% from the same quarter of 2013 due to lower rates paid, partially offset by growth in interest-bearing liabilities. The rate paid on interest-bearing liabilities decreased 14 basis points to 0.42% for the first quarter of 2014, compared to 0.56% for the first quarter of 2013, reflecting changes in interest rates and a favorable shift in deposit mix to lower-cost transaction deposits and customer repurchase agreements. The growth in average interest-bearing liabilities was primarily attributable to growth in average deposits and customer repurchase agreements, which increased by \$1.4 billion or 14.1%, including \$71.7 million or 0.7% of organic growth, \$263.1 million added in the BCSB acquisition, \$707.6 million added in the PVF acquisition and \$358.3 million added in the ANNB acquisition.

Provision for Loan Losses

The provision for loan losses is determined based on management's estimates of the appropriate level of allowance for loan losses needed to absorb probable losses inherent in the existing loan portfolio, after giving consideration to charge-offs and recoveries for the period.

The provision for loan losses of \$7.0 million during the first quarter of 2014 decreased \$0.5 million from the same period of 2013, primarily due to a decrease of \$2.0 million in the provision for the acquired portfolio, partially offset by an increase of \$1.5 million in the provision for the originated portfolio. During the first quarter of 2014, net charge-offs were \$5.6 million, or 0.23% (annualized) of average loans, compared to \$4.2 million, or 0.21% (annualized) of average loans, for the same period of 2013, reflecting consistent, solid performance in the Corporation's loan portfolio. The ratio of the allowance for loan losses to total loans equaled 1.13% and 1.31% at March 31, 2014 and 2013, respectively, which reflects the Corporation's overall favorable credit quality performance along with the addition of loans acquired in the BCSB, PVF and ANNB acquisitions without a corresponding allowance for loan losses in accordance with acquired loan accounting rules. For additional information relating to the allowance and provision for loan losses, refer to the Allowance and Provision for Loan Losses section of this Management's Discussion and Analysis.

Non-Interest Income

Total non-interest income of \$42.1 million for the first quarter of 2014 increased \$8.5 million or 25.2% from the same period of 2013. The variances in significant individual non-interest income items are further explained in the following paragraphs.

Service charges on loans and deposits of \$15.3 million for the first quarter of 2014 decreased \$1.1 million or 6.9% from the same period of 2013, primarily due to a decrease of \$2.3 million in interchange fees as the Corporation became subject to the new rules regarding debit card interchange fees imposed by the Durbin Amendment of the Dodd-Frank Act effective July 1, 2013. Other service charges increased \$1.0 million over this same period, reflecting the impact of organic growth and the expanded customer base due to the BCSB, PVF and ANNB acquisitions. For information relating to the impact of the new regulations on the Corporation's income from interchange fees, refer to the Dodd-Frank Wall Street Reform and Consumer Protection Act section of this Management's Discussion and Analysis.

Trust fees of \$4.8 million for the three months ended March 31, 2014 increased \$0.7 million or 16.6% from the same period of 2013, primarily driven by cross-selling efforts collaborating with internal business partners, added sales professionals and improved market conditions. The market value of assets under management increased \$363.4 million or 12.6% to \$3.2 billion over this same period as a result of organic growth and improved stock market conditions.

Insurance commissions and fees of \$4.9 million for the three months ended March 31, 2014 increased \$0.5 million or 11.6% from the same period of 2013, primarily due to the implementation of revenue-enhancing strategies and initiatives.

Securities commissions of \$2.4 million for the first quarter of 2014 decreased \$0.6 million or 18.8% from the same period of 2013 primarily due to a system conversion combined with the impact of severe weather conditions throughout the Corporation's market area.

Table of Contents

Net securities gains were \$9.5 million for the first quarter of 2014, compared to \$0.7 million for the first quarter of 2013. During the first quarter of 2014, the Corporation strategically sold its entire portfolio of pooled TPS with net proceeds of \$51.5 million and a gain of \$13.8 million. Of the 23 pooled securities sold, one was determined to be a disallowed investment under the Volcker Rule of the Dodd-Frank Act, and as such, was required to be disposed of by July 2015. Partially offsetting this gain was a loss of \$4.3 million relating to the sale of other securities. By selling these securities, the Corporation strengthened the risk profile of its investment portfolio, improved its capital levels due to lowered risk-weighted assets and generated leverageable capital to support future growth.

Mortgage banking revenue, which is primarily derived from the gain on sale of loans, was \$0.2 million for the first quarter of 2014 and decreased \$0.9 million from the same period of 2013 due to lower volume and an increase in the amortization of mortgage servicing rights. During the first quarter of 2014, the Corporation sold \$22.6 million of residential mortgage loans, compared to \$68.2 million for the same period of 2013, as part of its ongoing strategy of generally selling 30-year residential mortgage loans. The volume decrease is an industry-wide trend as refinance activity has greatly diminished.

Income from BOLI of \$2.2 million for the first three months of 2014 increased \$0.5 million or 33.6% from the first three months of 2013, primarily as a result of continued management actions designed to improve performance, along with additional policies acquired in the BCSB, PVF and ANNB acquisitions.

Other non-interest income of \$2.8 million for the first quarter of 2014 increased \$0.5 million or 21.1% from the same period of 2013. During the first quarter of 2014, the Corporation recognized a \$0.7 million gain on the sale of impaired commercial loans. Additionally, during the first quarter of 2014, the Corporation recorded \$0.4 million more in dividends on non-marketable equity securities and \$0.3 million more in fees earned through its commercial loan interest rate swap program compared to the same quarter of 2013. Partially offsetting these increases in other non-interest income is a gain of \$0.6 million recognized during the first quarter of 2013 relating to the successful harvesting of a mezzanine financing relationship by its merchant banking subsidiary.

Non-Interest Expense

Total non-interest expense of \$94.2 million for the first quarter of 2014 increased \$15.4 million or 19.5% from the same period of 2013. The variances in the individual non-interest expense items are further explained in the following paragraphs with an overriding theme of the expense increases primarily related to the branch offices and operations acquired from BCSB, PVF and ANNB.

Salaries and employee benefits of \$49.0 million for the three months ended March 31, 2014 increased \$5.0 million or 11.5% from the same period of 2013. This increase primarily relates to the BCSB, PVF and ANNB acquisitions, combined with new hires, merit increases and higher medical insurance costs in 2014. Additionally, the Corporation recorded a net charge of \$1.9 million during the first quarter of 2014 relating to the mutual conclusion of a consulting agreement with a retired executive.

Occupancy and equipment expense of \$15.4 million for the first quarter of 2014 increased \$3.2 million or 26.2% from the same period of 2013, primarily resulting from the BCSB, PVF and ANNB acquisitions, combined with an increase in equipment depreciation expense due to upgrades to incorporate new technology, primarily relating to online and mobile banking applications and an increase in snow removal expense resulting from severe weather conditions throughout the Corporation's market area.

Amortization of intangibles expense of \$2.3 million for the first quarter of 2014 increased \$0.4 million or 18.6% from the same period of 2013, primarily due to core deposit intangibles recorded as a result of the BCSB, PVF and ANNB

acquisitions.

Outside services expense remained the same at \$7.2 million for both the three months ended March 31, 2014 and 2013. For the first quarter of 2014, compared to the same quarter of 2013, consulting fees decreased \$0.8 million due to a refund of \$0.4 million of previously paid fees for system enhancements, while other outside services, legal expenses and insurance expenses increased \$0.5 million, \$0.2 million and \$0.1 million, respectively, primarily resulting from the BCSB, PVF and ANNB acquisitions and costs related to compliance with new regulations, including capital stress testing.

Federal Deposit Insurance Corporation (FDIC) insurance of \$3.0 million for the first quarter of 2014 increased \$0.6 million or 26.7% from the same period of 2013, primarily due to an increased asset base resulting from the acquisitions of PVF and ANNB.

Table of Contents

The Corporation recorded \$5.3 million in merger-related costs associated with the BCSB acquisition during the first quarter of 2014. Merger-related costs recorded during the same period of 2013 in conjunction with the ANNB acquisition were \$0.4 million.

Other non-interest expense increased \$1.1 million to \$12.0 million for the first quarter of 2014, compared to \$10.9 million for the first quarter of 2013. For the first quarter of 2014 compared to the same quarter of 2013, OREO expense increased \$0.6 million as the 2013 period was low due to gains on sale of OREO properties absent in 2014, state taxes increased \$0.5 million resulting from a higher assessment base related to state tax code changes and supplies increased \$0.4 million primarily due to the BCSB, PVF and ANNB acquisitions. These increases were partially offset by a decrease of \$0.4 million in marketing expenses due to strategically lower spending during the first three months of 2014.

Income Taxes

The Corporation's income tax expense of \$14.2 million for the first quarter of 2014 increased \$2.4 million or 20.1% from the same period of 2012. The effective tax rate of 29.1% for the first quarter of 2014 decreased slightly from 29.3% for the same period of 2013, reflecting the benefit of tax credits. Both periods' tax rates are lower than the 35% federal statutory tax rate due to the tax benefits primarily resulting from tax-exempt income on investments, loans and BOLI, as well as tax credits.

LIQUIDITY

The Corporation's goal in liquidity management is to satisfy the cash flow requirements of customers and the operating cash needs of the Corporation with cost-effective funding. The Board of Directors of the Corporation has established an Asset/Liability Management Policy in order to achieve and maintain earnings performance consistent with long-term goals while maintaining acceptable levels of interest rate risk, a well-capitalized balance sheet and adequate levels of liquidity. The Board of Directors of the Corporation has also established a Contingency Funding Policy to address liquidity crisis conditions. These policies designate the Corporate Asset/Liability Committee (ALCO) as the body responsible for meeting these objectives. The ALCO, which includes members of executive management, reviews liquidity on a periodic basis and approves significant changes in strategies that affect balance sheet or cash flow positions. Liquidity is centrally managed on a daily basis by the Corporation's Treasury Department.

FNBPA generates liquidity from its normal business operations. Liquidity sources from assets include payments from loans and investments, as well as the ability to securitize, pledge or sell loans, investment securities and other assets. Liquidity sources from liabilities are generated primarily through the banking offices of FNBPA in the form of deposits and customer repurchase agreements. The Corporation also has access to reliable and cost-effective wholesale sources of liquidity. Short- and long-term funds can be acquired to help fund normal business operations, as well as to serve as contingency funding in the event that the Corporation would be faced with a liquidity crisis.

The principal sources of the parent company's liquidity are its strong existing cash resources plus dividends it receives from its subsidiaries. These dividends may be impacted by the parent's or its subsidiaries' capital needs, statutory laws and regulations, corporate policies, contractual restrictions, profitability and other factors. Cash on hand at the parent has been favorably impacted by management strategies over the last few quarters. These include strong earnings, a consistent dividend and capital actions. The capital actions include the raising of \$161.3 million via the issuance of common and preferred equity during the fourth quarter of 2013. These proceeds were utilized to redeem various TPS obligations of the Corporation totaling \$138.0 million, with \$115.0 million occurring during the fourth quarter of 2013 and \$23.0 million occurring during the first quarter of 2014. The positive results of these strategies can be seen in the parent's cash position as it has increased from \$103.3 million at September 31, 2013 to \$145.9 million at December 31,

2013 and decreased to \$119.9 million at March 31, 2014.

Management believes cash levels for the Corporation are appropriate given the current environment. Two metrics that are used to gauge the adequacy of the parent company's cash position are the Liquidity Coverage Ratio (LCR) and Months of Cash on Hand (MCH). The LCR is defined as the sum of cash on hand plus projected cash inflows over the next 12 months divided by cash outflows over the next 12 months. The LCR was 2.1 times at March 31, 2014 and 2.2 times at December 31, 2013. The internal limit for LCR is for the ratio to be greater than 1.0 time. The MCH is defined as the number of months of corporate expenses that can be covered by the cash on hand. The MCH was 12.7 months at March 31, 2014 and 15.2 months at December 31, 2013. The internal limit for MCH is for the ratio to be greater than 12 months. In addition, the Corporation issues subordinated notes on a regular basis. Subordinated notes increased \$0.5 million or 0.2% during the first three months of 2014 to \$214.6 million at March 31, 2014.

Table of Contents

The liquidity position of the Corporation continues to be strong as evidenced by its ability to generate growth in relationship-based accounts. Period-end transaction deposits and customer repurchase agreements organically grew \$230.0 million, or 10.8% annualized for the first quarter of 2014, and represent 76.0% of total deposits and customer repurchase agreements at March 31, 2014. Total deposits and customer repurchase agreements organically increased \$160.2 million or 5.8% for the first quarter of 2014 as the solid growth in lower cost, relationship-based accounts was offset by a continued planned decline in time deposits. Time deposits organically declined \$70.1 million or 10.7% over this same period, reflecting the plan to reduce these accounts due to the Corporation's strong liquidity position and customers shifting to lower cost transactional products.

FNBPA had unused wholesale credit availability of \$4.9 billion or 34.4% of bank assets at March 31, 2014 and \$4.8 billion or 35.6% of bank assets at December 31, 2013. These sources include the availability to borrow from the FHLB, the FRB, correspondent bank lines and access to brokered certificates of deposit. In addition to credit availability, FNBPA also possesses salable unpledged government and agency securities which could be sold to meet funding needs. These securities totaled \$926.0 million, or 6.5% of total assets and \$533.1 million, or 4.0% of total assets as of March 31, 2014 and December 31, 2013, respectively. The ALCO Policy minimum level is 3.0%.

Another metric for measuring liquidity risk is the liquidity gap analysis. The following liquidity gap analysis (in thousands) for the Corporation as of March 31, 2014 compares the difference between cash flows from existing assets and liabilities over future time intervals. Management seeks to limit the size of the liquidity gaps so that sources and uses of funds are reasonably matched in the normal course of business. A reasonably matched position lays a better foundation for dealing with additional funding needs during a potential liquidity crisis. The twelve-month cumulative gap to total assets was (0.2)% and (1.1)% as of March 31, 2014 and December 31, 2013, respectively.

	Within 1 Month	2-3 Months	4-6 Months	7-12 Months	Total 1 Year
Assets					
Loans	\$ 281,009	\$ 444,897	\$ 606,323	\$ 1,128,444	\$ 2,460,673
Investments	89,511	80,592	114,111	196,529	480,743
	370,520	525,489	720,434	1,324,973	2,941,416
Liabilities					
Non-maturity deposits	74,073	148,146	222,220	444,439	888,878
Time deposits	160,784	298,864	460,235	636,366	1,556,249
Borrowings	319,364	38,610	59,068	107,254	524,296
	554,221	485,620	741,523	1,188,059	2,969,423
Period Gap (Assets - Liabilities)	\$ (183,701)	\$ 39,869	\$ (21,089)	\$ 136,914	\$ (28,007)
Cumulative Gap	\$ (183,701)	\$ (143,832)	\$ (164,921)	\$ (28,007)	
Cumulative Gap to Total Assets	(1.3)%	(1.0)%	(1.1)%	(0.2)%	

In addition, the ALCO regularly monitors various liquidity ratios and stress scenarios of the Corporation's liquidity position. The stress scenarios forecast that adequate funding will be available even under severe conditions. Management believes the Corporation has sufficient liquidity available to meet its normal operating and contingency funding cash needs.

MARKET RISK

Market risk refers to potential losses arising from changes in interest rates, foreign exchange rates, equity prices and commodity prices. The Corporation is primarily exposed to interest rate risk inherent in its lending and deposit-taking activities as a financial intermediary. To succeed in this capacity, the Corporation offers an extensive variety of financial products to meet the diverse needs of its customers. These products sometimes contribute to interest rate risk for the Corporation when product groups do not complement one another. For example, depositors may want short-term deposits while borrowers desire long-term loans.

Changes in market interest rates may result in changes in the fair value of the Corporation's financial instruments, cash flows and net interest income. The ALCO is responsible for market risk management which involves devising policy guidelines, risk measures and limits, and managing the amount of interest rate risk and its effect on net interest income and capital. The Corporation uses derivative financial instruments for interest rate risk management purposes and not for trading or speculative purposes.

Table of Contents

Interest rate risk is comprised of repricing risk, basis risk, yield curve risk and options risk. Repricing risk arises from differences in the cash flow or repricing between asset and liability portfolios. Basis risk arises when asset and liability portfolios are related to different market rate indexes, which do not always change by the same amount. Yield curve risk arises when asset and liability portfolios are related to different maturities on a given yield curve; when the yield curve changes shape, the risk position is altered. Options risk arises from embedded options within asset and liability products as certain borrowers have the option to prepay their loans when rates fall, while certain depositors can redeem their certificates of deposit early when rates rise.

The Corporation uses an asset/liability model to measure its interest rate risk. Interest rate risk measures utilized by the Corporation include earnings simulation, economic value of equity (EVE) and gap analysis.

Gap analysis and EVE are static measures that do not incorporate assumptions regarding future business. Gap analysis, while a helpful diagnostic tool, displays cash flows for only a single rate environment. EVE's long-term horizon helps identify changes in optionality and longer-term positions. However, EVE's liquidation perspective does not translate into the earnings-based measures that are the focus of managing and valuing a going concern. Net interest income simulations explicitly measure the exposure to earnings from changes in market rates of interest. In these simulations, the Corporation's current financial position is combined with assumptions regarding future business to calculate net interest income under various hypothetical rate scenarios. The ALCO reviews earnings simulations over multiple years under various interest rate scenarios on a periodic basis. Reviewing these various measures provides the Corporation with a comprehensive view of its interest rate risk profile.

The following repricing gap analysis (in thousands) as of March 31, 2014 compares the difference between the amount of interest earning assets and interest-bearing liabilities subject to repricing over a period of time. Management utilizes the repricing gap analysis as a diagnostic tool in managing net interest income and EVE risk measures.

	Within 1 Month	2-3 Months	4-6 Months	7-12 Months	Total 1 Year
Assets					
Loans	\$ 3,349,754	\$ 896,554	\$ 538,825	\$ 928,282	\$ 5,713,415
Investments	94,230	93,018	133,662	258,567	579,477
	3,443,984	989,572	672,487	1,186,849	6,292,892
Liabilities					
Non-maturity deposits	2,555,891				2,555,891
Time deposits	168,783	300,162	460,938	637,367	1,567,250
Borrowings	1,082,889	29,961	13,845	16,809	1,143,504
	3,807,563	330,123	474,783	654,176	5,266,645
Off-balance sheet	(200,000)				(200,000)
Period Gap (assets liabilities + off-balance sheet)	\$ (563,579)	\$ 659,449	\$ 197,704	\$ 532,673	\$ 826,247
Cumulative Gap	\$ (563,579)	\$ 95,870	\$ 293,574	\$ 826,247	
Cumulative Gap to Assets	(3.9)%	0.7%	2.0%	5.7%	

The twelve-month cumulative repricing gap to total assets was 5.7% and 5.5% as of March 31, 2014 and December 31, 2013, respectively. The positive cumulative gap positions indicate that the Corporation has a greater amount of repricing earning assets than repricing interest-bearing liabilities over the subsequent twelve months. If interest rates increase then net interest income will increase and, conversely, if interest rates decrease then net interest income will decrease.

The allocation of non-maturity deposits and customer repurchase agreements to the one-month maturity category above is based on the estimated sensitivity of each product to changes in market rates. For example, if a product's rate is estimated to increase by 50% as much as the market rates, then 50% of the account balance was placed in this category.

Table of Contents

The following net interest income metrics were calculated using rate shocks which move market rates in an immediate and parallel fashion. The variance percentages represent the change between the net interest income or EVE calculated under the particular rate scenario versus the net interest income or EVE that was calculated assuming market rates as of March 31, 2014.

The following table presents an analysis of the potential sensitivity of the Corporation's net interest income and EVE to changes in interest rates:

	March 31, 2014	December 31, 2013	ALCO Limits
Net interest income change (12 months):			
+ 300 basis points	3.9%	3.5%	n/a
+ 200 basis points	2.8%	2.5%	(5.0)%
+ 100 basis points	1.4%	1.1%	(5.0)%
- 100 basis points	(2.7)%	(2.1)%	(5.0)%
Economic value of equity:			
+ 300 basis points	(0.5)%	(2.6)%	(25.0)%
+ 200 basis points	0.6%	(1.5)%	(15.0)%
+ 100 basis points	1.3%	(0.5)%	(10.0)%
- 100 basis points	(4.1)%	(4.3)%	(10.0)%

The Corporation also models rate scenarios which move all rates gradually over twelve months (Rate Ramps) and also scenarios that gradually change the shape of the yield curve. A +300 basis point Rate Ramp increases net interest income (12 months) by 2.8% at March 31, 2014 and 2.5% at December 31, 2013.

The Corporation's strategy is generally to manage to a neutral interest rate risk position. However, given the current interest rate environment, the interest rate risk position has been managed to an asset-sensitive position. Currently, rising rates are expected to have a modest, positive effect on net interest income versus net interest income if rates remained unchanged. The Corporation has maintained a relatively stable net interest margin over the last five years despite market rate volatility.

The ALCO utilizes several tactics to manage the Corporation's interest rate risk position. As mentioned earlier, the growth in transaction deposits provides funding that is less interest rate-sensitive than time deposits and wholesale borrowings. On the lending side, the Corporation regularly sells long-term fixed-rate residential mortgages to the secondary market and has been successful in the origination of consumer and commercial loans with short-term repricing characteristics. Total variable and adjustable-rate loans were 58.4% and 59.9% of total loans as of March 31, 2014 and December 31, 2013, respectively. This decrease was mainly due to the acquisition of BCSB. The investment portfolio is used, in part, to manage the Corporation's interest rate risk position. The Corporation has managed the duration of its investment portfolio over the last year to be slightly longer given the asset sensitive nature of its balance sheet. At March 31, 2014, the portfolio duration was 3.6 versus a 3.3 level at December 31, 2013. Finally, the Corporation has made use of interest rate swaps to commercial borrowers (commercial swaps) to manage its interest rate risk position as the commercial swaps effectively increase adjustable-rate loans. As of March 31, 2014, the commercial swaps totaled \$839.0 million of notional principal, with \$45.5 million in notional swap principal originated during 2014. The success of the aforementioned tactics has resulted in an asset-sensitive position. During the first quarter of 2014, long-term interest rates decreased slightly causing cash flows from certain mortgage-related portfolios to shorten slightly, which contributed to an increase in the asset-sensitive interest rate risk position during the first quarter of 2014. The addition of BCSB providing less rate sensitive deposits, and the borrowing of two FHLB

advances also contributed to the change in the interest rate risk position. These increases in the net asset-sensitivity position were slightly offset by a slight increase in the use of overnight borrowings compared to the prior quarter. In order to manage the interest rate risk position and generate incremental earnings, between December 2012 and August 2013 the Corporation entered into four separate interest rate derivative agreements totaling \$200.0 million of notional principal in swaps which pay a variable interest rate and receive a fixed interest rate. For additional information regarding interest rate swaps, see the Derivative Instruments footnote in this Report.

The Corporation recognizes that all asset/liability models have some inherent shortcomings. Asset/liability models require certain assumptions to be made, such as prepayment rates on interest earning assets and repricing impact on non-maturity deposits, which may differ from actual experience. These business assumptions are based upon the Corporation's experience, business plans and available industry data. While management believes such assumptions to be reasonable, there can be no assurance that modeled results will be achieved. Furthermore, the metrics are based upon the balance sheet structure as of the valuation date and do not reflect the planned growth or management actions that could be taken.

Table of Contents

RISK MANAGEMENT

The Corporation's Board of Directors recognizes that, as a financial institution, the Corporation takes on a certain amount of risk in every business decision, transaction and activity. The Corporation's Board of Directors and management have identified six major categories of risk: credit risk, market risk, liquidity risk, reputational risk, operational risk and regulatory compliance risk. In its oversight role of the Corporation's risk management function, the Board of Directors is mindful that risk management is not about eliminating risk, but rather is about identifying, accepting and managing risks so as to optimize total shareholder value, while balancing prudent business considerations and safety and soundness.

The Corporation supports its risk management process through a governance structure involving its Board of Directors and senior management. The Corporation's Risk Committee helps ensure that business decisions in the organization are executed within its desired risk profile. The Risk Committee has the following oversight responsibilities:

identification, measurement, assessment and monitoring of enterprise-wide risk across the Corporation and its subsidiaries;

development of appropriate and meaningful risk metrics to use in connection with the oversight of the Corporation's businesses and strategies;

review and assessment of the Corporation's policies and practices to manage the Corporation's credit, market, liquidity and operating risk (including technology, operational, compliance and fiduciary risks); and

identification and implementation of risk management best practices.

The Risk Committee serves as the primary point of contact between the Corporation's Board of Directors and the FNBPA Risk Management Committee, which is the senior management level committee responsible for FNBPA's risk management.

As noted above, the Corporation's principal subsidiary, FNBPA, has a Risk Management Committee comprised of senior management. The purpose of this committee is to provide regular oversight of specific areas of risk with respect to the level of risk and risk management structure. Management has also established an Operational Risk Committee that is responsible for identifying, evaluating and monitoring operational risks across the Corporation. The Operational Risk Committee is responsible for evaluating and approving appropriate remediation efforts to address identified operational risks. The Operational Risk Committee provides periodic reports concerning operational risks to the FNBPA Risk Management Committee. The FNBPA Risk Management Committee reports on a regular basis to the Corporation's Risk Committee regarding the enterprise-wide risk profile of the Corporation and other significant risk management issues. The Corporation's Chief Risk Officer is responsible for the design and implementation of the Corporation's enterprise-wide risk management strategy and framework and ensures the coordinated and consistent implementation of risk management initiatives and strategies on a day-to-day basis. FNBPA's Compliance Department, which reports to the Chief Risk Officer, is responsible for developing policies and procedures and monitoring FNBPA's compliance with applicable laws and regulations. Further, the Corporation's audit function performs an independent assessment of the Corporation's internal controls environment and plays an integral role in

testing the operation of internal controls systems and reporting findings to management and the Corporation's Audit Committee. Both the Corporation's Risk Committee and Audit Committee regularly report on risk-related matters to the Corporation's Board of Directors. In addition, both the Corporation's Risk Committee and FNBPA's Risk Management Committee regularly assess the Corporation's enterprise-wide risk profile and provide guidance on actions needed to address key and emerging risk issues.

The Board of Directors believes that the Corporation's enterprise-wide risk management process is effective since it includes the following material components:

enables the Board of Directors to assess the quality of the information it receives;

enables the Board of Directors to understand the businesses, investments and financial, accounting, regulatory and strategic considerations of the Corporation and its subsidiaries, and the risks that they face;

enables the Board of Directors to oversee and assess how senior management evaluates risk; and

enables the Board of Directors to assess appropriately the quality of the Corporation's enterprise-wide risk management process.

Table of Contents**DEPOSITS AND CUSTOMER REPURCHASE AGREEMENTS**

Following is a summary of deposits and customer repurchase agreements (in thousands):

	March 31, 2014	December 31, 2013
Non-interest bearing demand	\$ 2,353,444	\$ 2,200,081
Interest bearing demand	4,238,715	3,968,679
Savings	1,569,090	1,423,399
Certificates of deposit and other time deposits	2,777,487	2,606,073
Total deposits	10,938,736	10,198,232
Customer repurchase agreements	787,712	841,741
Total deposits and customer repurchase agreements	\$ 11,726,448	\$ 11,039,973

Total deposits and customer repurchase agreements increased by \$686.5 million, or 6.2%, to \$11.7 billion at March 31, 2014, compared to December 31, 2013, primarily as a result of the acquisition of BCSB combined with organic growth in relationship-based transaction deposits, which are comprised of demand (non-interest bearing and interest bearing) and savings accounts, partially offset by a decrease in customer repurchase agreements and the continued planned decline in time deposits. Generating growth in relationship-based transaction deposits and customer repurchase agreements remains a key focus of the Corporation.

NON-PERFORMING ASSETS

Credit quality for the first three months of 2014 reflects continued solid performance by the Corporation. During the first three months of 2014, non-performing loans and OREO increased \$4.5 million, from \$118.1 million at December 31, 2013 to \$122.6 million at March 31, 2014, primarily as the result of increases of \$1.3 million in non-accrual loans, \$0.7 million in TDRs and \$2.5 million in OREO. The increase in non-accrual loans was primarily due to migration within the consumer loan portfolios, the increase in TDRs was primarily attributed to loans secured by residential mortgages and the increase in OREO was a result of the BCSB acquisition.

Following is a summary of non-performing loans, by class (in thousands):

	March 31, 2014	December 31, 2013
Commercial real estate	\$ 45,931	\$ 43,648
Commercial and industrial	4,420	6,683
Commercial leases	744	734
Total commercial loans and leases	51,095	51,065
Direct installment	13,346	10,577
Residential mortgages	12,662	14,012
Indirect installment	1,399	1,202

Edgar Filing: FNB CORP/FL/ - Form 10-Q

Consumer lines of credit	921	597
Other		
	\$ 79,423	\$ 77,453

Table of Contents

Following is a summary of performing, non-performing and non-accrual TDRs, by class (in thousands):

	Performing	Non- Performing	Non-Accrual	Total
March 31, 2014

	\$ 10,220	\$ 18,698	\$ 12,705	\$ 41,623

ALLOWANCE FOR LOAN LOSSES

Commercial loans are individually risk-rated by the loan relationship manager, approved by the appropriate loan authority or committee and reviewed on an ongoing basis by the Loan Review department. In general, commercial loan risk ratings are affirmed at least annually. Troubled, classified and non-performing loans and borrowers are reviewed more frequently by the Special Attention Credit Committee. Impaired commercial relationships with exposures greater than or equal to \$500 thousand are subject to specific measurement of impairment and the establishment of an ASC 310 specific reserve, if any. These reserve allocations are generally collateral dependent. Consumer and residential real estate loans are generally reviewed in the aggregate due to their homogeneous nature. Non-account specific ASC 450 reserve allocations, along with allocations to impaired loan relationships under \$500 thousand, are applied a quantitative loss factor in a pool based on migration analysis for commercial loans, roll-rate analysis for consumer and residential loans and the qualitative factors described below.

Management evaluates the impact of various qualitative factors which pose additional risks that may not adequately be addressed in the quantitative analyses described above. Historical loss rates for each loan category may be adjusted for levels of and trends in loan volumes, large exposures, charge-offs, recoveries, delinquency, non-performing and other impaired loans. In addition, management takes into consideration the impact of changes to lending policies; the experience and depth of lending management and staff; the results of internal loan reviews; concentrations of credit; mergers and acquisitions; weighted average risk ratings; competition, legal and regulatory risk; market uncertainty and collateral illiquidity; national and local economic trends; or any other common risk factor that might affect loss experience across one or more components of the portfolio. The assessment of relevant economic factors indicates that the Corporation's primary markets historically tend to lag the national economy, with local economies in the Corporation's primary market areas also improving or weakening, as the case may be, but at a more measured rate than the national trends. Regional economic factors influencing management's estimate of allowance for loan losses include uncertainty of the labor markets in the regions the Corporation serves and a contracting labor force due, in part, to productivity growth and industry consolidations. The determination of this component of the allowance for loan losses is particularly dependent on the judgment of management.

The allowance for loan losses at March 31, 2014 increased \$1.4 million or 1.3% from December 31, 2013, primarily due to growth in originated loans and, to a lesser extent, to support the acquired portfolio. The provision for loan losses during the three months ended March 31, 2014 was \$7.0 million, covering net charge-offs of \$5.6 million with the remainder supporting originated loan growth and the acquired portfolios. The allowance for loan losses as a percentage of non-performing loans for the Corporation's total portfolio decreased from 93.15% as of December 31, 2013 to 91.50% as of March 31, 2014.

Table of Contents

Following is a summary of supplemental statistical ratios pertaining to the Corporation's originated loan portfolio. The originated loan portfolio excludes loans acquired at fair value and accounted for in accordance with ASC 805, which was effective January 1, 2009. The decline in each ratio is consistent with generally positive trends in asset quality, including a continued reduction of loans in the Florida portfolio.

	At or For the Three Months Ended		
	March 31, 2014	December 31, 2013	March 31, 2013
Non-performing loans/total originated loans	0.95%	0.95%	1.11%
Non-performing loans + OREO/total originated loans + OREO	1.46%	1.44%	1.59%
Allowance for loan losses (originated loans)/total originated loans	1.28%	1.29%	1.39%
Net charge-offs on originated loans (annualized)/total average originated loans	0.28%	0.30%	0.22%

CAPITAL RESOURCES AND REGULATORY MATTERS

The access to, and cost of, funding for new business initiatives, including acquisitions, the ability to engage in expanded business activities, the ability to pay dividends and the level and nature of regulatory oversight depend, in part, on the Corporation's capital position.

The assessment of capital adequacy depends on a number of factors such as asset quality, liquidity, earnings performance, changing competitive conditions and economic forces. The Corporation seeks to maintain a strong capital base to support its growth and expansion activities, to provide stability to current operations and to promote public confidence.

The Corporation has an effective shelf registration statement filed with the SEC. Pursuant to this registration statement, the Corporation may, from time to time, issue and sell in one or more offerings any combination of common stock, preferred stock, debt securities or TPS. During November 2013, the Corporation issued 4,693,876 common shares and 4,435,080 Depositary Shares (each representing a 1/40th interest in the Non-Cumulative Perpetual Preferred Stock, Series E) in public equity offerings under this registration statement. These equity offerings increased the Corporation's capital by \$161.3 million.

Capital management is a continuous process with capital plans and stress testing for the Corporation and FNBPA updated annually. These capital plans include assessing the adequacy of expected capital levels assuming various scenarios by projecting capital needs for a forecast period of 2-3 years beyond the current year. Both the Corporation and FNBPA are subject to various regulatory capital requirements administered by federal banking agencies. From time to time, the Corporation issues shares initially acquired by the Corporation as treasury stock under its various benefit plans. The Corporation may continue to grow through acquisitions, which can potentially impact its capital position. The Corporation may issue additional preferred or common stock in order to maintain its well-capitalized status.

The Corporation and FNBPA are subject to various regulatory capital requirements administered by the federal banking agencies. Quantitative measures established by regulators to ensure capital adequacy require the Corporation and FNBPA to maintain minimum amounts and ratios of total and tier 1 capital (as defined in the regulations) to risk-weighted assets (as defined) and of leverage ratio (as defined). Failure to meet minimum capital requirements can

initiate certain mandatory, and possibly additional discretionary actions, by regulators that, if undertaken, could have a direct material effect on the Corporation's consolidated financial statements and future merger and acquisition activity. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, the Corporation and FNBPA must meet specific capital guidelines that involve quantitative measures of assets, liabilities and certain off-balance sheet items as calculated under regulatory accounting practices. The Corporation's and FNBPA's capital amounts and classifications are also subject to qualitative judgments by the regulators about components, risk weightings and other factors.

The Corporation's management believes that, as of March 31, 2014 and December 31, 2013, the Corporation and FNBPA met all well capitalized requirements to which each of them was subject.

Table of Contents

As of March 31, 2014, the most recent notification from the federal banking agencies categorized the Corporation and FNBPA as well-capitalized under the regulatory framework for prompt corrective action. There are no conditions or events since the notification which management believes have changed this categorization.

During June 2013, \$15.0 million of the Corporation-issued TPS was repurchased at a discount and the related debt extinguished. This \$15.0 million was opportunistically purchased at auction and represents a portion of the underlying collateral of a pooled TPS that was liquidated by the trustee. During the fourth quarter of 2013 and the first quarter of 2014, the Corporation redeemed \$138.0 million of the Corporation-issued TPS using proceeds raised in conjunction with its capital raise completed in November 2013. The regulatory capital ratios at March 31, 2014 reflect these decreases in TPS, with remaining TPS included in tier 1 capital totaling \$67.5 million. Additionally, during the first quarter of 2014, the Corporation strategically sold its entire portfolio of pooled TPS, which strengthened the risk profile of its investment portfolio, improved its capital levels due to lowered risk-weighted assets and generated leverageable capital to support future growth.

Following are the capital ratios as of March 31, 2014 and December 31, 2013 for the Corporation and FNBPA (dollars in thousands):

	Actual		Well-Capitalized		Minimum	
	Amount	Ratio	Amount	Ratio	Requirements	Requirements
	Amount	Ratio	Amount	Ratio	Amount	Ratio
March 31, 2014						
<u>F.N.B. Corporation</u>						
Total capital to risk-weighted assets	\$ 1,301,801	12.6%	\$ 1,032,629	10.0%	\$ 826,103	8.0%
Tier 1 capital to risk-weighted assets	1,164,698	11.3	619,578	6.0	413,052	4.0
Leverage ratio	1,164,698	8.8	658,886	5.0	527,108	4.0
<u>FNBPA</u>						
Total capital to risk-weighted assets	1,208,628	11.9	1,017,218	10.0	813,774	8.0

DODD-FRANK WALL STREET REFORM AND CONSUMER PROTECTION ACT

On July 21, 2010, the Dodd-Frank Act became law. The Dodd-Frank Act broadly affects the financial services industry by establishing a framework for systemic risk oversight, creating a resolution authority for institutions determined to be systemically important, mandating higher capital and liquidity requirements, requiring banks to pay increased fees to regulatory agencies and containing numerous other provisions aimed at strengthening the sound operation of the financial services sector that will fundamentally change the system of regulatory oversight as

described in more detail under Part I, Item 1, Business Government Supervision and Regulation included in the Corporation's 2013 Annual Report on Form 10-K as filed with the SEC on February 28, 2014. Many aspects of the Dodd-Frank Act are subject to further rulemaking and will take effect over several years, making it difficult to anticipate the overall financial impact to the Corporation or across the financial services industry.

On June 29, 2011, the FRB, pursuant to its authority under the Dodd-Frank Act, issued rules regarding interchange fees charged for electronic debit transactions by payment card issuers having assets over \$10 billion, adopting a per-transaction interchange cap base of \$0.21 plus a 5-basis point fraud loss adjustment per transaction. The FRB deemed such fees reasonable and proportional to the actual cost of a transaction to the issuer. The Corporation's total assets exceeded \$10 billion on December 31, 2012. As a result, the Corporation was subject to the new rules regarding debit card interchange fees as of July 1, 2013. The Corporation's revenue earned from debit card interchange fees was \$2.8 million for the first three months of 2014, a decrease of \$2.3 million from the same period of 2013. This revenue could decrease by approximately \$10.0 million on an annual basis; however, the Corporation is deploying various revenue enhancement and expense reduction strategies designed to mitigate this impact on debit card interchange fees.

Table of Contents

On June 10, 2013, the Corporation became subject to the clearing requirement under the Dodd-Frank Act whereby it is now required to centrally clear certain interest rate swaps. A cleared swap is subject to continuous collateralization of swap obligations, real-time reporting, additional agreements and other regulatory constraints.

ENHANCED REGULATORY CAPITAL STANDARDS

Regulatory capital reform initiatives continue to be updated and released which impose additional conditions and restrictions on the Corporation's current business practices and capital strategies.

In July 2013, the FRB approved a final rule that implements changes to the regulatory capital framework for all banking organizations. The final rule implements the regulatory capital reforms recommended by the Basel III capital framework and the regulatory capital reforms required by the Dodd-Frank Act. These reforms seek to strengthen the components of regulatory capital by increasing the quantity and quality of capital held by banking organizations, increase risk-based capital requirements and make selected changes to the calculation of risk-weighted assets.

Following are some of the key provisions resulting from the final rule:

revises the components of regulatory capital to phase out certain TPS for banking organizations with greater than \$15.0 billion in total assets. Through organic growth and acquisitions, the Corporation expects to exceed the \$15.0 threshold by the end of the first quarter of 2015 when the phase-in period begins;

adds a new minimum common equity Tier 1 (CET1) ratio of 4.5% of risk-weighted assets;

implements a new capital conservation buffer of CET1 equal to 2.5% of risk-weighted assets, which will be in addition to the 4.5% CET1 ratio and phased in over a three-year period beginning January 1, 2016;

increases the minimum Tier 1 capital ratio requirement from 4.0% to 6.0%;

revises the prompt corrective action thresholds;

retains the existing risk-based capital treatment for 1-4 family residential mortgages;

increases capital requirements for past-due loans, high volatility commercial real estate exposures and certain short-term loan commitments;

expands the recognition of collateral and guarantors in determining risk-weighted assets;

removes references to credit ratings consistent with the Dodd-Frank Act and establishes due diligence requirements for securitization exposures.

The final rule, which becomes effective January 1, 2015 for the Corporation, includes a phase-in period through January 1, 2019 for several provisions of the rule, including the new minimum capital ratio requirements and the capital conservation buffer.

In October 2012, the FRB issued rules requiring companies with total consolidated assets of more than \$10 billion to conduct annual company-run stress tests pursuant to the Dodd-Frank Act (DFAST). In July 2013, the FRB issued proposed supervisory guidance for implementing the DFAST rules for banking organizations with total consolidated assets of more than \$10 billion but less than \$50 billion. The DFAST guidelines and rules build upon the May 2012 stress testing guidance issued by the FRB, *Supervisory Guidance on Stress Testing for Banking Organizations with More Than \$10 Billion in Total Consolidated Assets* (SR Letter 12-7). The Corporation is subject to these supervisory rules and guidelines and conducted its annual company-run stress tests with results reported to the FRB by March 31, 2014. Also, FNBPA is subject to stress testing rules and guidelines under the Office of the Comptroller of the Currency (OCC). The OCC has advised that it will consult closely with the FRB to provide common stress scenarios which can be utilized at both the depository institution and bank holding company levels.

Table of Contents

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The information called for by this item is provided under the caption *Market Risk* in Part I, Item 2 Management's Discussion and Analysis of Financial Condition and Results of Operations and is incorporated herein by reference. There are no material changes in the information provided under Part II, Item 7A, Quantitative and Qualitative Disclosures About Market Risk included in the Corporation's 2013 Annual Report on Form 10-K as filed with the SEC on February 28, 2014.

ITEM 4. CONTROLS AND PROCEDURES

EVALUATION OF DISCLOSURE CONTROLS AND PROCEDURES. The Corporation's management, with the participation of the Corporation's principal executive and financial officers, evaluated the Corporation's disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended) as of the end of the period covered by this Quarterly Report on Form 10-Q. Based on this evaluation, the Corporation's management, including the Chief Executive Officer (CEO) and the Chief Financial Officer (CFO), concluded that, as of the end of the period covered by this quarterly report, the Corporation's disclosure controls and procedures were effective as of such date at the reasonable assurance level as discussed below to ensure that information required to be disclosed by the Corporation in the reports it files under the Securities Exchange Act of 1934, as amended, is recorded, processed, summarized and reported within the time periods specified in the rules and forms of the SEC and that such information is accumulated and communicated to the Corporation's management, including its principal executive officer and principal financial officer, as appropriate to allow timely decisions regarding required disclosure.

LIMITATIONS ON THE EFFECTIVENESS OF CONTROLS. The Corporation's management, including the CEO and the CFO, does not expect that the Corporation's disclosure controls and internal controls will prevent all errors and all fraud. A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the Corporation have been detected. These inherent limitations include the realities that judgments in decision-making can be faulty, and that breakdowns can occur because of simple error or mistake. In addition, controls can be circumvented by the individual acts of some persons, by collusion of two or more people or by management override of the controls.

CHANGES IN INTERNAL CONTROLS. The CEO and the CFO have evaluated the changes to the Corporation's internal controls over financial reporting that occurred during the Corporation's fiscal quarter ended March 31, 2014, as required by paragraph (d) of Rules 13a-15 and 15d-15 under the Securities Exchange Act of 1934, as amended, and have concluded that there were no such changes that materially affected, or are reasonably likely to materially affect, the Corporation's internal controls over financial reporting.

Table of Contents

PART II OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

The Corporation and its subsidiaries are involved in various pending and threatened legal proceedings in which claims for monetary damages and other relief are asserted. These actions include claims brought against the Corporation and its subsidiaries where the Corporation or a subsidiary acted as one or more of the following: a depository bank, lender, underwriter, fiduciary, financial advisor, broker or was engaged in other business activities. Although the ultimate outcome for any asserted claim cannot be predicted with certainty, the Corporation believes that it and its subsidiaries have valid defenses for all asserted claims. Reserves are established for legal claims when losses associated with the claims are judged to be probable and the amount of the loss can be reasonably estimated.

Based on information currently available, advice of counsel, available insurance coverage and established reserves, the Corporation does not anticipate, at the present time, that the aggregate liability, if any, arising out of such legal proceedings will have a material adverse effect on the Corporation's consolidated financial position. However, the Corporation cannot determine whether or not any claims asserted against it will have a material adverse effect on its consolidated results of operations in any future reporting period.

ITEM 1A. RISK FACTORS

There are no material changes from any of the risk factors previously disclosed in the Corporation's 2013 Annual Report on Form 10-K as filed with the SEC on February 28, 2014.
