3. REPORTS OF THE DIRECTORS

3.1 Discussion and analysis of the overall operation during the Reporting Period

The following discussion and analysis should be read in conjunction with the unaudited financial report of the Group (the Company and its subsidiaries) and the notes in the interim report. Unless otherwise specified, part of the financial data involved hereinafter are extracted from the unaudited interim financial report prepared in accordance with IFRS.

Review and discussion on operating results

In the first half of 2014, the global economy continued to experience a slow recovery, with a relatively strong recovery in the U.S., while growth in Europe remained weak although the impact of the European debt crisis continued to dissipate. The economies of emerging and developing countries remained in a downward trend. Despite slowing down, the PRC economy has gradually stabilised, maintaining stable growth within a reasonable range. Gross domestic product (GDP) grew by 7.4% in the first half of the year, signaling a further slowdown in economic growth. In the first half of the year, the PRC petrochemical market generally remained stable, but was impacted by weakened growth of market demand and a relatively rapid increase in production capacity, and the petrochemical product market remained sluggish with a further intensifying competition in the industry.

Table of Contents

Under challenging economic conditions in the first half of 2014, the Group lowered crude oil processing volume in view of the market conditions, upstream and downstream material balance and plant maintenance, which reduced the profit of the refinery segment to a certain degree. Given the continuous downturn in petrochemical demand, the price of petrochemical products weakened, thus leading to a significant year-on-year decline in the prices of the Group's major petrochemical products, thereby enlarging the loss of the petrochemical segment. For the six months ended 30 June 2014, the Group's revenue amounted to RMB51,345.0 million, representing a decrease of RMB5,740.9 million or 10.06% year-on-year. Loss before income tax amounted to RMB127.5 million (profit before income tax amounted to RMB650.6 million for the same period last year), representing a decrease of RMB778.1 million year-on-year. Loss after income tax and non-controlling Shareholders' interests amounted to RMB123.6 million (profit before taxation amounted to RMB473.2 million for the same period last year), representing a decrease of RMB596.8 million year-on-year.

In the first half of 2014, the total volume of goods produced by the Group amounted to 6,661,500 tons, representing a decrease of 12.84% year-on-year. From January to June, the Group processed 7,225,700 tons of crude oil (including 730,900 tons of crude oil processed on a sub-contract basis), representing a decrease of 481,600 tons or 6.25% year-on-year. Total production of refined oil products reached 4,251,200 tons, representing a decrease of 4.45% year-on-year. Of this, the output of gasoline was 1,514,700 tons, representing an increase of 9.63% year-on-year; the output of diesel was 2,033,300 tons, representing a decrease of 19.15% year-on-year; and the output of jet fuel was 703,200 tons, representing an increase of 27.16% year-on-year. The Group produced 404,700 tons of ethylene and 364,600 tons of paraxylene, representing a decrease of 15.46% and 20.20% year-on-year, respectively. The Group also produced 487,900 tons of synthetic resins and plastic (excluding polyesters and polyvinyl alcohol), representing a decrease of 11.31% year-on-year; 361,700 tons of synthetic fibre monomers, representing a decrease of 19.34% year-on-year; 204,700 tons of synthetic fibre polymers, representing a decrease of 22.70% year-on-year; and 116,900 tons of synthetic fibres, representing a decrease of 8.39% year-on-year. During the Reporting Period, the Group's output-to-sales ratio and receivable recovery ratio were 100.54% and 100.00%, respectively.

Table of Contents

The Group placed a high priority on HSE, maintaining the safety and the environmental protection conditions at favourable levels. During the Reporting Period, the Group further optimised its safety production system and structure and commenced rectification work on potential hazards. The Group fostered environmental protection and completed denitrification projects for furnaces No. 1 and 2 at the Thermal Power Division listed as a supervised environmental protection project in Shanghai. With its active involvement in carbon emission statistics examination and carbon emission trading, the Group sold 120,000 tons in carbon quota trading in the first half of 2014. The Group continued to work towards achieving its seven zeroes target (deaths due to industrial accidents, serious injuries, accidents involving major fires and explosions, accidents involving major environmental pollution, accidents involving major occupational disease hazards, major traffic accidents and major accidents involving production safety responsibility) with regard to safety and environmental protection. The comprehensive compliance rate of drained wastewater discharge reached 100%, and total COD and sulfur dioxide emission were brought down by 1.32% and 41.04% year-on-year, respectively.

Plant operations proceeded smoothly. The Group continually enhanced its management of process technology for its plants while improving technical and economic indicators. During the Reporting Period, among 102 major technical and economic indicators listed for assessment, there were improvements over the previous year in 52 of them, representing an improvement rate of 50.98%. 33 of the indicators reached advanced levels in the industry, representing a ratio of 32.35%. The first phase of production plant maintenance for the year, with a focus on residual oil hydrogenation plants, was completed. The Group continued to consolidate its management of specialised equipment, key units and gear transmission equipment as well as anti-corrosion for equipment and management of heaters.

System optimisation was thoroughly implemented. During the Reporting Period, the Group continued to make use of competitive edges in the integration of its refinery and petrochemical segments. Fully leveraging the high degree of adaptability of its refinery plants, the Group increased the procurement and refining volume of low-grade crude oil and further concentrated on crude oil procurement, which brought about lower crude oil cost. Refinery and petrochemical production were also optimised. The Group further strengthened refined oil product structure by lowering production of some less profitable petrochemical products and boosting production of high-end gasoline. The Group strengthened the tracing of marginal contribution of the plants, and suspended production at some plants in phases while prioritising the production of more profitable and marketable products in accordance with market conditions. Employing various innovative means of financing, the Group successfully implemented various offshore financing measures such as overseas agency payments and risk participation, hence

lowering its capital costs. During the period, Shanghai Jinshan Trading Corporation, the Group's holding subsidiary, has established in Shanghai Free Trade Pilot Zone to further expand the Group's trading segment, increase its trading volume, expand its financing channels, and lower financing costs.

Table of Contents

The Group continued its efforts in technological advancement and informationisation. During the Reporting Period, the Group developed and produced 148,600 tons of new products. 349,400 tons of new synthetic resins products and specialised materials were produced, with a differentiation rate reaching 64.66% for synthetic fibres. The Group also submitted 25 patent applications, with four authorisations granted. Construction of the Synthetic Fibres Processing and Application Centre had commenced. In the first half of the year, the Group promoted an intensified integration and innovation of industrialisation and informationisation, and completed for its analysis and monitoring system for production and operations.

The Group put further strengthened internal corporate management. During the Reporting Period, the Group continued to strengthen the application of its integrated management system, expand the scope of certification of the system and passed the assessment on its laboratory proficiency. The Group actively fostered the central management of electricity and commenced pilot programs on procedural management. Through further planning and research on corporate development, the Group has completed the preparation of its middle to long-term development plan and preliminary integrated refinery plan.

The Company was proactive in fulfilling its corporate social responsibilities. It was successful in ensuring the stable supply of refined oil products to the market in the first half of the year by supplying a total of 3.70 million tons of refined oil. Of this amount, the Company supplied 1.52 million tons of gasoline (including the supply of 720,000 tons National IV standard gasoline to Zhejiang Province, 220,000 tons of Su V standard gasoline to Jiangsu Province and 70,000 tons of Yue IV standard gasoline to Guangdong Province), 1.88 million tons of diesel and 300,000 tons of jet fuel, continuing to supply a variety of quality petrochemical products to the public. The Company continued to engage in environmental protection by organising the Public Open Day inviting civil servants, members of the National People's Congress and residents to visit the Company's production plants and environmental protection treatment sites. The Company safeguarded the vital interests of its employees and focused on completing a collaborative development project with the provincial government, thus maintaining a harmonious and stable environment for the Company's development.

Table of Contents

The following table sets forth the Group's sales volume and net sales, net of sales taxes and surcharges, for the Reporting Period:

	For the six months ended 30 June					
	2014			2013		
	Sales Volume (' 000 tons)	Net Sales (RMB Million)	% of Total	Sales Volume (' 000 tons)	Net Sales (RMB Million)	% of Total
Synthetic fibres	114.7	1,434.3	3.1	124.3	1,626.9	3.1
Resins and plastics	614.6	5,915.7	12.6	732.0	6,818.0	13.1
Intermediate petrochemicals	1,041.3	6,769.7	14.5	1,287.8	9,667.5	18.5
Petroleum products	4,504.7	25,436.0	54.5	5,066.6	27,953.0	53.6
Trading of petrochemical products		6,674.0	14.3		5,645.7	10.8
Others		461.1	1.0		451.1	0.9
Total	6,275.3	46,690.8	100.0	7,210.7	52,162.2	100.0

In the first half of 2014, net sales of the Group amounted to RMB46,690.8 million, representing a decrease of 10.49% over the same period of the previous year. Of this, net sales of synthetic fibres, resins and plastics, intermediate petrochemical products and petroleum products declined by 11.84%, 13.23%, 29.97% and 9.00%, respectively. Net sales from the trading of petrochemical products increased by 18.21%. The decrease in net sales was mainly due to the decrease in the Company's total output, which led to a decrease in sales volume of synthetic fibres, resins and plastics, intermediate petrochemical products and petroleum products over the same period of the previous year. During the Reporting Period, the sales volume of synthetic fibres, resins and plastics, intermediate petrochemical products and petroleum products decreased by 7.72%, 16.04%, 19.14% and 11.09%, respectively, over the same period of the previous year. The increase of the Group's net sales from the trading of petrochemical products was mainly attributable to the increase in the business volume of the trading company held by the Group. In the first half of the year, the Group's net sales of Others rose 2.22% over the same period of the previous year, which was mainly attributable to an increase in the Group's revenue from oil processed on a sub-contract basis.

Most of the Group's products are sold in eastern China.

In the first half of 2014, the Group's cost of sales declined by 9.95% year-on-year to RMB46,223.9 million, representing 99.00% of total net sales.

Table of Contents

The Group's main raw material is crude oil. In the first half of 2014, global crude oil maintained the balance between supply and demand. The international crude oil prices were in an upward trend mainly due to the impact of the geopolitical situation. In the first half of the year, the peak and bottom closing prices of Brent crude oil futures were US\$115.32/barrel and \$103.23/barrel, respectively, and the average price during the Reporting Period was approximately US\$108.93/barrel, representing an increase of 1.74% year-on-year. The peak and the bottom closing prices of West Texas Intermediate crude oil were US\$107.12/barrel and \$92.04/barrel, respectively, and the average price during the Reporting Period was approximately US\$100.85/barrel, representing an increase of 7.23% year-on-year. The peak and the bottom closing prices of Dubai crude oil futures were US\$111.16/ barrel and \$101.45/barrel, respectively, and the average price during the Reporting Period was approximately US\$105.29/barrel, representing an increase of 0.90% year-on-year. In the first half of 2014, the average unit cost of crude oil (for the Group's own account) was RMB4,866.94 per ton, representing an increase of RMB13.55 per ton or 0.28% year-on-year. The Group processed a total of 6,494,800 tons of crude oil (excluding crude oil processed on a sub-contract basis), representing a decrease of 862,100 tons over the same period of the previous year. Taken together, the total costs of crude oil processing decreased by RMB4,096 million. Of this, the cost decreased by RMB4,184 million due to the decrease in crude oil processing volume. The increase in the average unit cost of crude oil processed brought costs up by RMB88 million. From January to June this year, crude oil processed on a sub-contract basis reached 730,900 tons. For the Reporting Period, the Group's cost of crude oil accounted for 68.38% of the total cost of sales.

In the first half of 2014, the Group's expenses for other auxiliary materials amounted to RMB4,602.8 million, a decline of 10.04% over the same period of the previous year, which was mainly due to a decline in the Group's production capacity during the period, leading to lower expenses for auxiliary materials. During the Reporting Period, the Group's depreciation and amortization expenses declined by 11.54% year-on-year to RMB1,137.3 million, mainly due to the decrease in fixed assets over the same period of the previous year. Maintenance expenses reduced by 21.97% year-on-year over the same period of the previous year, to RMB419.8 million, mainly due to the reduced amount of actual incurred maintenance expenses. Fuel and power expenses declined by RMB243 million year-on-year to RMB1,170.9 million during the Reporting Period.

In the first half of 2014, selling and administrative expenses of the Group amounted to RMB273.9 million, representing a decrease of 18.19% as compared with RMB334.8 million over the same period of the previous year. This was mainly due to a decrease in transportation fees, which was in line with the decline in sales volume during the Reporting Period.

Table of Contents

In the first half of 2014, the other operating income of the Group amounted to RMB49.6 million, representing an increase of RMB21.7 million year-on-year. This was mainly due to an increase in government grants and the gains on disposal of fixed assets in the first half of 2014.

In the first half of 2014, the Group's net finance expenses amounted to RMB253.5 million, compared to RMB149.7 million of net finance income over the same period of the previous year. This was mainly due to the depreciation of the RMB against the US dollar, resulting in exchange losses from US currency borrowings of RMB83.6 million during the Reporting Period, compared to net gains of RMB308.7 million over the same period of the previous year.

In the first half of 2014, the Group realised loss after tax and profit attributable to non-controlling interests of RMB123.6 million, representing a decrease of RMB596.8 million compared to profit after tax and profit attributable to non-controlling interests of RMB473.2 million over the same period of the previous year.

Liquidity and capital resources

The Group's net cash inflow from operating activities amounted to RMB636.7 million in the first half of 2014 as compared to net cash inflow of RMB3,192.5 million over the same period of the previous year, due to the following major reasons: (1) the lower inventory balance at the end of the period led to an increase of RMB1,308.1 million in operating cash flow in the Reporting Period (as compared to an increase in operating cash flow of RMB282.2 million due to a lower inventory balance at the end of the same period of the previous year); (2) a decrease in operating payables led to a decrease in operating cash flow of RMB2,795.6 million in the Reporting Period (as compared to an increase in operating cash flow of RMB1,659.9 million as a result of an increase in operating payables over the same period of the previous year).

In the first half of 2014, the Group's net cash outflow from investment activities amounted to RMB373.7 million as compared to a net cash outflow of RMB542.1 million over the same period of the previous year. This was primarily attributable to a year-on-year decrease in the Group's capital expenditure during the Reporting Period, resulting in a decline of RMB204.8 million in net cash outflow from investment activities.

In the first half of 2014, the Group's net cash outflow from financing activities amounted to RMB74.2 million compared to net cash outflow of RMB2,521.0 million over the same period of the previous year, primarily attributable to the year-on-year decrease in the Group's new borrowings during the Reporting Period.

Table of Contents

Borrowings and debts

The Group's long-term borrowings are mainly applied to capital expansion projects. In general, the Group arranges long-term borrowings according to capital expenditure plans. On the whole, there are no seasonal borrowings. Short-term borrowings are used to replenish the Group's working capital requirements during the normal course of production. During the first half of 2014, the Group's total borrowings increased by RMB14.1 million to RMB7,736.0 million as at the end of the Reporting Period as compared to the beginning of the Reporting Period, which was mainly attributable to an increase in short-term borrowings by RMB617.7 million and a decrease in long-term borrowings by RMB603.5 million.

Risk from Exchange Rate Fluctuations

Since the majority of the Group's debt is denominated in foreign currency, changes in exchange rates affect the Group's financial expenses and hence have an impact on the Group's profitability. As at 30 June 2014, the Group's borrowings in US dollars amounted to RMB2,276.1 million.

Capital expenditures

In the first half of 2014, the Group's capital expenditure amounted to RMB171 million, mainly for the upgrading of diesel quality at No. 3 diesel hydrogenation plant, the 100,000 tons/year EVA plant project, the denitration and dedusting project for furnaces 1 and 2 of Thermal Power Division, and other energy-saving and environmental protection projects.

In the second half of the year, the Group will continue to implement projects such as the upgrading of diesel quality at No. 3 diesel hydrogenation plant and the 100,000 ton/year EVA plant project, and will also promote the second phase of tertiary treatment and reuse project for waste water to be discharged, and the environmental risk management project at the petroleum coke yard of Thermal Power Division. The Group plans to fund these capital expenditure with cash from operations and banking facilities.

Liability-to-asset ratio

As at 30 June 2014, the Group's liability-to-asset ratio was 48.21% (As at 31 December 2013: 50.89%). The ratio is calculated using the following formula: total liabilities/total assets.

The Group's employees

As at 30 June 2014, the total number of employees of the Company amounted to 13,708, among which the number of production personnel was 8,004; the number of sales staff, financial officers and others was 4,087; and the number of administrative staff was 1,617. A total of 44.22% of the Group's employees were college or above graduates.

Disclosure required by the Hong Kong Listing Rules

Save as disclosed herein, pursuant to paragraph 40 of Appendix 16 to the Hong Kong Listing Rules, the Company confirms that there were no material changes in the existing information of the Company relating to the matters as set out in paragraph 32 of Appendix 16 which is different from the information disclosed in the Company's 2013 annual report.

Market outlook and work plans for the second half of the year

The international environment will remain uncertain in the second half of 2014. It is difficult for the economy to achieve a rapid recovery in the short term. Since the U.S. economy is seeing positive growth and the European economy is stable, the international economy in the second half of the year may be slightly better than the first half of the year. With reforms and policy adjustments, the PRC economy and market potential will be given a further boost. Meanwhile, with pressure from the economic downturn as well as economic transformation and upgrade, in the second half of 2014, the PRC economy is expected to be relatively stable or to remain the same as the first half. Growth of the PRC petrochemical industry has slowed from a rapid pace to a more moderate pace. With adequate supply in the long run and severe challenges posed by the low-cost chemical products as a result of the development of shale gas in the U.S. as well as light hydrocarbon resources in the Middle East, international competition will intensify even further. Given the stable economy and the rebound in demand in the PRC, the petrochemical industry is expected to show steady and moderate growth in the second half of the year.

The international petroleum market will enter into the traditional consumption peak season in the second half of 2014, and demand for crude oil will expand. With sufficient crude oil supply, the international crude oil market will basically maintain balance in supply and demand. The geopolitical situation in regions such as Iraq will continue to support international crude oil prices, while the accelerated exploration of shale gas in the U.S. and the recovery in traditional petroleum exploration will restrain prices. As the U.S. will withdraw its quantitative easing monetary policy while edging up its monitoring on speculation by financial institutions, the larger investment banks will eventually withdraw from the bulk commodity market, and thus the interference of speculative factors on international oil prices will weaken. All in all, international oil prices are expected to continue to fluctuate at a prevailing high level in the second half of the year.

Table of Contents

Facing a challenging market environment in the second half of the year, we will focus on improving the quality and efficiency of our development and will continue to focus on safety and environmental protection as well as stable production. The Group will continue to consolidate its system optimisation, cost reductions and strict management as it strives to seize the opportunities brought by the prevailing favourable market environment and to achieve a turnaround on its efficiency.

1. Consolidating safety and environmental protection; establishing a meticulous safety accountability system; enhancing hazard checks and governance; fostering the establishment and commencement of environmental protection governance projects; strengthening maintenance, management and daily monitoring of plant operations to ensure safe production and operations.
2. Continuing to optimise its production and operation system and optimising and adjusting its refined oil structure based on changes in prices of crude oil and refined oil while increasing the proportion and amount of production of high-end gasoline products; focusing on the optimization of ethylene and aromatic feedstocks as well as the residual oil and vacuum gas oil processing schemes; enhancing the tracing of marginal contribution of petrochemical plants, and making timely adjustments in loads in accordance with changes in efficiency.
3. Increasing efforts to reduce costs and expenses; continuing to manage and control major expenses such as maintenance costs, selling expenses, finance expenses and general and administrative expenses; fully unleashing the potential of refinery plant processing; focusing on central procurement for crude oil; focusing on price-effective oil types and processing methods and lowering the cost of crude oil procurement; further optimising the Group's financing structure and conducting low-cost financing; optimising sales within regions and sales process; cutting distribution expenses; enhancing the connection between production and sales and reducing the utilisation of capital reserves.
4. Intensifying internal management; fully fostering the separation of business responsibilities and the streamlining of business flow and further optimising business and management flow; adhering to efficiency-oriented performance appraisal; enhancing staff motivation and striving to reduce total headcount.

Provision for PRC income tax for the period	7,193	7,441
Deferred taxation	(14,049)	165,675
	(6,856)	173,116

The provision for PRC income tax is calculated at the rate of 25% (six months ended 30 June 2013: 25%) on the estimated assessable income of the six months ended 30 June 2014 determined in accordance with relevant income tax rules and regulations. The Company did not carry out business overseas and therefore does not incur overseas income taxes.

5 (Loss)/earnings per share

The calculation of basic (loss)/profit per share is based on the loss attributable to equity shareholders of the Company for the six months ended 30 June 2014 of RMB123,601 thousands (six months ended 30 June 2013: profit of RMB473,212 thousands) and 10,800,000,000 shares (six months ended 30 June 2013: 10,800,000,000 shares) shares in issue during the interim period. In determining the weighted average number of ordinary shares in issue during the six months ended 30 June 2013, the 3,600,000,000 shares issued by way of capitalisation of reserves in December 2013 have been regarded as if these shares were in issue since 1 January 2013. Earnings per share for the six months ended 30 June 2013 were restated accordingly.

The Group had no dilutive potential ordinary shares in existence during the six months ended 30 June 2014 and 2013.

6 Dividends

Pursuant to a resolution passed at the Annual General Meeting held on 6 June 2013, no dividend was approved and declared for the year ended 31 December 2012. The Board of Directors did not propose the payment of an interim dividend for the period ended 30 June 2013.

Notes:

(a) Government grants

Under CAS, government subsidies defined as capital contributions according to the relevant government requirements are not considered a government grant, but instead should be recorded as an increase in capital reserves.

Table of Contents

Under IFRS, such grants are offset against the cost of asset to which the grants are related. Upon transfer to property, plant and equipment, the grant is recognised as income over the useful life of the property, plant and equipment by way of a reduced depreciation charge.

(b) Safety production costs

Under CAS, safety production costs should be recognised in profit or loss with a corresponding increase in reserve according to PRC regulations. Such reserve is reduced for expenses incurred for safety production purposes or, when safety production related fixed assets are purchased, is reduced by the purchased cost with a corresponding increase in the accumulated depreciation. Such fixed assets are not depreciated thereafter. Under IFRS, expenses are recognised in profit or loss when incurred, and property, plant and equipment are depreciated with applicable methods.
