Chairman s Letter

to Shareholders

Dear Shareholders,

The U.S. economy is now seven years into the recovery, but its pace remains stubbornly subpar compared to past recoveries. Economic data continues to be a mixed bag, as it has been throughout this expansion period. While the unemployment rate fell below its pre-recession level and wages have grown, a surprisingly weak jobs growth report in May cast doubt over the future strength of the labor market. Subsequent employment reports have been stronger, however, easing fears that a significant downtrend was emerging. The housing market has improved markedly but its contribution to the recovery has been lackluster. Deflationary pressures, including weaker commodity prices, have kept inflation much lower for longer than many expected.

The U.S. s modest expansion and positive employment trends led the U.S. Federal Reserve (Fed) to begin its path toward policy normalization by raising its benchmark interest rate at its December 2015 meeting. However, since then, the Fed has remained on hold for reasons ranging from domestic to international, which helped continue to prop up asset prices despite bouts of short-term volatility.

Outside the U.S., optimism has been harder to come by. Investors continue to question whether China s economy is finally stabilizing or still slowing. The U.K. s June 29 Brexit vote to leave the European Union introduced a new set of economic and political uncertainties to the already fragile conditions across Europe. Moreover, there are growing concerns that global central banks unprecedented efforts to revive growth may be showing signs of fatigue. Interest rates are currently negative in Europe and Japan and near or at zero in the U.S., U.K. and elsewhere. Yet, growth has remained subdued.

With global economic growth still looking fairly fragile, and few near-term catalysts for improvement, we anticipate that turbulence remains on the horizon for the time being. In this environment, Nuveen remains committed to both managing downside risks and seeking upside potential. If you re concerned about how resilient your investment portfolio might be, we encourage you to talk to your financial advisor.

On behalf of the other members of the Nuveen Fund Board, we look forward to continuing to earn your trust in the months and years ahead.

Sincerely,

William J. Schneider

Chairman of the Board

Nuveen Senior Income Fund (NSL)

Nuveen Floating Rate Income Fund (JFR)

Nuveen Floating Rate Income Opportunity Fund (JRO)

Nuveen Short Duration Credit Opportunities Fund (JSD)

Nuveen Credit Strategies Income Fund (JQC)

The Funds investment portfolios are managed by Symphony Asset Management, LLC (Symphony), an affiliate of Nuveen Investments, Inc. Gunther Stein, who serves as the firm s Chief Investment Officer and Chief Executive Officer, and Scott Caraher manage NSL, JFR and JRO. Gunther and Sutanto Widjaja manage JQC, while JSD is managed by Gunther, Scott and Jenny Rhee.

Effective September 30, 2015, NSL, JFR, JRO, JSD and JQC can invest up to 5% in iBOXX Loan Total Return Swaps.

On October 18, 2015, the Board of Trustees of JSD approved a policy change regarding the Fund s use of leverage. The new policy permits the Fund to use leverage to the extent permissible under the 1940 Act, which currently permits leverage in an amount up to 50% of the Fund s managed assets. The Board of Trustees also authorized the Fund to incur additional leverage that would increase the Fund s effective leverage ratio.

Here the team discusses the U.S. economic and financial market conditions, their management strategies and the performance of the Funds for the twelve-month reporting period ended July 31, 2016.

What factors affected the U.S. economy and financial markets during the twelve-month reporting period ended July 31, 2016?

Over the twelve-month reporting period, U.S. economic data continued to point to subdued growth, rising employment and tame inflation. Economic activity has continued to hover around a 2% annualized growth rate since the end of the Great Recession in 2009, as measured by real gross domestic product (GDP), which is the value of the goods and services produced by the nation s economy less the value of the goods and services used up in production, adjusted for price changes. For the second quarter of 2016, real GDP increased at an annual rate of 1.1%, as reported by the second estimate of the Bureau of Economic Analysis, up from 0.8% in the first quarter of 2016.

The labor and housing markets improved over the reporting period, although the momentum appeared to slow toward the end of the reporting period. As reported by the Bureau of Labor Statistics, the unemployment rate fell to 4.9% in July 2016 from 5.3% in July 2015, and job gains averaged slightly above 200,000 per month for the past twelve months.

Certain statements in this report are forward-looking statements. Discussions of specific investments are for illustration only and are not intended as recommendations of individual investments. The forward-looking statements and other views expressed herein are those of the portfolio managers as of the date of this report. Actual future results or occurrences may differ significantly from those anticipated in any forward-looking statements and the views expressed herein are subject to change at any time, due to numerous market and other factors. The Funds disclaim any obligation to update publicly or revise any forward-looking statements or views expressed herein.

For financial reporting purposes, the ratings disclosed are the highest rating given by one of the following national rating agencies: Standard & Poor s (S&P), Moody s Investors Service, Inc. (Moody s) or Fitch, Inc. (Fitch). This treatment of split-rated securities may differ from that used for other purposes, such as for Fund investment policies. Credit ratings are subject to change. AAA, AA, A and BBB are investment grade ratings, while BB, B, CCC, CC, C and D are below investment grade ratings. Certain bonds backed by U.S. Government or agency securities are regarded as having an implied rating equal to the rating of such securities. Holdings designated N/R are not rated by these national rating agencies.

Refer to the Glossary of Terms Used in this Report for further definition of the terms used within this section.

Portfolio Managers Comments (continued)

The S&P CoreLogic Case-Shiller U.S. National Home Price Index, which covers all nine U.S. census divisions, recorded a 5.1% annual gain in June 2016 (most recent data available at the time this report was prepared) (effective July 26, 2016, the S&P/Case-Shiller U.S. National Home Price Index was renamed the S&P CoreLogic Case-Shiller U.S. National Home Price Index). The 10-City and 20-City Composites reported year-over-year increases of 4.3% and 5.1%, respectively.

Consumers, whose purchases comprise the largest component of the U.S. economy, benefited from employment growth and firming wages over the twelve-month reporting period. Although consumer spending gains were rather muted in the latter half of 2015, a spending surge in the second quarter of 2016 helped offset weaker business investment. A backdrop of low inflation also contributed to consumers—willingness to buy. The Consumer Price Index (CPI) rose 0.8% over the twelve-month reporting period ended July 2016 on a seasonally adjusted basis, as reported by the U.S. Bureau of Labor Statistics. The core CPI (which excludes food and energy) increased 2.2% during the same period, slightly above the Fed—s unofficial longer term inflation objective of 2.0%.

Business investment remained weak over the reporting period. Corporate earnings growth slowed during 2015, reflecting an array of factors ranging from weakening demand amid sluggish U.S. and global growth to the impact of falling commodity prices and a strong U.S. dollar. Although energy prices rebounded off their lows and the dollar pared some of its gains in the first half of 2016, caution prevailed. Financial market turbulence in early 2016 and political uncertainties surrounding the U.K. s Brexit vote to leave the European Union (EU) and the upcoming U.S. presidential election dampened capital spending.

With the current expansion considered to be on solid footing, the U.S. Federal Reserve (Fed) prepared to raise one of its main interest rates, which had been held near zero since December 2008 to help stimulate the economy. After delaying the rate change for most of 2015 because of a weak global economic growth outlook, the Fed announced in December 2015 that it would raise the fed funds target rate by 0.25%. The news was widely expected and therefore had a relatively muted impact on the financial markets.

Although the Fed continued to emphasize future rate increases would be gradual, investors worried about the pace. This, along with uncertainties about the global macroeconomic backdrop, another downdraft in oil prices and a spike in stock market volatility triggered significant losses across assets that carry more risk and fueled demand for safe haven assets such as Treasury bonds and gold from January through mid-February, however, fear began to subside in March. The Fed held the rate steady at both the January and March policy meetings, as well as lowered its expectations to two rate increases in 2016 from four. Also boosting investor confidence were reassuring statements from the European Central Bank, some positive economic data in the U.S. and abroad, a retreat in the U.S. dollar and an oil price rally. At its April meeting, the Fed indicated its readiness to raise its benchmark rate at the next policy meeting in June. However, a very disappointing jobs growth report in May and the significant uncertainty surrounding the U.K. s Brexit vote led the Fed to again hold rates steady at its June and July meetings.

The U.K. s vote on June 23, 2016 to leave the EU caught investors off guard. In response, U.K. sterling fell precipitously, global equities were turbulent and safe-haven assets such as gold, the U.S. dollar and U.S. Treasuries saw notable inflows. However, the markets stabilized fairly quickly, buoyed by reassurances from global central banks and a perception that the temporary price rout presented an attractive buying opportunity. Although many political and economic uncertainties for the U.K. and the EU remain, market volatility was relatively subdued throughout July, as concerns of a Brexit-induced financial crisis abated.

During the reporting period, particularly throughout the fourth quarter of 2015 and briefly during the end of the reporting period when Brexit was announced, the technical sell-off in levered credit markets continued as corporate debt was re-priced across the quality spectrum with lower rated, more illiquid issues being the most adversely impacted. Growing concerns of a more pronounced economic slowdown in China and continued commodity related sector volatility resulted in deteriorating investor sentiment. This triggered a flight of capital from credit markets, particularly among retail investors, despite generally sound macroeconomic and corporate fundamentals (ex-commodity related sectors).

This created a self-reinforcing technical feedback loop where initial selling put downward pressure on credit prices, prompting further selling as many investors attempted to exit the market before the technical downdraft intensified. Investor fears were further stoked by news of the closure of several high profile high yield mutual funds.

During the second half of the reporting period, markets reversed markedly and finished on a positive note. Risk assets were buoyed by increased demand and risk appetite largely due to dovish Fed rhetoric and the ECB expanding their monetary policy. Fears around Chinese growth subsiding along with damping concerns of a domestic recession also helped support the rally. With regard to credit markets specifically, the ensuing influx of capital into the high yield asset class as well as uptick in collateralized loan obligation (CLO) issuance later in the reporting period helped drive prices.

Loan markets posted slightly positive returns for the entire reporting period. During the first half of the reporting period, the loan market traded off largely due to technical factors and in concert with general risk aversion across the broad capital markets. While overall loan mutual fund flows continued to be negative, institutional loan demand driven by CLO issuance more than offset retail outflows. This institutional demand provided support to the loan market, allowing it in large part to avoid the downward cycle experienced in lower quality risk assets. A late period uptick in new CLO issuance along with a modest reversal in mutual fund outflows allowed for continued support in the asset class recovering much of the technical weakness experienced late in 2015.

Moving down the capital structure, high yield markets posted positive returns during the reporting period, as they rebounded from fourth quarter 2015 lows. The technical storm impacted nearly every sector of the high yield market during the fourth quarter. Most notably, energy and other commodity related sectors continued their precipitous decline. In addition, many larger, more liquid issues spanning media to information technology and across consumer sectors experienced price weakness due to their ability to be more readily sold as investors exited the high yield market. These factors were offset by an influx of capital into the high yield market during the first quarter of 2016. As a result, by the second half of the reporting period market-wide concerns had begun to dissipate with net negative flows out of the high yield bond fund category being reversed and high yield bond prices recovered.

What strategies were used to manage the Funds during the twelve-month reporting period ended July 31, 2016?

NSL, JFR and JRO have similar investment objectives and strategies. Each Fund is designed to seek a high level of current income by primarily investing in a portfolio of adjustable rate, senior secured corporate loans. The Funds also may invest in unsecured senior loans, other debt securities, equity securities and warrants acquired in connection with an investment in senior loans. A significant portion of each Fund s assets may be invested in instruments that, at the time of investment, are rated below investment grade or are unrated but judged by Symphony to be of comparable quality to below investment grade.

JSD seeks to provide current income and the potential for capital appreciation. The Fund invests primarily in a blended portfolio of below investment grade adjustable rate corporate debt instruments, including senior secured loans, second lien loans and other adjustable rate corporate debt instruments. The Fund may also make limited tactical investments in other types of debt instruments and may enter into tactical short positions consisting of primarily high yield debt. Under normal market conditions the Fund maintains a portfolio with an average duration that does not exceed two years.

JQC invests at least 70% of its assets in senior secured and second lien loans, and up to 30% of its assets opportunistically over the credit cycle in other types of securities across a company s capital structure. These other securities primarily include income-oriented securities such as high yield corporate and convertible bonds as well as

common stocks. The Fund maintained exposure to senior loans during the reporting period, while tactically allocating between high yield corporate bonds, equity securities and convertible bonds. Exposure consisted of mainly U.S. issuers, and was focused on companies that, in general, had high levels of tangible assets, predictable revenue streams, significant market share within their respective industries and positive free cash flow.

Portfolio Managers Comments (continued)

How did the Funds perform during this twelve-month reporting period ended July 31, 2016?

The tables in the Performance Overview and Holding Summaries section of this report provide total return performance for each Fund for the one-year, five-year, ten-year and/or since inception periods ended July 31, 2016. Each Fund s total returns at net asset value (NAV) are compared with the performance of a corresponding market index. For the twelve-month reporting period ended July 31, 2016, NSL, JFR, JRO, JSD and JQC underperformed the Credit Suisse Leveraged Loan Index.

As mentioned in the market commentary, during the reporting period, particularly throughout the fourth quarter of 2015 and briefly during the end of the reporting period when Brexit was announced, the technical sell-off in levered credit markets continued as corporate debt was re-priced across the quality spectrum with lower rated, more illiquid issues being the most adversely impacted. While markets reversed markedly and finished on a positive note, the Funds were not able to fully recover from the impact of the sell-off during the first half of the reporting period. As a result, the Funds underperformed their benchmarks.

Across all five Funds, our top and bottom performing individual security positions and industry groups were relatively similar. As a result, for NSL, JFR, JRO, JSD and JQC, the information technology, consumer staples and health care sectors contributed positively to absolute performance. However, these could not offset the Funds exposures to energy and telecommunication services sectors, which contributed to the Funds underperformance.

Several individual positions detracted from performance. Our energy holdings detracted as well, including Energy and Exploration Partners and Fieldwood Energy LLC. Energy related securities performed poorly as oil prices declined given negative revisions of global oil demand, weaker macroeconomic news and a surging U.S. dollar. While we continued to maintain underweight benchmark exposures to the industry, these positions still detracted from overall performance. Telecommunication services holding Intelsat Limited also detracted from performance. This lower quality credit sold off due to weak earnings and a sell-off in the high yield markets during the first half of the reporting period. Lastly, Clear Channel Communications, Inc., a leading global media and entertainment company, detracted from performance.

Several positions contributed to performance including the Fund s position in the loans of Albertson s LLC. Symphony believes the food and drug industry has historically been more defensive during periods of volatility and believes these loans offer an attractive coupon relative to the rest of the industry and broad market. Both the sector and the company have performed well and we anticipate the loans will continue to be core positions in the Fund s portfolio in the near term. The loans held in Communication Sales & Leasing, Inc. also contributed to performance. The loans of the telecommunications firm performed well as the company announced their first planned acquisition and noted a robust merger and acquisition (M&A) pipeline, which was well received by the market. In addition, Avago Technologies Limited loans positively impacted performance. The leading analog semiconductor manufacturer benefited from its acquisition of rival Broadcom Corp. The deal may be the largest of its kind in the semiconductor chip industry. Subsequent to the close of this reporting period, the combined company has been renamed Broadcom Limited.

In addition, the use of regulatory leverage was a factor affecting the performance of these Funds. Leverage is discussed in more detail later in the Fund Leverage section of this report.

For JSD and JQC we invested in credit default swaps. JSD invested in single name credit default swaps, while JQC invested in high yield index credit default swaps. These contracts contributed to a positive effect on performance for JQC and a negative effect on performance for JSD during the twelve month reporting period.

All of these Funds have owned, or currently own, loans with the LIBOR floor feature. The coupon on most senior loans consists of both LIBOR (usually 90-day U.S. LIBOR) plus a spread. For example, a senior loan might have a coupon structure of LIBOR plus 400 basis points (bp) in which the coupon consists of 90-day LIBOR, plus 400bp. Given today s relatively low LIBOR rate, however, many issuers have put in place LIBOR floors to enhance the yield (and satisfy demand from investors) for newly issued loans. LIBOR floors, as the name suggests, put a floor on the reference

LIBOR rate. LIBOR floors typically range from 150bp to 50bp. A loan with a LIBOR floor might have a structure of LIBOR + 400bp with a 100bp LIBOR floor. In this example, the effective coupon is 5% (100bp + 400bp as long as LIBOR is less than or equal to 100bp). As a result, as LIBOR rises from current levels, the yield on a senior loan with a LIBOR floor will not rise in lockstep until after the reference LIBOR rate exceeds the LIBOR floor. Although many loans have LIBOR floors (the asset class is one of the few that will float when interest rates begin to rise), we believe the senior loan asset class provides fixed income oriented investors with a potential safeguard from a secular rise in interest rates.

NUVEEN

Fund

Leverage

IMPACT OF THE FUNDS LEVERAGE STRATEGIES ON PERFORMANCE

One important factor impacting the returns of the Funds relative to their benchmarks was the Funds use of leverage through the use of bank borrowings, Variable Rate Term Preferred (VRTP) Shares for NSL, JFR and JRO, Term Preferred Shares (Term Preferred) for JSD and reverse repurchase agreements for JQC. The Funds use leverage because our research has shown that, over time, leveraging provides opportunities for additional income and total return for common shareholders. However, use of leverage also can expose common shareholders to additional volatility. For example, as the prices of securities held by a Fund decline, the negative impact of these valuation changes on common share NAV and common shareholder total return is magnified by the use of leverage. Conversely, leverage may enhance common share returns during periods when the prices of securities held by a Fund generally are rising. The Funds—use of leverage had a positive impact on performance during this reporting period.

JSD also used interest rate swap contracts to partially fix the interest cost of leverage, which as mentioned previously, is through bank borrowings and Term Preferred. Collectively, these interest rate swap contracts detracted from overall Fund performance during the period.

As of July 31, 2016, the Funds percentages of leverage are shown in the accompanying table.

| | NSL | JFR | JRO | JSD | JQC |
|----------------------|--------|--------|--------|--------|--------|
| Effective Leverage* | 35.87% | 35.76% | 35.72% | 35.93% | 36.00% |
| Regulatory Leverage* | 35.87% | 35.76% | 35.72% | 35.93% | 30.89% |

^{*}Effective leverage is a Fund s effective economic leverage, and includes both regulatory leverage and the leverage effects of certain derivative and other investments in a Fund s portfolio that increase the Fund s investment exposure. Regulatory leverage consists of preferred shares issued or borrowings of a Fund. Both of these are part of a Fund s capital structure. Regulatory leverage is subject to asset coverage limits set forth in the Investment Company Act of 1940.

THE FUNDS LEVERAGE

Bank Borrowings

As noted above, the Funds employ leverage through the use of bank borrowings. The Funds bank borrowing activities are as shown in the accompanying table.

| | Current Reporting Period | | | | | Subsequent to the Report | |
|------|--------------------------|---------------|-----------------|----------------|----------------|--------------------------|------------------|

^{*}Distribution paid in December 2015.

Each Fund in this report seeks to pay regular monthly dividends out of its net investment income at a rate that reflects its past and projected net income performance. To permit each Fund to maintain a more stable monthly dividend, the Fund may pay dividends at a rate that may be more or less than the amount of net income actually earned by the Fund during the period. If a Fund has cumulatively earned more than it has paid in dividends, it will hold the excess in

^{**}Current distribution rate is based on the Fund s current annualized monthly distribution divided by the Fund s current market price. The Fund s monthly distributions to its shareholders may be comprised of ordinary income, net realized capital gains and, if at the end of the fiscal year the Fund s cumulative net ordinary income and net realized gains are less than the amount of the Fund s distributions, a return of capital for tax purposes.

reserve as undistributed net investment income (UNII) as part of the Fund s net asset value. Conversely, if a Fund has cumulatively paid in dividends more than it has earned, the excess will constitute a negative UNII that will likewise be reflected in the Fund s net asset value. Each Fund will, over time, pay all its net investment income as dividends to shareholders.

As of July 31, 2016, all of the Funds had positive UNII balances for tax purposes. NSL and JRO had positive UNII balances while JFR, JSD and JQC had negative UNII balances for financial reporting purposes.

All monthly dividends paid by each Fund during the current reporting period were paid from net investment income. If a portion of the Fund s monthly distributions was sourced from or comprised of elements other than net investment income, including capital gains and/or a return of capital, shareholders would have received a notice to that effect. For financial reporting purposes, the composition and per share amounts of each Fund s dividends for the reporting period are presented in this report s Statement of Changes in Net Assets and Financial Highlights, respectively. For income tax purposes, distribution information for each Fund as of its most recent tax year end is presented in Note 6 Income Tax Information within the Notes to Financial Statements of this report.

COMMON SHARE REPURCHASES

During August 2016 (subsequent to the close of this reporting period), the Funds Board of Trustees reauthorized an open-market share repurchase program, allowing each Fund to repurchase an aggregate of up to approximately 10% of its outstanding shares.

As of July 31, 2016, and since the inception of the Funds repurchase programs, the Funds have cumulatively repurchased and retired their outstanding common shares as shown in the accompanying table.

| | NSL | JFR | JRO | JSD | JQC |
|------------------------------|-----------|-----------|-----------|-----------|------------|
| Common shares cumulatively | | | | | |
| repurchased and retired | 5,000 | 147,593 | 19,400 | 0 | 4,804,500 |
| Common shares authorized for | | | | | |
| repurchase | 3,865,000 | 5,515,000 | 3,850,000 | 1,010,000 | 13,605,000 |

During the current reporting period, the following Funds repurchased and retired their common shares at a weighted average price per common share and a weighted average discount per common share as shown in the accompanying table.

| | NSL | JQC |
|--|--------|---------|
| Common shares repurchased and retired | 5,000 | 304,100 |
| Weighted average price per common share repurchased and retired | \$5.43 | \$7.50 |
| Weighted average discount per common share repurchased and retired | 15.42% | 16.69% |

OTHER COMMON SHARE INFORMATION

As of July 31, 2016, and during the current reporting period, the Funds common share prices were trading at a premium/(discount) to their common share NAVs as shown in the accompanying table.

| | NSL | JFR | JRO | JSD | JQC |
|---------------------------|----------|---------|----------|----------|----------|
| Common share NAV | \$6.76 | \$11.36 | \$11.31 | \$17.49 | \$9.25 |
| Common share price | \$6.25 | \$10.68 | \$10.72 | \$16.16 | \$8.43 |
| Premium/(Discount) to NAV | (7.54)% | (5.99)% | (5.22)% | (7.60)% | (8.86)% |
| 12-month average | | | | | |
| premium/(discount) to NAV | (11.81)% | (9.50)% | (10.33)% | (12.10)% | (13.19)% |

Risk

Considerations

Fund shares are not guaranteed or endorsed by any bank or other insured depository institution, and are not federally insured by the Federal Deposit Insurance Corporation.

Nuveen Senior Income Fund (NSL)

Investing in closed-end funds involves risk; principal loss is possible. There is no guarantee the Funds investment objectives will be achieved. Closed-end fund shares may frequently trade at a discount or premium to their net asset value. **Adjustable Rate Senior Loans** may not be fully secured by collateral, generally do not trade on exchanges, and are typically issued by unrated or below-investment grade companies, and therefore are subject to greater liquidity and credit risk. **Lower credit** debt securities may be more likely to fail to make timely interest or principal payments. **Leverage** increases return volatility and magnifies the Funds potential return and its risks; there is no guarantee a funds leverage strategy will be successful. These and other risk considerations such as **interest rate risk** are described in more detail on the Funds web page at www.nuveen.com/NSL.

Nuveen Floating Rate Income Fund (JFR)

Investing in closed-end funds involves risk; principal loss is possible. There is no guarantee the Funds investment objectives will be achieved. Closed-end fund shares may frequently trade at a discount or premium to their net asset value. **Adjustable Rate Senior Loans** may not be fully secured by collateral, generally do not trade on exchanges, and are typically issued by unrated or below-investment grade companies, and therefore are subject to greater liquidity and credit risk. **Lower credit** debt securities may be more likely to fail to make timely interest or principal payments. **Leverage** increases return volatility and magnifies the Funds potential return and its risks; there is no guarantee a funds leverage strategy will be successful. These and other risk considerations such as **interest rate risk** are described in more detail on the Funds web page at www.nuveen.com/JFR.

Nuveen Floating Rate Income Opportunity Fund (JRO)

Investing in closed-end funds involves risk; principal loss is possible. There is no guarantee the Funds investment objectives will be achieved. Closed-end fund shares may frequently trade at a discount or premium to their net asset value. **Adjustable Rate Senior Loans** may not be fully secured by collateral, generally do not trade on exchanges, and are typically issued by unrated or below-investment grade companies, and therefore are subject to greater liquidity and credit risk. **Lower credit** debt securities may be more likely to fail to make timely interest or principal payments. **Leverage** increases return volatility and magnifies the Funds potential return and its risks; there is no guarantee a funds leverage strategy will be successful. These and other risk considerations such as **interest rate risk** are described in more detail on the Funds web page at www.nuveen.com/JRO.

Nuveen Short Duration Credit Opportunities Fund (JSD)

Investing in closed-end funds involves risk; principal loss is possible. There is no guarantee the Fund s investment objectives will be achieved. Closed-end fund shares may frequently trade at a discount or premium to their net asset value. **Adjustable Rate Senior Loans** may not be fully secured by collateral, generally do not trade on exchanges, and are typically issued by unrated or below-investment grade companies, and therefore are subject to greater liquidity and credit risk. **Lower credit** debt securities may be more likely to fail to make timely interest or principal payments. **Leverage** increases return volatility and magnifies the Fund s potential return and its risks; there is no guarantee a

fund s leverage strategy will be successful. These and other risk considerations such as **interest rate risk** are described in more detail on the Fund s web page at www.nuveen.com/JSD.

Nuveen Credit Strategies Income Fund (JQC)

Investing in closed-end funds involves risk; principal loss is possible. There is no guarantee the Fund s investment objectives will be achieved. Closed-end fund shares may frequently trade at a discount or premium to their net asset value. **Adjustable Rate Senior Loans** may not be fully secured by collateral, generally do not trade on exchanges, and are typically issued by unrated or below-investment grade companies, and therefore are subject to greater liquidity and credit risk. **Lower credit** debt securities may be more likely to fail to make timely interest or principal payments. **Common stock** prices have often experienced significant volatility. **Leverage** increases return volatility and magnifies the Fund s potential return and its risks; there is no guarantee a fund s leverage strategy will be successful. These and other risk considerations such as **interest rate risk** are described in more detail on the Fund s web page at www.nuveen.com/JQC.

Average Annual Total Returns as of July 31, 2016

| | | Average Annual | | | |
|------------------------------------|--------|----------------|---------|--|--|
| | 1-Year | 5-Year | 10-Year | | |
| NSL at Common Share NAV | 0.61% | 5.80% | 5.47% | | |
| NSL at Common Share Price | 5.89% | 4.90% | 5.23% | | |
| Credit Suisse Leveraged Loan Index | 2.26% | 4.26% | 4.26% | | |

Past performance is not predictive of future results. Current performance may be higher or lower than the data shown. Returns do not reflect the deduction of taxes that shareholders may have to pay on Fund distributions or upon the sale of Fund shares. Returns at NAV are net of Fund expenses, and assume reinvestment of distributions. Comparative index return information is provided for the Fund shares at NAV only. Indexes are not available for direct investment.

Common Share Price Performance Weekly Closing Price

This data relates to the securities held in the Fund s portfolio of investments as of the end of the reporting period. It should not be construed as a measure of performance for the Fund itself. Holdings are subject to change.

For financial reporting purposes, the ratings disclosed are the highest rating given by one of the following national rating agencies: Standard & Poor s Group, Moody s Investors Service, Inc. or Fitch, Inc. This treatment of split-rated securities may differ from that used for other purposes, such as for Fund investment policies. Credit ratings are subject to change. AAA, AA, and BBB are investment grade ratings, while BB, B, CCC, CC, C and D are below investment grade ratings. Certain bonds backed by U.S. Government or agency securities are regarded as having an implied rating equal to the rating of such securities. Holdings designated N/R are not rated by these national rating agencies.

JQC

Nuveen Credit Strategies Income Fund

Performance Overview and Holding Summaries as of July 31, 2016

Refer to Glossary of Terms Used in this Report for further definition of the terms used within this section.

Average Annual Total Returns as of July 31, 2016

| | | Average Annual | | |
|------------------------------------|--------|----------------|---------|--|
| | 1-Year | 5-Year | 10-Year | |
| JQC at Common Share NAV | 0.11% | 5.29% | 3.91% | |
| JQC at Common Share Price | 5.98% | 7.00% | 4.74% | |
| Credit Suisse Leveraged Loan Index | 2.26% | 4.26% | 4.26% | |

Past performance is not predictive of future results. Current performance may be higher or lower than the data shown. Returns do not reflect the deduction of taxes that shareholders may have to pay on Fund distributions or upon the sale of Fund shares. Returns at NAV are net of Fund expenses, and assume reinvestment of distributions. Comparative index return information is provided for the Fund shares at NAV only. Indexes are not available for direct investment.

Common Share Price Performance Weekly Closing Price

This data relates to the securities held in the Fund s portfolio of investments as of the end of the reporting period. It should not be construed as a measure of performance for the Fund itself. Holdings are subject to change.

For financial reporting purposes, the ratings disclosed are the highest rating given by one of the following national rating agencies: Standard & Poor s Group, Moody s Investors Service, Inc. or Fitch, Inc. This treatment of split-rated securities may differ from that used for other purposes, such as for Fund investment policies. Credit ratings are subject to change. AAA, AA, and BBB are investment grade ratings, while BB, B, CCC, CC, C and D are below investment grade ratings. Certain bonds backed by U.S. Government or agency securities are regarded as having an implied rating equal to the rating of such securities. Holdings designated N/R are not rated by these national rating agencies.

Report of

Independent Registered Public Accounting Firm

To the Board of Trustees and Shareholders of

Nuveen Senior Income Fund

Nuveen Floating Rate Income Fund

Nuveen Floating Rate Income Opportunity Fund

Nuveen Short Duration Credit Opportunities Fund

Nuveen Credit Strategies Income Fund:

We have audited the accompanying statements of assets and liabilities, including the portfolios of investments, of Nuveen Senior Income Fund, Nuveen Floating Rate Income Fund, Nuveen Floating Rate Income Opportunity Fund, Nuveen Short Duration Credit Opportunities Fund and Nuveen Credit Strategies Income Fund (the Funds) as of July 31, 2016, and the related statements of operations and cash flows for the year then ended and the statements of changes in net assets and the financial highlights for each of the years in the two-year period then ended. The financial highlights for the periods presented through July 31, 2014, were audited by other auditors whose report dated September 25, 2014, expressed an unqualified opinion on those financial highlights. These financial statements and financial highlights are the responsibility of the Funds management. Our responsibility is to express an opinion on these financial statements and financial highlights based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements and financial highlights are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. Our procedures included confirmation of securities owned as of July 31, 2016, by correspondence with the custodian and brokers or other appropriate auditing procedures. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements and financial highlights referred to above present fairly, in all material respects, the financial position of the Funds as of July 31, 2016, the results of their operations and their cash flows for the year then ended and the changes in their net assets and the financial highlights for each of the years in the two-year period then ended, in conformity with U.S. generally accepted accounting principles.

For Fund portfolio compliance purposes, the Fund s industry classifications refer to any one or more of the industry sub-classifications used by one or more widely recognized market indexes or ratings group indexes, and/or as defined by Fund management. This definition may not apply for purposes of this report, which may combine industry sub-classifications into sectors for reporting ease.

- (1) All percentages shown in the Portfolio of Investments are based on net assets applicable to common shares unless otherwise noted.
- (2) Senior loans generally are subject to mandatory and/or optional prepayment. Because of these mandatory prepayment conditions and because there may be significant economic incentives for a borrower to prepay, prepayments of senior loans may occur. As a result, the actual remaining maturity of senior loans held may be substantially less than the stated maturities shown.
- (3) For financial reporting purposes, the ratings disclosed are the highest of Standard & Poor s Group (Standard & Poor s), Moody s Investors Service, Inc. (Moody s) or Fitch, Inc. (Fitch) rating. This treat of split-rated securities may differ from that used for other purposes, such as for Fund investment policies. Ratings below BBB by Standard & Poor s, Baa by Moody s or BBB by Fitch are considered to be below investment grade. Holdings designated N/R are not rated by any of these national rating agencies. Ratings are not covered by the report of independent registered public accounting firm.
- (4) Senior loans generally pay interest at rates which are periodically adjusted by reference to a base short-term, floating lending rate plus an assigned fixed rate. These floating lending rates are generally (i) the lending rate referenced by the London Inter-Bank Offered Rate (LIBOR), or (ii) the prime rate offered by one or more major United States banks. Senior loans may be considered restricted in that the Fund ordinarily is contractually obligated to receive approval from the agent bank and/or borrower prior to the disposition of a senior loan. The rate shown is the coupon as of the end of the reporting period.
- As of, or subsequent to, the end of the reporting period, this security is non-income producing.

 Non-income producing, in the case of a fixed-income security, generally denotes that the issuer has
 (1) defaulted on the payment of principal or interest, (2) is under the protection of the Federal
 Bankruptcy Court or (3) the Fund s Adviser has concluded that the issue is not likely meet its future interest payment obligations and has ceased accruing additional income on the Fund s records.
- (6) Investment valued at fair value using methods determined in good faith by, or at the discretion of, the Board. For fair value measurement disclosure purposes, investment classified as Level 3. See Notes to Financial Statements, Note 2 Investment Valuation and Fair Value Measurements for more information.
- (7) Non-income producing; issuer has not declared a dividend within the past twelve months.
- (8) For fair value measurement disclosure purposes, investment classified as Level 2. See Notes to Financial Statements, Note 2 Investment Valuation and Fair Value Measurements for more information.

Edgar Filing: Nuveen Credit Strategies Income Fund - Form N-CSR

(9) Borrowings as a percentage of Total Investments is 24.5%. (10)The Fund segregates 100% of its eligible investments (excluding any investments separately pledged as collateral for specific investments in derivatives, when applicable) in the Portfolio of Investments as collateral for borrowings. (11)Variable Rate Term Preferred Shares, at Liquidation Preference as a percentage of Total Investments is 10.9%. Portion of investment purchased on a delayed delivery basis. (DD1) (WI/DD) Purchased on a when-issued or delayed delivery basis. 144A Investment is exempt from registration under Rule 144A of the Securities Act of 1933, as amended. These investments may only be resold in transactions exempt from registration, which are normally those transactions with qualified institutional buyers. **TBD** Senior loan purchased on a when-issued or delayed-delivery basis. Certain details associated with this purchase are not known prior to the settlement date of the transaction. In addition, senior loans typically trade without accrued interest and therefore a coupon rate is not available prior to settlement. At settlement, if still unknown, the borrower or counterparty will provide the Fund with the final coupon rate and maturity date.

See accompanying notes to financial statements.

| | Net Assets Applicable to Common Shares 100% | | | \$ 626,626,729 |

For Fund portfolio compliance purposes, the Fund s industry classifications refer to any one or more of the industry sub-classifications used by one or more widely recognized market indexes or ratings group indexes, and/or as defined by Fund management. This definition may not apply for purposes of this report, which may combine industry sub-classifications into sectors for reporting ease.

- (1) All percentages shown in the Portfolio of Investments are based on net assets applicable to common shares unless otherwise noted.
- (2) Senior loans generally are subject to mandatory and/or optional prepayment. Because of these mandatory prepayment conditions and because there may be significant economic incentives for a borrower to prepay, prepayments of senior loans may occur. As a result, the actual remaining maturity of senior loans held may be substantially less than the stated maturities shown.
- (3) For financial reporting purposes, the ratings disclosed are the highest of Standard & Poor s Group (Standard & Poor s), Moody s Investors Service, Inc. (Moody s) or Fitch, Inc. (Fitch) rating. This treat of split-rated securities may differ from that used for other purposes, such as for Fund investment policies. Ratings below BBB by Standard & Poor s, Baa by Moody s or BBB by Fitch are considered to be below investment grade. Holdings designated N/R are not rated by any of these national rating agencies.

Ratings are not covered by the report of independent registered public accounting firm.

- (4) Senior loans generally pay interest at rates which are periodically adjusted by reference to a base short-term, floating lending rate plus an assigned fixed rate. These floating lending rates are generally (i) the lending rate referenced by the London Inter-Bank Offered Rate (LIBOR), or (ii) the prime rate offered by one or more major United States banks. Senior loans may be considered restricted in that the Fund ordinarily is contractually obligated to receive approval from the agent bank and/or borrower prior to the disposition of a senior loan. The rate shown is the coupon as of the end of the reporting period.
- As of, or subsequent to, the end of the reporting period, this security is non-income producing.

 Non-income producing, in the case of a fixed-income security, generally denotes that the issuer has

 (1) defaulted on the payment of principal or interest, (2) is under the protection of the Federal

 Bankruptcy Court or (3) the Fund s Adviser has concluded that the issue is not likely to meet its future interest payment obligations and has ceased accruing additional income on the Fund s records.
- (6) Investment valued at fair value using methods determined in good faith by, or at the discretion of, the Board. For fair value measurement disclosure purposes, investment classified as Level 3. See Notes to Financial Statements, Note 2 Investment Valuation and Fair Value Measurements for more information.
- (7) Non-income producing; issuer has not declared a dividend within the past twelve months.
- (8) For fair value measurement disclosure purposes, investment classified as Level 2. See Notes to Financial Statements, Note 2 Investment Valuation and Fair Value Measurements for more information.
- (9) A copy of the most recent financial statements for these investment companies can be obtained directly from the Securities and Exchange Commission on its website at http://www.sec.gov.
- (10) Borrowings as a percentage of total investments is 24.4%.
- (11) The Fund segregates 100% of its eligible investments (excluding any investments separately pledged as collateral for specific investments in derivatives, when applicable) in the Portfolio of Investments as collateral for borrowings.
- Variable Rate Term Preferred Shares, at Liquidation Preference as a percentage of Total Investments is 10.9%.
- (DD1) Portion of investment purchased on a delayed delivery basis.
- (WI/DD) Purchased on a when-issued or delayed delivery basis.

- Investment is exempt from registration under Rule 144A of the Securities Act of 1933, as amended. These investments may only be resold in transactions exempt from registration, which are normally those transactions with qualified institutional buyers.
- TBD Senior loan purchased on a when-issued or delayed-delivery basis. Certain details associated with this purchase are not known prior to the settlement date of the transaction. In addition, senior loans typically trade without accrued interest and therefore a coupon rate is not available prior to settlement. At settlement, if still unknown, the borrower or counterparty will provide the Fund with the final coupon rate and maturity date.

See accompanying notes to financial statements.

For Fund portfolio compliance purposes, the Fund s industry classifications refer to any one or more of the industry sub-classifications used by one or more widely recognized market indexes or ratings group indexes, and/or as defined by Fund management. This definition may not apply for purposes of this report, which may combine industry sub-classifications into sectors for reporting ease.

- (1) All percentages shown in the Portfolio of Investments are based on net assets applicable to common shares unless otherwise noted.
- (2) Senior loans generally are subject to mandatory and/or optional prepayment. Because of these mandatory prepayment conditions and because there may be significant economic incentives for a borrower to prepay, prepayments of senior loans may occur. As a result, the actual remaining maturity of senior loans held may be substantially less than the stated maturities shown.
- (3) For financial reporting purposes, the ratings disclosed are the highest of Standard & Poor s Group (Standard & Poor s), Moody s Investors Service, Inc. (Moody s) or Fitch, Inc. (Fitch) rating. This treat of split-rated securities may differ from that used for other purposes, such as for Fund investment policies. Ratings below BBB by Standard & Poor s, Baa by Moody s or BBB by Fitch are considered to be below investment grade. Holdings designated N/R are not rated by any of these national rating agencies. Ratings are not covered by the report of independent registered public accounting firm.
- Senior loans generally pay interest at rates which are periodically adjusted by reference to a base short-term, floating lending rate plus an assigned fixed rate. These floating lending rates are generally (i) the lending rate referenced by the London Inter-Bank Offered Rate (LIBOR), or (ii) the prime rate offered by one or more major United States banks. Senior loans may be considered restricted in that the Fund ordinarily is contractually obligated to receive approval from the agent bank and/or borrower prior to the disposition of a senior loan. The rate shown is the coupon as of the end of the reporting period.
- As of, or subsequent to, the end of the reporting period, this security is non-income producing.

 Non-income producing, in the case of a fixed-income security, generally denotes that the issuer has
 (1) defaulted on the payment of principal or interest, (2) is under the protection of the Federal
 Bankruptcy Court or (3) the Fund s Adviser has concluded that the issue is not likely to meet its future interest payment obligations and has ceased accruing additional income on the Fund s records.
- (6) Investment valued at fair value using methods determined in good faith by, or at the discretion of, the Board. For fair value measurement disclosure purposes, investment classified as Level 3. See Notes to Financial Statements, Note 2 Investment Valuation and Fair Value Measurements for more information.
- (7) Non-income producing; issuer has not declared a dividend within the past twelve months.
- (8) For fair value measurement disclosure purposes, investment classified as Level 2. See Notes to Financial Statements, Note 2 Investment Valuation and Fair Value Measurements for more information.

(9) Borrowings as a percentage of Total Investments is 24.3%. (10)The Fund segregates 100% of its eligible investments (excluding any investments separately pledged as collateral for specific investments in derivatives, when applicable) in the Portfolio of Investments as collateral for borrowings. (11)Variable Rate Term Preferred Shares, at Liquidation Preference as a percentage of Total Investments is 10.9%. (DD1) Portion of investment purchased on a delayed delivery basis. (WI/DD) Purchased on a when-issued or delayed delivery basis. 144A Investment is exempt from registration under Rule 144A of the Securities Act of 1933, as amended. These investments may only be resold in transactions exempt from registration, which are normally those transactions with qualified institutional buyers. **TBD** Senior loan purchased on a when-issued or delayed-delivery basis. Certain details associated with this purchase are not known prior to the settlement date of the transaction. In addition, senior loans typically trade without accrued interest and therefore a coupon rate is not available prior to settlement. At settlement, if still unknown, the borrower or counterparty will provide the Fund with the final coupon

rate and maturity date.

See accompanying notes to financial statements.

JSD Nuveen Short Duration Credit Opportunities Fund Portfolio of Investments (continued)

July 31, 2016

For Fund portfolio compliance purposes, the Fund s industry classifications refer to any one or more of the industry sub-classifications used by one or more widely recognized market indexes or ratings group indexes, and/or as defined by Fund management. This definition may not apply for purposes of this report, which may combine industry sub-classifications into sectors for reporting ease.

- (1) All percentages shown in the Portfolio of Investments are based on net assets applicable to common shares unless otherwise noted.
- (2) Senior loans generally are subject to mandatory and/or optional prepayment. Because of these mandatory prepayment conditions and because there may be significant economic incentives for a borrower to prepay, prepayments of senior loans may occur. As a result, the actual remaining maturity of senior loans held may be substantially less than the stated maturities shown.
- (3) For financial reporting purposes, the ratings disclosed are the highest of Standard & Poor s Group (Standard & Poor s), Moody s Investors Service, Inc. (Moody s) or Fitch, Inc. (Fitch) rating. This treat of split-rated securities may differ from that used for other purposes, such as for Fund investment policies. Ratings below BBB by Standard & Poor s, Baa by Moody s or BBB by Fitch are considered to be below investment grade. Holdings designated N/R are not rated by any of these national rating agencies. Ratings are not covered by the report of independent registered public accounting firm.
- (4) Senior loans generally pay interest at rates which are periodically adjusted by reference to a base short-term, floating lending rate plus an assigned fixed rate. These floating lending rates are generally (i) the lending rate referenced by the London Inter-Bank Offered Rate (LIBOR), or (ii) the prime rate offered by one or more major United States banks. Senior loans may be considered restricted in that the Fund ordinarily is contractually obligated to receive approval from the agent bank and/or borrower prior to the disposition of a senior loan. The rate shown is the coupon as of the end of the reporting period.
- As of, or subsequent to, the end of the reporting period, this security is non-income producing.

 Non-income producing, in the case of a fixed-income security, generally denotes that the issuer has (1) defaulted on the payment of principal or interest, (2) is under the protection of the Federal Bankruptcy Court or (3) the Fund s Adviser has concluded that the issue is not likely to meet its future interest payment obligations and has ceased accruing additional income on the Fund s records.
- (6) Non-income producing; issuer has not declared a dividend within the past twelve months.

(7)

For fair value measurement disclosure purposes, investment classified as Level 2. See Notes to Financial Statements, Note 2 Investment Valuation and Fair Value Measurements for more information.

- (8) Borrowings as a percentage of Total Investments is 23.0%.
- (9) The Fund segregates 100% of its eligible investments (excluding any investments separately pledged as collateral for specific investments in derivatives, when applicable) in the Portfolio of Investments as collateral for borrowings.
- (10) Term Preferred Shares, at Liquidation Preference as a percentage of Total Investments is 12.6%.
- Other assets less liabilities includes the unrealized appreciation (depreciation) of certain over-the-counter (OTC) derivatives as presented on the Statement of Assets and Liabilities, when applicable. The unrealized appreciation (depreciation) of OTC-cleared and exchange-traded derivatives is recognized as part of the cash collateral at brokers and/or the receivable or payable for variation margin as presented on the Statement of Assets and Liabilities, when applicable.
- (12) Effective November 1, 2017, the fixed rate paid by the Fund will increase according to a predetermined scheduled as specified in the swap contract. Additionally, this fixed rate increase will continue to occur every six months on specific dates through the swap contract s termination date.
- (13) This interest rate swap has an optional early termination date beginning on November 1, 2018 and monthly thereafter through the termination date as specified in the swap contract.
- (14) Investment valued at fair value using methods determined in good faith by, or at the discretion of, the Board. For fair value measurement disclosure purposes, investment classified as Level 3. See Notes to Financial Statements, Note 2 Investment Valuation and Fair Value Measurements for more information.
- The Fund entered into the credit default swap to gain investment exposure to the referenced entity. Selling protection has a similar credit risk position to owning that referenced entity. Buying protection has a similar credit risk position to selling the referenced entity short.
- The credit spread generally serves as an indication of the current status of the payment/performance risk and therefore the likelihood of default of the credit derivative. The credit spread also reflects the cost of buying/selling protection and may include upfront payments required to be made to enter into a credit default swap contract. Higher credit spreads are indicative of a higher likelihood of performance by the seller of protection.
- (DD1) Portion of investment purchased on a delayed delivery basis.

(WI/DD) Purchased on a when-issued or delayed delivery basis.
