FIDUS INVESTMENT Corp Form 497 January 30, 2018 Table of Contents

Filed Pursuant to Rule 497 Registration Statement No. 333-202531

This preliminary prospectus supplement relates to an effective registration statement under the Securities Act of 1933, as amended, but the information in this preliminary prospectus supplement is not complete and may be changed. This preliminary prospectus supplement and the accompanying prospectus are not an offer to sell, and are not soliciting an offer to buy, these securities in any jurisdiction where the offer and sale is not permitted.

SUBJECT TO COMPLETION, DATED JANUARY 30, 2018

PRELIMINARY PROSPECTUS SUPPLEMENT

(To Prospectus dated April 19, 2017)

\$

% Notes due 2023

We are an externally managed, closed-end, non-diversified management investment company that has elected to be regulated as a business development company, or BDC, under the Investment Company Act of 1940, as amended, or the 1940 Act. Our investment objective is to provide attractive risk-adjusted returns by generating both current income from our debt investments and capital appreciation from our equity related investments. Our strategy includes partnering with business owners, management teams and financial sponsors by providing customized financing for ownership transactions, recapitalizations, strategic acquisitions, business expansion and other growth initiatives. We generally invest in securities that would be rated below investment grade if they were rated by rating agencies. Below investment grade securities, which are often referred to as high yield or junk, have speculative characteristics with respect to the issuer s capacity to pay interest and repay principal.

Fidus Investment Advisors, LLC serves as our investment advisor and as our administrator.

We are offering \$\) million in aggregate principal amount of \% notes due 2023, which we refer to as the Notes. The Notes will mature on \, 2023. We will pay interest on the Notes on February 1, May 1, August 1 and November 1 of each year, beginning May 1, 2018. We may redeem the Notes in whole or in part at any time or from time to time on or after \, at the redemption price of 100\% plus accrued and unpaid interest, as discussed under the section titled Description of the Notes Optional Redemption in this prospectus supplement. The Notes will

be issued in minimum denominations of \$25 and integral multiples of \$25 in excess thereof.

The underwriters may also purchase up to an additional \$\\$\\$ million aggregate principal amount of Notes offered by this prospectus supplement and the accompanying prospectus, within 30 days of the date of this prospectus supplement solely to cover over-allotments, if any. If the underwriters exercise this over-allotment option in full, the total aggregate proceeds to us, before deducting expenses payable by us, will be \$\\$\\$.

The Notes will be our direct unsecured obligations and rank *pari passu*, which means equal in right of payment, with all outstanding and future unsecured unsubordinated indebtedness issued by us. Because the Notes will not be secured by any of our assets, they will be effectively subordinated to all of our existing and future secured indebtedness (or any indebtedness that is initially unsecured as to which we subsequently grant a security interest), to the extent of the value of the assets securing such indebtedness, including, without limitation, borrowings under our senior secured revolving credit facility with ING Capital LLC, or ING, as amended, or the Credit Facility, of which we had \$50.0 million outstanding as of January 29, 2018. The Notes will be structurally subordinated to all existing and future indebtedness and other obligations of any of our subsidiaries since the Notes are obligations exclusively of Fidus Investment Corporation and not of any of our subsidiaries. As of January 29, 2018, our subsidiaries had total indebtedness outstanding of \$247.8 million. None of our subsidiaries is a guarantor of the Notes and the Notes will not be required to be guaranteed by any subsidiary we may acquire or create in the future. For further discussion, see the section titled Description of the Notes in this prospectus supplement.

The Notes will also rank *pari passu* with, or equal to, our general liabilities (total liabilities, less debt). In total, these general liabilities were \$12.1 million as of September 30, 2017. We currently do not have outstanding debt that is subordinated to the Notes and do not currently intend to issue indebtedness that expressly provides that it is subordinated to the Notes. Therefore, the Notes will not be senior to any of our indebtedness or obligations.

We intend to list the Notes on The Nasdaq Global Select Market, and we expect trading to commence thereon within 30 days of the original issue date under the trading symbol FDUSL. The Notes are expected to trade flat. This means that purchasers will not pay, and sellers will not receive, any accrued and unpaid interest on the Notes that is not included in the trading price. Currently, there is no public market for the Notes, and there can be no assurance that one will develop.

This prospectus supplement and the accompanying prospectus contain important information about us that a prospective investor should know before investing in the Notes. Please read this prospectus supplement and the accompanying prospectus before investing in the Notes and keep them for future reference. We file annual, quarterly and current reports, proxy statements and other information with the Securities and Exchange Commission, or the SEC. This information is also available free of charge by contacting us at 1603 Orrington Avenue, Suite 1005, Evanston, Illinois 60201, Attention: Investor Relations, or by calling us at (847) 859-3940 or on our website at www.fdus.com. Information contained on our website is not incorporated by reference into this prospectus supplement or the accompanying prospectus, and you should not consider that information to be part of this prospectus supplement or the accompanying prospectus. The SEC also maintains a website at www.sec.gov that contains such information.

Investing in the Notes involves a high degree of risk, and should be considered highly speculative. See <u>Supplementary Risk Factors</u> beginning on page S-17 of this prospectus supplement and <u>Risk Factors</u> beginning on page 13 of the accompanying prospectus to read about factors you should consider, including the risk of leverage, before investing in the Notes.

Neither the SEC nor any state securities commission, nor any other regulatory body, has approved or disapproved of these securities, or determined if this preliminary prospectus supplement or the accompanying prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

	Per Note	Total
Public offering price	\$	\$
Underwriting discount (sales load and commissions)	\$	\$
Proceeds, before expenses, to us (1)	\$	\$

(1) We estimate that we will incur approximately \$400,000 in offering expenses in connection with this offering.

The underwriters may also purchase up to an additional \$\\$ total aggregate principal amount of Notes offered by this prospectus supplement and the accompanying prospectus, solely to cover over-allotments, if any, within 30 days of the date of this prospectus supplement. If the underwriters exercise this option in full, the total public offering price will be \$\\$\$, the total underwriting discount (sales load and commissions) paid by us will be \$\\$\$, and total proceeds, before expenses, will be \$\\$\$.

THE NOTES ARE NOT DEPOSITS OR OTHER OBLIGATIONS OF A BANK AND ARE NOT INSURED BY THE FEDERAL DEPOSIT INSURANCE CORPORATION OR ANY OTHER GOVERNMENT AGENCY.

Delivery of the Notes in book-entry form only through The Depository Trust Company, known as DTC, will be made on or about , 2018.

ABOUT THE PROSPECTUS SUPPLEMENT

This document is in two parts. The first part is this prospectus supplement, which describes the specific terms of the Notes we are offering and certain other matters relating to us. The second part, the accompanying prospectus, gives more general information about the securities that we may offer from time to time, some of which may not apply to the Notes offered by this prospectus supplement.

If information varies between this prospectus supplement and the accompanying prospectus, you should rely only on such information in this prospectus supplement. The information contained in this prospectus supplement supersedes any inconsistent information included in the accompanying prospectus. In various places in this prospectus supplement and the accompanying prospectus, we refer you to other sections of such documents for additional information by indicating the caption heading of such other sections. The page on which each principal caption included in this prospectus supplement and the accompanying prospectus can be found is listed in the table of contents above. All such cross references in this prospectus supplement are to captions contained in this prospectus supplement and not in the accompanying prospectus, unless otherwise stated.

YOU SHOULD RELY ONLY ON THE INFORMATION CONTAINED IN THIS PROSPECTUS SUPPLEMENT AND THE ACCOMPANYING PROSPECTUS. WE HAVE NOT, AND THE UNDERWRITERS HAVE NOT, AUTHORIZED ANY OTHER PERSON TO PROVIDE YOU WITH DIFFERENT OR ADDITIONAL INFORMATION. IF ANYONE PROVIDES YOU WITH DIFFERENT OR ADDITIONAL INFORMATION, YOU SHOULD NOT RELY ON IT. WE ARE NOT, AND THE UNDERWRITERS ARE NOT, MAKING AN OFFER TO SELL THESE NOTES IN ANY JURISDICTION WHERE THE OFFER OR SALE IS NOT PERMITTED. YOU SHOULD ASSUME THAT THE INFORMATION APPEARING IN THIS PROSPECTUS SUPPLEMENT AND THE ACCOMPANYING PROSPECTUS IS ACCURATE ONLY AS OF ITS DATE, REGARDLESS OF THE TIME OF DELIVERY OF THIS PROSPECTUS SUPPLEMENT AND THE ACCOMPANYING PROSPECTUS OR ANY SALES OF THE NOTES. OUR BUSINESS, FINANCIAL CONDITION, RESULTS OF OPERATIONS AND PROSPECTS MAY HAVE CHANGED SINCE THOSE DATES.

iii

PROSPECTUS SUPPLEMENT SUMMARY

This summary highlights some of the information in this prospectus supplement. It is not complete and may not contain all of the information that you may want to consider. You should read the entire prospectus supplement and the accompanying prospectus carefully, including Supplementary Risk Factors, Risk Factors, Use of Proceeds, Selected Consolidated Financial Data, Management s Discussion and Analysis of Financial Condition and Results of Operations and the financial statements contained elsewhere in this prospectus supplement and the accompanying prospectus. Together, these documents describe the specific terms of the Notes we are offering.

Fidus Investment Corporation (FIC), a Maryland Corporation, operates as an externally managed BDC under the 1940 Act. FIC completed its initial public offering, or IPO, in June 2011. In addition, FIC has elected to be treated as a regulated investment company (RIC) under Subchapter M of the Internal Revenue Code of 1986, as amended (the Code). As of December 31, 2017, our shares were listed on the NASDAQ Global Select Market under the symbol FDUS.

FIC may make investments directly or through its two wholly owned investment company subsidiaries, Fidus Mezzanine Capital, L.P. (Fund II) (collectively Fund I and Fund II are referred to as the Funds). Fidus Investment GP, LLC, the general partner of the Funds, is also a wholly owned subsidiary of FIC. The Funds are licensed by the U.S. Small Business Administration (the SBA) as small business investment companies (SBICs). The Funds utilize the proceeds of the issuance of SBA-guaranteed debentures to finance investments by the Funds and enhance returns to our stockholders. We believe that utilizing both FIC and the Funds as investment vehicles provides us with access to a broader array of investment opportunities. Given our access to lower cost capital through the SBA s SBIC debenture program, we expect that the majority of our investments will continue to be made through the Funds until the Funds reach their borrowing limit under the program. For three or more SBICs under common control, the maximum amount of outstanding SBA debentures cannot exceed \$350.0 million.

Unless otherwise noted in this prospectus supplement the terms we, us, our, the Company, Fidus and FIC refer to Fidus Investment Corporation and its consolidated subsidiaries.

As used in this prospectus supplement the term our investment advisor refers to Fidus Investment Advisors, LLC.

Fidus Investment Corporation

We provide customized debt and equity financing solutions to lower middle-market companies, which we define as U.S.-based companies having revenues between \$10.0 million and \$150.0 million. Our investment objective is to provide attractive risk-adjusted returns by generating both current income from our debt investments and capital appreciation from our equity related investments. Our investment strategy includes partnering with business owners, management teams and financial sponsors by providing customized financing for ownership transactions, recapitalizations, strategic acquisitions, business expansion and other growth initiatives. We seek to maintain a diversified portfolio of investments in order to help mitigate the potential effects of adverse economic events related to particular companies, regions or industries.

We invest in companies that possess some or all of the following attributes: predictable revenues; positive cash flows; defensible and/or leading market positions; diversified customer

and supplier bases; and proven management teams with strong operating discipline. We target companies in the lower middle-market with annual earnings, before interest, taxes, depreciation and amortization, or EBITDA, between \$3.0 million and \$20.0 million; however, we may from time to time opportunistically make investments in larger or smaller companies. Our investments typically range between \$5.0 million and \$30.0 million per portfolio company.

As of September 30, 2017, the fair value of our investment portfolio totaled \$560.9 million and consisted of 58 active portfolio companies and five portfolio companies that have sold their underlying operations. The weighted average yield on our debt investments as of September 30, 2017 was 13.3%. The weighted average yield of our debt investments is not the same as a return on investment for our stockholders but, rather, relates to a portion of our investment portfolio and is calculated before the payment of all of our fees and expenses. The weighted average yield was computed using the effective interest rates for debt investments at cost as of September 30, 2017, including the accretion of original issue discount and loan origination fees, but excluding investments on non-accrual status, if any. There can be no assurance that the weighted average yield will remain at its current level.

Market Opportunity

We believe that the limited amount of capital available to lower middle-market companies, coupled with the desire of these companies for flexible and partnership-oriented sources of capital, creates an attractive investment environment for us. From our perspective, lower middle-market companies have faced difficulty raising debt capital in both the capital markets and private markets. Given limited sources of capital for lower middle-market companies, we see opportunities for attractive risk-adjusted returns. Furthermore, we believe that, with a large pool of uninvested private equity capital seeking debt capital to complete buy-out transactions and a substantial supply of refinancing opportunities, there is an opportunity to attain appealing risk-adjusted returns on debt and equity investments in our target markets. See The Company in the accompanying prospectus for more information.

Business Strategy

We intend to accomplish our goal of becoming the premier provider of capital to and value-added partner of lower middle-market companies by:

Leveraging the experience of our investment advisor;

Capitalizing on our strong transaction sourcing network;

Serving as a value-added partner with customized financing solutions;

Employing rigorous due diligence and underwriting processes focused on capital preservation;

Actively managing our portfolio; and

Benefiting from lower cost of capital through our SBIC subsidiaries.

Investment Criteria/Guidelines

We use the following criteria and guidelines in evaluating investment opportunities and constructing our portfolio. However, not all of these criteria and guidelines have been, or will be, met in connection with each of our investments.

S-2

Value Orientation / Positive Cash Flow. Our investment advisor places a premium on analysis of business fundamentals from an investor s perspective and has a distinct value orientation. We focus on companies with proven business models in which we can invest at relatively low multiples of operating cash flow. We also typically invest in portfolio companies with a history of profitability and minimum trailing twelve-month EBITDA of \$3.0 million. We do not invest in start-up companies, turn-around situations or companies that we believe have unproven business plans.

Experienced Management Teams with Meaningful Equity Ownership. We target portfolio companies that have management teams with significant experience and/or relevant industry experience coupled with meaningful equity ownership. We believe management teams with these attributes are more likely to manage the companies in a manner that protects our debt investment and enhances the value of our equity investment.

Niche Market Leaders with Defensible Market Positions. We seek to invest in portfolio companies that have developed defensible and/or leading positions within their respective markets or market niches and are well positioned to capitalize on growth opportunities. We favor companies that demonstrate significant competitive advantages, which we believe helps to protect their market position and profitability.

Diversified Customer and Supplier Base. We prefer to invest in portfolio companies that have a diversified customer and supplier base. Companies with a diversified customer and supplier base are generally better able to endure economic downturns, industry consolidation and shifting customer preferences.

Significant Equity Value. We believe the existence of significant underlying equity value provides important support to our debt investments. With respect to our debt investments, we look for portfolio companies where management/sponsors have provided significant equity funding and where we believe aggregate enterprise value significantly exceeds aggregate indebtedness, after consideration of our investment.

Viable Exit Strategy. We invest in portfolio companies that we believe will provide steady cash flows to service our debt, ultimately repay our loans and provide working capital for their respective businesses. In addition, we seek to invest in portfolio companies whose business models and expected future cash flows offer attractive exit possibilities for our equity investments. We expect to exit our investments typically through one of three scenarios: (a) the sale of the portfolio company resulting in repayment of all outstanding debt and monetization of equity; (b) the recapitalization of the portfolio company through which our investments are replaced with debt or equity from a third party or parties; or (c) the repayment of the initial or remaining principal amount of our debt investment from cash flow generated by the portfolio company. In some investments, there may be scheduled amortization of some portion of our debt investment that would result in a partial exit of our investment prior to the maturity of the debt investment.

About our Advisor

Our investment activities are managed by Fidus Investment Advisors, LLC, our investment advisor, and supervised by our board of directors, a majority of whom are not interested persons of Fidus as defined in Section 2(a)(19) of the 1940 Act, and who we refer to hereafter as the Independent Directors. Pursuant to the terms of the investment advisory and management agreement, which we refer to as the Investment Advisory Agreement, between us and our

S-3

investment advisor, our investment advisor is responsible for determining the composition of our portfolio, including sourcing potential investments, conducting research and diligence on potential investments and equity sponsors, analyzing investment opportunities, structuring our investments and monitoring our investments and portfolio companies on an ongoing basis. Our investment advisor s investment professionals seek to capitalize on their significant deal origination and sourcing, underwriting, due diligence, investment structuring, execution, portfolio management and monitoring experience. These professionals have developed a broad network of contacts within the investment community, have gained extensive experience investing in assets that constitute our primary focus and have expertise in investing across all levels of the capital structure of lower middle-market companies. For information regarding the people who control our investment advisor and their affiliations with us, see Certain Relationships and Related Transactions Investment Advisory Agreement in the accompanying prospectus.

Our relationship with our investment advisor is governed by the Investment Advisory Agreement and may be subject to conflicts of interest. We pay our investment advisor a fee for its services under the Investment Advisory Agreement consisting of two components a base management fee and an incentive fee. The base management fee is calculated at an annual rate of 1.75% of the average value of our total assets (other than cash or cash equivalents but including assets purchased with borrowed amounts). The incentive fee consists of two parts. The first part is calculated and payable quarterly in arrears and equals 20.0% of our pre-incentive fee net investment income for the immediately preceding quarter, subject to a 2.0% preferred return, or hurdle, and a catch up feature. The second part is determined and payable in arrears as of the end of each fiscal year in an amount equal to 20.0% of our realized capital gains, if any, on a cumulative basis from inception through the end of each fiscal year, computed net of all realized capital losses and unrealized capital depreciation on a cumulative basis, less the aggregate amount of any capital gain incentive fees paid in prior years. We accrue, but do not pay, a capital gains incentive fee in connection with any unrealized capital appreciation, as appropriate. For more information about how we compensate our investment advisor and the related conflicts of interest, see Management and Other Agreements Investment Advisory Agreement and Certain Relationships and Related Transactions Conflicts of Interest in the accompanying prospectus.

Among other things, our board of directors is charged with protecting our interests by monitoring how our investment advisor addresses conflicts of interest associated with its management services and compensation. Our board of directors is not expected to review or approve each borrowing or incurrence of leverage. However, our board of directors periodically reviews our investment advisor s portfolio management decisions and portfolio performance. In addition, our board of directors at least annually reviews the services provided by and fees paid to our investment advisor. In connection with these reviews, our board of directors, including a majority of our Independent Directors, considers whether the fees and expenses (including those related to leverage) that we pay to our investment advisor are fair and reasonable in relation to the services provided. Renewal of our Investment Advisory Agreement must be approved each year by our board of directors, including a majority of our Independent Directors.

With respect to the administrative agreement with our investment advisor, which also serves as our administrator, our board of directors reviews the methodology employed in determining how expenses are allocated to us. Our board of directors assesses the reasonableness of such reimbursements for expenses allocated to us based on the breadth, depth and quality of such services as compared to the estimated cost to us of obtaining similar services from third-party service providers known to be available. In addition, our board of directors considers whether any

third-party service provider would be capable of providing all such services at comparable cost and quality.

Fidus Investment Advisors, LLC is a Delaware limited liability company that is registered as an investment advisor under the Investment Advisers Act of 1940, as amended, or the Advisers Act. In addition, Fidus Investment Advisors, LLC provides us with office space, equipment and clerical, book-keeping and record-keeping services pursuant to an administration agreement, which we refer to as the Administration Agreement. Under the Administration Agreement, Fidus Investment Advisors, LLC also provides managerial assistance on our behalf to those portfolio companies that have accepted our offer to provide such assistance.

Operating and Regulatory Structure

Our investment activities are managed by our investment advisor and supervised by our board of directors, a majority of whom are not interested persons of us, our investment advisor or its affiliates.

As a BDC, we are required to comply with certain regulatory requirements. For example, while we are permitted to finance investments using leverage, which may include the issuance of shares of preferred stock, or notes and other borrowings, our ability to use leverage is limited in significant respects. See Regulation in the accompanying prospectus. Any decision on our part to use leverage will depend upon our assessment of the attractiveness of available investment opportunities in relation to the costs and perceived risks of such leverage. The use of leverage to finance investments creates certain risks and potential conflicts of interest. See Risk Factors Risks Relating to Our Business and Structure Regulations governing our operations as a BDC affect our ability to raise, and the way in which we raise, additional capital which may have a negative effect on our growth and Risk Factors Risks Relating to Our Business and Structure Because we borrow money and may in the future issue additional senior securities including preferred stock and debt securities, the potential for gain or loss on amounts invested in us is magnified and may increase the risk of investing in us in the accompanying prospectus.

We have elected to be treated for U.S. federal income tax purposes as a RIC under Subchapter M of the Code. In order to maintain our tax treatment as a RIC, we must satisfy certain source of income, asset diversification and distribution requirements. See Material U.S. Federal Income Tax Considerations in the accompanying prospectus.

Risk Factors

The value of our assets, as well as the market price of our securities, will fluctuate. Our investments may be risky, and you may lose part of or all of your investment in us. Investing in our securities involves other risks, including the following:

our dependence on key personnel of our investment advisor and our executive officers; our ability to maintain or develop referral relationships;

our use of leverage;

pending legislation may allow us to incur additional leverage;

the availability of additional capital on attractive terms or at all;

S-5

uncertain valuations of our portfolio investments; competition for investment opportunities; actual and potential conflicts of interests with our investment advisor; other potential conflicts of interest; SBA regulations affecting our wholly owned SBIC subsidiaries; changes in interest rates; the impact of a protracted decline in liquidity of credit markets on our business and portfolio of investments; our ability to maintain our status as a RIC and as a BDC; the timing, form and amount of any distributions from our portfolio companies; changes in laws or regulations applicable to us; dilution risks related to our ability to issue shares below our current net asset value; possible resignation of our investment advisor; the general economy and its impact on the industries in which we invest; risks associated with investing in lower middle-market companies; the ability of our investment advisor to identify, invest in and monitor companies that meet our investment criteria; our ability to invest in qualifying assets;

the Notes will be unsecured and therefore will be effectively subordinated to any secured indebtedness we have currently incurred or may incur in the future and will rank pari passu with, or equal to, all outstanding and future unsecured unsubordinated indebtedness issued by us and our general liabilities;

the Notes will be structurally subordinated to the indebtedness and other liabilities of our subsidiaries;

the indenture under which the Notes will be issued contains limited protection for holders of the Notes;

there is no existing trading market for the Notes and, even if The Nasdaq Global Select Market approves the listing of the Notes, an active trading market for the Notes may not develop, which could limit your ability to sell the Notes and/or the market price of the Notes;

S-6

our amount of debt outstanding will increase as a result of this offering, and if we default on our obligations to pay our other indebtedness, we may not be able to make payments on the Notes;

recent tax reform could have a negative effect on holders of the Notes or us;

a downgrade, suspension or withdrawal of the credit rating assigned by a rating agency to us or the Notes, if any, or change in the debt markets could cause the liquidity or market value of the Notes to decline significantly; and

we may choose to redeem the Notes when prevailing interest rates are relatively low.

See Supplementary Risk Factors beginning on page S-17 of this prospectus supplement and Risk Factors beginning on page 12 of the accompanying prospectus for additional factors you should carefully consider before deciding to invest in the Notes.

Recent Developments

On October 17, 2017, we exited our debt and equity investments in Brook & Whittle Limited. We received payment in full on our subordinated notes. We sold our equity investments for a realized gain of approximately \$1.0 million.

On October 30, 2017, our board of directors declared a regular quarterly dividend of \$0.39 per share which was paid on December 27, 2017 to stockholders of record as of December 20, 2017. In addition, on October 30, 2017, our board of directors declared a special dividend of \$0.04 per share which was paid on December 27, 2017 to stockholders of record as of December 20, 2017.

On November 10, 2017, we restructured our equity investments in FDS Avionics Corp. (dba Flight Display Systems). As part of the restructuring, we cancelled our common and preferred equity investments, and as a result we recognized a loss of approximately \$2.4 million. Concurrently, we made a \$0.7 million investment in new common equity interests of FDS Avionics Corp. (dba Flight Display Systems).

On November 30, 2017, we invested \$2.5 million in subordinated term loans and common equity of Consolidated Infrastructure Group Holdings, LP, a premier provider of infrastructure services and solutions.

On November 30, 2017, we invested \$9.6 million in subordinated term loans and common equity and made a commitment for up to \$4.0 million of additional subordinated term loans of Mesa Line Services, LLC, a leading provider of outsourced electric utility infrastructure services in the Southwest region of the United States.

On December 1, 2017, we exited our debt and equity investments in Malabar International. We received payment in full on our subordinated notes. We sold our preferred equity investment for a realized gain of approximately \$6.8 million.

On December 8, 2017, we invested \$15.3 million in subordinated term loans and common equity of The Kyjen Company, LLC (dba Outward Hound), a manufacturer and distributor of innovative dog and cat toys, games, gear, collars, and feeders.

On December 19, 2017, we invested \$21.5 million in subordinated term loans and common equity of Gurobi Optimization, LLC, a leading commercial provider of optimization software for use in prescriptive analytics applications.

On December 29, 2017, we entered into an amendment to our Credit Facility, which, among other things, extended the maturity date from June 16, 2018 to June 16, 2019.

On January 3, 2018, we invested \$19.5 million in subordinated term loans and common equity of AVC Investors, LLC (dba Auveco), a provider of fasteners and autobody hardware to the automotive aftermarket and general industrial markets.

On January 5, 2018, we exited our debt investment in United Biologics, LLC. We received payment in full of \$8.9 million on our subordinated loan.

On January 8, 2018, we invested \$11.0 million in subordinated term loans and common equity of Spendmend LLC, a leading provider of spend visibility & audit recovery services to the healthcare industry.

On January 25, 2018, we exited our debt investment in Comprehensive Logistics Co., Inc. We received payment in full of \$16.4 million on our subordinated note, which includes a prepayment penalty.

Since September 30, 2017, we have borrowed a total of \$50.0 million under our Credit Facility, which is the total amount of indebtedness outstanding under our Credit Facility as of January 29, 2018. We intend to use the net proceeds from this offering to repay a portion of such indebtedness, and after giving effect to this offering and such repayment, we will have \$\\$ of indebtedness outstanding under our Credit Facility.

Preliminary Estimate of Fourth Quarter 2017 Results

Set forth below are certain preliminary estimates of our financial condition and results of operations for the three months ended December 31, 2017. These estimates are subject to the completion of financial closing procedures and are not a comprehensive statement of our financial results for the three months ended December 31, 2017. We advise you that this information is inherently uncertain. Our actual results may differ materially from these estimates, which are given only as of the date of this prospectus supplement, as a result of the completion of our financial closing procedures, final adjustments and other developments that arise between now and the time that our financial results for the three months ended December 31, 2017 are finalized.

The preliminary financial estimates provided in this prospectus supplement have been prepared by, and are the responsibility of, management. Neither RSM US LLP, our independent registered public accounting firm, nor any other independent accountants has audited, reviewed, compiled, or performed any procedures with respect to the accompanying preliminary financial data. Accordingly, RSM US LLP does not express an opinion or any form of assurance with respect thereto and assumes no responsibility for, and disclaims any association with, this information.

As of the date of this prospectus supplement, we estimate that the range of our net investment income per share was between \$0.30 and \$0.32 for the three months ended December 31, 2017.

As of the date of this prospectus supplement, we estimate that the range of our adjusted net investment income⁽¹⁾ per share was between \$0.34 and \$0.36 for the three months ended December 31, 2017.

As of the date of this prospectus supplement, we estimate that the range of our net asset value per share was between \$16.02 to \$16.07 as of December 31, 2017.

Capital gains incentive fee expense	0.04		0.04	
Adjusted net investment income(1)	\$ 0.34	\$	0.36	

(1) On a supplemental basis, we provide information relating to adjusted net investment income, which is a non-GAAP measure. This measure is provided in addition to, but not as a substitute for, net investment income. Adjusted net investment income represents net investment income excluding any capital gains incentive fee expense or (reversal) attributable to realized and unrealized gains and losses. The Investment Advisory Agreement provides that a capital gains incentive fee is determined and paid annually with respect to cumulative realized capital gains (but not unrealized capital gains) to the extent such realized capital gains exceed realized and unrealized losses for such year, less the aggregate amount of any capital gains incentive fees paid in all prior years. In addition, we accrue, but do not pay, a capital gains incentive fee in connection with any unrealized capital appreciation, as appropriate. As such, we believe that adjusted net investment income is a useful indicator of operations exclusive of any capital gains incentive fee expense or (reversal) attributable to realized and unrealized gains and losses. The presentation of this additional information is not meant to be considered in isolation or as a substitute for financial results prepared in accordance with GAAP. The table above provides a reconciliation of our estimates for net investment income to adjusted net investment income for the three months ended December 31, 2017.

SPECIFIC TERMS OF THE NOTES AND THE OFFERING

This summary sets forth certain terms of the Notes that we are offering pursuant to this prospectus supplement and the accompanying prospectus. This section and the Description of the Notes section in this prospectus supplement outline the specific legal and financial terms of the Notes. You should read this section of the prospectus supplement together with the section titled Description of the Notes beginning on page S-50 of this prospectus supplement and the more general description of the Notes in the section titled Description of Our Debt Securities beginning on page 123 of the accompanying prospectus before investing in the Notes. Capitalized terms used in this prospectus supplement and not otherwise defined have the meanings ascribed to them in the accompanying prospectus or in the indenture governing the Notes.

Issuer Fidus Investment Corporation

Title of the securities % Notes due 2023

Initial aggregate principal amount being \$ offered

Over-Allotment Option

The underwriters may also purchase from us up to an additional \$\ \text{million aggregate principal amount of Notes offered by this prospectus supplement and the accompanying prospectus within 30 days of the date of this prospectus supplement solely to cover over-allotments, if any.

Initial public offering price

% of the aggregate principal amount

Principal payable at maturity

100% of the aggregate principal amount; the principal amount of each Note will be payable on its stated maturity date at the office of the trustee, paying agent, and security registrar for the Notes or at such other office as we may designate.

Type of note Fixed rate note

Listing We intend to list the Notes on The Nasdaq Global Select Market within

30 days of the original issue date under the trading symbol FDUSL.

Interest rate % per year

Day count basis 360-day year of twelve 30-day months

Original issue date , 2018

Stated maturity date , 2023

Date interest starts accruing , 2018

S-10

Interest payment dates

Every February 1, May 1, August 1 and November 1, commencing May 1, 2018. If an interest payment date falls on a non-business day, the applicable interest payment will be made on the next business day and no additional interest will accrue as a result of such delayed payment.

Interest periods

The initial interest period will be the period from and including , 2018, to, but excluding, the initial interest payment date, and the subsequent interest periods will be the periods from and including an interest payment date to, but excluding, the next interest payment date or the stated maturity date, as the case may be.

Regular record dates for interest

Every January 15, April 15, July 15 and October 15, commencing April 15, 2018.

Specified currency

U.S. Dollars

Place of payment

The City of New York and/or such other places that may be specified in the indenture or a notice to holders.

Ranking of notes

The Notes will be our direct unsecured obligations and will rank:

pari passu with our other outstanding and future unsecured unsubordinated indebtedness;

senior to any of our future indebtedness that expressly provides it is subordinated to the Notes;

effectively subordinated to all of our existing and future secured indebtedness (including indebtedness that is initially unsecured in respect of which we subsequently grant a security interest), to the extent of the value of the assets securing such indebtedness, including, without limitation, borrowings under our Credit Facility, of which \$50.0 million was outstanding as of January 29, 2018; and

structurally subordinated to all existing and future indebtedness and other obligations of any of our subsidiaries, which, as of January 29, 2018, had total indebtedness outstanding of \$247.8 million.

Denominations

We will issue the Notes in denominations of \$25 and integral multiples of \$25 in excess thereof.

Business day

Each Monday, Tuesday, Wednesday, Thursday and Friday that is not a day on which banking institutions in the City of New York or another place of payment are authorized or obligated by law or executive order to close.

S-11

Optional redemption

The Notes may be redeemed in whole or in part at any time or from time to time at our option on or after upon not less than 30 days nor more than 60 days written notice by mail prior to the date fixed for redemption thereof, at a redemption price of 100% of the outstanding principal amount of the Notes plus accrued and unpaid interest payments otherwise payable for the then-current quarterly interest period accrued to the date fixed for redemption.

You may be prevented from exchanging or transferring the Notes when they are subject to redemption. In case any Notes are to be redeemed in part only, the redemption notice will provide that, upon surrender of such Note, you will receive, without a charge, a new Note or Notes of authorized denominations representing the principal amount of your remaining unredeemed Notes.

Any exercise of our option to redeem the Notes will be done in compliance with the 1940 Act.

If we redeem only some of the Notes, the trustee or DTC, as applicable, will determine the method for selection of the particular Notes to be redeemed, in accordance with the indenture governing the Notes and in accordance with the rules of any national securities exchange or quotation system on which the Notes are listed. Unless we default in payment of the redemption price, on and after the date of redemption, interest will cease to accrue on the Notes called for redemption.

Sinking fund

The Notes will not be subject to any sinking fund.

Repayment at option of holders

Holders will not have the option to have the Notes repaid prior to the stated maturity date.

Defeasance

The Notes are subject to defeasance by us. Defeasance means that, by depositing with a trustee an amount of cash and/or government securities sufficient to pay all principal and interest, if any, on the Notes when due and satisfying any additional conditions required under the indenture relating to the Notes, we will be deemed to have been discharged from our obligations under the Notes. See Description of the Notes Defeasance in this prospectus supplement.

Covenant defeasance

The Notes are subject to covenant defeasance by us. In the event of a covenant defeasance, upon depositing such funds and satisfying

conditions similar to those for defeasance we would be released from certain covenants under the indenture relating to the Notes. The consequences

S-12

to the holders of the Notes would be that, while they would no longer benefit from certain covenants under the indenture, and while the Notes could not be accelerated for any reason, the holders of the Notes nonetheless could look to the Company for repayment of the Notes if there were a shortfall in the funds deposited with the trustee or the trustee is prevented from making a payment. See Description of the Notes Defeasance in this prospectus supplement.

Form of notes

The Notes will be represented by global securities that will be deposited and registered in the name of DTC or its nominee. This means that, except in limited circumstances, you will not receive certificates for the Notes. Beneficial interests in the Notes will be represented through book-entry accounts of financial institutions acting on behalf of beneficial owners as direct and indirect participants in DTC. Investors may elect to hold interests in the Notes through either DTC, if they are a participant, or indirectly through organizations that are participants in DTC.

Trustee, paying agent, and security registrar

U.S. Bank National Association

Other covenants

In addition to any covenants described elsewhere in this prospectus supplement or the accompanying prospectus, the following covenants will apply to the Notes:

We agree that for the period of time during which the Notes are outstanding, we will not violate Section 18(a)(1)(A) as modified by Section 61(a)(1) of the 1940 Act or any successor provisions, whether or not we continue to be subject to such provisions of the 1940 Act, but giving effect, in either case, to the exemptive relief granted to us by the SEC with respect to the consolidation of debt of the Funds. Currently, these provisions generally prohibit us from incurring additional borrowings, including through the issuance of additional debt securities, unless our asset coverage, as defined in the 1940 Act, equals at least 200% after such borrowings. See

Supplementary Risk Factors Risks Related to the Notes Pending legislation may allow us to incur additional leverage in this prospectus supplement.

We agree that, for the period of time during which the Notes are outstanding, we will not violate Section 18(a)(1)(B) as modified by (i) Section 61(a)(1) of the 1940 Act or any successor provisions and after giving effect to any exemptive relief granted to us by the

S-13

SEC and (ii) the two other exceptions set forth below. These statutory provisions of the 1940 Act are not currently applicable to us and will not be applicable to us as a result of this offering. However, if Section 18(a)(1)(B) as modified by Section 61(a)(1) of the 1940 Act were currently applicable to us in connection with this offering, these provisions would generally prohibit us from declaring any cash dividend or distribution upon any class of our capital stock, or purchasing any such capital stock if our asset coverage were below 200% at the time of the declaration of the dividend or distribution or the purchase and after deducting the amount of such dividend, distribution, or purchase. Under the covenant, we will be permitted to declare a cash dividend or distribution notwithstanding the prohibition contained in Section 18(a)(1)(B) as modified by Section 61(a)(1) of the 1940 Act or any successor provisions, but only up to such amount as is necessary for us to maintain our status as a RIC under Subchapter M of the Code. Furthermore, the covenant will permit us to continue paying dividends or distributions and will not be triggered unless and until such time as our asset coverage (as defined in the 1940 Act, except to the extent modified by this covenant) has not been in compliance with the minimum asset coverage required by Section 18(a)(1)(B) as modified by Section 61(a)(1) of the 1940 Act or any successor provisions (after giving effect to any exemptive relief granted to us by the SEC) for more than six consecutive months. For the purposes of determining asset coverage as used above, any and all indebtedness of the Company, including any outstanding borrowings under the Credit Facility and any successor or additional credit facility, shall be deemed a senior security of us. See Supplementary Risk Factors Risks Related to the Notes Pending legislation may allow us to incur additional leverage in this prospectus supplement.

If, at any time, we are not subject to the reporting requirements of Sections 13 or 15(d) of the Securities Exchange Act of 1934, or the Exchange Act, to file any periodic reports with the SEC, we agree to furnish to holders of the Notes and the trustee, for the period of time during which the Notes are outstanding, our audited annual consolidated financial statements, within 90 days of our fiscal year end, and unaudited interim consolidated financial statements, within 45 days of our fiscal quarter end (other than our fourth fiscal quarter). All such financial statements will be prepared, in all material respects, in accordance with

S-14

applicable Generally Accepted Accounting Principles in the United States of America, or U.S. GAAP.

Events of default

You will have rights if an Event of Default occurs with respect to the Notes and is not cured.

The term Event of Default in respect of the Notes means any of the following:

We do not pay the principal of, or any premium on, any Note when due and payable at maturity;

We do not pay interest on any Note when due and payable, and such default is not cured within 30 days of its due date;

We remain in breach of any other covenant in respect of the Notes for 60 days after we receive a written notice of default stating we are in breach (the notice must be sent by either the trustee or holders of at least 25% of the principal amount of the outstanding Notes);

We file for bankruptcy or certain other events of bankruptcy, insolvency or reorganization occur and remain undischarged or unstayed for a period of 60 days; or

On the last business day of each of twenty-four consecutive calendar months, the Notes have an asset coverage of less than 100%, giving effect to the exemptive relief granted to us by the SEC with respect to the consolidation of debt of the Funds.

Further issuances

We have the ability to issue additional debt securities under the indenture with terms different from the Notes and, without the consent of the holders of the Notes, to reopen the Notes and issue additional Notes. If we issue additional debt securities, these additional debt securities could have a lien or other security interest greater than that accorded to the holders of the Notes, which are unsecured.

Use of proceeds

We estimate that the net proceeds we will receive from the sale of the Notes will be approximately \$ million (or approximately \$ million if the underwriters exercise their over-allotment option in full)

based on a public offering price of \$ per Note, after deducting the underwriting discount of \$ (or approximately \$ if the underwriters fully exercise their over-allotment option) payable by us and estimated offering expenses of approximately \$400,000 payable by us. We may change the size of this offering based on demand and market conditions.

S-15

We intend to use the net proceeds from this offering to repay outstanding indebtedness under our Credit Facility. However, we may re-borrow under our Credit Facility and use such borrowings to invest in lower middle-market companies in accordance with our investment objective and strategies and for working capital and general corporate purposes. As of January 29, 2018, we had \$50.0 million of indebtedness outstanding under our Credit Facility. Our Credit Facility matures on June 16, 2019, and borrowings under the Credit Facility currently bear interest on a per annum basis equal to (i) the alternate base rate plus 2.5% or (ii) the applicable London Interbank Offered Rate, or LIBOR, which varies depending on the period of the borrowing under the Credit Facility, plus 3.5%. The alternate base rate is equal to the greater of (i) prime rate, (ii) the federal funds rate plus 0.5% or (iii) the three-month LIBOR plus 1.0%.

Governing law

The Notes and the indenture will be governed by and construed in accordance with the laws of the State of New York.

Global clearance and settlement procedures

Interests in the Notes will trade in DTC s Same Day Funds Settlement System, and any permitted secondary market trading activity in such Notes will, therefore, be required by DTC to be settled in immediately available funds. None of the Company, the trustee or the paying agent will have any responsibility for the performance by DTC or its participants or indirect participants of their respective obligations under the rules and procedures governing their operations.

S-16

SUPPLEMENTARY RISK FACTORS

Investing in the Notes involves a high degree of risk. Before you invest in the Notes, you should be aware of various significant risks, including those described below. You should carefully consider these risks, together with all of the other information included in this prospectus supplement and the accompanying prospectus, before you decide whether to make an investment in the Notes. The risks set forth below are not the only risks we face. If any of the following risks occur, our business, financial condition and results of our operations could be materially adversely affected. In such case, you could lose all or part of your investment.

Risks Related to the Notes

The Notes will be unsecured and therefore will be effectively subordinated to any secured indebtedness we have currently incurred or may incur in the future and will rank pari passu with, or equal to, all outstanding and future unsecured unsubordinated indebtedness issued by us and our general liabilities.

The Notes will not be secured by any of our assets or any of the assets of any of our subsidiaries. As a result, the Notes will be effectively subordinated to any secured indebtedness we or our subsidiaries have outstanding as of the date of this prospectus supplement (including our Credit Facility) or that we or our subsidiaries may incur in the future (or any indebtedness that is initially unsecured as to which we subsequently grant a security interest) to the extent of the value of the assets securing such indebtedness. In any liquidation, dissolution, bankruptcy or other similar proceeding, the holders of any of our secured indebtedness or secured indebtedness of our subsidiaries may assert rights against the assets pledged to secure that indebtedness in order to receive full payment of their indebtedness before the assets may be used to pay other creditors, including the holders of the Notes. As of January 29, 2018, we had \$50.0 million in outstanding indebtedness under our Credit Facility. The indebtedness under the Credit Facility is effectively senior to the Notes to the extent of the value of the assets securing such indebtedness.

The Notes will be structurally subordinated to the indebtedness and other liabilities of our subsidiaries.

The Notes will be obligations exclusively of Fidus Investment Corporation, and not of any of our subsidiaries. None of our subsidiaries will be a guarantor of the Notes, and the Notes will not be required to be guaranteed by any subsidiary we may acquire or create in the future. Any assets of our subsidiaries will not be directly available to satisfy the claims of our creditors, including holders of the Notes. Except to the extent we are a creditor with recognized claims against our subsidiaries, all claims of creditors of our subsidiaries will have priority over our equity interests in such entities (and therefore the claims of our creditors, including holders of the Notes) with respect to the assets of such entities. Even if we are recognized as a creditor of one or more of these entities, our claims would still be effectively subordinated to any security interests in the assets of any such entity and to any indebtedness or other liabilities of any such entity senior to our claims. Consequently, the Notes will be structurally subordinated to all indebtedness and other liabilities, including trade payables, of any of our existing or future subsidiaries, including the Funds. As of January 29, 2018, our subsidiaries had total indebtedness outstanding of \$247.8 million. Certain of these entities currently serve as guarantors under our Credit Facility, and in the future our subsidiaries may incur substantial additional indebtedness, all of which is and would be structurally senior to the Notes.

S-17

The indenture under which the Notes will be issued contains limited protection for holders of the Notes.

The indenture under which the Notes will be issued offers limited protection to holders of the Notes. The terms of the indenture and the Notes do not restrict our or any of our subsidiaries ability to engage in, or otherwise be a party to, a variety of corporate transactions, circumstances or events that could have a material adverse impact on your investment in the Notes. In particular, the terms of the indenture and the Notes will not place any restrictions on our or our subsidiaries ability to:

issue securities or otherwise incur additional indebtedness or other obligations, including (1) any indebtedness or other obligations that would be equal in right of payment to the Notes, (2) any indebtedness or other obligations that would be secured and therefore rank effectively senior in right of payment to the Notes to the extent of the values of the assets securing such debt, (3) indebtedness of ours that is guaranteed by one or more of our subsidiaries and which therefore is structurally senior to the Notes and (4) securities, indebtedness or obligations issued or incurred by our subsidiaries that would be senior to our equity interests in those entities and therefore rank structurally senior to the Notes with respect to the assets of our subsidiaries, in each case other than an incurrence of indebtedness or other obligation that would cause a violation of Section 18(a)(1)(A) as modified by Section 61(a)(1) of the 1940 Act or any successor provisions, whether or not we continue to be subject to such provisions of the 1940 Act, but giving effect, in each case, to the exemptive relief granted to us by the SEC with respect to the consolidation of debt of the Funds. Currently, these provisions generally prohibit us from making additional borrowings, including through the issuance of additional debt or the sale of additional debt securities, unless our asset coverage, as defined in the 1940 Act, equals at least 200% after such borrowings. See Pending legislation may allow us to incur additional leverage below;

pay dividends on, or purchase or redeem or make any payments in respect of, capital stock or other securities ranking junior in right of payment to the Notes, including subordinated indebtedness, except that we have agreed that, for the period of time during which the Notes are outstanding, we will not violate Section 18(a)(1)(B) as modified by (i) Section 61(a)(1) of the 1940 Act or any successor provisions and after giving effect to any exemptive relief granted to us by the SEC and (ii) the following two exceptions: (A) we will be permitted to declare a cash dividend or distribution notwithstanding the prohibition contained in Section 18(a)(1)(B) as modified by Section 61(a)(1) of the 1940 Act or any successor provisions, but only up to such amount as is necessary for us to maintain our status as a RIC under Subchapter M of the Code; and (B) this restriction will permit us to continue paying dividends or distributions and will not be triggered unless and until such time as our asset coverage (as defined in the 1940 Act, except to the extent modified by this covenant) has not been in compliance with the minimum asset coverage required by Section 18(a)(1)(B) as modified by Section 61(a)(1) of the 1940 Act or any successor provisions (after giving effect to any exemptive relief granted to us by the SEC) for more than six consecutive months. If Section 18(a)(1)(B) as modified by Section 61(a)(1) of the 1940 Act were currently applicable to us in connection with this offering, these provisions would generally prohibit us from declaring any cash dividend or distribution upon any class of our capital stock, or purchasing any such capital stock if our asset coverage were below 200% at the time of the declaration of the dividend or distribution or the purchase and after deducting the amount of such dividend, distribution or purchase. For the purposes of determining asset coverage as used above, any and all indebtedness of the Company, including any outstanding borrowings under the Credit Facility and any successor or additional credit facility, shall be

S-18

deemed a senior security of us. See Pending legislation may allow us to incur additional leverage below;

sell assets (other than certain limited restrictions on our ability to consolidate, merge or sell all or substantially all of our assets);

enter into transactions with affiliates;

create liens (including liens on the shares of our subsidiaries) or enter into sale and leaseback transactions;

make investments; or

create restrictions on the payment of dividends or other amounts to us from our subsidiaries.

In addition, the indenture (as defined in Description of the Notes) will not require us to make an offer to purchase the Notes in connection with a change of control or any other event.

Furthermore, the terms of the indenture and the Notes do not protect holders of the Notes in the event that we experience changes (including significant adverse changes) in our financial condition, results of operations or credit ratings, if any, as they do not require that we or our subsidiaries adhere to any financial tests or ratios or specified levels of net worth, revenues, income, cash flow, or liquidity other than as described under Description of the Notes Events of Default and Description of the Notes Covenants elsewhere in this prospectus supplement.

Our ability to recapitalize, incur additional debt (including additional debt that matures prior to the maturity of the Notes), and take a number of other actions that are not limited by the terms of the Notes may have important consequences for you as a holder of the Notes, including making it more difficult for us to satisfy our obligations with respect to the Notes or negatively affecting the trading value of the Notes.

Other debt we issue or incur in the future could contain more protections for its holders than the indenture and the Notes, including additional covenants and events of default. The issuance or incurrence of any such debt with incremental protections could affect the market for, trading levels, and prices of the Notes.

There is no existing trading market for the Notes and, even if The Nasdaq Global Select Market approves the listing of the Notes, an active trading market for the Notes may not develop, which could limit your ability to sell the Notes and/or the market price of the Notes.

The Notes will be a new issue of debt securities for which there initially will not be a trading market. We intend to list the Notes on The Nasdaq Global Select Market within 30 days of the original issue date under the symbol FDUSL. However, there is no assurance that the Notes will be approved for listing on The Nasdaq Global Select Market.

Moreover, even if the listing of the Notes is approved, we cannot provide any assurances that an active trading market will develop or be maintained for the Notes or that you will be able to sell your Notes. If the Notes are traded after their initial issuance, they may trade at a discount from their initial offering price depending on prevailing interest rates, the market for similar securities, our credit ratings, if any, general economic conditions, our financial condition, performance and prospects and other factors. The underwriters have advised us that they intend to make a market in

the Notes, but they are not obligated to do so. The underwriters may discontinue any market-making in the Notes at any time at their sole discretion.

Accordingly, we cannot assure you that the Notes will be approved for listing on The Nasdaq Global Select Market, that a liquid trading market will develop or be maintained for the Notes, that you will be able to sell your Notes at a particular time or that the price you receive when you sell

S-19

will be favorable. To the extent an active trading market does not develop, the liquidity and trading price for the Notes may be harmed. Accordingly, you may be required to bear the financial risk of an investment in the Notes for an indefinite period of time.

Our amount of debt outstanding will increase as a result of this offering, and if we default on our obligations to pay our other indebtedness, we may not be able to make payments on the Notes.

As of January 29, 2018, we had approximately \$50.0 million of indebtedness outstanding under the Credit Facility. Any default under the agreements governing our indebtedness, including a default under our Credit Facility or other indebtedness to which we may be a party that is not waived by the required lenders, and the remedies sought by lenders or the holders of such indebtedness could make us unable to pay principal, premium, if any, and interest on the Notes and substantially decrease the market value of the Notes. If we are unable to generate sufficient cash flow and are otherwise unable to obtain funds necessary to meet required payments of principal, premium, if any, and interest on our indebtedness, or if we otherwise fail to comply with the various covenants, including financial and operating covenants, in the instruments governing our indebtedness (including the Credit Facility), we could be in default under the terms of the agreements governing such indebtedness, including the Notes. In the event of such default, the holders of such indebtedness could elect to declare all the funds borrowed thereunder to be due and payable, together with accrued and unpaid interest, the lenders under the Credit Facility or other debt we may incur in the future could elect to terminate their commitment, cease making further loans and institute foreclosure proceedings against our assets, and we could be forced into bankruptcy or liquidation.

Our ability to generate sufficient cash flow in the future is, to some extent, subject to general economic, financial, competitive, legislative and regulatory factors as well as other factors that are beyond our control. We cannot assure you that our business will generate cash flow from operations, or that future borrowings will be available to us under the Credit Facility or otherwise, in an amount sufficient to enable us to meet our payment obligations under the Notes, our other debt, and to fund other liquidity needs.

If our operating performance declines and we are not able to generate sufficient cash flow to service our debt obligations, we may in the future need to refinance or restructure our debt, including any Notes sold, sell assets, reduce or delay capital investments, seek to raise additional capital or seek to obtain waivers from the lenders under the Credit Facility or other debt that we may incur in the future to avoid being in default. If we are unable to implement one or more of these alternatives, we may not be able to meet our payment obligations under the Notes and our other debt. If we breach our covenants under the Credit Facility or any of our other debt and seek a waiver, we may not be able to obtain a waiver from the required lenders or holders thereof. If this occurs, we would be in default under the Credit Facility or other debt, the lenders or holders could exercise rights as described above, and we could be forced into bankruptcy or liquidation. If we are unable to repay debt, lenders having secured obligations could proceed against the collateral securing the debt, including the Credit Facility. Because the Credit Facility has, and any future credit facilities will likely have, customary cross-default provisions, if we have a default under the terms of the Notes, the obligations under the Credit Facility or any future credit facility may be accelerated and we may be unable to repay or finance the amounts due.

Recent tax legislation could have a negative effect on holders of the Notes or us.

On December 22, 2017, tax reform legislation commonly referred to as the Tax Cuts and Jobs Act was signed into law. This legislation makes significant changes to the U.S. federal income

S-20

tax rules applicable to both individuals and entities, including permanently reducing the U.S. federal corporate income tax rate, reducing the maximum U.S. federal individual income tax rate (effective for taxable years 2018 through 2025), restricting the deductibility of interest expense, and changing the rules regarding the calculation of net operating loss deductions that may be used to offset taxable income. There is uncertainty as to the impact of this legislation on us, the entities in which we invest, or an investment in the Notes. You are urged to consult with your tax advisor with respect to the impact of this legislation and the status of any other regulatory or administrative developments and proposals and their potential effect on your investment in the Notes.

A downgrade, suspension or withdrawal of the credit rating assigned by a rating agency to us or the Notes, if any, or change in the debt markets could cause the liquidity or market value of the Notes to decline significantly.

Our credit ratings are an assessment by rating agencies of our ability to pay our debts when due. Consequently, real or anticipated changes in our credit ratings will generally affect the market value of the Notes. These credit ratings may not reflect the potential impact of risks relating to the structure or marketing of the Notes. Credit ratings are not a recommendation to buy, sell or hold any security, and may be revised or withdrawn at any time by the issuing organization in its sole discretion. Neither we nor any underwriter undertakes any obligation to maintain our credit ratings or to advise holders of Notes of any changes in our credit ratings. There can be no assurance that our credit ratings will remain for any given period of time or that such credit ratings will not be lowered or withdrawn entirely by the rating agencies if in their judgment future circumstances relating to the basis of the credit ratings, such as adverse changes in our company, so warrant. The conditions of the financial markets and prevailing interest rates have fluctuated in the past and are likely to fluctuate in the future, which could have an adverse effect on the market prices of the Notes.

We may choose to redeem the Notes when prevailing interest rates are relatively low.

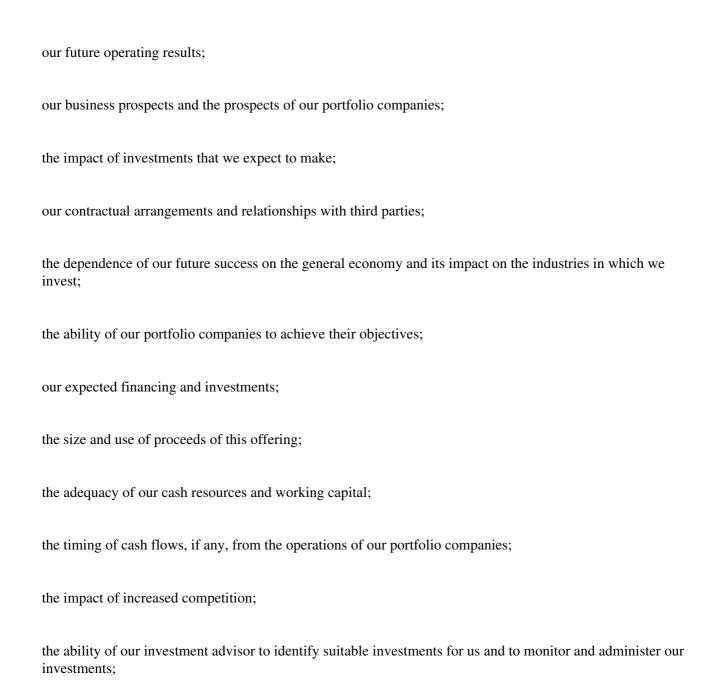

On or after , we may choose to redeem the Notes from time to time, especially if prevailing interest rates are lower than the rate borne by the Notes. Before redeeming any Notes, we would have to comply with certain requirements under our Credit Facility, to the extent such requirements remain in effect at such time, or otherwise obtain consent from the lenders. If prevailing rates are lower at the time of redemption, and we redeem the Notes, you likely would not be able to reinvest the redemption proceeds in a comparable security at an effective interest rate as high as the interest rate on the Notes being redeemed. Our redemption right also may adversely impact your ability to sell the Notes as the optional redemption date or period approaches.

Pending legislation may allow us to incur additional leverage.

As a BDC, under the 1940 Act we generally are not permitted to incur indebtedness unless immediately after any borrowing we have an asset coverage for total borrowings of at least 200.0% (i.e., the amount of debt may not exceed 50.0% of the value of our assets). Legislation recently passed by the U.S. House of Representatives Financial Services Committee, if it becomes law, would modify this section of the 1940 Act and increase the amount of debt that BDCs may incur by modifying the asset coverage percentage from 200.0% to 150.0%. As a result, we may be able to incur additional indebtedness in the future and therefore your risk of an investment in us may increase. Furthermore, such legislation, if it becomes law, may affect the covenants applicable to the Notes and your rights as a holder thereof.

SPECIAL NOTE REGARDING FORWARD-LOOKING STATEMENTS

This prospectus supplement and the accompanying prospectus contain forward-looking statements that involve substantial risks and uncertainties. These forward-looking statements are not historical facts, but rather are based on current expectations, estimates and projections about us, our current and prospective portfolio investments, our industry, our beliefs, and our assumptions. Words such as anticipates, expects, intends, plans, will, may, believes, projects and variations of these words and similar expre seeks, estimates, would, should, targets, intended to identify forward-looking statements. The forward-looking statements contained in this prospectus supplement and the accompanying prospectus involve risks and uncertainties, including statements as to:

the ability of our investment advisor to attract and retain highly talented professionals;

our regulatory structure and tax status;

our ability to operate as a BDC and a RIC and each of the Funds respective ability to operate as a SBIC;

the adequacy of our cash resources and working capital;

the timing of cash flows, if any, from the operations of our portfolio companies;

the timing, form and amount of any dividend distributions;

the impact of fluctuations in interest rates on our business;

S-22

the valuation of any investments in portfolio companies, particularly those having no liquid trading market; and

our ability to recover unrealized losses.

These statements are not guarantees of future performance and are subject to risks, uncertainties and other factors, some of which are beyond our control and difficult to predict and could cause actual results to differ materially from those expressed or forecasted in the forward-looking statements, including without limitation:

an economic downturn could impair our portfolio companies ability to continue to operate, which could lead to the loss of value in of some or all of our investments in such portfolio companies;

a contraction of available credit and/or an inability to access the equity markets could impair our lending and investment activities;

interest rate volatility could adversely affect our results, particularly because we use leverage as part of our investment strategy;

currency fluctuations could adversely affect the results of our investments in portfolio companies with foreign operations; and

the risks, uncertainties and other factors we identify in Supplementary Risk Factors beginning on page S-17of this prospectus supplement and Risk Factors beginning on page 12 of the accompanying prospectus and in our other filings with the SEC.

Although we believe that the assumptions on which these forward-looking statements are based are reasonable, any of those assumptions could prove to be inaccurate, and as a result, the forward-looking statements based on those assumptions also could be inaccurate. Important assumptions include our ability to originate new loans and investments, certain margins and levels of profitability and the availability of additional capital. In light of these and other uncertainties, the inclusion of a projection or forward-looking statement in this prospectus should not be regarded as a representation by us that our plans and objectives will be achieved. These risks and uncertainties include those described or identified in Risk Factors and elsewhere in this prospectus supplement and the accompanying prospectus. You should not place undue reliance on these forward-looking statements, which apply only as of the date of this prospectus.

The forward-looking statements and projections contained in this prospectus supplement and accompanying prospectus are excluded from the safe harbor protection provided by Section 27A of the Securities Act of 1933, as amended, or the Securities Act.

S-23

USE OF PROCEEDS

We estimate that the net proceeds we will receive from the sale of the Notes will be approximately \$\\$\ \text{million} (or approximately \$\\$\ \text{million} if the underwriters exercise their over-allotment option in full) based on a public offering price of \$\\$\ \text{per Note, after deducting the underwriting discount of \$\\$\ \text{(or approximately \$\\$\ \text{ if the underwriters fully exercise their over-allotment option) payable by us and estimated offering expenses of approximately \$400,000 payable by us. We may change the size of this offering based on demand and market conditions.

We intend to use the net proceeds from this offering to repay outstanding indebtedness under our Credit Facility. However, we may re-borrow under our Credit Facility and use such borrowings to invest in lower middle-market companies in accordance with our investment objective and strategies and for working capital and general corporate purposes. As of January 29, 2018, we had \$50.0 million of indebtedness outstanding under our Credit Facility, which is subject to customary covenants and obligations. After giving effect to this offering and the use of the net proceeds therefrom to repay outstanding indebtedness under the Credit Facility, we will have under our Credit Facility \$\infty\$ of indebtedness outstanding and \$\infty\$ available to be drawn. Our Credit Facility matures on June 16, 2019, and borrowings under the Credit Facility currently bear interest on a per annum basis equal to (i) the alternate base rate plus 2.5% or (ii) the applicable LIBOR, which varies depending on the period of the borrowing under the Credit Facility, plus 3.5%. The alternate base rate is equal to the greater of (i) prime rate, (ii) the federal funds rate plus 0.5% or (iii) the three-month LIBOR plus 1.0%. See Management s Discussion and Analysis of Financial Condition and Results of Operations Liquidity and Capital Resources for additional information.

An affiliate of ING Financial Markets LLC, an underwriter in this offering, is the administrative agent and lender under our Credit Facility. We intend to use the net proceeds of this offering to repay outstanding indebtedness under the Credit Facility. The collateral under the Credit Facility will not be released as a result of such repayment. As such, the affiliate of ING Financial Markets LLC will receive a portion of the net proceeds of this offering. Nonetheless, in accordance with Rule 5121 of the Financial Industry Regulatory Authority, Inc., or FINRA, the appointment of a qualified independent underwriter is not necessary in connection with this offering because we, the issuer of the securities in this offering, are a BDC.

S-24

CAPITALIZATION

The following table sets forth our capitalization as of September 30, 2017:

on an actual basis as of September 30, 2017; and

on an as adjusted basis for the sale of \$\frac{1}{2}\$ million aggregate principal amount of the Notes offered by this prospectus supplement and the accompanying prospectus (assuming no exercise of the over-allotment option) based on an assumed public offering price of \$\frac{1}{2}\$ per Note, after deducting the underwriting discounts and commissions of \$\frac{1}{2}\$ payable by us and estimated offering expenses of approximately \$400,000 payable by us, and to reflect total borrowings of \$50.0 million under the Company s Credit Facility subsequent to September 30, 2017 and outstanding as of January 29, 2018 and the use of proceeds from this offering to repay \$\frac{1}{2}\$ million of such outstanding indebtedness under the Credit Facility.

This table should be read in conjunction with our Management's Discussion and Analysis of Financial Condition and Results of Operations and our financial statements and notes thereto included in this prospectus supplement and the accompanying prospectus.

	As of September 30, 20

⁽¹⁾ Since September 30, 2017, we have borrowed a total of \$50.0 million under our Credit Facility, which is the total amount of indebtedness outstanding under our Credit Facility as of January 29, 2018. We intend to use the net proceeds from this offering to repay a portion of such indebtedness, and after giving effect to this offering and such repayment, we will have \$ of indebtedness outstanding under our Credit Facility.

RATIO OF EARNINGS TO FIXED CHARGES

For the years ended December 31, 2012, 2013, 2014, 2015 and 2016, and for the nine months ended September 30, 2017, the ratio of earnings to fixed charges of the Company, computed as set forth below, were as follows:

						For the nine
						months
	For t	he years	ended l	Decemb	er 31,	ended
						September 30,
	2012	2013	2014	2015	2016	2017
Earnings to Fixed Charges(1)	4.02	4.95	3.65	3.79	4.98	5.45

For purposes of computing the ratios of earnings to fixed charges, earnings represent net increase in net assets resulting from operations plus (or minus) tax provision (benefit) including excise tax expense plus fixed charges. Fixed charges include interest and financing expenses.

(1) Earnings include net realized and unrealized gains or losses. Net realized and unrealized gains or losses can vary substantially from period to period.

Excluding net unrealized gains or losses, the earnings to fixed charges ratio would be 3.75, 8.08, 1.88, 4.86, 2.25 and 6.13 for the years ended December 31, 2012, 2013, 2014, 2015 and 2016, and the nine months ended September 30, 2017, respectively.

Excluding net realized and unrealized gains or losses, the earnings to fixed charges ratio would be 3.44, 3.76, 4.15, 3.85, 3.55 and 4.48 for the years ended December 31, 2012, 2013, 2014, 2015 and 2016, and the nine months ended September 30, 2017, respectively.

S-26

SELECTED CONSOLIDATED FINANCIAL DATA

The following selected consolidated financial data of Fidus Investment Corporation and its subsidiaries, including the Funds, as of and for the years ended December 31, 2016, 2015, 2014, 2013 and 2012, is derived from the consolidated financial statements that have been audited by RSM US LLP, our independent registered public accounting firm. The selected consolidated financial and other data for the nine months ended September 30, 2017 and other quarterly financial information is derived from our unaudited financial statements, and in the opinion of management, reflects all adjustments (consisting only of normal recurring adjustments) that are necessary to present fairly the results of such interim periods. Interim results as of and for the nine months ended September 30, 2017 are not necessarily indicative of the results that may be expected for the year ended December 31, 2017. This financial data should be read in conjunction with our consolidated financial statements and the notes thereto and Management s Discussion and Analysis of Financial Condition and Results of Operations included in this prospectus supplement and the accompanying prospectus.

MANAGEMENT S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Overview

We provide customized debt and equity financing solutions to lower middle-market companies, which we define as U.S. based companies having revenues between \$10.0 million and \$150.0 million. Our investment objective is to provide attractive risk-adjusted returns by generating both current income from our debt investments and capital appreciation from our equity related investments. Our investment strategy includes partnering with business owners, management teams and financial sponsors by providing customized financing for ownership transactions, recapitalizations, strategic acquisitions, business expansion and other growth initiatives. We seek to maintain a diversified portfolio of investments in order to help mitigate the potential effects of adverse economic events related to particular companies, regions or industries.

FIC was formed as a Maryland corporation on February 14, 2011, and operates as an externally managed BDC under the 1940 Act. FIC completed its IPO in June 2011. In addition, FIC has elected to be treated as a RIC under Subchapter M of the Code.

FIC may make investments directly or through its two wholly owned investment company subsidiaries, Fund I and Fund II. Fidus Investment GP, LLC, the general partner of the Funds, is also a wholly owned subsidiary of FIC. The Funds are licensed by the SBA as SBICs. The Funds utilize the proceeds of the issuance of SBA-guaranteed debentures to finance investments by the Funds and enhance returns to our stockholders. We believe that utilizing both FIC and the Funds as investment vehicles provides us with access to a broader array of investment opportunities. Given our access to lower cost capital through the SBA s SBIC debenture program, we expect that the majority of our investments will continue to be made through the Funds until the Funds reach their borrowing limit under the program. For three or more SBICs under common control, the maximum amount of outstanding SBA debentures cannot exceed \$350.0 million. Based on the current capitalization of the Funds, as of January 29, 2018, we have approximately \$10.5 million of remaining borrowing capacity under the SBIC Debenture Program and intend to utilize such capacity by June 30, 2018.

Revenues: We generate revenue in the form of interest and fee income on debt investments and capital gains and distributions, if any, on equity investments. Our debt investments, whether in the form of mezzanine, senior secured or unitranche loans, typically have terms of five to seven years and bear interest at a fixed rate but may bear interest at a floating rate. In some instances, we receive payments on our debt investments based on scheduled amortization of the outstanding balances. In addition, we receive repayments of some of our debt investments prior to their scheduled maturity dates, which may include prepayment penalties. The frequency or volume of these repayments fluctuates significantly from period to period. Our portfolio activity may reflect the proceeds of sales of securities. In some cases, our investments provide for deferred interest payments or payment-in-kind, or PIK, interest. The principal amount of loans and any accrued but unpaid interest generally become due at the maturity date. In addition, we may generate revenue in the form of commitment, origination, amendment, or structuring fees and fees for providing managerial assistance. Debt investment origination fees, original issue discount and market discount or premium, if any, are capitalized, and we accrete or amortize such amounts into interest income. We record prepayment premiums on loans as fee income. Interest and dividend income is recorded on the accrual basis to the extent that we expect to collect such amounts. Debt investments or preferred equity securities are placed on non-accrual status when principal, interest or dividend payments become materially past due, or when there is reasonable doubt that principal, interest or dividends will be collected. See Critical Accounting Policies and Use of

S-30

Estimates Revenue Recognition. Interest is accrued daily based on the outstanding principal amount and the contractual terms of the debt. Dividend income is recorded as dividends are declared or at the point an obligation exists for the portfolio company to make a distribution, and is generally recognized when received. Distributions of earnings from portfolio companies are evaluated to determine if the distribution is a distribution of earnings or a return of capital. Distributions of earnings are included in dividend income while a return of capital is recorded as a reduction in the cost basis of the investment. Estimates are adjusted as necessary when the relevant tax forms are received from the portfolio company.

We recognize realized gains or losses on investments based on the difference between the net proceeds from the disposition and the cost basis of the investment, without regard to unrealized gains or losses previously recognized. We record current period changes in fair value of investments that are measured at fair value as a component of the net change in unrealized appreciation (depreciation) on investments in the consolidated statements of operations.

Expenses: All investment professionals of our investment advisor and/or its affiliates, when and to the extent engaged in providing investment advisory and management services to us, and the compensation and routine overhead expenses allocable to personnel who provide these services to us, are provided and paid for by our investment advisor and not by us. We bear all other out-of-pocket costs and expenses of our operations and transactions, including, without limitation, those relating to:

organization;

calculating our net asset value (including the cost and expenses of any independent valuation firm);

fees and expenses incurred by our investment advisor under the Investment Advisory Agreement or payable to third parties, including agents, consultants or other advisors, in monitoring financial and legal affairs for us and in monitoring our investments and performing due diligence on our prospective portfolio companies or otherwise relating to, or associated with, evaluating and making investments, including dead deal costs;

interest payable on debt, if any, incurred to finance our investments;

offerings of our common stock and other securities;

investment advisory fees and management fees;

administration fees and expenses, if any, payable under the Administration Agreement (including payments under the Administration Agreement between us and our investment advisor based upon our allocable portion of our investment advisor s overhead in performing its obligations under the Administration Agreement, including rent and the allocable portion of the cost of our officers, including our chief compliance officer, our chief financial officer, and their respective staffs);

transfer agent, dividend agent and custodial fees and expenses;

federal and state registration fees;

all costs of registration and listing our shares on any securities exchange;

U.S. federal, state and local taxes;

S-31

Independent Directors fees and expenses;

costs of preparing and filing reports or other documents required by the SEC or other regulators including printing costs;

costs of any reports, proxy statements or other notices to stockholders, including printing and mailing costs;

our allocable portion of any fidelity bond, directors and officers/errors and omissions liability insurance, and any other insurance premiums;

direct costs and expenses of administration, including printing, mailing, long distance telephone, copying, secretarial and other staff, independent auditors and outside legal costs;

proxy voting expenses; and

all other expenses reasonably incurred by us or our investment advisor in connection with administering our business.

Portfolio Composition, Investment Activity and Yield

During the nine months ended September 30, 2017, we invested \$155.6 million in debt and equity investments, including 10 new portfolio companies. These investments consisted of subordinated notes (\$132.5 million, or 85.2%), senior secured loans (\$12.4 million, or 8.0%), equity securities (\$9.8 million, or 6.3%) and warrant securities (\$0.9 million, or 0.5%). During the nine months ended September 30, 2017 we received proceeds from sales or repayments, including principal, return of capital dividends and net realized gains (losses), of \$132.7 million.

During the nine months ended September 30, 2016, we invested \$104.4 million in debt and equity investments, including six new portfolio companies. These investments consisted of subordinated notes (\$71.4 million, or 68.4%), senior secured loans (\$27.8 million, or 26.6%), equity securities (\$5.0 million, or 4.8%) and warrant securities (\$0.2 million, or 0.2%). During the nine months ended September 30, 2016 we received proceeds from sales or repayments, including principal, return of capital dividends and net realized gains (losses), of \$91.9 million.

As of September 30, 2017, the fair value of our investment portfolio totaled \$560.9 million and consisted of 58 active portfolio companies and five portfolio companies that have sold their underlying operations. As of September 30, 2017, three debt investments bore interest at a variable rate, which represented \$26.1 million of our portfolio on a fair value basis, and the remainder of our debt portfolio was comprised of fixed rate investments. Overall, the portfolio had net unrealized appreciation of \$18.8 million as of September 30, 2017. As of September 30, 2017, our average active portfolio company investment at amortized cost was \$9.3 million, which excluded investments in the five portfolio companies that sold their underlying operations.

As of December 31, 2016, the fair value of our investment portfolio totaled \$524.5 million and consisted of 53 active portfolio companies and four portfolio companies that have sold their underlying operations. As of December 31, 2016, one debt investment bore interest at a variable rate, which represented \$8.2 million of our portfolio on a fair

value basis, and the remainder of our debt portfolio was comprised of fixed rate investments. Overall, the portfolio had net unrealized appreciation of \$24.0 million as of December 31, 2016. As of December 31, 2016, our average active portfolio company investment at amortized cost was \$9.4 million, which excluded investments in the four portfolio companies that sold their underlying operations.

S-32

The weighted average yield on debt investments as of September 30, 2017 and December 31, 2016 was 13.3% and 13.1%, respectively. The weighted average yield of our debt investments is not the same as a return on investment for our stockholders but, rather, relates to a portion of our investment portfolio and is calculated before the payment of all of our fees and expenses. The weighted average yields were computed using the effective interest rates for debt investments at cost as of September 30, 2017 and December 31, 2016, respectively, including the accretion of original issue discount and loan origination fees, but excluding investments on non-accrual status, if any.

The following table shows the portfolio composition by investment type at fair value and cost and as a percentage of total investments (dollars in millions):

		Fair Value				Cost

Portfolio Asset Quality

In addition to various risk management and monitoring tools, our investment advisor uses an internally developed investment rating system to characterize and monitor the credit profile and our expected level of returns on each investment in our portfolio. We use a five-level numeric rating scale. The following is a description of the conditions associated with each investment rating:

Investment Rating 1 is used for investments that involve the least amount of risk in our portfolio. The portfolio company is performing above expectations, the debt investment is

S-34

expected to be paid in the near term and the trends and risk factors are favorable, and may include an expected capital gain.

Investment Rating 2 is used for investments that involve a level of risk similar to the risk at the time of origination. The portfolio company is performing substantially within our expectations and the risk factors are neutral or favorable. Each new portfolio investment enters our portfolio with Investment Rating 2.

Investment Rating 3 is used for investments performing below expectations and indicates the investment s risk has increased somewhat since origination. The portfolio company requires closer monitoring, but we expect a full return of principal and collection of all interest and/or dividends.

Investment Rating 4 is used for investments performing materially below expectations and the risk has increased materially since origination. The portfolio company has the potential for some loss of investment return, but we expect no loss of principal.

Investment Rating 5 is used for investments performing substantially below our expectations and the risks have increased substantially since origination. We expect some loss of principal.

The following table shows the distribution of our investments on the 1 to 5 investment rating scale at fair value and cost as of September 30, 2017 and December 31, 2016 (dollars in millions):

	Fair Value			Cost				
Investment Rating	September 3	30, 2017	December 3	31, 2016	September	30, 2017	December	31, 2016
1	\$ 93.3	16.5%	\$ 91.7	17.5%	\$ 59.0	10.9%	\$ 59.0	11.8%
2	396.3	70.7	371.5	70.9	387.2	71.4	366.7	73.3
3	44.9	8.0	38.9	7.4	50.1	9.2	44.5	8.9
4	22.2	4.0	22.1	4.2	34.5	6.4	28.2	5.6
5	4.2	0.8	0.3		11.3	2.1	2.1	0.4
Total	\$ 560.9	100.0%	\$ 524.5	100.0%	\$ 542.1	100.0%	\$ 500.5	100.0%

Based on our investment rating system, the weighted average rating of our portfolio as of September 30, 2017 and December 31, 2016 was 2.0 and 2.0, respectively, on a fair value basis and 2.2 and 2.1, respectively, on a cost basis.

Non-Accrual

As of September 30, 2017, we had investments in one portfolio company on non-accrual status, which had an aggregate cost and fair value of \$9.3 million and \$4.2 million, respectively. As of December 31, 2016, we had no investments on non-accrual status.

For the three and nine months ended September 30, 2017, we recognized unrealized depreciation on non-accrual investments of \$1.9 million and \$3.3 million, respectively. For the three and nine months ended September 30, 2016, we recognized unrealized depreciation on non-accrual investments of \$2.1 million and \$6.5 million, respectively.

S-35

Discussion and Analysis of Results of Operations

Comparison of three months ended September 30, 2017 and September 30, 2016

Investment Income

For the three months ended September 30, 2017, total investment income was \$18.0 million, an increase of \$3.6 million, or 25.0%, over the \$14.4 million of total investment income for the three months ended September 30, 2016. The increase was attributable to a \$4.2 million increase in interest income resulting from higher average debt investment balances outstanding during the three months ended September 30, 2017 as compared to the same period in 2016, partially offset by a \$(0.5) million decrease in dividend income due to decreased levels of distributions received from equity investments during the three months ended September 30, 2017 as compared to the same period in 2016, and a \$(0.1) million decrease in fee income resulting from fewer prepayments and amendments and related fees during the three months ended September 30, 2017 as compared to the same period in 2016.

Expenses

For the three months ended September 30 2017, total expenses, including income tax provision, were \$8.8 million, an increase of \$1.1 million or 14.3%, from the \$7.7 million of total expenses, including income tax provision, for the three months ended September 30, 2016. Interest and financing expenses for the three months ended September 30, 2017 were \$2.5 million, a decrease of \$(0.1) million, or 3.8%, from the \$2.6 million of interest and financing expenses for the same period in 2016. The base management fee increased \$0.4 million, or 19.0%, to \$2.5 million for the three months ended September 30, 2017 due to higher average total assets during the three months ended September 30, 2017 was \$3.0 million, a \$0.9 million, or 42.9%, increase from the \$2.1 million incentive fee for the three months ended September 30, 2016, which is comprised of an increase in the income incentive fee of \$0.7 million and an increase in the capital gains incentive fee of \$0.2 million during the three months ended September 30, 2017, as compared to the same period in 2016.

The administrative service fee, professional fees and other general and administrative expenses totaled \$0.8 million for both the three months ended September 30, 2017 and 2016.

Net Investment Income

Net investment income for the three months ended September 30, 2017 was \$9.2 million, an increase of \$2.5 million, or 37.3%, compared to net investment income of \$6.7 million during the three months ended September 30, 2016, as a result of the \$3.6 million increase in total investment income, partially offset by a \$1.1 million increase in total expenses, including income tax provision.

S-36

Net Increase in Net Assets Resulting From Operations

For the three months ended September 30, 2017, the total net realized gain on investments was \$6.3 million. Significant realized gains for the three months ended September 30, 2017 are summarized below:

Portfolio Company	Realization Event	Gain (ealized (Loss) in lions)
Lightning Diversion Systems, LLC	Exit of portfolio company	\$	4.0
EBL, LLC (EbLens)	Sale of portfolio company		2.2
Other			0.1
Total		\$	6.3

For the three months ended September 30, 2016, the total net realized (loss) on investments was \$(6.0) million. Significant realized gains and (losses) for the three months ended September 30, 2016 are summarized below:

Portfolio Company	Realization Event	Gair	Realized (Loss) (in llions)
National Truck Protection Co., Inc.	Exit of portfolio company	\$	1.0
Carlson Systems Holdings, Inc.	Distribution related to sale of operations		4.0
Paramount Building Solutions, LLC	Exit of portfolio company		(12.0)
Lightning Diversion Systems, LLC	Distribution		1.0
Total		\$	(6.0)

During the three months ended September 30, 2017, we recorded a net change in unrealized depreciation on investments of \$(3.1) million attributable to (i) the reversal of net unrealized appreciation of \$(5.5) million related to the exit, sale or restructuring of investments, resulting in unrealized depreciation, (ii) net unrealized depreciation of \$(5.1) million on debt investments and (iii) net unrealized appreciation of \$7.5 million on equity investments. During the three months ended September 30, 2016, we recorded a net change in unrealized appreciation on investments of \$7.8 million attributable to (i) the reversal of net unrealized depreciation of \$11.0 million related to the exit or sale of investments, resulting in unrealized appreciation, (ii) net unrealized depreciation of \$(1.7) million on debt investments and (iii) net unrealized depreciation of \$(1.5) million on equity investments.

During the three months ended September 30, 2017, we recorded \$0.3 million of income tax provision from realized gains on investments. During the three months ended September 30, 2016, we did not record any income tax provision from realized gains on investments.

As a result of these events, our net increase in net assets resulting from operations during the three months ended September 30, 2017 was \$12.1 million, an increase of \$3.5 million, or 40.7%, compared to a net increase in net assets

resulting from operations of \$8.6 million during the three months ended September 30, 2016.

S-37

Comparison of nine months ended September 30, 2017 and September 30, 2016

Investment Income

For the nine months ended September 30, 2017, total investment income was \$51.5 million, an increase of \$8.5 million, or 19.8%, over the \$43.0 million of total investment income for the nine months ended September 30, 2016. The increase was attributable to a \$7.8 million increase in interest income resulting from higher average debt investment balances outstanding during the nine months ended September 30, 2017 as compared to the same period in 2016, a \$0.9 million increase in fee income resulting from increased debt origination fees and amendments and related fees during the nine months ended September 30, 2017 as compared to the same period in 2016, and partially offset by a \$(0.2) million decrease in dividend income due to decreased levels of distributions received from equity investments during the nine months ended September 30, 2017 as compared to the same period in 2016.

Expenses

For the nine months ended September 30 2017, total expenses, including income tax provision, were \$25.5 million, an increase of \$1.3 million or 5.4%, over the \$24.2 million of total expenses, including income tax provision, for the nine months ended September 30, 2016. Interest and financing expenses for the nine months ended September 30, 2017 were \$7.5 million, a decrease of \$(0.4) million, or 5.1%, from the \$7.9 million of interest and financing expenses for the same period in 2016. The base management fee increased \$1.2 million, or 20.0%, to \$7.2 million for the nine months ended September 30, 2017 due to higher average total assets during the nine months ended September 30, 2017 was \$7.9 million, a \$0.7 million, or 9.7%, increase from the \$7.2 million incentive fee for the nine months ended September 30, 2016, which is comprised of an increase in the income incentive fee of \$1.6 million and partially offset by a decrease in the capital gains incentive fee of \$(0.9) million during the nine months ended September 30, 2017, as compared to the same period in 2016. The administrative service fee, professional fees and other general and administrative expenses totaled \$2.9 million and \$3.0 million for the nine months ended September 30, 2017 and 2016, respectively.

Net Investment Income

Net investment income for the nine months ended September 30, 2017 was \$26.0 million, an increase of \$7.2 million, or 38.3%, compared to net investment income of \$18.8 million during the nine months ended September 30, 2016, as a result of the \$8.5 million increase in total investment income compared to only a \$1.3 million increase in total expenses, including income tax provision.

S-38

Net Increase in Net Assets Resulting From Operations

For the nine months ended September 30, 2017, the total net realized gain on investments was \$12.4 million. Significant realized gains and (losses) for the nine months ended September 30, 2017 are summarized below:

		Net Realized Gain (Loss) (in	
Portfolio Company	Realization Event	mil	lions)
Worldwide Express Operations, LLC	Sale of portfolio company	\$	6.4
Lightning Diversion Systems, LLC	Exit of portfolio company		4.0
EBL, LLC (EbLens)	Sale of portfolio company		2.2
Anatrace Products, LLC	Sale of portfolio company		0.9
Carlson Systems Holdings, Inc.	Escrow distribution		0.1
Other			0.1
FTH Acquisition Corp. VII	Exit of portfolio company		(1.3)
Total		\$	12.4

For the nine months ended September 30, 2016, the total net realized (loss) on investments was \$(5.7) million. Significant realized gains and (losses) for the nine months ended September 30, 2016 are summarized below:

Portfolio Company	Realization Event	Gair	Realized n (Loss) (in llions)
Carlson Systems Holdings, Inc.	Distribution related to sale of operations	\$	4.0
Lightning Diversion Systems, LLC	Distribution		1.0
National Truck Protection Co., Inc.	Exit of portfolio company		1.0
Safety Products Group, LLC	Distribution related to sale of operations		0.5
Other			0.1
Continental Anesthesia Management, LLC	Exit of portfolio company		(0.3)
Paramount Building Solutions, LLC	Exit of portfolio company		(12.0)
Total		\$	(5.7)

During the nine months ended September 30, 2017, we recorded a net change in unrealized depreciation on investments of \$(5.2) million attributable to (i) the reversal of net unrealized appreciation of \$(10.1) million related to the exit, sale or restructuring of investments, resulting in unrealized depreciation, (ii) net unrealized depreciation of \$(8.8) million on debt investments and (iii) net unrealized appreciation of \$13.7 million on equity investments. During the nine months ended September 30, 2016, we recorded a net change in unrealized appreciation on investments of \$16.1 million attributable to (i) the reversal of net unrealized depreciation on investments of \$12.1 million related to the exit or sale of investments, resulting in unrealized appreciation, (ii) net unrealized depreciation of \$(7.5) million on debt investments and (iii) net unrealized appreciation of \$11.5 million on equity investments.

During the nine months ended September 30, 2017 and 2016, we recorded \$1.7 million and \$0.2 million, respectively, of income tax provision from realized gains on investments.

As a result of these events, our net increase in net assets resulting from operations during the nine months ended September 30, 2017 was \$31.5 million, an increase of \$2.6 million, or 9.0%,

S-39

compared to a net increase in net assets resulting from operations of \$28.9 million during the nine months ended September 30, 2016.

Liquidity and Capital Resources

As of September 30, 2017, we had \$46.9 million in cash and cash equivalents and our net assets totaled \$391.2 million. We believe that our current cash and cash equivalents on hand, our continued access to SBA-guaranteed debentures, our Credit Facility and our anticipated cash flows from operations will provide adequate capital resources with which to operate and finance our investment business and make distributions to our stockholders for at least the next 12 months. We intend to generate additional cash primarily from the future offerings of securities (including the ATM Program) and future borrowings, as well as cash flows from operations, including income earned from investments in our portfolio companies. On both a short-term and long-term basis, our primary use of funds will be investments in portfolio companies and cash distributions to our stockholders. During the nine months ended September 30, 2017, we repaid \$41.7 million of SBA debentures which would have matured during the period March 1, 2018 through March 1, 2019. Our remaining outstanding SBA debentures continue to mature in 2019 and subsequent years through 2027, which will require repayment on or before the respective maturity dates.

Cash Flows

For the nine months ended September 30, 2017, we experienced a net decrease in cash and cash equivalents in the amount of \$10.2 million. During that period, we used \$7.2 million of cash for operating activities, which included the funding of \$155.6 million of investments, which were offset by proceeds received from sales and repayments of investments of \$132.7 million. During the same period, we received net proceeds from secondary offerings of shares of our common stock off of our effective shelf registration statement of \$32.3 million and proceeds from the issuances of SBA debentures of \$34.0 million, which were partially offset by net repayment of SBA debentures of \$41.7 million, cash dividends paid to stockholders of \$26.5 million and the payment of deferred financing costs of \$1.1 million. For the nine months ended September 30, 2016, we experienced a net increase in cash and cash equivalents in the amount of \$10.5 million. During that period, we received \$3.0 million of cash from operating activities, which included proceeds received from sales and repayments of investments of \$91.9 million, which were offset by the funding of \$104.4 million of investments. During the same period, we received net proceeds from a secondary offering of shares of our common stock off of our effective shelf registration statement of \$43.7 million and proceeds from the issuances of SBA debenture of \$0.5 million, which were partially offset by net repayment of borrowings under the Credit Facility of \$15.5 million and cash dividends paid to stockholders of \$20.6 million.

Capital Resources

We anticipate that we will continue to fund our investment activities on a long-term basis through a combination of additional debt and equity capital.

The Funds are licensed SBICs, and have the ability to issue debentures guaranteed by the SBA at favorable interest rates. Under the Small Business Investment Act and the SBA rules applicable to SBICs, an SBIC can have outstanding at any time debentures guaranteed by the SBA in an amount up to twice its regulatory capital. The SBA regulations currently limit the amount that is available to be borrowed by any SBIC and guaranteed by the SBA to 300.0% of an SBIC s regulatory capital or \$150.0 million, whichever is less. For three or more SBICs under common control, the maximum amount of outstanding SBA debentures cannot exceed \$350.0 million. SBA debentures have fixed interest rates that approximate prevailing 10-year Treasury Note rates plus a

S-40

spread and have a maturity of ten years with interest payable semi-annually. The principal amount of the SBA debentures is not required to be paid before maturity but may be pre-paid at any time. As of September 30, 2017, Fund I had \$108.3 million of outstanding SBA debentures and cannot issue additional SBA debentures. As of September 30, 2017, Fund II had \$108.0 million of outstanding SBA debentures. As of September 30, 2017, Fund II had the capacity to issue up to an additional \$42.0 million of SBA debentures. Subject to SBA regulatory requirements and approval, as of January 29, 2018, we may access up to \$91.7 million of additional SBA debentures under the SBIC Debenture Program. For more information on the SBA debentures, please see Note 6 to our consolidated financial statements.

In June 2014, we entered into the Credit Facility to provide additional funding for our investment and operational activities. The Credit Facility, which matures on June 16, 2019, has a commitment of \$50.0 million and an accordion feature that allows for an increase in the total commitments up to \$75.0 million, subject to certain customary conditions. The Credit Facility is secured by substantially all of our assets, excluding the assets of the Funds.

Amounts available to borrow under the Credit Facility are subject to a minimum borrowing/collateral base that applies an advance rate to certain portfolio investments. We are subject to limitations with respect to the investments securing the Credit Facility, including, but not limited to, restrictions on sector concentrations, loan size, transferability, payment frequency and status and collateral interests, as well as restrictions on portfolio company leverage, which may also affect the borrowing base and therefore amounts available to borrow.

Borrowings under the Credit Facility bear interest, subject to our election, on a per annum basis equal to (i) the alternate base rate plus 2.5% or (ii) the applicable LIBOR, which varies depending on the period of the borrowing under the Credit Facility, plus 3.5%. The alternate base rate is equal to the greater of (i) prime rate, (ii) the federal funds rate plus 0.5% or (iii) the three-month LIBOR plus 1.0%. We pay a commitment fee ranging from 0.5% to 1.0% per annum based on the size of the unused portion of the Credit Facility.

We have made customary representations and warranties and are required to comply with various covenants, reporting requirements and other customary requirements for similar credit facilities. These covenants are subject to important limitations and exceptions that are described in the documents governing the Credit Facility. As of September 30, 2017, we were in compliance with all covenants of the Credit Facility and there were no borrowings outstanding under the Credit Facility.

As of September 30, 2017, the weighted average interest rate for all SBA debentures and borrowings outstanding under the Credit Facility was 3.6%.

As a BDC, we are generally required to meet a coverage ratio of total assets to total senior securities, which include borrowings and any preferred stock we may issue in the future, of at least 200.0%. This requirement limits the amount that we may borrow. We have received exemptive relief from the SEC to allow us to exclude any indebtedness guaranteed by the SBA and issued by the Funds from the 200.0% asset coverage requirements, which, in turn, will enable us to fund more investments with debt capital.

As a BDC, we are generally not permitted to issue and sell our common stock at a price below net asset value per share. We may, however, sell our common stock, or warrants, options or rights to acquire our common stock, at a price below the then-current net asset value per share of our common stock if our board of directors, including Independent Directors, determines that such sale is in the best interests of us and our stockholders, and if our stockholders approve such sale.

S-41

On June 15, 2017, our stockholders voted to allow us to sell or otherwise issue common stock at a price below net asset value per share for a period of one year ending on the earlier of June 15, 2018 or the date of our 2018 Annual Meeting of Stockholders. We expect to present our stockholders a similar proposal at our 2018 Annual Meeting of Stockholders. Our stockholders specified that the cumulative number of shares sold in each offering during the one-year period ending on the earlier of June 15, 2018 or the date of our 2018 Annual Meeting of Stockholders may not exceed 25.0% of our outstanding common stock immediately prior to each such sale.

Stock repurchase plan

We have an open market stock repurchase program (the Program) under which we may acquire up to \$5.0 million of our outstanding common stock. Under the Program, we may, but are not obligated to, repurchase outstanding common stock in the open market from time to time provided that we comply with the prohibitions under our insider trading policies and the requirements of Rule 10b-18 of the Exchange Act, including certain price, market value and timing constraints. The timing, manner, price and amount of any share repurchases will be determined by our management, in its discretion, based upon the evaluation of economic and market conditions, stock price, capital availability, applicable legal and regulatory requirements and other corporate considerations. On October 30, 2017, our board of directors extended the Program through December 31, 2018, or until the approved dollar amount has been used to repurchase shares. The Program does not require us to repurchase any specific number of shares and the Company cannot assure that any shares will be repurchased under the Program. The Program may be suspended, extended, modified or discontinued at any time. We did not make any repurchases of common stock during the nine months ended September 30, 2017 or 2016.

Critical Accounting Policies and Use of Estimates

The preparation of financial statements in accordance with GAAP requires management to make certain estimates and assumptions affecting amounts reported in the financial statements. We have identified investment valuation and revenue recognition as our most critical accounting estimates. We continuously evaluate our estimates, including those related to the matters described below. These estimates are based on the information that is currently available to us and on various other assumptions that we believe to be reasonable under the circumstances. Actual results could differ materially from those estimates under different assumptions or conditions. A discussion of our critical accounting policies follows.

Valuation of Portfolio Investments

As a BDC, we report our assets and liabilities at fair value at all times consistent with GAAP and the 1940 Act. Accordingly, we are required to periodically determine the fair value of all of our portfolio investments.

Our investments generally consist of illiquid securities including debt and equity investments in lower middle-market companies. Investments for which market quotations are readily available are valued at such market quotations. Because we expect that there will not be a readily available market for substantially all of the investments in our portfolio, we value substantially all of our portfolio investments at fair value as determined in good faith by our board of directors using a documented valuation policy and consistently applied valuation process. Due to the inherent uncertainty of determining the fair value of investments that do not have a readily available market value, the fair value of our investments may differ significantly from the values that would have been used had a readily available market value existed for such investments, and the difference could be material.

S-42

With respect to investments for which market quotations are not readily available, our board of directors undertakes a multi-step valuation process each quarter, as described below:

our quarterly valuation process begins with each portfolio company or investment being initially evaluated and rated by the investment professionals of our investment advisor responsible for the portfolio investment;

preliminary valuation conclusions are then documented and discussed with the investment committee of our investment advisor;

our board of directors engages one or more independent valuation firm(s) to conduct independent appraisals of a selection of our portfolio investments for which market quotations are not readily available. Each portfolio company investment is generally appraised by the valuation firm(s) at least once every calendar year and each new portfolio company investment is appraised at least once in the twelve-month period following the initial investment. In certain instances, we may determine that it is not cost-effective, and as a result it is not in our stockholders best interest, to request the independent appraisal of certain portfolio company investments. Such instances include, but are not limited to, situations where we determine that the fair value of the portfolio company investment is relatively insignificant to the fair value of the total portfolio. Our board of directors consulted with the independent valuation firm(s) in arriving at our determination of fair value for 14 and 13 of our portfolio company investments representing 28.4% and 30.5% of the total portfolio investments at fair value (exclusive of new portfolio company investments made during the three months ended September 30, 2017 and December 31, 2016, respectively) as of September 30, 2017 and December 31, 2016, respectively;

the audit committee of our board of directors reviews the preliminary valuations of our investment advisor and of the independent valuation firm(s) and responds and supplements the valuation recommendations to reflect any comments; and

our board of directors discusses the valuations and determines the fair value of each investment in our portfolio in good faith, based on the input of our investment advisor, the independent valuation firm(s) and the audit committee.

In making the good faith determination of the value of portfolio investments, we start with the cost basis of the security. The transaction price is typically the best estimate of fair value at inception. When evidence supports a subsequent change to the carrying value from the original transaction price, adjustments are made to reflect the expected exit values.

Consistent with the policies and methodologies adopted by our board of directors, we perform detailed valuations of our debt and equity investments, including an analysis on the Company s unfunded loan commitments, using both the market and income approaches as appropriate. Under the market approach, we typically use the enterprise value methodology to determine the fair value of an investment. There is no one methodology to estimate enterprise value and, in fact, for any one portfolio company, enterprise value is generally best expressed as a range of values, from which we derive a single estimate of enterprise value. Under the income approach, we typically prepare and analyze discounted cash flow models to estimate the present value of future cash flows of either an individual debt investment

or of the underlying portfolio company itself.

We evaluate investments in portfolio companies using the most recent portfolio company financial statements and forecasts. We also consult with the portfolio company s senior management to obtain further updates on the portfolio company s performance, including information such as industry trends, new product development and other operational issues.

S-43

For our debt investments, including senior secured loans and subordinated notes, the primary valuation technique used to estimate the fair value is the discounted cash flow method. However, if there is deterioration in credit quality or a debt investment is in workout status, we may consider other methods in determining the fair value, including the value attributable to the debt investment from the enterprise value of the portfolio company or the proceeds that would be received in a liquidation analysis. Our discounted cash flow models estimate a range of fair values by applying an appropriate discount rate to the future cash flow streams of our debt investments, based on future interest and principal payments as set forth in the associated loan agreements. We prepare a weighted average cost of capital for use in the discounted cash flow model for each investment, based on factors including, but not limited to: current pricing and credit metrics for similar proposed or executed investment transactions of private companies; the portfolio company s historical financial results and outlook; and the portfolio company s current leverage and credit quality as compared to leverage and credit quality as of the date the investment was made. We may also consider the following factors when determining the fair value of debt investments: the portfolio company s ability to make future scheduled payments; prepayment penalties and other fees; estimated remaining life; the nature and realizable value of any collateral securing such debt investment; and changes in the interest rate environment and the credit markets that generally may affect the price at which similar investments may be made. We estimate the remaining life of our debt investments to generally be the legal maturity date of the instrument, as we generally intend to hold loans to maturity. However, if we have information available to us that the loan is expected to be repaid in the near term, we would use an estimated remaining life based on the expected repayment date.

For our equity investments, including equity securities and warrants, we generally use a market approach, including valuation methodologies consistent with industry practice, to estimate the enterprise value of portfolio companies. Typically, the enterprise value of a private company is based on multiples of EBITDA, net income, revenues, or in limited cases, book value. In estimating the enterprise value of a portfolio company, we analyze various factors consistent with industry practice, including but not limited to original transaction multiples, the portfolio company s historical and projected financial results, applicable market trading and transaction comparables, applicable market yields and leverage levels, the nature and realizable value of any collateral, the markets in which the portfolio company does business, and comparisons of financial ratios of peer companies that are public. Where applicable, we consider our ability to influence the capital structure of the portfolio company, as well as the timing of a potential exit.

We may also utilize an income approach when estimating the fair value of our equity securities, either as a primary methodology if consistent with industry practice or if the market approach is otherwise not applicable, or as a supporting methodology to corroborate the fair value ranges determined by the market approach. We typically prepare and analyze discounted cash flow models based on projections of the future free cash flows (or earnings) of the portfolio company. We consider various factors, including but not limited to the portfolio company s projected financial results, applicable market trading and transaction comparables, applicable market yields and leverage levels, the markets in which the portfolio company does business, and comparisons of financial ratios of peer companies that are public.

The fair value of our royalty rights are calculated based on projected future cash flows and the specific provisions contained in the pertinent royalty agreement. The determination of the fair value of such royalty rights is not a significant component of our valuation process.

Determination of fair value involves subjective judgments and estimates. Accordingly, the notes to our consolidated financial statements express the uncertainties with respect to the possible effect of such valuations, and any changes in such valuations, on the consolidated financial statements.

S-44

Revenue Recognition

Investments and related investment income. Realized gains or losses on investments are recorded upon the sale or disposition of a portfolio investment and are calculated as the difference between the net proceeds from the sale or disposition and the cost basis of the investment, without regard to unrealized appreciation or depreciation previously recognized. Net change in unrealized appreciation or depreciation on the consolidated statements of operations includes changes in the fair value of investments from the prior period, as determined by our board of directors through the application of our valuation policy, as well as reclassifications of any prior period unrealized appreciation or depreciation on exited investments to realized gains or losses on investments.

Interest and dividend income. Interest and dividend income are recorded on the accrual basis to the extent that we expect to collect such amounts. Interest is accrued daily based on the outstanding principal amount and the contractual terms of the debt. Dividend income is recorded as dividends are declared or at the point an obligation exists for the portfolio company to make a distribution, and is generally recognized when received. Distributions from portfolio companies are evaluated to determine if the distribution is a distribution of earnings or a return of capital. Distributions of earnings are included in dividend income while a return of capital is recorded as a reduction in the cost basis of the investment. Estimates are adjusted as necessary when the relevant tax forms are received from the portfolio company.

Payment-in-kind interest. Certain of our investments contain a PIK income provision. The PIK income, computed at the contractual rate specified in the applicable investment agreement, is added to the principal balance of the investment, rather than being paid in cash, and recorded as interest or dividend income, as applicable, on the consolidated statements of operations. Generally, PIK can be paid-in-kind or all in cash. We stop accruing PIK income when there is reasonable doubt that PIK income will be collected. PIK income is included in our taxable income and, therefore, affects the amount we are required to pay to our stockholders in the form of dividends in order to maintain our tax treatment as a RIC and to avoid paying corporate federal income tax, even though we have not yet collected the cash.

Non-accrual. When there is reasonable doubt that principal, interest or dividends will be collected, loans or preferred equity investments are placed on non-accrual status and we will generally cease recognizing interest or dividend income. Interest and dividend payments received on non-accrual investments may be recognized as interest or dividend income or applied to the investment principal balance based on management s judgment. Non-accrual investments are restored to accrual status when past due principal, interest or dividends are paid and, in management s judgment, are likely to remain current.

Warrants. In connection with our debt investments, we will sometimes receive warrants or other equity-related securities (Warrants). We determine the cost basis of Warrants based upon their respective fair values on the date of receipt in proportion to the total fair value of the debt and Warrants received. Any resulting difference between the face amount of the debt and its recorded fair value resulting from the assignment of value to the Warrants is treated as original issue discount and accreted into interest income using the effective interest method over the term of the debt investment.

Fee income. All transaction fees earned in connection with our investments are recognized as fee income. Such fees typically include fees for services, including structuring and advisory services, provided to portfolio companies. We recognize income from fees for providing such structuring and advisory services when the services are rendered or the transactions are completed. Upon the prepayment of a loan or debt security, any prepayment penalties are recorded as fee income when earned.

S-45

We also typically receive loan origination or closing fees in connection with investments. Such loan origination and closing fees are capitalized as unearned income and offset against investment cost basis on our consolidated statements of assets and liabilities and accreted into interest income over the term of the investment.

Recently Issued Accounting Standards

In May 2014, the Financial Accounting Standards Board issued Accounting Standards Update (ASU) 2014-09, *Revenue from Contracts with Customers (Topic 606)*, which supersedes the revenue recognition requirements in *Revenue Recognition (Topic 605)*. Under the new guidance, an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. The guidance is effective for annual and interim reporting periods beginning after December 15, 2017. We completed our evaluation of the impact of this ASU and concluded that the majority of our income streams are specifically excluded from the scope of the ASU as they relate to financial instruments that are within the scope of other topics, and in general the impact of the ASU is not material to our consolidated financial position or disclosures.

In October 2016, the SEC adopted new rules and amended rules to Regulation S-X (collectively, the Reporting Rules) intended to modernize the reporting and disclosures of information by BDCs. The adopted amendments to Regulation S-X include an update to the disclosures for investments in and advances to affiliates, presentation changes to the statement of operations and schedule of investments, and the requirement to include a standardized schedule containing detailed information about derivative investments (among other changes). The amendments to Regulation S-X are effective for reporting periods ending after August 1, 2017. We adopted the Reporting Rules effective August 1, 2017. The amendments do not have a material effect on our consolidated financial position or disclosures.

S-46

Off-Balance Sheet Arrangements

We may be a party to financial instruments with off-balance sheet risk in the normal course of business to meet the financial needs of our portfolio companies. We had off-balance sheet arrangements consisting of outstanding commitments to fund various undrawn revolving loans and other credit facilities totaling \$4.6 million and \$6.6 million as of September 30, 2017 and December 31, 2016, respectively. Such outstanding commitments are summarized in the following table:

	September 30, 2017		December 31, 2016	
	Total	Unfunded	Total	Unfunded
Portfolio Company Investment	Commitment	Commitment	Commitment	Commitment
FAR Research Inc. Revolving Loan	\$	\$	\$ 1.8	\$ 1.6
Inflexxion, Inc. Revolving Loan	0.5	0.2	0.5	0.4
inthinc Technology Solutions, Inc. Subordinated Note			5.0	1.0
Lightning Diversion Systems, LLC Revolving Loan			0.2	0.2
Oaktree Medical Centre, P.C. Revolving Loan	2.5		2.5	
Rhino Assembly Company, LLC Delayed Draw				
Commitment	1.5	1.5		
Safety Products Group, LLC Common Equity	2.9	2.9	2.9	2.9
SES Investors, LLC Revolving Loan			1.5	0.5
· ·				
Total	\$7.4	\$ 4.6	\$ 14.4	\$ 6.6

Additional detail for each of the commitments above is provided in the Company s consolidated schedules of investments.

Related Party Transactions

We have entered into a number of business relationships with affiliated or related parties, including the following:

We have entered into the Investment Advisory Agreement with Fidus Investment Advisors, LLC to manage our day-to-day operating and investing activities. We pay our investment advisor a fee for its services under the Investment Advisory Agreement consisting of two components a base management fee and an incentive fee. See Note 5 to our consolidated financial statements.

Edward H. Ross, our Chairman and Chief Executive Officer, and Thomas C. Lauer, our President, are managers of Fidus Investment Advisors, LLC. In May 2015, Fidus Investment Advisors, LLC entered into a combination with Fidus Partners, LLC (the Combination), by which members of Fidus Investment Advisors LLC and Fidus Partners, LLC (Partners) contributed all of their respective membership interest in Fidus Investment Advisors LLC and Partners to a newly formed limited liability company, Fidus Group Holdings, LLC (Holdings). As a result, Fidus Investment Advisors LLC is a wholly owned subsidiary of Holdings, which is a newly formed limited liability company organized under the laws of Delaware.

S-47

We entered into the Administration Agreement with Fidus Investment Advisors, LLC to provide us with the office facilities and administrative services necessary to conduct day-to-day operations. See Note 5 to our consolidated financial statements.

We entered into a license agreement with Fidus Partners, LLC, pursuant to which Fidus Partners, LLC has granted us a non-exclusive, royalty-free license to use the name Fidus.

In connection with the IPO and our election to be regulated as a BDC, we applied for and received exemptive relief from the SEC on March 27, 2012 to allow us to take certain actions that would otherwise be prohibited by the 1940 Act, as applicable to BDCs. The relief permits FIC and Fund I, each of which has elected to be treated as a BDC, to operate effectively as one company, specifically allowing them to: (1) engage in certain transactions with each other; (2) invest in securities in which the other is or proposes to be an investor; (3) file consolidated reports with the SEC; and (4) be subject to modified consolidated asset coverage requirements for senior securities issued by a BDC and its SBIC subsidiary. Fund II has not elected to be treated as a BDC and is not party to this exemptive relief. The fourth exemption described above allows us to exclude any indebtedness guaranteed by the SBA and issued by Fund I from the 200.0% asset coverage requirements applicable to us. Effective September 30, 2014, any SBA debentures issued by Fund II are not considered senior securities for purposes of the 200.0% asset coverage requirements.

While we may co-invest with investment entities managed by our investment advisor or its affiliates, to the extent permitted by the 1940 Act and the rules and regulations thereunder, the 1940 Act imposes significant limits on co-investment. The SEC staff has granted us relief sought in an exemptive application that expands our ability to co-invest in portfolio companies with other funds managed by our investment advisor or its affiliates (Affiliated Funds) in a manner consistent with our investment objective, positions, policies, strategies and restrictions as well as regulatory requirements and other pertinent factors, subject to compliance with certain conditions (the Order). Pursuant to the Order, we are permitted to co-invest with our affiliates if a required majority (as defined in Section 57(o) of the 1940 Act) or our independent directors make certain conclusions in connection with a co-investment transaction, including that (1) the terms of the transactions, including the consideration to be paid, are reasonable and fair to us and our stockholders and do not involve overreaching by us or our stockholders on the part of any person concerned, and (2) the transaction is consistent with the interests of our stockholders and is consistent with our investment objective and strategies.

In addition, we, Fund I and our investment advisor have each adopted a joint code of ethics pursuant to Rule 17j-1 under the 1940 Act that governs the conduct of our and our investment advisor s officers, directors and employees. Additionally, our investment advisor has adopted a code of ethics pursuant to rule 240A-1 under the 1940 Act and in accordance with Rule 17j-1(c). We, and Fund I, have also adopted a code of business conduct that is applicable to all officers, directors and employees of Fidus and our investment advisor. Our officers and directors also remain subject to the duties imposed by both the 1940 Act and the Maryland General Corporation Law.

Recent Developments

On October 17, 2017, we exited our debt and equity investments in Brook & Whittle Limited. We received payment in full on our subordinated notes. We sold our equity investments for a realized gain of approximately \$1.0 million.

On October 30, 2017, our board of directors declared a regular quarterly dividend of \$0.39 per share which was paid on December 27, 2017 to stockholders of record as of December 20, 2017. In

S-48

addition, on October 30, 2017, our board of directors declared a special dividend of \$0.04 per share which was paid on December 27, 2017 to stockholders of record as of December 20, 2017.

Quantitative and Qualitative Disclosures About Market Risk.

We are subject to financial market risks, including changes in interest rates. Changes in interest rates affect both our cost of funding and the valuation of our investment portfolio. Our risk management systems and procedures are designed to identify and analyze our risk, to set appropriate policies and limits and to continually monitor these risks and limits by means of reliable administrative and information systems and other policies and programs. In the future, our investment income may also be affected by changes in various interest rates, including LIBOR and prime rates, to the extent of any debt investments that include floating interest rates. As of September 30, 2017 and December 31, 2016, three and one debt investments, respectively, bore interest at a variable rate, which represented \$26.1 million and \$8.2 million of our portfolio on a fair value basis, respectively, and the remainder of our debt portfolio was comprised entirely of fixed rate investments. Assuming that the consolidated statements of assets and liabilities as of September 30, 2017 and December 31, 2016 were to remain constant, a hypothetical 100 basis point change in interest rates would not have a material effect on our level of interest income from debt investments. Our pooled SBA debentures bear interest at fixed rates. Our Credit Facility bears interest, subject to our election, on a per annum basis equal to (i) the alternate base rate plus 2.5% or (ii) the applicable LIBOR, which varies depending on the period of the borrowing under the Credit Facility, plus 3.5%. The alternate base rate is equal to the greater of (i) prime rate, (ii) the federal funds rate plus 0.5% or (iii) the three-month LIBOR plus 1.0%.

Because we currently borrow, and plan to borrow in the future, money to make investments, our net investment income is dependent upon the difference between the rate at which we borrow funds and the rate at which we invest the funds borrowed. Accordingly, there can be no assurance that a significant change in market interest rates will not have a material adverse effect on our net investment income. In periods of rising interest rates, our cost of funds would increase, which could reduce our net investment income if there is not a corresponding increase in interest income generated by our investment portfolio.

S-49

DESCRIPTION OF THE NOTES

The Notes will be issued under a base indenture and a first supplemental indenture thereto, to be entered into between us and U.S. Bank National Association, as trustee. We refer to the indenture and the first supplemental indenture collectively as the indenture and to U.S. Bank National Association as the trustee. The Notes are governed by the indenture, as required by federal law for all bonds and notes of companies that are publicly offered. An indenture is a contract between us and the financial institution acting as trustee on your behalf, and is subject to and governed by the Trust Indenture Act of 1939, as amended. The trustee has two main roles. First, the trustee can enforce your rights against us if we default. There are some limitations on the extent to which the trustee acts on your behalf, described in the second paragraph under Events of Default Remedies if an Event of Default Occurs below. Second, the trustee performs certain administrative duties for us with respect to the Notes.

This section includes a summary description of the material terms of the Notes and the indenture. Because this section is a summary, however, it does not describe every aspect of the Notes and the indenture. We urge you to read the indenture because it, and not this description, defines your rights as a holder of the Notes. The base indenture has been attached as an exhibit to the registration statement of which this prospectus supplement is a part and the first supplemental indenture will be attached as an exhibit to a post-effective amendment to the registration statement of which this prospectus supplement is a part, in each case, as filed with the SEC. See Available Information in this prospectus supplement for information on how to obtain a copy of the indenture.

General

The Notes will mature on \$\, 2023\$. The principal payable at maturity will be 100% of the aggregate principal amount. The interest rate of the Notes is \$\%\$ per year and will be paid every February 1, May 1, August 1 and November 1, beginning on May 1, 2018, and the regular record dates for interest payments will be every January 15, April 15, July 15 and October 15, commencing April 15, 2018. If an interest payment date falls on a non-business day, the applicable interest payment will be made on the next business day and no additional interest will accrue as a result of such delayed payment. The initial interest period will be the period from and including \$\, 2018\$, to, but excluding, the initial interest payment date, and the subsequent interest periods will be the periods from and including an interest payment date to, but excluding, the next interest payment date or the stated maturity date, as the case may be.

We will issue the Notes in denominations of \$25 and integral multiples of \$25 in excess thereof. The Notes will not be subject to any sinking fund and holders of the Notes will not have the option to have the Notes repaid prior to the stated maturity date.

The indenture does not limit the amount of debt (including secured debt) that may be issued by us or our subsidiaries under the indenture or otherwise, but does contain a covenant regarding our asset coverage that would have to be satisfied at the time of our incurrence of additional indebtedness. See Covenants and Events of Default. Other than as described under Covenants below, the indenture does not restrict us from paying dividends or issuing or repurchasing our other securities. Other than restrictions described under Merger or Consolidation below, the indenture does not contain any covenants or other provisions designed to afford holders of the Notes protection in the event of a highly leveraged transaction involving us or if our credit rating declines as the result of a takeover, recapitalization, highly leveraged transaction or similar restructuring involving us that could adversely affect your investment in the Notes.

We have the ability to issue indenture securities with terms different from the Notes and, without the consent of the holders of the Notes, to reopen the Notes and issue additional Notes.

Covenants

In addition to any other covenants described in this prospectus supplement and the accompanying prospectus, as well as standard covenants relating to payment of principal and interest, maintaining an office where payments may be made or securities can be surrendered for payment, payment of taxes by the Company and related matters, the following covenants will apply to the Notes:

We agree that for the period of time during which the Notes are outstanding, we will not violate Section 18(a)(1)(A) as modified by Section 61(a)(1) of the 1940 Act or any successor provisions, whether or not we continue to be subject to such provisions of the 1940 Act, but giving effect, in either case, to the exemptive relief granted to us by the SEC with respect to the consolidation of debt of the Funds. Currently, these provisions generally prohibit us from incurring additional borrowings, including through the issuance of additional debt securities, unless our asset coverage, as defined in the 1940 Act, equals at least 200% after such borrowings. See Supplementary Risk Factors Risks Related to the Notes Pending legislation may allow us to incur additional leverage in this prospectus supplement.

We agree that, for the period of time during which the Notes are outstanding, we will not violate Section 18(a)(1)(B) as modified by (i) Section 61(a)(1) of the 1940 Act or any successor provisions and after giving effect to any exemptive relief granted to us by the SEC and (ii) the two other exceptions set forth below. These statutory provisions of the 1940 Act are not currently applicable to us and will not be applicable to us as a result of this offering. However, if Section 18(a)(1)(B) as modified by Section 61(a)(1) of the 1940 Act were currently applicable to us in connection with this offering, these provisions would generally prohibit us from declaring any cash dividend or distribution upon any class of our capital stock, or purchasing any such capital stock if our asset coverage were below 200% at the time of the declaration of the dividend or distribution or the purchase and after deducting the amount of such dividend, distribution, or purchase. Under the covenant, we will be permitted to declare a cash dividend or distribution notwithstanding the prohibition contained in Section 18(a)(1)(B) as modified by Section 61(a)(1) of the 1940 Act or any successor provisions, but only up to such amount as is necessary for us to maintain our status as a RIC under Subchapter M of the Code. Furthermore, the covenant will permit us to continue paying dividends or distributions and will not be triggered unless and until such time as our asset coverage (as defined in the 1940 Act, except to the extent modified by this covenant) has not been in compliance with the minimum asset coverage required by Section 18(a)(1)(B) as modified by Section 61(a)(1) of the 1940 Act or any successor provisions (after giving effect to any exemptive relief granted to us by the SEC) for more than six consecutive months. For the purposes of determining asset coverage as used above, any and all indebtedness of the Company, including any outstanding borrowings under the Credit Facility and any successor or additional credit facility, shall be deemed a senior security of us. See Supplementary Risk Factors Risks Related to the Notes Pending legislation may allow us to incur additional leverage in this prospectus supplement.

If, at any time, we are not subject to the reporting requirements of Sections 13 or 15(d) of the Exchange Act to file any periodic reports with the SEC, we agree to furnish to holders of the Notes and the trustee, for the period of time during which the Notes are outstanding, our audited annual consolidated financial statements,

within 90 days of our fiscal year end, and unaudited interim consolidated financial statements, within 45 days of our fiscal quarter end (other than our fourth fiscal quarter). All such financial statements will be prepared, in all material respects, in accordance with applicable U.S. GAAP.

S-51

Optional Redemption

The Notes may be redeemed in whole or in part at any time or from time to time at our option on or after upon not less than 30 days nor more than 60 days written notice by mail prior to the date fixed for redemption thereof, at a redemption price of 100% of the outstanding principal amount of the Notes to be redeemed plus accrued and unpaid interest payments otherwise payable thereon for the then-current quarterly interest period accrued to the date fixed for redemption.

You may be prevented from exchanging or transferring the Notes when they are subject to redemption. In case any Notes are to be redeemed in part only, the redemption notice will provide that, upon surrender of such Note, you will receive, without a charge, a new Note or Notes of authorized denominations representing the principal amount of your remaining unredeemed Notes. Any exercise of our option to redeem the Notes will be done in compliance with the 1940 Act, to the extent applicable.

If we redeem only some of the Notes, the trustee or, with respect to global securities, The Depository Trust Company, New York, New York, will determine the method for selection of the particular Notes to be redeemed, in accordance with the indenture and the 1940 Act, to the extent applicable, and in accordance with the rules of any national securities exchange or quotation system on which the Notes are listed. Unless we default in payment of the redemption price, on and after the date of redemption, interest will cease to accrue on the Notes called for redemption.

Global Securities

Each Note will be issued in book-entry form and represented by a global security that we deposit with and register in the name of DTC or its nominee. A global security may not be transferred to or registered in the name of anyone other than the depositary or its nominee, unless special termination situations arise. As a result of these arrangements, the depositary, or its nominee, will be the sole registered owner and holder of all the Notes represented by a global security, and investors will be permitted to own only beneficial interests in a global security. For more information about these arrangements, see Book-Entry Procedures below.

Termination of a Global Security

If a global security is terminated for any reason, interests in it will be exchanged for certificates in non-book-entry form (certificated securities). After that exchange, the choice of whether to hold the certificated Notes directly or in street name will be up to the investor. Investors must consult their own banks or brokers to find out how to have their interests in a global security transferred on termination to their own names, so that they will be holders.

Conversion and Exchange

The Notes are not convertible into or exchangeable for other securities.

Payment and Paying Agents

We will pay interest to the person listed in the trustee s records as the owner of the Notes at the close of business on a particular day in advance of each due date for interest, even if that person no longer owns the Note on the interest due date. That day, usually about two weeks in advance of the interest due date, is called the record date. Because we will pay all the interest for an interest period to the holders on the record date, holders buying and selling the Notes must

S-52

work out between themselves the appropriate purchase price. The most common manner is to adjust the sales price of the Notes to prorate interest fairly between buyer and seller based on their respective ownership periods within the particular interest period. This prorated interest amount is called accrued interest.

Payments on Global Securities

We will make payments on the Notes so long as they are represented by a global security in accordance with the applicable policies of the depositary as in effect from time to time. Under those policies, we will make payments directly to the depositary, or its nominee, and not to any indirect holders who own beneficial interests in the global security. An indirect holder s right to those payments will be governed by the rules and practices of the depositary and its participants, as described under Book-Entry Procedures below.

Payments on Certificated Securities

In the event the Notes become represented by certificated securities, we will make payments on the Notes as follows. We will pay interest that is due on an interest payment date to the holder of the Notes as shown on the trustee s records as of the close of business on the regular record date. We will make all payments of principal and premium, if any, by check at the office of the applicable trustee in New York, New York and/or at other offices that may be specified in the indenture or a notice to holders against surrender of the Note.

Alternatively, at our option, we may pay any cash interest that becomes due on the Notes by mailing a check to the holder at his, her or its address shown on the trustee s records as of the close of business on the regular record date or by transfer to an account at a bank in the United States, in either case, on the due date.

Payment When Offices Are Closed

If any payment is due on the Notes on a day that is not a business day, we will make the payment on the next day that is a business day. Payments made on the next business day in this situation will be treated under the indenture as if they were made on the original due date. Such payment will not result in a default under the Notes or the indenture, and no interest will accrue on the payment amount from the original due date to the next day that is a business day.

Book-entry and other indirect holders should consult their banks or brokers for information on how they will receive payments on the Notes.

Events of Default

You will have rights if an Event of Default occurs in respect of the Notes and the Event of Default is not cured, as described later in this subsection.

The term Event of Default in respect of the Notes means any of the following:

We do not pay the principal of, or any premium on, any Note when due and payable at maturity;

We do not pay interest on any Note when due and payable, and such default is not cured within 30 days of its due date:

S-53

We remain in breach of any other covenant in respect of the Notes for 60 days after we receive a written notice of default stating we are in breach (the notice must be sent by either the trustee or holders of at least 25% of the principal amount of the outstanding Notes);

We file for bankruptcy or certain other events of bankruptcy, insolvency or reorganization occur and remain undischarged or unstayed for a period of 60 days; or

On the last business day of each of twenty-four consecutive calendar months, the Notes have an asset coverage of less than 100%, giving effect to the exemptive relief granted to us by the SEC with respect to the consolidation of debt of the Funds.

An Event of Default for the Notes may, but does not necessarily, constitute an Event of Default for any other series of debt securities issued under the same or any other indenture. The trustee may withhold notice to the holders of the Notes of any default, except in the payment of principal or interest, if it in good faith considers the withholding of notice to be in the best interests of the holders.

Remedies if an Event of Default Occurs

If an Event of Default has occurred and is continuing, the trustee or the holders of not less than 25% in principal amount of the Notes may declare the entire principal amount of all the Notes to be due and immediately payable, but this does not entitle any holder of Notes to any redemption payout or redemption premium. This is called a declaration of acceleration of maturity. In certain circumstances, a declaration of acceleration of maturity may be canceled by the holders of a majority in principal amount of the Notes if (1) we have deposited with the trustee all amounts due and owing with respect to the Notes (other than principal or any payment that has become due solely by reason of such acceleration) and certain other amounts, and (2) any other Events of Default have been cured or waived.

Except in cases of default, where the trustee has some special duties, the trustee is not required to take any action under the indenture at the request of any holders unless the holders offer the trustee protection from expenses and liability reasonably satisfactory to it (called an indemnity). If indemnity reasonably satisfactory to the trustee is provided, the holders of a majority in principal amount of the Notes may direct the time, method and place of conducting any lawsuit or other formal legal action seeking any remedy available to the trustee. The trustee may refuse to follow those directions in certain circumstances. No delay or omission in exercising any right or remedy will be treated as a waiver of that right, remedy or Event of Default.

Before you are allowed to bypass the trustee and bring your own lawsuit or other formal legal action or take other steps to enforce your rights or protect your interests relating to the Notes, the following must occur:

You must give the trustee written notice that an Event of Default has occurred and remains uncured;

The holders of at least 25% in principal amount of all the Notes must make a written request that the trustee take action because of the default and must offer the trustee indemnity, security, or both reasonably satisfactory to it against the cost and other liabilities of taking that action;

The trustee must not have taken action for 60 days after receipt of the above notice and offer of indemnity and/or security; and

S-54

The holders of a majority in principal amount of the Notes must not have given the trustee a direction inconsistent with the above notice during that 60-day period.

However, you are entitled at any time to bring a lawsuit for the payment of money due on your Notes on or after the due date.

Book-entry and other indirect holders should consult their banks or brokers for information on how to give notice or direction to or make a request of the trustee and how to declare or cancel an acceleration of maturity.

Each year, we will furnish to the trustee a written statement of certain of our officers certifying that to their knowledge we are in compliance with the indenture and the Notes, or else specifying any default.

Waiver of Default

The holders of a majority in principal amount of the Notes may waive any past defaults other than a default:

in the payment of principal (or premium, if any) or interest; or

in respect of a covenant that cannot be modified or amended without the consent of each holder of the Notes. **Merger or Consolidation**

Under the terms of the indenture, we are generally permitted to consolidate or merge with another entity. We are also permitted to sell all or substantially all of our assets to another entity. However, we may not take any of these actions unless all the following conditions are met:

where we merge out of existence or convey or transfer our assets substantially as an entirety, the resulting entity must agree to be legally responsible for our obligations under the Notes;

the merger or sale of assets must not cause a default on the Notes and we must not already be in default (unless the merger or sale would cure the default). For purposes of this no-default test, a default would include an Event of Default that has occurred and has not been cured, as described under Events of Default above. A default for this purpose would also include any event that would be an Event of Default if the requirements for giving us a notice of default or our default having to exist for a specific period of time were disregarded; and

we must deliver certain certificates and documents to the trustee.

Modification or Waiver

There are three types of changes we can make to the indenture and the Notes issued thereunder.

Changes Requiring Your Approval

First, there are changes that we cannot make to your Notes without your specific approval. The following is a list of those types of changes:

change the stated maturity of the principal of (or premium, if any, on) or any installment of principal of or interest on the Notes;

S-55

reduce any amounts due on the Notes or reduce the rate of interest on the Notes;

reduce the amount of principal payable upon acceleration of the maturity of a Note following a default;

change the place or currency of payment on a Note;

impair your right to sue for payment;

reduce the percentage of holders of Notes whose consent is needed to modify or amend the indenture; and

reduce the percentage of holders of Notes whose consent is needed to waive compliance with certain provisions of the indenture or to waive certain defaults or reduce the percentage of holders of Notes required to satisfy quorum or voting requirements at a meeting of holders of the Notes.

Changes Not Requiring Approval

The second type of change does not require any vote by the holders of the Notes. This type is limited to clarifications and certain other changes that would not adversely affect holders of the Notes in any material respect.

Changes Requiring Majority Approval

Any other change to the indenture and the Notes would require the following approval:

if the change affects only the Notes, it must be approved by the holders of a majority in principal amount of the Notes; and

if the change affects more than one series of debt securities issued under the same indenture, it must be approved by the holders of a majority in principal amount of all of the series affected by the change, with all affected series voting together as one class for this purpose.

In each case, the required approval must be given by written consent.

The holders of a majority in principal amount of all of the series of debt securities issued under an indenture, voting together as one class for this purpose, may waive our compliance with some of our covenants in that indenture. However, we cannot obtain a waiver of a payment default or of any of the matters covered by the bullet points included above under Changes Requiring Your Approval.

Further Details Concerning Voting

When taking a vote, we will use the following rules to decide how much principal to attribute to the Notes:

The Notes will not be considered outstanding, and therefore not eligible to vote, if we have deposited or set aside in trust money for their payment or redemption or if we or any affiliate of ours own any Notes. The Notes will also not be eligible to vote if they have been fully defeased as described later under Defeasance Full Defeasance below.

S-56

We will generally be entitled to set any day as a record date for the purpose of determining the holders of the Notes that are entitled to vote or take other action under the indenture. However, the record date may not be earlier than 30 days before the date of the first solicitation of holders to vote on or take such action and not later than the date such solicitation is completed. If we set a record date for a vote or other action to be taken by holders of the Notes, that vote or action may be taken only by persons who are holders of the Notes on the record date and must be taken within eleven months following the record date.

Book-entry and other indirect holders should consult their banks or brokers for information on how approval may be granted or denied if we seek to change the indenture or the Notes or request a waiver.

Satisfaction and Discharge

The indenture will be discharged and will cease to be of further effect with respect to the Notes when:

Either

all the Notes that have been authenticated have been delivered to the trustee for cancellation; or

all the Notes that have not been delivered to the trustee for cancellation:

have become due and payable, or

will become due and payable at their stated maturity within one year, or

are to be called for redemption,

and we, in the case of the first, second and third sub-bullets above, have irrevocably deposited or caused to be deposited with the trustee as trust funds in trust solely for the benefit of the holders of the Notes, in amounts in the currency payable for the Notes as will be sufficient, to pay and discharge the entire indebtedness (including all principal, premium, if any, and interest) on such Notes delivered to the trustee for cancellation (in the case of Notes that have become due and payable on or prior to the date of such deposit) or to the stated maturity or redemption date, as the case may be;

we have paid or caused to be paid all other sums payable by us under the indenture with respect to the Notes; and

we have delivered to the trustee an officers certificate and legal opinion, each stating that all conditions precedent provided for in the indenture relating to the satisfaction and discharge of the indenture and the Notes have been complied with.

Defeasance

The following provisions will be applicable to the Notes. Defeasance means that, by depositing with a trustee an amount of cash and/or government securities sufficient to pay all principal and interest, if any, on the Notes when due and satisfying any additional conditions noted below, we will be deemed to have been discharged from our obligations under the Notes. In the event of a covenant defeasance, upon depositing such funds and satisfying similar conditions discussed below we would be released from certain covenants under the indenture relating to the Notes.

S-57

Covenant Defeasance

Under current U.S. federal income tax law and the indenture, we can make the deposit described below and be released from some of the restrictive covenants in the indenture under which the Notes were issued. This is called covenant defeasance. In that event, you would lose the protection of those restrictive covenants but would gain the protection of having money and government securities set aside in trust to repay your Notes. In order to achieve covenant defeasance, the following must occur:

Since the Notes are denominated in U.S. dollars, we must deposit in trust for the benefit of all holders of the Notes a combination of cash and U.S. government or U.S. government agency notes or bonds that will generate enough cash to make interest, principal and any other payments on the Notes on their various due dates;

We must deliver to the trustee a legal opinion of our counsel confirming that, under current U.S. federal income tax law, we may make the above deposit without causing you to be taxed on the Notes any differently than if we did not make the deposit;

We must deliver to the trustee a legal opinion of our counsel stating that the above deposit does not require registration by us under the 1940 Act, and a legal opinion and officers certificate stating that all conditions precedent to covenant defeasance have been complied with;

Defeasance must not result in a breach or violation of, or result in a default under, the indenture or any of our other material agreements or instruments; and

No default or Event of Default with respect to the Notes shall have occurred and be continuing and no defaults or events of default related to bankruptcy, insolvency or reorganization shall occur during the next 60 days.

If we accomplish covenant defeasance, you can still look to us for repayment of the Notes if there were a shortfall in the trust deposit or the trustee is prevented from making payment. In fact, if one of the remaining Events of Default occurred (such as our bankruptcy) and the Notes became immediately due and payable, there might be a shortfall. Depending on the event causing the default, you may not be able to obtain payment of the shortfall.

Full Defeasance

If there is a change in U.S. federal income tax law, as described below, we can legally release ourselves from all payment and other obligations on the Notes (called full defeasance) if we put in place the following other arrangements for you to be repaid:

Since the Notes are denominated in U.S. dollars, we must deposit in trust for the benefit of all holders of the Notes a combination of money and U.S. government or U.S. government agency notes or bonds that will

generate enough cash to make interest, principal and any other payments on the Notes on their various due dates;

We must deliver to the trustee a legal opinion confirming that there has been a change in current U.S. federal tax law or an Internal Revenue Service (IRS) ruling that allows us to make the above deposit without causing you to be taxed on the Notes any differently than if we did not make the deposit;

S-58

We must deliver to the trustee a legal opinion of our counsel stating that the above deposit does not require registration by us under the 1940 Act, and a legal opinion and officers certificate stating that all conditions precedent to defeasance have been complied with;

Defeasance must not result in a breach or violation of, or constitute a default under, the indenture or any of our other material agreements or instruments; and

No default or Event of Default with respect to the Notes shall have occurred and be continuing and no defaults or events of default related to bankruptcy, insolvency or reorganization shall occur during the next 60 days.

If we ever did accomplish full defeasance, as described above, you would have to rely solely on the trust deposit for repayment of the Notes. You could not look to us for repayment in the unlikely event of any shortfall. Conversely, the trust deposit would most likely be protected from claims of our lenders and other creditors if we ever became bankrupt or insolvent.

Form, Exchange and Transfer of Certificated Registered Securities

If registered Notes cease to be issued in book-entry form, they will be issued:

only in fully registered certificated form;

without interest coupons; and

unless we indicate otherwise, in denominations of \$25 and amounts that are multiples of \$25. Holders may exchange their certificated securities for Notes of smaller denominations or combined into fewer Notes of larger denominations, as long as the total principal amount is not changed and as long as the denomination is equal to or greater than \$25.

Holders may exchange or transfer their certificated securities at the office of the trustee. We have appointed the trustee to act as our agent for registering Notes in the names of holders transferring Notes. We may appoint another entity to perform these functions or perform them ourselves.

Holders will not be required to pay a service charge to transfer or exchange their certificated securities, but they may be required to pay any tax or other governmental charge associated with the transfer or exchange. The transfer or exchange will be made only if our transfer agent is satisfied with the holder s proof of legal ownership.

We may appoint additional transfer agents or cancel the appointment of any particular transfer agent. We may also approve a change in the office through which any transfer agent acts.

If any certificated securities of a particular series are redeemable and we redeem less than all the Notes, we may block the transfer or exchange of those Notes selected for redemption during the period beginning 15 days before the day we mail the notice of redemption and ending on the day of that mailing, in order to freeze the list of holders to prepare the

Edgar Filing: FIDUS INVESTMENT Corp - Form 497

mailing. We may also refuse to register transfers or exchanges of any certificated Notes selected for redemption, except that we will continue to permit transfers and exchanges of the unredeemed portion of any Note that will be partially redeemed.

S-59

If registered Notes are issued in book-entry form, only the depositary will be entitled to transfer and exchange the Notes as described in this subsection, since it will be the sole holder of the Notes.

Resignation of Trustee

The trustee may resign or be removed with respect to the Notes provided that a successor trustee is appointed to act with respect to the Notes. In the event that two or more persons are acting as trustee with respect to different series of indenture securities under the indenture, each of the trustees will be a trustee of a trust separate and apart from the trust administered by any other trustee.

Governing Law

The indenture and the Notes will be governed by and construed in accordance with the laws of the State of New York.

Indenture Provisions Ranking

The Notes will be our direct unsecured obligations and will rank:

pari passu with our existing and future unsubordinated unsecured indebtedness;

senior to any of our future indebtedness that expressly provides it is subordinated to the Notes; and

effectively subordinated to all of our existing and future secured indebtedness (including indebtedness that is initially unsecured to which we subsequently grant security), to the extent of the value of the assets securing such indebtedness, including, without limitation, borrowings under our Credit Facility; and

structurally subordinated to all existing and future indebtedness and other obligations of any of our subsidiaries, including the Funds.

The Trustee under the Indenture

U.S Bank National Association serves as the trustee, paying agent, and security registrar under the indenture. Separately, our securities are held by U.S. Bank National Association pursuant to a custody agreement.

Book-Entry Procedures

The Notes will be represented by global securities that will be deposited and registered in the name of DTC or its nominee. This means that, except in limited circumstances, you will not receive certificates for the Notes. Beneficial interests in the Notes will be represented through book-entry accounts of financial institutions acting on behalf of beneficial owners as direct and indirect participants in DTC. Investors may elect to hold interests in the Notes through either DTC, if they are a participant, or indirectly through organizations that are participants in DTC.

The Notes will be issued as fully registered securities registered in the name of Cede & Co. (DTC s partnership nominee) or such other name as may be requested by an authorized representative of DTC. One fully registered

Edgar Filing: FIDUS INVESTMENT Corp - Form 497

certificate will be issued for each issuance of the Notes, in the aggregate principal amount thereof, and will be deposited with DTC. Interests in the Notes will trade in DTC s Same Day Funds Settlement System, and any permitted secondary market trading activity in such Notes will, therefore, be required by DTC to be settled in immediately available funds. None of the Company, the trustee or the paying agent will have any responsibility for the performance by DTC or its participants or indirect participants of their respective obligations under the rules and procedures governing their operations.

S-60

DTC is a limited-purpose trust company organized under the New York Banking Law, a banking organization within the meaning of the New York Banking Law, a member of the Federal Reserve System, a clearing corporation within the meaning of the New York Uniform Commercial Code, and a clearing agency registered pursuant to the provisions of Section 17A of the Exchange Act. DTC holds and provides asset servicing for over 3.5 million issues of U.S. and non-U.S. equity, corporate and municipal debt issues, and money market instruments from over 100 countries that DTC s participants (Direct Participants) deposit with DTC. DTC also facilitates the post-trade settlement among Direct Participants of sales and other securities transactions in deposited securities through electronic computerized book-entry transfers and pledges between Direct Participants accounts. This eliminates the need for physical movement of securities certificates. Direct Participants include both U.S. and non-U.S. securities brokers and dealers, banks, trust companies, clearing corporations, and certain other organizations. DTC is a wholly owned subsidiary of The Depository Trust & Clearing Corporation (DTCC).

DTCC is the holding company for DTC, National Securities Clearing Corporation and Fixed Income Clearing Corporation, all of which are registered clearing agencies. DTCC is owned by the users of its regulated subsidiaries. Access to the DTC system is also available to others such as both U.S. and non-U.S. securities brokers and dealers, banks, trust companies and clearing corporations that clear through or maintain a custodial relationship with a Direct Participant, either directly or indirectly (Indirect Participants). DTC has Standard & Poor s Ratings Services highest rating: AAA. The DTC Rules applicable to its participants are on file with the SEC. More information about DTC can be found at www.dtcc.com and www.dtc.org.

Purchases of the Notes under the DTC system must be made by or through Direct Participants, which will receive a credit for the Notes on DTC s records. The ownership interest of each actual purchaser of each security, or the Beneficial Owner, is in turn to be recorded on the Direct and Indirect Participants records. Beneficial Owners will not receive written confirmation from DTC of their purchase. Beneficial Owners are, however, expected to receive written confirmations providing details of the transaction, as well as periodic statements of their holdings, from the Direct or Indirect Participant through which the Beneficial Owner entered into the transaction. Transfers of ownership interests in the Notes are to be accomplished by entries made on the books of Direct and Indirect Participants acting on behalf of Beneficial Owners. Beneficial Owners will not receive certificates representing their ownership interests in the Notes, except in the event that use of the book-entry system for the Notes is discontinued.

To facilitate subsequent transfers, all Notes deposited by Direct Participants with DTC are registered in the name of DTC s partnership nominee, Cede & Co. or such other name as may be requested by an authorized representative of DTC. The deposit of the Notes with DTC and their registration in the name of Cede & Co. or such other DTC nominee do not effect any change in beneficial ownership. DTC has no knowledge of the actual Beneficial Owners of the Notes; DTC s records reflect only the identity of the Direct Participants to whose accounts the Notes are credited, which may or may not be the Beneficial Owners. The Direct and Indirect Participants will remain responsible for keeping account of their holdings on behalf of their customers.

Conveyance of notices and other communications by DTC to Direct Participants, by Direct Participants to Indirect Participants, and by Direct Participants and Indirect Participants to Beneficial Owners will be governed by arrangements among them, subject to any statutory or regulatory requirements as may be in effect from time to time.

Redemption notices shall be sent to DTC. If less than all of the Notes within an issue are being redeemed, DTC s practice is to determine by lot the amount of the interest of each Direct Participant in such issue to be redeemed.

Redemption proceeds, distributions, and interest payments on the Notes will be made to Cede & Co., or such other nominee as may be requested by an authorized representative of DTC. DTC s practice is to credit Direct Participants accounts upon DTC s receipt of funds and corresponding detail information from us or the trustee on the payment date in accordance with their respective holdings shown on DTC s records. Payments by Participants to Beneficial Owners will be governed by standing instructions and customary practices, as is the case with securities held for the accounts of customers in bearer form or registered in street name, and will be the responsibility of such Participant and not of DTC nor its nominee, the trustee, or us, subject to any statutory or regulatory requirements as may be in effect from time to time. Payment of redemption proceeds, distributions, and interest payments to Cede & Co. (or such other nominee as may be requested by an authorized representative of DTC) is the responsibility of us or the trustee, but disbursement of such payments to Direct Participants will be the responsibility of DTC, and disbursement of such payments to the Beneficial Owners will be the responsibility of Direct and Indirect Participants.

DTC may discontinue providing its services as securities depository with respect to the Notes at any time by giving reasonable notice to us or to the trustee. Under such circumstances, in the event that a successor securities depository is not obtained, certificates are required to be printed and delivered. We may decide to discontinue use of the system of book-entry-only transfers through DTC (or a successor securities depository). In that event, certificates will be printed and delivered to DTC.

The information in this section concerning DTC and DTC s book-entry system has been obtained from sources that we believe to be reliable, but we take no responsibility for its accuracy.

S-62

CERTAIN U.S. FEDERAL INCOME TAX CONSIDERATIONS

The following summary describes certain U.S. federal income tax consequences applicable to an investment in the Notes. This summary does not purport to be a complete description of the income tax considerations applicable to such an investment. The summary is based upon the Code, U.S. Treasury regulations, and administrative and judicial interpretations, each as of the date of this prospectus supplement and all of which are subject to change, potentially with retroactive effect, or to different interpretations. We cannot assure you that the IRS will not challenge one or more of the tax consequences described in this summary, and we have not obtained, nor do we intend to obtain, any ruling from the IRS or opinion of counsel with respect to the tax consequences of an investment in the Notes. Investors should consult their own tax advisors with respect to tax considerations that pertain to their investment in the Notes.

This summary discusses only Notes held as capital assets within the meaning of the Code (generally, property held for investment purposes) and does not purport to address persons in special tax situations, such as banks and other financial institutions, insurance companies, controlled foreign corporations, passive foreign investment companies, real estate investment trusts and regulated investment companies (and shareholders of such corporations), dealers in securities or currencies, traders in securities, former citizens of the United States, persons holding the Notes as a position in a straddle, hedge, constructive sale transaction, conversion transaction, wash sale or other integrated transaction for U.S. federal income tax purposes, entities that are tax-exempt for U.S. federal income tax purposes, retirement plans, individual retirement accounts, tax-deferred accounts, persons subject to the alternative minimum tax, pass-through entities (including partnerships and entities and arrangements classified as partnerships for U.S. federal income tax purposes) and beneficial owners of pass-through entities, or U.S. holders (as defined below) whose functional currency (as defined in the Code) is not the U.S. dollar. It also does not address beneficial owners of the Notes other than original purchasers of the Notes who acquire the Notes in this offering for cash at a price equal to their issue price (i.e., the first price at which a substantial amount of the Notes is sold for money to investors (other than to bond houses, brokers, or similar persons or organizations acting in the capacity of underwriters, placements agents or wholesalers)). In addition, this summary only addresses U.S. federal income tax consequences, and does not address other U.S. federal tax consequences, including, for example, estate or gift tax consequences. This summary also does not address any U.S. state or local or non-U.S. tax consequences. Investors considering purchasing the Notes should consult their own tax advisors concerning the application of the U.S. federal income tax laws to their individual circumstances, as well as any consequences to such investors relating to purchasing, owning and disposing of the Notes under the laws of any state, local, foreign or other taxing jurisdiction.

If a partnership (including an entity or arrangement treated as a partnership for U.S. federal income tax purposes) holds any Notes, the U.S. federal income tax treatment of a partner of the partnership generally will depend upon the status of the partner, the activities of the partnership and certain determinations made at the partner level. Partnerships holding Notes, and persons holding interests in such partnerships, should each consult their own tax advisors as to the consequences of investing in the Notes in their individual circumstances.

Taxation of U.S. Holders

For purposes of this discussion, the term U.S. holder means a beneficial owner of a Note that is, for U.S. federal income tax purposes:

an individual who is a citizen or resident of the United States;

Edgar Filing: FIDUS INVESTMENT Corp - Form 497

S-63

a corporation created or organized in or under the laws of the United States, any state thereof, or the District of Columbia;

a trust (i) the administration of which is subject to the primary supervision of a U.S. court and that has one or more United States persons (within the meaning of the Code) that have the authority to control all substantial decisions of the trust or (ii) that has made a valid election under applicable U.S. Treasury regulations to be treated as a United States person (within the meaning of the Code); or

an estate the income of which is subject to U.S. federal income taxation regardless of its source. *Payments of Interest*

Payments or accruals of interest on a Note generally will be taxable to a U.S. holder as ordinary interest income at the time they are received (actually or constructively) or accrued, in accordance with the U.S. holder s regular method of tax accounting.

Sale, Exchange, Redemption, Retirement or Other Taxable Disposition of a Note

Upon the sale, exchange, redemption, retirement or other taxable disposition of a Note, a U.S. holder generally will recognize capital gain or loss equal to the difference between the amount realized on the sale, exchange, redemption, retirement or other taxable disposition (excluding amounts representing accrued and unpaid interest, which are treated as ordinary interest income to the extent not previously included in income) and the U.S. holder s adjusted tax basis in the Note. A U.S. holder s adjusted tax basis in a Note generally will equal the U.S. holder s initial investment in the Note. Capital gain or loss generally will be long-term capital gain or loss if the Note was held for more than one year. Long-term capital gains recognized by individuals and certain other non-corporate U.S. holders generally are eligible for reduced rates of taxation. The deductibility of capital losses is subject to limitations under the Code.

Additional Tax on Net Investment Income

An additional tax of 3.8% is imposed on certain net investment income (or undistributed net investment income, in the case of certain U.S. holders that are estates and trusts) received by certain U.S. holders with adjusted gross income above certain threshold amounts. Net investment income generally includes interest payments on, and gain recognized from the sale, exchange, redemption, retirement or other taxable disposition of, the Notes, less certain deductions. U.S. holders should consult their own tax advisors regarding the effect, if any, of this tax on their ownership and disposition of the Notes.

Backup Withholding and Information Reporting

In general, a U.S. holder will be subject to U.S. federal backup withholding tax at the applicable rate with respect to payments on the Notes and the proceeds of a sale, exchange, redemption, retirement or other taxable disposition of the Notes, unless the U.S. holder is an exempt recipient and appropriately establishes that exemption, or provides its taxpayer identification number to the paying agent and certifies, under penalty of perjury, that it is not subject to backup withholding on an IRS Form W-9 and otherwise complies with the applicable requirements of the backup withholding rules. Backup withholding is not an additional tax. The amount of any backup withholding from a payment to a U.S. holder may be allowed as a credit against such U.S. holder s U.S. federal income tax liability and may entitle such U.S. holder to a

S-64

refund, provided the required information is furnished to the IRS in a timely manner. In addition, payments on the Notes made to, and the proceeds of a sale, exchange, redemption, retirement or other taxable disposition by, a U.S. holder generally will be subject to information reporting requirements, unless such U.S. holder is an exempt recipient and appropriately establishes that exemption.

Taxation of Non-U.S. Holders

For purposes of this discussion, the term non-U.S. holder means a beneficial owner of a Note that is neither a U.S. holder nor a partnership for U.S. federal income tax purposes.

Interest on the Notes

Subject to the discussions of backup withholding and Foreign Account Tax Compliance Act, or FATCA, withholding below, payments to a non-U.S. holder of interest on the Notes generally will not be subject to U.S. federal income tax and will be exempt from withholding of U.S. federal income tax under the portfolio interest exemption if such non-U.S. holder properly certifies as to such non-U.S. holder s foreign status, as described below, and:

such non-U.S. holder does not own, actually or constructively, 10% or more of the total combined voting power of all classes of our stock entitled to vote;

such non-U.S. holder is not a controlled foreign corporation that is related to us (actually or constructively);

such non-U.S. holder is not a bank whose receipt of interest on the Notes is in connection with an extension of credit made pursuant to a loan agreement entered into in the ordinary course of such non-U.S. holder s trade or business; and

interest on the Notes is not effectively connected with such non-U.S. holder s conduct of a U.S. trade or business (or, in the case of an applicable income tax treaty, such interest is not attributable to a permanent establishment maintained by such non-U.S. holder in the United States).

The portfolio interest exemption generally applies only if a non-U.S. holder also appropriately certifies as to such non-U.S. holder s foreign status. A non-U.S. holder can generally meet the certification requirement by providing a properly executed IRS Form W-8BEN or IRS Form W-8BEN-E (or applicable successor form) to the applicable withholding agent. If a non-U.S. holder holds the Notes through a financial institution or other agent acting on such non-U.S. holder s behalf, such non-U.S. holder may be required to provide appropriate certifications to the agent. Such non-U.S. holder s agent will then generally be required to provide appropriate certifications to the applicable withholding agent, either directly or through other intermediaries.

If a non-U.S. holder cannot satisfy the requirements described above, payments of interest made to such non-U.S. holder will be subject to U.S. federal withholding tax at a 30% rate, unless (i) such non-U.S. holder provides the applicable withholding agent with a properly executed IRS Form W-8BEN or IRS Form W-8BEN-E (or applicable successor form) claiming an exemption from (or a reduction of) withholding under the benefits of an income tax treaty, or (ii) the payments of such interest are effectively connected with such non-U.S. holder s conduct of a trade or business in the United States and such non-U.S. holder meets the certification requirements described

Edgar Filing: FIDUS INVESTMENT Corp - Form 497

below. See Income or Gain Effectively Connected with a U.S. Trade or Business below.

S-65

Disposition of the Notes

Subject to the discussions of backup withholding and FATCA withholding below, a non-U.S. holder generally will not be subject to U.S. federal income tax on any gain realized on the sale, redemption, exchange, retirement, or other taxable disposition of a Note unless:

the gain is effectively connected with the conduct by such non-U.S. holder of a U.S. trade or business (and, if required by an applicable income tax treaty, such non-U.S. holder maintains a permanent establishment in the United States to which such gain is attributable); or

such non-U.S. holder is a non-resident alien individual who has been present in the United States for 183 days or more in the taxable year of disposition and certain other requirements are met.

If a non-U.S. holder s gain is described in the first bullet point above, such non-U.S. holder generally will be subject to U.S. federal income tax in the manner described under Income or Gain Effectively Connected with a U.S. Trade or Business below. A non-U.S. holder described in the second bullet point above will be subject to a flat 30% (or lower applicable income tax treaty rate) U.S. federal income tax on the gain derived from the sale or other disposition, which may be offset by certain U.S. source capital losses. To the extent that any portion of the amount realized on a sale, redemption, exchange, retirement or other taxable disposition of a Note is attributable to accrued but unpaid interest on the Note, this amount generally will be taxed in the same manner as described above in Interest on the Notes.

Income or Gain Effectively Connected with a U.S. Trade or Business

If any interest on the Notes or gain from the sale, redemption, exchange, retirement, or other taxable disposition of the Notes is effectively connected with a non-U.S. holder s conduct of a U.S. trade or business (and, if required by an applicable income tax treaty, such non-U.S. holder maintains a permanent establishment in the United States to which such interest or gain is attributable), then the interest income or gain will be subject to U.S. federal income tax at regular graduated income tax rates generally in the same manner as if such non-U.S. holder were a U.S. holder (but without regard to the additional tax on net investment income described above). Effectively connected interest income will not be subject to U.S. federal withholding tax if a non-U.S. holder satisfies certain certification requirements by providing to the applicable withholding agent a properly executed IRS Form W-8ECI (or successor form). In addition, if a non-U.S. holder is a corporation, that portion of such non-U.S. holder s earnings and profits that are effectively connected with such non-U.S. holder s conduct of a U.S. trade or business may also be subject to a branch profits tax at a 30% rate, unless an applicable income tax treaty provides for a lower rate. For this purpose, interest received on a Note and gain recognized on the disposition of a Note will be included in earnings and profits if the interest or gain is effectively connected with the conduct by such non-U.S. holder of a U.S. trade or business.

Backup Withholding and Information Reporting

Under current U.S. Treasury regulations, the amount of interest paid to a non-U.S. holder and the amount of tax withheld, if any, from those payments must be reported annually to the IRS and each non-U.S. holder. These reporting requirements apply regardless of whether U.S. withholding tax on such payments was reduced or eliminated by any applicable tax treaty or otherwise. Copies of the information returns reporting those payments and the amounts withheld may also be made available to the tax authorities in the country where a non-U.S. holder is a resident under the provisions of an applicable income tax treaty or agreement.

S-66

Backup withholding generally will not apply to payments of interest to a non-U.S. holder on a Note if the certification described above in Interest on the Notes is duly provided or such non-U.S. holder otherwise establishes an exemption.

Additionally, the gross proceeds from a non-U.S. holder s disposition of Notes may be subject under certain circumstances to information reporting and backup withholding unless the non-U.S. holder provides an IRS Form W-8BEN or W-8BEN-E (or other applicable form) certifying that the non-U.S. holder is not a United States person or otherwise qualifies for an exemption.

Non-U.S. holders should consult their own tax advisors regarding application of the backup withholding rules to their particular circumstances and the availability of and procedure for obtaining an exemption from backup withholding. Backup withholding is not an additional tax and any amounts withheld under the backup withholding rules may be credited against a non-U.S. holder s U.S. federal income tax liability (which may result in such non-U.S. holder being entitled to a refund of U.S. federal income tax), provided that the required information is timely provided to the IRS.

Estate Tax

A Note that is held by an individual who, at the time of death, is not a citizen or resident of the United States (as specially defined for U.S. federal estate tax purposes) generally will not be subject to the U.S. federal estate tax, unless, at the time of death, (i) such individual directly or indirectly, actually or constructively, owns ten percent or more of the total combined voting power of all classes of our stock entitled to vote within the meaning of Section 871(h)(3) of the Code and the Treasury Regulations thereunder or (ii) such individual s interest in the Notes is effectively connected with the individual s conduct of a United States trade or business.

FATCA

Legislation commonly referred to as the Foreign Account Tax Compliance Act, or FATCA, generally imposes a 30% withholding tax on payments of certain types of income to foreign financial institutions (FFIs) unless such FFIs either (i) enter into an agreement with the U.S. Treasury to report certain required information with respect to accounts held by U.S. persons (or held by foreign entities that have U.S. persons as substantial owners) or (ii) reside in a jurisdiction that has entered into an intergovernmental agreement (IGA) with the United States to collect and share such information and are in compliance with the terms of such IGA and any enabling legislation or regulations. The types of income subject to the tax include U.S. source interest (including interest on a Note) and dividends and, after December 31, 2018, the gross proceeds from the sale of any property that could produce U.S. source interest (such as a Note) or dividends. The information required to be reported includes the identity and taxpayer identification number of each account holder that is a U.S. person and transaction activity within the holder s account. In addition, subject to certain exceptions, this legislation also imposes a 30% withholding on payments to foreign entities that are not FFIs unless the foreign entity certifies that it does not have a greater than 10% U.S. owner or provides the withholding agent with identifying information on each greater than 10% U.S. owner. Depending on the status of a beneficial owner and the status of the intermediary through which it holds the Notes, a beneficial owner could be subject to this 30% withholding tax with respect to interest paid on the Notes and proceeds from the sale of the Notes. Under certain circumstances, a beneficial owner might be eligible for a refund or credit of such taxes.

S-67

Holders and beneficial owners should consult their own tax advisors regarding FATCA and whether it may be relevant to their acquisition, ownership and disposition of the Notes.

You should consult your own tax advisor with respect to the particular tax consequences to you of an investment in the Notes, including the possible effect of any pending legislation or proposed regulations.

S-68

UNDERWRITING

Keefe, Bruyette & Woods, Inc. is acting as the representative of the underwriters for this offering. Subject to the terms and conditions set forth in an underwriting agreement dated , 2018 among us, our investment advisor and the underwriters, we have agreed to sell to the underwriters, and each of the underwriters has agreed, severally and not jointly, to purchase from us, the aggregate principal amount of Notes indicated in the table below:

Underwriter Principal Amount of Notes

Keefe, Bruyette & Woods, Inc.

Janney Montgomery Scott LLC

Oppenheimer & Co. Inc.

B. Riley FBR, Inc.

BB&T Capital Markets, a division of BB&T Securities LLC

Ladenburg Thalmann & Co. Inc.

ING Financial Markets LLC

Total

Keefe, Bruyette & Woods, Inc. is acting as book-running manager of this offering.

The underwriting agreement provides that the obligations of the several underwriters are subject to certain conditions precedent such as the receipt by the underwriters of officers—certificates and legal opinions. The underwriting agreement provides that the underwriters will purchase all of the Notes (other than those covered by the over-allotment option described below) if they purchase any of the Notes. If an underwriter defaults, the underwriting agreement provides that, under the circumstances, the purchase commitments of the non-defaulting underwriters may be increased or the underwriting agreement may be terminated. We and our investment advisor have each agreed to indemnify the underwriters and certain of their controlling persons against certain liabilities, including liabilities under the Securities Act, or to contribute to payments the underwriters may be required to make in respect of those liabilities.

The underwriters have advised us that they currently intend to make a market in the Notes. However, the underwriters are not obligated to do so and may discontinue any market-making activities at any time without notice. No assurance can be given as to the liquidity of the trading market for the Notes. If an active public trading market for the Notes does not develop, the market price and liquidity of the Notes may be adversely affected.

The underwriters are offering the Notes, subject to their acceptance of the Notes from us and subject to prior sale. The underwriters reserve the right to withdraw, cancel or modify offers to the public and to reject orders in whole or in part.

The underwriters propose to initially offer some of the Notes directly to the public at the public offering price set forth on the cover page of this prospectus supplement. If all of the Notes are not sold at the public offering price, the representative may change the public offering price and other selling terms. Investors must pay for any Notes purchased in this offering on or before , 2018. The representative has advised us that the underwriters do not intend to confirm any sales to any accounts over which they exercise discretionary authority.

Edgar Filing: FIDUS INVESTMENT Corp - Form 497

S-69

The following table shows the sales load to be paid to the underwriters in connection with this offering assuming (1) no exercise of and (2) exercise in full of the underwriters—over-allotment option.

		Total				
		Without	With Full			
	Per Note	Over-allotment	Over-allotment			
Public offering price	%	\$	\$			
Sales load (underwriting discounts and commissions)	%	\$	\$			
Proceeds to us (before expenses)	%	\$	\$			

We estimate expenses payable by us in connection with this offering will be approximately \$400,000. As part of our payment of our offering expenses, we have agreed to pay the underwriters an amount not to exceed \$15,000 for the fees and disbursements of counsel to the underwriters in connection with the review by FINRA of the terms of the sale of the Notes.

Listing

We intend to list the Notes on The Nasdaq Global Select Market. We expect trading in the Notes on The Nasdaq Global Select Market to begin within 30 days after the original issue date under the trading symbol FDUSL. We offer no assurances that an active trading market for the Notes will develop and continue after the offering.

Over-Allotment Option

We have granted to the underwriters an option, exercisable for 30 days from the date of this prospectus supplement, to purchase from us up to an additional \$\) million aggregate principal amount of the Notes at the public offering price set forth on the cover of this prospectus supplement less the sales load. The underwriters may exercise the option solely for the purpose of covering over-allotments, if any, in connection with this offering. If the underwriters exercise this overallotment option, each will be obligated, subject to the specified conditions, to purchase a number of additional Notes proportionate to that underwriter s initial principal amount reflected in the table above.

No Sales of Similar Securities

Subject to certain exceptions, we have agreed not to, directly or indirectly, offer, pledge, sell, contract to sell, grant any option for the sale of, make any short sale or otherwise transfer or dispose of any debt securities issued or guaranteed by the Company or any securities convertible into or exercisable or exchangeable for debt securities issued or guaranteed by the Company, enter into any swap or other derivatives transaction that transfers any of the economic benefits or risks of ownership of any debt securities issued or guaranteed by the Company or file any registration statement under the Securities Act with respect to any of the foregoing for a period of 45 days after the date of this prospectus supplement without first obtaining the written consent of Keefe, Bruyette & Woods, Inc., other than certain private sales of debt securities to a limited number of institutional investors. This consent may be given at any time without public notice.

Stabilization

The underwriters have advised us that, pursuant to Regulation M under the Exchange Act, certain persons participating in the offering may engage in transactions including over-allotment,

S-70

covering transactions and stabilizing transactions, which may have the effect of stabilizing or maintaining the market price of the Notes at a level above that which might otherwise prevail in the open market. Over-allotment involves syndicate sales of securities in excess of the aggregate principal amount of securities to be purchased by the underwriters in the offering, which creates a short position for the underwriters. Covering transactions involve purchases of the securities in the open market after the distribution has been completed in order to cover short positions.

A stabilizing bid is a bid for the purchase of Notes on behalf of the underwriters for the purpose of fixing or maintaining the price of the Notes. A syndicate covering transaction is the bid for or the purchase of Notes on behalf of the underwriters to reduce a short position incurred by the underwriters in connection with the offering. Similar to other purchase transactions, the underwriter s purchases to cover the syndicate short sales may have the effect of raising or maintaining the market price of the Notes or preventing or retarding a decline in the market price of the Notes. As a result, the price of the Notes may be higher than the price that might otherwise exist in the open market. A penalty bid is an arrangement permitting the underwriters to reclaim the selling concession otherwise accruing to a syndicate member in connection with the offering if the Notes originally sold by such syndicate member are purchased in a syndicate covering transaction and therefore have not been effectively placed by such syndicate member. The underwriters may conduct these transactions on The Nasdaq Global Select Market, in the over-the-counter market or otherwise.

Neither we, nor any of the underwriters makes any representation or prediction as to the direction or magnitude of any effect that the transactions described above may have on the price of the Notes. The underwriters are not obligated to engage in these activities and, if commenced, any of the activities may be discontinued at any time.

Electronic Distribution

A prospectus in electronic format may be made available by e-mail or on the web sites or through online services maintained by one or more of the underwriters and/or selling group members participating in this offering, or by their affiliates. In those cases, prospective investors may view offering terms online and, depending upon the particular underwriter or selling group member, prospective investors may be allowed to place orders online. The underwriters may agree with us to allocate a limited principal amount of the Notes for sale to online brokerage account holders. Any such allocation for online distributions will be made by the underwriters on the same basis as other allocations. Other than the prospectus in electronic format, information on the underwriters web sites and any information contained in any other web site maintained by any of the underwriters or selling group members is not part of this prospectus supplement or the registration statement of which this prospectus supplement is a part, has not been approved and/or endorsed by us or the underwriters and should not be relied on by investors.

Other Relationships

Certain of the underwriters and their affiliates have provided in the past and may provide from time to time in the future in the ordinary course of their business certain commercial banking, financial advisory, investment banking and other services to us, our portfolio companies or our affiliates for which they have received or will be entitled to receive separate fees. In particular, the underwriters or their affiliates may execute transactions with us, on behalf of us, any of our portfolio companies or our affiliates. In addition, the underwriters or their affiliates may act as arrangers, underwriters or placement agents for companies whose securities are sold to or whose loans are syndicated to us, our portfolio companies or our affiliates.

An affiliate of ING Financial Markets LLC, an underwriter in this offering, is the administrative agent and lender under our Credit Facility. We intend to use the net proceeds of

S-71

this offering to repay outstanding indebtedness under the Credit Facility. The collateral under the Credit Facility will not be released as a result of such repayment. As such, the affiliate of ING Financial Markets LLC will receive a portion of the net proceeds of this offering. Nonetheless, in accordance with Rule 5121 of FINRA, the appointment of a qualified independent underwriter is not necessary in connection with this offering because we, the issuer of the securities in this offering, are a BDC.

The underwriters or their affiliates may also trade in our securities, securities of our portfolio companies or other financial instruments related thereto for their own accounts or for the account of others and may extend loans or financing directly or through derivative transactions to us, any of our portfolio companies or our affiliates.

After the date of this prospectus supplement, the underwriters and their affiliates may from time to time obtain information regarding specific portfolio companies or us that may not be available to the general public. Any such information is obtained by the underwriters and their affiliates in the ordinary course of their business and not in connection with the offering of the Notes. In addition, after the offering period for the sale of the Notes, the underwriters or their affiliates may develop analyses or opinions related to us or our portfolio companies and buy or sell interests in one or more of our portfolio companies on behalf of their proprietary or client accounts and may engage in competitive activities. There is no obligation on behalf of these parties to disclose their respective analyses, opinions or purchase and sale activities regarding any portfolio company or regarding us to holders of the Notes or any other persons.

In the ordinary course of their various business activities, the underwriters and their respective affiliates may make or hold a broad array of investments and actively trade debt and equity securities (or related derivative securities) and financial instruments (including bank loans) for their own account and for the accounts of their customers. Such investments and securities activities may involve securities and/or instruments of ours or our affiliates. Certain of the underwriters and their affiliates that may have a lending relationship with us may routinely hedge their credit exposure to us consistent with their customary risk management policies. Typically, such underwriters and their affiliates would hedge such exposure by entering into transactions that consist of either the purchase of credit default swaps or the creation of short positions in our securities, including potentially the Notes offered by this prospectus supplement and the accompanying prospectus. Any such short positions could adversely affect future trading prices of the Notes offered hereby. The underwriters and their affiliates may also make investment recommendations and/or publish or express independent research views in respect of such securities or financial instruments and may hold, or recommend to clients that they acquire, long and/or short positions in such securities and instruments.

The principal business address of Keefe, Bruyette & Woods, Inc. is 787 Seventh Avenue, 4th Floor, New York, New York 10019.

Other Jurisdictions

The Notes offered by this prospectus supplement and the accompanying prospectus may not be offered or sold, directly or indirectly, nor may this prospectus supplement, the accompanying prospectus or any other offering material or advertisements in connection with the offer and sale of any such Notes be distributed or published, in any jurisdiction except under circumstances that will result in compliance with the applicable rules and regulations of that jurisdiction. Persons into whose possession this prospectus supplement and the accompanying prospectus come are advised to inform themselves about and to observe any restriction relating to the offering and the distribution of this prospectus supplement and the accompanying prospectus. This prospectus supplement and the accompanying prospectus supplement and the accompanying prospectus supplement and the accompanying prospectus in any jurisdiction in which such an offer or a solicitation is unlawful.

S-72

Alternative Settlement Cycle

We expect that delivery of the Notes will be made against payment therefor on or about , 2018, which will be the third business day following the date of pricing of the Notes (such settlement cycle being referred to as T+3). Under Rule 15c6-1 under the Exchange Act, trades in the secondary market generally are required to settle in two business days, unless the parties to any such trade expressly agree otherwise. Accordingly, purchasers who wish to trade the Notes on the date of pricing or the next two succeeding business days will be required, by virtue of the fact that the Notes initially will settle T+3, to specify an alternate settlement cycle at the time of any such trade to prevent a failed settlement. Purchasers of the Notes who wish to trade the Notes on the date of pricing or the next two succeeding business days should consult their own advisor.

S-73

LEGAL MATTERS

Certain legal matters will be passed upon for us by Eversheds Sutherland (US) LLP. Eversheds Sutherland (US) LLP also represents our investment advisor. Certain legal matters will be passed upon for the underwriters by Dechert LLP.

INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The consolidated financial statements, the related senior securities table and the effectiveness of internal control over financial reporting appearing in the accompanying prospectus and registration statement have been audited by RSM US LLP, an independent registered public accounting firm located at One South Wacker Drive, Suite 800, Chicago, Illinois 60606, as stated in their reports appearing elsewhere in this prospectus supplement, and are included in reliance upon such reports and upon the authority of such firm as experts in accounting and auditing.

AVAILABLE INFORMATION

We have filed with the SEC a registration statement on Form N-2, together with all amendments and related exhibits, under the Securities Act, with respect to the Notes offered by this prospectus supplement. The registration statement contains additional information about us and the Notes being offered by this prospectus supplement.

We file with or submit to the SEC annual, quarterly and current periodic reports, proxy statements and other information meeting the informational requirements of the Exchange Act. You may inspect and copy these reports, proxy statements and other information, as well as the registration statement and related exhibits and schedules, at the SEC s Public Reference Room at 100 F Street, N.E., Washington, D.C. 20549-0102. You may obtain information on the operation of the Public Reference Room by calling the SEC at (202) 551-8090. We maintain a website at http://www.fdus.com and intend to make all of our annual, quarterly and current reports, proxy statements and other publicly filed information available, free of charge, on or through our website. Information contained on our website is not incorporated into this prospectus supplement, and you should not consider information on our website to be part of this prospectus supplement. You may also obtain such information by contacting us in writing at 1603 Orrington Avenue, Suite 1005, Evanston, Illinois 60201, Attention: Investor Relations. The SEC maintains a website that contains reports, proxy and information statements and other information we file with the SEC at http://www.sec.gov. Copies of these reports, proxy and information statements and other information may also be obtained, after paying a duplicating fee, by electronic request at the following e-mail address: publicinfo@sec.gov, or by writing the SEC s Public Reference Section, 100 F Street, N.E., Washington, D.C. 20549-0102.

FIDUS INVESTMENT CORPORATION

Consolidated Schedule of Investments (unaudited) (continued)

September 30, 2017

(In thousands, except shares)

- (a) See Note 3 to the consolidated financial statements for portfolio composition by geographic location.
- (b) Equity ownership may be held in shares or units of companies related to the portfolio companies.
- (c) All debt investments are income producing, unless otherwise indicated. Equity investments are non-income producing unless otherwise noted.
- (d) Rate includes the cash interest or dividend rate and paid-in-kind interest or dividend rate, if any, as of September 30, 2017. Generally, payment-in-kind interest can be paid-in-kind or all in cash.
- (e) The Company s investment portfolio is comprised entirely of debt and equity securities of privately held companies for which quoted prices falling within the categories of Level 1 and Level 2 inputs are not available. Therefore, the Company values all of its portfolio investments at fair value, as determined in good faith by the board of directors, using significant unobservable Level 3 inputs.
- (f) The investment bears cash interest at a variable rate that is determined by reference to one-month LIBOR, which is reset monthly. The cash interest rate is set as one-month LIBOR + 11.50% and is subject to a 12.50% interest rate floor. The Company has provided the interest rate in effect as of September 30, 2017.
- (g) Income producing. Maturity date, if any, represents mandatory redemption date.
- (h) Investment is held by a wholly-owned subsidiary of the Company, other than the Funds.
- (i) The entire commitment was unfunded at September 30, 2017. The Company is earning 0.50% interest on the unfunded balance of the commitment.
- (j) Investment pledged as collateral for the Credit Facility and, as a result, is not directly available to the creditors of the Company to satisfy any obligations of the Company other than the Company s obligations under the Credit Facility (see Note 6 to the consolidated financial statements).
- (k) The portion of the investment not held by the Funds is pledged as collateral for the Credit Facility and, as a result, is not directly available to the creditors of the Company to satisfy any obligations of the Company other than the Company s obligations under the Credit Facility (see Note 6 to the consolidated financial statements).
- (1) As defined in the 1940 Act, the Company is deemed to be an Affiliated Person of this portfolio company because it owns 5% or more of the portfolio company s outstanding voting securities or it has the power to exercise control over the management or policies of such portfolio company. Transactions in which the issuer was an Affiliated Person are detailed in Note 3 to the consolidated financial statements.
- (m) Warrants entitle the Company to purchase a predetermined number of shares or units of common equity, and are non-income producing. The purchase price and number of shares are subject to adjustment under certain conditions until the expiration date, if any.
- (n) Investment in portfolio company that has sold its operations and is in the process of winding down.
- (o) The investment bears interest at a variable rate that is determined by reference to three-month LIBOR, which is reset quarterly. The interest rate is set as three-month LIBOR + 8.75% and is subject to a 1.00% LIBOR interest rate floor. The Company has provided the interest rate in effect as of September 30, 2017.
- (p) Investment was on non-accrual status as of September 30, 2017, meaning the Company has ceased recognizing interest income on the investment.

- (q) Warrant entitles the Company to purchase 9.59% of the outstanding principal of Junior Subordinated Notes prior to exercise, and is non-income producing.
- (r) The investment bears interest at a variable rate that is determined by reference to three-month LIBOR, which is reset quarterly. The interest rate is set as three-month LIBOR + 10.00% and is subject to a 1.00% LIBOR interest rate floor. The Company has provided the interest rate in effect as of September 30, 2017.
- (s) A portion of the investment is held by a wholly-owned subsidiary of the Company, other than the Funds. See Notes to Consolidated Financial Statements (unaudited).

FIDUS INVESTMENT CORPORATION

Consolidated Schedule of Investments (continued)

December 31, 2016

(In thousands, except shares)

- (a) See Note 3 to the consolidated financial statements for portfolio composition by geographic location.
- (b) Equity ownership may be held in shares or units of companies related to the portfolio companies.
- (c) All debt investments are income producing, unless otherwise indicated. Equity investments are non-income producing unless otherwise noted.
- (d) Rate includes the cash interest or dividend rate and paid-in-kind interest or dividend rate, if any, as of December 31, 2016. Generally, payment-in-kind interest can be paid-in-kind or all in cash.
- (e) The Company s investment portfolio is comprised entirely of debt and equity securities of privately held companies for which quoted prices falling within the categories of Level 1 and Level 2 inputs are not available. Therefore, the Company values all of its portfolio investments at fair value, as determined in good faith by the board of directors, using significant unobservable Level 3 inputs.
- (f) The investment bears interest at a variable rate that is determined by reference to one-month LIBOR, which is reset monthly. The interest rate is set as one-month LIBOR + 11.50% and is subject to a 12.50% interest rate floor. The Company has provided the interest rate in effect as of December 31, 2016.
- (g) Income producing. Maturity date, if any, represents mandatory redemption date.
- (h) Investment is held by a wholly-owned subsidiary of the Company, other than the Funds.
- (i) The entire commitment was unfunded at December 31, 2016. As such, no interest is being earned on this investment.
- (j) Investment pledged as collateral for the Credit Facility and, as a result, is not directly available to the creditors of the Company to satisfy any obligations of the Company other than the Company s obligations under the Credit Facility (see Note 6 to the consolidated financial statements).
- (k) The portion of the investment not held by the Funds is pledged as collateral for the Credit Facility and, as a result, is not directly available to the creditors of the Company to satisfy any obligations of the Company other than the Company s obligations under the Credit Facility (see Note 6 to the consolidated financial statements).
- (l) As defined in the 1940 Act, the Company is deemed to be an Affiliated Person of this portfolio company because it owns 5% or more of the portfolio company s outstanding voting securities or it has the power to exercise control over the management or policies of such portfolio company. Transactions in which the issuer was an Affiliated Person are detailed in Note 3 to the consolidated financial statements.
- (m) Warrants entitle the Company to purchase a predetermined number of shares of common stock, and are non-income producing. The purchase price and number of shares are subject to adjustment under certain conditions until the expiration date, if any.
- (n) Investment in portfolio company that has sold its operations and is in the process of winding down.
- (o) The debt investment continues to pay interest, including the default rate, while the portfolio company pursues refinancing options.

See Notes to Consolidated Financial Statements (unaudited).

SF-19

FIDUS INVESTMENT CORPORATION

Notes to Consolidated Financial Statements (unaudited)

(In thousands, except shares and per share data)

Note 1. Organization and Nature of Business

Fidus Investment Corporation, a Maryland corporation (FIC, and together with its subsidiaries, the Company), was formed on February 14, 2011 for the purposes of (i) acquiring 100% of the limited partnership interests of Fidus Mezzanine Capital, L.P. and its consolidated subsidiaries (collectively, Fund I) and 100% of the membership interests of Fund I s general partner, Fidus Mezzanine Capital GP, LLC (FMCGP), (ii) raising capital in an initial public offering that was completed in June 2011 (the IPO) and (iii) thereafter operating as an externally managed, closed-end, non-diversified management investment company, within the meaning of the Investment Company Act of 1940, as amended (the 1940 Act), that has elected to be regulated as a business development company (BDC) under the 1940 Act.

On June 20, 2011, FIC acquired 100% of the limited partnership interests in Fund I and 100% of the equity interests in FMCGP, in exchange for 4,056,521 shares of common stock in FIC (the Formation Transactions). Fund I became FIC s wholly-owned subsidiary, retained its license to operate as a Small Business Investment Company (SBIC), and continues to hold investments. The IPO consisted of the sale of 5,370,500 shares of the Company s common stock, including shares purchased by the underwriters pursuant to their exercise of the over-allotment option, at a price of \$15.00 per share resulting in net proceeds of \$73,626, after deducting underwriting fees and commissions and offering costs totaling \$6,932.

The Company provides customized debt and equity financing solutions to lower middle-market companies. Fund I commenced operations on May 1, 2007, and on October 22, 2007, was granted a license to operate as a SBIC under the authority of the U.S. Small Business Administration (SBA). On March 29, 2013, the Company commenced operations of a second wholly-owned subsidiary, Fidus Mezzanine Capital II, L.P. (Fund II), and, on May 28, 2013, was granted a second license to operate Fund II as an SBIC. Collectively, Fund I and Fund II are referred to as the Funds. The SBIC licenses allow the Funds to obtain leverage by issuing SBA-guaranteed debentures (SBA debentures), subject to the issuance of leverage commitments by the SBA and other customary procedures. As SBICs, the Funds are subject to a variety of regulations and oversight by the SBA under the Small Business Investment Act of 1958, as amended (the SBIC Act), concerning, among other things, the size and nature of the companies in which they may invest and the structure of those investments.

Fund I has also elected to be regulated as a BDC under the 1940 Act. Fund II is not registered under the 1940 Act and relies on the exclusion from the definition of investment company contained in Section 3(c)(7) of the 1940 Act. In addition, for federal income tax purposes, the Company elected to be treated as a regulated investment company (RIC) under Subchapter M of the Internal Revenue Code of 1986, as amended (the Code), commencing with its taxable year ended December 31, 2011.

The Company pays a quarterly base management fee and an incentive fee to Fidus Investment Advisors, LLC (the Investment Advisor) under an investment advisory agreement (the Investment Advisory Agreement). The initial investment professionals of the Investment Advisor were previously employed by Fidus Capital, LLC, who was the investment advisor to Fund I prior to consummation of the Formation Transactions.

Note 2. Significant Accounting Policies

Basis of presentation: The accompanying consolidated financial statements of the Company have been prepared in accordance with generally accepted accounting principles in the United States of America (GAAP) pursuant to the requirements for reporting on Form 10-Q, Accounting Standards Codification (ASC) 946, Financial Services Investment Companies (ASC 946), and Articles 6 or 10 of Regulation S-X. In the opinion of management, the consolidated financial statements reflect all adjustments and reclassifications that are necessary for the fair presentation of financial results as of and for the periods presented. Certain prior period

SF-20

FIDUS INVESTMENT CORPORATION

Notes to Consolidated Financial Statements (unaudited)

(In thousands, except shares and per share data)

amounts have been reclassified to conform to the current period presentation. The current period s results of operation are not necessarily indicative of results that ultimately may be achieved for the year. Therefore, the unaudited financial statements and notes should be read in conjunction with the audited financial statements and notes thereto for the year ended December 31, 2016.

Use of estimates: The preparation of the consolidated financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Consolidation: Pursuant to Article 6 of Regulation S-X and ASC 946, the Company will generally not consolidate its investments in a company other than an investment company subsidiary or a controlled operating company whose business consists of providing services to the Company. As a result, the consolidated financial statements of the Company include only the accounts of the Company and its wholly-owned subsidiaries, including the Funds. All significant intercompany balances and transactions have been eliminated.

Investment risks: The Company s investments are subject to a variety of risks. These risks may include, but are not limited to the following:

Market risk - Market risk represents the potential loss that can be caused by a change in the fair value of the financial instrument due to market changes.

Credit risk - Credit risk represents the risk that the Company would incur if the counterparties failed to perform pursuant to the terms of their agreements with the Company.

Liquidity risk - Liquidity risk represents the possibility that the Company may not maintain sufficient cash balances or may not have access to sufficient cash to meet loan and other commitments as they become due.

Interest rate risk - Interest rate risk represents the likelihood that a change in interest rates could have an adverse impact on the fair value of an interest-bearing financial instrument.

Prepayment risk - Certain of the Company s debt investments allow for prepayment of principal without penalty. Downward changes in interest rates may cause prepayments to occur at a faster than expected rate, thereby effectively shortening the maturity of the debt investments and making the instrument less likely to

be an income producing instrument.

Off-Balance sheet risk - Some of the Company s financial instruments contain off-balance sheet risk. Generally, these financial instruments represent future commitments to purchase other financial instruments at specific terms at specific future dates. See Note 7 for further details.

Fair value of financial instruments: The Company measures and discloses fair value with respect to substantially all of its financial instruments in accordance with ASC Topic 820 Fair Value Measurements and Disclosures (ASC Topic 820). ASC Topic 820 defines fair value, establishes a framework used to measure fair value, and requires disclosures for fair value measurements, including the categorization of financial instruments into a three-level hierarchy based on the transparency of valuation inputs. See Note 4 to the consolidated financial statements for further discussion regarding the fair value measurements and hierarchy.

Investment classification: The Company classifies its investments in accordance with the requirements of the 1940 Act. Under the 1940 Act, Control Investments are defined as investments in those companies where

SF-21

FIDUS INVESTMENT CORPORATION

Notes to Consolidated Financial Statements (unaudited)

(In thousands, except shares and per share data)

the Company owns more than 25% of the voting securities of such company or has rights to maintain greater than 50% of the board representation. Under the 1940 Act, Affiliate Investments are defined as investments in those companies where the Company owns between 5% and 25% of the voting securities of such company.

Non-Control/Non-Affiliate Investments are those that neither qualify as Control Investments nor Affiliate Investments.

Segments: In accordance with ASC Topic 280 Segment Reporting, the Company has determined that it has a single reporting segment and operating unit structure.

Cash and cash equivalents: Cash and cash equivalents are highly liquid investments with an original maturity of three months or less at the date of acquisition. The Company places its cash in financial institutions and, at times, such balances may be in excess of the Federal Deposit Insurance Corporation insurance limits. The Company does not believe its cash balances are exposed to any significant credit risk.

Deferred financing costs: Deferred financing costs consist of fees and expenses paid in connection with the Credit Facility (as defined in Note 6) and SBA debentures. Deferred financing costs are capitalized and amortized over the term of the debt agreement using the effective interest method. Unamortized deferred financing costs are presented as an offset to the corresponding debt liabilities on the consolidated statements of assets and liabilities.

Deferred equity offering costs: Deferred equity offering costs include registration expenses related to shelf filings, including expenses related to the launch of the ATM Program. These expenses primarily consist of Securities and Exchange Commission (SEC) registration fees, legal fees and accounting fees incurred. These expenses are included in prepaid assets and are charged to additional paid in capital upon the receipt of proceeds from an equity offering or charged to expense if no offering is completed.

Realized gains or losses and unrealized appreciation or depreciation on investments: Realized gains or losses on investments are recorded upon the sale or disposition of a portfolio investment and are calculated as the difference between the net proceeds from the sale or disposition and the cost basis of the investment, without regard to unrealized appreciation or depreciation previously recognized. Net change in unrealized appreciation or depreciation on the consolidated statements of operations includes changes in the fair value of investments from the prior period, as determined in good faith by the Company s board of directors (the Board) through the application of the Company s valuation policy, as well as reclassifications of any prior period unrealized appreciation or depreciation on exited investments to realized gains or losses on investments.

Interest and dividend income: Interest and dividend income is recorded on the accrual basis to the extent that the Company expects to collect such amounts. Interest is accrued daily based on the outstanding principal amount and the contractual terms of the debt. Dividend income is recorded as dividends are declared or at the point an obligation exists for the portfolio company to make a distribution, and is generally recognized when received. Distributions from portfolio companies are evaluated to determine if the distribution is a distribution of earnings or a return of capital. Distributions of earnings are included in dividend income while a return of capital is recorded as a reduction in the

cost basis of the investment. Estimates are adjusted as necessary when the relevant tax forms are received from the portfolio company.

Certain of the Company s investments contain a payment-in-kind (PIK) income provision. The PIK income, computed at the contractual rate specified in the applicable investment agreement, is added to the principal balance of the investment, rather than being paid in cash, and recorded as interest or dividend income, as applicable, on the consolidated statements of operations. Generally, PIK can be paid-in-kind or all in cash. The

SF-22

FIDUS INVESTMENT CORPORATION

Notes to Consolidated Financial Statements (unaudited)

(In thousands, except shares and per share data)

Company stops accruing PIK income when there is reasonable doubt that PIK income will be collected. PIK income is included in the Company s taxable income and, therefore, affects the amount the Company is required to pay to shareholders in the form of dividends in order to maintain the Company s tax treatment as a RIC and to avoid corporate federal income tax, even though the Company has not yet collected the cash.

When there is reasonable doubt that principal, interest or dividends will be collected, loans or preferred equity investments are placed on non-accrual status and the Company will generally cease recognizing interest or dividend income. Interest and dividend payments received on non-accrual investments may be recognized as interest or dividend income or may be applied to the investment principal balance based on management s judgment. Non-accrual investments are restored to accrual status when past due principal, interest or dividends are paid and, in management s judgment, payments are likely to remain current.

Fee income: Transaction fees earned in connection with the Company s investments are recognized as fee income. Such fees typically include fees for services, including structuring and advisory services, provided to portfolio companies. The Company recognizes income from fees for providing such structuring and advisory services when the services are rendered or the transactions are completed. Upon the prepayment of a loan or debt security, any prepayment penalties are recorded as fee income when earned.

The Company also typically receives loan origination or closing fees in connection with investments. Such loan origination and closing fees are capitalized as unearned income and offset against investment cost basis on the consolidated statements of assets and liabilities and accreted into interest income over the life of the investment.

Warrants: In connection with the Company s debt investments, the Company will sometimes receive warrants or other equity-related securities from the borrower (Warrants). The Company determines the cost basis of Warrants based upon their respective fair values on the date of receipt in proportion to the total fair value of the debt and Warrants received. Any resulting difference between the face amount of the debt and its recorded fair value resulting from the assignment of value to the Warrants is treated as original issue discount (OID), and accreted into interest income using the effective interest method over the term of the debt investment.

Partial loan sales: The Company follows the guidance in ASC 860, *Transfers and Servicing*, when accounting for loan participations and other partial loan sales. Such guidance requires a participation or other partial loan sale to meet the definition of a participating interest, as defined in the guidance, in order for sale treatment to be allowed. Participations or other partial loan sales which do not meet the definition of a participating interest should remain on the Company s consolidated statement of assets and liabilities and the proceeds recorded as a secured borrowing until the definition is met. Management has determined that all participations and other partial loan sale transactions entered into by the Company have met the definition of a participating interest. Accordingly, the Company uses sale treatment in accounting for such transactions.

Income taxes: The Company has elected to be treated as a RIC under Subchapter M of the Code, which will generally relieve the Company from U.S. federal income taxes with respect to all income distributed to stockholders. To

maintain the tax treatment of a RIC, the Company is required to timely distribute to its stockholders at least 90.0% of investment company taxable income, as defined by Subchapter M of the Code, each year. Depending on the level of taxable income earned in a tax year, the Company may choose to carry forward taxable income in excess of current year distributions into the next tax year; however, the Company will pay a 4.0% excise tax if it does not distribute at least 98.0% of the current year s ordinary taxable income. Any such carryover taxable income must be distributed through a dividend declared prior to the later of the date on which the final tax return related to the year in which the Company generated such taxable income is filed or the

SF-23

FIDUS INVESTMENT CORPORATION

Notes to Consolidated Financial Statements (unaudited)

(In thousands, except shares and per share data)

15th day of the 9th month following the close of such taxable year. In addition, the Company will be subject to federal excise tax if it does not distribute at least 98.2% of its net capital gains realized, computed for any one year period ending October 31.

In the future, the Funds may be limited by provisions of the SBIC Act and SBA regulations governing SBICs from making certain distributions to FIC that may be necessary to enable FIC to make the minimum distributions required to maintain the tax treatment of a RIC.

The Company has certain wholly-owned taxable subsidiaries (the Taxable Subsidiaries), each of which generally holds one or more of the Company is portfolio investments listed on the consolidated schedules of investments. The Taxable Subsidiaries are consolidated for financial reporting purposes, such that the Company is consolidated financial statements reflect the Company is investment in the portfolio companies that is owned by the Taxable Subsidiaries. The purpose of the Taxable Subsidiaries is to permit the Company to hold equity investments in portfolio companies that are taxed as partnerships for U.S. federal income tax purposes (such as entities organized as limited liability companies (LLCs) or other forms of pass through entities) while complying with the source-of-income requirements contained in the RIC tax provisions. The Taxable Subsidiaries are not consolidated with the Company for U.S. federal corporate income tax purposes, and each Taxable Subsidiary will be subject to U.S. federal corporate income tax on its taxable income. Any such income or expense is reflected in the consolidated statements of operations.

U.S. federal income tax regulations differ from GAAP, and as a result, distributions in accordance with tax regulations may differ from net investment income and realized gains recognized under GAAP. Differences may be permanent or temporary. Permanent differences may arise as a result of, among other items, a difference in the book and tax basis of certain assets and nondeductible federal income taxes. Temporary differences arise when certain items of income, expense, gain or loss are recognized at some time in the future.

ASC Topic 740 Accounting for Uncertainty in Income Taxes (ASC Topic 740) provides guidance for how uncertain tax positions should be recognized, measured, presented and disclosed in the consolidated financial statements. ASC Topic 740 requires the evaluation of tax positions taken in the course of preparing the Company s tax returns to determine whether the tax positions are more-likely-than-not to be respected by the applicable tax authorities. Tax benefits of positions not deemed to meet the more-likely-than-not threshold would be recorded as a tax expense in the current year. It is the Company s policy to recognize accrued interest and penalties related to uncertain tax benefits in the income tax provision, if any. There were no material uncertain income tax positions at September 30, 2017 and December 31, 2016. The Company s tax returns are generally subject to examination by U.S. federal and most state tax authorities for a period of three years from the date the respective returns are filed, and, accordingly, the Company s 2014 through 2016 tax years remain subject to examination.

Distributions to stockholders: Distributions to stockholders are recorded on the record date with respect to such distributions. The amount, if any, to be distributed to stockholders, is determined by the Board each quarter and is generally based upon the earnings estimated by management. Net realized capital gains, if any, may be distributed at least annually, although the Company may decide to retain such capital gains for investment.

The determination of the tax attributes for the Company s distributions is made annually, and is based upon the Company s taxable income and distributions paid to its stockholders for the full year. Ordinary dividend distributions from a RIC do not qualify for the preferential tax rate on qualified dividend income from domestic corporations and qualified foreign corporations, except to the extent that the RIC received the income in the form of qualifying dividends from domestic corporations and qualified foreign corporations. The tax characterization

SF-24

FIDUS INVESTMENT CORPORATION

Notes to Consolidated Financial Statements (unaudited)

(In thousands, except shares and per share data)

of the Company s distributions generally includes both ordinary income and capital gains but may also include qualified dividends or return of capital.

The Company has adopted a dividend reinvestment plan (DRIP) that provides for the reinvestment of dividends on behalf of its stockholders, unless a stockholder has elected to receive dividends in cash. As a result, if the Company declares a cash dividend, the Company s stockholders who have not opted out of the DRIP at least three days prior to the dividend payment date will have their cash dividend automatically reinvested into additional shares of the Company s common stock. The Company has the option to satisfy the share requirements of the DRIP through the issuance of new shares of common stock or through open market purchases of common stock by the DRIP plan administrator. Newly issued shares are valued based upon the final closing price of the Company s common stock on a date determined by the Board. Shares purchased in the open market to satisfy the DRIP requirements will be valued based upon the average price of the applicable shares purchased by the DRIP plan administrator before any associated brokerage or other costs. See Note 9 to the consolidated financial statements regarding dividend declarations and distributions.

Earnings and net asset value per share: The earnings per share calculations for the three and nine months ended September 30, 2017 and 2016, are computed utilizing the weighted average shares outstanding for the period. Net asset value per share is calculated using the number of shares outstanding as of the end of the period.

Stock repurchase plan: The Company has an open market stock repurchase program (the Program) under which the Company may acquire up to \$5.0 million of its outstanding common stock. Under the Program, the Company may, but is not obligated to, repurchase outstanding common stock in the open market from time to time provided that the Company complies with the prohibitions under its insider trading policies and the requirements of Rule 10b-18 of the Securities Exchange Act of 1934, as amended, including certain price, market value and timing constraints. The timing, manner, price and amount of any share repurchases will be determined by the Company s management, in its discretion, based upon the evaluation of economic and market conditions, stock price, capital availability, applicable legal and regulatory requirements and other corporate considerations. On October 30, 2017, the Board extended the Program through December 31, 2018, or until the approved dollar amount has been used to repurchase shares. The Program does not require the Company to repurchase any specific number of shares and the Company cannot assure that any shares will be repurchased under the Program. The Program may be suspended, extended, modified or discontinued at any time. The Company did not make any repurchases of common stock during the three and nine months ended September 30, 2017 or 2016.

Recent accounting pronouncements: In May 2014, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) 2014-09, Revenue from Contracts with Customers (Topic 606), which supersedes the revenue recognition requirements in Revenue Recognition (Topic 605). Under the new guidance, an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. The guidance is effective for annual and interim reporting periods beginning after December 15, 2017. The Company completed its evaluation of the impact of this ASU and concluded that the majority of its income streams are

specifically excluded from the scope of the ASU as they relate to financial instruments that are within the scope of other topics, and in general the impact of the ASU is not material to the Company s consolidated financial position or disclosures.

In October 2016, the SEC adopted new rules and amended rules to Regulation S-X (collectively, the Reporting Rules) intended to modernize the reporting and disclosures of information by BDCs. The adopted amendments to Regulation S-X include an update to the disclosures for investments in and advances to affiliates, presentation changes to the statement of operations and schedule of investments, and the requirement to include a

SF-25

FIDUS INVESTMENT CORPORATION

Notes to Consolidated Financial Statements (unaudited)

(In thousands, except shares and per share data)

standardized schedule containing detailed information about derivative investments (among other changes). The amendments to Regulation S-X are effective for reporting periods ending after August 1, 2017. The Company adopted the Reporting Rules effective August 1, 2017. The amendments do not have a material effect on the Company s consolidated financial position or disclosures.

Note 3. Portfolio Company Investments

The Company s portfolio investments principally consist of secured and unsecured debt, equity warrants and direct equity investments in privately held companies. The debt investments may or may not be secured by either a first or second lien on the assets of the portfolio company. The debt investments generally bear interest at fixed rates, and generally mature between five and seven years from the original investment. In connection with a debt investment, the Company also may receive nominally priced equity warrants and/or make a direct equity investment in the portfolio company. The Company s warrants or equity investments may be investments in a holding company related to the portfolio company. In addition, the Company periodically makes equity investments in its portfolio companies through Taxable Subsidiaries. In both situations, the investment is generally reported under the name of the operating company on the consolidated schedules of investments.

As of September 30, 2017, the Company had active investments in 58 portfolio companies and residual investments in five portfolio companies that have sold their underlying operations. The aggregate fair value of the total portfolio was \$560,909 and the weighted average effective yield on the Company s debt investments was 13.3% as of such date. As of September 30, 2017, the Company held equity investments in 87.3% of its portfolio companies and the average fully diluted equity ownership in those portfolio companies was 6.8%.

As of December 31, 2016, the Company had active investments in 53 portfolio companies and residual investments in four portfolio companies that have sold their underlying operations. The aggregate fair value of the total portfolio was \$524,454 and the weighted average effective yield on the Company s debt investments was 13.1% as of such date. As of December 31, 2016, the Company held equity investments in 86.0% of its portfolio companies and the average fully diluted equity ownership in those portfolio companies was 7.3%.

The weighted average yield of the Company s debt investments is not the same as a return on investment for its stockholders but, rather, relates to a portion of the Company s investment portfolio and is calculated before the payment of all of the Company s and its subsidiaries fees and expenses. The weighted average yields were computed using the effective interest rates for debt investments at cost as of September 30, 2017 and December 31, 2016, including accretion of original issue discount and loan origination fees, but excluding investments on non-accrual status, if any.

Purchases of debt and equity investments for the nine months ended September 30, 2017 and 2016, totaled \$155,577 and \$104,379, respectively. Proceeds from sales and repayments, including principal, return of capital distributions and realized gains, of portfolio investments for the nine months ended September 30, 2017 and 2016 totaled \$132,724 and \$91,936, respectively.

As of September 30, 2017 and December 31, 2016, the Company had no portfolio company investments that represented more than 10% of the total investment portfolio on a fair value or cost basis. As of September 30, 2017, the Company had debt investments in one portfolio company on non-accrual status, which had an aggregate cost and fair value of \$9,314 and \$4,240, respectively. As of December 31, 2016, there were no investments on non-accrual status.

Note 4. Fair Value Measurements

Investments

The Board has established and documented processes and methodologies for determining the fair values of portfolio company investments on a recurring basis in accordance with ASC Topic 820 and consistent with the requirements of the 1940 Act. Fair value is the price, determined at the measurement date, that would be received in the sale of an asset or paid to transfer a liability in an orderly transaction between market participants. Where available, fair value is based on observable market prices or parameters, or derived from such prices or parameters. Where observable prices or inputs are not available or reliable, valuation techniques described below are applied. Under ASC Topic 820, portfolio investments recorded at fair value in the consolidated financial statements are classified within the fair value hierarchy based upon the level of judgment associated with the inputs used to measure their value, as defined below:

Level 1 Inputs are unadjusted, quoted prices in active markets for identical assets as of the measurement date.

Level 2 Inputs include quoted prices for similar assets in active markets, or that are quoted prices for identical or similar assets in markets that are not active and inputs that are observable, either directly or indirectly, for substantially the full term, if applicable, of the investment.

Level 3 Inputs include those that are both unobservable and significant to the overall fair value measurement.

An investment s categorization within the valuation hierarchy is based upon the lowest level of input that is significant to the fair value measurement. The Company s investment portfolio is comprised entirely of debt and equity securities of privately held companies for which quoted prices falling within the categories of Level 1 and Level 2 inputs are not available. Therefore, the Company values all of its portfolio investments at fair value, as determined in good faith by the Board, using Level 3 inputs. The degree of judgment exercised by the Board in determining fair value is greatest for investments classified as Level 3 inputs. Due to the inherent uncertainty of determining the fair values of investments that do not have readily available market values, the Board's estimate of fair values may differ significantly from the values that would have been used had a ready market for the securities existed, and those differences may be material. In addition, changes in the market environment, portfolio company performance and other events that may occur over the lives of the investments may cause the amounts ultimately realized on these investments to be materially different than the valuations currently assigned.

With respect to investments for which market quotations are not readily available, the Board undertakes a multi-step valuation process each quarter, as described below:

the quarterly valuation process begins with each portfolio company or investment being initially evaluated and rated by the investment professionals of the Investment Advisor responsible for the portfolio investment;

preliminary valuation conclusions are then documented and discussed with the investment committee of the Investment Advisor;

the Board engages one or more independent valuation firm(s) to conduct independent appraisals of a selection of our portfolio investments for which market quotations are not readily available. Each portfolio company investment is generally appraised by the valuation firm(s) at least once every calendar year and each new portfolio company investment is appraised at least once in the twelve-

SF-29

FIDUS INVESTMENT CORPORATION

Notes to Consolidated Financial Statements (unaudited)

(In thousands, except shares and per share data)

month period following the initial investment. In certain instances, the Company may determine that it is not cost-effective, and as a result it is not in the Company's stockholders' best interest, to request the independent appraisal of certain portfolio company investments. Such instances include, but are not limited to, situations where the Company determines that the fair value of the portfolio company investment is relatively insignificant to the fair value of the total portfolio. The Board consulted with the independent valuation firm(s) in arriving at the Company's determination of fair value for 14 and 13 of its portfolio company investments representing 28.4% and 30.5% of the total portfolio investments at fair value (exclusive of new portfolio company investments made during the three months ended September 30, 2017 and December 31, 2016, respectively) as of September 30, 2017 and December 31, 2016, respectively.

the audit committee of the Board reviews the preliminary valuations of the Investment Advisor and of the independent valuation firm(s) and responds and supplements the valuation recommendations to reflect any comments; and

the Board discusses these valuations and determines the fair value of each investment in our portfolio in good faith, based on the input of the Investment Advisor, the independent valuation firm(s) and the audit committee.

In making the good faith determination of the value of portfolio investments, the Board starts with the cost basis of the security. The transaction price is typically the best estimate of fair value at inception. When evidence supports a subsequent change to the carrying value from the original transaction price, adjustments are made to reflect the expected exit values.

Consistent with the policies and methodologies adopted by the Board, the Company performs detailed valuations of its debt and equity investments, including an analysis on the Company s unfunded loan commitments, using both the market and income approaches as appropriate. Under the market approach, the Company typically uses the enterprise value methodology to determine the fair value of an investment. There is no one methodology to estimate enterprise value and, in fact, for any one portfolio company, enterprise value is generally best expressed as a range of values, from which the Company derives a single estimate of enterprise value. Under the income approach, the Company typically prepares and analyzes discounted cash flow models to estimate the present value of future cash flows of either an individual debt investment or of the underlying portfolio company itself.

The Company evaluates investments in portfolio companies using the most recent portfolio company financial statements and forecasts. The Company also consults with the portfolio company s senior management to obtain further updates on the portfolio company s performance, including information such as industry trends, new product development and other operational issues.

For the Company s debt investments, including senior secured loans and subordinated notes, the primary valuation technique used to estimate the fair value is the discounted cash flow method. However, if there is deterioration in

credit quality or a debt investment is in workout status, the Company may consider other methods in determining the fair value, including the value attributable to the debt investment from the enterprise value of the portfolio company or the proceeds that would be received in a liquidation analysis. The Company s discounted cash flow models estimate a range of fair values by applying an appropriate discount rate to the future cash flow streams of its debt investments, based on future interest and principal payments as set forth in the associated loan agreements. The Company prepares a weighted average cost of capital for use in the discounted cash flow model for each investment, based on factors including, but not limited to: current pricing and credit metrics for similar proposed or executed investment transactions of private companies; the portfolio company s

SF-30

FIDUS INVESTMENT CORPORATION

Notes to Consolidated Financial Statements (unaudited)

(In thousands, except shares and per share data)

historical financial results and outlook; and the portfolio company s current leverage and credit quality as compared to leverage and credit quality as of the date the investment was made. The Company may also consider the following factors when determining the fair value of debt investments: the portfolio company s ability to make future scheduled payments; prepayment penalties and other fees; estimated remaining life; the nature and realizable value of any collateral securing such debt investment; and changes in the interest rate environment and the credit markets that generally may affect the price at which similar investments may be made. The Company estimates the remaining life of its debt investments to generally be the legal maturity date of the instrument, as the Company generally intends to hold its loans to maturity. However, if the Company has information available to it that the loan is expected to be repaid in the near term, it would use an estimated remaining life based on the expected repayment date.

For the Company s equity investments, including equity and warrants, the Company generally uses a market approach, including valuation methodologies consistent with industry practice, to estimate the enterprise value of portfolio companies. Typically, the enterprise value of a private company is based on multiples of EBITDA, net income, revenues, or in limited cases, book value. In estimating the enterprise value of a portfolio company, the Company analyzes various factors consistent with industry practice, including but not limited to original transaction multiples, the portfolio company s historical and projected financial results, applicable market trading and transaction comparables, applicable market yields and leverage levels, the nature and realizable value of any collateral, the markets in which the portfolio company does business, and comparisons of financial ratios of peer companies that are public. Where applicable, the Company considers the Company s ability to influence the capital structure of the portfolio company, as well as the timing of a potential exit.

The Company may also utilize an income approach when estimating the fair value of its equity securities, either as a primary methodology if consistent with industry practice or if the market approach is otherwise not applicable, or as a supporting methodology to corroborate the fair value ranges determined by the market approach. The Company typically prepares and analyzes discounted cash flow models based on projections of the future free cash flows (or earnings) of the portfolio company. The Company considers various factors, including but not limited to the portfolio company s projected financial results, applicable market trading and transaction comparables, applicable market yields and leverage levels, the markets in which the portfolio company does business, and comparisons of financial ratios of peer companies that are public.

The fair value of the Company s royalty rights are calculated based on projected future cash flows and the specific provisions contained in the pertinent agreements. The determination of the fair value of such royalty rights is not a significant component of the Company s valuation process.

The Company reviews the fair value hierarchy classifications on a quarterly basis. Reclassifications impacting Level 3 of the fair value hierarchy are reported as transfers in or out of the Level 3 category as of the beginning of the quarter in which the reclassifications occur. There were no transfers among Levels 1, 2, and 3 during the nine months ended September 30, 2017 and 2016.

The significant unobservable input used in determining the fair value under the discounted cash flow technique is the weighted average cost of capital of each security. Significant increases (or decreases) in this input would likely result in significantly lower (or higher) fair value estimates.

The significant unobservable inputs used in determining fair value under the enterprise value technique are revenue and EBITDA multiples, as well as asset coverage. Significant increases (or decreases) in these inputs could result in significantly higher (or lower) fair value estimates.

SF-33

FIDUS INVESTMENT CORPORATION

Notes to Consolidated Financial Statements (unaudited)

(In thousands, except shares and per share data)

Other Financial Assets and Liabilities

ASC Topic 820 requires disclosure of the fair value of financial instruments for which it is practical to estimate such value. The Company believes that the carrying amounts of its other financial instruments such as cash and cash equivalents, interest receivable and accounts payable and other liabilities approximate the fair value of such items due to the short maturity of such instruments. The fair value of borrowings under the Credit Facility (as defined in Note 6) are based on a market yield approach and current interest rates, which are Level 3 inputs to the market yield model. There were no borrowings outstanding under the Credit Facility as of September 30, 2017 and December 31, 2016. The fair value of SBA debentures is estimated by discounting remaining payments using current market rates for similar instruments and considering such factors as the legal maturity date and the ability of market participants to prepay the debentures. As of September 30, 2017 and December 31, 2016, the fair value of the Company s SBA debentures using Level 3 inputs is estimated to be \$216,300 and \$224,000, respectively, which is the same as the Company s carrying value of the debentures.

Note 5. Related Party Transactions

Investment Advisory Agreement: The Company has entered into an Investment Advisory Agreement with the Investment Advisor. On June 1, 2017, the Board approved the renewal of the Investment Advisory Agreement through June 20, 2018. Pursuant to the Investment Advisory Agreement and subject to the overall supervision of the Board, the Investment Advisor provides investment advisory services to the Company. For providing these services, the Investment Advisor receives a fee, consisting of two components a base management fee and an incentive fee.

The base management fee is calculated at an annual rate of 1.75% based on the average value of total assets (other than cash or cash equivalents but including assets purchased with borrowed amounts) at the end of the two most recently completed calendar quarters. The base management fee is payable quarterly in arrears. The base management fee under the Investment Advisory Agreement was \$2,486 and \$7,202, for the three and nine months ended September 30, 2017, respectively, and \$2,055 and \$6,043, for the three and nine months ended September 30, 2016, respectively.

The incentive fee consists of two parts. The first part is calculated and payable quarterly in arrears based on the Company s pre-incentive fee net investment income for the quarter. Pre-incentive fee net investment income means interest income, dividend income and any other income (including any other fees such as commitment, origination, structuring, diligence and consulting fees or other fees that the Company receives from portfolio companies but excluding fees for providing managerial assistance) accrued during the calendar quarter, minus operating expenses for the quarter (including the base management fee, any expenses payable under the Administration Agreement (defined below) and any interest expense and dividends paid on any outstanding preferred stock, but excluding the incentive fee and excise taxes on realized gains). Pre-incentive fee net investment income includes, in the case of investments with a deferred interest feature (such as market discount, debt instruments with payment-in-kind income, preferred stock with PIK dividends and zero-coupon securities), accrued income the Company has not yet received in cash. The Investment Advisor is not under any obligation to reimburse the Company for any part of the incentive fee it receives that was based on accrued interest that the Company never collects.

Pre-incentive fee net investment income does not include any realized capital gains, taxes associated with such realized capital gains, realized capital losses or unrealized capital appreciation or depreciation. Because of the structure of the incentive fee, it is possible that the Company may pay an incentive fee in a quarter where the Company incurs a loss. For example, if the Company generates pre-incentive fee net investment income in excess of the hurdle rate (as defined below) for a quarter, the Company will pay the applicable incentive fee even if the Company has incurred a loss in that quarter due to a net loss on investments.

SF-34

FIDUS INVESTMENT CORPORATION

Notes to Consolidated Financial Statements (unaudited)

(In thousands, except shares and per share data)

Pre-incentive fee net investment income, expressed as a rate of return on the value of the Company s weighted average net assets (defined as total assets less indebtedness and before taking into account any incentive fees payable during the period) at the end of the immediately preceding calendar quarter, is compared to a fixed hurdle rate of 2.0% per quarter. If market interest rates rise, the Company may be able to invest funds in debt instruments that provide for a higher return, which would increase the Company s pre-incentive fee net investment income and make it easier for the Investment Advisor to surpass the fixed hurdle rate and receive an incentive fee based on such net investment income.

The Company pays the Investment Advisor an incentive fee with respect to pre-incentive fee net investment income in each calendar quarter as follows:

no incentive fee in any calendar quarter in which the pre-incentive fee net investment income does not exceed the hurdle rate of 2.0%;

100.0% of the Company s pre-incentive fee net investment income with respect to that portion of such pre-incentive fee net investment income, if any, that exceeds the hurdle rate but is less than 2.5% in any calendar quarter. This portion of the pre-incentive fee net investment income (which exceeds the hurdle rate but is less than 2.5%) is referred to as the catch-up provision. The catch-up is meant to provide the Investment Advisor with 20.0% of the pre-incentive fee net investment income as if a hurdle rate did not apply if this net investment income exceeds 2.5% in any calendar quarter; and

20.0% of the amount of the Company s pre-incentive fee net investment income, if any, that exceeds 2.5% in any calendar quarter.

The sum of the calculations above equals the income incentive fee. The income incentive fee is appropriately prorated for any period of less than three months and adjusted for any share issuances or repurchases during the calendar quarter. The income incentive fee was \$2,435 and \$6,759, for the three and nine months ended September 30, 2017, respectively, and \$1,770 and \$5,178, for the three and nine months ended September 30, 2016, respectively.

The second part of the incentive fee is a capital gains incentive fee that is determined and paid in arrears as of the end of each fiscal year (or upon termination of the Investment Advisory Agreement, as of the termination date), and equals 20.0% of the net capital gains as of the end of the fiscal year. In determining the capital gains incentive fee to be paid to the Investment Advisor, the Company calculates the cumulative aggregate realized capital gains and cumulative aggregate realized capital losses since the Formation Transactions, and the aggregate unrealized capital depreciation as of the date of the calculation, as applicable, with respect to each of the investments in the Company s portfolio. At the end of the applicable year, the amount of capital gains that serves as the basis for the calculation of the capital gains incentive fee to be paid equals the cumulative aggregate realized capital gains less cumulative aggregate realized capital losses, less aggregate unrealized capital depreciation, with respect to the Company s portfolio of investments. If

this number is positive at the end of such year, then the capital gains incentive fee to be paid for such year equals 20.0% of such amount, less the aggregate amount of any capital gains incentive fees paid in all prior years. As of September 30, 2017 and December 31, 2016, the capital gains incentive fee payable was \$0. The aggregate amount of capital gains incentive fees paid from the IPO through September 30, 2017 was \$348.

In addition, the Company accrues, but does not pay, a capital gains incentive fee in connection with any unrealized capital appreciation, as appropriate. If, on a cumulative basis, the sum of net realized gains/(losses) plus net unrealized appreciation/(depreciation) decreases during a period, the Company will reverse any excess capital gains incentive fee previously accrued such that the amount of capital gains incentive fee accrued is no more than 20.0% of the sum of net realized gains/(losses) plus net unrealized appreciation/(depreciation). The

SF-35

FIDUS INVESTMENT CORPORATION

Notes to Consolidated Financial Statements (unaudited)

(In thousands, except shares and per share data)

capital gains incentive fee accrued was \$573 and \$1,111, for the three and nine months ended September 30, 2017, respectively, and \$372 and \$2,034, for the three and nine months ended September 30, 2016, respectively.

The sum of the income incentive fee and the capital gains incentive fee is the incentive fee and is reported in the consolidated statements of operations. Accrued management fees, income incentive fees and capital gains incentive fees are reported in the management and incentive fees payable due to affiliate line in the consolidated statements of assets and liabilities.

Unless terminated earlier as described below, the Investment Advisory Agreement will continue in effect from year to year if approved annually by the Board or by the affirmative vote of the holders of a majority of the Company s outstanding voting securities, and, in either case, if also approved by a majority of the Independent Directors. The Investment Advisory Agreement automatically terminates in the event of its assignment, as defined in the 1940 Act, by the Investment Advisor and may be terminated by either party without penalty upon not less than 60 days written notice to the other. The holders of a majority of the Company s outstanding voting securities may also terminate the Investment Advisory Agreement without penalty.

Administration Agreement: The Company has also entered into an administration agreement (the Administration Agreement) with the Investment Advisor. On June 1, 2017, the Board approved the renewal of the Administration Agreement through June 20, 2018. Under the Administration Agreement, the Investment Advisor furnishes the Company with office facilities and equipment, provides clerical, bookkeeping, and record keeping services at such facilities and provides the Company with other administrative services necessary to conduct its day-to-day operations. The Company reimburses the Investment Advisor for the allocable portion of overhead expenses incurred in performing its obligations under the Administration Agreement, including rent and the Company is allocable portion of the cost of its chief financial officer and chief compliance officer and their respective staffs. Under the Administration Agreement, the Investment Advisor also provides managerial assistance to those portfolio companies to which the Company is required to provide such assistance and the Company reimburses the Investment Advisor for fees and expenses incurred with providing such services. In addition, the Company reimburses the Investment Advisor for fees and expenses incurred while performing due diligence on the Company is prospective portfolio companies, including dead deal expenses. Under the Administration Agreement, administrative service expenses were \$318 and \$1,009, for the three and nine months ended September 30, 2016, respectively.

Note 6. Debt

Revolving Credit Facility: On June 16, 2014, FIC entered into a senior secured revolving credit agreement (the Credit Facility) with ING Capital LLC (ING), as the administrative agent, collateral agent, and lender. The Credit Facility has a commitment of \$50,000 with an accordion feature that allows for an increase in the total commitments up to \$75,000, subject to certain conditions and the satisfaction of specified financial covenants. The Credit Facility is secured by certain portfolio investments held by the Company, but portfolio investments held by the Funds are not collateral for the Credit Facility. The stated maturity date for the Credit Facility is June 16, 2018, which may be

extended by mutual agreement.

Amounts available to borrow under the Credit Facility are subject to a minimum borrowing/collateral base that applies an advance rate to certain investments held by the Company, excluding investments held by the Funds. The Company is subject to limitations with respect to the investments securing the Credit Facility, including, but not limited to, restrictions on sector concentrations, loan size, payment frequency and status and collateral interests, as well as restrictions on portfolio company leverage, which may also affect the borrowing base and therefore amounts available to borrow.

SF-36

FIDUS INVESTMENT CORPORATION

Notes to Consolidated Financial Statements (unaudited)

(In thousands, except shares and per share data)

Borrowings under the Credit Facility bear interest, subject to the Company s election, on a per annum basis equal to (i) the alternate base rate plus 2.5% or (ii) the applicable London Interbank Offered Rate, or LIBOR, which varies depending on the period of the borrowing under the Credit Facility, plus 3.5%. The alternate base rate is equal to the greater of (i) prime rate, (ii) the federal funds rate plus 0.5% or (iii) the three-month LIBOR plus 1.0%. The Company pays a commitment fee between 0.5% and 1.0% per annum based on the size of the unused portion of the Credit Facility.

The Company has made customary representations and warranties and is required to comply with various covenants, reporting requirements and other customary requirements for similar credit facilities. These covenants are subject to important limitations and exceptions that are described in the documents governing the Credit Facility. As of September 30, 2017 and December 31, 2016, the Company was in compliance in all material respect with the terms of the Credit Facility.

As of September 30, 2017 and December 31, 2016, the Company had no outstanding borrowings under the Credit Facility. Interest and fees related to the Credit Facility were \$128 and \$390, for the three and nine months ended September 30, 2017, respectively, and \$128 and \$490, for the three and nine months ended September 30, 2016, respectively, which are included in interest and financing expenses on the consolidated statements of operations. As of September 30, 2017 and December 31, 2016, accrued interest and fees payable related to the Credit Facility totaled zero and \$127, respectively.

SBA debentures: The Company uses debenture leverage provided through the SBA to fund a portion of its investment purchases.

Under the SBA debenture program, the SBA commits to purchase debentures issued by SBICs; such debentures have 10-year terms with the entire principal balance due at maturity and are guaranteed by the SBA. Approved SBA debenture commitments that were unused as of September 30, 2017 and December 31, 2016 were \$42,000 and \$51,000, respectively. The SBA may limit the amount that may be drawn each year under these commitments, and each issuance of leverage is conditioned on the Company s full compliance, as determined by the SBA, with the terms and conditions set forth in the SBIC Act.

(In thousands, except shares and per share data)

Deferred Financing Costs

Deferred financing costs are amortized into interest and financing expenses on the consolidated statements of operations using the effective interest method, over the term of the respective financing instrument. Deferred financing cost amortization was \$332 and \$957, for the three and nine months ended September 30, 2017, respectively, and \$277 and \$824, for the three and nine months ended September 30, 2016, respectively. Deferred financing costs related to the Credit Facility and SBA debentures as of September 30, 2017 and December 31, 2016, were as follows:

	Sept	ember 30, 2	2017	December 31, 2016			
	SBA	Credit		SBA	Credit		
	debentures	Facility	Total	debentures	Facility	Total	
SBA debenture commitment fees	\$ 3,000	\$	\$ 3,000	\$ 2,750	\$	\$ 2,750	
SBA debenture leverage fees	6,257		6,257	5,433		5,433	
Credit Facility upfront fees		1,329	1,329		1,284	1,284	
· -							
Total deferred financing costs	9,257	1,329	10,586	8,183	1,284	9,467	
Less: accumulated amortization	(4,780)	(1,083)	(5,863)	(4,084)	(822)	(4,906)	
Unamortized deferred financing costs	\$ 4,477	\$ 246	\$ 4,723	\$ 4,099	\$ 462	\$ 4,561	

Unamortized deferred financing costs are presented as a direct offset to the SBA debentures and Credit Facility liabilities on the consolidated statements of assets and liabilities. The following table summarizes the outstanding debt net of unamortized deferred financing costs as of September 30, 2017 and December 31, 2016:

	Septe	ember 30, 2	2017	December 31, 2016			
	SBA	Credit		SBA	Credit		
	debentures	Facility	Total	debentures	Facility	Total	
Outstanding debt	\$216,300	\$	\$216,300	\$ 224,000	\$	\$ 224,000	
Less: unamortized deferred financing costs	(4,477)	(246)	(4,723)	(4,099)	(462)	(4,561)	
Debt, net of deferred financing costs	\$ 211,823	\$ (246)	\$211,577	\$219,901	\$ (462)	\$219,439	

The weighted average interest rate for all SBA debentures and borrowings outstanding under the Credit Facility as of September 30, 2017 and December 31, 2016 was 3.6% and 4.1%, respectively.

SF-39

FIDUS INVESTMENT CORPORATION

Notes to Consolidated Financial Statements (unaudited)

(In thousands, except shares and per share data)

Note 7. Commitments and Contingencies

Commitments: The Company had outstanding commitments to portfolio companies to fund various undrawn revolving loans, other credit facilities and capital commitments totaling \$4,602 and \$6,566 as of September 30, 2017 and December 31, 2016, respectively. Such outstanding commitments are summarized in the following table:

	Septemb	er 30, 2017	December 31, 2016				
	Total	Unfunded	Total	Unfunded			
Portfolio Company - Investment	Commitment	Commitment	Commitment	Commitment			
FAR Research Inc. Revolving Loan	\$	\$	\$ 1,750	\$ 1,614			
Inflexxion, Inc. Revolving Loan	500	250	500	350			
inthinc Technology Solutions, Inc.							
Subordinated Note			5,000	1,000			
Lightning Diversion Systems, LLC							
Revolving Loan			250	250			
Oaktree Medical Centre, P.C. Revolving							
Loan	2,500		2,500				
Rhino Assembly Company, LLC Delayed							
Draw Commitment	1,500	1,500					
Safety Products Group, LLC Common							
Equity	2,852	2,852	2,852	2,852			
SES Investors, LLC Revolving Loan			1,500	500			
Total	\$7,352	\$ 4,602	\$ 14,352	\$ 6,566			

Additional detail for each of the commitments above is provided in the Company s consolidated schedules of investments.

The commitments are generally subject to the borrowers meeting certain criteria such as compliance with financial and nonfinancial covenants. Since commitments may expire without being drawn upon, the total commitment amount does not necessarily represent future cash requirements.

Indemnifications: In the normal course of business, the Company enters into contracts and agreements that contain a variety of representations and warranties that provide indemnifications under certain circumstances. In addition, in connection with the disposition of an investment in a portfolio company, the Company may be required to make representations about the business and financial affairs of such portfolio company typical of those made in connection with the sale of a business. The Company may also be required to indemnify the purchasers of such investment to the extent that any such representations are inaccurate. The Company s maximum exposure under these arrangements is

unknown, as this would involve future claims that may be made against the Company that have not yet occurred. The Company expects the risk of future obligation under these indemnifications to be remote.

Legal proceedings: In the normal course of business, the Company may be subject to legal and regulatory proceedings that are generally incidental to its ongoing operations. While the outcome of these legal proceedings cannot be predicted with certainty, the Company does not believe these proceedings will have a material adverse effect on the Company s consolidated financial statements.

FIDUS INVESTMENT CORPORATION

Notes to Consolidated Financial Statements (unaudited)

(In thousands, except shares and per share data)

- (6) The net investment income to average net assets ratio is calculated using the net investment income caption as presented on the consolidated statements of operations, which includes incentive fee.
- (7) Average net assets is calculated as the average of the net asset balances as of each quarter end during the fiscal year and the prior year end.

Note 11. Subsequent Events

On October 17, 2017, the Company exited its debt and equity investments in Brook & Whittle Limited. The Company received payment in full on its subordinated notes. The Company sold its equity investments for a realized gain of approximately \$956.

On October 30, 2017, the Board declared a regular quarterly dividend of \$0.39 per share payable on December 27, 2017 to stockholders of record as of December 20, 2017. In addition, on October 30, 2017, the Board declared a special dividend of \$0.04 per share payable on December 27, 2017 to stockholders of record as of December 20, 2017.

SF-45

PROSPECTUS

\$300,000,000

Common Stock

Preferred Stock

Subscription Rights

Debt Securities

Warrants

This prospectus relates to the offer, from time to time, of up to \$300,000,000 of our common stock, preferred stock, subscription rights, debt securities, or warrants representing rights to purchase shares of our common stock, preferred stock, or debt securities, which we refer to collectively as the securities. There is \$202,485,750 of securities available for issuance under this prospectus as a result of our issuance of 2,875,000 shares of our common stock in May 2016 for a total of \$43,901,250 and our issuance of 3,220,000 shares of our common stock in November and December 2016 for a total of \$53,613,000. We may sell our common stock through underwriters or dealers, at-the-market to or through a market maker into an existing trading market or otherwise directly to one or more purchasers or through agents or through a combination of methods of sale. The identities of such underwriters, dealers, market makers or agents, as the case may be, will be described in one or more supplements to this prospectus. The securities may be offered at prices and on terms to be described in one or more supplements to this prospectus.

We may offer shares of common stock at a discount to net asset value per share in certain circumstances. On June 2, 2016, our common stockholders voted to allow us to sell or otherwise issue common stock at a price below net asset value per share for a period of one year ending on the earlier of June 2, 2017 or the date of our 2017 Annual Meeting of Stockholders. We expect to present to our stockholders a similar proposal at our 2017 Annual Meeting of Stockholders. Sales of common stock at prices below net asset value per share dilute the interests of existing stockholders, have the effect of reducing our net asset value per share and may reduce our market price per share. In addition, continuous sales of common stock below net asset value may have a negative impact on total returns and could have a negative impact on the market price of our shares of common stock. See Risk Factors on page 12 and Sales of Common Stock Below Net Asset Value on page 96 of this prospectus for more information.

Our stockholders specified that the cumulative number of shares sold in each offering during the one-year period ending on the earlier of June 2, 2017 or the date of our 2017 Annual Meeting of Stockholders may not exceed 25.0% of our outstanding common stock immediately prior to such sale. In addition, we cannot issue shares of our common stock below net asset value unless our board of directors determines that it would be in our and our stockholders best

interests to do so. Shares of closed-end investment companies such as us frequently trade at a discount to their net asset value. This risk is separate and distinct from the risk that our net asset value per share may decline. We cannot predict whether our common stock will trade above, at or below net asset value. You should read this prospectus and the applicable prospectus supplement carefully before you invest in our common stock.

We provide customized debt and equity financing solutions to lower middle-market companies located throughout the United States. We are an externally managed, closed-end, non-diversified management investment company that has elected to be regulated as a business development company under the Investment Company Act of 1940, as amended. Our investment objective is to provide attractive risk-adjusted returns by generating both current income from our debt investments and capital appreciation from our equity related investments. Our strategy includes partnering with business owners, management teams and financial sponsors by providing customized financing for ownership transactions, recapitalizations, strategic acquisitions, business expansion and other growth initiatives.

We generally invest in securities that would be rated below investment grade if they were rated. Below investment grade securities, which are often referred to as high yield or junk, have speculative characteristics with respect to our capacity to pay interest and repay principal.

Our common stock is listed on the Nasdaq Global Select Market under the symbol FDUS. On April 13, 2017, the last reported sale price of our common stock on the Nasdaq Global Select Market was \$17.65 per share and our net asset value on December 31, 2016 was \$15.76 per share.

Fidus Investment Advisors, LLC serves as our investment advisor and as our administrator.

Investing in our securities is speculative and involves numerous risks, and you could lose your entire investment if any of the risks occur. Among these risks is the risk associated with leverage and dilution. For more information regarding these risks, please see <u>Risk Factors</u> beginning on page 13.

Please read this prospectus and the accompanying prospectus supplement, if any, before investing, and keep it for future reference. It concisely sets forth important information about us that a prospective investor ought to know before investing in our securities. We file annual, quarterly and current reports, proxy statements and other information about us with the Securities and Exchange Commission. This information is available free of charge by contacting us at 1603 Orrington Avenue, Suite 1005, Evanston, Illinois 60201, Attention: Investor Relations, by accessing our website at http://www.fdus.com or by calling us collect at (847) 859-3940. Information contained on our website is not incorporated by reference into, and you should not consider that information to be part of, this prospectus or any prospectus supplement. The Securities and Exchange Commission also maintains a website at http://www.sec.gov that contains such information.

The Securities and Exchange Commission has not approved or disapproved of these securities or determined if this prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

The date of this prospectus is April 19, 2017

ABOUT THIS PROSPECTUS

This prospectus is part of a registration statement that we have filed with the Securities and Exchange Commission, or the SEC, using the shelf registration process. Under the shelf registration process, we may offer, from time to time, up to \$300,000,000 worth of our common stock, preferred stock, subscription rights, debt securities, or warrants representing rights to purchase shares of our common stock, preferred stock or debt securities on terms to be determined at the time of the offering. There is \$202,485,750 of securities available for issuance under this prospectus as a result of our issuance of 2,875,000 shares of our common stock in May 2016 for a total of \$43,901,250 and our issuance of 3,220,000 shares of our common stock in November and December 2016 for a total of \$53,613,000. This prospectus provides you with a general description of the securities that we may offer. Each time we use this

prospectus to offer securities, we will provide a prospectus supplement that will contain specific information about the terms of that offering. The prospectus supplement may also add, update or change information contained in this prospectus. To the extent required by law, we will amend or supplement the information contained in this prospectus and any accompanying prospectus supplement to reflect any material changes to such information subsequent to the date of the prospectus and any accompanying prospectus supplement and prior to the completion of any offering pursuant to the prospectus and any accompanying prospectus supplement. Please carefully read this prospectus and any accompanying

prospectus supplement together with the additional information described under Available Information and Risk Factors before you make an investment decision. During an offering, we will disclose material amendments to this prospectus through a post-effective amendment or prospectus supplement.

No dealer, salesperson or other person is authorized to give any information or to represent anything not contained in this prospectus or any accompanying supplement to this prospectus. You must not rely on any unauthorized information or representations not contained in this prospectus or any accompanying prospectus supplement as if we had authorized it. This prospectus and any accompanying prospectus supplement do not constitute an offer to sell or a solicitation of any offer to buy any security other than the registered securities to which they relate, nor do they constitute an offer to sell or a solicitation of an offer to buy any securities in any jurisdiction to any person to whom it is unlawful to make such an offer or solicitation in such jurisdiction. The information contained in this prospectus and any accompanying prospectus supplement is accurate as of the dates on their covers.

PROSPECTUS SUMMARY

This summary highlights some of the information in this prospectus. It is not complete and may not contain all of the information that you may want to consider. You should read the entire prospectus and any prospectus supplement carefully, including Risk Factors, Selected Consolidated Financial Data, Management s Discussion and Analysis of Financial Condition and Results of Operations and the financial statements contained elsewhere in this prospectus.

Fidus Investment Corporation is a Maryland corporation, formed on February 14, 2011, for the purpose of acquiring 100.0% of the equity interests in Fidus Mezzanine Capital, L.P., or Fund I, and its general partner, Fidus Mezzanine Capital GP, LLC, or FMCGP, raising capital in its initial public offering, or IPO, which was completed in June 2011, and thereafter, operating as an externally managed business development company, or BDC, under the Investment Company Act of 1940, as amended, or the 1940 Act. Fund I is licensed as a small business investment company, or SBIC, by the United States Small Business Administration, or SBA. Simultaneously with the consummation of our IPO, we acquired all of the equity interests in Fund I and its former general partner as described elsewhere in this prospectus supplement under Formation Transactions, whereby Fund I became our wholly-owned subsidiary. On March 29, 2013, we commenced operations of a second wholly-owned investment fund, Fidus Mezzanine Capital II, L.P., or Fund II, and on May 28, 2013, were granted a second license by the SBA to operate Fund II as an SBIC. Collectively, Fund I and Fund II are referred to as the Funds. Unless otherwise noted in this prospectus supplement the terms we, us, our, the Company, Fidus and FIC refer to Fidus Investment Corporation and its consolidated subsidiaries, including Fund I, for the periods after the IPO.

As used in this prospectus the term our investment advisor refers to Fidus Capital, LLC prior to the Formation Transactions and Fidus Investment Advisors, LLC after the Formation Transactions. The investment professionals of Fidus Investment Advisors, LLC were also the investment professionals of Fidus Capital, LLC.

Fidus Investment Corporation

We provide customized debt and equity financing solutions to lower middle-market companies, which we define as U.S. based companies having revenues between \$10.0 million and \$150.0 million. Our investment objective is to provide attractive risk-adjusted returns by generating both current income from our debt investments and capital appreciation from our equity related investments. Our investment strategy includes partnering with business owners, management teams and financial sponsors by providing customized financing for ownership transactions, recapitalizations, strategic acquisitions, business expansion and other growth initiatives. We seek to maintain a diversified portfolio of investments in order to help mitigate the potential effects of adverse economic events related to particular companies, regions or industries.

We invest in companies that possess some or all of the following attributes: predictable revenues; positive cash flows; defensible and/or leading market positions; diversified customer and supplier bases; and proven management teams with strong operating discipline. We target companies in the lower middle-market with annual earnings, before interest, taxes, depreciation and amortization, or EBITDA, between \$3.0 million and \$20.0 million; however, we may from time to time opportunistically make investments in larger or smaller companies. Our investments typically range between \$5.0 million and \$25.0 million per portfolio company.

As of December 31, 2016, we had debt and equity investments in 57 portfolio companies with an aggregate fair value of \$524.5 million. The weighted average yield on our debt investments as of December 31, 2016 was 13.1%. The weighted average yield of our debt investments is not the same as a return on investment for our stockholders but, rather, relates to a portion of our investment portfolio and is calculated before the payment of all of our and our

subsidiaries fees and expenses. The weighted average yield was computed using the effective

-1-

interest rates as of December 31, 2016, including accretion of original issue discount and loan origination fees, but excluding investments on non-accrual status, if any. There can be no assurance that the weighted average yield will remain at its current level.

Market Opportunity

We believe that the limited amount of capital available to lower middle-market companies, coupled with the desire of these companies for flexible and partnership-oriented sources of capital, creates an attractive investment environment for us. From our perspective, lower middle-market companies have faced difficulty raising debt capital in both the capital markets and private markets. As a result of the difficulties in the credit markets and fewer sources of capital for lower middle-market companies, we see opportunities for improved risk-adjusted returns. Furthermore, we believe with a large pool of uninvested private equity capital seeking debt capital to complete transactions and a substantial supply of refinancing opportunities, there is an opportunity to attain appealing risk-adjusted returns on debt and equity investments. See The Company in the accompanying prospectus for more information.

Business Strategy

We intend to accomplish our goal of becoming the premier provider of capital to and value-added partner of lower middle-market companies by:

leveraging the experience of our investment advisor;

capitalizing on our strong transaction sourcing network;

serving as a value-added partner with customized financing solutions;

employing rigorous due diligence and underwriting processes focused on capital preservation;

actively managing our portfolio;

benefiting from lower cost of capital through our SBIC subsidiaries.

Investment Criteria/Guidelines

We use the following criteria and guidelines in evaluating investment opportunities and constructing our portfolio. However, not all of these criteria and guidelines have been, or will be, met in connection with each of our investments.

Value Orientation / Positive Cash Flow. Our investment advisor places a premium on analysis of business fundamentals from an investor s perspective and has a distinct value orientation. We focus on companies with proven business models in which we can invest at relatively low multiples of operating cash flow. We also typically invest in portfolio companies with a history of profitability and minimum trailing twelve month EBITDA of \$3.0 million. We

do not invest in start-up companies, turn-around situations or companies that we believe have unproven business plans.

Experienced Management Teams with Meaningful Equity Ownership. We target portfolio companies that have management teams with significant experience and/or relevant industry experience coupled with meaningful equity ownership. We believe management teams with these attributes are more likely to manage the companies in a manner that protects our debt investment and enhances the value of our equity investment.

Niche Market Leaders with Defensible Market Positions. We seek to invest in portfolio companies that have developed defensible and/or leading positions within their respective markets or market niches and are well positioned to capitalize on growth opportunities. We favor companies that demonstrate significant competitive advantages, which we believe helps to protect their market position and profitability.

Diversified Customer and Supplier Base. We prefer to invest in portfolio companies that have a diversified customer and supplier base. Companies with a diversified customer and supplier base are generally better able to endure economic downturns, industry consolidation and shifting customer preferences.

Significant Equity Value. We believe the existence of significant underlying equity value provides important support to our debt investments. With respect to our debt investments, we look for portfolio companies where management/sponsors have provided significant equity funding and where we believe aggregate enterprise value significantly exceeds aggregate indebtedness, after consideration of our investment.

Viable Exit Strategy. We invest in portfolio companies that we believe will provide steady cash flows to service our debt, ultimately repay our loans and provide working capital for their respective businesses. In addition, we seek to invest in portfolio companies whose business models and expected future cash flows offer attractive exit possibilities for our equity investments. We expect to exit our investments typically through one of three scenarios: (a) the sale of the portfolio company resulting in repayment of all outstanding debt and monetization of equity; (b) the recapitalization of the portfolio company through which our investments are replaced with debt or equity from a third party or parties; or (c) the repayment of the initial or remaining principal amount of our debt investment from cash flow generated by the portfolio company. In some investments, there may be scheduled amortization of some portion of our debt investment that would result in a partial exit of our investment prior to the maturity of the debt investment.

About Our Advisor

Our investment activities are managed by Fidus Investment Advisors, LLC, our investment advisor, and supervised by our board of directors, a majority of whom are not interested persons of Fidus as defined in Section 2(a)(19) of the 1940 Act, and who we refer to hereafter as the Independent Directors. Pursuant to the terms of the investment advisory and management agreement, which we refer to as the Investment Advisory Agreement, between us and our investment advisor, our investment advisor is responsible for determining the composition of our portfolio, including sourcing potential investments, conducting research and diligence on potential investments and equity sponsors, analyzing investment opportunities, structuring our investments and monitoring our investments and portfolio companies on an ongoing basis. Our investment advisor s investment professionals seek to capitalize on their significant deal origination and sourcing, underwriting, due diligence, investment structuring, execution, portfolio management and monitoring experience. These professionals have developed a broad network of contacts within the investment community, have gained extensive experience investing in assets that constitute our primary focus and have expertise in investing across all levels of the capital structure of lower middle-market companies. For information regarding the people who control our investment advisor and their affiliations with the Company, see Certain Relationships and Related Transactions Investment Advisory Agreement in the accompanying prospectus.

Our relationship with our investment advisor is governed by and dependent on the Investment Advisory Agreement and may be subject to conflicts of interest. We pay our investment advisor a fee for its services under the Investment Advisory Agreement consisting of two components—a base management fee and an incentive fee. The base management fee is calculated at an annual rate of 1.75% of the average value of our total assets (other than cash or cash equivalents but including assets purchased with borrowed amounts). The incentive fee consists of two parts. The first part is calculated and payable quarterly in arrears and equals 20.0% of our pre-incentive fee net investment income—for the immediately preceding quarter, subject to a 2.0% preferred return, or—hurdle,—and a—catch up—feature. The second part is determined and payable in arrears as of the end of each fiscal year in an amount equal to 20.0% of our realized capital gains, if any, on a cumulative basis from inception through the end of each fiscal year, computed net of all realized capital losses and unrealized capital depreciation on a cumulative basis, less the aggregate amount of any capital gain incentive fees paid in prior years. We accrue, but do not pay, a capital gains incentive fee in connection with any unrealized capital

-3-

appreciation, as appropriate. For more information about how we compensate our investment advisor and the related conflicts of interest, see Management and Other Agreements Investment Advisory Agreement and Certain Relationships and Related Transactions Conflicts of Interest in the accompanying prospectus.

Among other things, our board of directors is charged with protecting our interests by monitoring how our investment advisor addresses conflicts of interest associated with its management services and compensation. Our board of directors is not expected to review or approve each borrowing or incurrence of leverage. However, our board of directors periodically reviews our investment advisor s portfolio management decisions and portfolio performance. In addition, our board of directors at least annually reviews the services provided by and fees paid to our investment advisor. In connection with these reviews, our board of directors, including a majority of our Independent Directors, considers whether the fees and expenses (including those related to leverage) that we pay to our investment advisor are fair and reasonable in relation to the services provided. Renewal of our Investment Advisory Agreement must be approved each year by our board of directors, including a majority of our Independent Directors.

With respect to the administrative agreement with our investment advisor, our board of directors reviews the methodology employed in determining how the expenses are allocated to us. Our board of directors assesses the reasonableness of such reimbursements for expenses allocated to us based on the breadth, depth and quality of such services as compared to the estimated cost to us of obtaining similar services from third-party service providers known to be available. In addition, our board of directors considers whether any third-party service provider would be capable of providing all such services at comparable cost and quality.

Fidus Investment Advisors, LLC is a Delaware limited liability company that is registered as an investment advisor under the Investment Advisers Act of 1940, as amended, or the Advisers Act. In addition, Fidus Investment Advisors, LLC serves as our administrator and provides us with office space, equipment and clerical, book-keeping and record-keeping services pursuant to an administration agreement, which we refer to as the Administration Agreement.

Operating and Regulatory Structure

Our investment activities are managed by our investment advisor and supervised by our board of directors, a majority of whom are not interested persons of us, our investment advisor or its affiliates.

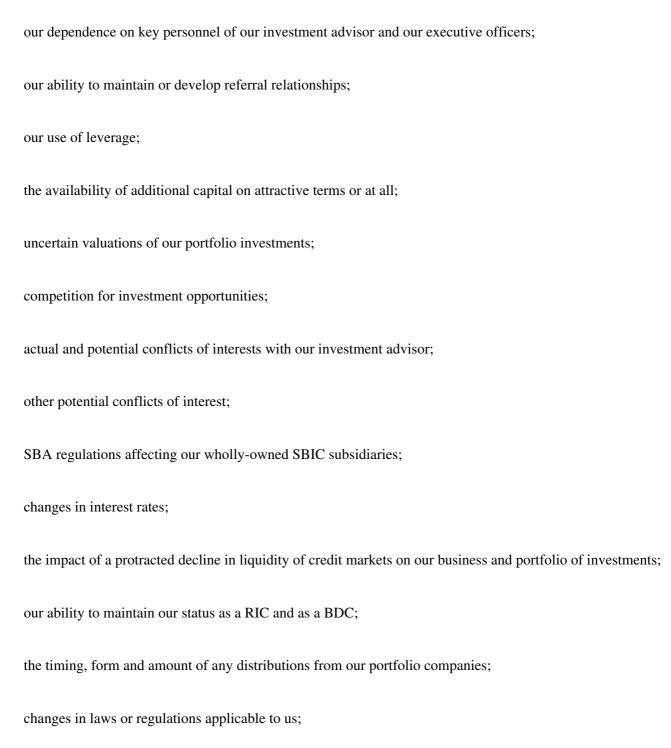

As a BDC, we are required to comply with certain regulatory requirements. For example, while we are permitted to finance investments using leverage, which may include the issuance of shares of preferred stock, or notes and other borrowings, our ability to use leverage is limited in significant respects. See Regulation. Any decision on our part to use leverage will depend upon our assessment of the attractiveness of available investment opportunities in relation to the costs and perceived risks of such leverage. The use of leverage to finance investments creates certain risks and potential conflicts of interest. See Risk Factors Risks Relating to Our Business and Structure Regulations governing our operations as a BDC affect our ability to raise, and the way in which we raise, additional capital which may have a negative effect on our growth and Risk Factors Risks Relating to Our Business and Structure Because we borrow money and may in the future issue additional senior securities including preferred stock and debt securities, the potential for gain or loss on amounts invested in us is magnified and may increase the risk of investing in us.

We have elected to be treated for U.S. federal income tax purposes as a regulated investment company, or RIC, under Subchapter M of the Internal Revenue Code of 1986, as amended, or the Code. In order to maintain our tax treatment as a RIC, we must satisfy certain source of income, asset diversification and distribution requirements. See Material U.S. Federal Income Tax Considerations.

-4-

Risk Factors

The value of our assets, as well as the market price of our shares, will fluctuate. Our investments may be risky, and you may lose part of or all of your investment in us. Investing in our securities involves other risks, including the following:

dilutions risks related to our ability to issue shares below our current net asset value;

possible resignation of our investment advisor;

the general economy and its impact on the industries in which we invest;

risks associated with investing in lower middle-market companies;

the ability of our investment advisor to identify, invest in and monitor companies that meet our investment criteria; and

our ability to invest in qualifying assets.

See Risk Factors beginning on page 12 and the other information included in this prospectus, and any prospectus supplement, for additional discussion of factors you should carefully consider before deciding to invest in our securities.

Corporate Information

Our principal executive offices are located at 1603 Orrington Avenue, Suite 1005, Evanston, Illinois 60201, and our telephone number is (847) 859-3940. Our corporate website is located at http://www.fdus.com. Information on our website is not incorporated into this prospectus or any supplements to this prospectus, and you should not consider information contained on our website to be part of this prospectus or any supplements to this prospectus.

-5-

The Offering

This prospectus relates to the offer, from time to time, up to \$300,000,000 worth of our securities, on terms to be determined at the time of the offering. There is \$202,485,750 of securities available for issuance under this prospectus as a result of our issuance of 2,875,000 shares of our common stock in May 2016 for a total of \$43,901,250 and our issuance of 3,220,000 shares of our common stock in November and December 2016 for a total of \$53,613,000. Our securities may be offered at prices and on terms to be disclosed in one or more prospectus supplements.

We may sell or otherwise issue shares of common stock at a discount to net asset value per share at prices approximating market value less selling expenses upon approval, in certain circumstances, of our board of directors, including a majority of our directors that are not interested persons of the Company, as defined in the 1940 Act. On June 2, 2016, our stockholders voted to allow us to issue common stock at a price below net asset value per share for a period of one year ended on the earlier of June 2, 2017 or the date of our 2017 Annual Meeting of Stockholders. We expect to present to our stockholders a similar proposal at our 2017 Annual Meeting of Stockholders. See Sales of Common Stock Below Net Asset Value in this prospectus and in any accompanying prospectus supplement, if applicable. Sales or other issuances of common stock at prices below net asset value per share dilute the interests of existing stockholders, have the effect of reducing our net asset value per share and may reduce our market price per share.

Our stockholders did not specify a maximum discount below net asset value at which we are able to sell or otherwise issue our common stock; however, we do not intend to sell or otherwise issue shares of our common stock below net asset value unless our board of directors determines that it would be in our stockholders best interest to do so. The level of net asset value dilution that could result from such an offering is not limited.

Our securities may be offered directly to one or more purchasers by us or through agents designated from time to time by us, or to or through underwriters or dealers. The prospectus supplement relating to the offering will disclose the terms of the offering, including the name or names of any agents or underwriters involved in the sale of our securities by us, the purchase price, and any fee, commission or discount arrangement between us and our agents or underwriters or among our underwriters or the basis upon which such amount may be calculated. See Plan of Distribution. We may not sell any of our securities through agents, underwriters or dealers without delivery of a prospectus supplement describing the method and terms of the offering of our securities.

The Nasdaq Global Select Market Symbol FDUS

Use of proceeds

We intend to use the net proceeds from selling our securities to make investments in lower middle-market companies in accordance with our investment objective and strategies and for working capital and general

corporate purposes. See Use of Proceeds.

(including our liquidity position), qualification for or

Dividends and distributions

We pay quarterly distributions to our stockholders out of assets legally available for distribution. Our distributions, if any, will be determined by our board of directors. Our ability to declare distributions depends on our earnings, our overall financial condition

maintenance of our RIC status and such other factors as our board of directors may deem relevant from time to time.

-6-

Dividend reinvestment plan

Taxation

Effective trading at a discount

When we make distributions, we will be required to determine the extent to which such distributions are paid out of current or accumulated earnings, recognized capital gains or capital. To the extent there is a return of capital, investors will be required to reduce their basis in our stock for U.S. federal income tax purposes. In the future, our distributions may include a return of capital.

We have adopted a dividend reinvestment plan for our common stockholders, which is an opt out dividend reinvestment plan. Under this plan, if we declare a cash distribution, our stockholders who have not opted out of our dividend reinvestment plan will have their cash distribution automatically reinvested in additional shares of our common stock, rather than receiving the cash distribution. If a stockholder opts out, that stockholder will receive cash distributions. Stockholders who receive distributions in the form of shares of common stock generally are subject to the same U.S. federal income tax consequences as stockholders who elect to receive their distributions in cash; however, since their cash distributions will be reinvested, such stockholders will not receive cash with which to pay any applicable taxes on reinvested distributions. See Dividend Reinvestment Plan.

We have elected to be treated as a RIC for U.S. federal income tax purposes. Accordingly, we generally will not pay corporate-level U.S. federal income taxes on any net ordinary income or capital gains that we distribute to our stockholders. To maintain our tax treatment as a RIC and the associated tax benefits, we must meet specified source-of-income and asset diversification requirements and distribute annually at least 90% of our realized net ordinary income and realized net short-term capital gains, if any, in excess of our net long-term capital losses. See Distributions and Material U.S. Federal Income Tax Considerations.

Shares of closed-end investment companies, including business development companies, frequently trade at a discount to their net asset value. The risk that our shares may trade at a discount to our net asset value is separate and distinct from the risk that our net asset value per share may decline. We cannot predict whether our shares will trade above, at or below net asset value. See Risk Factors.

-7-

Sales of common stock below net asset value

Leverage

Available Information

Generally, the offering price per share of our common stock, exclusive of any underwriting commissions or discounts, may not be less than the net asset value per share of our common stock at the time we make the offering except (1) in connection with a rights offering to our existing stockholders, (2) with the consent of the majority of our common stockholders and approval of our board of directors, or (3) under such circumstances as the SEC may permit. On June 2, 2016, our common stockholders voted to allow us to sell or otherwise issue common stock at a price below net asset value per share for a period of one year ending on the earlier of June 2, 2017 or our 2017 Annual Meeting of Stockholders. We expect to present to our stockholders a similar proposal at our 2017 Annual Meeting of Stockholders. Sales or other issuances by us of our common stock at a discount from our net asset value pose potential risks for our existing stockholders whether or not they participate in the offering, as well as for new investors who participate in the offering. See Sales of Common Stock Below Net Asset Value in this prospectus and in the prospectus supplement, if applicable.

We borrow funds to make additional investments. We use this practice, which is known as leverage, to attempt to increase returns to our stockholders, but it involves significant risks. See Risk Factors, Securities and Regulation Senior Securities. With certain limited exceptions, we are only allowed to borrow amounts such that our asset coverage, as defined in the 1940 Act, equals at least 200% after such borrowing. The amount of leverage that we employ at any particular time will depend on our Investment Advisor s investment committee s and our board of directors assessment of market and other factors at the time of any proposed borrowing. In addition, the maximum amount of leverage that three or more SBICs under common control can have outstanding is \$350.0 million.

We are required to file periodic reports, current reports, proxy statements and other information with the SEC. This information is available on the SEC s Internet website at www.sec.gov. You can also inspect any materials we file with the SEC, without charge, at the SEC s Public Reference Room at 100 F Street, N.E., Washington, D.C. 20549. Please call the SEC at

1-800-SEC-0330 for further information on

the Public Reference Room. We intend to provide much of the same information on our website at *www.fdus.com*. Information contained on our website is not part of this prospectus or any prospectus supplement and should not be relied upon as such.

-9-

FEES AND EXPENSES

The following table is intended to assist you in understanding the costs and expenses that an investor in this offering will bear directly or indirectly. We caution you that some of the percentages indicated in the table below are estimates and may vary. Except where the context suggests otherwise, whenever this prospectus contains a reference to fees or expenses paid by you, us, the Company or Fidus, or that we will pay fees or expenses, stockholders will indirect bear such fees or expenses as investors in us.

Stockholder transaction expenses:	
Sales load (as a percentage of offering price)	(1)
Offering expenses borne by us (as a percentage of offering price)	(2)
Dividend reinvestment plan expenses	(3)
Total stockholder transaction expenses paid by us (as a percentage of offering price)	(4)
Annual expenses (as a percentage of net assets attributable to common stock) ⁽⁵⁾ :	
Base management fee	$2.85\%^{(6)}$
Incentive fees payable under Investment Advisory Agreement	$2.55\%^{(7)}$
Interest payments on borrowed funds	3.35%(8)
Other expenses	$1.38\%^{(9)}$
Total annual expenses	$10.13\%^{(10)}$

- (1) In the event that securities to which this prospectus relates are sold to or through underwriters, a corresponding prospectus supplement will disclose the applicable sales load.
- (2) In the event that we conduct an offering of any of our securities, a corresponding prospectus supplement will disclose the estimated offering expenses because they will be ultimately borne by us.
- (3) The expenses of administering our dividend reinvestment plan are included in other expenses.
- (4) Total stockholder transaction expenses may include a sales load and will be disclosed in a future prospectus supplement, if any.
- (5) Net assets attributable to common stock equals average net assets, which is calculated as the average of the net assets balances as of each quarter end during the year ended December 31, 2016 and the prior year end.
- (6) Our base management fee is 1.75% of the average value of our total assets (other than cash and cash equivalents but including assets purchased with borrowed amounts). This item represents actual base management fees incurred for the year ended December 31, 2016. We may from time to time decide it is appropriate to change the terms of the Investment Advisory Agreement. Under the 1940 Act, any material change to our Investment Advisory Agreement must be submitted to stockholders for approval. The 2.85% reflected in the table is calculated on our net assets (rather than our total assets). See Management and Other Agreements Investment Advisory Agreement.
- (7) This item represents actual fees incurred on pre-incentive fee net investment income for the year ended December 31, 2016. As of December 31, 2016, there was no capital gains incentive fee payable.

The incentive fee consists of two parts:

The first, payable quarterly in arrears, equals 20.0% of our pre-incentive fee net investment income, expressed as a rate of return on the value of our net assets, (including interest that is accrued but not yet received in cash), subject to a 2.0% quarterly (8.0% annualized) hurdle rate and a catch-up provision measured as of the end of each calendar

quarter. Under this provision, in any calendar quarter, our investment advisor receives no incentive fee until our pre-incentive fee net investment income equals the hurdle rate of 2.0% but then receives, as a catch-up, 100.0% of our pre-incentive fee net investment income with respect to that portion of such pre-incentive fee net investment income, if any, that exceeds the hurdle rate but is less than 2.5%. The effect of this provision is that, if pre-incentive fee net investment income exceeds 2.5% in any calendar quarter, our investment advisor will receive 20.0% of our pre-incentive fee net investment income as if a hurdle rate did not apply.

The second part, payable annually in arrears, equals 20.0% of our realized capital gains net of realized capital losses and unrealized capital depreciation, if any, on a cumulative basis from inception through the end of the fiscal year (or upon the termination of the Investment Advisory Agreement, as of the termination date), less the aggregate amount of any previously paid capital gain incentive fees. We accrue, but do not pay, a capital gains incentive fee in connection with any net unrealized capital appreciation, as appropriate. For the year ended December 31, 2016, we accrued capital gains incentive fees of \$3.0 million in accordance with generally accepted accounting principles.

See Management and Other Agreements Investment Advisory Agreement.

- (8) As of December 31, 2016, we had outstanding SBA debentures of \$224.0 million, and unfunded commitments from the SBA to purchase up to an additional of \$51.0 million SBA debentures; we had no outstanding borrowings under the Credit Facility, which has total commitment of \$50.0 million. Interest payments on borrowed funds is based on estimated annual interest and fee expenses on outstanding SBA debentures and borrowings under the Credit Facility as of December 31, 2016 with a weighted average interest rate of 4.1%. We have estimated the annual interest expense on borrowed funds and caution you that our actual interest expense will depend on prevailing interest rates and our rate of borrowing, which may be substantially higher than the estimate provided in this table.
- (9) Other expenses represent our estimated annual operating expenses, as a percentage of net assets attributable to common shares estimated for the current year, including professional fees, directors fees, insurance costs, expenses of our dividend reinvestment plan and payments under the Administration Agreement based on our allocable portion of overhead and other expenses incurred by our administrator. See Management and Other Agreements Administration Agreement. Other expenses exclude interest payments on borrowed funds, and if we issue debt securities or preferred stock, interest payments on debt securities and distributions with respect to preferred stock. We currently do not have any class of securities outstanding other than common stock. Other expenses are based on actual other expenses for the year ended December 31, 2016.
- (10) Total annual expenses—as a percentage of consolidated net assets attributable to common stock are higher than the total annual expenses percentage would be for a company that is not leveraged. We borrow money to leverage our net assets and increase our total assets. The SEC requires that the total annual expenses—percentage be calculated as a percentage of net assets (defined as total assets less indebtedness and before taking into account any incentive fees payable during the period), rather than the total assets, including assets that have been purchased with borrowed amounts. If the total annual expenses—percentage were calculated instead as a percentage of average consolidated total assets, our total annual expenses—would be 5.67% of average consolidated total assets.

Example

The following example demonstrates the projected dollar amount of total cumulative expenses over various periods with respect to a hypothetical investment in us. In calculating the following expense amounts, we have assumed we would have no additional leverage, that none of our assets are cash or cash equivalents and that our annual operating expenses would remain at the levels set forth in the table above. Transaction expenses are not included in the following example.

	1 year	3 years	5 years	10 years
You would pay the following expenses on a \$1,000 investment,				
assuming a 5.0% annual return	\$ 104	\$ 295	\$ 466	\$ 820

You would pay the following expenses on a \$1,000 investment, assuming a 5.0% annual return resulting entirely from net realized capital gains (all of which is subject to our incentive fee on capital gains) \$ 111 \$ 314 \$ 492 \$ 851 The foregoing table is to assist you in understanding the various costs and expenses that an investor in our common stock will bear directly or indirectly. While the example assumes, as required by the SEC, a 5.0%

-11-

annual return, our performance will vary and may result in a return greater or less than 5.0%. Assuming a 5.0% annual return, the incentive fee under the Investment Advisory Agreement would either not be payable or have an insignificant impact on the expense amounts shown above. If we achieve sufficient returns on our investments, including through the realization of capital gains, to trigger an incentive fee of a material amount, our expenses, and returns to our investors, would be higher. In addition, while the example assumes reinvestment of all distributions at net asset value, if our board of directors authorizes and we declare a cash dividend, participants in our dividend reinvestment plan who have not otherwise elected to receive cash will receive a number of shares of our common stock, determined by dividing the total dollar amount of the distribution payable to a participant by the market price per share of our common stock at the close of trading on the valuation date for the distribution. See Dividend Reinvestment Plan for additional information regarding our dividend reinvestment plan.

This example and the expenses in the table above should not be considered a representation of our future expenses, and actual expenses (including the cost of debt, if any, and other expenses) may be greater or less than those shown.

-12-

RISK FACTORS

Investing in our securities involves a number of significant risks. You should carefully consider these risk factors, together with all of the other information included in this prospectus, or any prospectus supplement. The risks set out below are not the only risks we face. Additional risks and uncertainties not presently known to us or not presently deemed material by us may also impair our operations and performance. If any of the following events occur, our business, financial condition and results of operations could be materially and adversely affected. In such case, our net asset value and the trading price of our common stock could decline, and you may lose all or part of your investment.

Risks Relating to Our Business and Structure

We are dependent upon our investment advisor s managing members and our executive officers for our future success. If our investment advisor was to lose any of its managing members or we lose any of our executive officers, our ability to achieve our investment objective could be significantly harmed.

We depend on the investment expertise, skill and network of business contacts of the managing members of our investment advisor, who evaluate, negotiate, structure, execute and monitor our investments. Our future success will depend to a significant extent on the continued service and coordination of the investment professionals of our investment advisor and executive officers. Certain investment professionals and executives may not devote all of their business time to our operations and may have other demands on their time as a result of other activities. The departure of any of these individuals could have a material adverse effect on our ability to achieve our investment objective.

Our business model depends to a significant extent upon strong referral relationships with financial institutions, sponsors and investment professionals. Any inability of our investment advisor to maintain or develop these relationships, or the failure of these relationships to generate investment opportunities, could adversely affect our business.

We depend upon the investment professionals of our investment advisor to maintain their relationships with financial institutions, sponsors and investment professionals, and we intend to rely to a significant extent upon these relationships to provide us with potential investment opportunities. If the investment professionals of our investment advisor fail to maintain such relationships, or to develop new relationships with other sources of investment opportunities, we will not be able to grow our investment portfolio. In addition, individuals with whom the investment professionals of our investment advisor have relationships are not obligated to provide us with investment opportunities, and, therefore, we can offer no assurance that these relationships will generate investment opportunities for us in the future.

Our financial condition and results of operation depends on our ability to manage our business effectively.

Our ability to achieve our investment objective and grow depends on our ability to manage our business and deploy our capital effectively. This depends, in turn, on our investment advisor s ability to identify, evaluate and monitor companies that meet our investment criteria. The achievement of our investment objectives on a cost-effective basis depends upon our investment advisor s execution of our investment process, its ability to provide competent, attentive and efficient services to us and, to a lesser extent, our access to financing on acceptable terms. Our investment advisor has substantial responsibilities under the Investment Advisory Agreement. In addition, our investment advisor s investment professionals may be called upon to provide managerial assistance to our portfolio companies. These activities may distract them or slow our rate of investment. Any failure to manage our business and our future growth effectively could have a material adverse effect on our business, financial condition and results of operations.

We may suffer credit losses and our investments could be rated below investment grade.

Private debt in the form of mezzanine, senior secured or unitranche loans to corporate and asset-based borrowers is highly speculative and involves a high degree of risk of credit loss, and therefore an investment in our shares of common stock may not be suitable for someone with a low tolerance for risk. These risks are likely to increase during an economic recession.

In addition, investments in our portfolio are typically not rated by any rating agency. We believe that if such investments were rated, the vast majority would be rated below investment grade (which is sometimes referred to as junk) due to speculative characteristics of the issuer s capacity to pay interest and repay principal. Our investments may result in an amount of risk, volatility or potential loss of principal that is greater than that of alternative investments.

Because we borrow money and may in the future issue additional senior securities, including preferred stock and debt securities, the potential for gain or loss on amounts invested in us is magnified and may increase the risk of investing in us.

Borrowings, also known as leverage, magnify the potential for gain or loss on amounts invested and, therefore, increase the risks associated with investing in us. The Funds borrow from and issue debt securities to the SBA, and we may borrow from banks and other lenders in the future. The SBA has fixed dollar claims on the Funds—assets that are superior to the claims of our stockholders. We may also borrow from banks and other lenders or issue additional senior securities including preferred stock and debt securities in the future. If the value of our assets increases, then leveraging would cause the net asset value attributable to our common stock to increase more sharply than it would have had we not used leverage. Conversely, if the value of our assets decreases, leveraging would cause net asset value to decline more sharply than it otherwise would have had we not leveraged. Similarly, any increase in our income in excess of interest payable on the borrowed funds would cause our net income to increase more than it would without the leverage, while any decrease in our income would cause net income to decline more sharply than it would have had we not borrowed. Such a decline could negatively affect our ability to make distributions to our stockholders. Leverage is generally considered a speculative investment technique.

Our ability to achieve our investment objectives may depend in part on our ability to achieve additional leverage on favorable terms by borrowing from the SBA, banks or other lenders, and there can be no assurance that such additional leverage can in fact be achieved.

As a BDC, we are generally required to meet a coverage ratio at least equal to 200.0% of total assets to total borrowings and other senior securities, which include all of our borrowings (other than the Funds SBA leverage under the terms of SEC exemptive relief) and any preferred stock we may issue in the future. If this ratio declines below 200.0%, we may not be able to incur additional debt and may need to sell a portion of our investments to repay some debt when it is disadvantageous to do so, and we may not be able to make distributions to our stockholders.

The following table illustrates the effect of leverage on returns from an investment in our common stock assuming various annual returns, net of expenses. The calculations in the table below are hypothetical and actual returns may be higher or lower than those appearing in the table below.

Assumed Return on Our Portfolio

(Net of Expenses)

	(10.0)%	(5.0)%	0.0%	5.0%	10.0%
Corresponding return to common stockholder					
(1)	(19.2)%	(10.9)%	(2.6)%	5.7%	14.0%

(1) Assumes \$586.7 million in total assets, \$224.0 million in outstanding SBA debentures, zero in borrowings under the Credit Facility, and \$353.8 million in net assets as of December 31, 2016 and an average cost of funds of 4.1%.

Funding a portion of our investments with preferred stock would magnify the potential for gain or loss and the risks of investing in us in the same way as our other borrowings.

Preferred stock, which is another form of leverage, has the same risks to our common stockholders as borrowings because the distributions with respect to any preferred stock must be cumulative. Payment of such distributions and repayment of the liquidation preference of such preferred stock must take preference over any distributions or other payments to our common stockholders, and preferred stockholders are not subject to any of our expenses or losses and are not entitled to participate in any income or appreciation in excess of their stated preference.

Pending legislation may allow us to incur additional leverage.

As a BDC, under the 1940 Act generally we are not permitted to incur indebtedness unless immediately after such borrowing we have an asset coverage for total borrowings of at least 200.0% (i.e., the amount of debt may not exceed 50.0% of the value of our assets). Legislation introduced to the U.S. House of Representatives, if passed, would modify this section of the 1940 Act and increase the amount of debt that BDCs may incur by modifying the minimum asset coverage ratio from 200.0% to 150.0%. If such legislation were to pass, we would be able to incur additional indebtedness in the future and therefore your risk of an investment in us may increase.

In addition, in December 2015, the 2016 omnibus spending bill approved by Congress and signed into law by the President increased the amount of SBA-guaranteed debentures that affiliated SBIC funds can have outstanding from \$225.0 million to \$350.0 million, subject to SBA approval. This new legislation may allow us to issue additional SBIC debentures above the \$224.0 million of SBA-guaranteed debentures we had outstanding as of December 31, 2016. If we incur this additional indebtedness in the future, your risk of an investment in our securities may increase.

Many of our portfolio investments are recorded at fair value as determined in good faith by our board of directors, and, as a result, there is uncertainty as to the value of our portfolio investments and the valuation process for certain of our portfolio holdings creates a conflict of interest.

Many of our portfolio investments take the form of debt and equity securities that are not publicly-traded. The debt and equity securities in which we invest for which market quotations are not readily available are valued at fair value as determined in good faith by our board of directors. As part of the valuation process, we may take into account the following types of factors, if relevant, in determining the fair value of our investments:

a comparison of the portfolio company s securities to comparable publicly-traded securities;

the enterprise value of a portfolio company;

the nature and realizable value of any collateral;

the portfolio company s ability to make payments and its earnings and discounted cash flow;

the markets in which the portfolio company does business; and

changes in the interest rate environment and the credit markets generally that may affect the price at which similar investments may be made in the future and other relevant factors.

The fair value of each investment in our portfolio is determined quarterly by our board of directors. Any changes in fair value of portfolio securities from the prior period are recorded in our consolidated statement of operations as net change in unrealized appreciation or depreciation.

-15-

In connection with that determination, investment professionals from our investment advisor prepare portfolio company valuations based upon the most recent portfolio company financial statements available and projected financial results of each portfolio company. In addition, certain members of our board of directors have a pecuniary interest in our investment advisor. The participation of our investment advisor s investment professionals in our valuation process, and the pecuniary interest in our investment advisor by certain members of our board of directors, may result in a conflict of interest as the management fees that we pay our investment advisor are based on our total assets (other than cash and cash equivalents but including assets purchased with borrowed amounts).

Due to the inherent uncertainty of determining the fair value of investments that do not have a readily available market value, the fair value of our investments may differ significantly from the values that would have been used had a readily available market value existed for such investments, and the differences could be material. Declines in prices and liquidity in the corporate debt markets may also result in significant net unrealized depreciation in our debt portfolio. Our net asset value could be adversely affected if our determinations regarding the fair value of our investments were materially higher than the values that we ultimately realize upon the disposal of such investments.

We operate in a highly competitive market for investment opportunities, which could reduce returns and result in losses.

A number of entities compete with us to make the types of investments that we plan to make. We compete with public and private funds, commercial and investment banks, commercial financing companies and, to the extent they provide an alternative form of financing, private equity and hedge funds. Many of our competitors are substantially larger and have considerably greater financial, technical and marketing resources than we do. For example, we believe some of our competitors may have access to funding sources that are not available to us. In addition, some of our competitors may have higher risk tolerances or different risk assessments. These characteristics could allow our competitors to consider a wider variety of investments, establish more relationships and offer better pricing and more flexible structuring than we offer. We may lose investment opportunities if we do not match our competitors pricing, terms and structure. If we match our competitors pricing, terms and structure, we may experience a decrease in net investment income or an increase in risk of capital loss. A significant part of our competitive advantage stems from the fact that the lower middle-market is underserved by traditional commercial and investment banks, and generally has less access to capital. A significant increase in the number and/or the size of our competitors in this target market could force us to accept less attractive investment terms.

Furthermore, many of our competitors are not subject to the regulatory restrictions that the 1940 Act imposes on us as a BDC or the source of income, asset diversification and distribution requirements we must satisfy to maintain our RIC status. The competitive pressures we face may have a material adverse effect on our business, financial condition and results of operations. As a result of this existing and potentially increasing competition, we may not be able to take advantage of attractive investment opportunities from time to time, and we may not be able to identify and make investments that are consistent with our investment objective.

Our management and incentive fee structure may create incentives for our investment advisor that are not fully aligned with the interests of our stockholders and may encourage our investment advisor to make speculative investments.

The management and incentive fees paid to our investment advisor are based on our total assets (other than cash or cash equivalents but including assets purchased with borrowed amounts), and our investor advisor may therefore benefit when we incur debt or use leverage. This fee structure may encourage our investment advisor to cause us to borrow money to finance additional investments. Under certain circumstances, the use of borrowed money may increase the likelihood of default, which would disfavor our stockholders. Our board of directors is charged with

protecting our interests by monitoring how our investment advisor addresses these and other

-16-

conflicts of interests. Our board of directors is not expected to review or approve each borrowing or incurrence of leverage. However, our board of directors, periodically reviews our investment advisor s portfolio management decisions and portfolio performance. In addition, our board of directors at least annually reviews the services provided by and fees paid to our investment advisor. In connection with these reviews, our board of directors, including a majority of our Independent Directors, considers whether the fees and expenses (including those related to leverage) that we pay to our investment advisor are fair and reasonable in relation to the services provided and must approve renewal of our Advisory Agreement.

The part of the incentive fee payable to our investment advisor that relates to our net investment income is computed and paid on income that includes interest income that has been accrued but not yet received in cash. This fee structure may encourage our investment advisor to favor debt financings that provide for deferred interest, rather than current cash payments of interest. Our investment advisor may have an incentive to invest in deferred interest securities in circumstances where it would not have done so but for the opportunity to continue to earn the incentive fee even when the issuers of the deferred interest securities would not be able to make actual cash payments to us on such securities. This risk could be increased because our investment advisor is not obligated to reimburse us for any incentive fees received even if we subsequently incur losses or never receive in cash the deferred interest that was previously accrued.

The incentive fee is based, in part, upon net capital gains realized on our investments. Unlike the portion of the incentive fee based on income, there is no hurdle rate applicable to the portion of the incentive fee based on net capital gains. As a result, our investment advisor may have a tendency to invest more capital in investments that are likely to result in capital gains as compared to income producing securities. Such a practice could result in our investing in more speculative securities than would otherwise be the case, which could result in higher investment losses, particularly during economic downturns.

We may be obligated to pay our investment advisor incentive compensation even if we incur a loss and may pay more than 20.0% of our net capital gains because we cannot recover payments made in previous years.

Our investment advisor will be entitled to incentive compensation for each fiscal quarter in an amount equal to a percentage of the excess of our pre-incentive fee net investment income for that quarter above a threshold return for that quarter. Our pre-incentive fee net investment income for incentive compensation purposes excludes realized and unrealized capital losses that we may incur in the fiscal quarter, even if such capital losses result in a net loss on our consolidated statement of operations for that quarter. Thus, we may be required to pay our investment advisor incentive compensation for a fiscal quarter even if there is a decline in the value of our portfolio or we incur a net loss for that quarter. Further, if we pay an incentive fee of 20.0% of our realized capital gains (net of all realized capital losses and unrealized capital depreciation on a cumulative basis) and thereafter experience additional realized capital losses or unrealized capital depreciation, we will not be able to recover any portion of the incentive fee previously paid.

We may have potential conflicts of interest related to obligations that our investment advisor may have to other clients.

Currently, the Company, the Funds, Fidus Credit Opportunities, L.P. and Fidus Equity Opportunities Fund, L.P. are the only investment vehicles managed by our investment advisor. The Investment Advisory Agreement does not limit our investment advisor s ability to act as an investment advisor to other funds, including other BDCs, or other investment advisory clients. To the extent our investment advisor acts as an investment advisor to other funds or clients, including Fidus Credit Opportunities, L.P. and Fidus Equity Opportunities Fund, L.P., we may have conflicts of interest with our investment advisor or its other clients that elect to invest in similar types of securities as those in

which we invest. Members of our investment advisor s investment committee serve or may serve as officers, directors or principals of entities that operate in the same or a related line of business as we do, or of investment funds or other investment vehicles managed by our investment advisor. In serving in these multiple capacities, they may have obligations to other clients or investors in those entities, the fulfillment of which may not be in the best interests of us or our stockholders. Our investment advisor will seek to allocate

investment opportunities among eligible accounts in a manner that is fair and equitable over time and consistent with an allocation policy approved by our board of directors.

To the extent our investment advisor forms affiliates, including Fidus Credit Opportunities, L.P. and Fidus Equity Opportunities Fund, L.P., we may co-invest on a concurrent basis with such affiliates, subject to compliance with applicable regulations and regulatory guidance and our allocation procedures. While we may co-invest with investment entities managed by our investment advisor or its affiliates, to the extent permitted by the 1940 Act and the rules and regulations thereunder, the 1940 Act imposes significant limits on co-investment. On January 4, 2017, the SEC granted us relief sought in an exemptive application that expands our ability to co-invest in portfolio companies with certain of our affiliates managed by our investment advisor in a manner consistent with our investment objective, positions, policies, strategies and restrictions as well as regulatory requirements and other pertinent factors, subject to compliance with certain conditions (the Order). Pursuant to the Order, we are permitted to co-invest with our affiliates if a required majority (as defined in Section 57(o) of the 1940 Act) of our independent directors make certain conclusions in connection with a co-investment transaction, including that (1) the terms of the transactions, including the consideration to be paid, are reasonable and fair to us and our stockholders and do not involve overreaching by us or our stockholders on the part of any person concerned, and (2) the transaction is consistent with the interests of our stockholders and is consistent with our investment objective and strategies. We intend to co-invest, subject to the conditions included in the Order.

Our investment advisor or its investment committee may, from time to time, possess material non-public information, limiting our investment discretion.

The investment professionals of our investment advisor may serve as directors of, or in a similar capacity with, companies in which we invest, the securities of which are purchased or sold on our behalf. In the event that material non-public information is obtained with respect to such companies, or we become subject to trading restrictions under the internal trading policies of those companies or as a result of applicable law or regulations, we could be prohibited for a period of time from purchasing or selling the securities of such companies, and this prohibition may have an adverse effect on us.

We may have conflicts related to other arrangements with our investment advisor.

We entered into a license agreement with Fidus Partners, LLC under which Fidus Partners, LLC granted us a non-exclusive (provided that there is not a change in control of Fidus Partners, LLC), royalty-free license to use the name Fidus. Some of the members of our investment advisor s investment committee and the senior origination professionals of our investment advisor are members of Fidus Partners, LLC. See Management and Other Agreements License Agreement. In addition, we rent office space from our investment advisor and pay to our investment advisor our allocable portion of overhead and other expenses incurred in performing its obligations under the Administration Agreement, such as our allocable portion of the cost of our chief financial officer and chief compliance officer. This creates conflicts of interest that our board of directors must monitor.

The Funds are licensed by the SBA, and, therefore, are subject to SBA regulations.

The Funds are licensed to operate as SBICs and are regulated by the SBA. Under current SBA regulations, a licensed SBIC can provide capital to those entities that have a tangible net worth not exceeding \$19.5 million and an average annual net income after U.S. federal income taxes not exceeding \$6.5 million for the two most recent fiscal years. In addition, a licensed SBIC must devote 25.0% of its investment activity to those entities that have a tangible net worth not exceeding \$6.0 million and an average annual net income after U.S. federal income taxes not exceeding \$2.0 million for the two most recent fiscal years. The SBA regulations also provide alternative size standard criteria to

determine eligibility, which depend on the industry in which the business is engaged and are based on either the number of employees or the gross sales of the business. The SBA regulations permit licensed SBICs to make long term loans to small businesses, invest in the equity securities of such businesses and provide

-18-

them with consulting and advisory services. The SBA also places certain limitations on the financing terms of investments by SBICs in portfolio companies and prohibits SBICs from providing funds for certain purposes or to businesses in certain prohibited industries. Further, the SBA regulations require that a licensed SBIC be periodically examined and audited by the SBA staff to determine its compliance with the relevant SBA regulations. Compliance with these SBA requirements may cause the Funds to forego attractive investment opportunities that are not permitted under the SBA regulations, and may cause the Funds to make investments they otherwise would not make in order to remain in compliance with these regulations.

Failure to comply with the SBA regulations could result in the loss of the SBIC licenses and the resulting inability to participate in the SBA debenture program. The SBA prohibits, without prior SBA approval, a change of control of an SBIC or transfers that would result in any person (or a group of persons acting in concert) owning 10.0% or more of a class of capital stock of a licensed SBIC. Current SBA regulations provide the SBA with certain rights and remedies if an SBIC violates their terms. A key regulatory metric for SBA is the extent of Capital Impairment, which is the extent of realized (and, in certain circumstances, net unrealized) losses compared with the SBIC s private capital commitments. Interest payments, management fees, organization and other expenses are included in determining realized losses. SBA regulations preclude the full amount of unrealized appreciation from portfolio companies from being considered when calculating Capital Impairment in certain circumstances. Remedies for regulatory violations are graduated in severity depending on the seriousness of Capital Impairment or other regulatory violations. For minor regulatory infractions, the SBA issues a warning. For more serious infractions, the use of SBA debentures may be limited or prohibited, outstanding debentures can be declared to be immediately due and payable, restrictions on distributions and making new investments may be imposed and management fees may be required to be reduced. In severe cases, the SBA may require the removal of a general partner of an SBIC or its officers, directors, managers or partners, or the SBA may obtain appointment of a receiver for the SBIC.

SBA regulations limit the amount of SBA-guaranteed debt that may be borrowed by an SBIC.

The SBA regulations currently limit the amount that is available to be borrowed by any SBIC and guaranteed by the SBA to 300.0% of an SBIC s regulatory capital or \$150.0 million, whichever is less. For three or more SBICs under common control, the maximum amount of outstanding SBA debentures cannot exceed \$350.0 million. If the Funds borrow the maximum amount from the SBA and thereafter require additional capital, our cost of capital may increase, and there is no assurance that we will be able to obtain additional financing on acceptable terms.

Moreover, the Funds current status as SBICs does not automatically assure that they will continue to receive funding through the SBA debenture program. Receipt of SBA debenture funding is dependent upon the Funds continuing compliance with SBA regulations and policies and there being funding available. The amount of SBA debenture funding available to SBICs is dependent upon annual Congressional authorizations and in the future may be subject to annual Congressional appropriations. There can be no assurance that there will be sufficient SBA debenture funding available at the times desired by the Funds.

The debentures issued by the Funds and guaranteed by the SBA have a maturity of ten years and bear interest semi-annually at fixed rates. Certain of the Funds SBA debentures begin to mature in 2018 and will require repayment on or before the respective maturity dates. The Funds will need to generate sufficient cash flow to make required debt payments on such debentures. If the Funds are unable to generate such cash flow, the SBA, as guarantor of the debentures, will have a superior claim to our assets over our stockholders in the event the Funds liquidate or the SBA exercises its remedies under such debentures as the result of a default by the Funds.

-19-

The Funds, as SBICs, are limited in their ability to make distributions to us, which could result in us being unable to meet the minimum distribution requirements to maintain our tax treatment as a RIC.

In order to maintain our tax treatment as a RIC, we are required to distribute to our stockholders on an annual basis 90.0% of our net ordinary income and net short-term capital gains in excess of net long-term capital losses. For this purpose, our taxable income will include the income of the Funds (and any other entities that are disregarded as separate from us for U.S. federal income tax purposes). The Funds ability to make distributions to us may be limited by the Small Business Investment Act of 1958. As a result, in order to maintain our tax treatment as a RIC, we may be required to make distributions attributable to the Funds income without receiving any corresponding cash distributions with respect to such income. We can make no assurances that the Funds will be able to make, or not be limited in making, distributions to us. If we are unable to satisfy the annual distribution requirements, we may fail to maintain our tax treatment as a RIC, which would result in the imposition of corporate-level U.S. federal income tax on our entire taxable income without regard to any distributions made by us. See We will be subject to corporate-level U.S. federal income tax if we are unable to maintain our qualification as a RIC under Subchapter M of the Code.

Changes in interest rates will affect our cost of capital and net investment income.

Most of our debt investments bear interest at fixed rates and the value of these investments could be negatively affected by increases in market interest rates. In addition, to the extent that we borrow additional funds to make investments, an increase in interest rates would make it more expensive for us to use debt to finance our investments. As a result, a significant increase in market interest rates could both reduce the value of our portfolio investments and increase our cost of capital, which would reduce our net investment income. Conversely, a decrease in interest rates may have an adverse impact on our returns by requiring us to seek lower yields on our debt investments and by increasing the risk that our portfolio companies will prepay the debt investments, resulting in the need to redeploy capital at potentially lower rates.

You should also be aware that a rise in market interest rates typically leads to higher interest rates applicable to our debt investments. Accordingly, an increase in interest rates may result in an increase of the amount of incentive fees payable to our investment advisor.

Our ability to enter into transactions involving derivatives and financial commitment transactions may be limited.

The SEC has proposed a new rule under the 1940 Act that would govern the use of derivatives (defined to include any swap, security-based swap, futures contract, forward contract, option or any similar instrument) as well as financial commitment transactions (defined to include reverse repurchase agreements, short sale borrowings and any firm or standby commitment agreement or similar agreement) by BDCs. Under the proposed rule, a BDC would be required to comply with one of two alternative portfolio limitations and manage the risks associated with derivatives transactions and financial commitment transactions by segregating certain assets. Furthermore, a BDC that engages in more than a limited amount of derivatives transactions or that uses complex derivatives would be required to establish a formalized derivatives risk management program. If the SEC adopts this rule in the form proposed, our ability to enter into transactions involving such instruments may be hindered, which could have an adverse effect on our business, financial condition and results of operations.

Global capital markets could enter a period of severe disruption and instability. These conditions have historically affected and could again materially and adversely affect debt and equity capital markets in the United States and around the world and our business.

The U.S. and global capital markets experienced extreme volatility and disruption during the economic downturn that began in mid-2007, and the U.S. economy was in a recession for several consecutive calendar quarters during the same period. In 2010, a financial crisis emerged in Europe, triggered by high budget deficits

-20-

and rising direct and contingent sovereign debt, which created concerns about the ability of certain nations to continue to service their sovereign debt obligations. Risks resulting from such debt crisis and any future debt crisis in Europe or any similar crisis elsewhere could have a detrimental impact on the global economic recovery, sovereign and non-sovereign debt in certain countries and the financial condition of financial institutions generally. In July and August 2015, Greece reached agreements with its creditors for bailouts that provide aid in exchange for certain austerity measures. These and similar austerity measures may adversely affect world economic conditions and have an adverse impact on our business and that of our portfolio companies. In the second quarter of 2015, stock prices in China experienced a significant drop, resulting primarily from continued sell-off of shares trading in Chinese markets. In August 2015, Chinese authorities sharply devalued China s currency. In June 2016, the United Kingdom held a referendum in which voters approved an exit from the European Union, and the implications of the United Kingdom s pending withdrawal from the European Union are unclear at present. In November 2016, voters in the United States elected a new president and the implications of a new presidential administration are unclear at present. These market and economic disruptions affected, and these and other similar market and economic disruptions may in the future affect, the U.S. capital markets, which could adversely affect our business and that of our portfolio companies and the broader financial and credit markets and have reduced the availability of debt and equity capital for the market as a whole and to financial firms, in particular. At various times, these disruptions resulted in, and may in the future result, a lack of liquidity in parts of the debt capital markets, significant write-offs in the financial services sector and the repricing of credit risk. These conditions may reoccur for a prolonged period of time again or materially worsen in the future, including as a result of U.S. government shutdowns or further downgrades to the U.S. government s sovereign credit rating or the perceived credit worthiness of the United States or other large global economies. Unfavorable economic conditions, including future recessions, also could increase our funding costs, limit our access to the capital markets or result in a decision by lenders not to extend credit to us. We may in the future have difficulty accessing debt and equity capital on attractive terms, or at all, and a severe disruption and instability in the global financial markets or deteriorations in credit and financing conditions may cause us to reduce the volume of loans we originate and/or fund, adversely affect the value of our portfolio investments or otherwise have a material adverse effect on our business, financial condition, results of operations and cash flows.

Global economic, political and market conditions may adversely affect our business, results of operations and financial condition, including our revenue growth and profitability.

The current worldwide financial market situation, as well as various social and political tensions in the United States and around the world, may contribute to increased market volatility, may have long-term effects on the U.S. and worldwide financial markets, and may cause economic uncertainties or deterioration in the United States and worldwide. The U.S. and global capital markets experienced extreme volatility and disruption during the economic downturn that began in mid-2007, and the U.S. economy was in a recession for several consecutive calendar quarters during the same period. In 2010, a financial crisis emerged in Europe, triggered by high budget deficits and rising direct and contingent sovereign debt, which created concerns about the ability of certain nations to continue to service their sovereign debt obligations. Risks resulting from such debt crisis, including any austerity measures taken in exchange for bailout of certain nations, and any future debt crisis in Europe or any similar crisis elsewhere could have a detrimental impact on the global economic recovery, sovereign and non-sovereign debt in certain countries and the financial condition of financial institutions generally. In June 2016, the United Kingdom held a referendum in which voters approved an exit from the European Union, which led to disruption and instability in the global markets, and the implications of the United Kingdom s pending withdrawal from the European Union are unclear at present. There is continued concern about national-level support for the Euro and the accompanying coordination of fiscal and wage policy among European Economic and Monetary Union member countries. In addition, the fiscal and monetary policies of foreign nations, such as Russia and China, may have a severe impact on the worldwide and U.S. financial markets.

As a result of the 2016 U.S. election, the Republican Party currently controls both the executive and legislative branches of government, which increases the likelihood that legislation may be adopted that could

-21-

significantly affect the regulation of U.S. financial markets. Areas subject to potential change, amendment or repeal include the Dodd-Frank Act and the authority of the Federal Reserve and the Financial Stability Oversight Council. The United States may also potentially withdraw from or renegotiate various trade agreements and take other actions that would change current trade policies of the United States. We cannot predict which, if any, of these actions will be taken or, if taken, their effect on the financial stability of the United States. Such actions could have a significant adverse effect on our business, financial condition and results of operations. We cannot predict the effects of these or similar events in the future on the U.S. economy and securities markets or on our investments. We monitor developments and seek to manage our investments in a manner consistent with achieving our investment objective, but there can be no assurance that we will be successful in doing so.

We may experience fluctuations in our quarterly operating results.

We could experience fluctuations in our quarterly operating results due to a number of factors, including our ability or inability to make investments in companies that meet our investment criteria, the interest rate payable on the debt securities we acquire, the default rate on such securities, the level of our expenses, variations in and the timing of the recognition of realized and unrealized gains or losses, the degree to which we encounter competition in our markets and general economic conditions. As a result of these factors, results for any period should not be relied upon as being indicative of performance in future periods.

We will be subject to corporate-level U.S. federal income tax if we are unable to maintain qualification as a RIC under Subchapter M of the Code.

We have elected to be treated as a RIC under Subchapter M of the Code; however, no assurance can be given that we will be able to maintain our RIC tax treatment. To maintain our tax treatment as a RIC under Subchapter M of the Code and to avoid the imposition of U.S. federal income taxes on income and gains distributed to our stockholders, we must meet certain requirements, including source-of-income, asset diversification and annual distribution requirements. The source-of-income requirement will be satisfied if we derive at least 90.0% of our gross income for each year from dividends, interest, gains from sale of securities or similar sources. To maintain our tax treatment as a RIC, we must also meet certain asset diversification requirements at the end of each calendar quarter. Failure to meet these requirements may result in our losing our RIC tax treatment or our having to dispose of certain investments quickly in order to prevent the loss of RIC tax treatment. Because most of our investments will be in private or thinly traded public companies, any such dispositions could be made at disadvantageous prices and may result in substantial losses. The annual distribution requirement applicable to RICs will be satisfied if we distribute at least 90.0% of our net ordinary income and net short-term capital gains in excess of net long-term capital losses, if any, to our stockholders on an annual basis. In addition, we will be subject to a 4.0% nondeductible federal excise tax to the extent that we do not satisfy certain additional minimum distribution requirements on a calendar-year basis. We will be subject, to the extent we use debt financing, to certain asset coverage ratio requirements under the 1940 Act and financial covenants under loan and credit agreements that could, under certain circumstances, restrict us from making annual distributions necessary to maintain our tax treatment as a RIC. If we are unable to obtain cash from other sources, we may fail to maintain our tax treatment as a RIC and, thus, may be subject to U.S. federal corporate income tax on our entire taxable income without regard to any distributions made by us. If we fail to maintain our tax treatment as a RIC for any reason and become subject to U.S. corporate income tax, the resulting tax liability could substantially reduce our net assets, the amount of income available for distributions to stockholders and the amount of our distributions and the amount of funds available for new investments. Such a failure would have a material adverse effect on us and our stockholders.

We may not be able to pay you distributions, our distributions may not grow over time, a portion of distributions paid to you may be a return of capital, and investors in our debt securities may not receive all of the interest income

to which they are entitled.

We intend to pay quarterly distributions to our stockholders out of assets legally available for distribution. We cannot assure you that we will achieve investment results that will allow us to make a specified level of cash

-22-

distributions or year-to-year increases in cash distributions. Our ability to pay distributions might be harmed by, among other things, the risk factors described in this prospectus. In addition, the inability to satisfy the asset coverage test applicable to us as a BDC could, in the future, limit our ability to pay distributions. All distributions will be paid at the discretion of our board of directors and will depend on our earnings, our financial condition, maintenance of our RIC tax treatment, compliance with applicable BDC regulations, SBA regulations, state corporate laws affecting the distribution of corporate assets and such other factors as our board of directors may deem relevant from time to time. We cannot assure you that we will pay distributions to our stockholders in the future.

If we issue debt securities in the future, the above-referenced restrictions on distributions may also inhibit our ability to make required interest payments to holders of any such debt securities, which may cause a default under the terms of our then-existing debt agreements. Such a default could materially increase our cost of raising capital, as well as cause us to incur penalties under the terms of our then-existing debt agreements.

When we make quarterly distributions, we will be required to determine the extent to which such distributions are paid out of current and accumulated earnings and profits, recognized capital gain or capital. To the extent there is a return of capital, investors will be required to reduce their basis in our stock for U.S. federal income tax purposes.

We may have difficulty paying our required distributions if we recognize income before, or without, receiving cash representing such income.

For U.S. federal income tax purposes, we are required to include in our income certain amounts that we have not yet received in cash, such as original issue discount, which may arise if we receive warrants in connection with the making of a loan or in other circumstances, and contractual payment-in-kind interest, which represents contractual interest added to the loan balance and due at the end of the loan term. Such original issue discount, or increases in loan balances as a result of contracted payment-in-kind arrangements, will be included in our income before we receive any corresponding cash payments. We also may be required to include in our income certain other amounts that we will not receive in cash.

Since in certain cases we may be required to recognize income before or without receiving cash representing such income, we may have difficulty meeting the requirement to distribute on an annual basis at least 90.0% of our net ordinary income and net short-term capital gains in excess of net long-term capital losses, if any, to maintain our tax treatment as a RIC. In such a case, we may have to sell some of our investments at times and/or at prices we would not consider advantageous, raise additional debt or equity capital or forgo new investment opportunities to satisfy the annual distribution requirements. In such circumstances, if we are unable to obtain such cash from other sources, we may fail to maintain our tax treatment as a RIC and thus be subject to corporate-level U.S. federal income tax. See We will be subject to corporate-level U.S. federal income tax if we are unable to maintain our qualification as a RIC under Subchapter M of the Code.

If a portfolio company defaults on a loan that is structured to provide accrued interest, it is possible that accrued interest previously used in the calculation of the incentive fee will become uncollectible. Our investment advisor will not be under any obligation to reimburse us for any part of the incentive fee it received that was based on accrued income that we never receive as a result of a default by an entity on the obligation that resulted in the accrual of such income. That part of the incentive fee payable by us that relates to our net investment income will be computed and paid on income that may include interest that has been accrued but not yet received in cash, such as market discount, debt instruments with payment-in-kind interest, preferred stock with payment-in-kind dividends and zero coupon securities.

You may have a current tax liability on distributions you elect to reinvest in our common stock but would not receive cash to pay such tax liability.

If you participate in our dividend reinvestment plan, you will be deemed to have received, and for U.S. federal income tax purposes will be taxed on, the amount reinvested in our common stock to the extent the

-23-

amount reinvested was not a tax-free return of capital. As a result, unless you are a tax-exempt entity, you may have to use funds from other sources to pay your tax liability on the value of our common stock received as a result of the distribution.

Because we expect to distribute substantially all of our net investment income and net realized capital gains to our stockholders, we will need additional capital to finance our growth, and such capital may not be available on favorable terms or at all.

We have elected to be taxed for U.S. federal income tax purposes as a RIC under Subchapter M of the Code. If we continue to meet certain requirements, including source-of-income, asset diversification and distribution requirements, and if we continue to be regulated as a BDC, we will continue to qualify to be taxed as a RIC and therefore will not have to pay U.S. federal corporate income tax on income that we timely distribute to our stockholders, allowing us to substantially reduce or eliminate our corporate-level income tax liability. As a BDC, we are generally required to meet a coverage ratio of total assets to total senior securities, which includes all of our borrowings (other than SBA leverage) and any preferred stock we may issue in the future, of at least 200.0% at the time we issue any debt or preferred stock. This requirement limits the amount of our leverage. Because we will continue to need capital to grow our investment portfolio, this limitation may prevent us from incurring debt or issuing preferred stock and require us to raise additional equity at a time when it may be disadvantageous to do so.

While we expect to be able to borrow and to issue additional debt and equity securities, we cannot assure you that debt and equity financing will be available to us on favorable terms, or at all. If additional funds are not available to us, we could be forced to curtail or cease new investment activities, and our net asset value could decline. In addition, as a BDC, we generally are not permitted to issue equity securities priced below net asset value without stockholder approval. At our Annual Stockholders Meeting on June 2, 2016, our stockholders voted to allow us to issue common stock at a price below net asset value per share for a period of one year ending on the earlier of June 2, 2017 or the date of our 2017 Annual Meeting of Stockholders. We expect to present to our stockholders a similar proposal at our 2017 Annual Meeting of Stockholders. The maximum number of shares issuable below net asset value pursuant to the authority granted by our stockholders that could result in such dilution is limited to 25.0% of FIC s then outstanding common stock immediately prior to each such sale. We do not intend to issue shares of our common stock below net asset value unless our board of directors determines that it would be in our stockholders best interests to do so. The level of net asset value dilution that could result from such an offering is not limited.

Illustration: Examples of Dilutive Effect of the Issuance of Shares Below Net Asset Value. The following table illustrates the level of net asset value dilution that would be experienced by a nonparticipating stockholder in three different hypothetical offerings of different sizes and levels of discount from net asset value per share, although it is not possible to predict the level of market price decline that may occur. Actual sales prices and discounts may differ from the presentation below.

Assume that Company XYZ has 1,000,000 common shares outstanding, \$15,000,000 in total assets and \$5,000,000 in total liabilities. The current net asset value and net asset value per share are thus \$10,000,000 and \$10.00, respectively. The table illustrates the dilutive effect on nonparticipating Stockholder A of (1) an offering of 50,000 shares (5.0% of the outstanding shares) at \$9.50 per share after offering expenses and commission (a 5.0% discount from net asset value), (2) an offering of 100,000 shares (10.0% of the outstanding shares) at \$9.00 per share after offering expenses and commissions (a 10.0% discount from net asset value) and (3) an offering of 200,000 shares (20.0% of the outstanding shares) at \$8.00 per share after offering expenses and commissions (a 20.0% discount from net asset value). The acronym NAV stands for net asset value.

-24-

In any offering of common stock, we will present the actual dilution to stockholders in tabular form in the prospectus supplement specific to that offering.

Our board of directors may change our investment objective, operating policies and strategies without prior notice or stockholder approval, the effects of which may be adverse.

Our board of directors has the authority, except as otherwise provided by the 1940 Act, to modify or waive certain of our operating policies and strategies without prior notice and without stockholder approval. Under Maryland law, we also cannot be dissolved without prior stockholder approval except by judicial action. In addition, upon approval of a majority of our stockholders, we may elect to withdraw our status as a BDC. If we, or Fund I, decide to withdraw our election, or if we otherwise fail to maintain our qualification, as a BDC, we may be subject to the substantially greater regulation under the 1940 Act as a closed-end investment company. Compliance with such regulations would significantly decrease our operating flexibility, and could significantly increase our costs of doing business. We cannot predict the effect any changes to our current operating policies and strategies would have on our business, operating results or the value of our common stock. Nevertheless, any such changes could adversely affect our business and impair our ability to make distributions.

Regulations governing our operation as a BDC affect our ability to raise, and the way in which we raise, additional capital which may have a negative effect on our growth.

Our business will require capital to operate and grow. We may acquire such additional capital from the following sources:

Senior Securities. Currently we, through the Funds, issue debt securities guaranteed by the SBA and have access to funds under a revolving credit facility. In the future, we may issue debt securities or preferred stock and/or borrow money from banks or other financial institutions, which we refer to collectively as senior securities. As a result of issuing senior securities, we will be exposed to additional risks, including, but not limited to, the following:

Under the provisions of the 1940 Act, we are permitted, as a BDC, to issue senior securities only in amounts such that our asset coverage, as defined in the 1940 Act, equals at least 200.0% after each issuance of senior securities. If the value of our assets declines, we may be unable to satisfy this test. If that happens, we may sell a portion of our investments and, depending on the nature of our leverage, repay a portion of our debt at a time when such sales and/or repayments may be disadvantageous. Further, we will not be permitted to declare or make any distribution to stockholders or repurchase shares until such time as we satisfy this test.

Any amounts that we use to service our debt or make payments on preferred stock will not be available for distributions to our common stockholders.

It is likely that any senior securities or other indebtedness we issue will be governed by an indenture or other instrument containing covenants restricting our operating flexibility. Additionally, some of these securities or other indebtedness may be rated by rating agencies, and in obtaining a rating for such securities and other indebtedness, we may be required to abide by operating and investment guidelines that further restrict operating and financial flexibility.

We and, indirectly, our stockholders will bear the cost of issuing and servicing such securities and other indebtedness.

Preferred stock or any convertible or exchangeable securities that we issue in the future may have rights, preferences and privileges more favorable than those of our common stock, including separate voting rights and could delay or prevent a transaction or a change in control to the detriment of the holders of our common stock.

Additional Common Stock. Under the provisions of the 1940 Act, we are not generally able to issue and sell our common stock at a price below net asset value per share. We may, however, sell our common stock, warrants, options or rights to acquire our common stock, at a price below the current net asset value of the common stock if our board of directors determines that such sale is in the best interests of our stockholders, and our stockholders approve such sale. At our Annual Stockholders Meeting on June 2, 2016, our stockholders voted to allow us to issue common stock at a price below net asset value per share for a period of one year ending on the earlier of June 2, 2017 or the date of our 2017 Annual Meeting of Stockholders. We expect to present to our stockholders a similar proposal at our 2017 Annual Meeting of Stockholders. The maximum number of shares issuable below net asset value pursuant to the

authority granted by our stockholders that could result in such dilution is limited to 25.0% of FIC s then outstanding common stock immediately prior to each such sale. We do not intend to sell or otherwise issue shares of our common stock below net asset value unless our board of directors determines that it would be in our stockholders best interests to do so. The level of net asset value dilution that could result from such an offering is not limited. In any such case, however, the price at which our common stock is to be issued and sold may not be less than a price which, in the determination of our board of directors, closely approximates the market value of such securities (less any distributing commission or discount). We may also make rights offerings to our stockholders at prices per share less than the net asset value per share, subject to applicable requirements of the 1940 Act and the regulations and staff interpretations thereunder. If we raise additional funds by issuing more common stock or senior securities convertible into, or

exchangeable for, our common stock, the percentage ownership of our stockholders at that time would decrease, and they may experience dilution. Moreover, we can offer no assurance that we will be able to issue and sell additional equity securities in the future, on favorable terms or at all.

Changes in laws or regulations governing our operations may adversely affect our business or cause us to alter our business strategy.

We are subject to regulation at the local, state and federal level. New legislation may be enacted or new interpretations, rulings or regulations could be adopted, including those governing the types of investments we are permitted to make, any of which could harm us and our stockholders, potentially with retroactive effect. In addition, any change to the SBA s current debenture program could have a significant impact on our ability to obtain low-cost leverage and, therefore, our competitive advantage over other funds.

Additionally, any changes to the laws and regulations governing our operations related to permitted investments may cause us to alter our investment strategy in order to meet our investment objectives. Such changes could result in material differences to the strategies and plans set forth in this report and may shift our investment focus from the areas of expertise of our investment advisor to other types of investments in which our investment advisor may have little or no expertise or experience. Any such changes, if they occur, could have a material adverse effect on our results of operations and the value of your investment.

Uncertainty about the financial stability of the United States and the new presidential administration could have a significant adverse effect on our business, financial condition and results of operations.

As a result of the 2016 U.S. election, the Republican Party currently controls both the executive and legislative branches of government, which increases the likelihood that legislation may be adopted that could significantly affect the regulation of U.S. financial markets. Areas subject to potential change, amendment or repeal include the Dodd-Frank Act and the authority of the Federal Reserve and the Financial Stability Oversight Council. The United States may also potentially withdraw from or renegotiate various trade agreements and take other actions that would change current trade policies of the United States. We cannot predict which, if any, of these actions will be taken or, if taken, their effect on the financial stability of the United States. Such actions could have a significant adverse effect on our business, financial condition and results of operations. We cannot predict the effects of these or similar events in the future on the U.S. economy and securities markets or on our investments. We monitor developments and seek to manage our investments in a manner consistent with achieving our investment objective, but there can be no assurance that we will be successful in doing so.

Our ability to enter into and exit investment transactions with our affiliates will be restricted.

Except in those instances where we have received prior exemptive relief from the SEC, we will be prohibited under the 1940 Act from knowingly participating in certain transactions with our affiliates without the prior approval of our Independent Directors. We, our investment advisor, the Funds, and Fidus Credit Opportunities, L.P. received exemptive relief from the SEC under the 1940 Act, which permits us to co-invest with other funds managed by our investment advisor or its affiliates in a manner consistent with our investment objective, positions, policies, strategies and restrictions as well as regulatory requirements and other pertinent factors. In addition, any person that owns, directly or indirectly, 5.0% or more of our outstanding voting securities is deemed our affiliate for purposes of the 1940 Act and we are generally prohibited from buying or selling any security from or to such affiliate, absent the prior approval of our Independent Directors. The 1940 Act also prohibits joint transactions with an affiliate, which could include investments in the same portfolio company (whether at the same or different times), without prior approval of our Independent Directors. If a person acquires more than 25.0% of our voting securities, we will be prohibited from

buying or selling any security from or to such person, or entering into joint transactions with such person, absent the prior approval of the SEC. These restrictions could limit or prohibit us from making certain attractive investments that we might otherwise make absent such restrictions.

Our investment advisor can resign on 60 days notice, and we may not be able to find a suitable replacement within that time, resulting in a disruption in our operations that could adversely affect our financial condition, business and results of operations.

Our investment advisor has the right, under the Investment Advisory Agreement, to resign at any time upon not less than 60 days written notice, whether we have found a replacement or not. If our investment advisor resigns, we may not be able to find a new investment advisor and administrator or hire internal management with similar expertise and ability to provide the same or equivalent services on acceptable terms within 60 days, or at all. If we are unable to do so quickly, our operations are likely to experience a disruption, our financial condition, business and results of operations as well as our ability to pay distributions are likely to be adversely affected and the market price of our shares may decline. In addition, investment activities are likely to suffer if we are unable to identify and reach an agreement with a single institution or group of executives having the expertise possessed by our investment advisor and its affiliates. Even if we are able to retain comparable management, whether internal or external, the integration of such management and their lack of familiarity with our investment objective may result in additional costs and time delays that may adversely affect our financial condition, business and results of operations.

Our investment advisor can resign from its role as our administrator under the Administration Agreement, and we may not be able to find a suitable replacement, resulting in a disruption in our operations that could adversely affect our financial condition, business and results of operations.

Our investment advisor also has the right to resign under the Administration Agreement, whether we have found a replacement or not. If our investment advisor resigns as our administrator, we may not be able to find a new administrator or hire internal management with similar expertise and ability to provide the same or equivalent services on acceptable terms, or at all. If we are unable to do so quickly, our operations are likely to experience a disruption, our financial condition, business and results of operations as well as our ability to pay distributions are likely to be adversely affected and the market price of our shares may decline. In addition, administrative activities are likely to suffer if we are unable to identify and reach an agreement with a service provider or individuals with the expertise possessed by our investment advisor. Even if we are able to retain a comparable service provider or individuals to perform such services, whether internal or external, their integration into our business and lack of familiarity with our investment objective may result in additional costs and time delays that may adversely affect our financial condition, business and results of operations.

Efforts to comply with the Sarbanes-Oxley Act will involve significant expenditures, and non-compliance with the Sarbanes-Oxley Act may adversely affect us and the market price of our common stock.

As a publicly-traded company, we incur legal, accounting and other expenses, including costs associated with the periodic reporting requirements applicable to a company whose securities are registered under the Exchange Act, as well as additional corporate governance requirements, including requirements under the Sarbanes-Oxley Act and other rules implemented by the SEC.

Section 404 of the Sarbanes-Oxley Act requires that public companies evaluate and report on their systems of internal control over financial reporting. In addition, our independent registered public accounting firm must report on management s evaluation of those controls. In future periods, we may identify deficiencies in our system of internal controls over financial reporting that may require remediation. There can be no assurances that any such future deficiencies identified may not be material weaknesses that would be required to be reported in future periods.

The failure in cyber security systems, as well as the occurrence of events unanticipated in our disaster recovery systems and management continuity planning could impair our ability to conduct business effectively.

Our business is dependent on our and third parties communications and information systems. The occurrence of a disaster such as a cyber-attack, a natural catastrophe, an industrial accident, a terrorist attack or

-28-

war, events unanticipated in our disaster recovery systems, or a support failure from external providers, could have an adverse effect on our ability to conduct business and on our results of operations and financial condition, particularly if those events affect our computer-based data processing, transmission, storage, and retrieval systems or destroy data. If a significant number of our managers were unavailable in the event of a disaster, our ability to effectively conduct our business could be severely compromised.

We depend heavily upon computer systems to perform necessary business functions. Despite our implementation of a variety of security measures, our computer systems could be subject to cyber-attacks and unauthorized access, such as physical and electronic break-ins or unauthorized tampering. Like other companies, we may experience threats to our data and systems, including malware and computer virus attacks, unauthorized access, system failures and disruptions. If one or more of these events occurs, it could potentially jeopardize the confidential, proprietary and other information processed and stored in, and transmitted through, our computer systems and networks, or otherwise cause interruptions or malfunctions in our operations, which could result in damage to our reputation, financial losses, litigation, increased costs, regulatory penalties and/or customer dissatisfaction or loss. These events, in turn, could have a material adverse effect on our operating results and negatively affect the market price of our common stock and our ability to pay dividends to our stockholders.

Risks Relating to Our Investments

Economic recessions or downturns could impair our portfolio companies and harm our operating results.

Many of our portfolio companies are susceptible to economic slowdowns or recessions (including industry specific downturns) and may be unable to repay our debt investments during these periods. Therefore, our non-performing assets are likely to increase and the value of our portfolio is likely to decrease during these periods. Adverse economic conditions may decrease the value of collateral securing some of our debt investments and the value of our equity investments. Economic slowdowns or recessions could lead to financial losses in our portfolio and a decrease in revenues, net income and assets. Unfavorable economic conditions also could increase our funding costs, limit our access to the capital markets or result in a decision by lenders not to extend credit to us. These events could prevent us from increasing our investments and harm our operating results.

Our investments in certain industry sectors, such as the energy sector, may be subject to significant political, economic and capacity risks that may increase the possibility that we lose all or a part of our investment.

The revenues and profitability of certain portfolio companies may be significantly affected by the future prices of and the demand for oil, natural gas liquids and natural gas, which are inherently uncertain. Investments in energy companies may have significant shortfalls in projected cash flow if prices decline from levels projected at the time the investment is made. Various factors beyond our control could affect energy prices, including worldwide supplies, political instability or armed conflicts in oil, natural gas liquids and natural gas producing regions, the price of foreign imports, the level of consumer demand, the price and availability of alternative fuels, capacity constraints and changes in existing government regulation, taxation and price controls. Energy prices have fluctuated greatly during the past, and energy markets continue to be volatile.

Changes in healthcare laws and other regulations applicable to some of our portfolio companies businesses may constrain their ability to offer their products and services.

Changes in healthcare or other laws and regulations applicable to the businesses of some of our portfolio companies may occur that could increase their compliance and other costs of doing business, require significant systems enhancements, or render their products or services less profitable or obsolete, any of which could have a material

adverse effect on their results of operations. There has also been an increased political and regulatory focus on healthcare laws in recent years, and new legislation could have a material effect on the business and operations of some of our portfolio companies.

-29-

Our investments in portfolio companies may be risky, and we could lose all or part of our investment.

Investing in lower middle-market companies involves a number of significant risks. Among other things, these companies:

may have limited financial resources and may be unable to meet their obligations under their debt instruments that we hold, which may be accompanied by a deterioration in the value of any collateral and a reduction in the likelihood of us realizing any guarantees from subsidiaries or affiliates of portfolio companies that we may have obtained in connection with our investment;

may have shorter operating histories, narrower product lines and smaller market shares, which tend to render them more vulnerable to competitors actions and market conditions, as well as general economic downturns, than larger businesses;

are more likely to depend on the management talents and efforts of a small group of persons; therefore, the death, disability, resignation or termination of one or more of these persons could have a material adverse impact on our portfolio company and, in turn, on us;

generally have less predictable operating results, may from time to time be parties to litigation, may be engaged in rapidly changing businesses with products subject to a substantial risk of obsolescence, and may require substantial additional capital to support their operations, finance expansion or maintain their competitive position; and

generally have less publicly available information about their businesses, operations and financial condition. If we are unable to uncover all material information about these companies, we may not make a fully informed investment decision, and may lose all or part of our investment.

In addition, in the course of providing significant managerial assistance to certain portfolio companies, certain of our management and directors may serve as directors on the boards of such companies. To the extent that litigation arises out of investments in these portfolio companies, our management and directors may be named as defendants in such litigation, which could result in an expenditure of funds (through our indemnification of such officers and directors) and the diversion of management time and resources.

The lack of liquidity in our investments may adversely affect our business.

All of our assets may be invested in illiquid securities, and a substantial portion of our investments in leveraged companies will be subject to legal and other restrictions on resale or will otherwise be less liquid than more broadly traded public securities. The illiquidity of these investments may make it difficult for us to sell such investments when desired. In addition, if we are required to liquidate all or a portion of our portfolio quickly, we may realize significantly less than the value at which we have previously recorded these investments. As a result, we do not expect to achieve liquidity in our investments in the near-term. However, to maintain the elections to be regulated as a BDC and as a RIC, we may have to dispose of investments if they do not satisfy one or more of the applicable criteria under the respective regulatory frameworks. We may also face other restrictions on our ability to liquidate an investment in a

portfolio company to the extent that we or our investment advisor have material nonpublic information regarding such portfolio company.

We may not have the funds to make additional investments in our portfolio companies which could impair the value of our portfolio.

After our initial investment in a portfolio company, we may be called upon from time to time to provide additional funds to such company or have the opportunity to increase our investment through the exercise of a warrant to purchase common stock. There is no assurance that we will make, or will have sufficient funds to make, follow-on investments. Any decisions not to make a follow-on investment or any inability on our part to make such an investment may have a negative impact on a portfolio company in need of such an investment, may result in a missed opportunity for us to increase our participation in a successful operation or may reduce the

expected yield on the investment. Even if we have sufficient capital to make a desired follow-on investment, we may elect not to make a follow-on investment because we may not want to increase our level of risk, because we prefer other opportunities or because we are inhibited by compliance with BDC requirements or the desire to maintain our RIC tax treatment. Our ability to make follow-on investments may also be limited by our investment advisor s allocation policy.

Portfolio companies may incur debt that ranks equally with, or senior to, our investments in such companies.

We will invest primarily in mezzanine debt as well as equity issued by lower middle-market companies. The portfolio companies may have, or may be permitted to incur, other debt that ranks equally with, or senior to, the debt in which we invest. By their terms, such senior debt instruments may entitle the holders to receive payment of interest or principal on or before the dates on which we are entitled to receive payments with respect to the mezzanine debt instruments in which we invest. Also, in the event of insolvency, liquidation, dissolution, reorganization or bankruptcy of a portfolio company, holders of debt instruments ranking senior to our investment in that portfolio company would typically be entitled to receive payment in full before we receive any distribution. After repaying such senior creditors, such portfolio company may not have any remaining assets to use for repaying its obligation to us. In the case of debt ranking equally with debt instruments in which we invest, we would have to share on an equal basis any distributions with other creditors holding such debt in the event of an insolvency, liquidation, dissolution, reorganization or bankruptcy of the relevant portfolio company.

There may be circumstances where our debt investments could be subordinated to claims of other creditors or could be subject to lender liability claims.

Even though we may have structured certain of our investments as senior loans, if one of our portfolio companies were to go bankrupt, depending on the facts and circumstances, including the extent to which we actually provided managerial assistance to that portfolio company, a bankruptcy court might recharacterize our debt investment and subordinate all or a portion of our claim to that of other creditors. We may also be subject to lender liability claims for actions taken by us with respect to a borrower s business or instances where we exercise control over the borrower. It is possible that we could become subject to a lender s liability claim, including as a result of actions taken in rendering significant managerial assistance.

Second priority liens on collateral securing loans that we make to our portfolio companies may be subject to control by senior creditors with first priority liens. If there is a default, the value of the collateral may not be sufficient to repay in full both the first priority creditors and us.

Certain loans we make to portfolio companies are and will be secured on a second priority basis by the same collateral securing senior secured debt of such companies. The first priority liens on the collateral secure the portfolio company s obligations under any outstanding senior debt and may secure certain other future debt that may be permitted to be incurred by the company under the agreements governing the loans. The holders of obligations secured by the first priority liens on the collateral will generally control the liquidation of and be entitled to receive proceeds from any realization of the collateral to repay their obligations in full before us. In addition, the value of the collateral in the event of liquidation will depend on market and economic conditions, the availability of buyers and other factors. There can be no assurance that the proceeds, if any, from the sale or sales of all of the collateral would be sufficient to satisfy the loan obligations secured by the second priority liens after payment in full of all obligations secured by the first priority liens on the collateral. If such proceeds are not sufficient to repay amounts outstanding under the loan obligations secured by the second priority liens, then we, to the extent not repaid from the proceeds of the sale of the collateral, will only have an unsecured claim against the company s remaining assets, if any.

The rights we may have with respect to the collateral securing the loans we make to portfolio companies with senior debt outstanding may also be limited pursuant to the terms of one or more intercreditor agreements entered into with the holders of senior debt. Under an intercreditor agreement, at any time that obligations having

the benefit of the first priority liens are outstanding, any of the following actions that may be taken in respect to the collateral will be at the direction of the holders of the obligations secured by the first priority liens:

the ability to cause the commencement of enforcement proceedings against the collateral;

the ability to control the conduct of such proceedings;

the approval of amendments to collateral documents;

releases of liens on the collateral; and

waivers of past defaults under collateral documents.

We may not have the ability to control or direct such actions, even if our rights are adversely affected.

We may hold the debt securities of leveraged companies that may, due to the significant volatility of such companies, enter into bankruptcy proceedings.

Leveraged companies may experience bankruptcy or similar financial distress. The bankruptcy process has a number of significant inherent risks. Many events in a bankruptcy proceeding are the product of contested matters and adversary proceedings and are beyond the control of the creditors. A bankruptcy filing by an issuer may adversely and permanently affect the issuer. If the proceeding is converted to a liquidation, the value of the issuer may not equal the liquidation value that was believed to exist at the time of the investment. The duration of a bankruptcy proceeding is also difficult to predict, and a creditor s return on investment can be adversely affected by delays until the plan of reorganization or liquidation ultimately becomes effective. The administrative costs in connection with a bankruptcy proceeding are frequently high and would be paid out of the debtor s estate prior to any return to creditors. Because the standards for classification of claims under bankruptcy law are vague, our influence with respect to the class of securities or other obligations we own may be lost by increases in the number and amount of claims in the same class or by different classification and treatment. In the early stages of the bankruptcy process, it is often difficult to estimate the extent of, or even to identify, any contingent claims that might be made. In addition, certain claims that have priority by law (for example, claims for taxes) may be substantial.

Any unrealized depreciation we experience on our investment portfolio may be an indication of future realized losses, which could reduce our income available for distribution.

As a BDC, we are required to carry our investments at market value or, if no market value is ascertainable, at the fair value as determined in good faith by our board of directors. Decreases in the market values or fair values of our investments will be recorded as unrealized depreciation. Any unrealized depreciation in our investment portfolio could be an indication of a portfolio company s inability to meet its repayment obligations to us with respect to the affected investments. This could result in realized losses in the future and ultimately in reductions of our income available for distribution in future periods.

Defaults by our portfolio companies will harm our operating results.

A portfolio company s failure to satisfy financial or operating covenants imposed by us or other lenders could lead to defaults and, potentially, termination of its loans and foreclosure on its assets. This could trigger cross-defaults under other agreements and jeopardize the portfolio company s ability to meet its obligations under the debt or equity securities that we hold. We may incur expenses to the extent necessary to seek recovery upon default or to negotiate new terms, which may include the waiver of certain financial covenants, reduced interest and/or loss of principal, with a defaulting portfolio company.

We do not expect to control many of our portfolio companies.

We do not expect to control many of our portfolio companies, even though we may have board representation or board observation rights, and the debt agreements may contain certain restrictive covenants. As

-32-

a result, we are subject to the risk that a portfolio company in which we invest may make business decisions with which we disagree and the management of such company, as representatives of the holders of the company s common equity, may take risks or otherwise act in ways that do not serve our interests as debt investors. Due to the lack of liquidity for our investments in private companies in the lower middle-market, we may not be able to dispose of our interests in our portfolio companies as readily as we would like or at an appropriate valuation. As a result, a portfolio company may make decisions that could decrease the value of our portfolio holdings.

We are a non-diversified investment company within the meaning of the 1940 Act; therefore we are not limited with respect to the proportion of our assets that may be invested in securities of a single issuer.

We are classified as a non-diversified investment company within the meaning of the 1940 Act, which means that we are not limited by the 1940 Act with respect to the proportion of our assets that we may invest in securities of a single issuer. To the extent that we assume large positions in the securities of a small number of issuers, our net asset value may fluctuate to a greater extent than that of a diversified investment company as a result of changes in the financial condition or the market—s assessment of the issuer and the aggregate returns we realize may be significantly adversely affected if a small number of investments perform poorly or if we need to write down the value of any one investment. Additionally, while we are not targeting any specific industries, our investments may be concentrated in relatively few industries. As a result, a downturn in any particular industry in which we are invested could also significantly impact the aggregate returns we realize. We may also be more susceptible to any single economic or regulatory occurrence than a diversified investment company. Beyond the asset diversification requirements applicable to RICs, we do not have fixed guidelines for diversification, and our investments could be concentrated in relatively few portfolio companies.

Prepayments of our debt investments by our portfolio companies could adversely impact our results of operations and reduce our return on equity.

We are subject to the risk that the investments we make in our portfolio companies may be repaid prior to maturity. When this occurs, we will generally reinvest these proceeds in temporary investments, pending future investments in new portfolio companies. These temporary investments will typically have substantially lower yields than the debt being repaid, and we could experience significant delays in reinvesting these amounts. In addition, any future investment of such amounts in a new portfolio company may also be at lower yields than the investment that was repaid. As a result, our results of operations could be materially adversely affected if one or more of our portfolio companies elects to prepay amounts owed to us. Additionally, prepayments could negatively impact our return on equity, which could result in a decline in the market price of our common stock.

We may not realize gains from our equity investments.

Certain investments that we have made in the past and may make in the future include warrants or other equity or equity-related securities. In addition, we may from time to time make non-control, equity co-investments in portfolio companies. Our goal is to realize gains upon our disposition of such equity interests. However, the equity interests we receive may not appreciate in value and, in fact, may decline in value. We also may be unable to realize any value if a portfolio company does not have a liquidity event, such as a sale of the business, recapitalization or public offering, which would allow us to sell the underlying equity interests. We often seek puts or similar rights to give us the right to sell our equity securities back to the portfolio company issuer. We may be unable to exercise these put rights for the consideration provided in our investment documents if the issuer is in financial distress. Accordingly, we may not be able to realize gains from our equity interests, and any gains that we do realize on the disposition of any equity interests may not be sufficient to offset any other losses we experience.

If our primary investments are deemed not to be qualifying assets, we could be precluded from investing in our desired manner or deemed to be in violation of the 1940 Act.

In order to maintain our status as a BDC, we may not acquire any assets other than qualifying assets unless, at the time of and after giving effect to such acquisition, at least 70.0% of our total assets are qualifying

-33-

assets. We believe that most of the investments that we may acquire in the future will constitute qualifying assets. However, we may be precluded from investing in what we believe are attractive investments if such investments are not qualifying assets for purposes of the 1940 Act. If we do not invest a sufficient portion of our assets in qualifying assets, we could violate the 1940 Act provisions applicable to BDCs and be precluded from making follow-on investments in existing portfolio companies (which could result in the dilution of our position) or required to dispose of investments at inappropriate times in order to come into compliance with the 1940 Act. If we need to dispose of such investments quickly, it could be difficult to dispose of such investments on favorable terms. We may not be able to find a buyer for such investments and, even if we do find a buyer, we may have to sell the investments at a substantial loss. Any such outcomes would have a material adverse effect on our business, financial condition and results of operations.

The disposition of our investments may result in contingent liabilities.

A significant portion of our investments involve private securities and we expect that a significant portion of our investments will continue to involve private securities. In connection with the disposition of an investment in private securities, we may be required to make representations about the business and financial affairs of the portfolio company typical of those made in connection with the sale of a business. We may also be required to indemnify the purchasers of such investment to the extent that any such representations turn out to be inaccurate or with respect to potential liabilities. These arrangements may result in contingent liabilities that ultimately result in funding obligations that we must satisfy through its return of distributions previously made to it.

We may be unable to invest a significant portion of any net proceeds from an offering or from exiting an investment or other capital on acceptable terms, which could harm our financial condition and operating results.

We may be unable to invest the net proceeds of any offering or from exiting an investment or other sources of capital on acceptable terms within the time period that we anticipate or at all. Delays in investing such capital may cause our performance to be worse than that of fully invested BDCs or other lenders or investors pursuing comparable investment strategies.

Depending on market conditions and the amount of the capital involved, it may take us a substantial period of time to invest substantially all the capital in securities meeting our investment objective. During this period, we will invest such capital primarily in short-term securities consistent with our BDC election and our election to be taxed as a RIC, which may produce returns that are significantly lower than the returns which we expect to achieve when our portfolio is fully invested in longer-term investments in pursuit of our investment objective. Any distributions that we pay during such period may be substantially lower than the distributions that we may be able to pay when our portfolio is fully invested. In addition, until such time as the net proceeds of any offering or from exiting an investment or other sources capital are invested in new investments meeting our investment objective, the market price for our common stock may decline.

Our investment advisor s liability is limited under the Investment Advisory Agreement, and we have agreed to indemnify our investment advisor against certain liabilities, which may lead our investment advisor to act in a riskier manner on our behalf than it would when acting for its own account.

Under the Investment Advisory Agreement, our investment advisor does not assume any responsibility to us other than to render the services called for under that agreement, and it is not responsible for any action of our board of directors in following or declining to follow our investment advisor s advice or recommendations. Under the terms of the Investment Advisory Agreement, our investment advisor and its officers, directors, members, managers, partners, stockholders and employees are not liable to us, any subsidiary of ours, our directors, our stockholders or any

subsidiary s stockholders or partners for acts or omissions performed in accordance with and pursuant to the Investment Advisory Agreement, except those resulting from acts constituting gross negligence, willful misconduct, bad faith or reckless disregard of our investment advisor s

duties under the Investment Advisory Agreement. In addition, we have agreed to indemnify our investment advisor and its officers, directors, members, managers, partners, stockholders and employees from and against any claims or liabilities, including reasonable legal fees and other expenses reasonably incurred, arising out of or in connection with our business and operations or any action taken or omitted on our behalf pursuant to authority granted by the Investment Advisory Agreement, except where attributable to gross negligence, willful misconduct, bad faith or reckless disregard of such person s duties under the Investment Advisory Agreement. These protections may lead our investment advisor to act in a riskier manner when acting on our behalf than it would when acting for its own account.

Risks Relating to an Offering of Our Securities

Shares of closed-end investment companies, including business development companies, frequently trade at a discount to their net asset value.

Shares of closed-end investment companies, including BDCs, frequently trade at a discount from net asset value. This characteristic of closed-end investment companies and BDCs is separate and distinct from the risk that our net asset value per share may decline. We cannot predict whether our common stock will trade at, above or below net asset value. In addition, if our common stock trades below net asset value, we will generally not be able to issue additional common stock at the market price without first obtaining the approval of our stockholders and our Independent Directors. On June 2, 2016 our stockholders voted to allow us to sell or otherwise issue common stock at a price below net asset value per share for a period of one year ending on the earlier of June 2, 2017 or the date of our 2017 Annual Meeting of Stockholders. We expect to present to our stockholders a similar proposal at our 2017 Annual Meeting of Stockholders. Selling or otherwise issuing shares of FIC s common stock below its then current net asset value per share would result in a dilution of FIC s existing common stockholders. The maximum number of shares issuable below net asset value pursuant to the authority granted by our stockholders that could result in such dilution is limited to 25.0% of FIC s then outstanding common stock immediately prior to each such sale. We do not intend to sell or otherwise issue shares of our common stock below net asset value unless our board of directors determines that it would be in our stockholders best interests to do so. The level of net asset value dilution that could result from such an offering is not limited.

Market conditions may increase the risks associated with our business and an investment in us.

The current worldwide financial market situation may contribute to increased market volatility, may have long-term effects on the U.S. and worldwide financial markets and may cause economic uncertainties or deterioration in the U.S. and worldwide. These conditions raised the level of many of the risks described herein and, if repeated or continued, could have an adverse effect on our portfolio companies and on their results of operations, financial conditions, access to credit and capital. The stress in the credit market and upon banks has led other creditors to tighten credit and the terms of credit. In certain cases, senior lenders to our portfolio companies can block payments by our portfolio companies in respect of our loans to such portfolio companies. In turn, these could have adverse effects on our business, financial condition, results of operations, distributions to our stockholders, access to capital, valuation of our assets and our stock price. Notwithstanding recent gains across both the equity and debt markets, these conditions may continue for a prolonged period of time or worsen in the future.

If, in the future, we sell common stock at a discount to our net asset value per share, stockholders who do not participate in such sale will experience immediate dilution in an amount that may be material.

On June 2, 2016, our stockholders approved our ability to sell or otherwise issue shares of our common stock at a discount from net asset value per share, as long as the cumulative number of shares sold pursuant to such authority does not exceed 25.0% of our then outstanding common stock immediately prior to each such sale, for a period of one

year ending on the earlier of June 2, 2017 or the date of our 2017 Annual Meeting of

-35-

Stockholders. Our stockholders will be asked to vote on a similar proposal at our 2017 Annual Meeting of Stockholders. If we sell or otherwise issue shares of our common stock at a discount to net asset value, it will pose a risk of dilution to our stockholders. In particular, stockholders who do not purchase additional shares at or below the discounted price in proportion to their current ownership will experience an immediate decrease in net asset value per share (as well as in the aggregate net asset value of their shares if they do not participate at all). These stockholders will also experience a disproportionately greater decrease in their participation in our earnings and assets and their voting power than the increase we experience in our assets, potential earning power and voting interests from such issuances or sale. In addition, such issuances or sales may adversely affect the price at which our common stock trades. For additional information and hypothetical examples of these risks, see Sales of Common Stock Below Net Asset Value, and for actual dilution illustrations specific to an offering, see the prospectus supplement pursuant to which such sale is made.

Our net asset value may have changed significantly since our last valuation.

Our board of directors determines the fair value of our portfolio investments on a quarterly basis based on input from our investment advisor, our audit committee and, as to certain of our investments, a third party independent valuation firm. While the board of directors will review our net asset value per share in connection with any offering, it will not always have the benefit of input from the independent valuation firm when it does so. The fair value of various individual investments in our portfolio and/or the aggregate fair value of our investments may change significantly over time. If the fair value of our investment portfolio at December 31, 2016 is less than the fair value at the time of an offering during 2016, then we may record an unrealized loss on our investment portfolio and may report a lower net asset value per share than will be reflected in the Selected Consolidated Financial Data and the financial statements included in the prospectus supplement of that offering. If the fair value of our investment portfolio at December 31, 2016 is greater than the fair value at the time of an offering during 2016, we may record an unrealized gain on our investment portfolio and may report a greater net asset value per share than so reflected in the prospectus supplement of that offering. Upon publication of this information in connection with our announcement of operating results for our fiscal year ended December 31, 2016, the market price of our common stock may fluctuate materially, and may be substantially less than the price per share you pay for our common stock in an offering.

The market price of our securities may fluctuate significantly.

The market price and liquidity of the market for shares of our common stock may be significantly affected by numerous factors, some of which are beyond our control and may not be directly related to our operating performance. These factors include:

significant volatility in the market price and trading volume of securities of BDCs or other companies in our sector, which is not necessarily related to the operating performance of these companies;

exclusion of our common stock from certain market indices, such as the Russell 2000 Financial Services Index, could reduce the ability of certain institutional investors to own our common stock and could put short term pressure on our common stock;

changes in regulatory policies or tax guidelines, particularly with respect to RICs, BDCs or SBICs;

loss of RIC or BDC status;

loss of status as an SBIC for the Funds, or any other SBIC subsidiary we may form;

changes or perceived changes in earnings or variations in operating results;

changes or perceived changes in the value of our portfolio of investments;

changes in accounting guidelines governing valuation of our investments;

any shortfall in revenue or net income or any increase in losses from levels expected by investors or securities analysts;

-36-

departure of our investment advisor s key personnel;

operating performance of companies comparable to us;

general economic trends and other external factors; and

loss of a major funding source.

Investing in our securities may involve an above average degree of risk.

The investments we make in accordance with our investment objective may result in a higher amount of risk than alternative investment options and a higher risk of volatility or loss of principal. Our investments in portfolio companies may be highly speculative; therefore, an investment in our securities may not be suitable for someone with lower risk tolerance.

Sales of substantial amounts of our common stock may have an adverse effect on the market price of our common stock.

As of April 13, 2017, we had 22,457,576 shares of common stock outstanding. Sales of substantial amounts of our common stock, or the availability of shares for sale, could adversely affect the prevailing market price of our common stock. If this occurs and continues, it could impair our ability to raise additional capital through the sale of equity securities should we desire to do so.

If we issue preferred stock and/or debt securities, the net asset value and market value of our common stock may become more volatile.

We cannot assure you that the issuance of preferred stock and/or debt securities would result in a higher yield or return to the holders of our common stock. The issuance of preferred stock and/or debt securities would likely cause the net asset value and market value of our common stock to become more volatile. If the distribution rate on the preferred stock, or the interest rate on the debt securities, were to approach the net rate of return on our investment portfolio, the benefit of leverage to the holders of our common stock would be reduced. If the distribution rate on the preferred stock, or the interest rate on the debt securities, were to exceed the net rate of return on our portfolio, the use of leverage would result in a lower rate of return to the holders of common stock than if we had not issued the preferred stock and/or debt securities. Any decline in the net asset value of our investment would be borne entirely by the holders of our common stock. Therefore, if the market value of our portfolio were to decline, the leverage would result in a greater decrease in net asset value to the holders of our common stock than if we were not leveraged through the issuance of preferred stock and/or debt securities. This decline in net asset value would also tend to cause a greater decline in the market price for our common stock.

There is also a risk that, in the event of a sharp decline in the value of our net assets, we would be in danger of failing to maintain required asset coverage ratios which may be required by the preferred stock and/or debt securities or of a downgrade in the ratings of the preferred stock and/or debt securities or our current investment income might not be sufficient to meet the distribution requirements on the preferred stock or the interest payments on the debt securities. In order to counteract such an event, we might need to liquidate investments in order to fund redemption of some or all of the preferred stock and/or debt securities. In addition, we would pay (and the holders of our common stock would bear) all costs and expenses relating to the issuance and ongoing maintenance of the preferred stock and/or debt

securities. Holders of preferred stock and/or debt securities may have different interests than holders of common stock and may at times have disproportionate influence over our affairs.

If we issue auction rate preferred stock and you purchase such auction rate preferred stock, you may not be able to sell your auction rate preferred stock at an auction if the auction fails.

If we issue auction rate preferred stock and you purchase such auction rate preferred stock, you may not be able to sell your auction rate preferred stock at an auction if the auction fails, i.e., if more shares of auction rate

-37-

preferred stock are offered for sale than there are buyers for those shares. Also, if you place an order (a hold order) at an auction to retain auction rate preferred stock only at a specified rate that exceeds the rate set at the auction, you will not retain your auction rate preferred stock. Additionally, if you place a hold order without specifying a rate below which you would not wish to continue to hold your shares and the auction sets a below-market rate, you will receive a lower rate of return on your shares than any market rate of those securities. Finally, the distribution period of these securities may be changed, subject to certain conditions and with notice to the holders of the auction rate preferred stock, which could also affect the liquidity of your investment.

If you try to sell your auction rate preferred stock between auctions, you may not receive full value on your investment.

If you try to sell your auction rate preferred stock between auctions, you may not be able to sell them for their liquidation preference per share or such amount per share plus accumulated distributions. If we have designated a special distribution period of more than seven days, changes in interest rates could affect the price you would receive if you sold your shares in the secondary market. Broker-dealers that maintain a secondary trading market for the auction rate preferred stock are not required to maintain this market, and we will not be required to redeem auction rate preferred stock if either an auction or an attempted secondary market sale fails because of a lack of buyers. The auction rate preferred stock will likely not be registered on a stock exchange. If you sell your auction rate preferred stock to a broker-dealer between auctions, you may receive less than the price you paid for them, especially when market interest rates have risen since the last auction or during a special distribution period. Due to recent market disruption most auction-rate preferred stock have been unable to hold successful auctions and holders of such shares have suffered reduced liquidity, including the inability to sell such shares in a secondary market.

The trading market or market value of our debt securities or any convertible debt securities, if issued to the public, may be volatile.

Our debt securities or any convertible debt securities, if issued to the public, may or may not have an established trading market. We cannot assure investors that a trading market for our debt securities or any convertible debt securities, if issued to the public, would develop or be maintained if developed. In addition to our creditworthiness, many factors may materially adversely affect the trading market for, and market value of, our publicly issued debt securities or any convertible debt securities. These factors include, but are not limited to, the following:

the time remaining to the maturity of these debt securities;
the outstanding principal amount of debt securities with terms identical to these debt securities;
the general economic environment;
the supply of debt securities trading in the secondary market, if any;

Table of Contents 298

the redemption, repayment or convertible features, if any, of these debt securities;

the level, direction and volatility of market interest rates generally; and

market rates of interest higher or lower than rates borne by the debt securities.

There also may be a limited number of buyers for our debt securities. This too may materially adversely affect the market value of the debt securities or the trading market for the debt securities. Our debt securities may include convertible features that cause them to more closely bear risks associated with an investment in our common stock.

Our credit ratings, if any, may not reflect all risks of an investment in our debt securities or any convertible debt securities.

Our credit ratings, if any, will be an assessment by third parties of our ability to pay our obligations. Consequently, real or anticipated changes in our credit ratings will generally affect the market value of any

-38-

publicly issued debt securities. Our credit ratings, however, may not reflect the potential impact of risks related to market conditions generally or other factors discussed herein about the market value of, or trading market for, any publicly issued debt securities.

Terms relating to redemption may materially adversely affect the return on any debt securities.

If we issue any debt securities or any convertible debt securities that are redeemable at our option, we may choose to redeem the debt securities at times when prevailing interest rates are lower than the interest rate paid on the debt securities. In addition, if the debt securities are subject to mandatory redemption, we may be required to redeem the debt securities at times when prevailing interest rates are lower than the interest rate paid on the debt securities. In this circumstance, a holder of our debt securities may not be able to reinvest the redemption proceeds in a comparable security at an effective interest rate as high as the debt securities being redeemed.

The issuance of subscription rights, warrants or convertible debt that are exchangeable for our common stock, will cause your interest in us to be diluted as a result of any such rights, warrants or convertible debt offering.

Stockholders who do not fully exercise rights, warrants or convertible debt issued to them in any offering of subscription rights, warrants or convertible debt to purchase our common stock should expect that they will, at the completion of the offering, own a smaller proportional interest in us than would otherwise be the case if they fully exercised their rights, warrants or convertible debt. We cannot state precisely the amount of any such dilution in share ownership because we do not know what proportion of the common stock would be purchased as a result of any such offering.

In addition, if the subscription price, warrant price or convertible debt price is less than our net asset value per share of common stock at the time of such offering, then our stockholders would experience an immediate dilution of the aggregate net asset value of their shares as a result of the offering. The amount of any such decrease in net asset value is not predictable because it is not known at this time what the subscription price, warrant price, convertible debt price or net asset value per share will be on the expiration date of such offering or what proportion of our common stock will be purchased as a result of any such offering. The risk of dilution is greater if there are multiple rights offerings. However, our board of directors will make a good faith determination that any offering of subscription rights, warrants or convertible debt would result in a net benefit to existing stockholders.

Future offerings of debt securities, which would be senior to our common stock upon liquidation, or equity securities, which could dilute our existing stockholders and may be senior to our common stock for the purposes of distributions, may harm the value of our common stock.

In the future, we may attempt to increase our capital resources by making additional offerings of debt or equity securities, including commercial paper, medium-term notes, senior or subordinated notes and classes of preferred stock or common stock, subject to the restrictions of the 1940 Act. Upon a liquidation of our company, holders of our debt securities and shares of preferred stock and lenders with respect to other borrowings would receive a distribution of our available assets prior to the holders of our common stock. Additional equity offerings by us may dilute the holdings of our existing stockholders or reduce the value of our common stock, or both. Any preferred stock we may issue would have a preference on distributions that could limit our ability to make distributions to the holders of our common stock. Because our decision to issue securities in any future offering will depend on market conditions and other factors beyond our control, we cannot predict or estimate the amount, timing or nature of our future offerings. Thus, our stockholders bear the risk of our future offerings reducing the market price of our common stock and diluting their stock holdings in us. In addition, proceeds from a sale of common stock will likely be used to increase our total assets or to pay down our borrowings, among other uses. This would increase our asset coverage ratio and

permit us to incur additional leverage under rules pertaining to BDCs by increasing our borrowings or issuing senior securities such as preferred stock or additional debt securities.

-39-

Provisions of the Maryland General Corporation Law and our charter and bylaws could deter takeover attempts and have an adverse effect on the price of our common stock.

The Maryland General Corporation Law contains provisions that may discourage, delay or make more difficult a change in control of us or the removal of our directors. In addition, our board of directors may, without stockholder action, authorize the issuance of shares of stock in one or more classes or series, including preferred stock. Our charter and bylaws contain provisions that limit liability and provide for indemnification of our directors and officers. These provisions and others also may have the effect of deterring hostile takeovers or delaying changes in control or management. We are generally prohibited from engaging in mergers and other business combinations with stockholders that beneficially own 10.0% or more of the voting power of our outstanding voting stock, or with their affiliates, for five years after the most recent date on which such stockholders became the beneficial owners of 10.0% or more of the voting power of our outstanding voting stock and thereafter unless our directors and stockholders approve the business combination in the prescribed manner. See Description of Our Capital Stock - Business Combinations. Maryland law may discourage third parties from trying to acquire control of us and increase the difficulty of consummating such an offer.

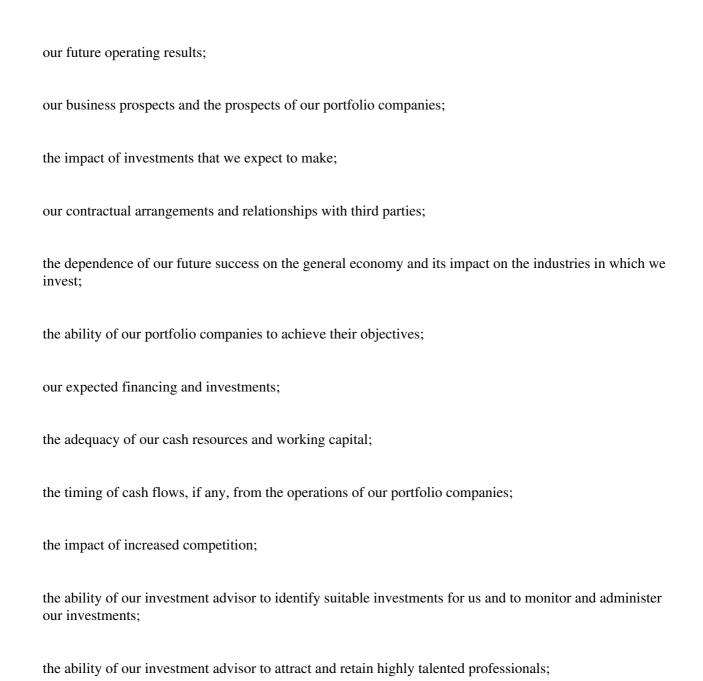

We have also adopted measures that may make it difficult for a third party to obtain control of us, including provisions of our charter authorizing our board of directors to classify or reclassify shares of our stock in one or more classes or series and to cause the issuance of additional shares of our stock, including preferred stock. In addition, we have adopted a classified board of directors. A classified board may render a change in control of us or removal of our incumbent management more difficult. These provisions, as well as other provisions of our charter and bylaws, may delay, defer or prevent a transaction or a change in control that might otherwise be in the best interests of our stockholders.

Our business and operation could be negatively affected if we become subject to any securities litigation or shareholder activism, which could cause us to incur significant expense, hinder execution of investment strategy and impact our stock price.

In the past, following periods of volatility in the market price of a company securities, securities class action litigation has often been brought against that company. Shareholder activism, which could take many forms or arise in a variety of situations, has been increasing in the BDC space recently. While we are currently not subject to any securities litigation or shareholder activism, due to the potential volatility of our stock price and for a variety of other reasons, we may in the future become the target of securities litigation or shareholder activism. Securities litigation and shareholder activism, including potential proxy contests, could result in substantial costs and divert management s and our board of directors—attention and resources from our business. Additionally, such securities litigation and shareholder activism could give rise to perceived uncertainties as to our future, adversely affect our relationships with service providers and make it more difficult to attract and retain qualified personnel. Also, we may be required to incur significant legal fees and other expenses related to any securities litigation and activist shareholder matters. Further, our stock price could be subject to significant fluctuation or otherwise be adversely affected by the events, risks and uncertainties of any securities litigation and shareholder activism.

SPECIAL NOTE REGARDING FORWARD-LOOKING STATEMENTS

This prospectus contains forward-looking statements that involve substantial risks and uncertainties. These forward-looking statements are not historical facts, but rather are based on current expectations, estimates and projections about us, our current and prospective portfolio investments, our industry, our beliefs, and our assumptions. Words such as anticipates, expects, intends, plans, will, may, continue, believes, seeks, estimates, targets, projects and variations of these words and similar expressions are intended to identify forward-looking statements. The forward-looking statements contained in this report involve risks and uncertainties, including statements as to:

our regulatory structure and tax status;
our ability to operate as a BDC, a SBIC and a RIC;
the adequacy of our cash resources and working capital;
the timing of cash flows, if any, from the operations of our portfolio companies;
the timing, form and amount of any dividend distributions;
the impact of fluctuations in interest rates on our business;
the valuation of any investments in portfolio companies, particularly those having no liquid trading market; and
our ability to recover unrealized losses. These statements are not guarantees of future performance and are subject to risks, uncertainties and other factors, some of which are beyond our control and difficult to predict and could cause actual results to differ materially from those expressed or forecasted in the forward-looking statements, including without limitation:
an economic downturn could impair our portfolio companies ability to continue to operate, which could lead to the loss of value in of some or all of our investments in such portfolio companies;
a contraction of available credit and/or an inability to access the equity markets could impair our lending and investment activities;

Table of Contents 304

-41-

interest rate volatility could adversely affect our results, particularly because we use leverage as part of our investment strategy;

currency fluctuations could adversely affect the results of our investments in portfolio companies with foreign operations; and,

the risks, uncertainties and other factors we identify in Risk Factors contained in this prospectus and in our other filings with the SEC.

Although we believe that the assumptions on which these forward-looking statements are based are reasonable, any of those assumptions could prove to be inaccurate, and as a result, the forward-looking statements based on those assumptions also could be inaccurate. Important assumptions include our ability to originate new loans and investments, certain margins and levels of profitability and the availability of additional capital. In light of these and other uncertainties, the inclusion of a projection or forward-looking statement in this prospectus should not be regarded as a representation by us that our plans and objectives will be achieved. These risks and uncertainties include those described or identified in Risk Factors and elsewhere in this prospectus. You should not place undue reliance on these forward-looking statements, which apply only as of the date of this prospectus. The forward-looking statements and projections contained in this prospectus are excluded from the safe harbor protection provided by Section 27A of the Securities Act of 1933, as amended, or the Securities Act.

USE OF PROCEEDS

Unless otherwise specified in any prospectus supplement accompanying this prospectus, we intend to use the net proceeds from the sale of our securities to invest in lower middle-market companies in accordance with our investment objective and strategies, to repay the outstanding indebtedness under our Credit Facility and for working capital and general corporate purposes. We will also pay operating expenses, including management, incentive and administrative fees, and may pay other expenses, from the net proceeds of any offering. We plan to raise new equity when we have attractive investment opportunities available. Pending such use, we will invest the net proceeds of any offering primarily in short-term securities consistent with our BDC election and our election to be taxed as a RIC. See Regulation Temporary Investments for additional information about temporary investments we may make while waiting to make longer-term investments in pursuit of our investment objective.

Pending such use, we will invest the net proceeds of this offering primarily in cash, cash equivalents, U.S. Government securities and other high-quality debt instruments that mature in one year or less, or temporary investments, as appropriate. These securities may have lower yields than our other investments and accordingly result in lower distributions, if any, by us during such period. See Regulation Temporary Investments. Our ability to achieve our investment objective may be limited to the extent that the net proceeds from the offering, pending full investment, are held in interest bearing deposits or other short-term instruments that produce income at a rate less than our cost of capital.

RATIO OF EARNINGS TO FIXED CHARGES

For the years ended December 31, 2012, 2013, 2014, 2015 and 2016, the ratio of earnings to fixed charges of the Company, computed as set forth below, were as follows:

	For t	For the years ended December 31,						
	2012	2013	2014	2015	2016			
Earnings to Fixed Charges ⁽¹⁾	4.02	4.95	3.65	3.79	4.98			

For purposes of computing the ratios of earnings to fixed charges, earnings represent net increase in net assets resulting from operations plus (or minus) tax provision (benefit) including excise tax expense plus fixed charges. Fixed charges include interest and financing expenses.

(1) Earnings include net realized and unrealized gains or losses. Net realized and unrealized gains or losses can vary substantially from period to period.

Excluding net unrealized gains or losses, the earnings to fixed charges ratio would be 3.75, 8.08, 1.88, 4.86 and 2.25 for the years ended December 31, 2012, 2013, 2014, 2015 and 2016, respectively.

Excluding net realized and unrealized gains or losses, the earnings to fixed charges ratio would be 3.44, 3.76, 4.15, 3.85 and 3.55 for the years ended December 2012, 2013, 2014, 2015 and 2016, respectively.

-44-

PRICE RANGE OF COMMON STOCK AND DISTRIBUTIONS

Our common stock began trading on June 21, 2011 on The NASDAQ Global Market under the symbol FDUS. Effective January 3, 2012, our common stock is included in the Nasdaq Global Select Market. The following table lists the high and low closing sale price for our common stock, and the closing sale price as a percentage of net asset value, or NAV, and the cash distributions per share that we have declared on our common stock for each fiscal quarter during the last two most recently completed fiscal years.

				Premium /			
		High	Low	(Discount) of	Premium /		
		Closing	Closing	High	(Discount) of	Distr	ibutions
		Sales	Sales	Sales	Low Sales		Per
Period	NAV (1)	Price	Price	Price to NAV (2)	Price to NAV (2)	Sh	are (3)
Year ending December 31, 2017							
First Quarter	*	\$ 17.57	\$ 15.88	*	*	\$	0.39
Second Quarter (through April							
13, 2017)	*	17.81	17.10	*	*		*
Year ended December 31,							
2016							
First Quarter	\$ 15.25	15.51	11.91	1.7%	(21.9)%	\$	0.39
Second Quarter	15.52	15.96	14.70	2.8	(5.3)		0.39
Third Quarter	15.58	16.33	15.22	4.8	(2.3)		0.39
Fourth Quarter	15.76	17.07	14.62	8.3	(7.2)		0.43
Year ended December 31, 2015							
First Quarter	15.18	17.02	14.40	12.1	(5.1)		0.38
Second Quarter	15.18	16.90	14.90	11.3	(1.8)		0.40
Third Quarter	15.12	15.51	13.65	2.6	(9.7)		0.39
Fourth Quarter	15.17	14.80	13.11	(2.4)	(13.6)		0.43

- (1) Net asset value per share is determined as of the last day in the relevant quarter and therefore may not reflect the net asset value per share on the date of the high and low sales prices. The net asset values shown are based on outstanding shares at the end of each period.
- (2) Calculated as the difference between the respective high or low closing sales price and the quarter end net asset value divided by the quarter end net asset value.
- (3) Represents the regular and special, if applicable, distribution declared in the specified quarter. We have adopted an opt out dividend reinvestment plan for our common stockholders. As a result, if we declare a distribution, stockholders cash distributions will be automatically reinvested in additional shares of our common stock, unless they specifically opt out of the dividend reinvestment plan so as to receive cash distributions. See Dividend Reinvestment Plan.
- * Not determinable at the time of filing.

We intend to continue to pay quarterly distributions to our stockholders. Our quarterly distributions, if any, are determined by our board of directors. We have elected to be taxed as a RIC under Subchapter M of the Code. As long as we qualify as a RIC, we will not be taxed on our investment company taxable income or net capital gain, to the

extent that such income or gain is distributed, or deemed to be distributed, to stockholders on a timely basis.

There were no deemed distributions during the years 2014, 2015 or 2016.

We may not be able to achieve operating results that will allow us to make distributions at a specific level or to increase the amount of these distributions from time to time. If we do not distribute a certain percentage of our income annually, we will suffer adverse tax consequences, including possible loss of our tax treatment as a RIC. We cannot assure stockholders that they will receive any distributions at a particular level.

We have adopted a dividend reinvestment plan that provides for reinvestment of our distributions on behalf of our stockholders, unless a stockholder elects to receive cash. As a result, if our board of directors authorizes,

-45-

and we declare, a cash distribution, then our stockholders who have not opted out of our dividend reinvestment plan will have their cash distribution automatically reinvested in additional shares of our common stock, rather than receiving the cash distribution. Under the terms of our dividend reinvestment plan, dividends will primarily be paid in newly issued shares of common stock. However, we reserve the right to purchase shares in the open market in connection with the implementation of the plan. This feature of the plan means that, under certain circumstances, we may issue shares of our common stock at a price below net asset value per share, which could cause our stockholders to experience dilution.

Distributions in excess of our current and accumulated profits and earnings would be treated first as a return of capital to the extent of the stockholder s tax basis, and any remaining distributions would be treated as a capital gain. The determination of the tax attributes of our distributions will be made annually as of the end of our fiscal year based upon our taxable income for the full year and distributions paid for the full year. Therefore, a determination made on a quarterly basis may not be representative of the actual tax attributes of our distributions for a full year. Each year, a statement on Form 1099-DIV identifying the source of the distribution will be sent to our U.S. stockholders of record. Our board of directors presently intends to declare and pay quarterly dividends. Our ability to pay dividends could be affected by future business performance, liquidity, capital needs, alternative investment opportunities and loan covenants.

SELECTED CONSOLIDATED FINANCIAL DATA

The following selected consolidated financial data of FIC and its subsidiaries, including the Funds, as of and for the years ended December 31, 2016, 2015, 2014, 2013 and 2012, is derived from the consolidated financial statements that have been audited by RSM US LLP, an independent registered public accounting firm. This financial data should be read in conjunction with our consolidated financial statements and the notes thereto included elsewhere in this prospectus and with Management s Discussion and Analysis of Financial Condition and Results of Operations.

MANAGEMENT S DISCUSSION AND ANALYSIS OF

FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion and analysis of our financial condition and results of operations should be read in conjunction with Selected Consolidated Financial Data, Fidus Investment Corporation's consolidated financial statements and related notes appearing elsewhere in this prospectus. The information contained in this section contains forward-looking statements that involve risks and uncertainties. Please see Risk Factors and Special Note Regarding Forward-Looking Statements for a discussion of the uncertainties, risks and assumptions associated with these statements.

Overview

We provide customized debt and equity financing solutions to lower middle-market companies, which we define as U.S. based companies having revenues between \$10.0 million and \$150.0 million. Our investment objective is to provide attractive risk-adjusted returns by generating both current income from our debt investments and capital appreciation from our equity related investments. Our investment strategy includes partnering with business owners, management teams and financial sponsors by providing customized financing for ownership transactions, recapitalizations, strategic acquisitions, business expansion and other growth initiatives. We seek to maintain a diversified portfolio of investments in order to help mitigate the potential effects of adverse economic events related to particular companies, regions or industries.

Fidus Investment Corporation was formed as a Maryland corporation on February 14, 2011. We completed our initial public offering, or IPO, in June 2011.

On June 20, 2011, Fidus Investment Corporation acquired all of the limited partnership interests of Fidus Mezzanine Capital, L.P., or Fund I, and membership interests of Fidus Mezzanine Capital GP, LLC, its general partner, through the Formation Transactions (as defined in Note 1 to the consolidated financial statements), resulting in Fund I becoming our wholly-owned SBIC subsidiary. Immediately following the Formation Transactions, we and Fund I elected to be treated as business development companies, or BDCs, under the 1940 Act and our investment activities have been managed by Fidus Investment Advisors, LLC, our investment advisor, and supervised by our board of directors, a majority of whom are independent of us. On March 29, 2013, we commenced operations of a second wholly-owned subsidiary, Fund II. Fund I and Fund II are collectively referred to as the Funds.

Fund I received its SBIC license on October 22, 2007 and Fund II received its SBIC license on May 28, 2013. We plan to continue to operate the Funds as SBICs, subject to SBA approval, and to utilize the proceeds of the sale of SBA-guaranteed debentures to enhance returns to our stockholders. We have also made, and continue to make, investments directly through FIC. We believe that utilizing FIC and the Funds as investment vehicles provides us with access to a broader array of investment opportunities. Based on the current capitalization of the Funds, we have approximately \$51.0 million of remaining borrowing capacity under the SBIC Debenture Program and intend to fully utilize such capacity over the ensuing 12-18 months.

Revenues: We generate revenue in the form of interest and fee income on debt investments and capital gains and distributions, if any, on equity investments. Our debt investments, whether in the form of mezzanine, senior secured or unitranche loans, typically have terms of five to seven years and bear interest at a fixed rate but may bear interest at a floating rate. In some instances, we receive payments on our debt investments based on scheduled amortization of the outstanding balances. In addition, we receive repayments of some of our debt investments prior to their scheduled maturity dates, which may include prepayment penalties. The frequency or volume of these repayments fluctuates

significantly from period to period. Our portfolio activity may reflect the proceeds of sales of securities. In some cases, our investments provide for deferred interest payments or PIK interest. The principal amount of loans and any accrued but unpaid interest generally become due at the maturity date. In addition, we may generate revenue in the form of commitment, origination, amendment, or structuring

-50-

fees and fees for providing managerial assistance. Debt investment origination fees, original issue discount and market discount or premium, if any, are capitalized, and we accrete or amortize such amounts into interest income. We record prepayment premiums on loans as fee income. Interest and dividend income is recorded on the accrual basis to the extent that we expect to collect such amounts. Debt investments or preferred equity securities are placed on non-accrual status when principal, interest or dividend payments become materially past due, or when there is reasonable doubt that principal, interest or dividends will be collected. See Critical Accounting Policies and Use of Estimates Revenue Recognition. Interest is accrued daily based on the outstanding principal amount and the contractual terms of the debt. Dividend income is recorded as dividends are declared or at the point an obligation exists for the portfolio company to make a distribution, and is generally recognized when received. Distributions of earnings from portfolio companies are evaluated to determine if the distribution is a distribution of earnings or a return of capital. Distributions of earnings are included in dividend income while a return of capital is recorded as a reduction in the cost basis of the investment. Estimates are adjusted as necessary when the relevant tax forms are received from the portfolio company.

We recognize realized gains or losses on investments based on the difference between the net proceeds from the disposition and the cost basis of the investment, without regard to unrealized gains or losses previously recognized. We record current period changes in fair value of investments that are measured at fair value as a component of the net change in unrealized appreciation (depreciation) on investments in the consolidated statements of operations.

Expenses: All investment professionals of our investment advisor and/or its affiliates, when and to the extent engaged in providing investment advisory and management services to us, and the compensation and routine overhead expenses allocable to personnel who provide these services to us, are provided and paid for by our investment advisor and not by us. We bear all other out-of-pocket costs and expenses of our operations and transactions, including, without limitation, those relating to:

organization;

calculating our net asset value (including the cost and expenses of any independent valuation firm);

fees and expenses incurred by our investment advisor under the Investment Advisory Agreement or payable to third parties, including agents, consultants or other advisors, in monitoring financial and legal affairs for us and in monitoring our investments and performing due diligence on our prospective portfolio companies or otherwise relating to, or associated with, evaluating and making investments, including dead deal costs;

interest payable on debt, if any, incurred to finance our investments;

offerings of our common stock and other securities;

investment advisory fees and management fees;

administration fees and expenses, if any, payable under the Administration Agreement (including payments under the Administration Agreement between us and our investment advisor based upon our allocable portion of our investment advisor s overhead in performing its obligations under the Administration Agreement, including rent and the allocable portion of the cost of our officers, including our chief compliance officer, our chief financial officer, and their respective staffs);

transfer agent, dividend agent and custodial fees and expenses;
federal and state registration fees;
all costs of registration and listing our shares on any securities exchange;
U.S. federal, state and local taxes;
Independent Directors fees and expenses;

-51-

costs of preparing and filing reports or other documents required by the SEC or other regulators including printing costs;

costs of any reports, proxy statements or other notices to stockholders, including printing and mailing costs;

our allocable portion of any fidelity bond, directors and officers/errors and omissions liability insurance, and any other insurance premiums;

direct costs and expenses of administration, including printing, mailing, long distance telephone, copying, secretarial and other staff, independent auditors and outside legal costs;

proxy voting expenses; and

all other expenses reasonably incurred by us or our investment advisor in connection with administering our business.

Portfolio Composition, Investment Activity and Yield

During the year ended December 31, 2016, we invested \$197.8 million in debt and equity investments, including 13 new portfolio companies. These investments consisted of subordinated notes (\$143.4 million, or 72.5%), senior secured loans (\$37.5 million, or 18.9%), equity securities (\$16.6 million, or 8.4%) and warrant securities (\$0.3 million, or 0.2%). During the year ended December 31, 2016 we received proceeds from sales or repayments, including principal, return of capital dividends and net realized gains (losses), of \$137.5 million.

During the year ended December 31, 2015, we invested \$136.4 million in debt and equity investments, including 13 new portfolio companies. These investments consisted of subordinated notes (\$98.1 million, or 72.0%), senior secured loans (\$28.3 million, or 20.7%), equity securities (\$9.5 million, or 7.0%), warrants (\$0.2 million, or 0.1%) and royalty rights (\$0.3 million, or 0.2%). During the year ended December 31, 2015 we received proceeds from sales or repayments, including principal, return of capital dividends and net realized gains (losses), of \$94.7 million.

As of December 31, 2016, the fair value of our investment portfolio totaled \$524.5 million and consisted of 53 active portfolio companies and four portfolio companies that have sold their underlying operations. As of December 31, 2016, one debt investment bore interest at a variable rate, which represented \$8.2 million of our portfolio on a fair value basis, and the remainder of our debt portfolio was comprised of fixed rate investments. Overall, the portfolio had net unrealized appreciation of \$23.9 million as of December 31, 2016. As of December 31, 2016, our average active portfolio company investment at amortized cost was \$9.4 million, which excludes investments in the four portfolio companies that have sold their underlying operations.

As of December 31, 2015, the fair value of our investment portfolio totaled \$443.3 million and consisted of 50 active portfolio companies and three portfolio companies that have sold their underlying operations. As of December 31, 2015, one debt investment bore interest at a variable rate, which represented \$8.9 million of our portfolio on a fair value basis, and the remainder of our debt portfolio was comprised of fixed rate investments. Overall, the portfolio had net unrealized depreciation of \$5.1 million as of December 31, 2015. As of December 31, 2015, our average active portfolio company investment at amortized cost was \$9.0 million, which excludes investments in the three

portfolio companies that have sold their underlying operations.

The weighted average yield on debt investments as of December 31, 2016 and 2015 were 13.1% and 13.3%, respectively. The weighted average yield of our debt investments is not the same as a return on investment for our stockholders but, rather, relates to a portion of our investment portfolio and is calculated before the payment of all of our and our subsidiaries fees and expenses. The weighted average yields were computed using the effective interest rates for debt investments at cost as of December 31, 2016 and 2015, respectively, including the accretion of original issue discount and loan origination fees, but excluding investments on non-accrual status, if any.

The following table shows the portfolio composition by investment type at fair value and cost and as a percentage of total investments:

		⁷ alue	Cost

Portfolio Asset Quality

In addition to various risk management and monitoring tools, our investment advisor uses an internally developed investment rating system to characterize and monitor the credit profile and our expected level of returns on each investment in our portfolio. We use a five-level numeric rating scale. The following is a description of the conditions associated with each investment rating:

Investment Rating 1 is used for investments that involve the least amount of risk in our portfolio. The portfolio company is performing above expectations, the debt investment is expected to be paid in the near term and the trends and risk factors are favorable, and may include an expected capital gain.

Investment Rating 2 is used for investments that involve a level of risk similar to the risk at the time of origination. The portfolio company is performing substantially within our expectations and the risk

-54-

factors are neutral or favorable. Each new portfolio investment enters our portfolio with Investment Rating 2.

Investment Rating 3 is used for investments performing below expectations and indicates the investment s risk has increased somewhat since origination. The portfolio company requires closer monitoring, but we expect a full return of principal and collection of all interest and/or dividends.

Investment Rating 4 is used for investments performing materially below expectations and the risk has increased materially since origination. The portfolio company has the potential for some loss of investment return, but we expect no loss of principal.

Investment Rating 5 is used for investments performing substantially below our expectations and the risks have increased substantially since origination. We expect some loss of principal.

The following table shows the distribution of our investments on the 1 to 5 investment rating scale at fair value and cost as of December 31, 2016 and 2015:

	Fair Value				Cost			
	December 31, 2016		December 31, 2015 (dollars in t		December 31, 2016		December 31, 2015	
Investment Rating			,		,			
1	\$ 91,705	17.5%	\$ 77,875	17.6%	\$ 58,967	11.8%	\$ 63,339	14.1%
2	371,506	70.9	268,285	60.4	366,697	73.3	262,727	58.6
3	38,905	7.4	95,981	21.7	44,510	8.9	103,369	23.1
4	22,085	4.2	1,128	0.3	28,194	5.6	6,874	1.5
5	253				2,146	0.4	12,029	2.7
Total	\$ 524,454	100.0%	\$ 443,269	100.0%	\$ 500,514	100.0%	\$ 448,338	100.0%

Based on our investment rating system, the weighted average rating of our portfolio as of both December 31, 2016 and 2015 was 2.0 on a fair value basis.

Non-Accrual

As of December 31, 2016, we had no investments on non-accrual status. As of December 31, 2015, we had debt investments in one portfolio company on non-accrual status, which had an aggregate cost and fair value of \$5.2 million and \$0.6 million, respectively. For the year ended December 31, 2015, we recognized unrealized depreciation on non-accrual investments of \$4.4 million.

Discussion and Analysis of Results of Operations

Comparison of fiscal years ended December 31, 2016 and December 31, 2015

Investment Income

For the year ended December 31, 2016, total investment income was \$60.2 million, an increase of \$5.9 million, or 10.9%, over the \$54.3 million of total investment income for the year ended December 31, 2015. The increase was attributable to a \$2.1 million increase in interest income resulting from higher average debt investment balances outstanding during 2016 as compared to 2015, \$1.0 million increase in fee income resulting from a higher level of investment activity during 2016 as compared to 2015, and a \$2.7 million increase in dividend income due to increased levels of distributions received from equity investments during 2016 as compared to 2015.

Expenses

For the year ended December 31, 2016, total expenses, including income tax provision, were \$33.6 million, an increase of \$5.8 million or 20.9%, over the \$27.8 million of total expenses, including income tax provision,

-55-

for the year ended December 31, 2015. Interest and financing expenses for the year ended December 31, 2016 were \$10.6 million, an increase of \$1.2 million or 12.8%, compared to \$9.4 million for the year ended December 31, 2015 as a result of higher average balances of debt outstanding during 2016 as compared to 2015. The base management fee increased \$0.8 million, or 10.7%, to \$8.3 million for the year ended December 31, 2016 due to higher average total assets during 2016 as compared to 2015. The incentive fee for the year ended December 31, 2016 was \$10.4 million, a \$3.9 million, or 60.0%, increase from the \$6.5 million incentive fee for the year ended December 31, 2015, which was primarily the result of accruing \$3.0 million of capital gains incentive fee during 2016, as compared to reversal of \$(0.1) million of capital gains incentive fee during 2015. The administrative service fee, professional fees and other general and administrative expenses totaled \$3.9 million for both the years ended December 31, 2016 and 2015.

Net Investment Income

Net investment income for the year ended December 31, 2016 was \$26.6 million, an increase of \$0.1 million, or 0.4%, compared to net investment income of \$26.5 million during the year ended December 31, 2015 as a result of the \$5.9 million increase in total investment income compared to only a \$5.8 million increase in total expenses, including income tax provision.

Net Increase in Net Assets Resulting From Operations

For the year ended December 31, 2016, the total net realized (loss) on investments was \$(13.8) million. Significant realized gains and (losses) for the year ended December 31, 2016 are summarized below:

		Gains	Realized (Losses)
Portfolio Company	Realization Event	(in m	illions)
Carlson Systems Holdings, Inc.	Distribution related to sale of		
	operations	\$	4.1
Lightning Diversion Systems, LLC	Distribution		1.1
Premium Franchise Brands, LLC	Exit of portfolio company		1.1
National Truck Protection Co., Inc.	Exit of portfolio company		1.0
Safety Products Group, LLC	Distribution related to sale of		
	operations		0.5
Westminster Cracker Company, Inc.	Distribution related to sale of		
	operations		0.2
Connect-Air International, Inc.	Escrow distribution		0.2
Continental Anesthesia Management,			
LLC	Exit of portfolio company		(0.3)
Channel Technologies Group, LLC	Exit of portfolio company		(0.9)
Pinnergy, Ltd.	Restructuring		(8.9)
Paramount Building Solutions, LLC	Exit of portfolio company		(12.0)
Other			0.1
Total		\$	(13.8)

-56-

For the year ended December 31, 2015, the total net realized gain on investments was \$9.5 million. Significant realized gains (losses) for the year ended December 31, 2015 are summarized below:

Portfolio Company	Realization Event	Gains	Realized (Losses) aillions)
Connect-Air International, Inc.	Exit of portfolio company	\$	5.5
A CERTAL CONTRACTOR	Distribution related to sale of		2.2
ACFP Acquisition Company, Inc.	operations		2.3
	Distribution related to sale of		
Westminster Cracker Company, Inc.	operations		1.5
Acentia, LLC	Exit of portfolio company		<(0.1)
Other			0.2
Total		\$	9.5

During the year ended December 31, 2016, we recorded a net change in unrealized appreciation on investments of \$29.0 million attributable to (i) the reversal of net unrealized depreciation of \$21.5 million related to the exit, sale or restructuring of investments, resulting in unrealized appreciation, (ii) net unrealized depreciation of \$10.3 million on debt investments and (iii) net unrealized appreciation of \$17.8 million on equity investments. During the year ended December 31, 2015, we recorded a net change in unrealized depreciation on investments of \$10.1 million attributable to (i) the reversal of net unrealized appreciation on investments of \$4.7 million related to the exit or sale of investments, resulting in unrealized depreciation, (ii) net unrealized depreciation of \$9.3 million on debt investments and (iii) net unrealized appreciation of \$3.9 million on equity investments.

During the year ended December 31, 2016, we recorded \$(0.2) million of income tax provision for realized gains on investments. During the year ended December 31, 2015, no income tax provision for realized gains on investments was recorded.

As a result of these events, our net increase in net assets resulting from operations during the year ended December 31, 2016 was \$41.6 million, an increase of \$15.6 million, or 60.0%, compared to a net increase in net assets resulting from operations of \$26.0 million during the year ended December 31, 2015.

Comparison of years ended December 31, 2015 and December 31, 2014

Investment Income

For the year ended December 31, 2015, total investment income was \$54.3 million, an increase of \$8.2 million, or 17.7%, over the \$46.1 million of total investment income for the year ended December 31, 2014. The increase was primarily attributable to a \$10.3 million increase in interest income resulting largely from higher average levels of debt investments outstanding, which was partially offset by a \$1.1 million decrease in dividend income due to lower average levels of income producing equity investments outstanding and a \$1.1 million decrease in fee income resulting from lower levels of investment activity for the year ended December 31, 2015, as compared to the year ended December 31, 2014.

Expenses

For the year ended December 31, 2015, total expenses, including income tax provision, were \$27.8 million, an increase of \$4.9 million or 21.6%, over the \$22.8 million of total expenses, including income tax provision, for the year ended December 31, 2014. Interest and financing expenses for the year ended December 31, 2015 were \$9.4 million, an increase of \$1.9 million or 25.6%, compared to \$7.5 million for the year ended December 31, 2014 as a result of higher average balances of SBA debentures outstanding during 2015 and

interest and commitment fees related to the Credit Facility. The base management fee increased \$1.6 million, or 27.9%, to \$7.5 million for the year ended December 31, 2015 due to higher average total assets less cash and cash equivalents for the year ended December 31, 2015 than the fiscal year 2014. The incentive fee for the year ended December 31, 2015 was \$6.5 million, a \$1.6 million, or 33.4%, increase from the \$4.9 million incentive fee for the year ended December 31, 2014 which was the result of a \$1.0 million increase in the income incentive fee to \$6.6 million and the reversal of previously accrued capital gains incentive fees totaling \$0.1 million during the year ended December 31, 2015 compared to a capital gains incentive fee reversal of \$0.7 million during the fiscal year 2014. The administrative service fee, professional fees and other general and administrative expenses totaled \$3.9 million for the year December 31, 2015 compared to a total of \$4.2 million for the year ended December 31, 2014.

Net Investment Income

Net investment income for the year ended December 31, 2015 was \$26.5 million, which was an increase of \$3.2 million, or 13.8%, compared to net investment income of \$23.3 million during the year ended December 31, 2014 as a result of the \$8.2 million increase in total investment income and the \$4.9 million increase in total expenses, including income tax provision.

Net Increase in Net Assets Resulting From Operations

For the year ended December 31, 2015, the total net realized gain on investments was \$9.5 million. Significant realized gains for the year ended December 31, 2015 are summarized below:

Portfolio Company	Realization Event	Gains	tealized (Losses) illions)
Connect-Air International, Inc.	Exit of portfolio company	\$	5.5
ACFP Acquisition Company, Inc.	Distribution related to sale of operations		2.3
Westminster Cracker Company, Inc.	Distribution related to sale of		
	operations		1.5
Acentia, LLC	Exit of portfolio company		<(0.1)
Other			0.2
Total		\$	9.5

For the year ended December 31, 2014, the total net realized loss on investments was \$17.0 million and was comprised of \$3.3 million in gross realized gains and \$20.3 million in gross realized losses. Significant realized gains and (losses) are summarized below:

		Net Re	ealized
		Gains ((Losses)
Portfolio Company	Realization Event	(in mi	illions)
Nobles Manufacturing, Inc.	Exit of portfolio company	\$	1.7

Edgar Filing: FIDUS INVESTMENT Corp - Form 497

Brook Furniture Rental, Inc.	Exit of portfolio company	0.9
Apex Microtechnology, Inc.	Repayment of debt in full	0.2
S.B. Restaurant Co. (dba Elephant Bar)	Exit of portfolio company	(8.0)
Avrio Technology Group, LLC	Exit of portfolio company	(12.3)
Other		0.5
Total		\$ (17.0)

During the year ended December 31, 2015, we recorded a net change in unrealized depreciation on investments of \$10.1 million attributable to (i) the reversal of net unrealized appreciation on investments of \$4.7 million related to the exit or sale of investments, resulting in unrealized depreciation, (ii) net unrealized depreciation of \$9.3 million on debt investments and (iii) net unrealized appreciation of \$3.9 million on equity

investments. During the year ended December 31, 2014, we recorded a net change in unrealized appreciation on investments of \$13.3 million attributable to (i) the reversal of net unrealized depreciation on investments of \$11.0 million related to the exit or sale of investments, resulting in unrealized appreciation, (ii) net unrealized depreciation of \$0.8 million on debt investments and (iii) net unrealized appreciation of \$3.1 million on equity investments.

As a result of these events, our net increase in net assets resulting from operations during the year ended December 31, 2015 was \$26.0 million, or an increase of \$6.5 million, or 33.3%, compared to a net increase in net assets resulting from operations of \$19.5 million during the prior year period.

Liquidity and Capital Resources

As of December 31, 2016, we had \$57.1 million in cash and cash equivalents and our net assets totaled \$353.8 million. We believe that our current cash and cash equivalents on hand, our continued access to SBA-guaranteed debentures, our Credit Facility and our anticipated cash flows from operations will provide adequate capital resources with which to operate and finance our investment business and make distributions to our stockholders for at least the next 12 months. We intend to generate additional cash primarily from the future offerings of securities and future borrowings, as well as cash flows from operations, including income earned from investments in our portfolio companies. On both a short-term and long-term basis, our primary use of funds will be investments in portfolio companies and cash distributions to our stockholders. Additionally, certain of our SBA debentures begin to mature in 2018, which will require repayment on or before the respective maturity dates.

Cash Flows

For the year ended December 31, 2016, we experienced a net increase in cash and cash equivalents of \$25.4 million. During that period, we used \$33.6 million of cash for operating activities, which included \$197.8 million used for purchases of investments, which is partially offset by proceeds of \$137.5 million from sales and repayments of investments. During the same period, we received net proceeds from secondary offerings of shares of our common stock off of our effective shelf registration statement of \$94.7 million and proceeds from the issuances of SBA debentures of \$10.5 million, which were partially offset by net repayment of borrowings under the Credit Facility of \$15.5 million and cash dividends paid to stockholders of \$29.9 million and the payment of deferred financing costs totaling \$0.8 million.

For the year ended December 31, 2015, we experienced a net increase in cash and cash equivalents in the amount of \$2.3 million. During that period, we used \$19.5 million of cash for operating activities, primarily for the funding of \$136.4 million of investments, which was partially offset by the proceeds from sales and repayments of investments of \$94.7 million. During the same period, we received \$21.8 million for financing activities resulting from proceeds received from stock offerings, net of expenses, of \$3.2 million, proceeds from the issuance of SBA debentures of \$40.0 million and net borrowings under the Credit Facility of \$5.5 million, which were partially offset by cash dividends paid to stockholders of \$25.0 million and the payment of deferred financing costs of \$1.8 million.

Capital Resources

We anticipate that we will continue to fund our investment activities on a long-term basis through a combination of additional debt and equity capital.

The Funds are licensed SBICs, and have the ability to issue debentures guaranteed by the SBA at favorable interest rates. Under the Small Business Investment Act and the SBA rules applicable to SBICs, an SBIC can have

outstanding at any time debentures guaranteed by the SBA in an amount up to twice its regulatory capital.

-59-

The SBA regulations currently limit the amount that is available to be borrowed by any SBIC and guaranteed by the SBA to 300.0% of an SBIC s regulatory capital or \$150.0 million, whichever is less. For three or more SBICs under common control, the maximum amount of outstanding SBA debentures cannot exceed \$350.0 million. SBA debentures have fixed interest rates that approximate prevailing 10-year Treasury Note rates plus a spread and have a maturity of ten years with interest payable semi-annually. The principal amount of the SBA debentures is not required to be paid before maturity but may be pre-paid at any time. As of December 31, 2016, Fund I had \$150.0 million of outstanding SBA debentures and cannot issue additional SBA debentures. As of December 31, 2016, Fund II had \$74.0 million of outstanding SBA debentures. Fund II has the current capacity to issue up to an additional \$51.0 million of SBA debentures. Subject to SBA regulatory requirements and approval, we may access up to \$75.0 million of additional SBA debentures under the SBIC Debenture Program. For more information on the SBA debentures, please see Note 6 to our consolidated financial statements.

In June 2014, we entered into the Credit Facility to provide additional funding for our investment and operational activities. The Credit Facility, which matures on June 16, 2018, had an initial commitment of \$30.0 million and an accordion feature that allows for an increase in the total commitments up to \$75.0 million, subject to certain customary conditions. The Credit Facility is secured by substantially all of our assets, excluding the assets of the Funds.

On December 19, 2014, we amended the Credit Facility to (i) increase the commitment from \$30.0 million to \$50.0 million (ii) allow FIC to buy-back up to \$10.0 million of our common stock subject to the satisfaction of specified financial covenants and conditions. The Credit Facility continues to have an accordion feature which allows for an increase in the total commitment up to \$75.0 million.

Amounts available to borrow under the Credit Facility are subject to a minimum borrowing/collateral base that applies an advance rate to certain portfolio investments. We are subject to limitations with respect to the investments securing the Credit Facility, including, but not limited to, restrictions on sector concentrations, loan size, transferability, payment frequency and status and collateral interests, as well as restrictions on portfolio company leverage, which may also affect the borrowing base and therefore amounts available to borrow.

Borrowings under the Credit Facility bear interest, subject to our election, on a per annum basis equal to (i) the alternate base rate plus 2.5% or (ii) the applicable London Interbank Offered Rate, or LIBOR, which varies depending on the period of the borrowing under the Credit Facility, plus 3.5%. The alternate base rate is equal to the greater of (i) prime rate, (ii) the federal funds rate plus 0.5% or (iii) the three-month LIBOR plus 1.0%. We pay a commitment fee ranging from 0.5% to 1.0% per annum based on the size of the unused portion of the Credit Facility.

We have made customary representations and warranties and are required to comply with various covenants, reporting requirements and other customary requirements for similar credit facilities. These covenants are subject to important limitations and exceptions that are described in the documents governing the Credit Facility. As of December 31, 2016, we were in compliance with all covenants of the Credit Facility and there were no borrowings outstanding under the Credit Facility.

As of December 31, 2016, the weighted average interest rate for all SBA debentures and borrowings outstanding under the Credit Facility was 4.1%.

As a BDC, we are generally required to meet a coverage ratio of total assets to total senior securities, which include borrowings and any preferred stock we may issue in the future, of at least 200.0%. This requirement limits the amount that we may borrow. We have received exemptive relief from the Securities and Exchange Commission, or the SEC, to allow us to exclude any indebtedness guaranteed by the SBA and issued by the Funds from the 200.0% asset

coverage requirements, which, in turn, will enable us to fund more investments with debt capital.

As a BDC, we are generally not permitted to issue and sell our common stock at a price below net asset value per share. We may, however, sell our common stock, or warrants, options or rights to acquire our common

-60-

stock, at a price below the then-current net asset value per share of our common stock if our board of directors, including Independent Directors, determines that such sale is in the best interests of us and our stockholders, and if our stockholders approve such sale. On June 2, 2016, our stockholders voted to allow us to sell or otherwise issue common stock at a price below net asset value per share for a period of one year ending on the earlier of June 2, 2017 or the date of our 2017 Annual Meeting of Stockholders. We expect to present to our stockholders a similar proposal at our 2017 Annual Meeting of Stockholders. Our stockholders specified that the cumulative number of shares sold in each offering during the one-year period ending on the earlier of June 2, 2017 or the date of our 2017 Annual Meeting of Stockholders may not exceed 25.0% of our outstanding common stock immediately prior to each such sale.

Stock repurchase plan

We have an open market stock repurchase program (the Program) under which we may acquire up to \$5.0 million of our outstanding common stock. Under the Program, we may, but are not obligated to, repurchase outstanding common stock in the open market from time to time provided that we comply with the prohibitions under our insider trading policies and the requirements of Rule 10b-18 of the Securities Exchange Act of 1934, as amended, including certain price, market value and timing constraints. The timing, manner, price and amount of any share repurchases will be determined by our management, in its discretion, based upon the evaluation of economic and market conditions, stock price, capital availability, applicable legal and regulatory requirements and other corporate considerations. On November 1, 2016, the Board extended the Program through December 31, 2017, or until the approved dollar amount has been used to repurchase shares. The Program does not require us to repurchase any specific number of shares and the Company cannot assure that any shares will be repurchased under the Program. The Program may be suspended, extended, modified or discontinued at any time. We did not make any repurchases of common stock during the years ended December 31, 2016 or 2015.

Critical Accounting Policies and Use of Estimates

The preparation of financial statements in accordance with GAAP requires management to make certain estimates and assumptions affecting amounts reported in the financial statements. We have identified investment valuation and revenue recognition as our most critical accounting estimates. We continuously evaluate our estimates, including those related to the matters described below. These estimates are based on the information that is currently available to us and on various other assumptions that we believe to be reasonable under the circumstances. Actual results could differ materially from those estimates under different assumptions or conditions. A discussion of our critical accounting policies follows.

Valuation of Portfolio Investments

As a BDC, we report our assets and liabilities at fair value at all times consistent with GAAP and the 1940 Act. Accordingly, we are required to periodically determine the fair value of all of our portfolio investments.

Our investments generally consist of illiquid securities including debt and equity investments in lower middle-market companies. Investments for which market quotations are readily available are valued at such market quotations. Because we expect that there will not be a readily available market for substantially all of the investments in our portfolio, we value substantially all of our portfolio investments at fair value as determined in good faith by our board of directors using a documented valuation policy and consistently applied valuation process. Due to the inherent uncertainty of determining the fair value of investments that do not have a readily available market value, the fair value of our investments may differ significantly from the values that would have been used had a readily available market value existed for such investments, and the difference could be material.

-61-

With respect to investments for which market quotations are not readily available, our board of directors undertakes a multi-step valuation process each quarter, as described below:

our quarterly valuation process begins with each portfolio company or investment being initially evaluated and rated by the investment professionals of our investment advisor responsible for the portfolio investment;

preliminary valuation conclusions are then documented and discussed with the investment committee of our investment advisor;

our board of directors engages one or more independent valuation firm(s) to conduct independent appraisals of a selection of our portfolio investments for which market quotations are not readily available. Each portfolio company investment is generally appraised by the valuation firm(s) at least once every calendar year and each new portfolio company investment is appraised at least once in the twelve-month period following the initial investment. In certain instances, we may determine that it is not cost-effective, and as a result it is not in our stockholders—best interest, to request the independent appraisal of certain portfolio company investments. Such instances include, but are not limited to, situations where we determine that the fair value of the portfolio company investment is relatively insignificant to the fair value of the total portfolio. Our board of directors consulted with the independent valuation firm(s) in arriving at our determination of fair value for 13 and 16 of our portfolio company investments representing 30.5% and 43.0% of the total portfolio investments at fair value (exclusive of new portfolio company investments made during the three months ended December 31, 2016 and 2015, respectively) as of December 31, 2016 and 2015, respectively;

the audit committee of our board of directors reviews the preliminary valuations of our investment advisor and of the independent valuation firm(s) and responds and supplements the valuation recommendations to reflect any comments; and

our board of directors discusses the valuations and determines the fair value of each investment in our portfolio in good faith, based on the input of our investment advisor, the independent valuation firm(s) and the audit committee.

In making the good faith determination of the value of portfolio investments, we start with the cost basis of the security. The transaction price is typically the best estimate of fair value at inception. When evidence supports a subsequent change to the carrying value from the original transaction price, adjustments are made to reflect the expected exit values.

Consistent with the policies and methodologies adopted by our board of directors, we perform detailed valuations of our debt and equity investments, including an analysis of the Company's unfunded loan commitments, using both the market and income approaches as appropriate. Under the market approach, we typically use the enterprise value methodology to determine the fair value of an investment. There is no one methodology to estimate enterprise value and, in fact, for any one portfolio company, enterprise value is generally best expressed as a range of values, from which we derive a single estimate of enterprise value. Under the income approach, we typically prepare and analyze discounted cash flow models to estimate the present value of future cash flows of either an individual debt investment

or of the underlying portfolio company itself.

We evaluate investments in portfolio companies using the most recent portfolio company financial statements and forecasts. We also consult with the portfolio company s senior management to obtain further updates on the portfolio company s performance, including information such as industry trends, new product development and other operational issues.

For our debt investments, including senior secured loans and subordinated notes, the primary valuation technique used to estimate the fair value is the discounted cash flow method. However, if there is deterioration in credit quality or a debt investment is in workout status, we may consider other methods in determining the fair

-62-

value, including the value attributable to the debt investment from the enterprise value of the portfolio company or the proceeds that would be received in a liquidation analysis. Our discounted cash flow models estimate a range of fair values by applying an appropriate discount rate to the future cash flow streams of our debt investments, based on future interest and principal payments as set forth in the associated loan agreements. We prepare a weighted average cost of capital for use in the discounted cash flow model for each investment, based on factors including, but not limited to: current pricing and credit metrics for similar proposed or executed investment transactions of private companies; the portfolio company s historical financial results and outlook; and the portfolio company s current leverage and credit quality as of the date the investment was made. We may also consider the following factors when determining the fair value of debt investments: the portfolio company s ability to make future scheduled payments; prepayment penalties and other fees; estimated remaining life; the nature and realizable value of any collateral securing such debt investment; and changes in the interest rate environment and the credit markets that generally may affect the price at which similar investments may be made. We estimate the remaining life of our debt investments to generally be the legal maturity date of the instrument, as we generally intend to hold loans to maturity. However, if we have information available to us that the loan is expected to be repaid in the near term, we would use an estimated remaining life based on the expected repayment date.

For our equity investments, including equity securities and warrants, we generally use a market approach, including valuation methodologies consistent with industry practice, to estimate the enterprise value of portfolio companies. Typically, the enterprise value of a private company is based on multiples of EBITDA, net income, revenues, or in limited cases, book value. In estimating the enterprise value of a portfolio company, we analyze various factors consistent with industry practice, including but not limited to original transaction multiples, the portfolio company s historical and projected financial results, applicable market trading and transaction comparables, applicable market yields and leverage levels, the nature and realizable value of any collateral, the markets in which the portfolio company does business, and comparisons of financial ratios of peer companies that are public. Where applicable, we consider our ability to influence the capital structure of the portfolio company, as well as the timing of a potential exit.

We may also utilize an income approach when estimating the fair value of our equity securities, either as a primary methodology if consistent with industry practice or if the market approach is otherwise not applicable, or as a supporting methodology to corroborate the fair value ranges determined by the market approach. We typically prepare and analyze discounted cash flow models based on projections of the future free cash flows (or earnings) of the portfolio company. We consider various factors, including but not limited to the portfolio company s projected financial results, applicable market trading and transaction comparables, applicable market yields and leverage levels, the markets in which the portfolio company does business, and comparisons of financial ratios of peer companies that are public.

The fair value of our royalty rights are calculated based on projected future cash flows and the specific provisions contained in the pertinent royalty agreement. The determination of the fair value of such royalty rights is not a significant component of our valuation process.

Determination of fair value involves subjective judgments and estimates. Accordingly, the notes to our consolidated financial statements express the uncertainties with respect to the possible effect of such valuations, and any changes in such valuations, on the consolidated financial statements.

Revenue Recognition

Investments and related investment income. Realized gains or losses on investments are recorded upon the sale or disposition of a portfolio investment and are calculated as the difference between the net proceeds from the sale or disposition and the cost basis of the investment, without regard to unrealized appreciation or depreciation previously

recognized. Net change in unrealized appreciation or depreciation on the consolidated statements of operations includes changes in the fair value of investments from the prior period, as determined by

-63-

our board of directors through the application of our valuation policy, as well as reclassifications of any prior period unrealized appreciation or depreciation on exited investments to realized gains or losses on investments.

Interest and dividend income. Interest and dividend income is recorded on the accrual basis to the extent that we expect to collect such amounts. Interest is accrued daily based on the outstanding principal amount and the contractual terms of the debt. Dividend income is recorded as dividends are declared or at the point an obligation exists for the portfolio company to make a distribution, and is generally recognized when received. Distributions from portfolio companies are evaluated to determine if the distribution is a distribution of earnings or a return of capital. Distributions of earnings are included in dividend income while a return of capital is recorded as a reduction in the cost basis of the investment. Estimates are adjusted as necessary when the relevant tax forms are received from the portfolio company.

Payment-in-kind interest. Certain of our investments contain a PIK income provision. The PIK income, computed at the contractual rate specified in the applicable investment agreement, is added to the principal balance of the investment, rather than being paid in cash, and recorded as interest or dividend income, as applicable, on the consolidated statements of operations. Generally, PIK can be paid-in-kind or all in cash. We stop accruing PIK income when there is reasonable doubt that PIK income will be collected. PIK income is included in our taxable income and, therefore, affects the amount we are required to pay to our stockholders in the form of dividends in order to maintain our tax treatment as a RIC and to avoid paying corporate federal income tax, even though we have not yet collected the cash.

Non-accrual. When there is reasonable doubt that principal, interest or dividends will be collected, loans or preferred equity investments are placed on non-accrual status and we will generally cease recognizing interest or dividend income. Interest and dividend payments received on non-accrual investments may be recognized as interest or dividend income or applied to the investment principal balance based on management s judgment. Non-accrual investments are restored to accrual status when past due principal, interest or dividends are paid and, in management s judgment, are likely to remain current.

Warrants. In connection with our debt investments, we will sometimes receive warrants or other equity-related securities (Warrants). We determine the cost basis of Warrants based upon their respective fair values on the date of receipt in proportion to the total fair value of the debt and Warrants received. Any resulting difference between the face amount of the debt and its recorded fair value resulting from the assignment of value to the Warrants is treated as original issue discount, or OID, and accreted into interest income using the effective interest method over the term of the debt investment.

Fee income. All transaction fees earned in connection with our investments are recognized as fee income. Such fees typically include fees for services, including structuring and advisory services, provided to portfolio companies. We recognize income from fees for providing such structuring and advisory services when the services are rendered or the transactions are completed. Upon the prepayment of a loan or debt security, any prepayment penalties are recorded as fee income when earned.

We also typically receive loan origination or closing fees in connection with investments. Such loan origination and closing fees are capitalized as unearned income and offset against investment cost basis on our consolidated statements of assets and liabilities and accreted into income over the term of the investment.

Recently Issued Accounting Standards

In May 2014, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) 2014-09, *Revenue from Contracts with Customers (Topic 606)*, which supersedes the revenue recognition requirements in *Revenue Recognition (Topic 605)*. Under the new guidance, an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. In August 2015,

-64-

the FASB issued ASU 2015-14, which defers the effective date of ASU 2014-09, such that the guidance is effective for annual and interim reporting periods beginning after December 15, 2017 and early application is permitted only for annual reporting periods beginning after December 15, 2016, including interim reporting periods within that reporting period. We are currently evaluating the impact this ASU will have on our consolidated financial position or disclosures, but we do not expect the impact to be material.

In February 2015, the FASB issued ASU 2015-02, *Consolidation: Amendments to the Consolidation Analysis*, which amends the criteria for determining which entities are considered variable interest entities (VIEs), amends the criteria for determining if a service provider possesses a variable interest in a VIE and ends the deferral granted to investment companies for application of the VIE consolidation model. We adopted ASU 2015-02 as of January 1, 2016. The adoption of ASU 2015-02 had no material impact on our consolidated financial statements.

In April 2015, the FASB issued ASU 2015-03, *Interest Imputation of interest (Subtopic 835-30): Simplifying the Presentation of Debt Issuance Costs*, which requires that debt issuance costs related to a recognized debt liability be presented in the balance sheet as a direct deduction from the carrying amount of that debt liability rather than as an asset. Amortization of the costs will continue to be reported as interest expense. We adopted ASU 2015-03 as of January 1, 2016. The adoption of ASU 2015-03 had no material impact on our consolidated financial statements other than corresponding reductions to total assets and total liabilities on the consolidated statements of assets and liabilities. Prior to adoption, we recorded deferred financing costs as an asset on the consolidated statements of assets and liabilities. Upon adoption of ASU 2015-03, we reclassified these deferred costs to a direct offset of the related debt liability on the consolidated statements of assets and liabilities. The new guidance will be applied retrospectively to each prior period presented. We reclassified the \$4.9 million of deferred financing costs presented as an asset as of December 31, 2015 to a direct offset of the related debt liabilities as of such date on the consolidated statements of assets and liabilities.

In August 2016, the FASB issued ASU 2016-15, *Statement of Cash Flows (Topic 230): Classification of Certain Cash Receipts and Cash Payments*, which addresses eight specific cash flow issues with the objective of reducing the existing diversity in practice in how certain cash receipts and cash payments are presented and classified in the statement of cash flows. This guidance is effective for annual and interim reporting periods beginning after December 15, 2017 and early adoption is permitted, including adoption in an interim period. We are currently evaluating the impact this ASU will have on our consolidated financial position or disclosures.

In December 2016, the FASB issued ASU 2016-19, *Technical Corrections and Improvements*, which includes minor corrections and clarifications that affect a wide variety of topics in the Accounting Standards Codification, including an amendment to Topic 820, *Fair Value Measurement*, which clarifies the difference between a valuation approach and a valuation technique when applying the guidance of that Topic. The amendment also requires an entity to disclose when there has been a change in either or both a valuation approach and/or a valuation technique. The transition guidance for the Topic 820 amendment must be applied prospectively because it could potentially involve the use of hindsight that includes fair value measurements. The guidance is effective for fiscal years, and interim periods within those fiscal years, for all entities beginning after December 15, 2016. Early application is permitted for any fiscal year or interim period for which the entity s financial statements have not yet been issued. We are currently evaluating the impact this ASU will have on our consolidated financial position or disclosures.

Off-Balance Sheet Arrangements

We may be a party to financial instruments with off-balance sheet risk in the normal course of business to meet the financial needs of our portfolio companies. We had off-balance sheet arrangements consisting of outstanding commitments to fund various undrawn revolving loans and other credit facilities totaling

\$6.6 million and \$10.2 million as of December 31, 2016 and 2015, respectively. Such outstanding commitments are summarized in the following table (dollars in thousands):

	Decembe	er 31, 2016	December 31, 2015		
	Total	Total Unfunded		Unfunded	
Portfolio Company - Investment	Commitment	Commitment	Commitment	Commitment	
FAR Research Inc. Revolving Loan	\$ 1,750	\$ 1,614	\$ 1,750	\$ 1,614	
Inflexxion, Inc. Revolving Loan	500	350	1,000	850	
inthinc Technology Solutions, Inc.					
Subordinated Note	5,000	1,000	5,000	1,000	
Lightning Diversion Systems, LLC					
Revolving Loan	250	250	1,000	1,000	
Microbiology Research Associates, Inc.					
Revolving Loan			500	500	
Oaktree Medical Centre, P.C. Revolving					
Loan	2,500		500	250	
Restaurant Finance Co, LLC Senior Secured					
Loan			10,500	1,936	
Safety Products Group, LLC Common			,		
Equity	2,852	2,852			
SES Investors, LLC Revolving Loan	1,500	500			
Vanguard Dealer Services, L.L.C.	7				
Subordinated Note			9,850	2,500	
X5 Opco LLC Revolving Loan			500	500	
			2 0 0	200	
Total	\$ 14,352	\$ 6,566	\$ 30,600	\$ 10,150	

Additional detail for each of the commitments above is provided in the Company s consolidated schedules of investments.

Contractual Obligations

As of December 31, 2016 our future fixed commitments for cash payments are as follows:

	Total	Less Than 1 Year	1 3 Years	3 5 Years	More than 5 Years
		(Doll	ars in thousa	nds)	
SBA debentures	\$ 224,000	\$	\$66,450	\$30,300	\$ 127,250
Interest due on SBA debentures	46,061	9,136	15,046	9,417	12,462
Credit Facility borrowings					
Interest and fees due on Credit					
Facility ⁽¹⁾	820	546	274		

Total \$270,881 \$ 9,682 \$81,770 \$39,71	17 \$ 139.712

(1) Amounts represent (i) commitment fees on the unused portion of the Credit Facility calculated at a rate of 1.0% of the unused amount as of December 31, 2016, which was \$50.0 million and (ii) an annual agency fees due to the Credit Facility administrative agent. The stated maturity date of the Credit Facility is June 16, 2018, which may be extended by mutual agreement.

We have certain contracts under which we have material future commitments. We entered into the Investment Advisory Agreement with our investment advisor in accordance with the 1940 Act. Under the Investment Advisory Agreement, our investment advisor provides us with investment advisory and management services. We pay the following amounts for these services (a) a management fee equal to a percentage of the

-66-

average of our total assets (excluding cash and cash equivalents) and (b) an incentive fee based on our performance. See Business Management and Other Agreements Investment Advisory Agreement Management Fee.

Under the Administration Agreement, our investment advisor furnishes us with office facilities and equipment, provides us clerical, bookkeeping and record keeping services at such facilities and provides us with other administrative services necessary to conduct our day-to-day operations. See Business Management and Other Agreements Administration Agreement.

If any of our contractual obligations discussed above are terminated, our costs under any new agreements that we enter into may increase. In addition, we would likely incur significant time and expense in locating alternative parties to provide the services we expect to receive under our Investment Advisory Agreement and our Administration Agreement. Any new investment advisory agreement would also be subject to approval by our Independent Directors and our stockholders.

Related Party Transactions

We have entered into a number of business relationships with affiliated or related parties, including the following:

In connection with the Formation Transactions, Fund I terminated its management services agreement with Fidus Capital, LLC and we entered into the Investment Advisory Agreement with Fidus Investment Advisors, LLC, as our investment advisor. The investment professionals of Fidus Investment Advisors, LLC were also the investment professionals of Fidus Capital, LLC. We entered into the Investment Advisory Agreement with Fidus Investment Advisors, LLC to manage our day-to-day operating and investing activities. We pay our investment advisor a fee for its services under the Investment Advisory Agreement consisting of two components—a base management fee and an incentive fee. See Note 5 to our consolidated financial statements.

Edward H. Ross, our Chairman and Chief Executive Officer, and Thomas C. Lauer, our President, are managers of Fidus Investment Advisors, LLC. In May 2015, Fidus Investment Advisors, LLC entered into a combination with Fidus Partners, LLC (the Combination), by which members of Fidus Investment Advisors LLC and Fidus Partners, LLC (Partners) contributed all of their respective membership interest in Fidus Investment Advisors LLC and Partners to a newly formed limited liability company, Fidus Group Holdings, LLC (Holdings). As a result, Fidus Investment Advisors LLC is a wholly-owned subsidiary of Holdings, which is a newly formed limited liability company organized under the laws of Delaware.

We entered into the Administration Agreement with Fidus Investment Advisors, LLC to provide us with the office facilities and administrative services necessary to conduct day-to-day operations. See Note 5 to our consolidated financial statements.

We entered into a license agreement with Fidus Partners, LLC, pursuant to which Fidus Partners, LLC has granted us a non-exclusive, royalty-free license to use the name Fidus.

In connection with the IPO and our election to be regulated as a BDC, we applied for and received exemptive relief from the SEC on March 27, 2012 to allow us to take certain actions that would otherwise be prohibited by the 1940

Act, as applicable to BDCs. The relief permits FIC and Fund I, each of which has elected to be treated as a BDC, to operate effectively as one company, specifically allowing them to: (1) engage in certain transactions with each other; (2) invest in securities in which the other is or proposes to be an investor; (3) file consolidated reports with the Commission; and (4) be subject to modified consolidated asset coverage requirements for senior securities issued by a BDC and its SBIC subsidiary. Fund II has not elected to be treated as a BDC and is not party to this exemptive relief. The fourth exemption described above allows us to exclude any indebtedness guaranteed by the SBA and issued by Fund I from the 200.0% asset coverage requirements

applicable to us. Effective September 30, 2014, any SBA debentures issued by Fund II are not considered senior securities for purposes of the 200.0% asset coverage requirements.

While we may co-invest with investment entities managed by our investment advisor or its affiliates, to the extent permitted by the 1940 Act and the rules and regulations thereunder, the 1940 Act imposes significant limits on co-investment. The SEC staff has granted us relief sought in an exemptive application that expands our ability to co-invest in portfolio companies with other funds managed by our investment advisor or its affiliates (Affiliated Funds) in a manner consistent with our investment objective, positions, policies, strategies and restrictions as well as regulatory requirements and other pertinent factors, subject to compliance with certain conditions (the Order). Pursuant to the Order, we are permitted to co-invest with our affiliates if a required majority (as defined in Section 57(o) of the 1940 Act) or our independent directors make certain conclusions in connection with a co-investment transaction, including that (1) the terms of the transactions, including the consideration to be paid, are reasonable and fair to us and our stockholders and do not involve overreaching by us or our stockholders on the part of any person concerned, and (2) the transaction is consistent with the interests of our stockholders and is consistent with our investment objective and strategies.

In addition, we, Fund I and our investment advisor have each adopted a joint code of ethics pursuant to Rule 17j-1 under the 1940 Act that governs the conduct of our and our investment advisor s officers, directors and employees. Additionally, our investment advisor has adopted a code of ethics pursuant to rule 240A-1 under the 1940 Act and in accordance with Rule 17j-1(c). We, and Fund I, have also adopted a code of business conduct that is applicable to all officers, directors and employees of Fidus and our investment advisor. Our officers and directors also remain subject to the duties imposed by both the 1940 Act and the Maryland General Corporation Law.

Quantitative and Qualitative Disclosure about Market Risk

We are subject to financial market risks, including changes in interest rates. Changes in interest rates affect both our cost of funding and the valuation of our investment portfolio. Our risk management systems and procedures are designed to identify and analyze our risk, to set appropriate policies and limits and to continually monitor these risks and limits by means of reliable administrative and information systems and other policies and programs. In the future, our investment income may also be affected by changes in various interest rates, including LIBOR and prime rates, to the extent of any debt investments that include floating interest rates. As of December 31, 2016 and 2015, one debt investment bore interest at a variable rate, which represented \$8.2 million and \$8.9 million of our portfolio on a fair value basis, respectively, and the remainder of our debt portfolio was comprised entirely of fixed rate investments. Assuming that the consolidated statements of assets and liabilities as of December 31, 2016 and 2015 were to remain constant, a hypothetical 100 basis point change in interest rates would not have a material effect on our level of interest income from debt investments. Our pooled SBA debentures bear interest at fixed rates. Our Credit Facility bears interest, subject to our election, on a per annum basis equal to (i) the alternate base rate plus 2.5% or (ii) the applicable LIBOR, which varies depending on the period of the borrowing under the Credit Facility, plus 3.5%. The alternate base rate is equal to the greater of (i) prime rate, (ii) the federal funds rate plus 0.5% or (iii) the three-month LIBOR plus 1.0%.

Because we currently borrow, and plan to borrow in the future, money to make investments, our net investment income is dependent upon the difference between the rate at which we borrow funds and the rate at which we invest the funds borrowed. Accordingly, there can be no assurance that a significant change in market interest rates will not have a material adverse effect on our net investment income. In periods of rising interest rates, our cost of funds would increase, which could reduce our net investment income if there is not a corresponding increase in interest income generated by our investment portfolio.

Recent Developments

On January 4, 2017, we invested \$12.3 million in subordinated notes and common equity of Revenue Management Solutions, LLC, a leading provider of services that match, reconcile, and facilitate the posting of

-68-

healthcare payments received against submitted claims from healthcare providers, benefit managers, and billing companies.

On February 3, 2017, we exited our debt and equity investments in Worldwide Express Operations, LLC (Worldwide Express). We received payment in full on our subordinated note, including a prepayment penalty, and sold a portion of our equity for a realized gain, net of estimated taxes, of approximately \$5.0 million. Concurrently, we rolled over \$4.0 million of our equity investment into a new equity investment in the portfolio company. On February 27, 2017, we invested \$10.0 million in a subordinated note of Worldwide Express.

On February 14, 2017, the Board declared a regular quarterly dividend of \$0.39 per share payable on March 24, 2017 to stockholders of record as of March 10, 2017.

On February 28, 2017, we repaid \$24.8 million of SBA debentures with an interest rate of 6.2% which would have matured on March 1, 2018.

On February 28, 2017, we invested \$10.5 million in subordinated notes and common equity of TransGo, LLC, a specialty manufacturer and designer of aftermarket automotive transmission parts and repair kits.

On February 28, 2017, we exited our debt investment in Grindmaster Corporation. We received payment in full on our subordinated note, including a prepayment penalty.

On March 2, 2017, we received payment in full on our subordinated notes in Caldwell & Gregory, LLC, and, concurrently, we invested \$2.8 million in a new subordinated note.

On March 3, 2017, we invested \$12.3 million in subordinated notes and common equity of New Era Technology, Inc., a global provider of end-to-end IT solutions primarily to the state and local government, education, and healthcare markets.

SENIOR SECURITIES

Information about our senior securities is shown in the following table for the years indicated in the table, unless otherwise noted. RSM US LLP s report on the senior securities table as of December 31, 2016, is attached as an exhibit to the registration statement of which this prospectus is a part.

Class and Year	Total Amount Outstanding Exclusive of Treasury Securities (1) (dollars in thousands)	Asset Coverage per Unit ⁽²⁾⁽⁵⁾	Involuntary liquidation Preference per Unit	Average Market Value per Unit ⁽⁴⁾
SBA debentures				
2007	\$	\$		N/A
2008	46,450	1,701		N/A
2009	79,450	1,610		N/A
2010	93,500	1,556		N/A
2011	104,000	2,351		N/A
2012	144,500			N/A
2013	144,500			N/A
2014	173,500			N/A
2015	213,500			N/A
2016	224,000			N/A
Credit Facility				
2007	\$ 15,520	\$ 2,285		N/A
2008				N/A
2009				N/A
2010				N/A
2011				N/A
2012				N/A
2013				N/A
2014	10,000	42,676		N/A
2015	15,500	30,733		N/A
2016				N/A

- (1) Total amount of each class of senior securities outstanding at the end of the period presented.
- (2) Asset coverage per unit is the ratio of the carrying value of our total consolidated assets, less all liabilities and indebtedness not represented by senior securities, to the aggregate amount of senior securities representing indebtedness. Asset coverage per unit is expressed in terms of dollar amounts per \$1,000 of indebtedness.
- (3) The amount to which such class of senior security would be entitled upon the involuntary liquidation of the issuer in preference to any security junior to it. The indicates information which the SEC expressly does not require to be disclosed for certain types of senior securities.

- (4) Not applicable because senior securities are not registered for public trading.
- (5) We have excluded our SBA-guaranteed debentures with respect to Fund I from the asset coverage calculation with respect to Fund I as of December 31, 2012 pursuant to the exemptive relief granted by the SEC in March 2012 that permits us to exclude such debentures from the definition of senior securities in the 200% asset coverage ratio we are required to maintain under the 1940 Act. We have excluded our SBA-guaranteed debentures with respect to Fund II from the asset coverage calculation as of December 31, 2014 pursuant to the exemptive relief granted by the SEC in June 2014 that permits us to exclude such debentures from the definition of senior securities in the 200% asset coverage ratio we are required to maintain under the 1940 Act.

-70-

THE COMPANY

General

We provide customized debt and equity financing solutions to lower middle-market companies, which we define as U.S. based companies having revenues between \$10.0 million and \$150.0 million. Our investment objective is to provide attractive risk-adjusted returns by generating both current income from our debt investments and capital appreciation from our equity related investments. Our investment strategy includes partnering with business owners, management teams and financial sponsors by providing customized financing for ownership transactions, recapitalizations, strategic acquisitions, business expansion and other growth initiatives. We seek to maintain a diversified portfolio of investments in order to help mitigate the potential effects of adverse economic events related to particular companies, regions or industries.

We invest in companies that possess some or all of the following attributes: predictable revenues; positive cash flows; defensible and/or leading market positions; diversified customer and supplier bases; and proven management teams with strong operating discipline. We target companies in the lower middle-market with annual earnings, before interest, taxes, depreciation and amortization, or EBITDA, between \$3.0 million and \$20.0 million; however, we may from time to time opportunistically make investments in larger or smaller companies. Our investments typically range between \$5.0 million and \$25.0 million per portfolio company.

As of December 31, 2016, we had debt and equity investments in 57 portfolio companies with an aggregate fair value of \$524.5 million. The weighted average yield on our debt investments as of December 31, 2016 was 13.1%. The weighted average yield of our debt investments is not the same as a return on investment for our stockholders but, rather, relates to a portion of our investment portfolio and is calculated before the payment of all of our and our subsidiaries fees and expenses. The weighted average yield was computed using the effective interest rates as of December 31, 2016, including accretion of original issue discount and loan origination fees, but excluding investments on non-accrual status, if any. There can be no assurance that the weighted average yield will remain at its current level.

Market Opportunity

We believe that the limited amount of capital available to lower middle-market companies, coupled with the desire of these companies for flexible and partnership-oriented sources of capital, creates an attractive investment environment for us. We believe the following factors will continue to provide us with opportunities to grow and deliver attractive returns to stockholders.

The lower middle-market represents a large, underserved market. We believe that lower middle-market companies, most of which are privately-held, are relatively underserved by traditional capital providers such as commercial banks, finance companies, hedge funds and collateralized loan obligation funds. Further, we believe that companies of this size generally possess conservative capital structures with significant enterprise value cushions, as compared to larger companies with more financing options.

Current credit market dislocation for lower middle-market companies has created an opportunity for attractive risk-adjusted returns. In this market, we believe traditional capital sources, such as commercial banks, finance companies, hedge funds and collateralized loan obligation funds have reduced lending and investing in the lower middle-market, which has resulted in increased opportunities for alternative funding sources. In addition, we believe that there continues to be less competition in the lower middle-market and an increased opportunity for attractive risk-adjusted returns. The remaining lenders and investors in the current environment are requiring lower amounts of

senior and total leverage, increased equity commitments and more comprehensive covenant packages than was customary in the years leading up to the credit crisis.

Large pools of uninvested private equity capital should drive future transaction velocity. We believe there is a large pool of uninvested private equity capital, and we expect that private equity firms will remain active

-71-

investors in lower middle-market companies. Private equity funds generally seek to leverage their investments by combining their equity capital with senior secured loans and/or mezzanine debt provided by other sources, and our relationships with private equity firms position us to partner with private equity investors.

Future refinancing activity is expected to create additional investment opportunities. A high volume of financings completed will mature in the coming years. Additionally, we believe that demand for debt financing from lower middle-market companies will remain strong because these companies will continue to require credit to refinance existing debt, to support growth initiatives and to finance acquisitions. We believe this supply of opportunities coupled with limited financing providers focused on lower middle-market companies will continue to offer investment opportunities with attractive risk-adjusted returns.

Our Advisor

Our investment activities are managed by Fidus Investment Advisors, LLC, our investment advisor, and supervised by our board of directors, a majority of whom are not interested persons of FIC as defined in section 2(a)(19) of the 1940 Act, and who we refer to hereafter as the Independent Directors. Pursuant to the terms of the investment advisory and management agreement, which we refer to as the Investment Advisory Agreement, between us and our investment advisor, our investment advisor is responsible for determining the composition of our portfolio, including sourcing potential investments, conducting research and diligence on potential investments and equity sponsors, analyzing investment opportunities, structuring our investments and monitoring our investments and portfolio companies on an ongoing basis. Our investment advisor s investment professionals seek to capitalize on their significant deal origination and sourcing, underwriting, due diligence, investment structuring, execution, portfolio management and monitoring experience. These professionals have developed a broad network of contacts within the investment community, have gained extensive experience investing in assets that constitute our primary focus and have expertise in investing across all levels of the capital structure of lower middle-market companies.

Our relationship with our investment advisor is governed by and dependent on the Investment Advisory Agreement and may be subject to conflicts of interest. We pay our investment advisor a fee for its services under the Investment Advisory Agreement consisting of two components a base management fee and an incentive fee. The base management fee is calculated at an annual rate of 1.75% of the average value of our total assets (other than cash or cash equivalents but including assets purchased with borrowed amounts). The incentive fee consists of two parts. The first part is calculated and payable quarterly in arrears and equals 20.0% of our pre-incentive fee net investment income for the immediately preceding quarter, subject to a 2.0% preferred return, or hurdle, and a catch up feature. The second part is determined and payable in arrears as of the end of each fiscal year in an amount equal to 20.0% of our realized capital gains, if any, on a cumulative basis from inception through the end of each fiscal year, computed net of all realized capital losses and unrealized capital depreciation on a cumulative basis, less the aggregate amount of any capital gain incentive fees paid in prior years. We accrue, but do not pay, a capital gains incentive fee in connection with any unrealized capital appreciation, as appropriate. For more information about how we compensate our investment advisor, see Management and Other Agreements Investment Advisory Agreement.

Among other things, our board of directors is charged with protecting our interests by monitoring how our investment advisor addresses conflicts of interest associated with its management services and compensation. Our board of directors is not expected to review or approve each borrowing or incurrence of leverage. However, our board of directors periodically reviews our investment advisor s portfolio management decisions and portfolio performance. In addition, our board of directors at least annually reviews the services provided by and fees paid to our investment advisor. In connection with these reviews, our board of directors, including a majority of our Independent Directors, considers whether the fees and expenses (including those related to leverage) that we pay to our investment advisor are fair and reasonable in relation to the services provided. Renewal of our Investment Advisory Agreement must be

approved each year by our board of directors, including a majority of our Independent Directors.

-72-

Fidus Investment Advisors, LLC is a Delaware limited liability company that is registered as an investment advisor under the Investment Advisers Act of 1940, as amended, or the Advisers Act. In addition, Fidus Investment Advisors, LLC serves as our administrator and provides us with office space, equipment and clerical, book-keeping and record-keeping services pursuant to an administration agreement, which we refer to as the Administration Agreement.

Business Strategy

We intend to accomplish our goal of becoming the premier provider of capital to and value-added partner of lower middle-market companies by:

Leveraging the Experience of Our Investment Advisor. Our investment advisor s investment professionals have significant experience investing in, lending to and advising companies across multiple industries and changing market cycles. These professionals have diverse backgrounds with prior experience in senior management positions at investment banks, specialty finance companies, commercial banks and privately and publicly held companies and have extensive experience investing across all levels of the capital structure of lower middle-market companies. We believe these professionals possess an in-depth understanding of the strategic, financial and operational challenges and opportunities of lower middle-market companies, enabling our investment advisor to effectively identify, assess, structure and monitor our investments.

Capitalizing on Our Strong Transaction Sourcing Network. Our investment advisor s investment professionals possess an extensive network of long-standing relationships with private equity firms, middle-market senior lenders, junior capital partners, financial intermediaries and management teams of privately owned businesses. We believe that the combination of our investment advisor s relationships and our reputation as a reliable, responsive and value-added financing partner helps us generate a steady stream of new investment opportunities and proprietary deal flow.

Serving as a Value-Added Partner with Customized Financing Solutions. We follow a partnership-oriented investment approach and focus on opportunities where we believe we can add value to a portfolio company. We primarily concentrate on industries or market niches in which the investment professionals of our investment advisor have prior experience. These professionals also have expertise in structuring securities at all levels of the capital structure, which we believe positions us well to meet the unique financing needs of our portfolio companies. We invest primarily in mezzanine debt securities, typically coupled with an equity interest; however, on a selective basis we may invest in senior secured or unitranche loans. Further, as a publicly-traded BDC, we have a longer investment horizon without the capital return requirements of traditional private investment vehicles. We believe this flexibility enables us to generate attractive risk-adjusted returns on invested capital and enables us to be a better long-term partner for our portfolio companies. We believe that by leveraging the industry and structuring expertise of our investment advisor coupled with our long-term investment horizon, we are well positioned to be a value-added partner for our portfolio companies.

Employing Rigorous Due Diligence and Underwriting Processes Focused on Capital Preservation. Our investment advisor follows a disciplined and credit-oriented approach to evaluating and investing in companies. We focus on companies with proven business models, significant free cash flow, defensible market positions and significant enterprise value cushion for our debt investments. In making investment decisions, we seek to minimize the risk of capital loss without foregoing the opportunity for capital appreciation. Our investment advisor s investment professionals have developed extensive due diligence and underwriting processes designed to better assess a portfolio company s prospects and to determine the appropriate investment structure. Our investment advisor thoroughly analyzes each potential portfolio company s competitive position, financial performance, management team, growth potential and industry attractiveness. As part of this process, our investment advisor also participates in meetings with management, tours of facilities, discussions with industry professionals and third-party reviews. We believe this

approach enables us to build and maintain an attractive investment portfolio that meets our return and value criteria over the long term.

-73-

Actively Managing our Portfolio. We believe that our investment advisor s initial and ongoing portfolio review process allows us to effectively monitor the performance and prospects of our portfolio companies. We seek to obtain board observation rights or board seats with respect to our portfolio companies and we conduct monthly financial reviews and have regular discussions with portfolio company management. We structure our investments with a comprehensive set of financial maintenance, affirmative and negative covenants. We believe that active monitoring of our portfolio companies compliance with covenants provides us with an early warning of any financial difficulty and enhances our ability to protect our invested capital.

Maintaining Portfolio Diversification. We seek to maintain a portfolio of investments that is appropriately diversified among companies, industries, geographic regions and end markets. We have made investments in portfolio companies in the following industries: business services, industrial products and services, value-added distribution, healthcare products and services, consumer products and services (including retail, food and beverage), energy services, defense and aerospace, transportation and logistics, information technology services and niche manufacturing. We believe that investing across various industries helps mitigate the potential effects of negative economic events for particular companies, regions and industries.

Benefiting from Lower Cost of Capital. The Funds SBIC licenses allow us to issue SBA-guaranteed debentures. These SBA debentures carry long-term fixed rates that are generally lower than rates on comparable bank and public debt. Because lower-cost SBA leverage is, and will continue to be, a significant part of our funding strategy, our relative cost of debt capital should be lower than many of our competitors. For three or more SBICs under common control, the maximum amount of outstanding SBA debentures cannot exceed \$350.0 million.

Investments

We seek to create a diversified investment portfolio that primarily includes mezzanine loans and, to a lesser extent, equity securities. Our investments typically range between \$5.0 million to \$25.0 million per portfolio company, although this investment size may vary proportionately with the size of our capital base. Our investment objective is to provide attractive risk-adjusted returns by generating both current income from our debt investments and capital appreciation from our equity related investments. We may invest in the equity securities of our portfolio companies, such as preferred stock, common stock, warrants and other equity interests, either directly or in conjunction with our debt investments.

Mezzanine Debt Investments. We typically invest in mezzanine debt, which includes senior subordinated notes and junior secured loans. These loans typically have relatively higher fixed interest rates (often representing a combination of cash pay and payment-in-kind interest), amortization of principal deferred to maturity and prepayment penalties, as well as origination and other fees. Subordinated loans generally allow the borrower to make a large lump sum payment of principal at the end of the loan term, and there is a risk of loss if the borrower is unable to pay the lump sum or refinance the amount owed at maturity. Subordinated investments are generally more volatile than secured loans and may involve a greater risk of loss of principal. In certain situations where we are able to structure an investment as a junior secured loan, we will obtain a junior security interest in the assets of these portfolio companies that will serve as collateral in support of the repayment of such loan. This collateral may take the form of second-priority liens on the assets of a portfolio company.

Senior Secured Loans. We also structure some of our debt investments as senior secured or unitranche loans. Senior secured loans typically provide for a fixed interest rate and may contain some minimum principal amortization, excess cash flow sweep features and prepayment penalties, as well as origination and other fees. Senior secured loans are secured by a first or second priority lien on all existing and future assets of the borrower and may take the form of term loans or revolving lines of credit. Unitranche debt financing involves issuing one debt security that blends the

risk and return profiles of both secured and subordinated debt and typically involves a first priority lien on all existing and future assets of the borrower. We believe that unitranche debt can be attractive for many lower middle-market companies given their size in order to reduce structural complexity and potential conflicts among creditors.

-74-

Equity Securities. Our equity securities typically consist of either a direct minority equity investment in common or preferred stock or membership/partnership interests of a portfolio company, or we may receive warrants to buy a minority equity interest in a portfolio company in connection with a debt investment. Warrants we receive with our debt investments typically require only a nominal cost to exercise, and thus, as a portfolio company appreciates in value, we may achieve additional investment return from this equity interest. Our equity investments are typically not control-oriented investments, and in many cases, we acquire equity securities as part of a group of private equity investors in which we are not the lead investor. We may structure such equity investments to include provisions protecting our rights as a minority-interest holder, as well as a put, or right to sell such securities back to the issuer, upon the occurrence of specified events. In many cases, we may also seek to obtain registration rights in connection with these equity interests, which may include demand and piggyback registration rights. Our equity investments typically are made in connection with debt investments to the same portfolio companies.

We generally seek to invest in companies from the broad range of industries in which our investment advisor has direct experience. The following is a representative list of the broad industry segments in which we have invested; however, we may invest in other industries if we are presented with attractive opportunities.

business services;
industrial products and services;
value-added distribution;
healthcare products and services;
consumer products and services (including retail, food and beverage); niche manufacturing;
defense and aerospace;
transportation and logistics;
information technology services; and
energy services.

As of December 31, 2016, we had investments in 57 portfolio companies with an aggregate fair value of \$524.5 million. As of December 31, 2015, we had investments in 53 portfolio companies with an aggregate fair value of \$443.3 million. As of December 31, 2014, we had investments in 42 portfolio companies with an aggregate fair value of \$396.4 million.

Investment Criteria/Guidelines

We use the following criteria and guidelines in evaluating investment opportunities and constructing our portfolio. However, not all of these criteria and guidelines have been, or will be, met in connection with each of our investments.

Value Orientation / Positive Cash Flow. Our investment advisor places a premium on analysis of business fundamentals from an investor s perspective and has a distinct value orientation. We focus on companies with proven business models in which we can invest at relatively low multiples of operating cash flow. We also typically invest in portfolio companies with a history of profitability and minimum trailing twelve month EBITDA of \$3.0 million. We do not invest in start-up companies, turn-around situations or companies that we believe have unproven business plans.

Experienced Management Teams with Meaningful Equity Ownership. We target portfolio companies that have management teams with significant experience and/or relevant industry experience coupled with meaningful equity ownership. We believe management teams with these attributes are more likely to manage the companies in a manner that protects our debt investment and enhances the value of our equity investment.

Niche Market Leaders with Defensible Market Positions. We seek to invest in portfolio companies that have developed defensible and/or leading positions within their respective markets or market niches and are well

-75-

positioned to capitalize on growth opportunities. We favor companies that demonstrate significant competitive advantages, which we believe helps to protect their market position and profitability.

Diversified Customer and Supplier Base. We prefer to invest in portfolio companies that have a diversified customer and supplier base. Companies with a diversified customer and supplier base are generally better able to endure economic downturns, industry consolidation and shifting customer preferences.

Significant Equity Value. We believe the existence of significant underlying equity value provides important support to our debt investments. With respect to our debt investments, we look for portfolio companies where management/sponsors have provided significant equity funding and where we believe aggregate enterprise value significantly exceeds aggregate indebtedness, after consideration of our investment.

Viable Exit Strategy. We invest in portfolio companies that we believe will provide steady cash flows to service our debt, ultimately repay our loans and provide working capital for their respective businesses. In addition, we seek to invest in portfolio companies whose business models and expected future cash flows offer attractive exit possibilities for our portfolio equity investments. We expect to exit our investments typically through one of three scenarios:

(a) the sale of the portfolio company resulting in repayment of all outstanding debt and monetization of equity; (b) the recapitalization of the portfolio company through which our investments are replaced with debt or equity from a third party or parties; or (c) the repayment of the initial or remaining principal amount of our debt investment from cash flow generated by the portfolio company. In some investments, there may be scheduled amortization of some portion of our debt investment that would result in a partial exit of our investment prior to the maturity of the debt investment.

Investment Committee

Our investment advisor has formed an investment committee to evaluate and approve all of our investments. The investment committee process is intended to bring the diverse experience and perspectives of the committee s members to the analysis and consideration of each investment. The investment committee also serves to provide investment consistency and adherence to our investment advisor s core investment philosophy and policies. The investment committee also determines appropriate investment sizing and suggests ongoing monitoring requirements.

The members of the investment committee that evaluate and approve all of our investments are Edward H. Ross, Thomas C. Lauer, John H. Grigg, Robert G. Lesley, Jr., John J. Ross, II, and W. Andrew Worth.

Investment Process Overview

Our investment advisor has developed the following investment process based on the experience of its investment professionals to identify investment opportunities and to structure investments quickly and effectively. Furthermore, our investment advisor seeks to identify those companies exhibiting superior fundamental risk-reward profiles and strong defensible business franchises while focusing on the relative value of the security in the portfolio company s capital structure. The investment process consists of five distinct phases:

Investment Generation/Origination;

Initial Evaluation;

Due Diligence and Underwriting;

Documentation and Closing; and

Active Portfolio Management.

-76-

Each of the phases is described in more detail below.

Investment Generation/Origination. Our investment origination efforts are focused on leveraging our investment advisor s extensive network of long-standing relationships with private equity firms, middle-market senior lenders, junior-capital partners, financial intermediaries, service providers and management teams of privately owned businesses. We believe that our investment advisor s investment professionals have reputations as reliable, responsive and value-added partners for lower middle-market companies. Our investment advisor s focus and reputation as a valued-added partner generates a balanced mix of proprietary deal flow and a steady stream of new deal opportunities.

Initial Evaluation. After a potential transaction is received by our investment advisor, it will conduct an initial review of the transaction materials to determine whether it meets our investment criteria and complies with SBA and other regulatory compliance requirements.

If the potential transaction initially meets our investment criteria, at least two members of the investment committee, referred to as the deal team, will conduct a preliminary due diligence review, taking into consideration some or all of the following factors:

A comprehensive financial model based on quantitative analysis of historical financial performance, projections and pro forma adjustments to determine a range of estimated internal rates of return.

An initial call or meeting with the portfolio company management team, owner, private equity sponsor or other deal partner.

A brief industry and market analysis, leveraging direct industry expertise from other investment professionals of our investment advisor.

Preliminary qualitative analysis of the portfolio company management team s competencies and backgrounds.

Potential investment structures and pricing terms.

Upon successful completion of the screening process, the deal team prepares a screening memorandum and makes a recommendation to the investment committee. At this time, the investment committee will also consider whether the investment would be made by FIC or through the Funds. If the investment committee supports the deal team s recommendation, the deal team issues a non-binding term sheet to the potential portfolio company. Such a term sheet will typically include the key economic terms based on our analysis conducted during the screening process. Upon agreement on a term sheet with the potential portfolio company, our investment advisor will begin a formal diligence and underwriting process.

Due Diligence and Underwriting. Our investment advisor has developed a rigorous and disciplined due diligence process that includes a comprehensive understanding of a borrower s industry, market, operational, financial, organizational and legal positions and prospects. The due diligence review will take into account information that the deal team deems necessary to make an informed decision about the creditworthiness of the borrower and the risks of

the investment, which includes some or all of the following:

Initial or additional site visits and facility tours with management and key personnel.

Review of the business history, operations and strategy.

In depth review of industry and competition.

Analysis of key customers and suppliers, including review of any concentrations and key contracts.

Detailed review of historical and projected financial statements, including a review of at least three years of performance (annual and monthly), key financial ratios, revenue, expense and profitability drivers and sensitivities to management s financial projections.

Detailed evaluation of company management, including background checks.

-77-

Third party reviews of accounting, environmental, legal, insurance, , material contracts, competition, industry and market studies and interviews with customers and suppliers (each as appropriate).

Financial sponsor diligence, if applicable, including portfolio company and other reference checks. During the due diligence process, significant attention is given to sensitivity analyses and how the portfolio company might be expected to perform given various scenarios, including downside, base case and upside. Upon satisfactory completion of the due diligence review process, the deal team will present their findings and a recommendation to the investment committee. If the investment committee supports the deal team s recommendation, the deal team will proceed with negotiating and documenting the investment.

Documentation and Closing. Our investment advisor works with the management of a potential portfolio company and its other capital providers, including as applicable, senior, junior and equity capital providers to structure an investment. Our investment advisor structures each investment with an acute focus on capital preservation and will tailor the terms of each investment to the facts and circumstances of the transaction and the prospective portfolio company. We seek to limit the downside of our investments by:

Targeting an optimal total return on our investments (including a combination of current and deferred interest, prepayment penalties and equity participation) that compensates us for credit risk.

Negotiating covenants in connection with our investments that afford our portfolio companies as much flexibility in managing their businesses as possible, yet consistent with preservation of our capital. Such restrictions may include affirmative and negative covenants, default penalties, lien protection, change of control provisions and board rights, including either board observation or rights to a seat on the board under some circumstances.

Structuring financial covenants and terms in our debt investments that require a portfolio company to reduce leverage over time, thereby mitigating the risk of loss and increasing the likelihood of achieving targeted returns on investment. These methods may include, among others: leverage covenants requiring a decreasing ratio of debt to cash flow; cash flow covenants requiring an increasing ratio of cash flow to interest expense and possibly other cash expenses such as capital expenditures, cash taxes and mandatory principal payments; and debt incurrence prohibitions, or limiting a company s ability to relever its balance sheet. In addition, limitations on asset sales and capital expenditures prevent a company from changing the nature of its business or capitalization without our consent.

We expect to hold most of our investments to maturity or repayment, but may exit our investments earlier if a liquidity event takes place, such as a sale or recapitalization of a portfolio company or if we determine that a sale of one or more of our investments is in our best interest.

Active Portfolio Management. Active portfolio monitoring is a vital part of our investment process and we continuously monitor the status and progress of the portfolio companies. The same deal team that was involved in the investment process will continue its involvement in the portfolio company post-investment. This provides for continuity of knowledge and allows the deal team to maintain a strong business relationship with key management of its portfolio companies for post-investment assistance and monitoring purposes.

As part of the monitoring process, the deal team conducts a comprehensive review of the financial and operating results of each portfolio company that includes a review of the monthly/quarterly financials relative to prior year and budget, a review of the financial projections including cash flow and liquidity needs, meeting with management, attending board meetings and reviewing compliance certificates and covenants. We maintain an ongoing dialogue with the management and any controlling equity holders of a portfolio company that will include discussions about the company s business plans and growth opportunities and any changes in industry and competitive dynamics. While we maintain limited involvement in the ordinary course operations of our portfolio companies, we may maintain a higher level of involvement in non-ordinary course financing or strategic activities and any non-performing scenarios. Our investment advisor s portfolio management will also include quarterly portfolio reviews with all investment professionals and investment committee members.

Investment Rating System

In addition to various risk management and monitoring tools, our investment advisor uses an internally developed investment rating system to characterize and monitor the credit profile and our expected level of returns on each investment in our portfolio. We use a five-level numeric rating scale. The following is a description of the conditions associated with each investment rating:

Investment Rating 1 is used for investments that involve the least amount of risk in our portfolio. The portfolio company is performing above expectations, the debt investment is expected to be paid in the near term and the trends and risk factors are favorable, and may include an expected capital gain.

Investment Rating 2 is used for investments that involve a level of risk similar to the risk at the time of origination. The portfolio company is performing substantially within our expectations and the risks factors are neutral or favorable. Each new portfolio investment enters our portfolio with Investment Rating 2.

Investment Rating 3 is used for investments performing below expectations and indicates the investment s risk has increased somewhat since origination. The portfolio company requires closer monitoring, but we expect a full return of principal and collection of all interest and/or dividends.

Investment Rating 4 is used for investments performing materially below our expectations and the risk has increased materially since origination. The portfolio company has the potential for some loss of investment return, but we expect no loss of principal.

Investment Rating 5 is used for investments performing substantially below our expectations and the risks have increased substantially since origination. We expect some loss of principal.

The following table shows the distribution of our investments on the 1 to 5 investment rating scale at fair value and cost as of December 31, 2016 and 2015.

		Fair V	alue			Co	st	
	Decembe 2016	,	Decembe 2015	, ´	Decembe 2016 housands)	,	December 2015	,
Investment Rating								
1	\$ 91,705	17.5%	\$ 77,875	17.6%	\$ 58,967	11.8%	\$ 63,339	14.1%
2	371,506	70.9	268,285	60.4	366,697	73.3	262,727	58.6
3	38,905	7.4	95,981	21.7	44,510	8.9	103,369	23.1
4	22,085	4.2	1,128	0.3	28,194	5.6	6,874	1.5
5	253				2,146	0.4	12,029	2.7
Total	\$ 524,454	100.0%	\$443,269	100.0%	\$ 500,514	100.0%	\$448,338	100.0%

Based on our investment rating system, the weighted average rating of our portfolio as of both December 31, 2016 and 2015 was 2.0 on a fair value basis.

Determination of Net Asset Value and Valuation Process

We determine the net asset value per share of our common stock on at least a quarterly basis, and more frequently if we are required to do so in connection with the issuance of shares of our common stock or pursuant to applicable federal laws and regulations. The net asset value per share of common stock is equal to the carrying value of our total assets minus liabilities and any preferred stock outstanding divided by the total number of shares of common stock outstanding. Our business plan calls for us to invest primarily in illiquid securities issued by private companies. These portfolio investments may be subject to restrictions on resale and will generally have no established trading market. Because there is not a readily available market for substantially all of the investments in our portfolio, we value substantially all of our portfolio investments at fair value as determined in

good faith by our board of directors using a documented valuation policy and consistently applied valuation process in accordance with authoritative accounting guidelines. See Management s Discussion and Analysis of Financial Condition and Results of Operations Critical Accounting Policies and Use of Estimates Valuation of Portfolio Investments.

Competition

Our primary competitors in providing financing to lower middle-market companies include public and private funds, other BDCs, SBICs, commercial and investment banks, commercial financing companies and, to the extent they provide an alternative form of financing, private equity and hedge funds. Many of our competitors are substantially larger and have considerably greater financial, technical and marketing resources than we do. For example, we believe some competitors may have access to funding sources that are not available to us. In addition, some of our competitors may have higher risk tolerances or different risk assessments, which could allow them to consider a wider variety of investments and establish more relationships than us. Furthermore, many of our competitors are not subject to the regulatory restrictions that the 1940 Act imposes on us as a BDC or to the distribution and other requirements we must satisfy to maintain our RIC status.

We use the expertise of the investment professionals of our investment advisor to assess investment risks and determine appropriate pricing for our investments in portfolio companies. In addition, the relationships of the investment professionals of our investment advisor enable us to learn about, and compete effectively for, financing opportunities with attractive lower middle-market companies in the industries in which we seek to invest. For additional information concerning the competitive risks we face, see Risk Factors Risks Relating to Our Business and Structure We operate in a highly competitive market for investment opportunities, which could reduce returns and result in losses.

Employees

We do not have any direct employees, and our day-to-day investment operations are managed by our investment advisor, which is also acting as our administrator. We have a chief executive officer, president, chief financial officer and chief compliance officer and, to the extent necessary, our board of directors may elect to hire additional personnel going forward. Our officers are employees of, and are compensated by, our investment advisor, and our allocable portion of the cost of our chief financial officer and chief compliance officer and their respective staffs are paid by us pursuant to the Administration Agreement. Some of our executive officers are also officers of our investment advisor. See Management and Other Agreements Administration Agreement.

Properties

We do not own any real estate or other physical properties materially important to our operation. Our headquarters are located at 1603 Orrington Avenue, Suite 1005, Evanston, Illinois 60201, and are provided by our investment advisor pursuant to the Administration Agreement. Our investment advisor also maintains additional office space at 227 West Trade Street Suite 1910 Charlotte, North Carolina 28202 and 1140 Avenue of the Americas, Suite 1500, New York, New York 10036. We believe that our office facilities are suitable and adequate to our business as we contemplate conducting it.

Legal Proceedings

We may, from time to time, be involved in litigation arising out of our operations in the normal course of business or otherwise. Furthermore, third parties may try to seek to impose liability on us in connection with the activities of our

portfolio companies. While the outcome of any current legal proceedings cannot at this time be predicted with certainty, we do not expect any current matters will materially affect our financial condition or results of operations; however, there can be no assurance whether any pending legal proceedings will have a material adverse effect on our financial condition or results of operations in any future reporting period.

PORTFOLIO COMPANIES

The following table sets forth certain audited information as of December 31, 2016, for the portfolio companies in which we had a debt or equity investment. Other than these investments, our only formal relationships with our portfolio companies are the managerial assistance ancillary to our investments and the board observer or participation rights we may receive.
