CBRE CLARION GLOBAL REAL ESTATE

INCOME FUND

Semi-Annual Report for the Six Months Ended June 30, 2018

Table of Contents

CBRE Clarion Global Real Estate Income Fund (the Trust), acting in accordance with an exemptive order received from the Securities and Exchange Commission (SEC) and with approval of its Board of Trustees (the Board), has adopted a managed distribution policy (the Policy) with the purpose of distributing over the course of each year, through periodic distributions as nearly equal as practicable and any required special distributions, an amount closely approximating the total taxable income of the Trust during such year and all of the returns of capital paid by portfolio companies to the Trust during such year. In accordance with its Policy, the Trust distributes a fixed amount per common share, currently \$0.05, each month to its common shareholders. This amount is subject to change from time to time in the discretion of the Board. Although the level of distributions is independent of fund performance, the Trust expects such distributions to correlate with its performance over time. Each monthly distribution to shareholders is expected to be at the fixed amount established by the Board, except for extraordinary distributions and potential increases or decreases in the final dividend periods for each year in light of the Trust s performance for the entire calendar year and to enable the Trust to comply with the distribution requirements imposed by the Internal Revenue Code. Over time, the Trust expects that the distribution rate in relation to the Trust s Net Asset Value (NAV) will approximately equal the Trust s total return on NAV.

The fixed amount of distributions will be reviewed and amended as necessary by the Board at regular intervals with consideration of the level of investment income and realized gains. The Board strives to establish a level regular distribution that will meet the Trust s requirement to pay out all taxable income (including amounts representing return of capital paid by portfolio companies) with a minimum of special distributions. The Trust s total return in relation to changes in NAV is presented in the financial highlights table. Shareholders should not draw any conclusions about the Trust s investment performance from the amount of the current distribution or from the terms of the Policy. The Board may amend or terminate the Policy without prior notice to Trust shareholders.

Shareholders should note that the Policy is subject to change or termination as a result of many factors. The Trust is subject to risks through ownership of its portfolio company holdings including, but not limited to, declines in the value of real estate held by the portfolio company, risks related to general and local economic conditions, and portfolio company losses. Moreover, an economic downturn could have a material adverse effect on the real estate markets and on real estate companies in which the Trust invests, which in turn could result in the Trust not achieving its investment or distribution objectives thereby jeopardizing the continuance of the Policy. Please refer to the Trust s prospectus for a fuller description of risks.

Investors should consider a fund's investment objectives, risks, charges and expenses carefully before investing. A copy of the prospectus that contains this and other information about the Fund may be obtained by calling 888-711-4272. Please read the prospectus carefully before investing. Investing in closed-end funds involves risk, including possible loss of principal. Past performance does not guarantee future results.

Real Estate investments are subject to changes in economic conditions, credit risk, and interest rate fluctuations. International investments may involve risk of capital loss from unfavorable fluctuation in currency values, from differences in generally accepted accounting principles or from economic or political instability in other nations. Because real estate funds concentrate their investments in the real estate industry, the portfolio may experience more volatility and be exposed to greater risk than the portfolios of other funds.

Closed-end funds are traded on the secondary market through one of the stock exchanges. The Fund's investment return and principal value will fluctuate so that an investor's shares may be worth more or less than the original cost. Shares of closed-end funds may trade above (a premium) or below (a discount) the net asset value (NAV) of the fund's portfolio. There is no assurance that the Fund will achieve its investment objective.

SEMI-ANNUAL REPORT 2018 1

Table of Contents

Letter to Shareholders

*T. Ritson Ferguson**Steven D. Burton*

Dear Shareholder:

We are pleased to present the 2018 Semi-Annual Report for the CBRE Clarion Global Real Estate Income Fund (the Trust).

Performance Review

Real estate stocks were modestly positive during the first half of 2018, outperforming bonds⁽¹⁾ and trailing equities⁽²⁾. Performance varied during the six months as a weak first quarter was offset by a rebounding second quarter. We believe that real estate stocks continue to discount or price in further increases in short-term interest rates by the Federal Reserve Bank, as well as elevated geopolitical concerns surrounding U.S. tariffs and trade policy. The U.S. Federal Reserve Bank raised policy rates for the seventh time this cycle in June; central banks elsewhere generally remain on hold in a global capital markets environment which is seeing higher short-term rates and flatter yield curves. Global macro-economic releases suggest continued gradual economic growth, improving employment and still moderate levels of inflation. The U.S. 10-year Treasury bond yielded 2.85% at June 30th versus 2.41% at the beginning of the year.

North American property companies modestly outperformed European and Asia-Pacific companies for the six months, but still trail non-U.S. companies over the trailing year. Within the U.S., sectors with earnings growth that is more sensitive to economic growth led performance, including the self-storage, lodging and industrial property types. The retail sectors of malls and shopping centers trailed, as did technology companies. European property companies were modestly negative despite improving economic conditions and real estate fundamentals. Asia-Pacific returns were positive in Japan, where property fundamentals are good, offset by negative performance elsewhere, including Singapore, which under-performed in the second quarter as the result of tightening measures in the residential market.

Global Real Estate Market Performance**Performance as of June 30, 2018**

Region	1Q18	2Q18	YTD
North America	-7.8%	9.4%	0.9%
Europe	-0.9%	-0.3%	-1.2%

Edgar Filing: CBRE CLARION GLOBAL REAL ESTATE INCOME FUND - Form N-CSRS

Asia-Pacific	-0.3%	0.4%	0.1%
Global Common Stock ⁽³⁾	-4.5%	5.1%	0.4%
U.S. Preferred ⁽⁴⁾	-3.8%	3.2%	-0.7%
80/20 Blend of Global Common Stock & U.S. Preferred Stock	-4.3%	4.7%	0.2%

(1) As measured by the Bloomberg Barclays Global Aggregate Index, which returned -1.46% in 1H18.

(2) As measured by the MSCI World Index, which returned 0.76% in 1H18.

(3) Represented by the FTSE EPRA/NAREIT Developed Index Net. The Index is an unmanaged market-weighted index consisting of real estate companies from developed markets, where greater than 75% of constituents EBITDA (earnings before interest, taxes, depreciation, and amortization) is derived from relevant real estate activities, and is calculated net of withholding taxes. **Investors cannot invest directly in an index.**

(4) Represented by the MSCI REIT Preferred Index, a preferred stock market capitalization weighted index of certain exchange traded preferred securities issued by U.S. equity and U.S. hybrid REITs. **Investors cannot invest directly in an index.**

2 CBRE CLARION GLOBAL REAL ESTATE INCOME FUND

Table of Contents

The Trust's net asset value (NAV) return was -1.8% during 1H2018, with positive contribution from positioning in Europe being offset by positioning elsewhere, including preferred stocks which were negative for the period as interest rates move higher. Exposure to the U.S. retail sector created a drag on performance both in the mall and shopping center property types despite elevated merger and acquisition (M&A) activity among Class A malls. Retail has historically been a stable defensive property sector given the long-term duration of leases and consistent consumer demand, but has been beset by negative headlines surrounding retailer store closings and increased penetration of on-line shopping. Positioning in the U.S. lodging and healthcare sectors also negatively impacted performance, offset somewhat by positive contributions from the self-storage and residential positions. In the Asia-Pacific region, the Trust benefited from investments in outperforming Japan, but this was offset by negative contributions elsewhere in the region. European positioning added to total return via investments in the industrial property type in the U.K.

The Trust made total distributions of \$0.30 per share during 1H2018, a level monthly distribution of \$0.05 per share. The current annualized distribution of \$0.60 per share represents an 8.0% distribution rate on the \$7.54 share price and a 7.0% distribution rate on the \$8.52 NAV as of June 30th.⁽⁵⁾ The Board will continue to review the level and sustainability of the Trust's distribution in light of market conditions.

The Trust continues to maintain a flexible and relatively low level of portfolio leverage. The Trust's leverage position was 15% as of June 30th.

Portfolio Review

The Trust's investments remain well-diversified by property type and geography. At June 30th, the Trust's portfolio was approximately 46% invested in common stock within the Americas region, 21% in Asia-Pacific, 15% in Europe, with 18% invested in preferred stock of U.S. real estate companies. During the six-month period, capital was rotated from Europe to both the Asia-Pacific region and the U.S., where valuations became very attractive following weakness in the first quarter. The Trust held a steady proportion of its investments in preferred stocks throughout the first half, as they provide stable, well-covered dividend income.

We are positive on property types and markets with above average growth and valuations that are attractive relative to this growth. In the U.S., we continue to favor self-storage, technology and class A mall companies and have become more positive on the residential sector. We also are positive on U.S. hotel c-corps, which offer operating platforms that benefit from improved consumer spending and economic growth. Within residential, we like manufactured housing, student housing, single family home-for-rent companies and the apartment REITs, which are benefitting from better demand than previously expected. We also favor the gaming companies within the net lease sector, although we remain cautious on traditional net lease companies, which tend to be more concentrated in the retail sector.

We favor real estate operating companies in Tokyo and Hong Kong, which are showing strong growth relative to real estate valuations, although we are monitoring elevated geopolitical risk surrounding trade friction between the U.S. and China. The Tokyo office market continues to experience improved rental growth, as vacancies remain below the 4% threshold at which landlords enjoy increasing pricing power, particularly with a modest increase in inflation expectations.

We favor the U.K. niche sectors of student housing and rental apartments plus the industrial sector. In Continental Europe, we prefer property companies in firming markets, including Spain and Scandinavia. European property fundamentals continue to improve consistent with economic releases which show steady and visible improvement in the eurozone.

We remain cautious on the more bond-like sectors that offer modest growth and trade less attractively relative to our estimates of underlying real estate market value. This includes the traditional net lease and healthcare sectors in the U.S., as well as the Canadian companies and Singapore REITs. Asian REITs generally rely on external growth, which is dependent on issuing new equity to fund acquisitions, although valuations are becoming more attractive.

(5) The Fund is currently paying distributions in excess of its net investment income, which may result in a return of capital. Absent this, the distribution rate would have been lower. The estimated composition of each distribution, including any return of capital, will be provided to shareholders of record and is also available at www.cbreclarion.com.

Table of Contents

Geographic Diversification

Sector Diversification

Source: CBRE Clarion Securities as of 06/30/2018.

Geographic and Sector diversification are unaudited. Percentages presented are based on managed trust assets, which include borrowings. The percentages in the pie charts will differ from those on the Portfolio of Investments because the figures on the Portfolio of Investments are calculated using net assets of the Trust.

Market Outlook

We believe that solid economic growth and modestly increasing inflation will benefit real estate stocks in the second half of 2018. The economic outlook is solid, and this should have a positive impact on commercial real estate and listed real estate companies. Economic growth has momentum in an economic expansion, which continues to have durability at this point of an extended cycle.

We expect that monetary policy will tighten in the U.S. but remain relatively more accommodative elsewhere. In our view, total return among property companies will be supported by forecasted earnings growth of 5% for 2018 and a 4% current dividend yield, with stable multiples. With real estate companies currently trading at an approximate 9% discount to the estimated value of the real estate they own, and an implied capitalization rate approaching 6% globally, we believe real estate stocks remain attractively priced relative to private real estate and competing asset classes.

We estimate real estate company earnings growth will again be in the 5% range in 2019. Earnings growth will be generated by a combination of internal growth which is derived from increasing rents and occupancy rates among the existing tenant base, and the ability to mark to market tenants with expiring leases, as well as external growth from accretive acquisition activity and the associated prudent recycling of capital. New supply is generally in check globally, and we believe the cost of capital will remain attractive despite upward pressure on short-term interest rates.

Regional Earnings Growth Forecast

Source: CBRE Clarion as of 06/30/2018.

f refers to forecasts. Forecasts are the opinion of CBRE Clarion, which is subject to change and is not intended to be a guarantee of future results or investment advice. Forecasts are not indicative of future investment performance.

Table of Contents

Real estate dividend yield remains attractive and will grow again in 2018. Current income generated by listed property's dividend yield remains a defining investment characteristic of the sector. Listed property companies dividend yield currently averages 4% globally. We project average dividend growth to exceed earnings growth in 2018, driven by a combination of improving company cash flows as well as an expansion of dividend payout policies which remain conservative. Increasing dividends are emblematic of healthy companies in improving markets.

Current Dividend Yield

Source: CBRE Clarion as of 06/30/2018. Not all countries included.

Dividend yields fluctuate and are not necessarily indicative of present or future investment performance.

Information is subject to change and should not be construed as investment advice. Past performance is no guarantee of future results.

Listed real estate remains attractively valued versus private market real estate, particularly in U.S. core property types. We estimate that real estate companies are trading at an approximate 9% discount to their net asset value (NAV), a level which exceeds the 10-year historical average. In the U.S., real estate value largely resides in the core real estate sectors of apartments, retail, office, industrial and lodging, as a number of the specialty sectors trade above NAV. U.K. property companies continue to trade at material discounts to our NAV estimates as uncertainty on Brexit persists. Looking out over the next six to twelve months, we expect the yield curve and longer-term rates to remain relatively low despite recent upward movement following increases in the policy rate by the U.S. Federal Reserve Bank. A significant amount of "dry powder" from investors in the private markets, including private equity, pension funds and sovereign wealth, continues to underpin demand for property.

NAV Premium/Discount by Region

Information is the opinion of CBRE Clarion as of 06/30/2018, is subject to change and is not intended to be a forecast of future events, or a guarantee of future results, or investment advice. Forecasts and any factors discussed are not indicative of future investment performance.

IMPORTANT DISCLOSURES AND RISK INFORMATION

The views expressed represent the opinion of CBRE Clarion Securities (CBRE Clarion), which are subject to change and are not intended as investment advice or a guarantee of future results. This material is for informational purposes only. It is not intended as an endorsement of any specific investment. Stated information is derived from proprietary and non-proprietary sources which have not been independently verified for accuracy or completeness. While CBRE Clarion believes the information to be accurate and reliable, we do not claim or accept responsibility for its completeness, accuracy, or reliability. Statements of future expectations, forecasts, estimates, projections, and other forward-looking statements are based on CBRE Clarion's view at the time such statements were made. Accordingly, such statements are inherently speculative, as they are based on assumptions which may involve known and unknown risks and uncertainties. Any discussion of particular securities herein should not be perceived as a recommendation to purchase or sell any of those securities. It should not be assumed that investments in any securities discussed were or will be profitable. Actual results, performance or events may differ materially from those expressed or implied in such statements. Investing in real estate securities involves risks including the potential loss of principal. Real estate equities are subject to risks similar to those associated with the direct ownership of real estate. Portfolios concentrated in real estate securities may experience price volatility and other risks associated with non-diversification. While equities may offer the potential for greater long-term growth than most debt securities, they generally have higher volatility. International (non-US) investments may involve risk of capital loss from unfavorable fluctuation in currency values, from differences in generally accepted accounting principles, or from economic or political instability in other nations. *Past performance is no guarantee of future results.*

Table of Contents

Notes to Financial Statements (unaudited)

1. Fund Organization

CBRE Clarion Global Real Estate Income Fund (the Trust) is a diversified, closed-end management investment company that was organized as a Delaware statutory trust on November 6, 2003 and registered with the Securities and Exchange Commission (SEC) under the Investment Company Act of 1940, as amended. The Trust is an investment company and accordingly follows the investment company accounting and reporting guidance of the Financial Accounting Standards Board (FASB) Accounting Standards Codification Topic 946 Financial Services-Investment Companies. CBRE Clarion Securities LLC (the Advisor) is the Trust's investment advisor. The Advisor is a majority-owned subsidiary of CBRE Group, Inc. and is partially owned by its senior management team. The Trust commenced operations on February 18, 2004.

2. Significant Accounting Policies

The following accounting policies are in accordance with U.S. generally accepted accounting principles (U.S. GAAP) and are consistently followed by the Trust.

Securities Valuation The net asset value of the common shares of the Trust will be computed based upon the value of the Trust's portfolio securities and other assets. The Trust calculates net asset value per common share by subtracting the Trust's liabilities (including accrued expenses, dividends payable and any borrowings of the Trust) and the liquidation value of any outstanding preferred shares from the Trust's total assets (the value of the securities the Trust holds, plus cash and/or other assets, including dividends accrued but not yet received) and dividing the result by the total number of common shares of the Trust outstanding. Net asset value per common share will be determined as of the close of the regular trading session (usually 4:00 p.m., EST) on the New York Stock Exchange (NYSE) on each business day on which the NYSE is open for trading.

For purposes of determining the net asset value of the Trust, readily marketable portfolio assets (including common stock, preferred stock, and options) traded principally on an exchange, or on a similar regulated market reporting contemporaneous transaction prices, are valued, except as indicated below, at the last sale price for such assets on such principal markets on the business day on which such value is being determined. If there has been no sale on such day, the securities are valued at the mean of the closing bid and asked prices on such day. Foreign securities are valued based upon quotations from the primary market in which they are traded and are translated from the local currency into U.S. dollars using current exchange rates. Forward foreign currency contracts are valued at the unrealized appreciation/depreciation as of valuation date, calculated using an interpolated foreign exchange rate. Securities and other assets for which market quotations are not readily available or for which the above valuation procedures are deemed not to reflect fair value are valued in a manner that is intended to reflect their fair value as determined in accordance with procedures approved by the Trust's Board of Trustees (the Board).

Short-term securities which mature in more than 60 days are valued at current market quotations. Short-term securities, which mature in 60 days or less, are valued at amortized cost, which approximates market value.

U.S. GAAP provides guidance on fair value measurements. In accordance with the standard, fair value is defined as the price that the Trust would receive to sell an investment or pay to transfer a liability in a timely transaction with an independent buyer in the principal market, or in the absence of a principal market the most advantageous market for the investment or liability. It establishes a single definition of fair value, creates a three-tier hierarchy as a framework

for measuring fair value based on inputs used to value the Trust's investments, and requires additional disclosure about fair value. The hierarchy of inputs is summarized below:

Level 1 unadjusted quoted prices in active markets for identical investments

Level 2 Other significant observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk, etc.)

Level 3 significant unobservable inputs (including the Trust's own assumptions in determining the fair value of investments)

For Level 1 inputs, the Trust uses unadjusted quoted prices in active markets for assets or liabilities with sufficient frequency and volume to provide pricing information as the most reliable evidence of fair value.

The Trust's Level 2 valuation techniques include inputs other than quoted prices within Level 1 that are observable for an asset or liability, either directly or indirectly. Level 2 observable inputs may include quoted prices for similar assets and liabilities in active

Table of Contents

Notes to Financial Statements continued

markets or quoted prices for identical or similar assets or liabilities in markets that are not active in which there are few transactions, the prices are not current, or price quotations vary substantially over time or among market participants. Inputs that are observable for the asset or liability in Level 2 include such factors as interest rates, yield curves, prepayment speeds, credit risk, and default rates for similar liabilities.

For Level 3 valuation techniques, the Trust uses unobservable inputs that reflect assumptions market participants would be expected to use in pricing the asset or liability. Unobservable inputs are used to measure fair value to the extent that observable inputs are not available and are developed based on the best information available under the circumstances. In developing unobservable inputs, market participant assumptions are used if they are reasonably available without undue cost and effort.

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The following is a summary of the inputs used as of June 30, 2018 in valuing the Trust's investments carried at fair value:

Assets	Level 1	Level 2	Level 3	Total
Investments in Real Estate Securities				
Common Stock				
Australia	\$ 45,256,293	\$	\$	\$ 45,256,293
Belgium	8,001,912			8,001,912
Canada	15,842,784			15,842,784
France	29,462,218			29,462,218
Germany	26,090,962			26,090,962
Hong Kong	78,450,371			78,450,371
Ireland	11,480,937			11,480,937

Mexico	11,197,588			11,197,588
Singapore	21,882,681			21,882,681
Spain	17,985,713			17,985,713
Sweden	27,402,588			27,402,588
United Kingdom	54,492,098			54,492,098
United States	512,908,099			512,908,099
Total Common Stock	952,254,135			952,254,135
Preferred Stock				
United States	182,885,177	29,771,974		212,657,151
Total Investments in Real Estate Securities	\$ 1,135,139,312	\$ 29,771,974	\$	\$ 1,164,911,286
Liabilities				
Other Financial Instruments				
Written Call Options	\$ (474,850)	\$ (469,400)	\$	\$ (944,250)
Total Liabilities	\$ (474,850)	\$ (469,400)	\$	\$ (944,250)

The primary third party pricing vendor for the Trust's listed preferred stock investments is FT Interactive Data (IDC). When available, the Trust will obtain a closing exchange price to value the preferred stock investments and, in such instances, the investment will be classified as Level 1 since an unadjusted quoted price was utilized. When a closing price is not available for the listed preferred stock investments, IDC will produce an evaluated mean price (midpoint between the bid and the ask evaluation) and such investments will be classified as Level 2 since other observable inputs were used in the valuation. Factors used in the IDC evaluation include trading activity, the presence of a two-sided market, and other relevant market data.

The Trust's policy is to recognize transfers in and transfers out at the fair value as of the beginning of the period. The portfolio may hold securities which are periodically fair valued in accordance with the Trust's fair value procedures. This may result in movements

Table of Contents

Notes to Financial Statements continued

between Levels 1, 2, and 3 throughout the year. \$30,269,267 was transferred out of Level 1 into Level 2 during the period ended June 30, 2018 due to the unavailability of significant observable pricing inputs. \$13,321,392 was transferred out of Level 2 into Level 1 during the period ended June 30, 2018 due to the availability of significant observable pricing inputs. Pursuant to the Trust's fair value procedures noted previously, equity securities (including exchange traded securities and open-end regulated investment companies) and exchange traded derivatives (i.e. futures contracts and options) are generally categorized as Level 1 securities in the fair value hierarchy. Fixed income securities, non-exchange traded derivatives and money market instruments are generally categorized as Level 2 securities in the fair value hierarchy. Investments for which there are no such quotations, or for which quotations do not appear reliable, are valued at fair value as determined in accordance with procedures established by and under the general supervision of the Trustees. These valuations are typically categorized as Level 2 or Level 3 securities in the fair value hierarchy.

For the period ended June 30, 2018, there have been no significant changes to the Trust's fair valuation methodology.

Foreign Currency Translation The books and records of the Trust are maintained in U.S. dollars. Foreign currency amounts are translated into U.S. dollars on the following basis:

- (i) market value of investment securities, other assets and liabilities at the current rates of exchange;
- (ii) purchases and sales of investment securities, income and expenses at the rate of exchange prevailing on the respective dates of such transactions.

Although the net assets of the Trust are presented at the foreign exchange rates and market values at the close of each fiscal year, the Trust does not isolate that portion of the results of operations arising as a result of changes in the foreign exchange rates from the fluctuations arising from changes in the market prices of long-term securities held at the end of the fiscal year. Similarly, the Trust does not isolate the effect of changes in foreign exchange rates from the fluctuations arising from changes in the market prices of portfolio securities sold during the fiscal year. Accordingly, realized foreign currency gains or losses will be included in the reported net realized gains or losses on investment transactions.

Net realized gains or losses on foreign currency transactions represent net foreign exchange gains or losses from the holding of foreign currencies, currency gains or losses realized between the trade date and settlement date on securities transactions, and the difference between the amounts of dividends, interest and foreign withholding taxes recorded on the Trust's books and the U.S. dollar equivalent amounts actually received or paid. Net unrealized currency gains or losses from valuing foreign currency denominated assets or liabilities (other than investments) at year end exchange rates are reflected as a component of net unrealized appreciation or depreciation on investments and foreign currencies.

Foreign security and currency transactions may involve certain considerations and risks not typically associated with those of domestic origin as a result of, among other factors, the possibility of political or economic instability, or the level of governmental supervision and regulation of foreign securities markets.

Forward Foreign Currency Contracts The Trust enters into forward foreign currency contracts in order to hedge its exposure to changes in foreign currency exchange rates on its foreign portfolio holdings, to hedge certain Trust

purchase and sales commitments denominated in foreign currencies and for investment purposes. A forward foreign currency contract is a commitment to purchase or sell a foreign currency on a future date at a negotiated forward rate. The gain or loss arising from the difference between the original contracts and the closing of such contracts would be included in net realized gain or loss on foreign currency transactions.

Fluctuations in the value of open forward foreign currency contracts are recorded for financial reporting purposes as unrealized appreciation and depreciation by the Trust.

The Trust's custodian will place and maintain cash not available for investment or other liquid assets in a separate account of the Trust having a value at least equal to the aggregate amount of the Trust's commitments under forward foreign currency contracts entered into with respect to position hedges.

Risks may arise from the potential inability of a counterparty to meet the terms of a contract and from unanticipated movements in the value of a foreign currency relative to the U.S. dollar. The face or contract amount, in U.S. dollars, reflects the total exposure the Trust has in that particular currency contract. As of June 30, 2018, the Trust did not hold any forward foreign currency contracts.

16 CBRE CLARION GLOBAL REAL ESTATE INCOME FUND

Table of Contents

Notes to Financial Statements continued

Options The Trust may purchase or sell (write) options on securities and securities indices which are listed on a national securities exchange or in the over-the-counter (OTC) market as a means of achieving additional return or of hedging the value of the Trust's portfolio.

An option on a security is a contract that gives the holder of the option, in return for a premium, the right to buy from (in the case of a call) or sell to (in the case of a put) the writer of the option the security underlying the option at a specified exercise or strike price. The writer of an option on a security has an obligation upon exercise of the option to deliver the underlying security upon payment of the exercise price (in the case of a call) or to pay the exercise price upon delivery of the underlying security (in the case of a put).

There are several risks associated with transactions in options on securities. As the writer of a covered call option, the Trust forgoes, during the option's life, the opportunity to profit from increases in the market value of the security covering the call option above the sum of the premium and the strike price of the call but has retained the risk of loss should the price of the underlying security decline. The writer of an option has no control over the time when it may be required to fulfill its obligation as writer of the option. Once an option writer has received an exercise notice, it cannot effect a closing purchase transaction in order to terminate its obligation under the option and must deliver the underlying security at the exercise price. Written Options for the period ended June 30, 2018 are disclosed in the Trust's Portfolio of Investments.

Securities Transactions and Investment Income Securities transactions are recorded on a trade date basis. Realized gains and losses from securities transactions are recorded on the basis of identified cost. Dividend income is recorded on the ex-dividend date. Distributions received from investments in REITs are recorded as dividend income on ex-dividend date, subject to reclassification upon notice of the character of such distributions by the issuer. The portion of dividend attributable to the return of capital is recorded against the cost basis of the security. Withholding taxes on foreign dividends are recorded net of reclaimable amounts, at the time the related income is earned. Non-cash dividends included in dividend income, if any, are recorded at the fair market value of the securities received. Interest income, including accretion of original issue discount, where applicable, and accretion of discount on short-term investments, is recorded on the accrual basis.

Dividends and Distributions to Shareholders Dividends from net investment income, if any, are declared and paid on a monthly basis. Income dividends and capital gain distributions to common shareholders are recorded on the ex-dividend date. To the extent the Trust's net realized capital gains, if any, can be offset by capital loss carryforwards, it is the policy of the Trust not to distribute such gains.

On August 5, 2008, the Trust acting in accordance with an exemptive order received from the SEC and with approval of the Board, adopted a managed distribution policy under which the Trust intends to make regular monthly cash distributions to common shareholders, stated in terms of a fixed amount per common share. This managed distribution policy permits the trust to include long-term capital gains in its distribution as frequently as twelve times a year. In practice, the Board views this policy as a potential means of further supporting the market price of the Trust's shares through the payment of a steady and predictable level of cash distributions to shareholders.

The current monthly distribution rate is \$0.05 per share. The Trust continues to evaluate its monthly distribution policy in light of ongoing economic and market conditions and may change the amount of the monthly distributions in the future.

Use of Estimates The preparation of financial statements, in conformity with U.S. GAAP, requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of expenses during the reporting year. Actual results could differ from those estimates.

3. Derivative Instruments

The following table presents the fair value of derivatives held at June 30, 2018 and the location on the Statement of Assets and Liabilities:

Derivatives not accounted for as hedging

instruments	Location on Statement of Assets and Liabilities	Fair Value
Liability derivatives		
<u>Equity Risk</u>		
Written options	Written options	\$ (944,250)

The effect of derivative instruments on the Trust's Statement of Operations for the period ended June 30, 2018 was as follows:

Derivatives not accounted for as hedging

instruments	Realized gain (loss)	Change in unrealized appreciation (depreciation)
<u>Equity Risk</u>		
Written options	\$ 554,407	\$ (218,390)

For the period ended June 30, 2018, the average month-end notional value of written options was \$24,852,258.

4. Concentration of Risk

Under normal market conditions, the Trust's investments will be concentrated in income-producing common equity securities, preferred securities, convertible securities and non-convertible debt securities issued by companies deriving the majority of their revenue from the ownership, construction, financing, management and/or sale of commercial, industrial, and/or residential real estate. Values of the securities of such companies may fluctuate due to economic, legal, cultural, geopolitical or technological developments affecting various global real estate industries.

5. Investment Management Agreement and Other Agreements

Pursuant to an investment management agreement between the Advisor and the Trust, the Advisor is responsible for the daily management of the Trust's portfolio of investments, which includes buying and selling securities for the Trust, as well as investment research. The Trust pays for investment advisory services and facilities through a fee payable monthly in arrears at an annual rate equal to 0.85% of the average daily value of the Trust's managed assets

plus certain direct and allocated expenses of the Advisor incurred on the Trust's behalf. The Advisor agreed to waive a portion of its management fee in the amount of 0.25% of the average daily values of the Trust's managed assets for the first five years of the Trust's operations (through February 2009), and for a declining amount for an additional four years (through February 2013). During the period ended June 30, 2018, the Trust incurred management fees of \$4,908,578, of which \$809,613 is payable as of the end of the period. There were no fees waived during the period ended June 30, 2018.

The Trust has multiple service agreements with the Bank of New York Mellon (BNYM). Under the servicing agreements, BNYM will perform custodial, fund accounting, and certain administrative services for the Trust. As custodian, BNYM is responsible for the custody of the Trust's assets. As administrator, BNYM is responsible for maintaining the books and records of the Trust's securities and cash.

Computershare is the Trust's transfer agent and as such is responsible for performing transfer agency services for the Trust.

6. Portfolio Securities

For the period ended June 30, 2018, there were purchases and sales transactions (excluding short-term securities) of \$490,965,139 and \$508,999,551, respectively. These purchases and sales transaction amounts differ from the amounts disclosed on the Statement of Cash Flows primarily due to the re-characterization of dividends from ordinary income to return of capital and capital gain.

7. Federal Income Taxes

The Trust intends to elect to be, and qualify for treatment as, a regulated investment company under Subchapter M of the Internal Revenue Code of 1986, as amended (the Code). A regulated investment company generally pays no federal income tax on the income and gains that it distributes. The Trust intends to meet the calendar year distribution requirements imposed by the Code to avoid the imposition of a 4% excise tax.

The Trust is required to evaluate tax positions taken or expected to be taken in the course of preparing the Trust's tax returns to determine whether the tax positions are more-likely-than-not of being sustained by the applicable tax authority. Income tax and related interest and penalties would be recognized by the Trust as tax expense in the Statement of Operations if the tax positions were deemed to not meet the more-likely-than-not threshold. For the period ended June 30, 2018, the Trust did not incur any income tax, interest, or penalties. As of June 30, 2018, the Advisor has reviewed all open tax years and concluded that there was no impact to the Trust's net assets or results of operations. Tax years ended December 31, 2014, through December 31, 2017, remain subject to examination by the Internal Revenue Service and state taxing authorities. On an ongoing basis, the Advisor will monitor its tax positions to determine if adjustments to this conclusion are necessary.

The Trust distinguishes between dividends on a tax basis and on a financial reporting basis and only distributions in excess of tax basis earnings and profits are reported in the financial statements as a tax return of capital. Differences in the recognition or classification of income between the financial statements and tax earnings and profits which result in temporary over-distributions for financial statement purposes are classified as distributions in excess of net investment income or accumulated net realized losses in the components of net assets on the Statement of Assets and Liabilities.

In order to present paid-in capital in excess of par and accumulated net realized gains or losses on the Statement of Assets and Liabilities that more closely represent their tax character, certain adjustments have been made to additional paid-in capital, undistributed net investment income and accumulated net realized gains or losses on investments. For the year ended December 31, 2017, the adjustments were to decrease additional paid-in capital by \$115,818,334, decrease accumulated net realized loss on investments by \$64,107,359, and decrease distributions in excess of net investment income by \$51,710,975 due to the difference in the treatment for book and tax purposes of passive foreign investment company (PFIC) investments and recognition of foreign currency gain (loss) as ordinary income (loss), distribution reclasses and expiring capital losses. Results of operations and net assets were not affected by these reclassifications.

At December 31, 2017, the Trust had capital loss carryforwards which will reduce the Trust's taxable income arising from future net realized gain on investments, if any, to the extent permitted by the code and thus will reduce the amount of distributions to shareholders which would otherwise be necessary to relieve the Trust of any liability for federal income tax. Pursuant to the code, such capital loss carryforwards of \$26,711,743, if unused, will expire, in 2018.

The Regulated Investment Company Modernization Act of 2010 (the Act) eliminated the eight-year carryover period for capital losses that arise in taxable years beginning after its enactment date of December 22, 2010. Consequently, these capital losses can be carried forward for an unlimited period. However, capital losses with an expiration period

may not be used to offset capital gains until all net capital losses without an expiration date have been utilized. Additionally, post-enactment capital loss carryovers will retain their character as either short-term or long-term capital losses instead of as short-term capital losses as under prior law. The Trust has no capital losses with no expiration.

The final determination of the source of the 2018 distributions for tax purposes will be made after the end of the Trust's fiscal year and will be reported to shareholders in February 2019 on the Form 1099-DIV.

For the year ended December 31, 2017, the tax character of distributions paid, as reflected in the Statements of Changes in Net Assets, was \$69,954,296 of ordinary income and \$0 of return of capital, respectively. For the year ended December 31, 2016, the tax character of distributions paid, as reflected in the Statements of Changes in Net Assets, was \$40,029,285 of ordinary income and \$29,925,011 of return of capital, respectively.

Cost of Investments for Tax Purposes	Gross Tax Unrealized Appreciation	Gross Tax Unrealized Depreciation	Net Tax Unrealized Appreciation on Investments	Net Tax Unrealized Depreciation on Foreign Currency, Qualified Late Year Options	Qualified Late Year Ordinary Losses	Undistributed Long-Term Capital Gains/ (Accumulated Capital Loss)
\$1,219,841,397	\$31,995,498	\$(31,569,700)	\$425,798	\$(61,073)	\$(0)	\$(50,022,321)

8. Borrowings

The Trust has access to a secured line of credit up to \$300,000,000 from BNYM for borrowing purposes. Borrowings under this arrangement bear interest at the Federal funds rate plus 75 basis points. At June 30, 2018, there were borrowings in the amount of \$175,556,200 on the Trust's line of credit.

The average daily amount of borrowings during the period ended June 30, 2018 was \$171,631,792 with an average interest rate of 2.34%. The maximum amount outstanding for the period ended June 30, 2018, was \$190,767,900. The Trust had borrowings under the line of credit for all 181 days during the period.

9. Capital

During 2004, the Trust issued 101,000,000 shares of common stock at \$15.00. In connection with the Trust's Dividend Reinvestment Plan (DRIP), the Trust issued no common shares for the period ended June 30, 2018 and the year ended 2017, respectively. At June 30, 2018, the Trust had outstanding common shares of 116,590,494 with a par value of \$0.001 per share. The Advisor owned none of the common shares outstanding as of June 30, 2018.

At June 30, 2018, the Trust had no shares of auction rate preferred securities outstanding.

10. Indemnifications

The Trust enters into contracts that contain a variety of indemnifications. The Trust's exposure under these arrangements is unknown. However, the Trust has not had prior claims or losses or current claims or losses pursuant to these contracts.

11. Subsequent Events

Events or transactions that occur after the balance sheet date but before the financial statements are issued are categorized as recognized or non-recognized for financial statement purposes. Since June 30, 2018, the Trust paid a dividend on July 31, 2018 of \$0.05 per share for the month of July 2018. No other notable events have occurred
