FORM N-CSR

CERTIFIED SHAREHOLDER REPORT OF REGISTERED MANAGEMENT
INVESTMENT COMPANIES

Investment Company Act file number: 811-22050

Exact name of registrant as specified in charter:
Delaware Enhanced Global Dividend and Income Fund

Address of principal executive offices:
2005 Market Street
Philadelphia, PA 19103

Name and address of agent for service:
David F. Connor, Esq.
2005 Market Street
Philadelphia, PA 19103

Registrant's telephone number, including area code: (800) 523-1918

Date of fiscal year end: November 30

Date of reporting period: May 31, 2010

Item 1. Reports to Stockholders

Semiannual Report

Delaware
Enhanced Global
Dividend and Income
Fund

May 31, 2010

The figures in the semiannual report for Delaware Enhanced Global Dividend and Income Fund represent past results, which are not a guarantee of future results. A rise or fall in interest rates can have a significant impact on bond prices. Funds that invest in bonds can lose their value as interest rates rise.

Closed-end fund

The percentage of net assets exceeds 100% because the Fund utilizes a line of credit with The Bank of New York Mellon, as described in note 7 in "Note to financial statements." The Fund utilizes leveraging techniques in an attempt to obtain a higher return for the Fund. There is no assurance that the Fund will achieve its investment objectives through the use of such techniques.

 USD — United States Dollar
 ZAR — South African Rand

^vSecurities have been classified by type of business. Classification by country of origin has been presented in Security type and country allocations on page 2.

^{*}Fully or partially on loan.

[±]Security is being valued based on international fair value pricing. At May 31, 2010, the aggregate amount of international fair value priced securities was \$30,540,899, which represented 20.37% of the Fund's net assets. See Note 1 in "Notes to financial statements."

[†]Non income producing security.

[@]Illiquid security. At May 31, 2010, the aggregate amount of illiquid securities was \$3,511,285, which represented 2.34% of the Fund's net assets. See Note 10 in "Notes to financial statements."

[.]Variable rate security. The rate shown is the rate as of May 31, 2010.

[#]Security exempt from registration under Rule 144A of the Securities Act of 1933, as amended. At May 31, 2010, the aggregate amount of Rule 144A securities was \$27,322,347, which represented 18.22% of the Fund's net assets. See Note 10 in "Notes to financial statements."

^wPass Through Agreement. Security represents the contractual right to receive a proportionate amount of underlying payments due to the counterparty pursuant to various agreements related to the rescheduling of obligations and the exchange of certain notes.

Step coupon bond. Coupon decreases periodically based on a predetermined schedule. Stated rate in effect at May 31, 2010.

^WStep coupon bond. Indicates security that has a zero coupon that remains in effect until a predetermined date at which time the stated interest rate becomes effective.

[‡]Non income producing security. Security is currently in default.

^{Restricted} Security. These investments are in securities not registered under the Securities Act of 1933, as amended, and have certain restrictions on resale which may limit their liquidity. At May 31, 2010, the aggregate amount of the restricted securities was \$60,350 or 0.04% of the Fund's net assets. See Note 10 in "Notes to financial statements."

[«]Senior Secured Loans generally pay interest at rates which are periodically redetermined by reference to a base lending rate plus a premium. These base lending rates are generally: (i) the prime rate offered by one or more United States banks, (ii) the lending rate offered by one or more European banks such as the London Inter-Bank Offered Rate (LIBOR), and (iii) the certificate of deposit rate. Senior Secured Loans may be subject to restrictions on resale. Stated rate in effect at May 31, 2010.

⁼Security is being fair valued in accordance with the Fund's fair valuation policy. At May 31, 2010, the aggregate amount of fair valued securities was \$0, which represented 0.00% of the Fund's net assets. See Note 1 in "Notes to financial statements."

[']The rate shown is the effective yield at the time of purchase.

^{**}See Note 9 in "Notes to financial statements."

[©]Includes \$15,221,424 of securities loaned.

Leverage Analysis:				
Debt outstanding at end of period at par (000 omitted)	\$40,000	\$40,000	\$40,000	—
Asset coverage per \$1,000 of debt outstanding at end of period	\$4,749	\$4,901	\$3,835	—

1 Ratios and portfolio turnover have been annualized and total return has not been annualized.

2 Date of commencement of operations, ratios and portfolio turnover have been annualized and total return has not been annualized.

3 The average shares outstanding method has been applied for per share information.

4 Total investment return is calculated assuming a purchase of common stock on the opening of the first day and a sale on the closing of the last day of each period reported. Dividends and distributions, if any, are assumed for the purpose of this calculation, to be reinvested at prices obtained under the Fund's dividend reinvestment plan. Generally, total investment return based on net asset value will be higher than total investment return based on market value in periods where there is an increase in the discount or decrease in the premium of the market value to the net asset value from the beginning to the end of such periods. Conversely,

Edgar Filing: Delaware Enhanced Global Dividend & Income Fund - Form N-CSR

total investment return based on net asset value will be lower than total investment return based on market value in periods where there is a decrease in the discount or an increase in the premium of the market value to the net asset value from the beginning to the end of such periods.
5 Adjusted average net assets excludes debt outstanding.

Notes to financial statements

Delaware Enhanced Global Dividend and Income Fund
May 31, 2010 (Unaudited)

Delaware Enhanced Global Dividend and Income Fund (Fund) is organized as a Delaware statutory trust and is a diversified closed-end management investment company under the Investment Company Act of 1940, as amended. The Fund's shares trade on the New York Stock Exchange (NYSE) under the symbol DEX.

The investment objective of the Fund is to seek current income, with a secondary objective of capital appreciation.

1. Significant Accounting Policies

The following accounting policies are in accordance with U.S. generally accepted accounting principles (U.S. GAAP) and are consistently followed by the Fund.

Security Valuation – Equity securities, except those traded on the Nasdaq Stock Market, Inc. (Nasdaq), are valued at the last quoted sales price as of the time of the regular close of the NYSE on the valuation date. Securities traded on the Nasdaq are valued in accordance with the Nasdaq Official Closing Price, which may not be the last sales price. If on a particular day an equity security does not trade, then the mean between the bid and ask prices will be used. Securities listed on a foreign exchange are valued at the last quoted sales price on the valuation date. Short-term debt securities are valued at market value. U.S. government and agency securities are valued at the mean between the bid and ask prices. Other debt securities, credit default swap (CDS) contracts and interest rate swap contracts are valued by an independent pricing service or broker. To the extent current market prices are not available, the pricing service may take into account developments related to the specific security, as well as transactions in comparable securities. Investment companies are valued at net asset value per share. Foreign currency exchange contracts are valued at the mean between the bid and ask prices. Interpolated values are derived when the settlement date of the contract is an interim date for which quotations are not available. Futures contracts and options on futures contracts are valued at the daily quoted settlement prices. Exchange-traded options are valued at the last reported sale price or, if no sales are reported, at the mean between the last reported bid and ask prices. Generally, index swap contracts and other securities and assets for which market quotations are not readily available are valued at fair value as determined in good faith under the direction of the Fund's Board of Trustees (Board). In determining whether market quotations are readily available or fair valuation will be used, various factors will be taken into consideration, such as market closures or suspension of trading in a security. The Fund may use fair value pricing more frequently for securities traded primarily in non-U.S. markets because, among other things, most foreign markets close well before the Fund values its securities at 4:00 p.m. Eastern time. The earlier close of these foreign markets gives rise to the possibility that significant events, including broad market moves, government actions or pronouncements, aftermarket trading, or news events may have occurred in the interim. To account for this, the Fund may frequently value foreign securities using fair value prices based on third-party vendor modeling tools (international fair value pricing).

Federal Income Taxes – No provision for federal income taxes has been made as the Fund intends to continue to qualify for federal income tax purposes as a regulated investment company under Subchapter M of the Internal Revenue Code of 1986, as amended, and make the requisite distributions to shareholders. The Fund evaluates tax positions taken or expected to be taken in the course of preparing the Fund's tax return to determine whether the tax positions are "more-likely-than-not" of being sustained by the applicable tax authority. Tax positions not deemed to meet the more-likely-than-not threshold are recorded as a tax benefit or expense in the current year. Management has analyzed the Fund's tax positions taken on federal income tax returns for all open tax years (November 30, 2007 – November 30, 2009), and has concluded that no position for federal income tax is required in the Fund's financial statements.

Distributions – The Fund has implemented a managed distribution policy. Under the policy, the Fund is managed with a goal of generating as much of the distribution as possible from net investment income and short-term capital gains. The balance of the distribution will then come from long-term capital gains to the extent permitted, and if necessary, a return of capital. Even though the Fund may realize current year capital gains, such gains may be offset, in whole or in part, by the Fund's capital loss carryovers from prior years. For federal income tax purposes, the effect of such capital loss carryovers may be to convert (to the extent of such current year gains) what would otherwise be returns of capital into distributions taxable as ordinary income. This tax effect can occur during times of extended market volatility. The actual determination of the source of the Fund's distributions can be made only at year-end. Shareholders should receive written notification regarding the actual components and tax treatments of all Fund distributions for the calendar year 2010 in early 2011.

Repurchase Agreements – The Fund may invest in a pooled cash account along with other members of the Delaware Investments® Family of Funds pursuant to an exemptive order issued by the Securities and Exchange Commission. The aggregate daily balance of the pooled cash account is invested in repurchase agreements secured by obligations of the U.S. government. The respective collateral is held by the Fund's custodian bank until the maturity of the respective repurchase agreements. Each repurchase agreement is at least 102% collateralized. However, in the event of default or bankruptcy by the counterparty to the agreement, realization of the collateral may be subject to legal proceedings. At May 31, 2010, the Fund held no investments in repurchase agreements.

Foreign Currency Transactions – Transactions denominated in foreign currencies are recorded at the prevailing exchange rates on the valuation date. The value of all assets and liabilities denominated in foreign currencies is translated into U.S. dollars at the exchange rate of such currencies against the U.S. dollar daily. Transaction gains or losses resulting from changes in exchange rates during the reporting period or upon settlement of the foreign currency transaction are reported in operations for the current period. The Fund isolates that portion of realized gains and losses on investments in debt securities, which is due to changes in the foreign exchange rates from that which are due to changes in market prices of debt securities. For foreign equity securities, these changes are included in realized gains (losses) on investments. The Fund reports certain foreign currency related transactions as components of realized gains (losses) for financial reporting purposes, whereas such components are treated as ordinary income (loss) for federal income tax purposes.

Edgar Filing: Delaware Enhanced Global Dividend & Income Fund - Form N-CSR

Use of Estimates –The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Other –Expenses directly attributable to the Fund are charged directly to the Fund. Other expenses common to various funds within the Delaware Investments® Family of Funds are generally allocated amongst such funds on the basis of average net assets. Management fees and some other expenses are paid monthly. Security transactions are recorded on the date the securities are purchased or sold (trade date) for financial reporting purposes. Costs used in calculating realized gains and losses on the sale of investment securities are those of the specific securities sold. Dividend income is recorded on the ex-dividend date and interest income is

(continues) 23

Notes to financial statements

Delaware Enhanced Global Dividend and Income Fund

1. Significant Accounting Policies (continued)

recorded on the accrual basis. Discounts and premiums on non-convertible bonds are amortized to interest income over the lives of the respective securities. Realized gains (losses) on paydowns of asset- and mortgage-backed securities are classified as interest income. Distributions received from investments in Real Estate Investment Trusts (REITs) are recorded as dividend income on the ex-dividend date, subject to reclassification upon notice of the character of such distributions by the issuer. Foreign dividends are also recorded on the ex-dividend date or as soon after the ex-dividend date that the Fund is aware of such dividends, net of all non-rebatable tax withholdings. Withholding taxes on foreign dividends and interest have been provided for in accordance with the Fund's understanding of the applicable country's tax rules and rates.

The Fund may receive earnings credits from its custodian when positive cash balances are maintained, which are used to offset custody fees. There were no earnings credits for the period ended May 31, 2010.

2. Investment Management, Administration Agreements and Other Transactions with Affiliates

In accordance with the terms of its Investment Management Agreement, the Fund pays Delaware Management Company (DMC), a series of Delaware Management Business Trust and the investment manager, an annual fee of 1.00% (calculated daily) of the adjusted average weekly net assets of the Fund. For purposes of the calculation of investment management fees, adjusted average weekly net assets excludes the line of credit liability.

Delaware Service Company, Inc. (DSC), an affiliate of DMC, provides fund accounting and financial administration oversight services to the Fund. For these services, the Fund pays DSC fees based on the aggregate daily net assets of the Delaware Investments® Family of Funds at the following annual rate: 0.0050% of the first \$30 billion; 0.0045% of the next \$10 billion; 0.0040% of the next \$10 billion; and 0.0025% of aggregate average daily net assets in excess of \$50 billion. The fees payable to DSC under the service agreement described above are allocated among all Funds in the Delaware Investments Family of Funds on a relative net asset value basis. For the six months ended May 31, 2010, the Fund was charged \$4,933 for these services.

At May 31, 2010, the Fund had liabilities payable to affiliates as follows:

Investment management fee payable to DMC	\$ 164,819
Fees and other expenses payable to DSC	824
Other expenses payable to DMC and affiliates*	8,825

*DMC, as part of its administrative services, pays operating expenses on behalf of the Fund and is reimbursed on a periodic basis. Such expenses include items such as printing of shareholder reports, fees for audit, legal and tax services, stock exchange fees, custodian fees and Trustees' fees.

As provided in the investment management agreement, the Fund bears the cost of certain legal and tax services, including internal legal and tax services provided to the Fund by DMC and/or its affiliates' employees. For the six months ended May 31, 2010, the Fund was charged \$2,268 for internal legal and tax services provided by DMC and/or its affiliates' employees.

Trustees' fees include expenses accrued by the Fund for each Trustee's retainer and meeting fees. Certain officers of DMC and DSC are officers and/or Trustees of the Trust. These officers and Trustees are paid no compensation by the Fund.

3. Investments

For the six months ended May 31, 2010, the Fund made purchases of \$74,353,832 and sales of \$79,973,930 of investment securities other than U.S. government securities and short-term investments. For the six months ended May 31, 2010, the Fund made purchases of \$1,751,380 and sales of \$5,114,701 of long-term U.S. government securities.

At May 31, 2010, the cost of investments for federal income tax purposes has been estimated since final tax characteristics cannot be determined until fiscal year end. At May 31, 2010, the cost of investments was \$210,290,261. At May 31, 2010, net unrealized depreciation was \$14,008,482, of which \$8,541,460 related to unrealized appreciation of investments and \$22,549,942 related to unrealized depreciation of investments.

U.S. GAAP defines fair value as the price that the Fund would receive to sell an asset or pay to transfer a liability in an orderly transaction between market participants at the measurement date under current market conditions. A three level hierarchy for fair value measurements has been established based upon the transparency of inputs to the valuation of an asset or liability. Inputs may be observable or unobservable and refer broadly to the assumptions that market

Edgar Filing: Delaware Enhanced Global Dividend & Income Fund - Form N-CSR

participants would use in pricing the asset or liability. Observable inputs reflect the assumptions market participants would use in pricing the asset or liability based on market data obtained from sources independent of the reporting entity. Unobservable inputs reflect the reporting entity's own assumptions about the assumptions that market participants would use in pricing the asset or liability developed based on the best information available under the circumstances. The Fund's investment in its entirety is assigned a level based upon the observability of the inputs which are significant to the overall valuation. The three level hierarchy of inputs is summarized below.

Level 1 – Inputs are quoted prices in active markets

Level 2 – Inputs are observable, directly or indirectly

Level 3 – Inputs are unobservable and reflect assumptions on the part of the reporting entity

The following table summarizes the valuation of the Fund's investments by fair value hierarchy levels as of May 31, 2010:

	Level 1	Level 2	Level 3	Total
Asset- & Mortgage- Backed Securities	\$ —	\$ 8,975,144	\$ 39,965	\$ 9,015,109
Common Stock	46,741,983	30,477,703	—	77,219,686
Corporate Debt	310,110	65,348,728	191,695	65,850,533
Foreign Debt	—	13,957,460	2,757,348	16,714,808
Investment Companies	14,217	—	—	14,217
U.S. Treasury Obligations	524,718	—	—	524,718
Short-Term Investments	—	11,164,082	—	11,164,082
Securities Lending				
Collateral	13,848,897	1,482,278	13,945	15,345,120
Other	—	433,506	—	433,506
Total	\$ 61,439,925	\$ 131,838,901	\$ 3,002,953	\$ 196,281,779
Foreign Currency Exchange Contracts	\$ —	\$ 21,032	\$ —	\$ 21,032
Swap Contracts	\$ —	\$ 1,895	\$ —	\$ 1,895

Edgar Filing: Delaware Enhanced Global Dividend & Income Fund - Form N-CSR

The following is a reconciliation of investments in which significant unobservable inputs (Level 3) were used in determining fair value:

	Asset- and Mortgage- Backed Securities	Corporate Debt	Foreign Debt	Securities Lending Collateral	Total
Balance as of 11/30/09	\$ 131,070	\$ —	\$ 3,479,000	\$ 13,945	\$ 3,624,015
Purchases	—	185,000	1,662,152	—	1,847,152
Sales	(18,742)	—	(2,280,758)	—	(2,299,500)
Net realized gain	12	—	34,883	—	34,895
Transfers out of Level 3	(231,020)	—	—	—	(231,020)
Net change in unrealized appreciation/ depreciation	158,645	6,695	(137,929)	—	27,411
Balance as of 5/31/10	\$ 39,965	\$ 191,695	\$ 2,757,348	\$ 13,945	\$ 3,002,953
Net change in unrealized appreciation/ depreciation from investments still held as of 5/31/10	\$ 163,069	\$ 6,695	\$ (96,462)	\$ —	\$ 73,302

In January 2010, the Financial Accounting Standards Board issued an Accounting Standards Update, Improving Disclosures about Fair Value Measurements, which introduces new disclosure requirements and clarifies certain existing disclosure requirements around fair value measurements currently presented above. The new disclosures and clarifications of existing disclosures are generally effective for the Fund's year ending November 30, 2011 and interim periods therein. Management is evaluating the impact of this update on its current disclosures.

4. Dividend and Distribution Information

Income and long-term capital gain distributions are determined in accordance with federal income tax regulations, which may differ from U.S. GAAP. Additionally, distributions from net gains on foreign currency transactions and net short-term gains on sales of investment securities are treated as ordinary income for federal income tax purposes. The tax character of dividends and distributions paid during the six months ended May 31, 2010 and the year ended November 30, 2009 was as follows:

	Six Months Ended 5/31/10*	Year Ended 11/30/09
Ordinary income	\$ 7,971,237	\$ 8,632,951
Return of capital	—	7,780,966
Total	\$ 7,971,237	\$ 16,413,917

*Tax information for the period ended May 31, 2010 is an estimate and the tax character of dividends and distributions may be redesignated at fiscal year end.

5. Components of Net Assets on a Tax Basis

The components of net assets are estimated since final tax characteristics cannot be determined until fiscal year end. As of May 31, 2010, the estimated components of net assets on a tax basis were as follows:

Shares of beneficial interest	\$ 218,989,067
Realized gains 12/1/09 – 5/31/10	3,478,202
Capital loss carryforwards as of 11/30/09	(58,412,011)
Other temporary differences	(191,577)
Unrealized depreciation of investments, swap contracts and foreign currencies	(13,921,081)
Net assets	\$ 149,942,600

Edgar Filing: Delaware Enhanced Global Dividend & Income Fund - Form N-CSR

The differences between book basis and tax basis components of net assets are primarily attributable to tax deferral of losses on wash sales, contingent payment debt instruments, tax deferral of losses on straddles, tax recognition of unrealized gain on passive foreign investment companies, tax treatment of CDS contracts, mark-to-market of forward foreign currency contracts and tax treatment of market discount and premium on debt instruments.

For financial reporting purposes, capital accounts are adjusted to reflect the tax character of permanent book/tax differences. Reclassifications are primarily due to tax treatment of gain (loss) on foreign currency transactions, CDS contracts, market discount and premium on certain debt instruments and paydowns gains (losses) of asset- and mortgage-backed securities. Results of operations and net assets were not affected by these reclassifications. For the six months ended May 31 2010, the Fund recorded an estimate of these differences since final tax characteristics cannot be determined until fiscal year end.

Distributions in excess of net investment income	\$ 4,155,333
Accumulated net realized loss	875,694
Paid-in capital	(5,031,027)

For federal income tax purposes, capital loss carryforwards may be carried forward and applied against future capital gains. Capital loss carryforwards remaining at November 30, 2009 will expire as follows: \$1,676,026 expires in 2015; \$34,480,079 expires in 2016, and \$22,255,906 expires in 2017.

For the six months ended May 31, 2010, the Fund had capital gains of \$3,478,202, which may reduce the capital loss carryforwards.

6. Capital Stock

Shares obtained under the Fund's dividend reinvestment plan are purchased by the Fund's transfer agent, The Bank of New York Mellon (BNY Mellon) Shareowner Services, in the open market if the shares of the Fund are trading at a discount to the Fund's net asset value on the dividend payment date. However, the dividend reinvestment plan provides that if the shares of the Fund are trading at a premium to the Fund's net asset value on the dividend payment date, the Fund will issue shares to shareholders of record at net asset value. During the six months ended May 31, 2010, the Fund issued 41,977 shares for \$514,858 under the Fund's dividend reinvestment plan because the Fund was trading at a premium to net asset value on the respective dividend payment dates. Since the Fund was trading at a discount on the respective dividend payment dates for the six months ended May 31, 2010, BNY Mellon Shareholder Services purchased shares of the Fund on the open market pursuant to the Fund's dividend reinvestment plan.

(continues) 25

Notes to financial statements

Delaware Enhanced Global Dividend and Income Fund

7. Line of Credit

For the six months ended May 31, 2010, the Fund borrowed money pursuant to a \$ 50,000,000 Credit Agreement with BNY Mellon that expires on June 30, 2010. Depending on market conditions, the amount borrowed by the Fund pursuant to the Credit Agreement may be reduced or possibly increased in the future.

At May 31, 2010, the par value of loans outstanding was \$40,000,000 at a variable interest rate of 1.5625%. During the six months ended May 31, 2010, the average daily balance of loans outstanding was \$40,000,000 at a weighted average interest rate of approximately 1.5622%. Interest on borrowings is based on a variable short-term rate plus an applicable margin. The commitment fee is computed at a rate of 0.25% per annum on the unused balance. The loan is collateralized by the Fund's portfolio.

8. Derivatives

U.S. GAAP requires enhanced disclosures that enable investors to understand: 1) how and why an entity uses derivatives, 2) how they are accounted for, and 3) how they affect an entity's results of operations and financial position.

Foreign Currency Exchange Contracts—The Fund may enter into foreign currency exchange contracts and foreign cross currency exchange contracts as a way of managing foreign exchange rate risk. The Fund may enter into these contracts to fix the U.S. dollar value of a security that it has agreed to buy or sell for the period between the date the trade was entered into and the date the security is delivered and paid for. The Fund may also use these contracts to hedge the U.S. dollar value of securities it already owns that are denominated in foreign currencies. The change in value is recorded as an unrealized gain or loss. When the contract is closed, a realized gain or loss is recorded equal to the difference between the value of the contract at the time it was opened and the value at the time it was closed.

The use of foreign currency exchange contracts and foreign cross currency exchange contracts does not eliminate fluctuations in the underlying prices of the securities, but does establish a rate of exchange that can be achieved in the future. Although foreign currency exchange contracts and foreign cross currency exchange contracts limit the risk of loss due to a decline in the value of the hedged currency, they also limit any potential gain that might result should the value of the currency increase. In addition, the Fund could be exposed to risks if the counterparties to the contracts are unable to meet the terms of their contracts. The Fund's maximum risk of loss from counterparty credit risk is the value of its currency exchanged with the counterparty. The risk is generally mitigated by having a netting arrangement between the Fund and the counterparty and by the posting of collateral by the counterparty to the Fund to cover the Fund's exposure to the counterparty.

Futures Contracts—A futures contract is an agreement in which the writer (or seller) of the contract agrees to deliver to the buyer an amount of cash or securities equal to a specific dollar amount times the difference between the value of a specific security or index at the close of the last trading day of the contract and the price at which the agreement is made. The Fund may use futures in the normal course of pursuing its investment objective. The Fund may invest in futures contracts to hedge its existing portfolio securities against fluctuations in fair value caused by changes in prevailing market interest rates. Upon entering into a futures contract, the Fund deposits cash or pledges U.S. government securities to a broker, equal to the minimum "initial margin" requirements of the exchange on which the contract is traded. Subsequent payments are received from the broker or paid to the broker each day, based on the daily fluctuation in the market value of the contract. These receipts or payments are known as "variation margin" and are recorded daily by the Fund as unrealized gains or losses until the contracts are closed. When the contracts are closed, the Fund records a realized gain or loss equal to the difference between the value of the contract at the time it was opened and the value at the time it was closed. Risks of entering into futures contracts include potential imperfect correlation between the futures contracts and the underlying securities and the possibility of an illiquid secondary market for these instruments. When investing in futures, there is minimal counterparty credit risk to a Fund because futures are exchange-traded and the exchange's clearinghouse, as counterparty to all exchange-traded futures, guarantees against default. There were no futures contracts outstanding at May 31, 2010.

Swap Contracts—The Fund may enter into interest rate swap contracts, index swap contracts and CDS contracts in the normal course of pursuing its investment objective. The Fund may use interest rate swaps to adjust the Fund's sensitivity to interest rates or to hedge against changes in interest rates. Index swaps may be used to gain exposure to markets that the Fund invests in, such as the corporate bond market. The Fund may also use index swaps as a substitute for futures or options contracts if such contracts are not directly available to the Fund on favorable terms. The Fund may enter into CDS contracts in order to hedge against a credit event, to enhance total return or to gain exposure to certain securities or markets.

Interest Rate Swaps. An interest rate swap contract is an exchange of interest rates between counterparties. In one instance, an interest rate swap involves payments received by the Fund from another party based on a variable or floating interest rate, in return for making payments based on a fixed interest rate. An interest rate swap can also work in reverse with the Fund receiving payments based on a fixed interest rate and making payments based on a variable or floating interest rate. Interest rate swaps may be used to adjust the Fund's sensitivity to interest rates or to hedge against changes in interest rates. Periodic payments on such contracts are accrued daily and recorded as unrealized appreciation/depreciation on swap contracts. Upon periodic payment/receipt or termination of the contract,

Edgar Filing: Delaware Enhanced Global Dividend & Income Fund - Form N-CSR

such amounts are recorded as realized gains or losses on swap contracts. The Fund's maximum risk of loss from counterparty credit risk is the discounted net value of the cash flows to be received from/paid to the counterparty over the interest rate swap contract's remaining life, to the extent that the amount is positive. This risk is mitigated by having a netting arrangement between the Fund and the counterparty and by the posting of collateral by the counterparty to the Fund to cover the Fund's exposure to the counterparty.

Index Swaps. Index swaps involve commitments to pay interest in exchange for a market linked return based on a notional amount. To the extent the total return of the security, instrument or basket of instruments underlying the transaction exceeds the offsetting interest obligation, the Fund will receive a payment from the counterparty. To the extent the total return of the security, instrument or basket of instruments underlying the transaction falls short of the offsetting interest obligation, the Fund will make a payment to the counterparty. The change in value of swap contracts outstanding, if any, is recorded as unrealized appreciation or depreciation daily. A realized gain or loss is recorded on maturity or termination of the swap contract. The Fund's maximum risk of loss from counterparty credit risk is the discounted net value of the cash flows to be received from/paid to the counterparty over the index swap contract's remaining life, to the extent that the amount is positive. This risk is mitigated by having a netting arrangement between the Fund and the counterparty and by the posting of collateral by the counterparty to the Fund to cover the Fund's exposure to the counterparty.

Edgar Filing: Delaware Enhanced Global Dividend & Income Fund - Form N-CSR

Credit Default Swaps. A CDS contract is a risk-transfer instrument through which one party (purchaser of protection) transfers to another party (seller of protection) the financial risk of a credit event (as defined in the CDS agreement), as it relates to a particular reference security or basket of securities (such as an index). In exchange for the protection offered by the seller of protection, the purchaser of protection agrees to pay the seller of protection a periodic amount at a stated rate that is applied to the referenced notional amount of the CDS contract. In addition, an upfront payment may be made or received by the Fund in connection with an unwinding or assignment of a CDS contract. Upon the occurrence of a credit event, the seller of protection would pay the par (or other agreed-upon) value of the reference security (or basket of securities) to the counterparty. Credit events generally include, among others, bankruptcy, failure to pay, and obligation default.

During the six months ended May 31, 2010, the Fund entered into CDS contracts as a purchaser and seller of protection. Periodic payments (receipts) on such contracts are accrued daily and recorded as unrealized losses (gains) on swap contracts. Upon payment (receipt), such amounts are recorded as realized losses (gains) on swap contracts. Upfront payments made or received in connection with CDS contracts are amortized over the expected life of the CDS contracts as unrealized losses (gains) on swap contracts. The change in value of CDS contracts is recorded as unrealized appreciation or depreciation daily. A realized gain or loss is recorded upon a credit event (as defined in the CDS agreement) or the maturity or termination of the agreement. At May 31, 2010, the aggregate unrealized appreciation of CDS was \$1,895. If a credit event had occurred for all referenced notionals where collateral posting was required as of May 31, 2010, the contracts' credit-risk-related contingent features would have been triggered and the Fund would have received net amount \$235,000 less the value of the contracts' related reference obligations.

As disclosed in the footnotes to the statement of net assets, at May 31, 2010, the notional value of the protection sold was \$65,000, which reflects the maximum potential amount the Fund would have been required to pay as a seller of credit protection if a credit event had occurred. The quoted market prices and resulting market values for CDS agreements on securities and credit indices serve as an indicator of the current status of the payment/performance risk and represent the likelihood of an expected liability (or profit) for the credit derivative if the swap agreement has been closed/sold as of the period end. Increasing market values, in absolute terms when compared to the notional amount of the swap, represent a deterioration of the reference entity's credit soundness and a greater likelihood of risk of default or other credit event occurring as defined under the terms of the agreement. At May 31, 2010, the net unrealized depreciation of the protection sold was \$1,158.

CDS may involve greater risks than when the Fund had invested in the reference obligation directly. CDS are subject to general market risk, liquidity risk, counterparty risk and credit risk. The Fund's maximum risk of loss from counterparty credit risk, either as the seller of protection or the buyer of protection, is the fair value of the contract. This risk is mitigated by having a netting arrangement between the Fund and the counterparty and by the posting of collateral by the counterparty to the Fund to cover the Fund's exposure to the counterparty.

Swaps Generally. Because there is no organized market for swap contracts, the value of open swaps may differ from that which would be realized in the event the Fund terminated its position in the agreement.

Risks of entering into these contracts include the potential inability of the counterparty to meet the terms of the contracts. This type of risk is generally limited to the amount of favorable movement in the value of the underlying security, instrument or basket of instruments, if any, at the day of default. Risks also arise from potential losses from adverse market movements and such losses could exceed the unrealized amounts shown on the statement of net assets.

Fair values of derivative instruments as of May 31, 2010 were as follows:

	Asset Derivatives Statement of Net Assets		Liability Derivatives Statement of Net Assets	
	Location	Fair Value	Location	Fair Value
Foreign exchange contracts (Forward Currency Contracts)	Receivables	\$ 21,303	Payables/ Net Assets unrealized depreciation	\$ (271)
Credit contracts (Swaps)	Receivables	1,895	Payables/ Net Assets unrealized depreciation	—
Total		\$ 23,198		\$ (271)

The effect of derivative instruments on the statements of operations for the six months ended May 31, 2010 was as follows:

Location of Gain or Loss on Derivatives Recognized in	Realized Gain or Loss on Derivatives Recognized in	Change in Unrealized Appreciation on Derivatives Recognized in

Edgar Filing: Delaware Enhanced Global Dividend & Income Fund - Form N-CSR

		Income	Income
Foreign exchange contracts (Forward Currency Contracts)	Net realized loss on foreign currencies and net change in unrealized appreciation/depreciation of investments and foreign currencies	\$(136,245)	\$21,032
Credit contracts (Swaps)	Net realized gain on swap contracts and net change in unrealized appreciation/depreciation of investments and foreign currencies	2,777	935
Total		\$(133,468)	\$21,967

Notes to financial statements

Delaware Enhanced Global Dividend and Income Fund

9. Securities Lending

The Fund, along with other funds in the Delaware Investments® Family of Funds, may lend its securities pursuant to a security lending agreement (Lending Agreement) with BNY Mellon. With respect to each loan, if the aggregate market value of securities collateral held plus cash collateral received on any business day is less than the aggregate market value of the securities which are the subject of such loan, the borrower will be notified to provide additional collateral not less than the applicable collateral requirements. Cash collateral received is generally invested in the BNY Mellon Securities Lending Overnight Fund (Collective Trust) established by BNY Mellon for the purpose of investment on behalf of clients participating in its securities lending programs. The Collective Trust may only hold cash and high quality assets with a maturity of one business day or less (Cash/Overnight Assets). The Fund also has cash collateral invested in the BNY Mellon SL DBT II Liquidating Fund (Liquidating Fund), which generally holds the portfolio securities of the Fund's previous cash pool other than its Cash/Overnight Assets. The Liquidating Fund invests in fixed income securities, with a weighted average maturity not to exceed 90 days, rated in one of the top three tiers by Standard & Poor's Ratings Group (S&P) or Moody's Investors Service, Inc. (Moody's) or repurchase agreements collateralized by such securities. The Fund will not make additional investments of cash collateral in the Liquidating Fund; the Fund's exposure to the Liquidating Fund is expected to decrease as the Liquidating Fund's assets mature or is sold. Both the Collective Trust and the Liquidating Fund seek to maintain a net asset value per unit of \$1.00, but there can be no assurance that it will always be able to do so. The Fund may incur investment losses as a result of investing securities lending collateral in the Collective Trust and the Liquidating Fund. This could occur if an investment in the Collective Trust or the Liquidating Fund defaulted or if it were necessary to liquidate assets in the Collective Trust or the Liquidating Fund to meet returns on outstanding security loans at a time when their net asset value per unit was less than \$1.00. Under those circumstances, the Fund may not receive an amount from the Collective Trust or the Liquidating Fund that is equal in amount to the collateral the Fund would be required to return to the borrower of the securities and the Fund would be required to make up for this shortfall. In October 2008, BNY Mellon transferred certain distressed securities from the Collective Trust into the Mellon GSL Reinvestment Trust II. The Fund can also accept U.S. government securities and letters of credit (non-cash collateral) in connection with securities loans. In the event of default or bankruptcy by the lending agent, realization and/or retention of the collateral may be subject to legal proceedings. In the event the borrower fails to return loaned securities and the collateral received is insufficient to cover the value of the loaned securities and provided such collateral shortfall is not the result of investment losses, the lending agent has agreed to pay the amount of the shortfall to the Fund, or at the discretion of the lending agent, replace the loaned securities. The Fund continues to record dividends or interest, as applicable, on the securities loaned and is subject to change in value of the securities loaned that may occur during the term of the loan. The Fund has the right under the Lending Agreement to recover the securities from the borrower on demand. With respect to security loans collateralized by non-cash collateral, the Fund receives loan premiums paid by the borrower. With respect to security loans collateralized by cash collateral, the earnings from the collateral investments are shared among the Fund, the security lending agent and the borrower. The Fund records security lending income net of amount allocated to the security lending agent and the borrower.

At May 31, 2010, the value of securities on loan was \$15,221,424, for which the Fund received collateral, comprised of non-cash collateral valued at \$117,863, and cash collateral of \$15,676,995. At May 31, 2010, the value of invested collateral was \$15,345,120. Investments purchased with cash collateral are presented on the statement of net assets under the caption "Securities Lending Collateral".

10. Credit and Market Risk

The Fund borrows through its line of credit for purposes of leveraging. Leveraging may result in higher degrees of volatility because the Fund's net asset value could be subject to fluctuations in short-term interest rates and changes in market value of portfolio securities attributable to the leverage.

Some countries in which the Fund may invest require governmental approval for the repatriation of investment income, capital or the proceeds of sales of securities by foreign investors. In addition, if there is deterioration in a country's balance of payments or for other reasons, a country may impose temporary restrictions on foreign capital remittances abroad.

The securities exchanges of certain foreign markets are substantially smaller, less liquid and more volatile than the major securities markets in the United States. Consequently, acquisition and disposition of securities by the Fund may be inhibited. In addition, a significant portion of the aggregate market value of equity securities listed on the major securities exchanges in emerging markets is held by a smaller number of investors. This may limit the number of shares available for acquisition or disposition by the Fund.

The Fund invests a portion of its assets in high yield fixed income securities, which carry ratings of BB or lower by S&P and/or Ba or lower by Moody's. Investments in these higher yield securities are generally accompanied by a greater degree of credit risk than higher rated securities. Additionally, lower rated securities may be more susceptible to adverse economic and competitive industry conditions than investment grade securities.

The Fund invests in fixed income securities whose value is derived from an underlying pool of mortgages or consumer loans. The value of these securities is sensitive to changes in economic conditions, including delinquencies and/or defaults, and maybe adversely affected by shifts in the market's perception of the issuers and changes in interest rates. Investors receive principal and interest payments as the underlying mortgages or consumer loans are paid back. Some of these securities are collateralized mortgage obligations (CMOs). CMOs are debt securities issued by U.S. government agencies or by financial institutions and other mortgage lenders, which are collateralized by a pool of mortgages held under an indenture. Prepayment of mortgages may shorten the stated maturity of the

Edgar Filing: Delaware Enhanced Global Dividend & Income Fund - Form N-CSR

obligations and can result in a loss of premium, if any has been paid. Certain of these securities may be stripped (securities which provide only the principal or interest feature of the underlying security). The yield to maturity on an interest-only CMO is extremely sensitive not only to changes in prevailing interest rates, but also to the rate of principal payments (including prepayments) on the related underlying mortgage assets. A rapid rate of principal payments may have a material adverse affect on the Fund's yield to maturity. If the underlying mortgage assets experience greater than anticipated prepayments of principal, the Fund may fail to fully recoup its initial investment in these securities even if the securities are rated in the highest rating categories.

28

Edgar Filing: Delaware Enhanced Global Dividend & Income Fund - Form N-CSR

The Fund invests in REITs and is subject to the risks associated with that industry. If the Fund holds real estate directly as a result of defaults or receives rental income directly from real estate holdings, its tax status as a regulated investment company may be jeopardized. There were no direct real estate holdings during the six months ended May 31, 2010. The Fund's REIT holdings are also affected by interest rate changes, particularly if the REITs it holds use floating rate debt to finance their ongoing operations.

The Fund may invest up to 10% of its net assets in illiquid securities, which may include securities with contractual restrictions on resale, securities exempt from registration under Rule 144A of the Securities Act of 1933, as amended, and other securities which may not be readily marketable. The relative illiquidity of these securities may impair the Fund from disposing of them in a timely manner and at a fair price when it is necessary or desirable to do so. While maintaining oversight, the Fund's Board has delegated to DMC the day-to-day functions of determining whether individual securities are liquid for purposes of the Fund's limitation on investments in illiquid assets. Securities eligible for resale pursuant to Rule 144A, which are determined to be liquid, are not subject to the 10% limit on investments in illiquid securities. Rule 144A and illiquid securities have been identified on the statement of net assets.

11. Contractual Obligations

The Fund enters into contracts in the normal course of business that contain a variety of indemnifications. The Fund's maximum exposure under these arrangements is unknown. However, the Fund has not had any prior claims or losses pursuant to these contracts. Management has reviewed the Fund's existing contracts and expects the risk of loss to be remote.

12. Sale of Delaware Investments to Macquarie Group

On August 18, 2009, Lincoln National Corporation (former parent company of Delaware Investments) and Macquarie Group (Macquarie) entered into an agreement pursuant to which Delaware Investments, including DMC and DSC, would be acquired by Macquarie, an Australia-based global provider of banking, financial, advisory, investment and funds management services (Transaction). The Transaction was completed on January 4, 2010. DMC and DSC are now wholly owned subsidiaries of Macquarie.

The Transaction resulted in a change of control of DMC which, in turn, caused the termination of the investment management agreement between DMC and the Fund. On January 4, 2010, the new investment management agreement between DMC and the Fund that was approved by the shareholders became effective.

13. Subsequent Event

Management has determined no material events or transactions occurred subsequent to May 31, 2010 that would require recognition or disclosure in the Fund's financial statements.

Delaware Enhanced Global Dividend and Income Fund

Changes to Portfolio Management Team

Wayne A. Anglace was appointed co-portfolio manager of the Fund on March 30, 2010. Mr. Anglace joined Liu-Er Chen, D. Tysen Nutt Jr., Babak Zenouzi, Damon J. Andres, Edward A. Gray, Kevin P. Loomer, Roger A. Early, and Thomas H. Chow in making day-to-day decisions for the Fund.

Fund management

Babak “Bob” Zenouzi
Senior Vice President, Chief Investment Officer – REIT Equity

Bob Zenouzi is the lead manager for the domestic and global REIT effort at Delaware Investments, which includes the team, its process, and its institutional and retail products, which he created during his prior time with the firm. He also focuses on opportunities in Japan, Singapore, and Malaysia for the firm’s global REIT product. Additionally, he serves as lead portfolio manager for the firm’s Dividend Income products, which he helped to create in the 1990s. He is also a member of the firm’s asset allocation committee, which is responsible for building and managing multi-asset class portfolios. He rejoined Delaware Investments in May 2006 as senior portfolio manager and head of real estate securities. In his first term with the firm, he spent seven years as an analyst and portfolio manager, leaving in 1999 to work at Chartwell Investment Partners, where from 1999 to 2006 he was a partner and senior portfolio manager on Chartwell’s Small-Cap Value portfolio. He began his career with The Boston Company, where he held several positions in accounting and financial analysis. Zenouzi earned a master’s degree in finance from Boston College and a bachelor’s degree from Babson College. He is a member of the National Association of Real Estate Investment Trusts and the Urban Land Institute.

Damon J. Andres, CFA
Vice President, Senior Portfolio Manager

Damon J. Andres, who joined Delaware Investments in 1994 as an analyst, currently serves as a portfolio manager for REIT investments and convertibles. He also serves as a portfolio manager for the firm’s Dividend Income products. From 1991 to 1994, he performed investment-consulting services as a consulting associate with Cambridge Associates. Andres earned a bachelor’s degree in business administration with an emphasis in finance and accounting from the University of Richmond.

Wayne A. Anglace, CFA
Vice President, Portfolio Manager, Research Analyst, Convertible Bond Trader

Wayne A. Anglace currently serves as a portfolio manager and trader for the firm’s convertible bond strategies. He also serves as a research analyst on the firm’s taxable fixed income team with specific responsibilities for the healthcare and deathcare sectors. Prior to joining the firm in March 2007 as a research analyst and trader, he spent more than two years as a research analyst at Gartmore Global Investments for its convertible bond strategy. From 2000 to 2004, Anglace worked in private client research at Deutsche Bank Alex. Brown in Baltimore where he focused on equity research, and he started his financial services career with Ashbridge Investment Management in 1999. Prior to moving to the financial industry, Anglace worked as a professional civil engineer. He earned his bachelor’s degree in civil engineering from Villanova University and an MBA with a concentration in finance from Saint Joseph’s University, and he is a member of the CFA Society of Philadelphia.

Liu-Er Chen, CFA
Senior Vice President, Chief Investment Officer – Emerging Markets and Healthcare

Liu-Er Chen heads the firm’s global Emerging Markets team, and he is also the portfolio manager for the Delaware Healthcare Fund, which launched in October 2007. Prior to joining Delaware Investments in September 2006 in his current position, he spent nearly 11 years at Evergreen Investment Management Company, where he most recently served as managing director and senior portfolio manager. He co-managed the Evergreen Emerging Markets Growth Fund from

Edgar Filing: Delaware Enhanced Global Dividend & Income Fund - Form N-CSR

1999 to 2001, and became the Fund's sole manager in 2001. He also served as the sole manager of the Evergreen Health Care Fund since its inception in 1999. Chen began his career at Evergreen in 1995 as an analyst covering Asian and global healthcare stocks, before being promoted to portfolio manager in 1998. Prior to his career in asset management, Chen worked for three years in sales, marketing, and business development for major American and European pharmaceutical and medical device companies. He is licensed to practice medicine in China and has experience in medical research at both the Chinese Academy of Sciences and Cornell Medical School. He holds an MBA with a concentration in management from Columbia Business School.

Thomas H. Chow, CFA
Senior Vice President, Senior Portfolio Manager

Thomas H. Chow is a member of the firm's taxable fixed income portfolio management team, with primary responsibility for portfolio construction and strategic asset allocation in investment grade credit exposures. He is the lead portfolio manager for Delaware Corporate Bond Fund and Delaware Extended Duration Bond Fund, as well as several institutional mandates. His experience includes significant exposure to asset liability management strategies and credit risk opportunities. Prior to joining Delaware Investments in 2001 as a portfolio manager working on the Lincoln General Account, he was a trader of high grade and high yield securities, and was involved in the portfolio management of collateralized bond obligations (CBOs) and insurance portfolios at SunAmerica/AIG from 1997 to 2001. Before that, he was an analyst, trader, and portfolio manager at Conseco Capital Management from 1989 to 1997. Chow received a bachelor's degree in business analysis from Indiana University, and he is a Fellow of Life Management Institute.

Roger A. Early, CPA, CFA, CFP
Senior Vice President, Co-Chief Investment Officer – Total Return Fixed Income Strategy

Roger A. Early rejoined Delaware Investments in March 2007 as a member of the firm's taxable fixed income portfolio management team, with primary responsibility for portfolio construction and strategic asset allocation. During his previous time at the firm, from 1994 to 2001, he was a senior portfolio manager in the same area, and he left Delaware Investments as head of its U.S. investment grade fixed income group. In recent years, Early was a senior portfolio manager at Chartwell Investment Partners and Rittenhouse Financial and served as the chief investment officer for fixed income at Turner Investments. Prior to joining Delaware Investments in 1994, he worked for more than 10 years at Federated Investors where he managed more than \$25 billion in mutual fund and institutional portfolios in the short-term and investment grade markets. He left the firm as head of institutional fixed income management. Earlier in his career, he held management positions with the Federal Reserve Bank, PNC Financial, Touche Ross, and Rockwell International. Early earned his bachelor's degree in economics from The Wharton School of the University of Pennsylvania and an MBA with concentrations in finance and accounting from the University of Pittsburgh. He is a member of the CFA Society of Philadelphia.

Edward A. "Ned" Gray, CFA
Senior Vice President, Chief Investment Officer – International Value Equity

Ned Gray joined Delaware Investments in June 2005 in his current position, developing the firm's International Value Equity team, from Arborway Capital, which he co-founded in January 2005. He previously worked in the investment management business at Thomas Weisel Asset Management, and ValueQuest, which was acquired by TWAM in 2002. At ValueQuest, which he joined in 1987, Gray served as a senior investment professional with responsibilities for portfolio management, security analysis, quantitative research, performance analysis, global research, back office/investment information systems integration, trading, and client and consultant relations. Prior to ValueQuest, he was a research analyst at the Center for Competitive Analysis. Gray received his bachelor's degree in history from Reed College and a master of arts in law and diplomacy, in international economics, business and law from Tufts University's Fletcher School of Law and Diplomacy.

Other Fund information (Unaudited)

Delaware Enhanced Global Dividend and Income Fund

Fund management (continued)

Kevin P. Loomer, CFA
Senior Vice President, Senior Portfolio Manager, Head of High Yield Investments

Kevin P. Loomer is head of the High Yield fixed income team, responsible for portfolio construction and strategic asset allocation of all high yield fixed income assets. Prior to joining Delaware Investments in August 2007 in his current position, Loomer spent 11 years at T. Rowe Price, starting as an analyst and leaving the firm as a portfolio manager. He began his career with Morgan Stanley as a corporate finance analyst in the New York and London offices. Loomer received his bachelor's degree in commerce from the University of Virginia and earned an MBA from the Tuck School of Business at Dartmouth.

D. Tysen Nutt Jr.
Senior Vice President, Senior Portfolio Manager, Team Leader – Large-Cap Value Focus Equity

D. Tysen Nutt Jr. joined Delaware Investments in 2004 as senior vice president and senior portfolio manager for the firm's Large-Cap Value Focus strategy. Before joining the firm, Nutt led the U.S. Active Large-Cap Value team within Merrill Lynch Investment Managers, where he managed mutual funds and separate accounts for institutions and private clients. He departed Merrill Lynch Investment Managers as a managing director. Prior to joining Merrill Lynch Investment Managers in 1994, Nutt was with Van Deventer & Hoch where he managed large-cap value portfolios for institutions and private clients. He began his investment career at Dean Witter Reynolds, where he eventually became vice president, investments. Nutt earned his bachelor's degree from Dartmouth College, and he is a member of the New York Society of Security Analysts and the CFA Institute.

Change in Independent Registered Public Accounting Firm

Due to independence matters under the Securities and Exchange Commission's auditor independence rules relating to the January 4, 2010 acquisition of Delaware Investments (including DMC and DSC) by Macquarie Group, Ernst & Young LLP ("E&Y") has resigned as the independent registered public accounting firm for Delaware Enhanced Global Dividend and Income Fund. (the "Fund") effective May 20, 2010. At a meeting held on May 20, 2010, the Board of Trustees of the Fund, upon recommendation of the Audit Committee, selected PricewaterhouseCoopers LLC ("PwC") to serve as the independent registered public accounting firm for the Fund for the fiscal year ending November 30, 2010. During the fiscal years ended November 30, 2009 and 2008, E&Y's audit reports on the financial statements of the Fund did not contain any adverse opinion or disclaimer of opinion, nor were they qualified or modified as to uncertainty, audit scope, or accounting principles. In addition, there were no disagreements between the Fund and E&Y on accounting principles, financial statements disclosures or audit scope, which, if not resolved to the satisfaction of E&Y, would have caused them to make reference to the disagreement in their reports. Neither the Fund nor anyone on its behalf has consulted with PwC at any time prior to their selection with respect to the application of accounting principles to a specified transaction, either completed or proposed or the type of audit opinion that might be rendered on the Fund's financial statements.

About the organization

This semiannual report is for the information of Delaware Enhanced Global Dividend and Income Fund shareholders. The figures in this report represent past results that are not a guarantee of future results. The return and principal value of an investment in the Fund will fluctuate so that shares, when sold, may be worth more or less than their original cost.

Notice is hereby given in accordance with Section 23(c) of the Investment Company Act of 1940 that the Fund may, from time to time, purchase shares of its common stock on the open market at market prices.
