

TORTOISE PIPELINE & ENERGY FUND, INC.

Form N-30B-2

April 18, 2013

Tortoise

Pipeline & Energy Fund, Inc.

2013 1st Quarter Report February 28, 2013

In today's environment some investments
are **more relevant than ever.**

Company at a glance

Tortoise believes Tortoise Pipeline & Energy Fund, Inc. (NYSE: TTP) is the first closed-end fund that focuses particularly on the broader \$400 billion+ North American pipeline universe.

Investment strategy

TTP seeks to provide stockholders with a high level of total return, with an emphasis on current distributions. Our fund focuses particularly on North American pipeline companies that transport natural gas, natural gas liquids, crude oil and refined products, and to a lesser extent, on other energy infrastructure companies.

Because of our traditional tax flow-through nature as a regulated investment company (RIC), we have the differentiated ability and flexibility to efficiently target and access traditional pipeline corporations alongside master limited partnerships (MLPs). Over 75 percent of our portfolio will generally be in companies structured as corporations or limited liability companies domiciled in the United States, Canada or United Kingdom with the remaining up to 25 percent in MLPs. We believe the broader North American pipeline universe offers strong business fundamentals and expanded growth opportunities.

We also write (sell) covered call options to seek to enhance long-term return potential across economic environments, increase current income and mitigate portfolio risk through option income. Our covered call strategy focuses on other energy infrastructure companies that we believe are integral links in the value chain for pipeline companies.

TTP seeks to provide:

Attractive total return potential with high current income in a defensive sector

Access to real, long-lived pipeline assets essential to the functioning of the US economy

Exposure to expanded energy infrastructure growth projects that connect new areas of supply with demand

Ability to efficiently invest across North American pipeline universe through traditional tax flow-through fund structure

Investor simplicity through one 1099, no K-1s, no unrelated business taxable income, IRA suitability

Expertise of Tortoise Capital Advisors, a leading and pioneering energy infrastructure investment firm

Portfolio statistics by ownership structure

Portfolio statistics by asset type

Tortoise Pipeline & Energy Fund, Inc.

www.tortoiseadvisors.com

March 31, 2013

Dear Fellow Stockholders,

Following some weakness in December, the calendar year kicked off with a broad-based rally as most equity markets around the world responded favorably to Washington's successful avoidance of the fiscal cliff. Bullish economic data in the U.S. housing market, strong corporate earnings, continued low interest rates and an uptick in manufacturing further bolstered investor confidence. Momentum continued throughout the quarter, with the markets largely ignoring a second potential cliff—sequestration which resulted from ongoing political gridlock in our nation's capital.

Likewise, our fiscal quarter ended Feb. 28, 2013 was a strong one for pipeline companies, which continued to demonstrate healthy growth, produce steady cash flows and benefit from increasing North American energy production.

Pipeline sector review and outlook

During our first fiscal quarter, the Tortoise North American Pipeline IndexSM posted an 8.0 percent total return, with the bulk of the performance delivered in January as markets rebounded due to greater clarity as the first fiscal cliff was averted. Reversing last year's relative underperformance, pipeline companies outperformed the S&P 500 Index[®], which gained 7.6 percent in total return for the same period.

The dramatic change taking place in North American energy production continues to be a significant driver of growth for the midstream portion of the energy value chain and, more specifically, pipeline companies. U.S. crude oil production is increasingly displacing imports, with production up 40 percent since 2008, as noted by the IHS, a global provider of market and economic information. According to the U.S. Energy Information Administration, the U.S. is expected to produce 7.3 million barrels per day in 2013, up from 6.5 million in 2012. This vigorous activity continues to spur aggressive pipeline infrastructure build-out. We project more than \$87 billion in total pipeline projects through 2014.

Capital markets remained very active and supportive, as MLP and pipeline companies raised approximately \$11.2 billion in equity and \$13.0 billion in debt in the first fiscal quarter. Merger and acquisition (M&A) also has been healthy. A total of \$17.9 billion in MLP and pipeline transactions was announced during the fiscal quarter, the largest of which was Kinder Morgan Energy Partners \$5 billion pending acquisition of Copano Energy, L.L.C., a gathering and processing MLP. The deal's healthy premium drove further M&A speculation in the gathering and processing sector during the quarter.

Fund performance review

Our total assets, net of pending trades, increased from \$335.9 million on Nov. 30, 2012, to \$361.5 million on Feb. 28, 2013, resulting primarily from market appreciation of our investments. Our market-based total return to stockholders for the first fiscal quarter was 14.1 percent and our NAV-based total return was 11.0 percent per share (both including the reinvestment of distributions). The difference between our market value total return as compared to our NAV total return reflected a narrowing in the market's discount of our stock price relative to our NAV during the period.

During the quarter, our positive asset performance was driven by our exposure to gathering and processing pipeline companies, which were helped by the aforementioned M&A activity and sector speculation as well as by increased natural gas liquids volumes. Our investments in refined product pipeline companies also contributed positively to performance, as they benefitted from an inflation escalator and stable demand. Our exposure to independent energy companies with ancillary businesses supporting our covered call strategy also positively influenced performance during the quarter. Although a low volatility environment reduced our relative net call option premium income, we maintained our average out-of-the-money percentage.

We also completed direct placement investments in Inergy Midstream, L.P. and Rose Rock Midstream, L.P., which together totaled \$2.6 million. Inergy Midstream is a natural gas storage and transportation business acquiring logistical assets in the Bakken, while Rose Rock Midstream is a crude oil gathering, transportation and storage business that is acquiring an interest in a pipeline linking the Niobrara shale in the Rockies to Cushing, Okla.

(unaudited)

2013 1st Quarter Report

3

We paid a distribution of \$0.4075 per common share (\$1.63 annualized) to our stockholders on March 1, 2013, in line with the previous quarter's distribution and an increase of 0.3 percent year over year. This distribution represented an annualized yield of 6.0 percent based on our fiscal quarter closing price of \$27.15. We will provide expectations for the tax characterization of our 2013 distributions later in the year. A final determination of the characterization will be made in January 2014.

We ended the first fiscal quarter with leverage (including bank debt, senior notes and preferred stock) at 22.0 percent of total assets, below our long-term target of 25 percent. This provides us flexibility in managing the portfolio across market cycles and allows us to add leverage when compelling opportunities arise. As of Feb. 28, 2013, our leverage had a weighted average maturity of 4.3 years and a weighted average cost of 3.03 percent, with approximately 69 percent at fixed rates.

Additional information about our financial performance is available in the Key Financial Data and Management's Discussion sections of this report.

Conclusion

Please join us for our annual stockholders' meeting on May 30, 2013 at 10 a.m. Central time at our offices located at 11550 Ash St., Suite 300, in Leawood, Kan. If you are unable to attend the meeting, you can join us via the closed-end fund section of our Web site at www.tortoiseadvisors.com. We have recently redesigned the site to better serve you, and we welcome your feedback about its new features and functionality.

Sincerely,

H. Kevin Birzer

(1) Q1 is the period from December through February. Q2 is the period from March through May. Q3 is the period from June through August. Q4 is the period from September through November.

(2) Leverage costs include interest expense, distributions to preferred stockholders and other recurring leverage expenses.

(3) Net investment income on the Statement of Operations is adjusted as follows to reconcile to Distributable Cash Flow (DCF): increased by net premiums on options written, the return of capital on MLP distributions, the value of paid-in-kind distributions, and amortization of debt issuance costs.

(4) Annualized for periods less than one full year.

(5) Computed by averaging month-end values within each period.

(6) Leverage consists of long-term debt obligations, preferred stock and short-term borrowings.

(7) Computed by averaging daily net assets for the period.

Management's Discussion (unaudited)

The information contained in this section should be read in conjunction with our Financial Statements and the Notes thereto. In addition, this report contains certain forward-looking statements. These statements include the plans and objectives of management for future operations and financial objectives and can be identified by the use of forward-looking terminology such as may, will, expect, intend, anticipate, estimate, or continue or the negative thereof or other variations thereon or comparable terminology. These forward-looking statements are subject to the inherent uncertainties in predicting future results and conditions. Certain factors that could cause actual results and conditions to differ materially from those projected in these forward-looking statements are set forth in the Risk Factors section of our public filings with the SEC.

Overview

Tortoise Pipeline & Energy Fund, Inc.'s (TTP) primary investment objective is to provide a high level of total return, with an emphasis on current distributions. We seek to provide stockholders an efficient vehicle to invest in a portfolio consisting primarily of equity securities of pipeline and other energy infrastructure companies. We focus primarily on pipeline companies that engage in the business of transporting natural gas, natural gas liquids (NGLs), crude oil and refined petroleum products, and, to a lesser extent, on other energy infrastructure companies. Energy infrastructure companies own and operate a network of asset systems that transport, store, distribute, gather, process, explore, develop, manage or produce crude oil, refined petroleum products (including biodiesel and ethanol), natural gas or NGLs or that provide electrical power generation (including renewable energy), transmission and/or distribution. We also seek to provide current income from gains earned through a covered call option strategy, which consists of writing (selling) call options on selected equity securities in our portfolio.

TTP is a registered non-diversified, closed-end management investment company under the Investment Company Act of 1940, as amended (the 1940 Act), and expects to qualify as a regulated investment company (RIC) under the U.S. Internal Revenue Code of 1986, as amended (the Code). Tortoise Capital Advisors, L.L.C. (the Adviser) serves as investment adviser.

Company update

Market values of our investments increased during the quarter, contributing to an increase in net assets of approximately \$23.7 million since November 30, 2012. Distribution increases from our investments were in line with our expectations while an increase in average total assets during the quarter resulted in increased asset-based expenses. We maintained our quarterly distribution of \$0.4075 per share. Additional information on these events and results of our operations are discussed below.

Critical accounting policies

The financial statements are based on the selection and application of critical accounting policies, which require management to make significant estimates and assumptions. Critical accounting policies are those that are both important to the presentation of our financial condition and results of operations and require management's most difficult, complex, or subjective judgments. Our critical accounting policies are those applicable to the valuation of investments and certain revenue recognition matters as discussed in Note 2 in the Notes to Financial Statements.

Determining distributions to stockholders

We pay quarterly distributions based primarily upon our current and estimated future distributable cash flow (DCF). In addition, and to the extent that the sum of our net investment company taxable income and net realized gains from investments exceed our quarterly distributions, we intend to make an additional distribution to common stockholders in the last quarter of the calendar year in order to avoid being subject to U.S. federal income taxes. Our Board of Directors reviews the distribution rate quarterly and may adjust the quarterly distribution throughout the year.

Determining DCF

DCF is income from investments less expenses. Income from investments includes the amount we receive as cash or paid-in-kind distributions from common stock, MLPs, affiliates of MLPs, and pipeline and other energy companies in which we invest, and dividend payments on short-term investments we own. Income also includes the premiums received from sales of covered call

Edgar Filing: TORTOISE PIPELINE & ENERGY FUND, INC. - Form N-30B-2

options, net of amounts paid to buy back out of the money options. The total expenses include current or anticipated operating expenses and leverage costs. Each are summarized for you in the Key Financial Data table and are discussed in more detail below.

The Key Financial Data table discloses the calculation of DCF and should be read in conjunction with this discussion. The difference between income from investments in the DCF calculation and total investment income as reported in the Statement of Operations, is reconciled as follows: (1) the Statement of Operations, in conformity with U.S. generally accepted accounting principles (GAAP), recognizes distributions and dividend income from MLPs and common stock on their ex-dates, whereas the DCF calculation may

Tortoise Pipeline & Energy Fund, Inc.

www.tortoiseadvisors.com

Management's Discussion (unaudited)

(continued)

reflect distributions and dividend income on their pay dates; (2) GAAP recognizes that a significant portion of the cash distributions received from MLPs are characterized as a return of capital and therefore excluded from investment income, whereas the DCF calculation includes the return of capital; (3) income from investments in the DCF calculation includes the value of dividends paid-in-kind (additional stock or units), whereas such amounts are not included as income for GAAP purposes; and (4) net premiums on options written (premiums received less amounts paid to buy back out of the money options) with expiration dates during our fiscal quarter are included in the DCF calculation, whereas GAAP recognizes the net effect of options written as realized and unrealized gains (losses). A reconciliation of Net Investment Income to DCF is included below.

Income from investments

We seek to achieve our investment objectives by investing in a portfolio consisting primarily of equity securities of pipeline and other energy infrastructure companies. We evaluate each holding based upon its contribution to our investment income and its risk relative to other potential investments.

We focus primarily on pipeline companies that engage in the business of transporting natural gas, NGLs, crude oil and refined products through pipelines, and, to a lesser extent, on other energy infrastructure companies. These pipeline companies own and operate long haul, gathering and local gas distribution pipelines.

We also seek to provide current income from gains earned through a covered call option strategy, which consists of writing (selling) call options on selected equity securities in our portfolio. We focus our covered call strategy on other energy infrastructure companies that we believe are integral links in the energy infrastructure value chain for pipeline companies.

Total distributions received from our investments and option strategy for the 1st quarter 2013 was approximately \$5.3 million. This reflects earnings on our investments of \$3.6 million and net premiums on options written of approximately \$1.7 million. While the dividends and distributions from our long-term investments increased slightly from 4th quarter 2012, total received from investments declined approximately 3.9 percent due to lower net premiums on options written during the quarter. On an annualized basis, the total received from investments equates to 6.13 percent of our average total assets for the quarter.

Expenses

We incur two types of expenses: (1) operating expenses, consisting primarily of the advisory fee; and (2) leverage costs. On a percentage basis, operating expenses before leverage costs were an annualized 1.05 percent of average total assets for the 1st quarter 2013, an increase of 0.02 percent as compared to 1st quarter 2012 and an increase of 0.06 percent as compared to the 4th quarter 2012. The increase in the operating expense ratio is primarily due to the reduction in the Advisory fee waiver rate during the 1st quarter 2012. While the contractual advisory fee is 1.10 percent of average monthly managed assets, the Adviser waived an amount equal to 0.25 percent of average monthly managed assets through December 31, 2012, and has agreed to waive an amount equal to 0.20 percent of average monthly managed assets for calendar year 2013 and 0.15 percent of average monthly managed assets for calendar year 2014. Other operating expenses increased as compared to 4th quarter 2012, primarily as a result of increased professional fees during the quarter.

Leverage costs consist of two major components: (1) the direct interest expense on our senior notes and short-term credit facility, and (2) distributions to preferred stockholders. Other leverage expenses include rating agency fees and commitment fees. Total leverage costs for DCF purposes were approximately \$0.6 million for the 1st quarter 2013, a slight decrease as compared to 4th quarter 2012.

The weighted average annual rate of our leverage at February 28, 2013 was 3.03 percent including balances on our bank credit facility which accrue interest at a variable rate equal to one-month LIBOR plus 1.25 percent. Our weighted average rate may vary in future periods as a result of changes in LIBOR, the utilization of our credit facility, and as our leverage matures or is redeemed. Additional information on our leverage is included in the Liquidity and Capital Resources discussion below.

Distributable cash flow and capital gains

Edgar Filing: TORTOISE PIPELINE & ENERGY FUND, INC. - Form N-30B-2

For 1st quarter 2013, our DCF was approximately \$3.75 million, a decrease of 6.7 percent as compared to 4th quarter 2012. This decrease is the net result of the changes in income and expenses as described above. This equates to an annualized rate of 5.08 percent of average total assets for the quarter and 5.72 percent of average net assets for the quarter. In addition, we had net realized gains on investments of approximately \$1.3 million during the quarter.

Tortoise Pipeline & Energy Fund, Inc.

www.tortoiseadvisors.com

2013 1st Quarter Report

7

Management's Discussion (unaudited)
(continued)

We declared a distribution of approximately \$4.1 million for 1st quarter 2013. On a per share basis, we declared a \$0.4075 distribution on February 11, 2013, unchanged from the 4th quarter 2012.

Net Investment Income on the Statement of Operations is adjusted as follows to reconcile to DCF for 1st quarter 2013 (in thousands):

	1st Qtr 2013
Net Investment Income	\$ 347
Adjustments to reconcile to DCF:	
Net premiums on options written	1,728
Distributions characterized as return of capital	1,078
Dividends paid in stock	570
Amortization of debt issuance costs	27
DCF	\$ 3,750

Liquidity and capital resources

We had total assets of \$362 million at quarter-end. Our total assets reflect the value of our investments, which are itemized in the Schedule of Investments. It also reflects cash, interest and dividends receivable and any expenses that may have been prepaid. During 1st quarter 2013, total assets increased approximately \$25.6 million (net of pending trades at November 30, 2012). This change was primarily the result of a \$26.8 million increase in the value of our investments as reflected by the change in realized and unrealized gains on investments (excluding return of capital on distributions) and net sales during the quarter of \$1.4 million.

Total leverage outstanding at February 28, 2013 was \$79.7 million, a decrease of \$1.9 million as compared to November 30, 2012. On an adjusted basis to reflect the timing of the payment of our 1st quarter 2013 distribution, leverage increased approximately \$2.2 million. Outstanding leverage is comprised of \$49 million in senior notes, \$16 million in preferred shares and \$14.7 million outstanding under the credit facility, with 69 percent of leverage with fixed rates and a weighted average maturity of 4.3 years. Total leverage represented 22.0 percent of total assets at February 28, 2013, as compared to 21.8 percent as of November 30, 2012. This is below our long-term target level of 25 percent of total assets, allowing the opportunity to add leverage when compelling investment opportunities arise. Temporary increases to up to 30 percent of our total assets may be permitted, provided that such leverage is consistent with the limits set forth in the 1940 Act, and that such leverage is expected to be reduced over time in an orderly fashion to reach our long-term target. Our leverage ratio is impacted by increases or decreases in investment values, issuance of equity and/or the sale of securities where proceeds are used to reduce leverage.

Our longer-term leverage (excluding our bank credit facility) of \$65 million is comprised of 75 percent private placement debt and 25 percent private placement preferred equity with a weighted average fixed rate of 3.35 percent and remaining weighted average laddered maturity of approximately 5.2 years.

We use leverage to acquire equity investments consistent with our investment philosophy. The terms of our leverage are governed by regulatory and contractual asset coverage requirements that arise from the use of leverage. Additional information on our leverage and asset coverage requirements is discussed in Notes 10, 11 and 12 in the Notes to Financial Statements. Our coverage ratios are updated each week on our Web site at www.tortoiseadvisors.com.

Taxation of our distributions

We expect that distributions paid on common shares will generally consist of: (i) investment company taxable income (ICTI) which includes ordinary income net of deductions plus any short-term capital gains in excess of net long-term capital losses (under current law, distributions of ICTI may be designated as qualified dividend income (QDI) to the extent of any QDI received from our investment in common stocks); (ii) long-term capital gain (net gain from the sale of a capital asset held longer than 12 months over net short-term capital losses) and (iii) return of capital. The QDI and long-term capital gain tax rates are variable based on the taxpayer's taxable income.

We may designate a portion of our quarterly distributions as capital gains and we may also distribute additional capital gains in the last calendar quarter if necessary to meet minimum distribution requirements and to avoid being subject to excise taxes. If, however, we elect to retain any capital gains, we will be subject to U.S. capital gains taxes. The payment of those taxes will flow-through to stockholders as a tax credit to apply against their U.S. income tax payable on the deemed distribution of the

retained capital gain.

For tax purposes, distributions paid to common stockholders for the calendar year ended December 31, 2012 were approximately 37 percent QDI, 21 percent ordinary dividend income, 22 percent long-term capital gain, and 20 percent return of capital. A holder of our common stock would reduce their cost basis for income tax purposes by the amount designated as return of capital. This information is reported to stockholders on Form 1099-DIV and is available on our Web site at www.tortoiseadvisors.com.

(1) Commencement of Operations.

(2) Information presented relates to a share of common stock outstanding for the entire period.

(3) The per common share data for the period from October 31, 2011 through November 30, 2011 do not reflect the change in estimate of investment income and return of capital. See Note 2C to the financial statements for further disclosure.

(4) Represents the dilution per common share from underwriting and other offering costs for the period from October 31, 2011 through November 30, 2011.

(5) Not annualized for periods less than one full year. Total investment return is calculated assuming a purchase of common stock at the beginning of the period (or initial public offering price) and a sale at the closing price on the last day of the period reported (excluding brokerage commissions). The calculation also assumes reinvestment of distributions at actual prices pursuant to the Company's dividend reinvestment

Edgar Filing: TORTOISE PIPELINE & ENERGY FUND, INC. - Form N-30B-2

plan.

(6) Annualized for periods less than one full year.

(7) Represents value of total assets less all liabilities and indebtedness not represented by long-term debt obligations, short-term borrowings and preferred stock at the end of the period divided by long-term debt obligations and short-term borrowings outstanding at the end of the period.

(8) Represents value of total assets less all liabilities and indebtedness not represented by long-term debt obligations, short-term borrowings and preferred stock at the end of the period divided by long-term debt obligations, short-term borrowings and preferred stock outstanding at the end of the period.

Notes to Financial Statements (unaudited)

February 28, 2013

1. Organization

Tortoise Pipeline & Energy Fund, Inc. (the Company) was organized as a Maryland corporation on July 19, 2011, and is a non-diversified, closed-end management investment company under the Investment Company Act of 1940, as amended (the 1940 Act). The Company's primary investment objective is to provide a high level of total return, with an emphasis on current distributions. The Company seeks to provide its stockholders an efficient vehicle to invest in a portfolio consisting primarily of equity securities of pipeline and other energy infrastructure companies. The Company commenced operations on October 31, 2011. The Company's stock is listed on the New York Stock Exchange under the symbol TTP.

2. Significant accounting policies**A. Use of estimates**

The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amount of assets and liabilities, recognition of distribution income and disclosure of contingent assets and liabilities at the date of the financial statements. Actual results could differ from those estimates.

B. Investment valuation

The Company primarily owns securities that are listed on a securities exchange or over-the-counter market. The Company values those securities at their last sale price on that exchange or over-the-counter market on the valuation date. If the security is listed on more than one exchange, the Company uses the price from the exchange that it considers to be the principal exchange on which the security is traded. Securities listed on the NASDAQ will be valued at the NASDAQ Official Closing Price, which may not necessarily represent the last sale price. If there has been no sale on such exchange or over-the-counter market on such day, the security will be valued at the mean between the last bid price and last ask price on such day.

The Company may invest up to 30 percent of its total assets in unregistered or otherwise restricted securities. Restricted securities are subject to statutory or contractual restrictions on their public resale, which may make it more difficult to obtain a valuation and may limit the Company's ability to dispose of them. Investments in restricted securities and other securities for which market quotations are not readily available will be valued in good faith by using fair value procedures approved by the Board of Directors. Such fair value procedures consider factors such as discounts to publicly traded issues, time until conversion date, securities with similar yields, quality, type of issue, coupon, duration and rating. If events occur that will affect the value of the Company's portfolio securities before the net asset value has been calculated (a significant event), the portfolio securities so affected will generally be priced using fair value procedures.

An equity security of a publicly traded company acquired in a direct placement transaction may be subject to restrictions on resale that can affect the security's liquidity and fair value. Such securities that are convertible or otherwise will become freely tradable will be valued based on the market value of the freely tradable security less an applicable discount. Generally, the discount will initially be equal to the discount at which the Company purchased the securities. To the extent that such securities are convertible or otherwise become freely tradable within a time frame that may be reasonably determined, an amortization schedule may be used to determine the discount.

Exchange-traded options are valued at the mean of the highest bid and lowest asked prices across all option exchanges.

The Company generally values debt securities at prices based on market quotations for such securities, except those securities purchased with 60 days or less to maturity are valued on the basis of amortized cost, which approximates market value.

C. Security transactions and investment income

Security transactions are accounted for on the date the securities are purchased or sold (trade date). Realized gains and losses are reported on an identified cost basis. Interest income is recognized on the accrual basis, including amortization of premiums and accretion of discounts. Dividend and distribution income is recorded on the ex-dividend date. Distributions received from the Company's investments in master limited partnerships (MLPs) generally are comprised of ordinary income and return of capital from the MLPs. The Company allocates distributions between investment income and return of capital based on estimates made at the time such distributions are received. Such estimates are based on information provided by each MLP and other industry sources. These estimates may subsequently be revised based on actual allocations received from MLPs after their tax reporting periods are concluded, as the actual character of these distributions is not known until after the fiscal year end of the Company.

For the period from December 1, 2012 through February 28, 2013, the Company estimated the allocation of investment income and return of capital for the distributions received from MLPs within the Statement of Operations. For this period, the Company has estimated approximately 8 percent

as investment income and approximately 92 percent as return of capital.

In addition, the Company may be subject to withholding taxes on foreign-sourced income. The Company accrues such taxes when the related income is earned.

D. Foreign currency translation

For foreign currency, investments in foreign securities, and other assets and liabilities denominated in a foreign currency, the Company translates these amounts into U.S. dollars on the following basis: (i) market value of investment securities, assets and liabilities at the current rate of exchange on the valuation date, and (ii) purchases and sales of investment securities, income and expenses at the relevant rates of exchange on the respective dates of such transactions. The Company does not isolate that portion of gains and losses on investments that is due to changes in the foreign exchange rates from that which is due to changes in market prices of equity securities.

E. Distributions to stockholders

Distributions to common stockholders are recorded on the ex-dividend date. The Company intends to make quarterly cash distributions of its investment company taxable income to common stockholders. In addition, on an annual basis, the Company may distribute additional capital gains in the last calendar quarter if necessary to meet minimum distribution requirements and thus avoid being subject to excise taxes. The amount of any distributions will be determined by the Board of Directors. The character of distributions to common stockholders made during the year may differ from their ultimate

Tortoise Pipeline & Energy Fund, Inc.

www.tortoiseadvisors.com

Notes to Financial Statements (unaudited) (continued)

characterization for federal income tax purposes. Distributions paid to stockholders in excess of investment company taxable income and net realized gains will be treated as return of capital to stockholders.

For the year ended November 30, 2012, the Company's distributions to common stockholders for tax purposes were comprised of 21 percent ordinary income, 37 percent qualified dividend income, 22 percent long-term capital gain, and 20 percent return of capital. The tax character of distributions paid to common stockholders for the current year will be determined subsequent to November 30, 2013.

Distributions to mandatory redeemable preferred (MRP) stockholders are accrued daily and paid quarterly based on a fixed annual rate. The Company may not declare or pay distributions to its preferred stockholders if it does not meet a 200 percent asset coverage ratio for its debt or the rating agency basic maintenance amount for the debt following such distribution. The character of distributions to MRP stockholders made during the year may differ from their ultimate characterization for federal income tax purposes. Distributions paid to stockholders in excess of investment company taxable income and net realized gains will be treated as return of capital to stockholders.

F. Federal income taxation

The Company qualifies as a regulated investment company (RIC) under the U.S. Internal Revenue Code of 1986, as amended (the Code). As a result, the Company generally will not be subject to U.S. federal income tax on income and gains that it distributes each taxable year to stockholders if it meets certain minimum distribution requirements. The Company is required to distribute substantially all of its income, in addition to other asset diversification requirements. The Company is subject to a 4 percent non-deductible U.S. federal excise tax on certain undistributed income unless the Company makes sufficient distributions to satisfy the excise tax avoidance requirement. The Company invests in MLPs, which generally are treated as partnerships for federal income tax purposes. As a limited partner in the MLPs, the Company reports its allocable share of the MLP's taxable income in computing its own taxable income.

The Company recognizes the tax benefits of uncertain tax positions only when the position is more likely than not to be sustained upon examination by the tax authorities based on the technical merits of the tax position. The Company's policy is to record interest and penalties on uncertain tax positions as part of tax expense. The Company has reviewed all open tax years and major jurisdictions and concluded that there is no tax liability resulting from unrecognized tax benefits relating to uncertain income tax positions taken or expected to be taken on a tax return. All tax years since inception remain open to examination by federal and state tax authorities.

G. Offering and debt issuance costs

Offering costs related to the issuance of common stock are charged to additional paid-in capital when the stock is issued. Debt issuance costs related to long-term debt obligations and MRP Stock are capitalized and amortized over the period the debt and MRP Stock is outstanding.

H. Derivative financial instruments

The Company seeks to provide current income from gains earned through an option strategy which will normally consist of writing (selling) call options on selected equity securities in the portfolio (covered calls). The premium received on a written call option will initially be recorded as a liability and subsequently adjusted to the then current fair value of the option written. Premiums received from writing call options that expire unexercised will be recorded as a realized gain on the expiration date. Premiums received from writing call options that are exercised will be added to the proceeds from the sale of the underlying security to calculate the realized gain (loss). If a written call option is repurchased prior to its exercise, the realized gain (loss) will be the difference between the premium received and the amount paid to repurchase the option.

I. Indemnifications

Under the Company's organizational documents, its officers and directors are indemnified against certain liabilities arising out of the performance of their duties to the Company. In addition, in the normal course of business, the Company may enter into contracts that provide general indemnification to other parties. The Company's maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the Company that have not yet occurred, and may not occur. However, the Company has not had prior claims or losses pursuant to these contracts and expects the risk of loss to be remote.

J. Recent accounting pronouncements

In December 2011, the FASB issued ASU 2011-11 Balance Sheet (Topic 210) Disclosures about Offsetting Assets and Liabilities . ASU 2011-11 requires new disclosures for recognized financial instruments and derivative instruments that are either offset on the balance sheet in accordance with the offsetting guidance in ASC 210-20-45 or ASC 815-10-45 or are subject to an enforceable master netting arrangement or similar arrangement. ASU 2011-11 is effective for periods beginning on or after January 1, 2013 and must be applied retrospectively. Management is currently evaluating the impact of these amendments on the financial statements.

3. Concentration of risk

Under normal circumstances, the Company will have at least 80 percent of its total assets (including any assets obtained through leverage) in equity securities of pipeline and other energy infrastructure companies. Energy infrastructure companies own and operate a network of asset

Edgar Filing: TORTOISE PIPELINE & ENERGY FUND, INC. - Form N-30B-2

systems that transport, store, distribute, gather and/or process, explore, develop, manage or produce crude oil, refined petroleum products (including biodiesel and ethanol), natural gas or natural gas liquids (NGLs) or that provide electric power generation (including renewable energy), transmission and/or distribution. The Company may invest up to 30 percent of its total assets in restricted securities, primarily through direct investments in securities of listed companies. The Company may also invest up to 25 percent of its total assets in securities of MLPs. The Company will not invest in privately-held companies.

4. Agreements

The Company has entered into an Investment Advisory Agreement with the Adviser. Under the terms of the Agreement, the Company pays the Adviser a fee equal to an annual rate of 1.10 percent of the Company's average monthly total assets (including any assets attributable to leverage) minus accrued liabilities (other than debt entered into for purposes of leverage and the aggregate liquidation preference of outstanding preferred stock) (Managed Assets), in

Tortoise Pipeline & Energy Fund, Inc.

www.tortoiseadvisors.com

Notes to Financial Statements (unaudited) (continued)

exchange for the investment advisory services provided. The Adviser waived fees in an amount equal to an annual rate of 0.25 percent of the Company's average monthly Managed Assets for the period from the commencement of operations through December 31, 2012, and has contractually agreed to waive fees in an amount equal to an annual rate of 0.20 percent of average monthly Managed Assets for the period from January 1, 2013 through December 31, 2013 and 0.15 percent of average monthly Managed Assets for the period from January 1, 2014 through December 31, 2014.

U.S. Bancorp Fund Services, LLC serves as the Company's administrator. The Company pays the administrator a monthly fee computed at an annual rate of 0.04 percent of the first \$1,000,000,000 of the Company's Managed Assets, 0.01 percent on the next \$500,000,000 of Managed Assets and 0.005 percent on the balance of the Company's Managed Assets.

Computershare Trust Company, N.A. serves as the Company's transfer agent and registrar and Computershare Inc. serves as the Company's dividend paying agent and agent for the automatic dividend reinvestment plan.

U.S. Bank, N.A. serves as the Company's custodian. The Company pays the custodian a monthly fee computed at an annual rate of 0.004 percent of the average daily market value of the Company's domestic assets and 0.015 percent of the average daily market value of the Company's Canadian Dollar-denominated assets, plus portfolio transaction fees.

5. Income taxes

It is the Company's intention to continue to qualify as a regulated investment company under Subchapter M of the Internal Revenue Code and distribute all of its taxable income. Accordingly, no provision for federal income taxes is required in the financial statements.

The amount and character of income and capital gain distributions to be paid, if any, are determined in accordance with federal income tax regulations, which may differ from U.S. generally accepted accounting principles. These differences are primarily due to differences in the timing of recognition of gains or losses on investments. Permanent book and tax basis differences, if any, may result in reclassifications to undistributed net investment income (loss), undistributed net realized gain (loss) and additional paid-in capital.

As of November 30, 2012, the components of accumulated earnings on a tax basis were as follows:

Unrealized appreciation	\$ 18,371,609
Other temporary differences	(952,804)
Accumulated earnings	<u>\$ 17,418,805</u>

As of February 28, 2013, the aggregate cost of securities for federal income tax purposes was \$314,251,218. The aggregate gross unrealized appreciation for all securities in which there was an excess of fair value over tax cost was \$51,437,466, the aggregate gross unrealized depreciation for all securities in which there was an excess of tax cost over fair value was \$5,401,857 and the net unrealized appreciation was \$46,035,609.

6. Fair value of financial instruments

Various inputs are used in determining the value of the Company's investments. These inputs are summarized in the three broad levels listed below:

Level 1 quoted prices in active markets for identical investments

Level 2 other significant observable inputs (including quoted prices for similar investments, market corroborated inputs, etc.)

Level 3 significant unobservable inputs (including the Company's own assumptions in determining the fair value of investments)

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

The following table provides the fair value measurements of applicable Company assets and liabilities by level within the fair value hierarchy as of February 28, 2013. These assets and liabilities are measured on a recurring basis.

Description	Fair Value	Fair Value Hierarchy	
		Level 1	Level 2

Edgar Filing: TORTOISE PIPELINE & ENERGY FUND, INC. - Form N-30B-2

	at February 28, 2013			Level 3
Assets				
Equity Securities:				
Common Stock ^(a)	\$ 237,555,323	\$ 237,555,323	\$	\$
Master Limited Partnerships and Related Companies ^(a)	122,459,780	120,529,788	1,929,992	
Total Equity Securities	360,015,103	358,085,111	1,929,992	
Other:				
Short-Term Investment ^(b)	271,724	271,724		
Total Assets	\$ 360,286,827	\$ 358,356,835	\$ 1,929,992	\$
Liabilities				
Written Call Options	\$ 273,042	\$ 273,042	\$	\$

(a) All other industry classifications are identified in the Schedule of Investments.

(b) Short-term investment is a sweep investment for cash balances in the Company at February 28, 2013.

The Company did not hold any Level 3 securities during the period ended February 28, 2013.

Valuation techniques

In general, and where applicable, the Company uses readily available market quotations based upon the last updated sales price from the principal market to determine fair value. This pricing methodology applies to the Company's Level 1 investments and liabilities.

An equity security of a publicly traded company acquired in a private placement transaction without registration under the Securities Act of 1933, as amended (the "1933 Act"), is subject to restrictions on resale that can affect the security's fair value. If such a security is convertible into publicly-traded common shares, the security generally will be valued at the common share market price adjusted by a percentage discount due to the restrictions and categorized as Level 2 in the fair value hierarchy. If the security has characteristics that are dissimilar to the class of security that trades on the open market, the security will generally be valued and categorized as Level 3 in the fair value hierarchy.

The Company utilizes the beginning of reporting period method for determining transfers between levels. There were no transfers between levels during the period from December 1, 2012 through February 28, 2013.

Tortoise Pipeline & Energy Fund, Inc.

www.tortoiseadvisors.com

Notes to Financial Statements (unaudited) (continued)**7. Restricted security**

Certain of the Company's investments are restricted and are valued as determined in accordance with procedures established by the Board of Directors, as more fully described in Note 2. The table below shows the number of units held, acquisition date, acquisition cost, fair value, fair value per share and percent of net assets which the security comprises at February 28, 2013.

Investment Security	Number of Shares	Acquisition Date	Acquisition Cost	Fair Value	Fair Value Per Share	Fair Value as Percent of Net Assets
Inergy Midstream, L.P.						
Unregistered Common Units	83,333	12/7/12	\$1,749,993	\$1,929,992	\$23.16	0.7%

The carrying value per unit of unrestricted common units of Inergy Midstream, L.P. was \$23.10 on November 3, 2012, the date of the purchase agreement and the date an enforceable right to acquire the restricted Inergy Midstream, L.P. units was obtained by the Company.

8. Derivative financial instruments

The Company has adopted the disclosure provisions of FASB Accounting Standard Codification 815, Derivatives and Hedging (ASC 815). ASC 815 requires enhanced disclosures about the Company's use of and accounting for derivative instruments and the effect of derivative instruments on the Company's results of operations and financial position. Tabular disclosure regarding derivative fair value and gain/loss by contract type (e.g., interest rate contracts, foreign exchange contracts, credit contracts, etc.) is required and derivatives accounted for as hedging instruments under ASC 815 must be disclosed separately from those that do not qualify for hedge accounting. Even though the Company may use derivatives in an attempt to achieve an economic hedge, the Company's derivatives are not accounted for as hedging instruments under ASC 815 because investment companies account for their derivatives at fair value and record any changes in fair value in current period earnings.

Transactions in written option contracts for the period from December 1, 2012 through February 28, 2013, are as follows:

	Number of Contracts	Premium
Options outstanding at November 30, 2012	10,509	\$ 710,275
Options written	33,264	1,638,186
Options closed	(29,531)	(1,732,342)
Options exercised	(1,371)	(53,520)
Options expired	(2,302)	(42,024)
Options outstanding at February 28, 2013	10,569	\$ 520,575

The following table presents the types and fair value of derivatives by location as presented on the Statement of Assets and Liabilities at February 28, 2013:

Derivatives not accounted for as hedging instruments under ASC 815	Liabilities	
	Location	Fair Value
Written equity call options	Options written, at fair value	\$273,042

The following table presents the effect of derivatives on the Statement of Operations for the period ended February 28, 2013:

Derivatives not accounted for as hedging instruments under ASC 815	Location of Gains (Losses) on Derivatives	
	Net Realized Loss on Options	Net Unrealized Appreciation of Options

Written equity call options	\$(538,658)	\$60,571
-----------------------------	-------------	----------

9. Investment transactions

For the period from December 1, 2012 through February 28, 2013, the Company purchased (at cost) and sold securities (proceeds received) in the amount of \$20,484,090 and \$21,839,899 (excluding short-term debt securities), respectively.

10. Long-term debt obligations

The Company has \$49,000,000 aggregate principal amount of private senior notes, Series A, Series B, Series C, and Series D (collectively, the Notes), outstanding. The Notes are unsecured obligations of the Company and, upon liquidation, dissolution or winding up of the Company, will rank: (1) senior to all of the Company's outstanding preferred shares; (2) senior to all of the Company's outstanding common shares; (3) on parity with any unsecured creditors of the Company and any unsecured senior securities representing indebtedness of the Company and (4) junior to any secured creditors of the Company. Holders of the Notes are entitled to receive cash interest payments each quarter until maturity. The Series B, Series C and Series D Notes accrue interest at fixed rates and the Series A Notes accrue interest at an annual rate that resets each quarter based on the 3-month LIBOR plus 1.75 percent. The Notes are not listed on any exchange or automated quotation system.

The Notes are redeemable in certain circumstances at the option of the Company. The Notes are also subject to a mandatory redemption if the Company fails to meet asset coverage ratios required under the 1940 Act or the rating agency guidelines if such failure is not waived or cured. At February 28, 2013, the Company was in compliance with asset coverage covenants and basic maintenance covenants for its senior notes.

The estimated fair value of each series of fixed-rate Notes was calculated, for disclosure purposes, by discounting future cash flows by a rate equal to the current U.S. Treasury rate with an equivalent maturity date, plus either 1) the spread between the interest rate on recently issued debt and the U.S. Treasury rate with a similar maturity date or 2) if there has not been a recent debt issuance, the spread between the AAA corporate finance debt rate and the U.S. Treasury rate with an equivalent maturity date plus the spread between the fixed rates of the Notes and the AAA corporate finance debt rate. The estimated fair value of the Series A Notes approximates the carrying amount because the interest rate fluctuates with changes in interest rates available in the current market. The estimated fair values in the table below are Level 2 valuations within the fair value hierarchy. The following table shows the maturity date, interest rate, notional/carrying amount and estimated fair value for each series of Notes outstanding at February 28, 2013.

Tortoise Pipeline & Energy Fund, Inc.

www.tortoiseadvisors.com

Notes to Financial Statements (unaudited) (continued)

Series	Maturity Date	Interest Rate	Notional/Carrying Amount	Estimated Fair Value
Series A	December 15, 2016	2.06% ⁽¹⁾	\$ 10,000,000	\$ 10,000,000
Series B	December 15, 2014	2.50%	17,000,000	17,157,854
Series C	December 15, 2018	3.49%	6,000,000	6,204,206
Series D	December 15, 2021	4.08%	16,000,000	16,646,440
			\$ 49,000,000	\$ 50,008,500

(1) Floating rate; rate effective for period from December 15, 2012 through March 15, 2013. The weighted-average interest rate for the period from December 1, 2012 through February 28, 2013 was 2.07 percent.

11. Preferred stock

The Company has 10,000,000 shares of preferred stock authorized. Of that amount, the Company has 640,000 shares of Series A Mandatory Redeemable Preferred (MRP) Stock authorized and 640,000 shares are outstanding at February 28, 2013. The MRP Stock has a liquidation value of \$25.00 per share plus any accumulated but unpaid distributions, whether or not declared. Holders of the MRP Stock are entitled to receive cash interest payments each quarter at a fixed rate until maturity. The MRP Stock is not listed on any exchange or automated quotation system.

The MRP Stock has rights determined by the Board of Directors. Except as otherwise indicated in the Company's Charter or Bylaws, or as otherwise required by law, the holders of MRP Stock have voting rights equal to the holders of common stock (one vote per MRP share) and will vote together with the holders of shares of common stock as a single class except on matters affecting only the holders of preferred stock or the holders of common stock. The 1940 Act requires that the holders of any preferred stock (including MRP Stock), voting separately as a single class, have the right to elect at least two directors at all times.

The estimated fair value of MRP Stock was calculated, for disclosure purposes, by discounting future cash flows by a rate equal to the current U.S. Treasury rate with an equivalent maturity date, plus either 1) the spread between the interest rate on recently issued preferred stock and the U.S. Treasury rate with a similar maturity date or 2) if there has not been a recent preferred stock issuance, the spread between the AA corporate finance debt rate and the U.S. Treasury rate with an equivalent maturity date plus the spread between the fixed rates of the MRP Stock and the AA corporate finance debt rate. The estimated fair value in the table below is a Level 2 valuation within the fair value hierarchy. The following table shows the mandatory redemption date, fixed rate, number of shares outstanding, aggregate liquidation preference and estimated fair value as of February 28, 2013.

Series	Mandatory Redemption Date	Fixed Rate	Shares Outstanding	Aggregate Liquidation Preference	Estimated Fair Value
Series A	December 15, 2018	4.29%	640,000	\$16,000,000	\$16,561,345

The MRP Stock is redeemable in certain circumstances at the option of the Company. Under the Investment Company Act of 1940, the Company may not declare dividends or make other distributions on shares of common stock or purchases of such shares if, at the time of the declaration, distribution or purchase, asset coverage with respect to the outstanding MRP Stock would be less than 200 percent. The MRP Stock is also subject to a mandatory redemption if the Company fails to meet an asset coverage ratio of at least 225 percent as determined in accordance with the 1940 Act or a rating agency basic maintenance amount if such failure is not waived or cured. At February 28, 2013, the Company was in compliance with asset coverage covenants and basic maintenance covenants for its MRP Stock.

12. Credit facility

As of February 28, 2013, the Company had an unsecured credit facility that matures on June 17, 2013. The Bank of Nova Scotia serves as a lender and the lending syndicate agent on behalf of other lenders participating in the facility. Outstanding balances generally will accrue interest at a variable annual rate equal to one-month LIBOR plus 1.25 percent and unused portions of the credit facility will accrue a non-usage fee equal to an annual rate of 0.20 percent.

The average principal balance and interest rate for the period during which the credit facility was utilized during the period ended February 28, 2013 was approximately \$17,300,000 and 1.46 percent, respectively. At February 28, 2013, the principal balance outstanding was \$14,700,000 at an interest rate of 1.45 percent.

Under the terms of the credit facility, the Company must maintain asset coverage required under the 1940 Act. If the Company fails to maintain the required coverage, it may be required to repay a portion of an outstanding balance until the coverage requirement has been met. At February 28,

2013, the Company was in compliance with the terms of the credit facility.

13. Common stock

The Company has 100,000,000 shares of capital stock authorized and 10,004,200 shares outstanding at February 28, 2013 and November 30, 2012.

14. Subsequent events

On March 1, 2013, the Company paid a distribution in the amount of \$0.4075 per common share, for a total of \$4,076,711. Of this total, the dividend reinvestment amounted to \$376,176.

The Company has performed an evaluation of subsequent events through the date the financial statements were issued and has determined that no additional items require recognition or disclosure.

Tortoise Pipeline & Energy Fund, Inc.

www.tortoiseadvisors.com

Additional Information (unaudited)**Director and officer compensation**

The Company does not compensate any of its directors who are interested persons, as defined in Section 2(a)(19) of the 1940 Act, nor any of its officers. For the period ended February 28, 2013, the aggregate compensation paid by the Company to the independent directors was \$15,750. The Company did not pay any special compensation to any of its directors or officers.

Forward-looking statements

This report contains forward-looking statements within the meaning of the Securities Act of 1933 and the Securities Exchange Act of 1934. By their nature, all forward-looking statements involve risks and uncertainties, and actual results could differ materially from those contemplated by the forward-looking statements. Several factors that could materially affect the Company's actual results are the performance of the portfolio of investments held by it, the conditions in the U.S. and international financial, petroleum and other markets, the price at which shares of the Company will trade in the public markets and other factors discussed in filings with the SEC.

Proxy voting policies

A description of the policies and procedures that the Company uses to determine how to vote proxies relating to portfolio securities owned by the Company and information regarding how the Company voted proxies relating to the portfolio of securities during the 12-month period ended June 30, 2012 are available to stockholders (i) without charge, upon request by calling the Company at (913) 981-1020 or toll-free at (866) 362-9331 and on the Company's Web site at www.tortoiseadvisors.com; and (ii) on the SEC's Web site at www.sec.gov.

Form N-Q

The Company files its complete schedule of portfolio holdings for the first and third quarters of each fiscal year with the SEC on Form N-Q. The Company's Form N-Q is available without charge upon request by calling the Company at (866) 362-9331 or by visiting the SEC's Web site at www.sec.gov. In addition, you may review and copy the Company's Form N-Q at the SEC's Public Reference Room in Washington D.C. You may obtain information on the operation of the Public Reference Room by calling (800) SEC-0330.

The Company's Form N-Qs are also available on the Company's Web site at www.tortoiseadvisors.com.

Statement of additional information

The Statement of Additional Information (SAI) includes additional information about the Company's directors and is available upon request without charge by calling the Company at (866) 362-9331 or by visiting the SEC's Web site at www.sec.gov.

Certifications

The Company's Chief Executive Officer submitted to the New York Stock Exchange the annual CEO certification in 2012 as required by Section 303A.12(a) of the NYSE Listed Company Manual.

The Company has filed with the SEC, as an exhibit to its most recently filed Form N-CSR, the certification of its Chief Executive Officer and Chief Financial Officer required by Section 302 of the Sarbanes-Oxley Act.

Privacy policy

In order to conduct its business, the Company collects and maintains certain nonpublic personal information about its stockholders of record with respect to their transactions in shares of the Company's securities. This information includes the stockholder's address, tax identification or Social Security number, share balances, and distribution elections. We do not collect or maintain personal information about stockholders whose share balances of our securities are held in street name by a financial institution such as a bank or broker.

We do not disclose any nonpublic personal information about you, the Company's other stockholders or the Company's former stockholders to third parties unless necessary to process a transaction, service an account, or as otherwise permitted by law.

To protect your personal information internally, we restrict access to nonpublic personal information about the Company's stockholders to those employees who need to know that information to provide services to our stockholders. We also maintain certain other safeguards to protect your nonpublic personal information.
