- Pre-commencement communications pursuant to Rule 14d-2(b) under the Exchange Act (17 CFR 240.14d-2(b))
- Pre-commencement communications pursuant to Rule 13e-4(c) under the Exchange Act (17 CFR 240.13e-4(c))

## Edgar Filing: RESEARCH FRONTIERS INC - Form 8-K

### Item 7.01 Regulation FD Disclosure

**Las Vegas, NV January 7, 2016.** Research Frontiers (Nasdaq: REFR) confirmed today that Continental Corporation, one of the world's top five automotive suppliers, is showcasing its Intelligent Glass Control system on a demonstration vehicle at a special event at the Consumer Electronics Show (CES) in Las Vegas from January 6-9, 2016. This vehicle, a Ford Mondeo station wagon, uses Research Frontiers' patented SPD-SmartGlass technology to enable the glass in all eleven side and rear windows and in the top sunvisor portion of the windshield to change its transparency and darken instantly through electric control signals. This increases passenger comfort, energy efficiency, safety and security.

Joseph M. Harary, President and CEO of Research Frontiers, the company which invented SPD-SmartGlass technology and has licensed it throughout the world for use in the automotive, aircraft, architectural, marine and museum industries noted: "Here at CES we are seeing a heightened presence of smart homes, and now with Continental's Intelligent Glass Control system, truly smart vehicles using SPD-SmartGlass."

Continental indicated that its Intelligent Glass Control system increases passenger comfort and lowers CO2 emissions by keeping the interior of the vehicle cooler. As a result, smaller, more efficient and lighter air conditioning units could be used. Calculations showed a reduction in CO2 emissions of four grams per kilometer. Continental also estimates that their Intelligent Glass Control system can increase the driving range of electric vehicles by 5.5%. When compared to conventional automotive glass, Mercedes-Benz reported that the use of SPD-SmartGlass significantly reduces the temperature inside the vehicle by up to 18°F/10°C.

Continental also highlighted the safety benefits of its Intelligent Glass Control system in typical driving situations such as when the sun is low on the horizon. Normally the driver's hand instinctively goes from the steering wheel to the sun visor, resulting in both impaired visibility and a brief decrease in control of the vehicle. Continental's Intelligent Glass Control system can detect this in advance and darken the car windows automatically before the event even occurs.

Continental's Intelligent Glass Control system also enhances security and privacy. For example, when the vehicle is parked, the windows darken automatically so the inside of the vehicle cannot be seen from the outside. This also protects the interior of vehicles and their occupants from heat, light and UV radiation.

Continental noted that up until now, this kind of variable tinting technology has only been available in the roof area of high-end cars, such as Mercedes-Benz's Magic Sky Control system offered on the SLK and SL roadsters, the S-Class Coupe, the Maybach, and most recently the popular S-Class sedan. Now, Continental says it is ready to be used on all windows in a vehicle.

Details are noted in the press release attached as Exhibit 99.1 to this Current Report on Form 8-K and incorporated herein by reference. The Research Frontiers press release is also available on the Company's website at [www.SmartGlass.com](http://www.SmartGlass.com) and at various other places on the internet.

This report and the press releases referred to herein may include statements that may constitute "forward-looking" statements as referenced in the Private Securities Litigation Reform Act of 1995. Those statements usually contain words such as "believe", "estimate", "project", "intend", "expect", or similar expressions. Any forward-looking statements are made by the Company in good faith, pursuant to the safe-harbor provisions of the Act. These forward-looking statements reflect management's current views and projections regarding economic conditions, industry environments and Company performance. Factors, which could significantly change results, include but are not limited to: sales performance, expense levels, competitive activity, interest rates, changes in the Company's financial condition and several business factors. Additional information regarding these and other factors may be included in the Company's quarterly 10-Q and 10K filings and other public documents, copies of which are available from the Company on request. By making these forward-looking statements, the Company undertakes no obligation to update these statements for revisions or changes after the date of this report.

The information in this Form 8-K or the press release reproduced herein shall not be deemed "filed" for purposes of Section 18 of the Securities Exchange Act of 1934, nor shall they be deemed incorporated by reference in any filing under the Securities Act of 1933, except as shall be expressly set forth by specific reference in such filing.
