Notes to Annual Financial Statements

(Expressed in U.S. Dollars)

(Unaudited)

**1.**

**Nature of Operations**

American Lithium Minerals, Inc. (the Company) was originally organized as Nugget Resources Inc. under the laws of the State of Nevada on March 10, 2005. The Company has been investigating prospective lithium opportunities. On March 2, 2009, the Company changed its name to American Lithium Minerals, Inc. to better reflect the direction of the Company. The Company is an exploration stage enterprise, as defined in FASB ASC 915-10 *Development Stage Entities*. The Company is devoting all of its present efforts to securing and establishing a new business and its planned principal operations have not commenced. Accordingly, no revenue has been derived during the organization period.

**Going Concern**

The Company's financial statements as at March 31, 2010 have been prepared on a going concern basis, which contemplates the realization of assets and the settlement of liabilities and commitments in the normal course of business. The Company has a net loss for the six months ended March 31, 2010 and 2009 of \$4,945,603 and \$27,243, respectively.

Management cannot provide assurance that the Company will ultimately achieve profitable operations or become cash flow positive, or raise additional debt and/or equity capital. Management intends to raise additional funding in the form of equity financing from the sale of common stock and/or obtain short-term loans from the directors of the Company. However, if the Company is unable to raise additional capital in the near future, due to the Company's liquidity problems, management expects that the Company will need to curtail operations, liquidate assets, seek additional capital on less favourable terms and/or pursue other remedial measures. These financial statements do not include any adjustments related to the recoverability and classification of assets or the amounts and classification of liabilities that might be necessary should the Company be unable to continue as a going concern.

At March 31, 2010, the Company had suffered losses from exploration stage activities to date. Although management is currently attempting to implement its business plan, and is seeking additional sources of equity or debt financing, there is no assurance these activities will be successful. Accordingly, the Company must rely on its president to perform essential functions with minimal compensation until a business operation can be commenced. These factors raise substantial doubt about the ability of the Company to continue as a going concern.

**Nature of Operations (continued)**

**Unaudited Financial Statements**

The accompanying unaudited financial statements have been prepared in accordance with generally accepted accounting principles for financial information and with the instructions to Form 10-Q. They do not include all information and footnotes required by United States generally accepted accounting principles for complete financial statements. However, except as disclosed herein, there have been no material changes in the information disclosed in the notes to the financial statements for the year ended September 30, 2009 included in the Company's Annual Report on Form 10-K filed with the Securities and Exchange Commission. The unaudited financial statements should be read in conjunction with those financial statements included in the Form 10-K. In the opinion of Management, all adjustments considered necessary for a fair presentation, consisting solely of normal recurring adjustments, have been made. Operating results for the six months ended March 31, 2010 are not necessarily indicative of the results that may be expected for the year ending September 30, 2010.

**2.**

**Significant Accounting Policies**

The following is a summary of significant accounting policies used in the preparation of these financial statements.

**Basis of presentation**

The financial statements of the Company have been prepared in accordance with accounting principles generally accepted in the United States of America applicable to exploration stage enterprises, and are expressed in U.S. dollars. The Company's fiscal year end is 30 September.

### **Cash and cash equivalents**

Cash and cash equivalents include highly liquid investments with original maturities of three months or less.

### **Mineral property costs**

The Company has been in the exploration stage since its formation March 10, 2005 and has not yet realized any revenues from its planned operations. It is primarily engaged in the acquisition and exploration of mining properties. Mineral property acquisition and exploration costs are charged to operations as incurred. When it has been determined that a mineral property can be economically developed as a result of establishing proven and probable reserves, the costs incurred to develop such property, are capitalized. Such costs will be depleted using the units-of-production method over the estimated life of the probable reserve.

Although the Company has taken steps to verify title to mineral properties in which it has an interest, according to the usual industry standards for the stage of exploration of such properties, these procedures do not guarantee the Company's title. Such properties may be subject to prior agreements or transfers and title may be affected by undetected defects.

**2.**

**Significant Accounting Policies (continued)**

**Financial instruments**

The carrying value of cash, accounts payable and accrued liabilities, and due to related parties approximates their fair value because of the short maturity of these instruments. The Company's operations are in Canada and virtually all of its assets and liabilities are giving rise to significant exposure to market risks from changes in foreign currency rates. The Company's financial risk is the risk that arises from fluctuations in foreign exchange rates and the degree of volatility of these rates. Currently, the Company does not use derivative instruments to reduce its exposure to foreign currency risk.

**Environmental expenditures**

The operations of the Company have been, and may in the future, be affected from time to time, in varying degrees, by changes in environmental regulations, including those for future reclamation and site restoration costs. Both the likelihood of new regulations and their overall effect upon the Company vary greatly and are not predictable. The Company's policy is to meet or, if possible, surpass standards set by relevant legislation, by application of technically proven and economically feasible measures.

Environmental expenditures that relate to ongoing environmental and reclamation programs are charged against earnings as incurred or capitalized and amortized depending on their future economic benefits. Estimated future

reclamation and site restoration costs, when the ultimate liability is reasonably determinable, are charged against earnings over the estimated remaining life of the related business operation, net of expected recoveries.

### **Fixed Assets**

The Company's fixed assets consists of computer equipment which is valued at cost and depreciated using straight line method over a period of three years.

### **Income taxes**

Deferred income taxes are reported for timing differences between items of income or expense reported in the financial statements and those reported for income tax purposes in accordance with FASB ASC 740-10, which requires the use of the asset/liability method of accounting for income taxes. Deferred income taxes and tax benefits are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases, and for tax loss and credit carry-forwards.

Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The Company provides for deferred taxes for the estimated future tax effects attributable to temporary differences and carry-forwards when realization is more likely than not.

(Expressed in U.S. Dollars)

**2.**

**Significant Accounting Policies (continued)**

**Basic and diluted net loss per share**

The Company computes net loss per share in accordance with FASB ASC 205-10, which requires presentation of both basic and diluted earnings per share ( EPS ) on the face of the income statement. Basic EPS is computed by dividing net loss available to common shareholders (numerator) by the weighted average number of shares outstanding (denominator) during the period. Diluted EPS gives effect to all potentially dilutive common shares outstanding during the period. In computing diluted EPS, the average stock price for the period is used in determining the number of shares assumed to be purchased from the exercise of stock options or warrants. Diluted EPS excludes all potentially dilutive shares if their effect is anti-dilutive and is not presented in the accompanying financial statements.

**Use of estimates**

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenditures during the reporting period. Actual results could differ from these estimates.

**Concentrations of credit risk**

The Company's financial instruments that are exposed to concentrations of credit risk primarily consist of its cash.

The Company places its cash and cash equivalents with financial institutions of high credit worthiness. At times, its cash and cash equivalents with a particular financial institution may exceed any applicable government insurance limits. The Company's management also routinely assesses the financial strength and credit worthiness of any parties to which it extends funds and as such, it believes that any associated credit risk exposures are limited.

### **Stock based compensation**

On August 1, 2009, the Company adopted the fair value recognition provisions of FASB ASC 718-10. The Company adopted FASB ASC 718-10 using the modified-prospective-transition method. Under this method, compensation cost recognized for the year ended September 30, 2009 includes: a) compensation cost for all share-based payments granted prior to, but not yet vested as of December 31, 2005, based on the grant-date fair value estimated in accordance with the original provisions of FASB ASC 718-10, and b) compensation cost for all share-based payments granted subsequent to December 31, 2005, based on the grant-date fair value estimated in accordance with the provisions of FASB ASC 718-10. In addition, deferred stock compensation related to non-vested options is required to be eliminated against additional paid-in capital upon adoption of FASB ASC 718-10. The results for the prior periods were not restated.

**Significant Accounting Policies (continued)**

The Company accounts for equity instruments issued in exchange for the receipt of goods or services from other than employees in accordance with FASB ASC 718-10 and the conclusions reached in FASB ASC 505-10. Costs are measured at the estimated fair market value of the consideration received or the estimated fair value of the equity instruments issued, whichever is more reliably measurable. The value of equity instruments issued for consideration other than employee services is determined on the earliest of a performance commitment or completion of performance by the provider of goods or services as defined by FASB ASC 505-10.

**Risks and uncertainties**

The Company operates in the resource exploration industry that is subject to significant risks and uncertainties, including financial, operational, technological, and other risks associated with operating a resource exploration business, including the potential risk of business failure.

**3.**

**Fixed Assets**

The Company's fixed asset consist of computer equipment which is valued at cost and depreciated using the straight line method over a period of three years as follows:

## **Forward-Looking Statements**

This Form 10-Q includes "*forward-looking statements*" within the meaning of the "*safe-harbor*" provisions of the *Private Securities Litigation Reform Act of 1995*. Such statements are based on management's current expectations and are subject to a number of factors and uncertainties that could cause actual results to differ materially from those described in the forward-looking statements.

All statements other than historical facts included in this Form, including without limitation, statements under "*Plan of Operation*", regarding our financial position, business strategy, and plans and objectives of management for the future operations, are forward-looking statements.

Although we believe that the expectations reflected in such forward-looking statements are reasonable, it can give no assurance that such expectations will prove to have been correct. Important factors that could cause actual results to differ materially from our expectations include, but are not limited to, market conditions, competition and the ability to successfully complete financing.

## **Item 2.**

### **Management's Discussion and Analysis of Financial Condition and**

### **Results of Operations**

#### **Plan of Operation**

Our plan of operation for the twelve months following the date of this report is to carry out exploration work on our two recently acquired properties located in Esmeralda County, Nevada and to continue to review other potential acquisitions in the resource and non-resource sectors. During the next 12 months we have committed to expend an aggregate of \$300,000 in exploration work on the two properties.

As well, we anticipate spending an additional \$400,000 on administrative fees, including fees we will incur in complying with reporting obligations. Total expenditures over the next 12 months are therefore expected to be \$700,000.

As of March 31, 2010 we had a working capital of \$452,212, compared to a working capital of \$1,153,480 as at September 30, 2009.

We currently have sufficient funds on hand to cover our anticipated expenses for the next 9 months. We anticipate that additional funding will be required in the future in the form of equity financing from the sale of our common stock or from director loans. However, we do not have any arrangements in place for any future equity financing.

We do not have any off-balance sheet arrangements that have or are reasonably likely to have a current or future effect on the small business issuer's financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources that are material to investors.

#### **Results of Operations for Period Ending March 31, 2010**

We did not earn any revenues during the six-month periods ended March 31, 2010 or March 31, 2009. We incurred total operating expenses of \$4,947,930 during the six months ended March 31, 2010, compared to \$27,243 during the six months ended March 31, 2009, consisting of general and administrative expenses, legal and accounting fees, consulting fees, management fees, promotion and shareholder relations and stock based compensation. At March 31, 2010, we had total assets of

\$3,521,044, compared to \$1,701,367 as at September 30, 2009. As of March 31, 2010 we had total liabilities of \$85,722, compared to \$79,232 as at September 30, 2009.

For the six months ended December 31, 2009, general and administrative expenses were \$126,238 (\$21,243 March 31, 2009), consulting fees were \$179,919 (\$Nil March 31, 2009), legal and accounting were \$37,983 (\$Nil March 31, 2009), management fees were \$56,000 (\$6,000 March 31, 2009), promotion and shareholder relations was \$84,000 (\$Nil March 31, 2009), and stock based compensation was \$4,463,790 (\$Nil March 31, 2009). For the period from inception on March 10, 2005 through March 31, 2010, general and administrative expenses were \$225,465, consulting fees were \$179,919, legal and accounting were \$119,914, management fees were \$104,000, promotion and shareholder relations were \$84,000, rent expense was \$7,600, stock based compensation was \$4,529,450, and mineral property expenditures were \$9,000.

Our expenses increased by \$4,920,687 during the six months ended March 31, 2010, compared to the six months ended March 31, 2009, largely due to stock based compensation of \$4,463,790 incurred during the six months ended March 31, 2010 (\$Nil March 31, 2009). General and administrative expenses, consulting fees, management fees, promotion and shareholder relations, and legal and accounting fees were considerably higher in fiscal 2010 due to increased activity related to our recent acquisition of two mineral properties and two recently completed private placements.

During the six months ended March 31, 2010, we incurred a net loss of \$4,945,603, which resulted in an accumulated deficit of \$5,247,528.

We have not attained profitable operations and are dependent upon obtaining financing to pursue exploration activities. For these reasons our auditors believe that there is substantial doubt that we will be able to continue as a going concern.

## **Liquidity and Capital Resources**

We had cash and cash equivalents of \$477,925 as of March 31, 2010, compared to cash and cash equivalents of \$1,232,712 at September 30, 2009. During the six months ended March 31, 2010, we raised an aggregate of \$1,000,000 by the issuance of 740,740 units at a price of \$1.35 per unit by way of a private placement. Each unit consists of one common share in the capital and one and one-half non-transferable common share purchase warrant. Each whole common share purchase warrant entitles the holder thereof to purchase one share of common stock, exercisable for a period of twenty four months, at an exercise price of \$1.50 per share.

During the six months ended March 31, 2010 we recorded a subscriptions receivable of \$765,000 from the exercise of 900,000 stock options at a price of \$0.85 per share and \$30,000 from the exercise of 50,000 stock options at a price of \$0.60 per share.

We expect to run at a loss for at least the next twelve months. We have no agreements for additional financing and cannot provide any assurance that additional funding will be available to finance our operations on acceptable terms in order to enable us to complete our plan of operations. There are no assurances that we will be able to achieve further sales of our common stock or any other form of additional financing. If we are unable to achieve the financing necessary to continue our plan of operations, then we will not be able to continue our exploration of our mineral claims and our venture will fail.

**Off-Balance Sheet Arrangements**

We have no off-balance sheet arrangements that have or are reasonably likely to have a current or future effect on our financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources that is material to our stockholders.

**Quantitative and Qualitative Disclosures About Market Risk**

We are a smaller reporting company as defined by Rule 12b-2 of the *Securities Exchange Act of 1934* and are not required to provide the information under this item.

**Item 4.**

**Controls and Procedures**

(a)

*Evaluation of disclosure controls and procedures*

Based upon an evaluation of the effectiveness of our disclosure controls and procedures performed by our management, with participation of our Chief Executive Officer and our Chief Financial Officer as of the end of the period covered by this report, our Chief Executive Officer and our Chief Financial Officer concluded that our disclosure controls and procedures were not effective as a result of a weakness in the design of our internal control over financial reporting.

As used herein, *disclosure controls and procedures* mean controls and other procedures of our company that are designed to ensure that information required to be disclosed by us in the reports that we file or submit under the Securities Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the Commission's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by us in the reports that we file or submit under the Securities Exchange Act is accumulated and communicated to our management, including our principal executive and principal financial officers, or persons performing similar functions, as appropriate to allow timely decisions regarding required disclosure.

(b)

*Management's Report on Internal Control over Financial Reporting*

Management is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Exchange Act Rule 13a-15(f) under the *Securities Exchange Act of 1934*. Under the supervision and with the participation of our Chief Executive Officer and our Chief Financial Officer, we conducted an evaluation of the effectiveness of our control over financial reporting based on the framework in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission ( *COSO* ). Based on our evaluation under the framework, management has concluded that our internal control over financial reporting was not effective as of March 31, 2010 due to a contravention of Section 402 of the *Sarbanes-Oxley Act*.

(c)

*Changes in Internal Control over Financial Reporting*

During the quarter covered by this report it was revealed that a loan was given to a senior officer in December, which is in contravention of Section 402 of the Sarbanes-Oxley Act. The Board of Directors have now educated themselves as to the requirements under Section 402 and the internal controls have been revised to provide that no loans are made to directors or senior officers in the future, as well as a requirement to have prior approval of the Board of Directors for any transactions involving directors and/or senior officers is now required.

**PART II- OTHER INFORMATION**

We are a smaller reporting company as defined by Rule 12b-2 of the Exchange Act and are not required to provide the information required under this item.

**Item 2.**

**Unregistered Sales of Equity Securities and Use of Proceeds**

During the six months ended March 31, 2010 we issued 740,740 units at a price of \$1.35 per unit by way of a private placement, raising gross proceeds of \$1,000,000. Each unit consists of one common share in the capital and one and one-half non-transferable common share purchase warrant. Each whole common share purchase warrant entitles the holder thereof to purchase one share of common stock, exercisable for a period of twenty four months, at an exercise price of \$1.50 per share. We issued all of the securities to three non-U.S. persons (as that term is defined in Regulation S of the *Securities Act of 1933*), in an offshore transaction relying on Regulation S of the *Securities Act of 1933*.

During the six months ended March 31, 2010, we issued a total of 1,700,000 shares of our common stock to four U.S. persons, relying on Section 4(2) of the *Securities Act of 1933* pursuant to our acquisition of two mineral properties.

During the six months ended March 31, 2010, we granted stock options to two senior officers pursuant to our 2009 Stock Plan, to purchase up to an aggregate of 1,325,000 shares of our common stock at an exercise price of \$0.85 per share, exercisable until March 4, 2015. We issued the stock options to two non-U.S. persons (as that term is defined in Regulation S of the *Securities Act of 1933*), in an offshore transaction relying on Regulation S and/or Section 4(2) of the *Securities Act of 1933*.

We did not issue any securities during the quarter ended March 31, 2010.
