Yes No

Petrobras begins test phase production in deep waters of the Espírito Santo basin

(Rio de Janeiro, February 15, 2006). PETRÓLEO BRASILEIRO S/A - PETROBRAS, [Bovespa: PETR3/PETR4, NYSE: PBR/PBRA, Latibex: XPBR/XPBRA], a Brazilian international energy company, announces that the FPSO Seillean has begun operations in the Golfinho Field in the Espírito Santo Basin with a production of 21,000 bpd, currently in test phase and for the purpose of evaluating reservoir behavior.

The Seillean will operate in the pilot phase of production from the Golfinho Field where the FPSO's Capixaba and Cidade de Vitória are to be sited in the first half of 2006 and the first half of 2007, respectively. Both units have capacities to process 100,000 bpd.

Initial output in the Golfinho Field produces 28.5° API light oil. Start-up of these operations is particularly significant since it represents the first production of oil in deep waters outside the Campos Basin.

FORWARD-LOOKING STATEMENTS

This press release may contain forward-looking statements. These statements are statements that are not historical facts, and are based on management's current view and estimates of future economic circumstances, industry conditions, company performance and financial results. The words "anticipates", "believes", "estimates", "expects", "plans" and similar expressions, as they relate to the company, are intended to identify forward-looking statements. Statements regarding the declaration or payment of dividends, the implementation of principal operating and financing strategies and capital expenditure plans, the direction of future operations and the factors or trends affecting financial condition, liquidity or results of operations are examples of forward-looking statements. Such statements reflect the current views of management and are subject to a number of risks and uncertainties. There is no guarantee that the expected events, trends or results will actually occur. The statements are based on many assumptions and factors, including general economic and market conditions, industry conditions, and operating factors. Any changes in such assumptions or factors could cause actual results to differ materially from current expectations.
