### **Start up of the pre-salt oil refining**

Rio de Janeiro, July 02, 2009 PETRÓLEO BRASILEIRO S/A - PETROBRAS, informs that, on June 30, it started up at Capuava Refinery (Recap) the refining of the first oil from Tupi field, located at the pre-salt area of Santos Basin.

The oil, offloaded from Tupi Extend Well Test (EWT) production system, presented the following characteristics: gravity of 28.5° API, low sulfur and low acidity.

The start of this process will be relevant to evaluate the quality and potentiality of the oil products produced using the pre-salt oil.

## FORWARD-LOOKING STATEMENTS

This press release may contain forward-looking statements. These statements are statements that are not historical facts, and are based on management's current view and estimates of future economic circumstances, industry conditions, company performance and financial results. The words "anticipates", "believes", "estimates", "expects", "plans" and similar expressions, as they relate to the company, are intended to identify forward-looking statements. Statements regarding the declaration or payment of dividends, the implementation of principal operating and financing strategies and capital expenditure plans, the direction of future operations and the factors or trends affecting financial condition, liquidity or results of operations are examples of forward-looking statements. Such statements reflect the current views of management and are subject to a number of risks and uncertainties. There is no guarantee that the expected events, trends or results will actually occur. The statements are based on many assumptions and factors, including general economic and market conditions, industry conditions, and operating factors. Any changes in such assumptions or factors could cause actual results to differ materially from current expectations.
