## Lula Pilot Project confirms high productivity of pre-salt

Rio de Janeiro, July 7, 2011 – Petróleo Brasileiro S.A. - Petrobras announces that well 9-RJS-660, located in Lula field, registered the Company's highest volume of production for May, reaching an average production of 28,436 barrels of oil per day (bpd). This well is the first to produce on a commercial basis in the Santos Basin pre-salt.

This result confirms the high potential of Brazil's pre-salt reservoirs, and, if we consider oil and natural gas production, the volume reached 36,322 barrels of oil equivalent per day (boed).

The well is interconnected to FPSO Cidade de Angra dos Reis and is the first of six production wells to be connected to the FPSO. Besides this well, a gas injection well is already connected to the platform, which, since the beginning of April 2011, reinjects produced gas into the reservoir through 9-RJS-660. Two injection wells are also planned, of which one will be of water, and the other will alternate injection of water and gas.

The FPSO Cidade de Angra dos Reis is expected to be producing around 100 thousand bpd throughout 2012.

The consortium developing the production in block BMS-11, where Lula field is located, is composed of Petrobras, which is the operator, with a 65% stake, BG Group, with 25%, and Galp Energia, with 10%.

## FORWARD-LOOKING STATEMENTS

This press release may contain forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended (Securities Act), and Section 21E of the Securities Exchange Act of 1934, as amended (Exchange Act) that are not based on historical facts and are not assurances of future results. These forward-looking statements are based on management's current view and estimates of future economic circumstances, industry conditions, company performance and financial results. The words "anticipates", "believes", "estimates", "expects", "plans" and similar expressions, as they relate to the company, are intended to identify forward-looking statements. Statements regarding the declaration or payment of dividends, the implementation of principal operating and financing strategies and capital expenditure plans, the direction of future operations and the factors or trends affecting financial condition, liquidity or results of operations are examples of forward-looking statements. Such statements reflect the current views of management and are subject to a number of risks and uncertainties. There is no guarantee that the expected events, trends or results will actually occur. The statements are based on many assumptions and factors, including general economic and market conditions, industry conditions, and operating factors. Any changes in such assumptions or factors could cause actual results to differ materially from current expectations.

All forward-looking statements are expressly qualified in their entirety by this cautionary statement, and you should not place reliance on any forward-looking statement contained in this press release. We undertake no obligation to publicly update or revise any forward-looking statements, whether as a result of new information or future events or for any other reason.
