Economic Scenario

The global economy has been posting moderate and uneven growth, with the developed countries continuing to make gradual progress and the emerging nations recording a slowdown. The International Monetary Fund (IMF) estimates global GDP growth of 3.3% in 2015, and 3.8% in 2016.

In the United States, the FED's monetary policy has contributed to the recovery of economic activity, with an increase in business and consumer confidence. In 2Q15, the economy advanced 2.3% at an annual rate, reflecting the increase of 2.9% in the personal consumer expenditure. Unemployment continues to decline, falling from 5.6% at the end of last year to 5.3% in June 2015, its lowest level in the last seven years. The upturn in the economy reinforces the expectations of an increase in interest rates before the end of the year.

In the Eurozone, the indicators are signaling a slight recovery of activity, albeit in a disparate manner. The compound Purchasing Managers Index (PMI) increased from 50.6 points in December/2014 to 54.2 points in June/2015. Unemployment in the Eurozone as a whole has remained virtually flat in 2015 at around 11%, although it reached 25% in Greece in April, the bloc's highest figure.

As for the emerging countries, the measures introduced by the Chinese government to stimulate the economy, including interest rate cuts and a reduction in reserve requirements, helped maintain the pace of growth in 2Q15, when GDP recorded a year-on-year expansion of 7%, within the government's growth target.

In Brazil, the scenario remains challenging, with high inflation and low growth, creating more difficulties for the monetary and fiscal policy makers. The IBC-Br, the Central Bank's economic activity index, recorded a 2.64% downturn through May. According to IBGE, the industrial production shrank 6.3% in the 1H15.

The Caged (General Employment and Unemployment Register) indicated a deterioration in the job market. In June, 111,000 jobs were eliminated, the first negative June result since the series began in 1998.

The IPCA consumer price index moved up by 8.89% in the 12 months through June, above the ceiling of the inflationary target. The Focus Report is predicting annual inflation of 9.32% in 2015 and the Central Bank has consequently been introducing successive increases in interest rates, which reached 14.25% p.a. at the close of July/2015.

CSN Consolidated Results

- **Net revenue** totaled R\$3,687 million in 2Q15, 8% down on the previous quarter. **COGS** came to R\$2,847 million in 2Q15, 6% less than in 1Q15. Most of the reduction came from the steel and mining segments.
- **SG&A expenses** totaled R\$421 million in 2Q15, 3% up on the R\$411 million recorded in 1Q15, primarily due to an increase of expenses with iron ore freight, as a result of higher CIF sales.
- **Other operating revenue/expenses** totaled R\$223 million in 2Q15, 4% up on the R\$214 million recorded in 1Q15. In 2Q15, the Company recognized impairment of R\$89 million due to the reduction in the market value of Usiminas' preferred shares.
- The 2Q15 **net financial result** was negative by R\$772 million, due to the following factors: i) Interest on loans and financing totaling R\$780 million; ii) Net monetary and exchange variations amounting to R\$7 million; iii—) Interest, fines and default charges related to taxes totaling R\$2 million; iv) Other financial expenses amounting to R\$26 million. These negative effects were partially offset by consolidated financial revenue of R\$43 million.
- The **equity result** was negative by R\$44 million in 2Q15, versus a positive R\$398 million in 1Q15, chiefly influenced by the effect from the foreign exchange variation on Namisa's cash. The table below presents the breakdown of this item:

| | | | |

| Namisa | 396 | (49) | - |

| Arvedi Metalfer BR | 1 | (3) | - |
| Eliminations | (5) | (9) | 80% |
| Equity Result | 398 | (44) | - |

- In 2Q15, CSN posted a **net loss** of R\$615 million, versus net income of R\$392 million in 1Q15, chiefly due to: i) the reduction in gross profit; ii) the negative variation in equity result between the quarters; iii) the positive effect, in 1Q15, from the use of tax credits, due to the temporary difference in the recognition of the foreign exchange variation between the tax and accounting regimes.
- Adjusted EBITDA** totaled R\$801 million in 2Q15, a 12% decline on 1Q15. The adjusted EBITDA margin came to 20%, 2 p.p. down on the previous quarter.

In the domestic market, however, preliminary figures from the Brazilian Steel Institute (IABr) indicate a 2.0% increase in the same period, reaching 17.0 million tonnes.

Domestic rolled flat output fell by 4.8% to 12.0 million tonnes in 1H15. At the same period, apparent consumption declined by 10.4% to 11.7 million tonnes, with domestic sales of 9.7 million tonnes and imports and of 2.0 million tonnes. On the other hand, exports reached 2.1 million tonnes, a 50% increase over 1H14.

The IABr estimates a 12.8% decrease in apparent consumption in 2015, to 22.3 million tonnes, with domestic sales of 18.3 million tonnes and imports of 4.0 million tonnes.

In the distribution segment, the figures from INDA (the Brazilian Steel Distributors' Association) indicates flat steel purchases and sales by distributors totaled 1.8 million tonnes each in 1H15, 15.1% and 18.6% down, respectively, on the first six months of last year. Inventories closed June at 1.0 million tonnes, flat over the December/2014, while the turnover period increased to 4.1 months, compared to 3.9 months in the end of 2014.

Automotive

The performance of the auto industry in 1H15 recorded a deterioration over the same period last year. - **Domestic steel sales** totaled 759,000 tonnes in 2Q15, 14% less than in 1Q15. Of this total, 717,000 tonnes referred to flat steel and 42,000 tonnes to long steel.

- **Foreign steel sales** amounted to 503,000 tonnes in 2Q15, 4% down on the previous three months. Of this total, the overseas subsidiaries sold 451,000 tonnes, 204,000 tonnes of which by SWT, 88,000 tonnes by Lusosider and 159,000 tonnes by LLC, while direct exports came to 52,000 tonnes.

- **Net revenue** totaled R\$2,764 million in 2Q15, an 11% decline over 1Q15, due to the downturn in sales volume. **Net revenue per tonne** averaged R\$2,172, virtually identical to the R\$2,162 recorded in 1Q15.

- **COGS** came to R\$2,225 million in 2Q15, 6% down on the previous quarter.

- The parent company total **production costs** came to R\$1.68 billion in 2Q15, 8% up on 1Q15, chiefly due to: i) the R\$55 million upturn in energy costs due to the scheduled maintenance of the unit's thermoelectric plants; ii) the R\$35 million increase in costs with reducing agents and coating metals, chiefly as a result of the devaluation of the real; and iii) the R\$10 million upturn in other scheduled maintenance stoppages.
- **Adjusted EBITDA** totaled R\$500 million in 2Q15, 27% less than in the previous quarter, with an adjusted EBITDA margin of 18%, down by 4 p.p. over the previous quarter.

Mining

In 2Q15, the supply and demand had contrasting effects on iron ore prices. The interruption in production by certain high-cost seaborne market and Chinese producers, as well as higher rainfall in Australia, contributed to a temporary spike in prices, which exceeded US\$65/dmt (Platts, 62% Fe, N. China) in mid-June. On the other hand, the poor performance of the Chinese real estate sector continued to jeopardize local demand for steel and iron ore, negatively affecting the iron ore prices, which averaged US\$58.45/dmt (Platts, 62% Fe, N. China) in 2Q15, 6% down on the 1Q15 average.

- **Production** totaled 6.8 million tonnes¹ in 2Q15, 14% more than in 1Q15, with the Casa de Pedra mine producing a record 6.3 million tonnes. First-half production came to 12.7 million tonnes¹.
- **Purchases** reached 1.0 million tonnes in 2Q15, due to market opportunities, and 1.6 million tonnes in the first half.
- **Sales** stood at 6.0 million tonnes¹ in 2Q15, 10% more than in the previous quarter. Of this total, 4.9 million tonnes came from the Casa de Pedra mine and 1.1 million tonnes¹ from Namisa. In addition to sales to third parties, the Company routed 1.4 million tonnes to its own steel production in 2Q15.
- First-half **sales** totaled 11.4 million tonnes¹, 9.8 million tonnes from the Casa de Pedra mine and 1.6 million tonnes¹ from Namisa. Own consumption came to 2.8 million tonnes in 1H15.
- **Net revenue** came to R\$680 million in 2Q15, 3% up on the quarter before, due to higher sales volume, partially offset by the decline in iron ore prices in the quarter.
- **COGS** totaled R\$534 million in 2Q15, 6% less than in 1Q15, due to the reduction in production costs and the greater dilution of fixed costs.
- **Adjusted EBITDA** came to R\$228 million, 46% up on 1Q15, primarily due to the reduction in production costs, higher sales volume and the impact of the devaluation of the real, partially offset by the decline in iron ore prices. All these factors contributed to the upturn in the EBITDA margin, which widened by 9 p.p. from 24%, in 1Q15, to 33% in 2Q15.

1. DESCRIPTION OF BUSINESS

Companhia Siderúrgica Nacional “CSN”, also referred to as the Company or Parent Company, is a publicly-held company incorporated on April 9, 1941, under the laws of the Federative Republic of Brazil (Companhia Siderúrgica Nacional, its subsidiaries, joint ventures, joint operations and associates collectively referred to herein as the “Group”). The Company’s registered office is located in São Paulo, SP, Brazil.

CSN has shares listed on the São Paulo Stock Exchange (BM&F BOVESPA) and the New York Stock Exchange (NYSE). Accordingly, it reports its information to the Brazilian Securities Commission (CVM) and the U.S. Securities and Exchange Commission (SEC).

The Group's main operating activities are divided into five (5) operating segments as follows:

- **Steel:**

The Company’s main industrial facility is the Presidente Vargas Steel Mill (“UPV”), located in the city of Volta Redonda, State of Rio de Janeiro. This segment consolidates the operations related to the production, distribution and sale of flat steel, long steel, metallic containers and galvanized steel. In addition to the facilities in Brazil, CSN has operations in the United States, Portugal and Germany aimed at gaining markets and performing excellent services for final consumers. Its steels are used in the home appliances, civil construction and automobile industries. CSN holds the concession to operate TECAR a solid bulk terminal, one of the four terminals that form the Port of Itaguai, located in Rio de Janeiro. Imports of coal

and coke are made through this terminal.

- **Mining:**

The production of iron ore is developed in the city of Congonhas, in the State of Minas Gerais. It further mines tin in the State of Rondônia to supply the needs of UPV, with the excess of these raw materials being sold to subsidiaries and third parties.

Iron ore is substantially sold in the international market, especially in Europe and Asia. The prices in force in these markets are historically cyclical and subject to significant fluctuations over short periods as a result of many factors related to global demand, to the strategies adopted by major steel producers and to the exchange rate. All these factors are beyond the Company's control. The outflow of the ore is done by TECAR.

- **Cement:**

CSN entered the cement market boosted by the synergy between this new activity and its already existing businesses. Next to the Presidente Vargas Steel Mill in Volta Redonda (RJ), it installed a new business unit: CSN Cimentos, which produces CP-III type cement by using slag produced by the UPV blast furnaces in Volta Redonda. It also explores limestone and dolomite at the Arches drive in the State of Minas Gerais, to supply the needs of UPV and of the cement plant.

- **Logistics**

Railroads:

CSN has equity interests in three railroad companies: MRS Logística S. A., which manages the former Southeast Railway System of Rede Ferroviária Federal S.A., Transnordestina Logística S. A. ("TLSA") and FTL - Ferrovia Transnordestina Logística S.A. ("FTL"), which operate the Northeast Railway System of RFFSA, in the States of Maranhão, Piauí, Ceará, Rio Grande do Norte, Paraíba, Pernambuco and Alagoas, with TLSA being responsible for the sections of Missão Velha - Salgueiro, Salgueiro - Trindade, Trindade - Eliseu Martins, Salgueiro - Porto de Suape and Missão Velha - Porto de Pecém (Railway System II) and FTL being responsible for the sections of São Luiz - Mucuripe, Arrojado - Recife, Itabaiana -

- NACIONAL MINÉRIOS S.A. - (“Namisa”)

New strategic alliance with the Asian Consortium

On December 11, 2014, CSN’s Board of Directors approved the formation of a strategic alliance with the Asian Consortium (“JKTC”).

This transaction consists of creating a partnership between CSN and the Asian Consortium, under which the Asian Consortium will contribute its 40% stake in Namisa to Congonhas Minérios S.A. (“Congonhas Minérios”), a non-operating subsidiary of CSN, and to which CSN will contribute its Casa de Pedra iron ore mine, its 60% stake in Namisa, its 8.63% stake in MRS, and the assets of and the rights to manage and operate the TECAR Port concession.

After closing the deal, CSN and the JKTC will hold approximately 88.25% and 11.75% of the share capital of Congonhas Minérios, respectively.

These percentages were set considering the valuation of the entities’ net assets that will compose Congonhas Minérios and adjustments resulting from negotiations between CSN and JKTC involving the extinction of existing operating agreements between CSN and Namisa. As usual in transactions of this nature, in its closing will be held cash adjustments, debt and working capital.

The transaction also provides for an earn-out mechanism, under which a qualifying liquidity event occurring within certain valuation parameters and a given period of time agreed after the transaction is closed could dilute the JKTC equity interest in Congonhas Minérios from 11.75% up to 8.21%.

Version: 1

The transaction's primary purpose is to capture synergies among the businesses involved in this reorganization and generate shareholder value to create a world-class company. The main synergies identified are related to procedure optimization, increasing operation efficiencies and cutting operating costs, and capital expansion.

A portion of Congonhas Minérios' iron ore production will be sold to members of the JKTC and CSN. These rights are laid down in long-term supply agreements.

The closing of the transaction is subject to the parties reaching a consensus on a business plan, regulatory approvals by antitrust authorities and the governmental authorities responsible for regulating mining and ports rights, and other conditions precedent usual in this type of transaction. The closing date is scheduled for the end of 2015.

If the transaction described above is not completed by the mentioned closing date (end of 2015), some obligations, the terms and conditions of the operation established in the agreements signed between the Company and JKTC in the year 2008, which remain suspended as a result of the transaction signing, will again be in force.

The shareholders' agreement signed in 2008 provides that certain situations of standstill between the shareholders and not resolved after mediation and negotiation procedures between the parties' executives may give rise to the Company's right to exercise call option and the consortium's right to exercise put option of its stake in Namisa.

Other agreements signed in order to enable this association in 2008, among the share purchase agreement as well as the long-term operating agreements between Namisa and the Company, provide for certain obligations that if not accomplished or resolved in the deadlines can give rise to, in certain situations, to the aggrieved party's right to exercise put option or purchase, as appropriate, the shareholding of the JKTC in the Namisa.

Any of these events can generate a significant disbursement that may have adverse effect on the Company.

The Company has investments in common (USIM3) and preferred (USIM5) shares (“Usiminas Shares”), designated as available-for-sale financial assets as they do not meet the criteria to be classified within any of the other categories of financial instruments (loans and receivables, held-to-maturity investments or financial assets at fair value through profit or loss). The asset is classified as a non-current asset under line item “investments” and is carried at fair value based on the quoted price on the stock exchange (BM&FBOVESPA). According to Company’s policy, the gains and losses arising from changes in the price of shares are recorded directly in equity under other comprehensive income.

Considering the volatility of the quotations of Usiminas shares, the Company evaluated whether, at the end of the reporting period, there was objective evidence of impairment of these financial assets, i.e., the Company’s management evaluated if the decline in the market value of Usiminas shares should be considered either significant or prolonged. In turn, this valuation requires judgment based on CSN’s policy, prepared according to practices used in the domestic and international markets, and consists of an instrument by instrument analysis based on quantitative and qualitative information available in the market, from the time an instrument shows a drop of 20% or more in its market value or from the time there is a significant drop in its market value as compared to its acquisition price during more than twelve months. If a decline in the market value of the instrument is considered prolonged, the corresponding part previously recorded in other comprehensive income must be registered as impairment loss in the income statement.

As of March 31, 2015, after a decline in the quoted prices of the common shares (USIM5) as compared with the quoted prices as of December 31, 2014, the Company reclassified the accumulated losses for the quarter recognized in other comprehensive income, amounting to R\$5,555, net of income tax and social contribution, to profit (loss) for the period, recognizing R\$8,417 in other operating expenses and R\$2,862 in deferred taxes.

As of June 30, 2015, after a new decline in the quoted prices of the common shares (USIM5) as compared with the quoted prices as of March 31, 2015, the Company reclassified the accumulated losses for the quarter recognized in other comprehensive income, amounting to R\$59,027 net of income tax and social contribution, to profit (loss) for the period, recognizing R\$89,434 in other operating expenses and R\$30,407 in deferred taxes.

The Company’s interest in Usiminas has not changed as compared with the percentage disclosed in the financial statements as of December 31, 2014.

- **Share Market risks**

The Company is exposed to the risk of changes in share prices due to the investments made and classified as available-for-sale.

According to the Company's accounting policies, any negative changes in the investment in Usiminas considered significant (impairment) are recognized in profit or loss, and positive changes are recognized in comprehensive income until the investment is realized.

As of June 30, 2015, the amount recognized in comprehensive income for investments available for sale, net of taxes is R\$318,685.

III - Financial Instrument Policies:

As of June 30, 2015, there were no changes in the financial risk management policies in relation to those disclosed in the Company's financial statements for the year ended December 31, 2014.

(**) The positions of the swap transactions were settled in May 2014, together with their guarantee deposit.

Fixed rate-to-CDI swap

The purpose of this transaction is to peg obligations subject to a post-fixed rate (CDI) to a fixed rate. Basically, the Company contracted swaps for its obligations indexed to CDI, in which it receives interest on the notional amount (long position) and pays a pre-fixed rate on the notional amount of the contract date (short position). The gains and losses on this contract are directly related to CDI fluctuations. In general, these are transactions conducted in the Brazilian over-the-counter market that have as counterparty a prime financial institution.

- **Hedge accounting**

Beginning November 1, 2014, the Company formally designated cash flow hedging relationships to protect highly probable future cash flows against US dollar fluctuations.

In order to better reflect the accounting impacts of this foreign exchange hedging strategy on its profit, CSN designated part of its US dollar-denominated liabilities as a hedging instrument of its future exports. As a result, foreign exchange differences arising on translating the designated liabilities have been temporarily recognized in shareholders' equity and allocated to profit or loss when such exports are carried out, which will allow recognizing the US dollar impact on liabilities and exports concurrently.

The table below shows a summary of the hedging relationships as of June 30, 2015:

The assessments made by the legal counsel define these administrative and judicial proceedings as entailing risk of possible loss and, therefore, no provision was recorded in conformity with Management's judgment and accounting practices adopted in Brazil.

Environmental proceedings

Environmental proceedings have high complexity for estimating the amount at risk, as they must be considered, among several aspects, procedural developments, the extent of damage and the remediation costs' projection.

During the second quarter 2015, in line with the Company's accounting policy of ongoing evaluation of the ongoing proceedings, management, supported by its internal and external legal counsel, reevaluated their environmental contingencies. As a result of this work, there was an increase of possible risk in R\$187,886, of which R\$ 172,647 million refer to a public civil action filed by the city of Volta Redonda.

There are other environmental proceedings to which it is not yet possible to assess the risk and contingency amount due to the aforementioned complexity estimation, the peculiarities of the matters which concern them and their procedural stages.

(*) The ore sales volumes presented in this note take into consideration Company sales and the interest in its subsidiaries and jointly controlled entities (Namisa 60%).

Adjusted EBITDA is the tool based on which the chief operating decision maker measures segment performance and the capacity to generate recurring operating cash, and consists of profit for the year less net finance income (expenses), income tax and social contribution, depreciation and amortization, share of profits of investments, and other operating income (expenses), plus the proportional EBITDA of jointly controlled entities.

Even though it is an indicator used in segment performance measurements, EBITDA is not a measurement recognized by accounting practices adopted in Brazil or IFRS, does not have a standard definition, and may not be comparable with measurements using similar names provided by other entities.

As required by IFRS 8, the table below shows the reconciliation of the measurement used by the chief operating decision maker with the results determined using the accounting practices.

Under the insurance policy, the LMI (Maximum Limit of Indemnity) is US\$600,000,000 and covers the following units and subsidiaries of the Company: Usina Presidente Vargas, Mineração Casa de Pedra, CSN Paraná, Terminal de Cargas Tecar, Terminal Tecon, Namisa, CSN Handel and Namisa Handel. 28. SUBSEQUENT EVENTS

- **Public Civil Action**

In July, 2015 CSN became aware of public civil action filed by the Federal Public Ministry (MPF) against the Company, alleging that the operation of the Presidente Vargas Steel Mill- UPV would be irregular regarding the environmental license in view of the alleged breach of obligations under the Conduct Adjustment Agreement 026/2010, between CSN and the INEA (State Institute for the Environment). From this alleged irregularity the MPF presumes the occurrence of damage to the environment and addresses technical aspects of the steel operation. In its expression on the injunction application for suspension of the sintering activities, CSN clarified that the activities carried out in the plant is fully supported by the environmental license, which remains fully valid and in accordance with current legislation. This request from MPF for an injunction was dismissed. The Company and its legal counsel assessed this case and concluded that it is not yet possible to assess the risk and contingency amount due to the aforementioned complexity estimation, the peculiarities of the matters which concern them and their procedural stages.

REPORT ON REVIEW OF INTERIM FINANCIAL INFORMATION

To the Board of Directors and Shareholders of

Companhia Siderúrgica Nacional

São Paulo – SP

Introduction

We have reviewed the accompanying individual and consolidated interim financial information of Companhia Siderúrgica Nacional (the “Company”), identified as Parent and Consolidated, respectively, included in the Interim Financial Information Form (ITR), for the three-month period ended June 30, 2015, which comprises the balance sheet as of June 30, 2015 and the related statements of income, comprehensive income, changes in equity and cash flows for the three and six-month period then ended, including the explanatory notes.

The Company’s Management is responsible for the preparation of the individual and consolidated interim financial information in accordance with technical pronouncement CPC 21 (R1) - Interim Financial Information and international standard IAS 34 - Interim Financial Reporting, issued by the International Accounting Standards Board - IASB, as well as for the presentation of such information in accordance with the standards issued by the Brazilian Securities and Exchange Commission (CVM), applicable to the preparation of the Interim Financial Information (ITR). Our responsibility is to express a conclusion on this interim financial information based on our review.

Scope of review

We conducted our review in accordance with Brazilian and international standards on review of interim financial information (NBC TR 2410 and ISRE 2410 - Review of Interim Financial Information Performed by the Independent Auditor of the Entity, respectively). A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with standards on auditing and, consequently, does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion on interim financial information

Based on our review, nothing has come to our attention that causes us to believe that the accompanying individual and consolidated interim financial information included in the interim financial information referred to above was not prepared, in all material respects, in accordance with CPC 21 (R1) and IAS 34, applicable to the preparation of Interim Financial Information (ITR), and presented in accordance with the standards issued by the CVM.

Other matters

Statements of value added

We have also reviewed the individual and consolidated statements of value added (DVA) for the six-month period ended June 30, 2015, prepared under the responsibility of the Company's Management, the presentation of which is required by the standards issued by the CVM applicable to the preparation of Interim Financial Information (ITR) and considered as supplemental information for International Financial Reporting Standards - IFRSs, which do not require the presentation of DVA. These statements were subject to the same review procedures described above, and, based on our review, nothing has come to our attention that causes us to believe that they were not prepared, in all material respects, consistently with the individual and consolidated interim financial information taken as a whole.

The accompanying individual and consolidated interim financial information has been translated into English for the convenience of readers outside Brazil.
