2. BASIS OF PREPARATION AND PRESENTATION OF QUARTERLY INFORMATION

a) Quarterly information

Company and consolidated Quarterly Information (“ITR”) are presented in thousands of Brazilian Reais (unless indicated otherwise) and have been prepared in accordance with accounting practices adopted in Brazil, considering Brazil’s Corporation law, standards applicable to concessionaries of public telecommunications services, and accounting procedures established by the Brazilian Securities Commission (CVM), including CVM Instruction No. 469/08.

b) Changes into Corporation Law – Law No. 11,638/07

On December 28, 2007 Law No.11638 was approved which amends, revokes and introduces new provisions into Law No. 6404, of December 15, 1976, and Law No. 6385, of December 7, 1976. The main purpose of these changes and introductions is to update the Brazilian Corporation Law to bring accounting practices adopted in Brazil into convergence with international accounting standards issued by the International Accounting Standards Board - IASB.

The requirements of this Law shall apply to the financial statements relating to financial years that begin on and after January 1, 2008. Those requirements do not fall as changes in circumstances or estimates and, therefore, the adoption of new practices introduced by Law No. 11638/07 will be, as a general rule, demonstrated retrospectively, or by the application of new accounting practices such as the practices in use during all periods presented, in compliance with the rule that deals with "Accounting Practices, Changes in Accounting Estimates and Correction of Errors" approved by the CVM, through Resolution No. 506.

Thus, changes in accounting practices are recorded in the books as accounting adjustments of previous years, but their impact is allocated to each of the periods presented. In the specific case of the Company and its subsidiaries, in which the financial statements ending December 31, 2008 will be presented in comparison with the 2007 figures, the adjustments will be demonstrated to the beginning balances (January 1, 2007) so that the two years will be stated in compliance with the same accounting practices.

This same procedure was also adopted in the preparation and presentation of Quarterly Information (ITR) 2008, so that the effects of changes in accounting practices are being allocated in each of the periods presented.

On May 2, 2008, the CVM issued Instruction No. 469 that has disciplined part of Law No. 11638/07, setting forth the minimum requirements to be observed in the presentation of ITR's in 2008. This instruction, under certain conditions, given the non-adoption of all the provisions of that Law. The management of the Company has not opted for this alternative and thus applied Law No. 11638/07 to the extent required by CVM Instruction No. 469 in the presentation of ITR's in 2008, as follows:

- Long-term assets and liabilities should be discounted to present value (DPV). The remaining balances should be discounted to present value only when they have a significant impact on the financial statements. As a result, the amounts payable related to the authorization to operate the 3G network were discounted to present value, as disclosed in Note 17.
- The premiums received in the issue of bonds and donations and grants for investment are no longer recorded in shareholders' equity. The amounts of donations and grants (tax incentives) are being temporarily recognized

in the Deferred Income group, as determined by CVM Instruction No. 469 in the amounts of the donations for investment in the deferred income account in the amount of R\$ 5,882 at June 30, 2008 (R\$ 1.367 at March 31, 2008).

Among the other changes in accounting standards introduced by said Law, highlighted below are those which, in a preliminary analysis made by the management, are likely to have a significant impact on the financial statements of the Company and its subsidiaries for the year ending December 31, 2008:

- In operations related to business combination conducted between unrelated parties and in connection with transfer of effective control, the assets and liabilities of the company to be acquired, or due to merger or division, will be accounted for at market value. The Company is reviewing the depreciation of the remainder of the goodwill of R\$ 1,768,135 on June 30, 2008. During the six-month period ended June 30, 2008, like in previous periods, there was amortization of goodwill amounting to R\$ 212,081 (R\$ 190,374 in the first half of 2007). During the quarter ended June 30, 2008, the Company acquired interest in Telemig Participações, which established goodwill of R\$ 1,073,874, as described in Note 1.d. The management of the Company is making a detailed analysis to identify and measure the market value of the assets and liabilities arising from this acquisition.
- Commercial leasing of property, plant and equipment used in the maintenance of business: the Company has several contracts for commercial leasing, that are financial in nature, which according to item IV of Article 179 of the Brazilian Corporation Law, as amended by Law No. 11638/07 become eligible and amortizable classified as fixed assets by registering the existing obligation, as before, if the record was against the payment of benefits that were accounted for as rent expenses. The effect of the capitalization of such assets and liabilities referred to, if recorded, would increase the shareholders' equity by R\$ 12,749 (R\$ 14,088 at March 31, 2008) and the result would reduce in the six-month period ended June 30, 2008 by R\$ 2,716 (R\$ 3,165 for the same period of 2007).
- The deferred assets account will include only the preoperating costs and expenses with restructuring. The group of intangible assets was created, including goodwill on business combination and other intangible assets not characterized as deferred assets as defined above. The Company made a reclassification as new definition of intangible assets in ITR's for the quarter ended June 30, 2008.
- Short-term investments and derivative contracts are, basically, coming from surplus cash that is applied in highly liquid assets, generally redeemable in periods of less than 90 days. Thus, short-term investments are stated by the value plus the income earned through the balance sheet date, approaching the market value as of that date. Therefore, the marking-to-market of these investments should not show significant effects at the end of the year and the quarters presented. The Company publishes the market value of its financial instruments as shown in Note 28.b. The management of the Company believes that its short-term investments are in line with the requirements of the CVM, or any significant effect should be determined in the adoption of that rule.

The other changes introduced by Law No. 11638/07 should not cause significant effects in the financial statements as of December 31, 2008 or are not applicable, namely:

- Analysis of the recoverability of fixed assets, intangible and deferred charges as established by Pronouncement 01 of the CPC, approved by CVM Resolution No. 527. The Company has not identified any adjustment in its assets.
- Revaluation of fixed assets: the Company has no items of fixed assets revalued.
- Stock-based pay to directors and employees: the Company has no stock-based pay plan and therefore, management believes that there will be no impact on its financial statements.

- The changes introduced by CVM Instruction No. 247 which deal with investments in affiliates should not cause any impact since the investments held by the Company are in subsidiaries that continue to be measured by the equity method.
- The Company already discloses additional information such as their annual financial statements, the Statements of Cash Flows and Value Added, therefore the change in Law No. 11638 which makes presentation of such statements mandatory does not cause any effect on the information already disclosed by the Company.

The installment classified in current assets refers to reversal of temporary differences and amortization of goodwill expected for the next twelve months.

The deferred taxes were set up assuming its future realization, as follows:

a) Tax loss: represents the amount recorded by the subsidiary, which will be offset at the limit of 30% of the bases computed in the coming years and has no limitation period. The Company did not record the potential deferred income and social contribution tax credit that would arise from the use of these tax bases in the amount of R\$678,603 (R\$700,126 at March 31, 2008), given the uncertainty, at this time, as to the Company's ability to generate future taxable results to ensure realization of these deferred taxes.

b) Tax credit incorporated: represented by the net balance of goodwill and the provision for maintaining the integrity of the net equity (Note 6.2). Its conversion occurs proportionately to the amortization of the goodwill in its subsidiary, over a period of 5 to 10 years. Studies by outside consultants used in the Corporate Restructuring process support the recovery of the value within this period.

c) Temporary differences: realization will occur at the payment of provisions, the effective loss on bad debts or the realization of inventories, as well as upon reversal of other provisions. The Company did not record the potential deferred income and social contribution tax credit that would arise from the use of these provisions in the amount of R\$157,829 (R\$157,293 at March 31, 2008), given the uncertainty, at this time, as to the Company's ability to generate future taxable results to ensure realization of these deferred taxes.

17. CONCESSION LICENSES

SMP - 800 MHz, 900 MHz, 1800 MHz and 1900 MHz	73,656	45,326

Total	1,076,433	45,326

Noncurrent	67,343	45,326

In mid-2007, the subsidiaries have acquired licenses for 1.9 MHz and 2.1 MHz (3G) through auctions conducted by Anatel, as follows:

Auction of Frequencies 1.9 Mhz

On September 25, 2007, the Company, VIVO, was the winning bidder of the Band L lots, except for lot 16 (area of Londrina- state of Paraná), and of lot 20 (North of Brazil), after opening the proposals carried through on that date in the headquarters of ANATEL. Band L comprises lots in the frequency range from 1895 to 1900 Mhz and from 1975 to 1980 Mhz, with 5 + 5 Mhz width, in all the regions served by the SMP. Thus, Vivo closed its last “gap” coverage and will soon be operating in the entire Brazilian territory.

In order to achieve this benchmark, Vivo offered 50.60% average premium over the minimum price set in the auction call notice. Vivo’s offer was approximately R\$169.7 million for all Band L lots acquired. However, pursuant to the rules provided for in the auction call notice, the price to be paid refers to the remaining term of the pre-existing authorizations for each lot acquired, the term of which is always counted from the date of execution of the Term of Authorization referring to this bidding process. The amount resulting from the governmental bidding for Vivo totaled R\$50.3 million, without including the lots in the state of Minas Gerais.

Vivo already made the initial payment of 10% of the balance of the licenses and the remainder (90%) will be paid for up to 12 months from the auction date.

Auction of Frequencies of 2.1 Mhz (3G)

On December 18, 2007, Telemig Celular announced that it was the winning bidder in 2 lots (Minas Gerais - Sector 2 and Triângulo Mineiro - Sector 3) for the extension of third generation (3G) mobile services, with 10 + 10 Mhz width. For the lots purchased, the proposal of Telemig Celular was approximately R\$ 53.5 million.

On December 20, 2007, Vivo, announced that it was the winning bidder in the Band J lots, with 10 + 10 MHz width, with exception of areas VII and X. In order to achieve this benchmark, Vivo has paid 92.5% average premium over the minimum price set in the auction call notice. For all Band J lots acquired, the Vivo offer was approximately R\$1.1 billion.

The terms of use of these licenses are for a period of 15 years, subject to a one-time renewal period of 15 years. The total amount or 10% should be paid at the time of the execution of the Terms of Authorization. The remaining 90%, totaling R\$ 1,032,924 and R\$ 48,182 in Vivo and Telemig Celular, respectively, may be paid in 6 equal and annual installments, with a grace period of 3 years, adjusted to the Telecommunications Sector Index - IST variation, plus 1% monthly, or until December 11, 2008 without update. The subsidiaries keep the remaining obligations recorded in passive stock without monetary update.

On April 29, 2008, the Company signed at Anatel the Term of Authorization for the use of the radiofrequency subranges by Vivo and Telemig Celular.

The values of these licenses payable were recorded against intangible assets in the amounts of R\$ 958,086 and R\$ 44,691 in Vivo and Telemig Celular, respectively, less the discount to present value of R\$ 74,838 in Vivo and R\$ 3,491 in Telemig Celular, as determines Law No. 11638/07 and CVM Instruction No. 469/08. The discount to present value was calculated using the rate of 100% of the CDI.

28) FINANCIAL INSTRUMENTS AND RISK MANAGEMENT (CONSOLIDATED)

a) Considerations on Risks

The main market risks to which the Company and its subsidiary are exposed in the conduct of their activities are:

Credit Risk: deriving from possible difficulties in collecting the amounts related to telecommunications services rendered to its customers and to sales of handsets to its dealers, as well as the risk related to short-term investments and amounts receivable from swap transactions.

Interest Rate Risk: deriving from a portion of the debt and from long positions of derivatives contracted at floating rates, and involving the risk of an increase in financial expenses due to an unfavorable change in interest rates (mainly LIBOR, TJLP and CDI).

Exchange Rate Risk: the possibility that Company and its subsidiary incur losses as a result of exchange rate variations that increase the liability balances of foreign currency loans and financing.

The Company and its subsidiary adopt an active position concerning the management of the various risks to which they are exposed, by means of a set of comprehensive initiatives, procedures and operating policies, thus mitigating the risks inherent to their activities.

Credit Risk

The credit risk involved in the rendering of telecommunications services is minimized by a strict control of the customer base and active management of customers' default, by means of clear policies regarding the sale of post-paid telephones. The subsidiary customer base has, predominantly, a prepaid system, which requires the prior loading and consequently entails no credit risk.

The credit risk in the sale of handsets is managed by a conservative credit policy, by means of modern management methods, including the application of "credit scoring" techniques, analysis of financial statements and information, and consultation to commercial data bases, as well as the automatic control of sales release integrated with the distribution module of SAP's ERP software.

The company and its subsidiary are also subject to credit risk originating from its financial investments and amounts receivable from swap transactions. The Company and its subsidiary act in a manner so as to diversify this exposure among various world-class financial institutions.

Interest rate risk

The Company and its subsidiary are exposed to the risk of increased interest rates, especially those associated with the cost of the Interbank deposit certificates (CDI), in connection with payables related to derivative transactions (currency hedge) and by loans denominated in Reais. As a way to minimize this exposure, the Company contracted

swap transactions in Reais, from CDI to fixed-interest rates, in a total reference value of R\$112,5 million. The balance of financial investments, indexed to the CDI, also neutralizes this effect partially.

Furthermore, the Company and its subsidiary are also exposed to the risk of fluctuation of the TJLP, in connection with the loans obtained from BNDES. These transactions amounted to R\$1,413,641 at June 30, 2008. The Company and its subsidiary have no transactions with derivatives contracted to cover the TJLP risk.

Exchange Rate Risk

The Company and its subsidiary have contracted financial transactions with derivatives so as to protect themselves against exchange rate fluctuations affecting their loans and other liabilities in foreign currencies. The instruments generally used are swap and forward contracts.

The table below summarizes the net exposure of the Company and its subsidiaries to the exchange rate factor at June 30, 2008:

	In thousands of		
	US\$	€	¥
Loans and financing	(630,015)	-	(53,296,872)
Loans and financing - UMBNDES (a)	(4,844)	-	-
Derivative instruments	630,491	-	53,296,872
Other liabilities	(64,231)	(16,894)	-
Total (insufficient coverage)	(68,599)	(16,894)	-

(a) UMBNDES is a monetary unit conceived by BNDES, composed of a basket of foreign currencies, main currency being the US dollar, and for this reason the Company and its subsidiary consider it in their analysis of the risk coverage against exchange rate fluctuations.

Transactions with Derivatives

The Company and its subsidiary record gains and losses on derivative contracts as financial income or expenses, net.

b) Market Value of Financial Instruments

The market value of the short-term investments approximates their book value in reason of short terms of expiration of these instruments. The market value of loans, financing and debentures, as well as of swap contracts, was established on the basis of discounted cash flow, by using projections of interest rates available.

The table below shows an estimate of the book value and the market value at June 30, 2008:

	Book value	Market value	Unrealized gain (loss)
Short-term investments	2,502,792	2,502,792	-
Loans, financing and debentures	(5,764,848)	(5,540,528)	224,320
Derivative instruments	(404,027)	(424,720)	(20,693)
Other liabilities	(144,644)	(144,644)	-
Total	(3,810,727)	(3,607,100)	203,627

Market values are calculated at a specific time based on available information and own evaluation methodology. Consequently, the indicated estimates do not necessarily represent market realizable values. Use of different assumptions may significantly affect estimates.
