Further, as TCO IP is a wholly-owned subsidiary of Vivo Participações, substitution of shares owned by non-controlling shareholders of the mergee for shares of the merger will not be required.

The Corporate Reorganization will not result in change of the share control of Telemig Participações and of Telemig Celular, nor of the other shareholders. Among other advantages, this transaction will allow simplification of the current corporate structure, minimizing costs and generating savings for the companies involved. This transaction shall be carried out in such manner as not to cause any negative impact on the future flows of dividends payable to the shareholders of Telemig Participações. The completion of this transaction is estimated to occur in the fourth quarter of 2008

f. Agreement between Telefónica S.A. and Telecom Italy

In October 2007, TELCO S.p.A. (in which Telefónica S.A holds an interest of 42.3%), completed the acquisition of 23.6% of Telecom Italia. Telefónica S.A. has joint control of Vivo, through its joint venture with Portugal Telecom. Telecom Italia holds an interest in TIM Participações S.A (TIM), which is a mobile telephone operator in Brazil. As a result of the acquisition of its interest in Telecom Italia, Telefónica S.A. does not have any direct involvement in the operations of TIM. Additionally, any transactions between the Company and TIM are transactions in the regular course of business (inter-operator transactions), which are regulated by the ANATEL.

2. BASIS OF PREPARATION AND PRESENTATION OF QUARTERLY INFORMATION

a) Quarterly information

The controlling company and consolidated Quarterly Information ("ITR") are presented in thousands of Brazilian Reais (unless as otherwise indicated) and have been prepared in accordance with standards applicable to concessionaries of public telecommunications services, and accounting procedures provided for by the Brazilian Securities Commission (CVM), including CVM Instruction No. 469/08.

This Quarterly Information was prepared following principles, practices and criteria consistent with those adopted in the preparation of prior year's financial statements and should be analyzed in conjunction with such statements.

The statement of operations for the nine-month period ended September 30, 2007 does not include the effects of the acquisition of Telemig Participações described in Note 1 and, thus, is not comparable with the respective quarterly information for the same period of 2008.

The consolidated statement of operations of the Company, for the nine-month period ended September 30, 2008, includes the consolidated results of Telemig Participações for the six-month period ended September 30, 2008.

Intercompany asset and liability, revenue and expense balances were eliminated on consolidation.

Edgar Filing: Vivo Participacoes S.A. - Form 6-K

b) Changes to Corporation Law – Law No. 11,638/07

On December 28, 2007 Law No. 11638 was enacted, which amends, revokes and introduces new provisions into Law No. 6404, dated December 15, 1976, and into Law No. 6385, dated December 7, 1976. The main purpose of these changes and introductions is to update the Brazilian Corporation Law to bring accounting practices adopted in Brazil into convergence with international accounting standards issued by the International Accounting Standards Board - IASB.

The requirements of this Law apply to the financial statements relating to financial years beginning on and after January 1, 2008. Those requirements are not deemed to be changes in circumstances or estimates and, therefore, the adoption of new practices introduced by Law No. 11638/07 will be, as a general rule, stated retrospectively, that is, by application of such new accounting practices as if they were in use during all periods presented, until a new guideline is issued by the Accounting Pronouncements Committee (“CPC”), with due regard to the rule that deals with "Accounting Practices, Changes in Accounting Estimates and Correction of Errors" approved by the CVM in its Resolution No. 506.

Thus, changes in accounting practices are recorded in the accounting books as adjustments to previous years, but their impact is allocated to each of the periods presented. In the specific case of the Company, in which the financial statements ending December 31, 2008 will be presented in comparison with the 2007 figures, the adjustments will be stated at the initial balances (January 1, 2007) so that the two fiscal years will be stated in compliance with the same accounting practices.

This same procedure was also adopted in the preparation and presentation of the 2008 Quarterly Information (ITR), so that the effects of changes in accounting practices are being allocated to each of the periods presented.

On May 2, 2008, the CVM issued Instruction No. 469 that has partially ruled Law No. 11638/07, setting forth the minimum requirements to be complied with in presenting the ITR's in 2008. This instruction, under certain conditions,

allowed the alternative of full adoption of the provisions of that Law. The management of the Company has elected this alternative and, thus, applied Law No. 11638/07 to the minimum extent required in CVM Instruction No. 469 in the presentation of ITR's in 2008, as follows:

- Long-term assets and liabilities should be adjusted to present value (APV). The remaining balances should be adjusted to present value only where they have a significant impact on the financial statements. As a result, the amounts payable related to the authorization to operate the 3G network were adjusted to present value, as disclosed in Note 17. No other assets and liabilities were identified for which adjustments to present value were required.
- The premiums received in the issue of bonds and donations and grants for investment are no longer recorded in shareholders' equity. The amounts of donations and grants (tax incentives) are being temporarily recognized in the Deferred Income group, as determined by CVM Instruction No. 469. Vivo recorded the amounts received as donations during fiscal year 2008 in the Deferred Income account, in the amount of R\$5,238 on September 30, 2008 (R\$5,882 on June 30, 2008).

Among the other changes in accounting standards introduced by said Law, highlighted below are those which, in a preliminary analysis made by the management, are likely to have a significant impact on the financial statements of the Company and its subsidiaries for the year ending December 31, 2008:

- In transactions related to business combination carried out between unrelated parties and in connection with transfer of effective control, the assets and liabilities of the company to be merged, or due to incorporation or spin-off, will be accounted for at market value. During the nine-month period ended September 30, 2008, the Company acquired interest in Telemig Participações and in Telemig Celular, with the corresponding goodwill having been calculated as R\$1,729,243, pursuant to note 1.d. In the nine-month period ending September 30, 2008, and as it happened in previous periods, there was amortization of the goodwill in the amount of R\$314,636 (R\$285,561, in the same period of 2007). The management of the Company is conducting a detailed analysis to identify and assess the market value of the assets and liabilities arising out of this acquisition, in case it may be necessary to record the transaction at market value in 2008.
- Commercial leasing of property, plant and equipment used in the maintenance of business: Vivo has several contracts for commercial leasing, that are financial in nature, which according to item IV of Article 179 of the Brazilian Corporation Law, as amended by Law No. 11638/07 become eligible and are classified as fixed assets subject to depreciation by recording the existing obligation, while before they were recorded upon the payment of the benefits which were recorded as rental expenses. The effect of the capitalization of said assets and liabilities, if recorded, would increase the shareholders' equity, at December 30, 2008, by R\$ 11,474 (R\$ 12,749 at June 30, 2008) and reduce the result in the nine-month period ended September 30, 2008 by R\$ 3,991 (R\$ 4,733 for the same period of 2007).
- The deferred assets account will include only the pre-operating costs and reorganization expenses. An intangible assets group was created, including goodwill arising out of business combination and other intangible assets not characterized as deferred assets as defined above.
- The financial investments basically result from unused cash balances which are invested in high liquidity assets, generally redeemable within not more than 90 days. Thus, the financial investments are stated at the amount invested plus interest earned until the balance sheet date, being close to the market value at such date. The Company's Management concluded that marking such investments to market is not likely to produce relevant effects in the end of the fiscal year and in the quarter periods presented, due to their short term nature, as shown in note 28.b. The Company's Management, therefore, deems that its financial investments are in line with CVM's requirements.

The other changes introduced by Law No. 11638/07 should not cause significant effects in the financial statements as of December 31, 2008 or are not applicable, namely:

- Analysis of recoverability of fixed, intangible and deferred assets as provided for in CPC's Pronouncement 01, approved by CVM Resolution No. 527. The Company has not identified any adjustment in its assets.
- Fixed assets revaluation: the Company has no revalued items in its fixed a.
- Stock-based pay to directors and employees: the Company has no stock-based pay plan and therefore, management believes that there will be no impact on its financial statements.
- The changes introduced by CVM Instruction No. 247, which deal with investments in affiliates, should not cause any impact since the investments held by the Company are in subsidiaries that continue to be assessed by the equity method.
- The Company already disclosed the Statements of Cash Flows as additional information to its financial statements; therefore, the change in Law which makes presentation of such statements mandatory does not cause any effect on the information already disclosed by the Company.

Although the referred Law has already become effective, the main changes introduced by it still require to be further regulated by the Brazilian regulatory agencies. Accordingly, the accounting information that was presented may require adjustments after Law 11638/07 is regulated. The Company will continue to follow-up and evaluate eventual impacts on its financial statements arising out of new resolutions to be issued by the CVM and by the CPC for regulating the application of said Law.

3. FINANCIAL INVESTMENTS

Financial investments refer to fixed income transactions, which are indexed to Interbank Deposit Certificates ("CDI"), with immediate liquidity, and the Fund for Investment in Shares of Investment Funds – FIC. The FIC portfolios were substantially comprised of federal bonds and securities issued by first-line private institutions, both with high liquidity, recorded at their realization value.

The investment funds perform transactions with financial instruments in order to reduce exposure to interest rate risk, which are also recorded at their realization value.

The amount recorded in the current assets refers to reversal of temporary differences and use of tax losses and goodwill amortization expected for the next twelve months.

The deferred taxes were recorded assuming their future realization, as follows:

- a) Tax loss and negative tax base: represents the amount recorded by the controlled companies, which will be offset up to the limit of 30% of the tax basis computed in the coming fiscal years and subject to no statute of limitations. The Company did not record the potential deferred income and social contribution tax credit that would arise from the use of these tax bases in the amount of R\$683,630 (R\$678,603 at June 30, 2008), given the uncertainty, at this time, as to the Company's ability to generate future taxable results to ensure realization of these deferred taxes.
- b) Tax credit incorporated: represented by the net balance of goodwill and provision for maintenance of the shareholders' equity integrity (note 6.2). Realization will occur proportionally to the amortization of the goodwill in its controlled companies, in a period from 5 to 10 years. Studies performed by independent consultants hired during the Corporate Reorganization process support the recovery of such amounts within the above referred time.
- c) Temporary differences: realization will occur upon payment of the provisions, effective loss on bad debts or realization of inventories, as well as reversal of other provisions. The Company did not record the potential deferred income and social contribution tax credit that would arise from the use of these provisions in the amount of R\$157,426 (R\$157,829 at June 30, 2008), given the uncertainty, at this time, as to the Company's ability to generate future taxable results to ensure realization of these

deferred taxes.

The Company prepared technical feasibility studies, approved by its Board of Directors, which indicated the full recovery of deferred tax amounts recognized at December 31, 2007, as defined in CVM Instruction No. 371. During the nine-month period ended September 30, 2008, no relevant fact occurred that indicated limitations to full recovery of the deferred tax amounts recognized by the controlled companies.

Total	1,053,073	1,076,433

Noncurrent	-	67,343

In 2007, the subsidiaries have acquired licenses for 1.9 MHz and 2.1 MHz (3G) through auctions conducted by ANATEL, as follows:

Auction of 1.9 Mhz Frequencies

On September 25, 2007, VIVO was the winning bidder of the Band L lots, except for lot 16 (area of Londrina- state of Paraná), and of lot 20 (North of Brazil), after the opening of the price bids carried through on that date in the headquarters of ANATEL. Band L comprises lots in the frequency range from 1895 to 1900 Mhz and from 1975 to 1980 Mhz, with 5 + 5 Mhz width, in all the regions served by the SMP. Thus, Vivo filled its last “gap” of coverage and will soon be operating in the entire Brazilian territory.

In order to achieve this benchmark, Vivo offered 50.60% average premium over the minimum price set in the Invitation to Bid. Vivo’s offer was approximately R\$169.7 million for all Band L lots acquired. However, pursuant to the rules provided for in the invitation to bid, the price to be paid refers to the remaining term of the pre-existing authorizations for each lot acquired, the term of which is always counted from the date of execution of the Instrument of Authorization referring to this bidding process. The amount resulting from the governmental bidding for Vivo totaled R\$50.3 million, without including the lots in the state of Minas Gerais.

Vivo already made the initial payment of 10% of the balance of the licenses and the remainder (90%) will be paid within up to 12 months from the auction date.

Auction of 2.1 Mhz (3G) Frequencies

On December 18, 2007, the Company announced that it was the winning bidder in 2 lots (Minas Gerais - Sector 2 and Triângulo Mineiro - Sector 3) for the extension of third generation (3G) mobile services, with 10 + 10 Mhz width. The

proposal of the Company for the lots purchased was approximately R\$ 53.5 million.

On December 20, 2007, Vivo announced that it was the winning bidder in the Band J lots, with 10 + 10 MHz width, except for areas VII and X. In order to achieve this benchmark, Vivo has paid 92.5% average premium over the minimum price set in the Invitation to Bid. For all Band J lots acquired, Vivo offer was approximately R\$1.1 billion.

The terms of use of these licenses are for a period of 15 years, subject to a one-time renewal period of 15 years. The amount of 10% has been already paid on the date of execution of the Instrument of Authorization. The remaining 90%, totaling R\$ 1,032,924 and R\$48,182 in Vivo and in Telemig Celular, respectively, may be paid in 6 equal and annual installments, with a grace period of 3 years, adjusted to the Telecommunications Industry Index - IST variation, plus 1% monthly, or until December 11, 2008 without adjustment. The controlled companies have recorded the remaining liability in their current liabilities, without adjustment.

On April 29, 2008, the Company signed with ANATEL the Instruments of Authorization for use of this radiofrequency sub-bands for Vivo and Telemig Celular.

The price payable for the 2.1 Mhz (3G) licenses was recorded as a counter-entry to the intangible assets in the amount R\$958,086 and R\$44,691 in Vivo and in Telemig Celular, respectively, less the discount to present value of R\$74,838 and R\$ 3,491, respectively, as provided for in Law No. 11638/07 and CVM Instruction No. 469/08. - b.1) 6% (six per cent) per year on the amount resulting from dividing the subscribed capital by the total number of Company's shares; or
- b.2) 3% (three per cent) per year on the amount resulting from dividing the shareholders' equity by the total number of Company's shares, and also the right to participate in distributed profit under conditions equal to those applicable to common shares, after the common shares have been ensured of a dividend equal to the minimum priority dividend established for the preferred shares.

As from the General Shareholders' Meeting held on March 27, 2004, the preferred shares are entitled to full voting rights, in accordance with article 111, paragraph 1, of Law No. 6404/76, since minimum dividends were not paid on preferred shares for three consecutive years.

At the General Shareholders' Meeting held on March 15, 2007, the payment of dividends on the income for year 2006 to the holders of preferred stocks was approved. However, the approved amount was lower than the minimum statutory value required to remove the right to vote of the preferred stocks.

- b.3) Dividends and interest on shareholders' equity not claimed by shareholders are forfeited in 3 (three) years, as from the date of the beginning of payment, as set forth in article 287, subparagraph II, item a), of Law No. 6404/76.

28. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT (CONSOLIDATED)

a) Considerations on Risks

The main market risks to which the Company and its subsidiaries are exposed in the conduct of their activities are:

Credit Risk: deriving from possible difficulties in collecting the amounts related to telecommunications services rendered to their customers and to sales of handsets to their dealers, as well as the risk related to short-term investments and amounts receivable from swap transactions.

Interest Rate Risk: deriving from a portion of the debt and from long positions of derivatives contracted at floating rates, and involving the risk of an increase in financial expenses due to an unfavorable change in interest rates (mainly LIBOR, TJLP and CDI).

Exchange Rate Risk: the possibility that Company and its subsidiaries incur losses as a result of exchange rate variations that increase the liability balances of foreign currency loans and financing.

The Company and its subsidiaries adopt an active position concerning the management of the various risks to which they are exposed, by means of a set of comprehensive initiatives, procedures and operating policies, thus mitigating the risks inherent to their activities.

Credit Risk

The credit risk involved in the rendering of telecommunications services is minimized by a strict control of the customer base and active management of customers' default, by means of clear policies regarding the sale of post-paid telephones. The subsidiary customer base has, predominantly, a prepaid system, which requires the prior loading and consequently entails no credit risk.

The credit risk in the sale of handsets is managed under a conservative credit policy, by means of modern management methods, including the application of "credit scoring" techniques, analysis of financial statements and information, and consultation to commercial data bases, as well as the automatic control of sales release integrated with the distribution module of SAP's ERP software.

The company and its subsidiaries are also subject to credit risk originating from their financial investments and amounts receivable from swap transactions. The Company and its subsidiaries act in a manner so as to diversify this exposure among various world-class financial institutions.

Interest rate risk

The Company and its subsidiaries are exposed to the risk of increased interest rates, especially those associated with the cost of the Interbank Deposit Certificates (CDI), in connection with payables related to derivative transactions (currency hedge) and by loans denominated in Reais. As a way to minimize this exposure, the Company contracted swap transactions in Reais, from CDI to fixed-interest rates, in a total reference value of R\$116.2 million. The balance of financial investments, indexed to the CDI, also partially neutralizes this effect.

Furthermore, the Company and its subsidiaries are also exposed to the risk of fluctuation of the TJLP, in connection with the loans obtained from BNDES. These transactions amounted to R\$1,409,725 at September 30, 2008. The Company and its subsidiaries have no transactions with derivatives contracted to cover the TJLP risk.

Exchange Rate Risk

The Company and its subsidiaries have contracted financial derivative transactions so as to protect themselves against exchange rate fluctuations arising out of foreign currency loans. The instruments generally used are swap and forward contracts.

The table below summarizes the net exposure of the Company and its subsidiaries to the exchange rate factor at September 30, 2008 and at June 30, 2008:

(a) UMBNDES is a monetary unit conceived by BNDES, comprised of a basket of foreign currencies, main currency being the US dollar, and for this reason the Company and its subsidiaries consider it in their analysis of the risk coverage against exchange rate fluctuations.

Transactions with Derivatives

The Company and its subsidiaries record gains and losses on derivative contracts as financial income or expenses, net.

b) Market Value of Financial Instruments

The market value of the financial investments is close to their book value due to the short tenor of these instruments. The market value of loans, financing and debentures, as well as of swap contracts, was established on the basis of

c) CVM Resolution n° 550/08

CVM, by Resolution no. 550, issued on October 17, 2008, determined that publicly-held companies should disclose in the current ITR, in a specific note, both qualitative and quantitative information about all their financial derivative instruments, whether recognized or not as assets or liabilities in their balance sheets.

All financial derivative instruments are contracted by the Company and its subsidiaries for protection against exchange risk and foreign and local interest rate risks arising out of financial debts, pursuant to a risk management corporate policy. Thus, eventual variations in the risk factors generate an inverse effect on the financial instrument they are proposed to protect. Therefore, the Company and its subsidiaries have no financial derivative instruments for purposes of speculation and their financial exchange liabilities are hedged.

Said instruments were contracted with ABN Amro Real, Bradesco, Banco do Brasil, Citibank, Santander, Votorantim, Itaú, JP Morgan, BNP Paribas, Pactual and Unibanco banks in the local market, pursuant to the applicable credit risk policy.

At September 30, no contract requires a margin deposit.

The amounts of the derivative instruments are summarized as follows:

OPERATING REVENUE**Growth in the revenue from the outgoing traffic.**

Total **net revenue** grew 13.7% over 3Q07, due to the growth of 15.1% in the service revenue, which represents growth in all components. Such growth is a result of the natural growth in the customer base, of the actions for stimulation of the recharges and of the sale of products and VAS. In relation to 2Q08, the total net revenue increased by 7.6%, also due to the growth in the revenue from services, besides the increase of 8.2% in the revenue from handsets, as a result of the commercial activity.

The increase of 11.9% in "**franchising and usage revenue**", when compared to 3Q07, is mainly due to the increase in the total outgoing revenue, by 18%. This was due to the growth in the total outgoing traffic because of the

incentive to usage. Worthy of mention are “other services”, which grew 153.3% in relation to 3Q07 and 7.7% in the average recharge value per customer.

Data revenue plus VAS has continued to increase its share in the Total Service Revenue. It grew from 8.2% in 3Q07 to 10% in 3Q08, that is, 40.6% increase. Several factors contributed to this: increase in the number of customers with access to Vivo Zap (mobile internet) and to SmartMail, sales of Blackberry handsets, and increase in the service revenue from Downloads (Vivo Play and Tons and Images) and SMS Content. The peer to peer SMS has continued to be the largest selling service, accounting for 44% of the data and VAS revenue. Growing at a rate of 2% per month, Vivo ZAP (mobile internet) is the second largest product, with 23% share. When compared to 2Q08, the Data and VAS Revenue grew 3.6%.

OPERATING COSTS

Strict control over structural costs.

The 13.3% increase in the **cost of the services rendered** in 3Q08, when compared with 3Q07, is the result of a 22.9% increase in the interconnection costs caused by an increase in the total outgoing traffic and an increase in the Fistel fee, due to the growth of the customer base. In comparison with 2Q08, it recorded a reduction of 0.9% related to the reversal of network PDD due to the co-billing renegotiation, as shown in “Other Costs”. By normalizing the result, the cost of the services would be stable in comparison to 2Q08.

Commercial and operational efficiency.

Despite the increased commercial activity in the quarter, the **cost of goods sold** in 3Q08 remained almost stable in relation to the same period of the previous year. This is due to the foreign exchange devaluation between the two periods, as well as to the total unsubsidized increases. When compared to the 2Q08, it shows an increase of 1.8%, resulting from the activity in the period and the beginning of the foreign exchange appreciation.

In the 3Q08, the **selling expenses** recorded a 7.1% increase over 3Q07, reflecting the increase in third parties' service expenses, such as: publicity and advertising, donations of handsets, commissions, outsourced labor and client care, besides the increased customer loyalty costs, partially offset by a reduction in the provision for bad debt. In a comparison with the 2Q08 figures, the selling expenses showed a 10.4% decrease, once the expenses with third parties' services decreased, especially those related to publicity and advertising, and public services, in addition to a reduction in the PDD (Provision for Bad Debt). Expenses with customer loyalty and donations between the compared quarters were also lower, which is related to the reduction in the expenses for attracting customers in the GSM network by giving free-of-cost handsets.

Provision for Bad Debtors under control, despite the intense commercial activity. Both in 3Q07 and in 2Q08, the **Provision for Bad Debt** – PDD in 3Q08 showed a reduction of 16.4% and of 20.9%, respectively. The amount of R\$ 71.8 million represents 1.2% of the total gross revenue, the lowest index since Vivo was constituted. The drop is of 0.5 percentile points both in relation to the 3Q07 and to 2Q08 (1.7% of the gross revenue). The collection actions and the strong control of credit granting have kept this item under strict control. Beside this, it was positively impacted by the corporate segment credits recovered.

The **general and administrative expenses** decreased by 11.4% in 3Q08 in relation to 3Q07, mainly due to the decrease in expenses with third-party services, especially technical assistance, because of the termination of the “management fee” contract in August. In the comparison with 2Q08, the decrease was of 8.6%, reflecting lower expenses with third party services, especially consulting, and others related to technical-administrative services. These were partially affected by the increase in “others”, particularly in items such as rent, insurance and condominium fees

Other Operating Revenue / Expenses recorded revenue of R\$ 21.7 million. This result was possible because of the reduction of expenses with taxes, duties and contributions and the drop in the provisions for contingencies, offset by the reduction in the revenue from fines. The comparison with 2Q08 also presents a reduction in the provision for contingencies, in addition to an increase in the revenues with recovered expenses

DEPRECIATION AND AMORTIZATION

Depreciation and amortization expenses recorded an increase of 19.5% in relation to 3Q07, due to the acceleration in the depreciation of TDMA and CDMA technologies and to the digital ERBs, in addition to the increase in the amortization of the goodwill by the acquisition of Telemig. These last two items – relating to the ERBs and to the goodwill amortization – also explain the increase of 4.1% in this index in relation to 2Q08

Adjustment at Present Value is reflected in the increase of the financial expenses.

VIVO's **net financial expenses** increased by R\$ 99 million in 3Q08 over 2Q08. This variation is mainly explained by the extraordinary effect of the financial expense recorded due to the adjustment at present value of 3G licenses (as determined by law 11.638/07 and by CVM instruction 469/08), in the amount of R\$ 50.3 million; by the increased in the net debt due to the disbursement for the Mandatory Public Offering of Shares of Telemig; by the higher actual CDI in the period (3.16% in 3Q08 and 2.70% in 2Q08); and by the foreign exchange variation on operating liabilities referenced to foreign currency in the amount of R\$ 37.3 million.

New credit facility granted by BNB in the amount of R\$ 389 million.

On September 30, 2008, VIVO's consolidated debt for loans and financing amounted to R\$ 5,953.2 million, 33.3% of which is denominated in foreign currency. The Company has executed hedge contracts thus protecting 100% of its financial debt against foreign exchange volatility, so that the final cost (debt and swap) is Reais-referenced. This debt was offset by the Company's available cash and financial investments of R\$ 1,971.8 million as well as by derivative assets and liabilities of R\$ 17.2 million payable, finally resulting in a net debt of R\$ 3,998.6 million. Additionally, the Company has entered into "swap" transactions – CDI Post x Pre fixed – in the amount of R\$ 116.1 million, in order to partially protect it against fluctuations in domestic interest rates.

The board of directors of Banco do Nordeste do Brasil (BNB) approved a letter-inquiry with a proposal for granting a new credit facility, in the amount of R\$ 389 million, through the Northeast Constitutional Fund. This new financing shall be used for expansion of the network already existing in the States of Bahia, Sergipe and Maranhão and for implementing a new network in the States of Piauí, Ceará, Rio Grande do Norte, Paraíba, Pernambuco and Alagoas.

The increase in Vivo's net debt in 3Q08 in relation to 3Q07 was mainly due to the acquisition of Telemig Celular Participações S/A (payment of R\$ 1,233.1 million for the share control, R\$ 527.5 million for the Voluntary Public Tender Offer and of R\$ 903.9 million for the Mandatory Public Tender Offer) and to the payment of 10% of the 3G licenses (in the amount of R\$ 120.1 million), which were offset by the strong generation of cash by the Company in the period.

The increase of R\$ 424.3 million in Vivo's net debt in 3Q08, in comparison to 2Q08, is related to the disbursement related to the Mandatory Public Tender Offer of Telemig mentioned above. The transaction was closed in August, being offset by cash generation in the period.

If we analyze separately the evolution of Vivo's net debt, expurgating the effects of the principal amount of the acquisition of Telemig (without considering the cost of the service of the additional debt), we would have a net debt of R\$ 2,028.6 million at September, 30, which represents a reduction of 18.9% in relation to the net debt of 2Q08, which would be of R\$ 2,501.3 million. In relation to 3Q07, (net debt of R\$ 2,957.7 million), we would have a reduction of 31.4%, which demonstrates that cash has been consistently generated by the Company.

The CAPEX for 3Q08 represents a percentage on the net revenue of 21.3%. In the year-to-date, investments total R\$2,695.8 million (corresponding to 23.3% of the net revenue), mostly applied to acquisition of licenses.

SPECIAL REVIEW REPORT OF INDEPENDENT AUDITORS

To the Board of Directors and Shareholders
Vivo Participações S.A.

1. We have performed a special review of the accompanying Quarterly Information (ITR) of Vivo Participações S.A. (the Company) and consolidated for the quarter ended September 30, 2008, including the balance sheets,

statements of income, report on the Company's performance and other significant information, prepared under the responsibility of management.

2. We conducted our review in accordance with specific standards established by the Brazilian Institute of Independent Auditors (IBRACON), together with the Federal Accountancy Board (CFC), which consisted principally of: (a) inquiries of and discussions with officials responsible for the accounting, financial and operating areas of the Company as to the main criteria adopted in preparing the Quarterly Information, and (b) review of the information and subsequent events that had or might have had material effects on the financial position and operations of the Company.

3. Based on our special review, we are not aware of any material modification that should be made to the Quarterly Information (Company and consolidated) referred to above for it to be in conformity with the standards established by the Brazilian Securities Commission (CVM), specifically applicable to the preparation of Quarterly Information, including CVM Ruling No. 469/08.

4. As mentioned in Note 2b, Law No. 11638, approved on December 28, 2007 to take effect on January 1, 2008, modified, set aside and added new provisions to those of Law No. 6404/76 (Corporation Law) and eventually changed the accounting practices adopted in Brazil. While such law has already taken effect, some changes depend on standards to be set by regulators so that they can be fully applied by entities. Accordingly, in this transition phase, CVM Ruling N°. 469/08 allowed non-application of the provisions of Law No. 11638/07 for preparation of Quarterly Financial Information (ITR). As a consequence, the accounting information contained in the Quarterly Financial Information (ITR) for the quarter ended September 30, 2008 was prepared in accordance with specific CVM rulings and does not reflect all the changes in accounting practices introduced by Law No. 11638/07.
