UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, D.C. 20549

FORM 10-Q

(Mark One)

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended: September 30, 2014

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission File Number: 001-34979

SIMPLICITY BANCORP, INC.

(Exact name of registrant as specified in its charter)

Maryland 26-1500698
(State or other jurisdiction of incorporation) (I.R.S. Employer Identification No.)

1359 N. Grand Avenue, Covina, CA 91724
(Address of principal executive offices) (Zip Code)

(800) 524-2274
(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Sections 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer
Non-accelerated filer Smaller Reporting Company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

Indicate the number of shares outstanding of each of the issuer's classes of common stock, as of the latest practicable date:

Common Stock, \$.01 par value – 7,393,308 shares outstanding as of November 5, 2014.

SIMPLICITY BANCORP, INC. AND SUBSIDIARY

Notes to Consolidated Financial Statements

(Unaudited)

Note 1 – Nature of Business and Significant Accounting Policies

Nature of Business: Simplicity Bancorp, Inc. (the “Company”), is a Maryland corporation that owns all of the outstanding common stock of Simplicity Bank (the “Bank”). The Company’s primary activity is holding all of the outstanding shares of common stock of Simplicity Bank. The Bank is a federally chartered savings bank headquartered in Covina, California. The Bank’s principal business activity consists of attracting retail deposits from the general public and originating or purchasing primarily loans secured by multi-family residences and first mortgages on owner-occupied, one-to-four family residences located in its market area, and to a lesser extent, commercial real estate, automobile and other consumer loans. The Bank also engages in mortgage banking activities and, as such, originates, sells and services one-to-four family residential mortgage loans.

On September 27, 2014, the Company entered into a merger agreement with HomeStreet, Inc. (“HomeStreet”), under which the Company will merge with and into HomeStreet and the Bank will merge with and into HomeStreet’s subsidiary, HomeStreet Bank (the “Merger”). Under the terms of the 100% stock agreement, the Company’s stockholders are expected to receive one share of HomeStreet common stock for each share owned of the Company’s common stock, subject to adjustment if HomeStreet’s closing stock price during a specified measurement period prior to closing is more than \$20.0 or less than \$15.0 per share. The Merger is expected to close in the first quarter of calendar year 2015, subject to certain conditions set forth in the merger agreement. For more information, please refer to the Agreement and Plan of Merger attached as Exhibit 2.1 to the Company’s Current Report on Form 8-K filed with the SEC on October 1, 2014.

The Company’s business activities generally are limited to passive investment activities and oversight of its investment in the Bank. Unless the context otherwise requires, all references to the Company include the Bank and the Company on a consolidated basis.

Principles of Consolidation and Basis of Presentation: The financial statements of Simplicity Bancorp, Inc. have been prepared in conformity with accounting principles generally accepted in the United States of America (“GAAP”) and predominant practices followed by the financial services industry. The consolidated financial statements presented in this report include the accounts of Simplicity Bancorp, Inc. and its wholly-owned subsidiary, Simplicity Bank. All material intercompany balances and transactions have been eliminated in consolidation. In the opinion of the Company’s management, all adjustments consisting of normal recurring accruals necessary for a fair presentation of the financial condition and results of operations for the interim periods included herein have been made.

The results of operations for the three months ended September 30, 2014 are not necessarily indicative of the results of operations that may be expected for any other interim periods within the fiscal year ending June 30, 2015. Certain information and note disclosures normally included in the Company’s annual financial statements have been condensed or omitted. Therefore, these consolidated financial statements and notes thereto should be read in conjunction with the consolidated financial statements and notes included in the 2014 Annual Report on Form 10-K filed with the Securities and Exchange Commission.

Use of Estimates in the Preparation of Consolidated Financial Statements: The preparation of consolidated financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of income and expenses during the reporting period. Changes in these estimates and assumptions are considered reasonably possible and may have a material impact on the consolidated financial statements and thus actual results could differ from the amounts reported and disclosed herein. Material estimates that are particularly susceptible to significant change in the near term relate to the determination of the allowance for loan losses, the valuation of real estate owned, mortgage servicing assets (“MSAs”), mortgage banking derivatives, deferred tax assets and fair values of financial instruments.

Recent Accounting Pronouncements:

Effect of Newly Issued But Not Yet Effective Accounting Standards:

In January 2014, the Financial Accounting Standards Board (“FASB”) issued Accounting Standards Update (“ASU”) 2014-01, Investments-Equity Method and Joint Ventures (Topic 323): Accounting for Investments in Qualified Affordable Housing Projects, which simplifies the amortization method an entity uses and modifies the criteria an entity must meet to account for a low-income housing tax credit investment by using ASC 323-740’s measurement and presentation alternative, including the simplified amortization method. This method permits an investment’s performance to be presented net of the related tax benefits as part of income tax expense. For public entities, the ASU is effective for annual periods beginning after December 15, 2014, and interim periods therein. Early adoption is permitted. The amendments should be applied retrospectively to all periods presented. The adoption of this guidance is not expected to have a material effect on the Company’s results of operations or financial position.

In January 2014, the FASB issued ASU 2014-04, Receivables-Troubled Debt Restructurings by Creditors (Subtopic 310-40): Reclassification of Residential Real Estate Collateralized Consumer Mortgage Loans Upon Foreclosure. This ASU amends ASC 310 to clarify when an entity is considered to have obtained physical possession (from an in-substance possession or foreclosure) of a residential real estate property collateralizing a mortgage loan. A creditor is considered to have received physical possession of residential real estate property collateralizing a consumer mortgage loan, upon either (1) the creditor obtaining legal title to the residential real estate property upon completion of a foreclosure or (2) the borrower conveying all interest in the residential real estate property to the creditor to satisfy that loan through completion of a deed in lieu of foreclosure or through a similar legal agreement. Upon physical possession of such real estate property, an entity is required to reclassify the nonperforming mortgage loan to other real estate owned. The ASU is effective for public business entities for annual periods, and interim periods within those annual periods, beginning after December 15, 2014. Early adoption is permitted. The amendments in the standard may be adopted using either a modified retrospective transition method or a prospective transition method. The adoption of this guidance is not expected to have a material effect on the Company’s results of operations or financial position.

In May 2014, the FASB issued ASU No. 2014-09, Revenue From Contracts With Customers, that outlines a single comprehensive model for entities to use in accounting for revenue arising from contracts with customers and supersedes most current revenue recognition guidance, including industry-specific guidance. The ASU is based on the principle that an entity should recognize revenue to depict the transfer of goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. The ASU also requires additional disclosure about the nature, amount, timing and uncertainty of revenue and cash flows arising from customer contracts, including significant judgments and changes in judgments and assets recognized from costs incurred to fulfill a contract. Entities have the option of using either a full retrospective or a modified retrospective approach for the adoption of the new standard. The ASU becomes effective for annual reporting periods beginning after December 15, 2016, including interim periods within that reporting period. Early application is not permitted. The adoption of this guidance is not expected to have a material effect on the Company’s results of operations or financial position.

Note 2 – Earnings Per Share

The following table sets forth earnings per share calculations for the three months ended September 30, 2014 and 2013:

	Three months ended September 30,	
	2014	2013
	(Dollars in thousands, except per share data)	
Basic		
Net income	\$1,076	\$1,149
Less: Net income allocated to restricted stock awards	(11) (9
Net income allocated to common stockholders	\$1,065	\$1,140
Weighted average common shares outstanding	6,965,443	7,625,978
Basic earnings per common share	\$0.15	\$0.15
Diluted		
Net income	\$1,076	\$1,149
Less: Net income allocated to restricted stock awards	(11) (9
Net income allocated to common stockholders	\$1,065	\$1,140
Weighted average common shares outstanding	6,965,443	7,625,978
Add: Dilutive effect of stock options	22,129	19,453
Average shares and dilutive potential common shares	6,987,572	7,645,431
Diluted earnings per common share	\$0.15	\$0.15

The two-class method is used in the calculation of basic and diluted earnings per share. Under the two-class method, earnings per share is determined for each class of common stock and participating securities according to dividends declared (or accumulated) and participation rights in undistributed earnings. Restricted stock contains rights to non-forfeitable dividends and qualifies as a participating security. Employee Stock Ownership Plan (“ESOP”) shares are considered outstanding for this calculation unless unearned. For the three months ended September 30, 2014 and 2013, 10,355 ESOP shares were allocated during the respective quarters. 331,366 ESOP shares remained unearned at September 30, 2014 as compared to 372,787 ESOP shares remained unearned at September 30, 2013.

Basic earnings per common share is net income allocated to common stockholders divided by the weighted average number of common shares outstanding during the period. Diluted earnings per common share includes the dilutive effect of additional potential common shares issuable under stock options. For the three months ended September 30, 2014 and 2013, outstanding stock options to purchase 82,440 shares and 87,691 shares, respectively, were anti-dilutive and not considered in computing diluted earnings per common share. Stock options are not considered participating securities as they do not contain rights to non-forfeitable dividends.

Note 3 – Fair Value Measurements

FASB ASC 820-10 establishes a fair value hierarchy which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The standard describes three levels of inputs that may be used to measure fair value:

Level 1: Quoted prices (unadjusted) for identical assets or liabilities in active markets that the entity has the ability to access as of the measurement date.

Level 2: Significant other observable inputs other than Level 1 prices such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data.

Level 3: Significant unobservable inputs that reflect a reporting entity’s own assumptions about the assumptions that market participants would use in pricing an asset or liability.

There were no financial or nonfinancial instruments transferred in or out of Level 1, 2, or 3 input categories during the three months ended September 30, 2014 and 2013.

8

Investment Securities: The fair values for investment securities are determined by quoted market prices, if available (Level 1). For securities where quoted prices are not available, fair values are calculated based on market prices of similar securities (Level 2). For securities where quoted prices or market prices of similar securities are not available, fair values are calculated using discounted cash flows or other market indicators (Level 3).

Mortgage Servicing Assets: MSAs are evaluated for impairment based upon the fair value of the rights as compared to carrying amount. The fair value is determined at a tranche level, based on a valuation model that calculates the present value of estimated future net servicing income. If the carrying amount of an individual tranche exceeds fair value, impairment is recorded on that tranche so that the servicing asset is carried at fair value. The valuation model utilizes assumptions that market participants would use in estimating future net servicing income and that can be validated against available market data such as prepayment speeds, ancillary income, servicing costs, and delinquency rates. The significant assumptions include discount rate and prepayment speed incorporated into the valuation model that reflect management's best estimate resulting in a level 3 classification.

Assets and liabilities measured at fair value on a recurring basis are summarized in the following tables:

	Total	Fair Value Measurements Using		
		Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Observable Inputs (Level 2)	Other Significant Unobservable Inputs (Level 3)
(Dollars in thousands)				
September 30, 2014				
Assets				
Available-for-sale securities				
Mortgage-backed securities (residential)	\$33,638	\$—	\$ 33,638	\$—
Collateralized mortgage obligations (residential)	20,391	—	20,391	—
Total available-for-sale securities	\$54,029	\$—	\$ 54,029	\$—
June 30, 2014				
Assets				
Available-for-sale securities				
Mortgage-backed securities (residential)	\$35,216	\$—	\$ 35,216	\$—
Collateralized mortgage obligations (residential)	21,667	—	21,667	—
Total available-for-sale securities	\$56,883	\$—	\$ 56,883	\$—

Nonrecurring fair value measurements typically involve assets that are periodically evaluated for impairment and for which any impairment is recorded in the period in which the remeasurement is performed. The following assets and liabilities were measured at fair value on a non-recurring basis:

	Total	Fair Value Measurements Using		
		Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Observable Inputs (Level 2)	Other Significant Unobservable Inputs (Level 3)
(Dollars in thousands)				
Assets at September 30, 2014				
MSAs	\$13	\$—	\$ —	\$13
Assets at June 30, 2014				
MSAs	\$75	\$—	\$ —	\$75

At September 30, 2014 and June 30, 2014, no nonfinancial assets and liabilities were measured at fair value on a non-recurring basis.

Impairment of MSAs is determined at the tranche level and recognized through a valuation allowance for each individual grouping, to the extent that fair value is less than the carrying amount. The impairment amount was \$6,000 as of September 30, 2014 as compared to \$10,000 as of June 30, 2014. There was a \$4,000 impairment recovery recorded during the three months ended September 30, 2014 and 2013.

The following table presents quantitative information about level 3 fair value measurements for financial instruments measured at fair value on a recurring and non-recurring basis as of the dates indicated:

September 30, 2014	Fair Value	Valuation Techniques	Unobservable Inputs	Range (Weighted Avg)
	(Dollars in thousands)			
MSAs	\$13	Discounted Cash Flow	Discount Rate CPR	8.5% 5.99% - 14.50% (7.92%)
June 30, 2014	Fair Value	Valuation Techniques	Unobservable Inputs	Range (Weighted Avg)
	(Dollars in thousands)			
MSAs	\$75	Discounted Cash Flow	Discount Rate CPR	8.5% 5.90% to 14.52% (8.38%)

Fair Value of Financial Instruments

The estimated fair value amounts have been determined by the Company using available market information and appropriate valuation methodologies. However, considerable judgment is required to interpret market data to develop the estimates of fair value. Accordingly, the estimates presented herein are not necessarily indicative of the amounts the Company could realize in a market exchange. The use of different assumptions and/or estimation methodologies may have a material effect on the estimated fair value amounts.

The following methods and assumptions were used to estimate fair value of each class of financial instruments for which it is practicable to estimate fair value:

Cash and Cash Equivalents

The carrying amounts of cash and cash equivalents approximate fair values. Cash on hand and non-interest due from bank accounts are classified as Level 1 and federal funds sold are classified as Level 2.

Investments

Estimated fair values for securities held-to-maturity are obtained from quoted market prices where available and are classified as Level 1. Where quoted market prices are not available, estimated fair values are based on quoted market prices of comparable instruments and are classified as Level 2.

Securities available-for-sale that are previously reported are excluded from the fair value disclosure below.

FHLB Stock

It is not practical to determine the fair value of FHLB stock due to restrictions placed on its transferability.

Loans Held for Sale

Fair value for loans held for sale is determined using quoted secondary-market prices such as loan sale commitments and is classified as Level 2.

Loans

Fair value for loans are estimated using discounted cash flow analyses, using interest rates currently being offered for loans with similar terms to borrowers of similar credit quality resulting in a Level 3 classification. The methods utilized to estimate the fair value of loans do not necessarily represent an exit price.

MSAs

The Company uses the amortization method for its MSAs and assesses the MSAs for impairment based on fair value. The fair value of MSAs is determined at tranche level using significant assumptions such as discount rate and prepayment speed and is classified as Level 3. MSAs tranches with impairment recorded as described previously are excluded from the fair value disclosure below.

Accrued Interest Receivable

Consistent with the asset or liability they are associated with, the carrying amounts of accrued interest receivable approximate fair value resulting in a either Level 2 or Level 3 classification.

Deposits

The fair values disclosed for demand deposits are, by definition, equal to the amount payable on demand at the reporting date (i.e., their carrying amounts) resulting in a Level 2 classification. The carrying amounts of variable rate, fixed-term money market accounts and certificates of deposit approximate their fair values at the reporting date resulting in a Level 2 classification. Fair values for fixed rate certificates of deposit are estimated using a discounted cash flows calculation that applies interest rates currently being offered on certificates to a schedule of aggregated expected monthly maturities on time deposits resulting in a Level 2 classification.

FHLB Advances

The fair values of the Company's FHLB advances are estimated using discounted cash flow analyses based on the current borrowing rates for similar types of borrowing arrangements resulting in a Level 2 classification.

Off-Balance Sheet Financial Instruments

The fair values for the Company's off-balance sheet loan commitments are estimated based on fees charged to others to enter into similar agreements taking into account the remaining terms of the agreements and credit standing of the Company's customers. The estimated fair value of these commitments is not significant.

The carrying amounts and estimated fair values of the Company's financial instruments are summarized as follows:

Fair Value Measurements at September 30, 2014 Using:					
Carrying Amount	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Fair Value

Ginnie Mae	30	1	—	31
Collateralized mortgage obligations (residential):				
Fannie Mae	207	5	—	212
Total	\$395	\$11	\$—	\$406

There were no sales of securities during the three months ended September 30, 2014 and September 30, 2013.

All mortgage-backed securities and collateralized mortgage obligations have varying contractual maturity dates at September 30, 2014. Expected maturities may differ from contractual maturities because borrowers may have the right to call or repay obligations with or without call or repayment penalties. The Company did not have any securities that were callable as of September 30, 2014.

Securities with unrealized losses at September 30, 2014 and June 30, 2014, aggregated by investment category and length of time that individual securities have been in a continuous unrealized loss position, are as follows:

	Less than 12 months		12 months or more		Total	
	Fair Value	Unrealized Loss	Fair Value	Unrealized Loss	Fair Value	Unrealized Loss
	(Dollars in thousands)					
September 30, 2014						
Description of Securities						
Mortgage-backed securities (residential)	\$8,893	\$(11)	\$15,741	\$(446)	\$24,634	\$(457)
Collateralized mortgage obligations (residential)	317	(1)	878	(4)	1,195	(5)
Total temporarily impaired	\$9,210	\$(12)	\$16,619	\$(450)	\$25,829	\$(462)
June 30, 2014						
Description of Securities						
Mortgage-backed securities (residential)	\$—	\$—	\$16,404	\$(376)	\$16,404	\$(376)
Collateralized mortgage obligations (residential)	12,636	(14)	1,598	(9)	14,234	(23)
Total temporarily impaired	\$12,636	\$(14)	\$18,002	\$(385)	\$30,638	\$(399)

The Company evaluates securities for other-than-temporary impairment at least on a quarterly basis, and more frequently when economic or market concerns warrant such evaluation. Consideration is given to the length of time and the extent to which the fair value has been less than cost, the financial condition and near-term prospects of the issuer, and the Company does not have the intent to sell these securities and it is not more likely than not that it will be required to sell the securities before their anticipated

recovery. In analyzing an issuer's financial condition, the Company may consider whether the securities are issued by the federal government or its agencies, whether downgrades by bond rating agencies have occurred, and the results of reviews of the issuer's financial condition.

At September 30, 2014, eight debt securities had an aggregate unrealized loss of 1.8% of the Company's amortized cost basis. At June 30, 2014, ten debt securities had an unrealized loss of 1.3% of the Company's amortized cost basis. We do not own any non-agency mortgage-backed securities ("MBSs") or collateralized mortgage obligations ("CMOs"). All MBSs and CMOs were issued by a wholly-owned government corporation, Ginnie Mae, or U.S.

government-sponsored enterprises and agencies, including Fannie Mae and Freddie Mac, institutions which the government has affirmed its commitment to support. The unrealized losses relate principally to the general change in interest rates and liquidity, and not credit quality, that has occurred since the securities' purchase dates, and such unrecognized losses or gains will continue to vary with general interest rate level fluctuations in the future. As management has the intent and ability to hold debt securities until recovery, which may be maturity, and it is not more likely than not that it will be required to sell the securities before their anticipated recovery, no declines in fair value are deemed to be other-than-temporary as of September 30, 2014 and June 30, 2014.

At September 30, 2014 and June 30, 2014, there were no investments in any one issuer, other than the U.S.

Government and its sponsored enterprises and agencies, in an amount greater than 10% of stockholders' equity.

Note 5 – Loans

The composition of loans consists of the following:

	September 30, 2014	June 30, 2014
	(Dollars in thousands)	
Real Estate:		
One-to-four family residential	\$282,757	\$288,960
Multi-family residential	321,792	335,040
Commercial real estate	33,696	38,062
	638,245	662,062
Consumer:		
Automobile	48,615	45,686
Home equity	607	625
Other consumer loans, primarily unsecured	9,990	11,481
	59,212	57,792
Total loans	697,457	719,854
Deferred net loan origination costs	116	213
Net premium on purchased loans	240	263
Allowance for loan losses	(4,330) (4,580
Loans receivable, net	\$693,483	\$715,750

Loans held for sale totaled \$3.1 million as of September 30, 2014 as compared to \$3.7 million as of June 30, 2014.

Loans held for sale are recorded at the lower of cost or fair value. Fair value is determined by outstanding commitments from the investor. Proceeds from sales of loans held for sale were \$11.7 million and \$9.5 million during the three months ended September 30, 2014 and 2013, resulting in net gain on sales of \$199,000 and \$185,000, respectively.

The following is an analysis of the changes in the allowance for loan losses:

	Allowance for loan losses for the Three months ended September 30, 2014						
	One-to-four family (Dollars in thousands)	Multi-family residential	Commercial real estate	Automobile	Home equity	Other	Total
Balance, beginning of period	\$2,300	\$ 993	\$ 1,051	\$136	\$2	\$98	\$4,580

Total ending loan balance	\$288,960	\$335,040	\$38,062	\$45,686	\$625	\$11,481	\$719,854

A loan is impaired when it is probable, based on current information and events, the Company will be unable to collect all contractual principal and interest payments due in accordance with the terms of the loan agreement. When it is determined that a loss is probable, a valuation allowance is established and included in the allowance for loan

losses. The amount of impairment is determined by the difference between the recorded investment in the loan and the present value of expected cash flows, or estimated net realizable value of the underlying collateral on collateral dependent loans.

The difference between the recorded investment and unpaid principal balance of loans relates to net deferred origination costs, net premiums on purchased loans, charge-offs and interest payments received on impaired loans that are recorded as a reduction of principal. There were no collateral dependent loans measured at fair value with a valuation allowance recorded and \$7.4 million impaired loans evaluated based on the loans' present value of expected cash flows with a valuation allowance of \$773,000 at September 30, 2014. This compares to no collateral dependent loans measured at fair value with a valuation allowance recorded and \$8.6 million impaired loans evaluated based on the loans' present value of expected cash flows with a valuation allowance of \$962,000 at June 30, 2014.

The following tables present loans individually evaluated for impairment by class of loans as of September 30, 2014 and June 30, 2014:

	Unpaid Principal Balance (Dollars in thousands)	Recorded Investment	Allowance for Loan Losses Allocated
September 30, 2014			
With no related allowance recorded:			
Real estate loans:			
One-to-four family	\$6,445	\$5,302	\$ —
Multi-family residential	1,647	1,239	—
Commercial real estate	1,892	1,390	—
	9,984	7,931	—
With an allowance recorded:			
Real estate loans:			
One-to-four family	6,542	6,278	726
Multi-family residential	—	—	—
Commercial real estate	1,164	1,164	47
Other loans:			
Other	7	7	7
	7,713	7,449	780
Total	\$17,697	\$15,380	\$ 780
	Unpaid Principal Balance (Dollars in thousands)	Recorded Investment	Allowance for Loan Losses Allocated
June 30, 2014			
With no related allowance recorded:			
Real estate loans:			
One-to-four family	\$6,175	\$5,035	\$ —
Multi-family residential	1,656	1,263	—
Commercial real estate	3,084	2,336	—
	10,915	8,634	—
With an allowance recorded:			
Real estate loans:			
One-to-four family	7,705	7,396	910
Commercial real estate	1,170	1,170	52
Other loans:			
Automobile	2	2	2
Other	15	15	15
	8,892	8,583	979
Total	\$19,807	\$17,217	\$ 979

The following table presents monthly average of individually impaired loans by class for the three months ended September 30, 2014 and 2013:

	Three months ended September 30,	
	2014	2013
	(Dollars in thousands)	
Real estate loan:		
One-to-four family	\$12,005	\$14,385
Multi-family residential	1,251	1,601
Commercial real estate	3,030	5,952
Total	\$16,286	\$21,938

Payments received on impaired loans are recorded as a reduction of principal. Interest payments collected on non-accrual loans are characterized as payments of principal rather than payments of the outstanding accrued interest on the loans until the remaining principal on the non-accrual loans is considered to be fully collectible. If the loan returns to accrual status, interest income would be recognized based on the effective yield to maturity on the loan and the amount of interest applied to principal will be accreted over the remaining term of the loan.

Foregone interest income, which would have been recorded had the non-accrual loans been current in accordance with their original terms, amounted to \$156,000 and \$253,000 for the three months ended September 30, 2014 and 2013, respectively, and was not included in the results of operations. Included in foregone interest income, \$144,000 and \$151,000 for the three months ended September 30, 2014 and 2013, respectively, was collected and applied to the net loan balances.

The following table presents interest payments recorded as reduction of principal on impaired loans by class:

	Three months ended September 30,	
	2014	2013
	(Dollars in thousands)	
Real estate loan:		
One-to-four family	\$83	\$94
Multi-family residential	15	30
Commercial real estate	46	27
Total	\$144	\$151

At September 30, 2014 and June 30, 2014, there were no loans past due more than 90 days and still accruing interest.

The following table presents non-accrual loans by class of loans:

	September 30, 2014	June 30, 2014
	(Dollars in thousands)	
Non-accrual loans:		
Real estate loans:		
One-to-four family	\$4,958	\$5,390
Multi-family residential	760	781
Commercial	1,390	1,460
Other loans:		
Automobile	—	2
Other	7	15
Total non-accrual loans	\$7,115	\$7,648

There were ten one-to-four family residential loans totaling \$3.2 million, two multi-family loans totaling \$760,000 and two commercial real estate loans totaling \$1.4 million on non-accrual status that were performing in accordance with their contractual terms at September 30, 2014. There were seven one-to-four family residential loans totaling \$2.1 million and two multi-family loans totaling \$781,000 on non-accrual status that were performing in accordance with their contractual terms at June 30, 2014.

The following tables present the aging of past due loans by class of loans:

Other	31	4	15	50	11,431	11,481
Total loans	\$3,328	\$428	\$717	\$4,473	\$715,381	\$719,854

Troubled Debt Restructurings:

Troubled debt restructurings totaled \$10.8 million and \$12.5 million at September 30, 2014 and June 30, 2014, respectively. Troubled debt restructurings of \$2.5 million and \$2.9 million are included in the non-accrual loans at September 30, 2014 and June 30, 2014. The Bank has allocated \$66,000 and \$79,000 of valuation allowance to customers whose loan terms have been modified in troubled debt restructurings and were on non-accrual status as of September 30, 2014 and June 30, 2014, respectively. Troubled debt restructured loans are included in non-accrual loans until there is a sustained period of payment performance (usually six months or longer and determined on a case by case basis) and there is a reasonable assurance that the timely payment will continue. During the three months ended September 30, 2014, there was no troubled debt restructurings returned to accrual status. This compares to four troubled debt restructurings with an aggregate outstanding balance of \$1.4 million that were returned to accrual status during the same period last year. There were no further commitments to customers whose loans were troubled debt restructurings at September 30, 2014 and June 30, 2014.

During the three months ended September 30, 2014 and 2013, there were no new loans that were modified as troubled debt restructurings.

At September 30, 2014 and 2013, there were no loans modified as troubled debt restructurings within the previous 12 months for which there was a payment default. A loan is considered to be in payment default once it is 30 days contractually past due under the modified terms.

The terms of certain other loans were modified during the three months ended September 30, 2014 and 2013 that did not meet the definition of a troubled debt restructuring. During the three months ended September 30, 2014, ten loans in the amount of \$3.1 million were modified and not accounted for as troubled debt restructurings. During the three months ended September 30, 2013, six loans in the amount of \$2.4 million were modified and not accounted for as troubled debt restructurings. The modifications were generally made to refinance the credits to maintain the borrowing relationships and consisted of term or rate modifications. The borrowers were not experiencing financial difficulty or delay in loan payments and the modifications were made at market terms.

In order to determine whether a borrower is experiencing financial difficulty, an evaluation is performed of the probability that the borrower will be in payment default on any of its debt in the foreseeable future without the modification. This evaluation is performed under the Company's internal underwriting policy.

Credit Quality Indicators

The Company categorizes loans into risk categories based on relevant information about the ability of the borrowers to service their debt such as: current financial information, historical payment experience, credit documentation and current economic trends among other factors. This analysis is performed monthly. The Company uses the following definitions for risk ratings:

Special Mention. Loans are classified as special mention when it is determined a loan relationship should be monitored more closely. Loans that are 60 days to 89 days past due are generally classified as special mention. In addition, loans are classified as special mention for a variety of reasons including changes in recent borrower financial conditions, changes in borrower operations, changes in value of available collateral, concerns regarding changes in economic conditions in a borrower's industry, and other matters. A loan classified as special mention in many instances may be performing in accordance with the loan terms.

Substandard. Loans that are 90 days or more past due are generally classified as substandard. A loan is also considered substandard if it is inadequately protected by the current net worth and paying capacity of the obligor or of the collateral pledged, if any. Substandard assets include those characterized by the distinct possibility that the Company will sustain some loss if the deficiencies are not corrected.

Doubtful. Assets classified as doubtful have all of the weaknesses inherent in those classified substandard with the added characteristic that the weaknesses present make collection or liquidation in full highly questionable and improbable.

Loss. Assets classified as loss are considered uncollectible and of such little value that continuance as an asset, without establishment of a valuation allowance individually evaluated or charge-off, is not warranted.

Loans not meeting the criteria as part of the above described process are considered to be Pass rated loans. Pass rated loans are generally well protected by the current net worth and paying capacity of the obligor or by the value of the underlying collateral. Pass rated assets are not more than 59 days past due and are generally performing in accordance with the loan terms.

As of September 30, 2014 and June 30, 2014, and based on the most recent analysis performed, the risk category of loans by class of loans is as follows:

	Pass	Special Mention	Substandard	Doubtful	Loss
September 30, 2014	(Dollars in thousands)				
Real estate loans:					
One-to-four family	\$267,153	\$9,396	\$6,208	\$—	\$—
Multi-family	316,353	4,235	1,204	—	—
Commercial	19,989	3,437	10,270	—	—
Other loans:					
Automobile	48,224	235	140	16	—
Home equity	607	—	—	—	—
Other	9,945	15	2	21	7
Total loans	\$662,271	\$17,318	\$17,824	\$37	\$7
June 30, 2014	(Dollars in thousands)				
Real estate loans:					
One-to-four family	\$272,261	\$10,257	\$6,442	\$—	\$—
Multi-family	327,999	3,174	3,867	—	—
Commercial	24,708	7,556	5,798	—	—
Other loans:					
Automobile	45,542	87	55	—	2
Home equity	625	—	—	—	—
Other	11,455	8	2	1	15
Total loans	\$682,590	\$21,082	\$16,164	\$1	\$17

Note 6 - Real Estate Owned

Changes in real estate owned are summarized as follows:

	Three months ended	
	September 30, 2014	September 30, 2013
	(Dollars in thousands)	
Beginning of period	\$284	\$—
Transfers in	306	325
Capitalized expenditures	—	—
Sales	(284) —
End of period	\$306	\$325

Net income (expense) related to foreclosed assets are as follows and are included in net operating expense:

	Three months ended	
	September 30, 2014	September 30, 2013
	(Dollars in thousands)	
Net gain on sales	\$62	\$—
Net operating expense	(16) (28
Total	\$46	\$(28

The Company has no valuation allowance or activity in the valuation allowance account during the three months ended September 30, 2014 and 2013.

Note 7 – Federal Home Loan Bank Advances

FHLB advances were \$65.0 million and \$85.0 million at September 30, 2014 and June 30, 2014, respectively. At September 30, 2014, the stated interest rates on the Bank's advances from the FHLB ranged from 0.82% to 2.43% with a weighted average stated rate of 1.79%. At June 30, 2014, the stated interest rates on the Bank's advances from the FHLB ranged from 0.82% to 2.43% with a weighted average stated rate of 1.57%.

The contractual maturities by fiscal year of the Bank's FHLB advances over the next five years and thereafter are as follows:

Fiscal Year of Maturity	September 30, 2014	June 30, 2014
	(Dollars in thousands)	
2015	—	20,000
2016	—	—
2017	25,000	25,000
2018	10,000	10,000
2019	30,000	30,000
Total	\$65,000	\$85,000

Note 8 – Change in Accumulated Other Comprehensive Loss

Accumulated other comprehensive income includes unrealized gains and losses on securities available-for-sale and actuarial gains and losses, net periodic benefit costs and benefits paid for postretirement medical benefit. Changes in accumulated other comprehensive income are presented net of tax effect as a component of equity. Reclassifications out of accumulated other comprehensive income are recorded on the consolidated statement of income either as a noninterest income or expense.

The following tables present a summary of the accumulated other comprehensive income balances, net of tax, as of September 30, 2014 and 2013.

(Dollars in Thousands)	Three Months Ended September 30, 2014		
	Unrealized gains and losses on securities available-for-sale	Postretirement medical benefits costs items	Total
Balance at beginning of period	\$ (139)	\$ (85)	\$ (224)
Other comprehensive loss before reclassifications	(55)	(14)	(69)
Amounts reclassified from accumulated other comprehensive income	—	14	14
Tax effect of current period changes	22	—	22
Net current period other comprehensive loss	(33)	—	(33)
Balance at end of period	\$ (172)	\$ (85)	\$ (257)

(Dollars in Thousands)	Three Months Ended September 30, 2013		
	Unrealized gains and losses on securities available-for-sale	Postretirement medical benefits costs items	Total
Balance at beginning of period	\$ (362)	\$ (129)	\$ (491)
Other comprehensive income (loss) before reclassifications	93	(17)	76
Amounts reclassified from accumulated other comprehensive income	—	17	17
Tax effect of current period changes	(38)	—	(38)
Net current period other comprehensive income	55	—	55
Balance at end of period	\$ (307)	\$ (129)	\$ (436)

Note 9 – Repurchase of Common Stock

On February 27, 2014, the Company announced that its Board of Directors authorized the sixth stock repurchase program pursuant to which the Company intends to repurchase up to 5% of its issued and outstanding shares, or up to approximately 374,393 shares. Since November 2011, the Company has repurchased 2,312,765 shares under authorized stock repurchase programs. The shares were repurchased at prices ranging from \$12.00 to \$17.90 per share with a weighted average cost of \$15.02 per share. At September 30, 2014, there were 240,079 shares remaining to be repurchased under the sixth authorized stock repurchase program. For the three months ended September 30, 2014, the Company did not repurchase any shares.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Forward-Looking Statements

This Quarterly Report on Form 10-Q contains certain forward-looking statements and information relating to the Company and the Bank that are based on the beliefs of management as well as assumptions made by and information currently available to management. Forward-looking statements can be identified by the fact that they do not relate strictly to historical or current facts. They often include words like “believe,” “expect,” “anticipate,” “estimate,” and “intend” or future or conditional verbs such as “will,” “should,” “could,” or “may” and similar expressions or the negative thereof. Certain factors that could cause actual results to differ materially from expected results include, changes in the interest rate environment, changes in general economic conditions, restrictions of the operations on our business as a result of recent merger agreement, legislative and regulatory changes that adversely affect the business of Simplicity Bancorp, Inc. and Simplicity Bank, and changes in the securities markets. Should one or more of these risks or uncertainties materialize or should underlying assumptions prove incorrect, actual results may vary materially from those described herein. We caution readers not to place undue reliance on forward-looking statements. The Company disclaims any obligation to revise or update any forward-looking statements contained in this Form 10-Q to reflect future events or developments.

Market Area

Our success depends primarily on the general economic conditions in the California counties of Los Angeles, Orange, San Diego, San Bernardino, Riverside, Santa Clara and Alameda, as nearly all of our loans are to customers in this market area. There have been positive developments in current economic conditions since the end of the recession. Improving financial conditions, increasing credit availability, accommodative monetary policy, and healthier labor and housing markets all support the economic growth in our market area. According to the Beige Book published by the Federal Reserve in October 2014, economic activity continued to expand. Residential construction and real estate activity were mixed while commercial construction and real estate activity grew in most Districts. Banking conditions continued to improve and commercial loan volumes increased in nearly all reporting Districts. In the Twelfth Federal Reserve District (San Francisco), economic activity continued to improve moderately during mid-August through late September 2014. Real estate activity in the San Francisco District advanced, but growth trends in the residential sector were uneven across the San Francisco District. Prices of single-family homes accelerated in a few areas, while in other areas the pace of price increases declined. Sales of single-family homes were stable. Overall, multifamily construction and development activity remained strong. In Los Angeles, commercial real estate construction picked up. Overall loan demand increased moderately. Asset quality improved and current overall loan performance was comparable to that seen before the recession. Competition among lenders for customers with high-quality credit remained intense, which had depressed interest rates on loans, reducing net interest margins and profitability. Future growth opportunities will be influenced by the stability of the nation and the regional economy and other trends within California, including unemployment rates and housing market conditions.

Sustained employment gains have helped to lower the unemployment rate. Despite this sustained improvement, the broad array of labor market indicators suggest continued slack. In particular, California continues to experience elevated unemployment rates as compared to the national average. Unemployment rates in California decreased slightly from 7.4% in June 2014 to 7.3% in September 2014. This compares to the national unemployment rate which trended down from 6.1% in June 2014 to 5.9% in September 2014.

Comparison of Financial Condition at September 30, 2014 and June 30, 2014.

Assets. Total assets declined \$15.8 million, or 1.8%, to \$863.4 million at September 30, 2014 from \$879.2 million at June 30, 2014 due primarily to decreases in gross loans receivable and securities available-for-sale, partially offset by an increase in cash and cash equivalents.

Cash and cash equivalents increased by \$9.8 million, or 14.2%, to \$79.1 million at September 30, 2014 from \$69.3 million at June 30, 2014. The increase was primarily due to principal repayments of loans and securities and an increase in deposits.

Edgar Filing: Simplicity Bancorp, Inc. - Form 10-Q

Securities available-for-sale decreased by \$2.9 million, or 5.0%, to \$54.0 million at September 30, 2014 from \$56.9 million at June 30, 2014 due primarily to principal repayments of existing securities.

Gross loans receivable decreased by \$22.4 million, or 3.1%, to \$697.5 million at September 30, 2014 from \$719.9 million at June 30, 2014. The decrease was primarily attributable to principal repayments and payoffs in addition to the sale of newly originated conforming fixed rate one-to-four family residential loans in the secondary market.

Multi-family residential loans decreased \$13.2 million, or 4.0%, to \$321.8 million at September 30, 2014 from \$335.0 million at June 30, 2014 due to principal prepayments and payoffs outpacing new loan originations during the three months ended September 30, 2014. One-to-four family residential real estate loans decreased \$6.2 million, or 2.1%, to \$282.8 million at September 30, 2014 from \$289.0 million at

June 30, 2014 due primarily to principal prepayments and payoffs and sales of newly originated conforming fixed rate loans held for sale in the secondary market. Commercial real estate loans decreased \$4.4 million, or 11.5%, to \$33.7 million at September 30, 2014 from \$38.1 million at June 30, 2014 due to principal prepayments and payoffs as there have been no new commercial real estate loan originations during the three months ended September 30, 2014.

Consumer loans at September 30, 2014 which were comprised primarily of automobile loans totaling \$48.6 million increased \$1.4 million, or 2.5%, to \$59.2 million at September 30, 2014 from \$57.8 million at June 30, 2014 due to \$2.7 million in automobile loan originations during the three months ended September 30, 2014.

The allowance for loan losses decreased by \$250,000, or 5.5%, to \$4.3 million at September 30, 2014 from \$4.6 million at June 30, 2014 due primarily to a \$350,000 reversal of provision for loan losses during the three months ended September 30, 2014 resulting from recoveries as well as improved asset quality of the loan portfolio as evidenced by a lower level of criticized and non-accrual loans, and a decline in the historical loss factors for our first fiscal quarter of 2015. Non-performing assets decreased to \$7.4 million, or 0.86% of total assets at September 30, 2014 as compared to \$7.9 million, or 0.90% of total assets at June 30, 2014.

Deposits. Total deposits increased \$3.7 million, or 0.6%, to \$656.5 million at September 30, 2014 from \$652.8 million at June 30, 2014. The increase was comprised of a \$10.2 million increase in interest-bearing deposits, partially offset by a \$6.5 million decrease in non-interest bearing demand deposits.

The increase in interest-bearing deposits consisted of a \$23.0 million, or 28.1%, increase in interest-bearing checking from \$81.8 million at June 30, 2014 to \$104.8 million at September 30, 2014. The increase was partially offset by a \$8.6 million, or 6.3%, decrease in money market accounts from \$138.2 million at June 30, 2014 to \$129.5 million at September 30, 2014, a \$2.4 million, or 1.9%, decrease in savings accounts from \$125.8 million at June 30, 2014 to \$123.3 million at September 30, 2014, and a \$1.7 million, or 0.7%, decrease in certificates of deposit from \$246.5 million at June 30, 2014 to \$244.8 million at September 30, 2014. The growth in interest-bearing checking balances was due primarily to the Company's marketing strategy to promote interest-bearing checking deposits with enhanced features to deepen customer relationships. The decrease in certificates of deposit was attributable to non-relationship customers seeking higher yields at other financial institutions as accounts repriced to lower offering rates. The decline in money market balances was attributable to the promotion of interest-bearing checking accounts. Savings accounts decreased primarily due to the timing of customer payroll deposits as compared to June 30, 2014 and the discontinuation of certain savings products which traditionally had higher offering rates. The change in deposit mix was consistent with the Company's strategic decision to promote interest-bearing checking deposits to attract relationship customers in our target markets while reducing our reliance on time deposits by competing less aggressively on time deposit interest rates.

Non-interest bearing demand deposits decreased \$6.5 million, or 10.7%, from \$60.6 million at June 30, 2014 to \$54.1 million at September 30, 2014. The decline in non-interest bearing demand deposits was primarily a result of the timing of customer payroll deposits as compared to June 30, 2014.

Borrowings. FHLB advances decreased to \$65.0 million at September 30, 2014 as compared to \$85.0 million at June 30, 2014 due to a \$20.0 million scheduled maturity in a lower costing FHLB advance. The weighted average cost of FHLB advances increased to 1.79% at September 30, 2014 from 1.57% at June 30, 2014.

Stockholders' Equity. Total stockholders' equity, represented 15.9% of total assets and increased to \$137.5 million at September 30, 2014 from \$136.9 million at June 30, 2014. The increase in stockholders' equity was primarily attributable to \$1.1 million in net income, partially offset by cash dividends paid of \$634,000 during the three months ended September 30, 2014.

Average Balances, Net Interest Income, Yields Earned and Rates Paid

The following table sets forth certain information for the three months ended September 30, 2014 and 2013, respectively.

	For the three months ended September 30, 2014 ⁽¹⁾				2013 ⁽¹⁾			
	Average Balance	Interest	Average Yield/ Cost	%	Average Balance	Interest	Average Yield/ Cost	%
(Dollars in thousands)								
INTEREST-EARNING ASSETS								
Loans receivable ⁽²⁾	\$709,919	\$7,716	4.35	%	\$706,331	\$8,018	4.54	%
Securities ⁽³⁾	55,796	204	1.46		50,456	167	1.32	
Federal funds sold	66,663	39	0.23		49,269	29	0.24	
Federal Home Loan Bank stock	5,579	105	7.53		5,962	80	5.37	
Total interest-earning assets	837,957	8,064	3.85		812,018	8,294	4.09	
Noninterest earning assets	37,218				37,586			
Total assets	\$875,175				\$849,604			
INTEREST-BEARING LIABILITIES								
Interest-bearing checking	\$97,382	\$220	0.90	%	\$14,211	\$2	0.06	%
Money market	133,966	76	0.23		160,510	92	0.23	
Savings deposits	124,216	27	0.09		133,495	31	0.09	
Certificates of deposit	245,514	1,035	1.69		270,323	1,266	1.87	
Borrowings	75,000	312	1.66		60,000	249	1.66	
Total interest-bearing liabilities	676,078	1,670	0.99		638,539	1,640	1.03	
Noninterest bearing liabilities	61,896				66,353			
Total liabilities	737,974				704,892			
Equity	137,201				144,712			
Total liabilities and equity	\$875,175				\$849,604			
Net interest/spread		\$6,394	2.86	%		\$6,654	3.06	%
Margin ⁽⁴⁾			3.05	%			3.28	%
Ratio of interest-earning assets to interest bearing liabilities	123.94	%			127.17	%		

(1) Yields earned and rates paid have been annualized.

(2) Calculated net of deferred fees, loss reserves and includes non-accrual loans.

(3) Calculated based on amortized cost of held-to-maturity securities and fair value of available-for-sale securities.

(4) Net interest income divided by interest-earning assets.

Comparison of Results of Operations for the Three Months Ended September 30, 2014 and September 30, 2013. General. Net income for the three months ended September 30, 2014 of \$1.1 million was relatively unchanged as compared to the three months ended September 30, 2013 with a slight decrease of \$73,000, or 6.4%. Earnings per basic and diluted common share were both \$0.15 for the three months ended September 30, 2014 and 2013. The decrease in net income was due primarily to decreases in net interest income and noninterest income and an increase in income tax expense, partially offset by a reversal in provision for loan losses and a decrease in noninterest expense. Excluding merger related expenses of \$415,000, our net income would have been \$1.5 million.

Interest Income. Interest income decreased \$230,000, or 2.8%, to \$8.1 million for the three months ended September 30, 2014 from \$8.3 million for the three months ended September 30, 2013. The decline in interest income was primarily due to decreases in interest and fees on loans.

Interest and fees on loans decreased \$302,000, or 3.8%, to \$7.7 million for the three months ended September 30, 2014 from \$8.0 million for the three months ended September 30, 2013. The primary reason for the decrease was a decline of 19 basis points in the average yield on loans from 4.54% for the three months ended September 30, 2013 to 4.35% for the three months ended September 30, 2014. The decrease in the average yield on loans was primarily caused by lower yields earned on new loan originations and payoffs of higher yielding seasoned loans during the current period as a result of the low interest rate environment.

Interest Expense. Interest expense increased \$30,000, or 1.8%, to \$1.7 million for the three months ended September 30, 2014 from \$1.6 million for the three months ended September 30, 2013 as a result of an increase in interest expense on borrowings. The increase reflected a higher average balance of deposits and borrowings during the three months ended September 30, 2014, offset by a reduction in the average cost of funds on deposits as a result of continuing low interest rates.

Interest expense on deposits decreased \$33,000, or 2.4%, to \$1.4 million during the three months ended September 30, 2014 as compared to the same period last year. The primary reason for the decrease was a six basis point decline in the average cost of deposits from 0.96% for the three months ended September 30, 2013 to 0.90% for the three months ended September 30, 2014 due to the downward repricing of deposits in the low interest rate environment partially offset by an increase of \$22.5 million in the average balance of deposits to \$601.1 million for the three months ended September 30, 2014 from \$578.5 million for the three months ended September 30, 2013. The increase in the average balance of deposits was a result of continued growth from the promotion of the interest-bearing checking product.

Interest expense on borrowings increased \$63,000 or 25.3%, to \$312,000 during the three months ended September 30, 2014 as compared to \$249,000 for the same period last year. The increase was primarily attributable to a higher average balance of borrowings resulting from a \$25.0 million increase in FHLB advances during the second quarter of fiscal 2014 at a weighted average cost of 1.38%, partially offset by a repayment of \$20.0 million in FHLB advances that matured during the three months ended September 30, 2014 at a weighted average cost of 0.85%.

Provision for Loan Losses. During the quarter ended September 30, 2014, a \$350,000 reversal of provision for loan losses was recorded as compared to no provision for loan losses for the quarter ended September 30, 2013. The improvement in the provision was primarily a result of recoveries as well as continued asset quality improvement evidenced by declining delinquency ratios and a lower level of criticized and non-performing loans during the three months ended September 30, 2014 compared to the same period last year. Net recoveries of \$100,000 recorded during the quarter ended September 30, 2014 resulted in annualized net recoveries of 0.06% of average outstanding loans for the quarter ended September 30, 2014 as compared to annualized net charge-offs of 0.09% of average outstanding loans for the same period last year. Non-performing assets decreased to \$7.4 million, or 0.86% of total assets at September 30, 2014 as compared to \$7.9 million, or 0.90% of total assets at June 30, 2014 and \$13.5 million, or 1.88% of total assets at September 30, 2013. Delinquent loans 60 days or more past due were \$248,000, or 0.04% of total loans at September 30, 2014 as compared to \$1.1 million, or 0.16% of total loans at June 30, 2014 and \$6.4 million, or 0.89% of total loans at September 30, 2013. The decrease in delinquent loans at September 30, 2014 as compared to June 30, 2014 was primarily attributable to pay-offs, a loan of \$399,000 brought current, and a loan of \$301,000 transferred to REO. Loans 30 to 59 days delinquent totaled \$2.6 million, or 0.38% of total loans at September 30, 2014, as compared to \$3.3 million, or 0.47% of total loans at June 30, 2014 and \$430,000, or 0.06% of

total loans at September 30, 2013. Loans 30 to 59 days delinquent were either criticized or classified assets. Some loans 30 to 59 days delinquent were individually evaluated for impairment and others were collectively evaluated for impairment with additional qualitative adjustments factored in due to loan classification.

The reversal of provision for loan losses was comprised of a \$149,000 reduction in provision on one-to-four family loans, a \$271,000 reduction in provision on multi-family loans, a \$201,000 reduction in provision on commercial real estate loans, a \$232,000 provision on automobile loans, and a \$39,000 provision on other loans. The decrease in provision on one-to-four family residential loans was primarily due to a decline in the allowance for loan losses allocated to loans individually evaluated. The

decrease in provision on multi-family loans was primarily due to a lower level of classified multi-family loans, a decline in the overall historical loss factors on multi-family loans collectively evaluated for impairment, and a decrease in the balance of multi-family loans collectively evaluated for impairment. The decrease in provision on commercial real estate loans was primarily due to a recovery of \$250,000 on an impaired commercial real estate loan which was paid off during the three months ended September 30, 2014. The increase in provision on automobile loans was primarily caused by charge-offs and an increase in the balance of automobile loans collectively evaluated for impairment. The provision reflects management's continuing assessment of the credit quality of the Company's loan portfolio, which is affected by various trends, including current economic conditions.

Noninterest Income. Our noninterest income decreased \$69,000, or 4.7%, to \$1.4 million for the three months ended September 30, 2014 as compared to \$1.5 million for the three months ended September 30, 2013 due primarily to decreases in the fair values of mortgage banking derivative assets, partially offset by an increase in service charges and fees primarily attributable to higher mortgage loan servicing fee income as well as higher service charge income on non-interest bearing demand deposits. Management periodically reviews service charge rates to compensate for services provided while still maintaining a competitive position.

Noninterest Expense. Our noninterest expense decreased by \$192,000, or 3.1%, to \$6.1 million for the three months ended September 30, 2014 primarily due to decreases in advertising and promotional expense of \$149,000, other operating expense of \$144,000, ATM expense of \$78,000, salaries and benefits expense of \$76,000 and a net gain on REO foreclosure expenses and sales, gains and losses of \$74,000, partially offset by increases in legal fees of \$142,000 and professional services expense of \$159,000 related to the recently announced proposed merger.

Advertising and promotional expenses decreased \$149,000, or 53.0%, to \$132,000 for the three months ended September 30, 2014 as compared to \$281,000 for the same period last year. The decrease was primarily due to the overall reduction in branding and marketing campaign expenses as the Company manages more marketing initiatives internally.

Other operating expense decreased \$144,000, or 30.1%, to \$334,000 for the three months ended September 30, 2014 as compared to \$478,000 for the same period last year. The decrease was due primarily to decreases in the fair values of mortgage-banking derivatives liabilities and lower expenses in travel and conferences, personnel, supplies, and workers compensation insurance.

ATM expense decreased \$78,000, or 13.5%, to \$500,000 for the three months ended September 30, 2014 as compared to \$578,000 for the same period last year primarily due to removal of older models of ATMs in service in the prior fiscal period.

Salaries and benefits expense decreased \$76,000, or 2.5%, to \$2.9 million for the three months ended September 30, 2014 as compared to \$3.0 million for the same period last year primarily due to a decrease in the number of full-time equivalent employees.

REO foreclosure expenses and sales, gains and losses yielded a net gain of \$46,000 for the three months ended September 30, 2014, as compared to \$28,000 in net expense for the same period last year primarily due to a net gain on sale of a REO property of \$62,000 offset by foreclosure expenses.

Legal fees increased \$142,000, or 295.8%, to \$190,000 for the three months ended September 30, 2014 as compared to \$48,000 for the same period last year. Professional services expense increased \$159,000, or 31.4%, to \$666,000 for the three months ended September 30, 2014 as compared to \$507,000 for the same period last year. The increases were primarily due to \$165,000 in legal fees and \$250,000 in consulting expense related to the merger.

Income Tax Expense. Income tax expense increased \$286,000, or 42.3% to \$962,000 for the three months ended September 30, 2014 as compared to \$676,000 for the three months ended September 30, 2013. The effective tax rates were 47.2% and 37.0% for the three months ended September 30, 2014 and 2013, respectively. This higher effective tax rate for the three months ended September 30, 2014 as compared to the same period last year was primarily the result of non-deductible professional services and legal fees associated with the merger transaction, the termination of the California enterprise zone tax deduction as well as the expiration of California affordable housing tax credits effective January 2014.

Asset Quality

General. We continue our disciplined lending practices including our strict adherence to a long standing regimented credit culture that emphasizes the consistent application of underwriting standards to all loans. In this regard, we fully underwrite all loans based on an applicant's employment history, credit history and an appraised value of the subject property. With respect to loans we purchase, we underwrite each loan based upon our own underwriting standards prior to making the purchase except for loans purchased with a credit guarantee. The credit guarantee for the loans purchased in fiscal 2012 requires the seller to substitute or repurchase any loans sold to the Bank that become 60 days or more delinquent at the Bank's option. The credit quality of the loans purchased in fiscal 2012 was to our satisfaction and did not result in substitution or repurchase of any loans purchased as of September 30, 2014.

The following underwriting guidelines, among other things, have been used by us as underwriting tools to further limit our potential loss exposure:

• All variable rate one-to-four family residential loans are underwritten using the fully indexed rate.

• We only lend up to 80% of the lesser of the appraised value or purchase price for one-to-four family residential loans without private mortgage insurance ("PMI"), and up to 97% with PMI.

• We only lend up to 75% of the lesser of the appraised value or purchase price for multi-family residential loans.

• We only lend up to 65% of the lesser of the appraised value or purchase price for commercial real estate loans.

Additionally, our portfolio has remained strongly anchored in traditional mortgage products. We do not originate or purchase construction and development loans, teaser option-ARM loans, negatively amortizing loans or high loan-to-value loans.

All of our real estate loans are secured by properties located in California. The following tables set forth our real estate loans and non-accrual real estate loans by county:

Real Estate Loans by County as of September 30, 2014

Total loans	5	\$428	5	\$717	10	\$1,145

Delinquent loans 60 days or more past due totaled \$248,000 or 0.04% of total loans at September 30, 2014 as compared to \$1.1 million or 0.16% of total loans at June 30, 2014. Delinquent one-to-four family residential loans decreased to \$214,000 at September 30, 2014 from \$710,000 at June 30, 2014 due to payoffs and a loan transferred to REO. There were no delinquent multi-family loans at September 30, 2014 and June 30, 2014. There were no delinquent commercial real estate loans at September 30, 2014 as compared to 399,000 at June 30, 2014. The delinquent commercial real estate loan of 399,000 at June 30, 2014 was brought current during the three months ended September 30, 2014. There were no real estate loan that were over 90 days delinquent at September 30, 2014 in the process of foreclosure.

Non-Performing Assets. Non-performing assets consist of non-accrual loans and foreclosed assets. Loans to a customer whose financial condition has deteriorated are considered for non-accrual status whether or not the loan is 90 days or more past due. All loans past due 90 days or more are classified as non-accrual. At the time the loan is placed on non-accrual status, interest previously accrued but not collected is reversed and charged against current income. Payments received on non-accrual loans are recorded as a reduction of principal. Non-accrual loans also include troubled debt restructurings that are on non-accrual status. At September 30, 2014 and June 30, 2014 there were no loans past due more than 90 days and still accruing interest. Included in non-accrual loans were troubled debt restructurings of \$2.5 million and \$2.9 million as of September 30, 2014 and June 30, 2014, with specific valuation allowances of \$66,000 and \$79,000, respectively.

During the three months ended September 30, 2014 and 2013, there were no new loans that were modified as troubled debt restructurings. At September 30, 2014, there were seven non-accrual restructured loans, all of which were one-to-four family residential loans with an aggregate balance of \$2.5 million. Of the seven non-accrual restructured loans, four loans with an aggregate balance of \$1.5 million were performing in accordance with their revised contractual terms. At June 30, 2014, there were eight non-accrual restructured loans, all of which were one-to-four family residential loans with an aggregate balance of \$2.9 million. Of the eight non-accrual restructured loans, three loans with an aggregate balance of \$915,000 were performing in accordance with their revised contractual terms.

Troubled debt restructured loans are included in non-accrual loans until there is a sustained period of payment performance (usually six months or longer and determined on a case by case basis) and there is reasonable assurance that timely payment will continue. During the three months ended September 30, 2014, no troubled debt restructurings were returned to accrual status as a result of the borrowers paying the modified terms as agreed for a sustained period of more than six months and reasonable assurance that timely payment will continue. This compares to four troubled debt restructurings with an aggregate outstanding balance of \$1.4

million that were returned to accrual status during the same period last year. There were no further commitments to customers whose loans were troubled debt restructurings at September 30, 2014 and June 30, 2014.

Any changes or modifications made to loans are carefully reviewed to determine whether they are troubled debt restructurings. The modification of the terms of loans that are reported as troubled debt restructurings included one or a combination of the following: a reduction of the stated interest rate of the loan; an extension of the maturity date at a stated rate of interest lower than the current market rate for new debt with similar risk; or a permanent reduction of the recorded investment in the loan. There are other changes or modifications made for borrowers who are not experiencing financial difficulties. During the three months ended September 30, 2014, ten loans in the amount of \$3.1 million were modified and not accounted for as troubled debt restructurings. During the three months ended September 30, 2013, six loans in the amount of \$2.4 million were modified and not accounted for as troubled debt restructurings. The modifications were generally made to refinance the credits to maintain the borrowing relationships and consisted of term or rate modifications. The borrowers were not experiencing financial difficulty and the modifications were made at market terms.

The following table sets forth the amounts and categories of our non-performing assets at the dates indicated.

	At September 30, 2014	At June 30, 2014		
	(Dollars in thousands)			
Non-accrual loans:				
Real estate loans:				
One-to-four family	\$2,417	\$2,481		
Multi-family	760	781		
Commercial	1,390	1,460		
Other loans:				
Automobile	—	2		
Other	7	15		
Troubled debt restructurings:				
One-to-four family	2,541	2,909		
Total non-accrual loans	\$7,115	\$7,648		
Other real estate owned and repossessed assets:				
Real estate:				
One-to-four family	\$306	\$284		
Total non-performing assets	\$7,421	\$7,932		
Ratios:				
Non-performing loans to total loans ⁽¹⁾	1.02	%	1.06	%
Non-performing assets to total assets	0.86	%	0.90	%
Total accruing troubled debt restructurings:	8,265	9,569		

(1) Total loans are net of deferred fees and costs.

Non-performing loans decreased to \$7.1 million, or 1.02% of total loans at September 30, 2014 as compared to \$7.6 million or 1.06% of total loans at June 30, 2014. The decrease in non-performing loans was primarily attributable to a non-performing troubled debt restructuring of \$306,000 transferred to real estate owned during the three months ended September 30, 2014.

At September 30, 2014, there were \$5.0 million of one-to-four family residential mortgage loans on non-accrual for which valuation allowances individually evaluated totaling \$66,000 have been applied. Of the \$5.0 million in one-to-four family residential mortgage loans on non-accrual status, the terms or rates of \$2.5 million of such loans were modified as troubled debt restructurings.

At September 30, 2014, there were \$2.2 million of multi-family residential and commercial real estate loans (“income property”) on non-accrual for which no valuation allowances individually evaluated have been applied and were not modified as a troubled debt restructuring.

Real Estate Owned. Real estate owned and repossessed assets consist of real estate and other assets which have been acquired through foreclosure on loans. At the time of foreclosure, assets are recorded at fair value less estimated selling costs, with any write-down charged against the allowance for loan losses. The fair value of real estate owned is determined by a third party appraisal of the property. As of September 30, 2014, there was one real estate owned property in the amount of \$306,000. This compared to one real estate owned property in the amount of \$284,000 at June 30, 2014.

Classified and Criticized Assets. We regularly review potential problem assets in our portfolio to determine whether any assets require classification in accordance with applicable regulations. The total amount of classified and criticized assets represented 25.6% of our equity capital and 4.1% of our total assets at September 30, 2014, as compared to 27.2% of our equity capital and 4.2% of our total assets at June 30, 2014. At September 30, 2014 and June 30, 2014, there were \$7.1 million and \$7.6 million in non-accrual loans included in classified assets, respectively. The aggregate amount of our classified and special mention assets at the dates indicated were as follows:

	September 30, 2014	June 30, 2014
	(Dollars in thousands)	
Classified and Criticized Assets:		
Loss	\$7	\$17
Doubtful	37	1
Substandard	17,824	16,164
Special Mention	17,318	21,082
Total	\$35,186	\$37,264

Allowance for Loan Losses. We maintain an allowance for loan losses to absorb probable incurred losses inherent in the loan portfolio. The allowance is based on ongoing, quarterly assessments of the probable losses inherent in the loan portfolio. In accordance with generally accepted accounting principles the allowance is comprised of general valuation allowances and valuation allowances on loans individually evaluated for impairment.

The general component covers non-impaired loans and is based both on our historical loss experience as well as significant factors that, in management's judgment, affect the collectability of the portfolio as of the evaluation date. Loans that are classified as impaired are individually evaluated. We consider a loan impaired when it is probable that we will be unable to collect all amounts due according to the terms of the loan agreement and determine impairment by computing a fair value either based on discounted cash flows using the loan's initial interest rate or the fair value of the collateral, less estimated selling costs, if the loan is collateral dependent.

The overall appropriateness of the general valuation allowance is determined based on a loss migration model and qualitative considerations. The migration analysis looks at pools of loans having similar characteristics and analyzes their loss rates over a historical period. Historical loss factors derived from trends and losses associated with each pool over a specific period of time are utilized. The loss factors are applied to the outstanding loans to each loan grade within each pool of loans. Loss rates derived by the migration model are based predominantly on historical loss trends that may not be indicative of the actual or inherent loss potential. As such, qualitative and environmental factors are utilized as adjusting mechanisms to supplement the historical results of the classification migration model. Significant factors reviewed in determining the allowance for loan losses included loss ratio trends by loan product; levels of and trends in delinquencies and impaired loans; levels of and trends in classified assets; levels of and trends in charge-offs and recoveries; trends in volume of loans by loan product; effects of changes in lending policies and practices; industry conditions and effects of concentrations in geographic regions. Qualitative and environmental factors are reflected as percent adjustments and are added to the historical loss rates derived from the classified asset migration model to determine the appropriate allowance amount for each loan pool.

Valuation allowances on real estate loans that are individually evaluated for impairment are charged-off when management believes a loan or part of a loan is deemed uncollectible. Subsequent recoveries, if any, are credited to

the allowance when received. A loan is generally considered uncollectible when the borrower's payment is six months or more delinquent.

Senior management reviews these conditions quarterly in discussions with our senior credit officers. To the extent that any of these conditions is evidenced by a specifically identifiable problem credit or portfolio segment as of the evaluation date, management's estimate of the effect of such conditions may be reflected as an allowance specifically applicable to such credit or portfolio segment. Where any of these conditions is not evidenced by a specifically identifiable problem credit or portfolio segment as of the evaluation

date, management's evaluation of the loss related to this condition is reflected in the general allowance. The evaluation of the inherent loss with respect to these conditions is subject to a higher degree of uncertainty because they are not identified with specific problem credits or portfolio segments.

Given that management evaluates the adequacy of the allowance for loan losses based on a review of individual loans, historical loan loss experience, the value and adequacy of collateral and economic conditions in our market area, this evaluation is inherently subjective as it requires material estimates, including the amounts and timing of future cash flows expected to be received on impaired loans that may be susceptible to significant change. Large groups of smaller balance homogeneous loans that are collectively evaluated for impairment are excluded from loans individually evaluated for impairment; their allowance for loan losses is calculated in accordance with the allowance for loan losses policy described above.

Because the allowance for loan losses is based on estimates of losses inherent in the loan portfolio, actual losses can vary significantly from the estimated amounts. Our methodology as described above permits adjustments to any loss factor used in the computation of the formula allowance in the event that, in management's judgment, significant factors which affect the collectability of the portfolio as of the evaluation date are not reflected in the loss factors. By assessing the estimated losses inherent in the loan portfolio on a quarterly basis, we are able to adjust individual and inherent loss estimates based upon any more recent information that has become available. We continue to review our allowance for loan losses methodology for appropriateness to keep pace with the size and composition of the loans and the changing economic conditions and credit environment. We believe that our methodologies continue to be appropriate given our size and level of complexity. In addition, management's determination as to the amount of our allowance for loan losses is subject to review by the Office of the Comptroller of the Currency ("OCC") and the FDIC, which may require the establishment of additional general allowances or allowances on loans individually evaluated for impairment based upon their judgment of the information available to them at the time of their examination of our Bank.

During the three months ended September 30, 2014, a \$350,000 reversal of provision for loan losses was recorded as compared to no provision for loan losses for the quarter ended September 30, 2013. The improvement in the provision was primarily a result of recoveries as well as continued asset quality improvement evidenced by declining delinquency ratios and a lower level of criticized and non-performing loans during the three months ended September 30, 2014 compared to the same period last year. Net recoveries of \$100,000 recorded during the three months ended September 30, 2014 resulted in annualized net recoveries of 0.06% of average outstanding loans for the quarter ended September 30, 2014 as compared to annualized net charge-offs of 0.09% of average outstanding loans for the same period last year. Non-performing assets decreased to \$7.4 million, or 0.86% of total assets at September 30, 2014 as compared to \$7.9 million, or 0.90% of total assets at June 30, 2014 and \$13.5 million, or 1.88% of total assets at September 30, 2013. Delinquent loans 60 days or more past due were \$248,000, or 0.04% of total loans at September 30, 2014 as compared to \$1.1 million, or 0.16% of total loans at June 30, 2014 and \$6.4 million, or 0.89% of total loans at September 30, 2013. The decrease in delinquent loans at September 30, 2014 as compared to June 30, 2014 was primarily attributable to pay-offs, a loan of \$399,000 brought current, and a loan of \$301,000 transferred to REO. The allowance for loan losses to non-performing loans was 60.86% at September 30, 2014 as compared to 59.88% at June 30, 2014. The slight increase in the allowance for loan losses to non-performing loans was a result of the decrease in non-performing loans, partially offset by a decrease in the allowance for loan losses during the three months ended September 30, 2014. The provision reflected management's continuing assessment of the credit quality of the Company's loan portfolio, which is affected by various trends, including current economic conditions.

The distribution of the allowance for losses on loans at the dates indicated is summarized as follows.

	September 30, 2014		June 30, 2014	
	Amount	Percent of Loans in Each Category to Total Loans	Amount	Percent of Loans in Each Category to Total Loans
	(Dollars in thousands)			
Real estate loans:				
One-to-four family	\$2,151	40.54 %	\$2,300	40.14 %

Commercial	1,103	4.83	1,051	5.29
Other loans:				
Automobile	253	6.97	136	6.35
Home equity	2	0.09	2	0.09
Other	99	1.43	98	1.59
Total allowance for loan losses	\$4,330	100.00 %	\$4,580	100.00 %

Liquidity, Capital Resources and Commitments

Liquidity may increase or decrease depending upon the availability of funds and comparative yields on investments in relation to the return on loans. Historically, we have maintained liquid assets at levels above the minimum requirements previously imposed by our regulator and above levels believed to be adequate to meet the requirements of normal operations, including potential deposit outflows. Cash flow projections are regularly reviewed and updated to assure that adequate liquidity is maintained.

Our liquidity, represented by cash and cash equivalents, interest earning accounts and mortgage-backed and related securities, is a product of our operating, investing and financing activities. Our primary sources of funds are deposits, amortization, prepayments and maturities of outstanding loans and mortgage-backed and related securities, and other short-term investments and funds provided from operations. While scheduled payments from the amortization of loans and mortgage-backed related securities and maturing investment securities and short-term investments are relatively predictable sources of funds, deposit flows and loan prepayments are greatly influenced by general interest rates, economic conditions, and competition. In addition, we invest excess funds in short-term interest earning assets, which provide liquidity to meet lending requirements. We also generate cash through borrowings. We utilize FHLB advances to leverage our capital base and provide funds for our lending and investment activities as well as enhance our interest rate risk management.

Liquidity management is both a daily and long-term function of business management. Excess liquidity is generally invested in short-term investments such as overnight deposits. On a longer-term basis, we maintain a strategy of investing in various investment securities and lending products. We use our sources of funds primarily to meet ongoing commitments, to pay maturing certificates of deposit and savings withdrawals, to fund loan commitments and to maintain our portfolio of mortgage-backed and related securities. At September 30, 2014, total approved loan commitments amounted to \$2.2 million and the unadvanced portion of loans was \$2.0 million.

There were no FHLB advances scheduled to mature in one year or less at September 30, 2014. Certificates of deposit scheduled to mature in one year or less at September 30, 2014, totaled \$94.3 million. Based on historical experience, management believes that a significant portion of maturing deposits will remain with the Bank and we anticipate that we will continue to have sufficient funds, through deposits and borrowings, to meet our current commitments.

At September 30, 2014, we had \$65.0 million FHLB advances outstanding and available additional advances from the FHLB of San Francisco in the amount of \$287.0 million. We also had a short-term line of credit with the Federal Reserve Bank of San Francisco of \$40.6 million at September 30, 2014, which has not been drawn upon.

Contractual Obligations

In the normal course of business, we enter into contractual obligations that meet various business needs. These contractual obligations include certificates of deposit to customers, borrowings from the FHLB, lease obligations for facilities, and commitments to purchase, sale and/or originate loans.

The following table summarizes our long-term contractual obligations at September 30, 2014.

	Total	Less than 1 year	1 – 3 Years	Over 3 – 5 Years	More than 5 years
	(Dollars in thousands)				
FHLB advances	\$65,000	\$—	\$25,000	\$40,000	\$—

Loan commitments to originate	2,235	2,235	—	—	—
Available home equity and unadvanced lines of credit	2,047	2,047	—	—	—
Certificates of deposit	244,818	94,325	118,103	32,388	2
Total commitments and contractual obligations	\$315,725	\$99,461	\$143,450	\$72,538	\$276

Off-Balance Sheet Arrangements

As a financial service provider, we routinely are a party to various financial instruments with off-balance sheet risks, such as commitments to extend credit and unused lines of credit. While these contractual obligations represent our future cash requirements, a significant portion of commitments to extend credit may expire without being drawn upon. Such commitments are subject to the same credit policies and approval process accorded to loans we make.

Capital

The table below sets forth Simplicity Bank's capital position relative to its regulatory capital requirements at September 30, 2014 and June 30, 2014. The definitions of the terms used in the table are those provided in the capital regulations issued by the OCC.

	Actual		Minimum Capital Requirements		Minimum Required to be Well Capitalized Under Prompt Corrective Actions Provisions	
	Amount	Ratio	Amount	Ratio	Amount	Ratio
September 30, 2014	(Dollars in thousands)					
Total capital (to risk-weighted assets)	\$129,865	23.15	% \$44,887	8.00	% \$56,109	10.00
Tier 1 capital (to risk-weighted assets)	125,535	22.37	22,444	4.00	33,666	6.00
Tier 1 (core) capital (to adjusted tangible assets)	125,535	14.59	34,423	4.00	43,029	5.00
June 30, 2014	(Dollars in thousands)					
Total capital (to risk-weighted assets)	\$128,372	21.66	% \$47,417	8.00	% \$59,271	10.00
Tier 1 capital (to risk-weighted assets)	123,792	20.89	23,709	4.00	35,563	6.00

Edgar Filing: Simplicity Bancorp, Inc. - Form 10-Q

Tier 1 (core) capital (to adjusted tangible assets)	123,792	14.13	35,056	4.00	43,820	5.00
---	---------	-------	--------	------	--------	------

Consistent with our goal to operate a sound and profitable financial organization, we actively seek to continue as a “well capitalized” institution in accordance with regulatory standards. At September 30, 2014, Simplicity Bank was a “well-capitalized” institution under regulatory standards.

37

In July 2013, federal banking regulators approved an interim rule to set minimum requirements for both the quantity and quality of capital held by banking institutions. The interim final rule includes a new minimum ratio of common equity Tier 1 capital to risk weighted assets of 4.5%, raises the minimum ratio of Tier 1 capital to risk-weighted assets from 4% to 6% and includes a minimum leverage ratio of 4% for all banking organizations. Additionally, banking institutions must maintain a capital conservation buffer of common equity Tier 1 capital in an amount greater than 2.5% of total risk-weighted assets to avoid being subject to limitations on capital distributions and discretionary bonus payments to executive officers. The Bank must begin complying with the final rule on January 1, 2015.

Impact of Inflation

The unaudited consolidated financial statements presented herein have been prepared in accordance with GAAP. These principles require the measurement of financial position and operating results in terms of historical dollars, without considering changes in the relative purchasing power of money over time due to inflation.

Our primary assets and liabilities are monetary in nature. As a result, interest rates have a more significant impact on our performance than the effects of general levels of inflation. Interest rates, however, do not necessarily move in the same direction or with the same magnitude as the price of goods and services, since such prices are affected by inflation. In a period of rapidly rising interest rates, the liquidity and maturity structure of our assets and liabilities are critical to the maintenance of acceptable performance levels.

The principal effect of inflation, as distinct from levels of interest rates, on earnings is in the area of noninterest expense. Such expense items as employee compensation, employee benefits and occupancy and equipment costs may be subject to increases as a result of inflation.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

Our Risk When Interest Rates Change. The rates of interest we earn on assets and pay on liabilities generally are established contractually for a period of time. Market interest rates change over time. Our fixed rate loans generally have longer maturities than our fixed rate deposits. Accordingly, our results of operations, like those of other financial institutions, are impacted by changes in interest rates and the interest rate sensitivity of our assets and liabilities. The risk associated with changes in interest rates and our ability to adapt to these changes is known as interest rate risk and is our most significant market risk.

How We Measure Our Risk of Interest Rate Changes. As part of our attempt to manage our exposure to changes in interest rates and comply with applicable regulations, we monitor our interest rate risk. In monitoring interest rate risk we continually analyze and manage assets and liabilities based on their payment streams and interest rates, the timing of their maturities, and their sensitivity to actual or potential changes in market interest rates.

In order to minimize the potential for adverse effects of material and prolonged increases in interest rates on our results of operations, we have adopted investment/asset and liability management policies to better match the maturities and repricing terms of our interest-earning assets and interest-bearing liabilities. The board of directors sets and recommends the asset and liability policies of Simplicity Bank, which are implemented by the asset/liability management committee.

The purpose of the asset/liability management committee is to communicate, coordinate and control asset/liability management consistent with our business plan and board approved policies. The committee establishes and monitors the volume and mix of assets and funding sources taking into account relative costs and spreads, interest rate sensitivity and liquidity needs. The objectives are to manage assets and funding sources to produce results that are consistent with liquidity, capital adequacy, growth, risk, and profitability goals.

The asset/liability management committee generally meets at least monthly to review, among other things, economic conditions and interest rate outlook, current and projected liquidity needs and capital position, anticipated changes in the volume and mix of assets and liabilities and interest rate risk exposure limits versus current projections pursuant to net present value of portfolio equity analysis and income simulations. The asset/liability management committee recommends appropriate strategy changes based on this review. The chairman or his designee is responsible for reviewing and reporting on the effects of the policy implementations and strategies to the board of directors at least monthly.

In order to manage our assets and liabilities and achieve the desired liquidity, credit quality, interest rate risk, profitability and capital targets, we have focused our strategies on: (1) maintaining an adequate level of adjustable rate loans; (2) originating a reasonable volume of short-term and intermediate-term loans; (3) managing our deposits to establish stable deposit relationships; and (4) using FHLB advances, and pricing on fixed-term non-core deposits to align maturities and repricing terms.

At times, depending on the level of general interest rates, the relationship between long-term and short-term interest rates, market conditions and competitive factors, the asset/liability management committee may determine to increase our interest rate risk position somewhat in order to maintain our net interest margin.

The asset/liability management committee regularly reviews interest rate risk by forecasting the impact of alternative interest rate environments on net interest income and economic value of portfolio equity, which is defined as the net present value of an institution's existing assets, liabilities and off-balance sheet instruments, and evaluating such impacts against the maximum potential changes in net interest income and economic value of portfolio equity that are authorized by the board of directors of Simplicity Bank.

An independent third party provides the Bank with the information presented in the following tables, which are based on information provided by the Bank. The tables present the sensitivity of net interest income for the 12-month period subsequent to the three months ended September 30, 2014 and the year ended June 30, 2014, and the immediate, permanent and parallel movements in interest rates of +/-100, +200 and +300 basis points, as well as the change in the Bank's net portfolio value at September 30, 2014 that would occur upon an immediate change in interest rates without giving effect to any steps that management might take to counteract that change. These tables do not show changes in rates below -100 basis points due to the current low interest rate environment.

September 30, 2014			June 30, 2014		
Basis Point (bp)	Change in Net Interest Income		Basis Point (bp)	Change in Net Interest Income	
Change in Rates			Change in Rates		
+300 bp	(1.90)%	+300 bp	(4.49)%
+200	(1.01)	+200	(2.81)
+100	(0.62)	+100	(1.45)
-100	(0.57)	-100	0.58)

Change in Interest Rates (basis points) ⁽¹⁾	September 30, 2014				NPV ratio ⁽⁴⁾	Increase (Decrease) (basis points)
	Estimated NPV ⁽²⁾	Estimated Increase (Decrease) in NPV		NPV as a percentage of Present Value of Assets ⁽³⁾		
		Amount	Percent			
	(Dollars in thousands)					
+400	\$105,779	\$(41,107) (27.99)%	13.36	% (316
+300	117,968	(28,917) (19.69)	14.46	(206
+200	129,428	(17,458) (11.89)	15.40	(112
+100	139,411	(7,474) (5.09)	16.11	(41
—	—	—	—		16.52	—
-100	151,147	4,262	2.90		16.61	9

(1) Assumes an instantaneous uniform change in interest rates at all maturities.

(2) NPV is the discounted present value of expected cash flows from assets, liabilities and off-balance sheet contracts.

(3) Present value of assets represents the discounted present value of incoming cash flows on interest-earning assets.

(4) NPV Ratio represents NPV divided by the present value of assets.

The analysis uses certain assumptions in assessing interest rate risk. These assumptions relate to interest rates, loan prepayment rates, deposit decay rates, and the fair values of certain assets under differing interest rate scenarios, among other things.

As with any method of measuring interest rate risk, shortcomings are inherent in the method of analysis presented in the foregoing tables. For example, although assets and liabilities may have similar maturities or periods to repricing,

they may react in different degrees to changes in the market interest rates. Also, the interest rates on certain types of assets and liabilities may fluctuate in advance of changes in market interest rates, while interest rates on other types may lag behind changes in market rates. Additionally, certain assets, such as adjustable rate mortgage loans, have features, that restrict changes in interest rates on a short-term basis and over the life of the asset. Further, if interest rates change, expected rates of prepayments on loans and early withdrawals from certificates of deposit could deviate significantly from those assumed in calculating the tables.

Item 4. Controls and Procedures

Our management evaluated, with the participation of our Chief Executive Officer and Chief Financial Officer, the effectiveness of our disclosure controls and procedures (as defined in Rule 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934 (the “Act”)) as of the end of the period covered by this report. The Company’s Chief Executive Officer and Chief Financial Officer concluded that the Company’s disclosure controls and procedures as of the end of the period covered by this report are effective in ensuring that the information required to be disclosed by the Company in the reports it files or submits under the Act is (i) accumulated and communicated to the Company’s management (including the Chief Executive Officer and Chief Financial Officer) in a timely manner, and (ii) recorded, processed, summarized, and reported within the time periods specified in the SEC’s rules and forms. There have been no changes in our internal control over financial reporting (as defined in Rule 13a-15(f) under the Act) that occurred during the quarter ended September 30, 2014 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

Part II. OTHER INFORMATION

Item 1. Legal Proceedings

From time to time the Company and its subsidiaries are subject to various legal actions arising in the normal course of business. In the opinion of management, the resolution of these legal actions is not expected to have a material adverse effect on the Company’s financial condition or results of operations.

Current Litigation Relating to the Merger

On October 10, 2014, Stephen Bushansky filed a stockholder class action lawsuit in the Superior Court of Los Angeles County, California against the Company, the directors of the Company and HomeStreet. The lawsuit purports to be brought on behalf of all of the Company’s public stockholders, excluding the directors of the Company. The complaint alleges that the directors of the Company breached their fiduciary duties to the stockholders by failing to take adequate measures to ensure that the interests of Simplicity’s stockholders are properly protected and by conducting a merger process that prevents competitive bidding. The complaint further alleges that HomeStreet aided and abetted the alleged breaches of fiduciary duty by the Company’s directors. The lawsuit seeks to enjoin the proposed merger from proceeding and seeks unspecified compensatory damages on behalf of the Company’s stockholders and/or rescission of the proposed merger transaction. The Company believes that the lawsuit is meritless and intends to vigorously defend itself against the allegations.

Item 1A. Risk Factors

Termination of the Merger Agreement with HomeStreet could adversely impact the Company.

If the Merger Agreement is terminated, there may be various consequences. For example, the Bank’s business may have been impacted adversely by the failure to pursue other beneficial opportunities due to the focus of management on the merger, without realizing any of the anticipated benefits of completing the merger. The Company has incurred substantial costs in connection with the Merger Agreement, including legal, accounting and investment banking fees. Additionally, if the Merger Agreement is terminated, the market price of the Company’s common stock could decline to the extent that the current market price reflects a market assumption that the merger will be completed. If the Merger Agreement is terminated under certain circumstances, the Company will be required to pay HomeStreet a termination fee of \$5.3 million. This may make it more difficult or expensive for another company to acquire the Company if the Merger Agreement is terminated, which may have a disproportionately adverse impact on the price of the Company’s common stock.

The Company will be subject to business uncertainties and contractual restrictions on its operations while the merger is pending.

The Company will be subject to business uncertainties and contractual restrictions on its operations while the merger is pending. For instance, uncertainty about the effect of the merger on employees and customers may have an adverse

effect on the Company. These uncertainties may impair the Company's ability to attract, retain and motivate key personnel until the merger is completed, and could cause customers and others that deal with the Bank to seek to change their existing business relationships. Retention of certain employees by the Company may be challenging while the merger is pending, as certain employees may experience uncertainty about their future roles. If key employees, or a significant number of employees, depart because of issues relating to

the uncertainty and difficulty of integration or a desire not to remain with the Company or the surviving corporation, the Company's business could be harmed. In addition, subject to certain exceptions, the Company has agreed to operate its business in the ordinary course, and to comply with certain other operational restrictions, prior to closing. There have been no other material changes to the risk factors that were previously disclosed in the Company's annual report on Form 10-K for the fiscal year ended June 30, 2014.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

Purchase of Equity Securities by the Issuer

Period	Total Number of Shares Purchased*	Weighted Average Price Paid Per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans	Maximum Number of Shares That May Yet be Purchased Under the Plan
7/1/14 – 7/31/14	—	\$—	—	240,079
8/1/14 – 8/31/14	—	—	—	240,079
9/1/14 – 9/30/14	—	—	—	240,079
Total	—	\$—	—	240,079

* Since November 2011, the Company has repurchased 2,312,765 shares under stock repurchase programs.

Item 3. Defaults Upon Senior Securities

None.
