The accompanying notes are an integral part of the condensed consolidated financial statements.

John Bean Technologies Corporation  
Notes to Condensed Consolidated Financial Statements (Unaudited)

Note 1: Description of Business and Basis of Presentation

Description of Business— John Bean Technologies Corporation and its consolidated subsidiaries (“JBT Corporation” or “we”) provide global technology solutions for the food processing and air transportation industries. We design, manufacture, test and service technologically sophisticated systems and products for customers through our JBT FoodTech and JBT AeroTech segments. We have manufacturing operations worldwide and are strategically located to facilitate delivery of our products and services to our customers.

Basis of Presentation—The preceding condensed consolidated balance sheet as of December 31, 2010, which has been derived from audited financial statements, and unaudited interim condensed consolidated financial statements, together with the notes thereto (the “statements”), of JBT Corporation have been prepared pursuant to the rules and regulations of the Securities and Exchange Commission. As permitted under those rules, certain footnotes and other financial information that are normally required by accounting principles generally accepted in the United States can be condensed or omitted. Therefore, these statements should be read in conjunction with the audited annual consolidated and combined financial statements and notes thereto included in our Annual Report on Form 10-K for the year ended December 31, 2010.

In the opinion of management, the statements reflect all adjustments (consisting of normal recurring adjustments) necessary for a fair presentation of our financial condition and operating results as of and for the periods presented. Revenue, expenses, assets and liabilities can vary during each quarter of the year. Therefore, the results and trends in these statements may not be representative of those for the full year or any future period.

Note 2: Inventories

Inventories consisted of the following:

(In millions)	March 31, 2011	December 31, 2010
Raw materials	\$ 66.3	\$ 65.8
Work in process	42.9	29.8
Finished goods	78.9	69.6
Gross inventories before LIFO reserves and valuation adjustments	188.1	165.2
LIFO reserves and valuation adjustments	(59.8 )	(58.5 )
Net inventories	\$ 128.3	\$ 106.7

Note 3: Pension and Other Postretirement Benefits

Components of net periodic benefit income were as follows:

(In millions)	Pension Benefits		Other Postretirement Benefits	
	Three Months Ended March 31,		Three Months Ended March 31,	
	2011	2010	2011	2010
Service cost	\$0.3	\$0.4	\$-	\$-
Interest cost	3.6	3.6	0.1	0.1
Expected return on assets	(4.6 )	(4.6 )	-	-

Edgar Filing: John Bean Technologies CORP - Form 10-Q

Amortization of prior service benefit	-	-	(0.2	)	(0.2	)
Amortization of actuarial losses, net	0.4	0.1	-	-	-	-
Net periodic benefit income	\$(0.3	)	\$(0.5	)	\$(0.1	)

Note 4: Stock-based Compensation

Stock-based compensation expense was \$1.3 million and \$1.6 million for the three months ended March 31, 2011 and 2010, respectively. In the three months ended March 31, 2011, we granted the following restricted stock awards to our employees:

	Shares	Weighted-Average Grant-Date Fair Value
Time-based	150,236	
Performance-based	185,582*	
Granted during the three months ended March 31, 2011	335,818	\$ 18.50

\* Assumes target payout

We granted time-based restricted stock awards that vest after three years. The fair value of these time-based awards was determined using the market value of our common stock on the grant date. Compensation cost is recognized over the lesser of the stated vesting period or the period until the employee reaches age 62, the retirement eligible age under the plan. We also granted restricted stock awards with performance-based conditions. The vesting period for these awards is three years.

For current year performance-based awards, actual payouts may vary from zero to 371,164 shares and will be dependent upon our performance relative to prior year with respect to growth in earnings and net contribution (which is an economic value added measure calculated by determining the amount by which our net income from continuing operations, after adding back interest expense, exceeds our cost of capital) for the year ending December 31, 2011. Compensation cost is measured based on the current expected outcome of the performance conditions and may be adjusted until the performance period ends.

#### Note 5: Stockholders' Equity

During the three months ended March 31, 2011, 0.5 million shares were issued in connection with our stock-based compensation plan. During the year ended December 31, 2010, 0.6 million shares were issued.

Comprehensive income consisted of the following:

(In millions)	Three Months Ended March 31,	
	2011	2010
Net income	\$ 4.9	\$ 4.0
Foreign currency translation adjustments	4.9	(3.4 )
Derivatives designated as hedges, net of tax of \$0.1 for the three months ended March 31, 2011 and 2010	0.1	0.2
Pension and other postretirement liability adjustments	0.1	(0.1 )
Comprehensive income	\$ 10.0	\$ 0.7

#### Note 6: Earnings Per Share

Basic earnings per share ("EPS") is computed by dividing net income by the weighted average number of common shares outstanding for the period. Diluted EPS reflects the assumed conversion of all dilutive securities. The following table sets forth the computation of basic and diluted EPS from continuing operations for the respective periods and our basic and dilutive shares outstanding:

(In millions, except per share data)	Three Months Ended March 31,	
	2011	2010
Basic earnings per share:		
Income from continuing operations	\$ 4.9	\$ 3.9
Weighted average number of shares outstanding	28.7	28.2
Basic earnings per share from continuing operations	\$ 0.17	\$ 0.14
Diluted earnings per share:		
Income from continuing operations	\$ 4.9	\$ 3.9
Weighted average number of shares outstanding	28.7	28.2
Effect of dilutive securities:		
Options on common stock	0.1	0.1
Restricted stock	0.4	0.7

Total shares and dilutive securities	29.2	29.0
Diluted earnings per share from continuing operations	\$ 0.17	\$ 0.14

Note 7: Derivative Financial Instruments and Risk Management

Derivative financial instruments— We hold derivative financial instruments for the purpose of hedging foreign currency risks and interest rate risks of certain identifiable and anticipated transactions.

We manufacture and sell our products in a number of countries throughout the world and, as a result, are exposed to movements in foreign currency exchange rates. Our major foreign currency exposures involve the markets in Western Europe, South America and Asia. The purpose of our foreign currency hedging activities is to manage the economic impact of exchange rate volatility associated with anticipated foreign currency purchases and sales made in the normal course of business. We primarily utilize forward exchange contracts with maturities of less than 2 years. As of March 31, 2011, we held forward exchange contracts with an aggregate notional value of \$352.9 million. Many of our sales and purchase contracts are written contemplating this risk and therefore contain embedded derivatives, which we take into consideration as part of our risk management policy.

During 2010 and through January 31, 2011, we had an interest rate swap that fixed the annual interest rate on a portion of our borrowings under the credit facility at 4.9%. For the period prior to January 30, 2010, the interest rate swap fixed the interest rate on \$50 million of our borrowings and for the period from January 30, 2010 to January 31, 2011, the interest rate swap fixed the interest rate on \$25 million of our borrowings.

Our policy is to hold derivatives only for the purpose of hedging risks and not for trading purposes where the objective is solely to generate profit. Generally, we enter into hedging relationships such that changes in the fair values or cash flows of items and transactions being hedged are expected to be offset by corresponding changes in the fair value of the derivatives.

With the exception of the interest rate swap and certain foreign exchange derivatives entered into prior to our spin-off in July 2008, we do not apply hedge accounting. All derivatives are recognized on the balance sheet at their fair value and classified based on the instrument's maturity date. We do not offset fair value amounts for derivative instruments held with the same counterparty. Changes in the fair value of derivative instruments are recorded in current earnings or deferred in accumulated other comprehensive income (loss) until the underlying transactions are recognized in earnings, depending on whether a derivative is designated as, and is effective as, a hedge. Cash flows from derivatives are classified as cash flows from operating activities.

The following table presents the fair value of derivative instruments included within the condensed consolidated balance sheets:

(In millions)	As of March 31, 2011		As of December 31, 2010	
	Asset Derivatives (1)	Liability Derivatives (2)	Asset Derivatives (1)	Liability Derivatives (2)
<b>Derivatives designated as hedging instruments:</b>				
Interest rate swap contract	\$-	\$-	\$-	\$0.2
Foreign exchange contracts	-	0.3	-	0.4
<b>Total derivatives designated as hedging instruments</b>	<b>-</b>	<b>0.3</b>	<b>-</b>	<b>0.6</b>
<b>Derivatives not designated as hedging instruments:</b>				
Foreign exchange contracts	10.9	8.3	11.9	8.2
<b>Total derivatives not designated as hedging instruments</b>	<b>\$10.9</b>	<b>\$8.3</b>	<b>\$11.9</b>	<b>\$8.2</b>

- (1) Included in other current assets and other assets on our Condensed Consolidated Balance Sheets.  
(2) Included in other current liabilities and other liabilities on our Condensed Consolidated Balance Sheets.

The following table presents the effective portion of the gains and losses on derivative instruments affecting the condensed consolidated statements of income for the three month periods ended March 31, 2011 and 2010:

Derivatives designated as cash flow hedges (In millions)	Amount of Gain (Loss) Recognized in OCI on Derivatives (1)		Location of Gain (Loss) Reclassified from AOCI into Income	Amount of Gain (Loss) Reclassified from AOCI into Income (1)	
	2011	2010		2011	2010
Interest rate swap contract	\$ -	\$ (0.1)	Net interest expense	\$ -	\$ (0.3)
Foreign exchange contracts	0.1	0.1	Revenue	(0.1)	-

<u>Total</u>	\$ 0.1	\$ -	\$ (0.1 )	\$ (0.3 )
--------------	--------	------	-----------	-----------

(1) For the three month periods ended March 31, 2011 and 2010, we recorded in other income, net an immaterial amount of ineffectiveness from cash flow hedges.

As of March 31, 2011, we do not expect to reclassify a significant amount of accumulated other comprehensive loss into earnings within the next 12 months. All forecasted transactions are expected to occur by the end of 2013.

The following table presents the location in the consolidated statements of income and the gain (loss) recognized on derivatives not designated as hedging instruments for the three month periods ended March 31, 2011 and 2010:

Derivatives not designated as hedging instruments (In millions)	Location of Gain (Loss) Recognized in Income on Derivatives	Amount of Gain (Loss) Recognized in Income on Derivatives	
		2011	2010
Foreign exchange contracts	Revenue	\$ 2.7	\$ 1.2
Foreign exchange contracts	Cost of sales	(0.1 )	(0.4 )
Foreign exchange contracts	Other income (expense), net	0.3	0.2
Total		2.9	1.0
Remeasurement of assets and liabilities in foreign currencies		(0.6 )	(0.8 )
Net gain on foreign currency transactions		\$ 2.3	\$ 0.2

Refer to Note 8: Fair Value of Financial Instruments for a description of how the above financial instruments are valued.

Credit risk — By their nature, financial instruments involve risk including credit risk for non-performance by counterparties. Financial instruments that potentially subject us to credit risk primarily consist of trade receivables and derivative contracts. We manage the credit risk on financial instruments by transacting only with financially secure counterparties, requiring credit approvals and credit limits, and monitoring counterparties' financial condition. Our maximum exposure to credit loss in the event of non-performance by the counterparty is limited to the amount drawn and outstanding on the financial instrument. Allowances for losses are established based on collectability assessments.

#### Note 8: Fair Value of Financial Instruments

The fair value framework requires the categorization of assets and liabilities into three levels based upon the assumptions (inputs) used to price the assets or liabilities. Level 1 provides the most reliable measure of fair value, whereas Level 3 generally requires significant management judgment. The three levels are defined as follows:

- Level 1: Unadjusted quoted prices in active markets for identical assets and liabilities.
- Level 2: Observable inputs other than those included in Level 1. For example, quoted prices for similar assets or liabilities in active markets or quoted prices for identical assets or liabilities in inactive markets.
- Level 3: Unobservable inputs reflecting management's own assumptions about the inputs used in pricing the asset or liability.

Financial assets and financial liabilities measured at fair value on a recurring basis are as follows:

(In millions)	Total	As of March 31, 2011			As of December 31, 2010			
		Level 1	Level 2	Level 3	Total	Level 1	Level 2	Level 3
<b>Assets:</b>								
Investments	\$ 10.5	\$ 10.5	\$ -	\$ -	\$ 9.9	\$ 9.9	\$ -	\$ -
Derivatives	10.9	-	10.9	-	11.9	-	11.9	-
Total assets	\$ 21.4	\$ 10.5	\$ 10.9	\$ -	\$ 21.8	\$ 9.9	\$ 11.9	\$ -
<b>Liabilities:</b>								
Derivatives	\$ 8.6	\$ -	\$ 8.6	\$ -	\$ 8.8	\$ -	\$ 8.8	\$ -

Investments are classified as trading securities and are valued based on quoted prices in active markets for identical assets that we have the ability to access. Investments are included in other assets in the condensed consolidated balance sheets. Investments include an unrealized gain of \$0.2 million and \$1.0 million for the three months ended March 31, 2011 and year ended December 31, 2010, respectively. We use the income approach as the valuation technique to measure the fair value of derivative instruments on a recurring basis. This approach calculates the present value of the future cash flow by measuring the change from the derivative contract rate and the published market indicative currency and interest rates, multiplied by the contract notional values, and includes a factor of credit risk.

The carrying amounts of cash and cash equivalents, trade receivables and accounts payables, as well as amounts included in other current assets and other current liabilities that meet the definition of financial instruments, approximate fair values because of their short-term maturities.

The carrying values and the estimated fair values of our debt financial instruments are summarized in the table below:

(In millions)	As of March 31, 2011		As of December 31, 2010	
	Carrying Value	Estimated Fair Value	Carrying Value	Estimated Fair Value
6.66% senior unsecured notes due July 31, 2015	\$75.0	\$84.2	\$75.0	\$84.8
Revolving credit facility, expires on July 31, 2013	54.4	54.4	68.7	68.7
4.5% Brazilian Real loan due December 31, 2012	2.8	2.5	3.2	2.8
Other	0.8	0.8	0.2	0.2

There is no active or observable market for our senior unsecured notes or our Brazilian Real loan. Therefore, the estimated fair values of the notes and the loan are based on discounted cash flows using current interest rates available for debt with similar terms and remaining maturities. The estimates of the all-in interest rates for discounting the notes and the loan are based on a broker quote for notes and a loan with similar terms. We do not have a rate adjustment for risk profile changes, covenant issues or credit rating changes, therefore the broker quote is deemed to be the closest approximation of current market rates. The carrying value of the remaining borrowings approximates their fair value due to their variable interest rates.

#### Note 9: Commitments and Contingencies

We are involved in legal proceedings arising in the ordinary course of business. Although the results of litigation cannot be predicted with certainty, we do not believe that the resolution of the proceedings that we are involved in, either individually or taken as a whole, will have a material adverse effect on our business, results of operations or financial condition.

In connection with our spin-off from FMC Technologies in 2008, we entered into a separation and distribution agreement with FMC Technologies (the "Separation and Distribution Agreement"). Under the Separation and Distribution Agreement, we have assumed liabilities related to specified legal proceedings arising from our business prior to the spin-off. As a result, although FMC Technologies will remain the named defendant, we will manage the litigation and indemnify FMC Technologies for costs, expenses and judgments arising from litigation. We do not believe that any existing litigation we have assumed will have a material effect on our business, results of operations or financial condition.

**Guarantees and Product Warranties**—In the ordinary course of business with customers, vendors and others, we issue standby letters of credit, performance bonds, surety bonds and other guarantees. These financial instruments, which totaled approximately \$78.6 million at March 31, 2011, represent guarantees of our future performance. We also have provided approximately \$6.6 million of bank guarantees and letters of credit to secure a portion of our existing financial obligations. The majority of these financial instruments expire within two years; we expect to replace them through the issuance of new or the extension of existing letters of credit and surety bonds. In some instances we guarantee a small portion of our customers' financing arrangements and retain recourse to the equipment sold. As of March 31, 2011, the maximum future payment obligation of such guarantees was \$1.2 million and the associated liability balance was \$0.2 million. Historically, we have not made significant payments associated with guarantees of our customers' financing arrangements.

We provide warranties of various lengths and terms to certain of our customers based on standard terms and conditions and negotiated agreements. We provide for the estimated cost of warranties at the time revenue is recognized for products where reliable, historical experience of warranty claims and costs exists. We also provide warranty liability when additional specific obligations are identified. The obligation reflected in other current liabilities in the condensed consolidated balance sheets is based on historical experience by product and considers failure rates and the related costs in correcting a product failure. Warranty cost and accrual information is as follows:

Three Months Ended

Edgar Filing: John Bean Technologies CORP - Form 10-Q

(In millions)	March 31,	
	2011	2010
Balance at beginning of period	\$ 8.0	\$ 7.3
Expense for new warranties	1.8	1.0
Adjustments to existing accruals	0.2	-
Claims paid	(1.9 )	(1.9 )
Balance at end of period	\$ 8.1	\$ 6.4

Note 10: Business Segment Information

Segment operating profit is defined as total segment revenue less segment operating expenses. The following items have been excluded in computing segment operating profit: corporate staff expense, foreign currency related gains and losses, LIFO provisions, certain employee benefit expenses, restructuring costs, interest income and expense and income taxes.

(In millions)	Three Months Ended March 31,	
	2011	2010
Revenue		
JBT FoodTech	\$ 106.9	\$ 101.5
JBT AeroTech	92.5	67.4
Other revenue (1) and intercompany eliminations	2.1	0.1
Total revenue	\$ 201.5	\$ 169.0
Income before income taxes		
Segment operating profit:		
JBT FoodTech	\$ 5.7	\$ 8.6
JBT AeroTech	7.7	4.8
Total segment operating profit	13.4	13.4
Corporate items:		
Corporate expense (2)	(4.0 )	(3.7 )
Other expense, net (1)	(0.1 )	(1.8 )
Net interest expense	(1.7 )	(1.9 )
Total corporate items	(5.8 )	(7.4 )
Income from continuing operations before income taxes	\$ 7.6	\$ 6.0

(1) Other revenue comprises certain gains and losses on derivatives related to foreign exchange exposure. Other expense, net, generally includes stock-based compensation, other employee benefits, LIFO adjustments, restructuring costs, foreign exchange gains and losses, and the impact of unusual or strategic transactions not representative of segment operations. Restructuring costs included in other expense, net were:

(in millions)	2011	2010
JBT FoodTech	\$ 1.0	\$ 0.9
JBT AeroTech	-	-
Total	\$ 1.0	\$ 0.9

(2) Corporate expense primarily includes corporate staff expenses.

#### Note 11: Subsequent Events

On May 4, 2011, the Board of Directors approved a quarterly cash dividend of \$0.07 per share of outstanding common stock. The dividend will be paid on June 10, 2011 to stockholders of record at the close of business on May 20, 2011.

## ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

### CAUTIONARY NOTE REGARDING FORWARD-LOOKING STATEMENTS

This Form 10-Q, our Annual Report on Form 10-K and other materials filed or to be filed by us with the Securities and Exchange Commission, as well as information in oral statements or other written statements made or to be made by us, contain statements that are, or may be considered to be, forward-looking statements. All statements that are not historical facts, including statements about our beliefs or expectations, are forward-looking statements. You can identify these forward-looking statements by the use of forward-looking words such as "outlook," "believes," "expects," "potential," "continues," "may," "will," "should," "seeks," "approximately," "predicts," "intends," "plans," "estimates," "anticipates" or the negative version of those words or other comparable words and phrases. Any forward-looking statements contained in this Form 10-Q are based upon our historical performance and on current plans, estimates and expectations. The inclusion of this forward-looking information should not be regarded as a representation by us or any other person that the future plans, estimates or expectations contemplated by us will be achieved.

We believe that the factors that could cause our actual results to differ materially include but are not limited to the factors we described in our Form 10-K under "Risk Factors" and "Management's Discussion and Analysis of Financial Condition and Results of Operations." If one or more of those or other risks or uncertainties materialize, or if our underlying assumptions prove to be incorrect, actual results may vary materially from what we projected. Consequently, actual events and results may vary significantly from those included in or contemplated or implied by our forward-looking statements. The forward-looking statements included in this Form 10-Q are made only as of the date hereof, and we undertake no obligation to publicly update or review any forward-looking statement made by us or on our behalf, whether as a result of new information, future developments, subsequent events or circumstances or otherwise.

### EXECUTIVE OVERVIEW

We are a global technology solutions provider for the food processing and air transportation industries. We design, manufacture, test and service technologically sophisticated systems and products for customers through our JBT FoodTech and JBT AeroTech segments.

JBT FoodTech markets its solutions and services to multi-national and regional industrial food processing companies. The product offerings of our JBT FoodTech businesses include:

- freezer solutions for the freezing and chilling of meat, seafood, poultry, ready-to-eat meals, fruits, vegetables and bakery products;
- protein processing solutions that portion, coat and cook poultry, meat, seafood, vegetable and bakery products;
- in-container processing solutions for fruits, vegetables, soups, sauces, dairy and pet food products as well as ready-to-eat meals in a wide variety of modern packages; and
- fruit processing solutions that extract, concentrate and aseptically process citrus, tomato and other fruits.

JBT AeroTech markets its solutions and services to domestic and international airport authorities, passenger airlines, air freight and ground handling companies, the United States and selected international defense departments and the material handling industry. The product offerings of our JBT AeroTech businesses include:

- ground support equipment for cargo loading, aircraft deicing and aircraft towing;

- gate equipment for passenger boarding, on the ground aircraft power and cooling;
- airport services for maintenance of airport equipment, systems and facilities;
- military equipment for cargo loading, aircraft towing and on the ground aircraft cooling; and
- automated guided vehicles for material handling in the automotive, printing, warehouse, and hospital industries.

We have established a large installed base of food processing equipment as well as airport equipment and have built a strong global presence with manufacturing, sourcing, sales and service organizations located on six continents to support our equipment that has been delivered to more than 100 countries.

We have developed close working relationships with our customers, which we believe enhances our competitive advantage, strengthens our market positions and improves our results. We serve customers from around the world. A significant portion of our total sales are typically to locations outside of the United States. We evaluate international markets and pursue opportunities that fit our technological capabilities and strategies.

The food processing and air transportation industries in which we operate are susceptible to significant changes in the strength of the global or regional economies and the economic health of companies who make capital commitments for our products and services. We focus on economic and industry-specific drivers and key risk factors affecting each of our businesses as we formulate our strategic plans and make decisions related to allocating capital and human resources. These factors include risks associated with the global economic outlook, product obsolescence, and the competitive environment.

As we evaluate our operating results, we consider performance indicators like segment revenue and operating profit in addition to the level of inbound orders and order backlog.

### CONSOLIDATED RESULTS OF OPERATIONS

(In millions, except %)	Three Months Ended		Favorable / (Unfavorable)		
	2011	March 31, 2010	\$	%	
Revenue	\$201.5	\$169.0	\$32.5	19.2	%
Cost of sales	150.3	122.1	(28.2)	(23.1)	)
Gross profit	51.2	46.9	4.3	9.2	
Selling, general and administrative expense	37.7	35.2	(2.5)	(7.1)	)
Research and development expense	4.9	4.3	(0.6)	(14.0)	)
Other income, net	(0.7)	(0.5)	0.2	40.0	
Operating income	9.3	7.9	1.4	17.7	
Net interest expense	(1.7)	(1.9)	0.2	10.5	
Income from continuing operations before income taxes	7.6	6.0	1.6	26.7	
Provision for income taxes	2.7	2.1	(0.6)	(28.6)	)
Income from continuing operations	4.9	3.9	1.0	25.6	
Income from discontinued operations, net of taxes	-	0.1	(0.1)	(100.0)	)
Net income	\$4.9	\$4.0	\$0.9	22.5	%

Total revenue increased by \$32.5 million in the first quarter of 2011 compared to the same period in 2010. Product sales increased by \$24.7 million, primarily as a result of \$17.0 million of higher revenue from gate equipment products and \$4.7 million of higher revenue from ground support equipment products. Sales of aftermarket parts and services increased by \$3.0 million. Favorable impact of foreign currency translation resulted in \$5.1 million of higher revenue.

Gross profit increased by \$4.3 million in the first quarter of 2011 compared to the same period in 2010. The increase in gross profit was driven by higher sales volume, which resulted in an increase in gross profit of \$7.6 million. This increase was partially offset by \$4.5 million of lower gross profit due to lower gross profit margin, which resulted from an unfavorable mix of products sold as compared to the prior-year, and lower gross profit margin earned on certain large contracts in JBT AeroTech. The remaining difference was due to a favorable impact of foreign currency translation.

Operating income increased by \$1.4 million in the first quarter of 2011 compared to the same period in 2010 while operating income margins remained relatively unchanged. The increase in operating income was driven by higher sales volume. Selling, general and administrative expenses increased by \$2.5 million, but only \$1.7 million in constant currency and decreased as a percentage of revenue from 20.8% to 18.7%.

Net interest expense was \$0.2 million lower in the first quarter of 2011 compared to the same period in 2010 as a result of a lower overall interest rate on our variable rate debt due to the maturity of a \$25 million interest rate swap on January 31, 2011. The interest rate swap previously fixed the interest rate on a portion of our borrowings under the

credit facility at 4.9%.

Income tax expense in the first quarter of 2011 reflected an effective income tax rate of 35.0% compared to 34.3% in the same period in 2010. The difference in the rate was primarily attributable to higher anticipated earnings in higher tax jurisdictions relative to the prior year.

## OPERATING RESULTS OF BUSINESS SEGMENTS

(In millions, except %)	Three Months Ended			Favorable / (Unfavorable)	
	2011	March 31, 2010	\$	%	
Revenue					
JBT FoodTech	\$106.9	\$101.5	\$5.4	5.3	%
JBT AeroTech	92.5	67.4	25.1	37.2	
Other revenue and intercompany eliminations	2.1	0.1	2.0	*	
Total revenue	\$201.5	\$169.0	\$32.5	19.2	%
Income before income taxes					
Segment operating profit:					
JBT FoodTech	\$5.7	\$8.6	\$(2.9)	(33.7)	%
JBT AeroTech	7.7	4.8	2.9	60.4	
Total segment operating profit	13.4	13.4	-	-	
Corporate items:					
Corporate expense	(4.0)	(3.7)	(0.3)	(8.1)	
Other expense, net	(0.1)	(1.8)	1.7	94.4	
Net interest expense	(1.7)	(1.9)	0.2	10.5	
Total corporate items	(5.8)	(7.4)	1.6	21.6	
Income from continuing operations before income taxes	\$7.6	\$6.0	\$1.6	26.7	%

\* Not meaningful

Segment operating profit is defined as total segment revenue less segment operating expenses. The following items have been excluded in computing segment operating profit: corporate staff expense, foreign currency related gains and losses, LIFO provisions, restructuring costs, certain employee benefit expenses, interest income and expense and income taxes. Restructuring costs included in other expense, net were:

(in millions)	2011	2010
JBT FoodTech	\$1.0	\$0.9
JBT AeroTech	-	-
Total	\$1.0	\$0.9

## JBT FoodTech

JBT FoodTech's revenue increased by \$5.4 million in the first quarter of 2011 compared to the same period in 2010. The increase was driven primarily by a favorable impact of foreign currency translation, which resulted in \$4.4 million of higher revenue. The remaining difference was due to higher sales of our freezing and chilling products and protein processing products primarily in Europe partially offset by lower sales of in-container processing equipment.

JBT FoodTech's operating profit decreased by \$2.9 million in the first quarter of 2011 compared to the same period in 2010. Operating profit margins decreased from 8.5% to 5.3%. The decrease in operating profit was driven primarily by lower gross profit margin, which resulted in \$2.4 million of lower operating profit. Gross profit margin declined by 230 basis points as a result of an unfavorable mix of products sold compared to the prior-year and due to the strengthening of Swedish Krona. Additionally, higher selling and advertising costs due to the timing of expenditures decreased operating profit by \$0.8 million.

## JBT AeroTech

JBT AeroTech's revenue increased by \$25.1 million in the first quarter of 2011 compared to the same period in 2010 as a result of converting part of the strong year-end 2010 order backlog into revenue. Revenue from gate equipment products and ground support equipment products increased by \$18.9 million and \$5.9 million, respectively.

JBT AeroTech's operating profit increased by \$2.9 million in the first quarter of 2011 compared to the same period in 2010. Operating profit margins increased from 7.1% to 8.3% as a result of better leverage of fixed costs. Higher sales volume resulted in an increase in profit of \$5.6 million. Gross profit margin decreased by 250 basis points due to lower proportion of revenue from sales of Halvorsen loaders and lower gross profit margin earned on certain large contracts, which resulted in \$2.3 million of lower operating profit. Additionally, an increase in research and development expenditures resulted in a decrease in operating profit of \$0.3 million.

## Corporate Items

Corporate items decreased by \$1.6 million in the first quarter of 2011 compared to the same period in 2010. The decrease was driven primarily by higher gains on foreign currency transactions.

## Inbound Orders and Order Backlog

Inbound orders represent the estimated sales value of confirmed customer orders received during the reporting period.

(In millions)	Three Months Ended March 31,	
	2011	2010
JBT FoodTech	\$ 133.8	\$ 128.2
JBT AeroTech	77.3	114.7
Other and intercompany eliminations	2.1	0.1
Total inbound orders	\$ 213.2	\$ 243.0

Order backlog is calculated as the estimated sales value of unfilled, confirmed customer orders at the reporting date.

(In millions)	December 31,		
	March 31, 2011	2010	March 31, 2010
JBT FoodTech	\$ 130.3	\$ 103.4	\$ 123.4
JBT AeroTech	168.2	183.4	162.0
Intercompany eliminations	-	-	(0.2)
Total order backlog	\$ 298.5	\$ 286.8	\$ 285.2

As of March 31, 2011, JBT FoodTech's order backlog increased by \$26.9 million since December 31, 2010. The increase in backlog was driven primarily by orders for our freezing and chilling products and protein processing products from customers in the poultry industry in all regions, which resulted in \$15.8 million of higher backlog, and by orders for our in-container processing equipment, which resulted in \$10.4 million of higher backlog. JBT FoodTech's order backlog increased by \$6.9 million since March 31, 2010 primarily due to the favorable impact of foreign currency translation.

As of March 31, 2011, JBT AeroTech's order backlog decreased by \$15.2 million since December 31, 2010 and increased by \$6.2 million since March 31, 2010. The changes in order backlog were driven by strong revenue results in our gate equipment product line, which resulted in a decrease in order backlog of \$26.0 million since December 31, 2010 and \$23.0 million since March 31, 2010. However, improved market conditions have increased demand for our automated systems and ground support equipment products, which resulted in an increase in order backlog since December 31, 2010 of \$6.9 million and \$1.8 million, respectively, and since March 31, 2010 of \$16.3 million and \$8.2 million, respectively.

## Outlook

We anticipate a moderate growth in our end markets for most product lines, reflecting continued improvement in the global economy. We project our 2011 diluted earnings per share to be in the range of \$1.35 to \$1.50, depending on the varying degrees of the economic recovery. However, our earnings could be negatively impacted by more significant political turmoil in the Middle East and higher commodity prices and the effect of these factors on the markets we serve.

## LIQUIDITY AND CAPITAL RESOURCES

Our primary sources of liquidity are cash provided by operating activities and our credit facility. We believe cash flows from operations and the credit facility will be sufficient to satisfy our future working capital, research and development activities, capital expenditures, pension contributions and other financing requirements. Our ability to generate positive cash flows from operations is dependent on general economic conditions, competitive pressures, and other business and risk factors.

Cash flows for the three months ended March 31, 2011 and 2010 were as follows:

14

---

(In millions)	Three Months Ended	
	March 31,	
	2011	2010
Cash provided (required) by continuing operating activities	\$ 21.9	\$ (4.0 )
Cash required by investing activities	(5.8 )	(2.0 )
Cash (required) provided by financing activities	(19.8 )	1.5
Cash required by discontinued operations	(0.1 )	(0.1 )
Effect of exchange rate changes on cash and cash equivalents	0.1	(0.1 )
Decrease in cash and cash equivalents	\$ (3.7 )	\$ (4.7 )

Cash flows provided by continuing operating activities during the three months ended March 31, 2011 were \$21.9 million compared to cash flows required by continuing operating activities of \$4.0 million in the same period in 2010. The change in the cash flows is primarily attributable to changes in working capital. Sales in the fourth quarter of 2010 were significantly higher than in the same quarter in 2009, resulting in \$56.1 million of higher trade receivables. During the three months ended March 31, 2011, we collected a significant portion of these receivables.

Cash required by investing activities was \$5.8 million and \$2.0 million during the three months ended March 31, 2011 and 2010, respectively, primarily consisting of amounts required to fund capital expenditures. Much of our spending supports the maintenance and upgrading of our installed base of leased equipment.

Cash required by financing activities was \$19.8 million in the three months ended March 31, 2011 compared to cash provided by financing activities of \$1.5 million in the same period in 2010. We reduced the borrowings under our credit facility by \$14.3 million in the three months ended March 31, 2011, compared to an increase in borrowings under our credit facility of \$5.5 million in the same period in 2010.

#### Financing Arrangements

We have a \$225 million revolving credit facility that expires on July 31, 2013. Borrowings under the credit facility bear interest, at our option, at LIBOR or an alternative base rate, which is the greater of JPMorgan Chase, N.A.'s Prime Rate or the Federal Funds Rate plus 50 basis points, plus a margin dependent on our leverage ratio. We are required to make periodic interest payments on the borrowed amounts and pay an annual facility fee ranging from 17.5 to 35 basis points, depending on our leverage ratio. As of March 31, 2011, we had \$54.4 million drawn on the credit facility, \$15.0 million in letters of credit issued under the credit facility and \$155.6 million of additional available funds.

We have \$75 million of 6.66% senior unsecured notes. The senior unsecured notes are due on July 31, 2015 and require us to make semiannual interest payments.

Our credit agreement and notes include restrictive covenants that, if not met, could lead to a renegotiation of our credit lines, requirement to repay our borrowings and/or a significant increase in our cost of financing. At March 31, 2011, we were in compliance with all covenants of our contractual obligations as shown in the following table:

Debt Instrument / Covenant	Measurement	Result as of March 31, 2011
Revolving credit facility		
Interest coverage ratio (1)	Not less than 3.5	12.9
Leverage ratio (2)	Not greater than 3.0	1.4
Capital expenditures (3)	Not greater than \$33 million	\$5.8 million
Dividends paid	Not greater than \$20 million	\$2.4 million
6.66% senior unsecured notes		

Edgar Filing: John Bean Technologies CORP - Form 10-Q

Interest coverage ratio (1)	Not less than 2.75	12.9
Leverage ratio (2)	Not greater than 3.25	1.4

---

15

---

- (1) Interest coverage ratio is a comparison of the trailing twelve months Consolidated EBITDA, defined as net income plus interest expense plus income tax expense plus depreciation and amortization plus non-cash expenses and extraordinary, unusual and non-recurring items, to trailing twelve months interest expense.
- (2) Leverage ratio is a comparison of the total indebtedness, defined as total debt plus guarantees of indebtedness of others plus obligations under financial letters of credit issued against the credit facility, to the trailing twelve month Consolidated EBITDA, as defined above.
- (3) Capital expenditures are limited to \$30 million plus 50 percent of the unutilized amount from prior year.

We expect to remain in compliance with all restrictive covenants in the foreseeable future. However, there can be no assurance that continued or increased volatility in the global economic conditions will not impair our ability to meet our restrictive covenants, or the volatility in the capital and credit markets will not impair our ability to access these markets on terms acceptable to us or at all.

#### Outlook

We plan to meet our cash requirements in future periods with cash generated from operations and borrowings under our credit facilities. On May 4, 2011, the Board of Directors approved a quarterly cash dividend of \$0.07 per share of outstanding common stock, or approximately \$2.0 million. The dividend will be paid on June 10, 2011 to stockholders of record at the close of business on May 20, 2011. We estimate that we will contribute approximately \$11.5 million in the remainder of 2011 to our pension and other postretirement benefit plans, primarily reflecting discretionary contributions to our U.S. qualified pension plan.

We continue to evaluate acquisitions in the normal course of business which we expect to fund with cash generated from operations or borrowings under our credit facility.

#### CRITICAL ACCOUNTING ESTIMATES

Refer to our Annual Report on Form 10-K for the year ended December 31, 2010 for a discussion of our critical accounting estimates. During the three months ended March 31, 2011, there were no material changes in our judgments and assumptions associated with the development of our critical accounting estimates.

#### ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

There have been no material changes in reported market risks from the information reported in our Annual Report on Form 10-K for the year ended December 31, 2010.

#### ITEM 4. CONTROLS AND PROCEDURES

Under the direction of our principal executive officer and principal financial officer, we have evaluated the effectiveness of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the "Exchange Act")) as of March 31, 2011. We have concluded that our disclosure controls and procedures were:

- i) effective in ensuring that information required to be disclosed is recorded, processed, summarized and reported within time periods specified in the SEC's rules and forms; and
- ii) effective in ensuring that information required to be disclosed is accumulated and communicated to management, including our principal executive officer and principal financial officer, as appropriate to allow timely decisions regarding required disclosure.

There were no changes in controls identified in the evaluation for the quarter ended March 31, 2011 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting, as defined in Rule 13a-15(f) under the Exchange Act.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors  
John Bean Technologies Corporation:

We have reviewed the accompanying condensed consolidated balance sheet of John Bean Technologies Corporation and subsidiaries as of March 31, 2011, and the related condensed consolidated statements of income and cash flows for the three-month periods ended March 31, 2011 and 2010. These condensed consolidated financial statements are the responsibility of the Company's management.

We conducted our review in accordance with the standards of the Public Company Accounting Oversight Board (United States). A review of interim financial information consists principally of applying analytical procedures and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with the standards of the Public Company Accounting Oversight Board (United States), the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Based on our review, we are not aware of any material modifications that should be made to the condensed consolidated financial statements referred to above for them to be in conformity with U.S. generally accepted accounting principles.

We have previously audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheet of John Bean Technologies Corporation and subsidiaries as of December 31, 2010, and the related consolidated statements of income, cash flows and changes in stockholders' equity for the year then ended (not presented herein); and in our report dated March 3, 2011, we expressed an unqualified opinion on those consolidated financial statements. In our opinion, the information set forth in the accompanying condensed consolidated balance sheet as of December 31, 2010, is fairly stated, in all material respects, in relation to the consolidated balance sheet from which it has been derived.

PART II—OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

There have been no material legal proceedings identified or material developments in existing legal proceedings noted during the three months ended March 31, 2011.

ITEM 1A. RISK FACTORS

There have been no material changes in reported risk factors from the information reported in our Annual Report on Form 10-K for the year ended December 31, 2010.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

We had no unregistered sales of equity securities during the three months ended March 31, 2011.

ITEM 3. DEFAULTS UPON SENIOR SECURITIES

None.

ITEM 5. OTHER INFORMATION

None.
