Notes to Condensed Consolidated Financial statements

September 30, 2015 and 2014

(Unaudited)

Note 1. Basis of Presentation and Significant Accounting Policies

Throughout this report, the terms “our”, “we”, “us” and the “Company” refer to Barfresh Food Group Inc., including its subsidiaries. The accompanying unaudited condensed financial statements of Barfresh Food Group Inc. at September 30, 2015 and 2014 have been prepared in accordance with generally accepted accounting principles (“GAAP”) for interim financial statements, instructions to Form 10-Q, and Regulation S-X. Accordingly, certain information and footnote disclosures normally included in financial statements prepared in accordance with GAAP have been condensed or omitted. These condensed financial statements should be read in conjunction with the financial statements and notes thereto included in our annual report on Form 10-K for the year ended March 31, 2015. In management’s opinion, all adjustments (consisting only of normal recurring adjustments) considered necessary for a fair presentation to make our financial statements not misleading have been included. The results of operations for the periods ended September 30, 2015 and 2014 presented are not necessarily indicative of the results to be expected for the full year. The March 31, 2015 balance sheet has been derived from our audited financial statements included in our annual report on Form 10-K for the year ended March 31, 2015.

Basis of Consolidation

The condensed consolidated financial statements include the financial statements of the Company and our wholly owned subsidiaries Barfresh Inc. and Barfresh Corporation, Inc. (formerly known as Smoothie, Inc.). All inter-company balances and transactions among the companies have been eliminated upon consolidation.

Use of Estimates

The preparation of financial statements in accordance with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and revenues and expenses during the years reported. Actual results may differ from these estimates.

Inventory

Inventory consists of finished goods and is carried at the lower of cost or market on a first in first out basis.

Intangible Assets

Intangible assets are comprised of patents, net of amortization. The patent costs are being amortized over the life of the patents, which is twenty years from the date of filing the patent applications. In accordance with ASC Topic 350 *Intangibles - Goodwill and Other* ("ASC 350"), the costs of internally developing other intangible assets, such as patents, are expensed as incurred. However, as allowed by ASC 350, legal fees and similar costs relating to patents have been capitalized.

Property, Plant and Equipment

Property, plant and equipment is stated at cost less accumulated depreciation and accumulated impairment loss, if any. Depreciation is calculated on a straight line basis over the estimated useful lives of the assets. Leasehold improvements are being amortized over the shorter of the useful life of the asset or the lease term that includes any expected renewal periods deemed to be reasonably assured. The estimated useful lives used for financial statement purposes are:

Furniture and fixtures: 5 years

Equipment: 7 years

Leasehold improvements: 2 years

Vehicle: 5 years

(Unaudited)

Revenue Recognition

We recognize revenue from products sold when there is persuasive evidence of an arrangement, delivery has occurred or services have been rendered, the sales price is determinable and collection is reasonably assured.

Earnings per Share

We calculate net loss per share in accordance with ASC Topic 260, *Earnings per Share*. Basic net loss per share is computed by dividing net loss by the weighted average number of shares of common stock outstanding for the period, and diluted earnings per share is computed by including common stock equivalents outstanding for the period in the denominator. At September 30, 2015 and 2014 any equivalents would have been anti-dilutive as we had losses for the periods then ended.

Research and Development

Expenditures for research activities relating to product development and improvement are charged to expense as incurred. We incurred \$17,672 and \$33,577 in research and development expenses for the six-month periods ended September 30, 2015 and 2014, respectively, and \$9,289 and \$27,925 in research and development expenses for the three-month periods ended September 30, 2015 and 2014, respectively.

Rent Expense

We recognize rent expense on a straight-line basis over the reasonably assured lease term as defined in ASC Topic 840, *Leases* (“ASC 840”).

Recent Pronouncements

From time to time, new accounting pronouncements are issued that we adopt as of the specified effective date. We believe that the impact of recently issued standards that are not yet effective may have an impact on our results of operations and financial position. ASU Update 2014-09 *Revenue From Contracts With Customers (Topic 606)* issued May 28, 2014 by FASB and IASB converged guidance on recognizing revenue in contracts with customers with an effective date after December 15, 2017 will be evaluated as to impact and implemented accordingly. In addition, ASU Update 2014-15 *Presentation of Financial Statements-Going Concern (Sub Topic 205-40)* issued August 27, 2014 by FASB defines management's responsibility to evaluate whether there is substantial doubt about an organization's ability to continue as a going concern. The additional disclosure requirement is effective after December 15, 2016 and will be evaluated as to impact and implemented accordingly.

Note 2. Property Plant and Equipment

Major classes of property and equipment at September 30, 2015 and March 31, 2015:

(Unaudited)

Note 3. Intangible Assets

As of September 30, 2015 and March 31, 2015, intangible assets consist primarily of patent costs and trademarks of \$ 758,712 and \$748,806, less accumulated amortization of \$128,265 and \$97,373, respectively.

The amounts carried on the balance sheet represent cost to acquire, legal fees and similar costs relating to the patents incurred by the Company. Amortization is calculated through the expiration date of the patent, which is December, 2025. The amount charged to expenses for amortization of the patent costs was \$30,892 and \$30,633 for the six-month periods ended September 30, 2015 and 2014, respectively, and \$15,519 and \$15,555 for the three-month periods ended September 30, 2015 and 2014, respectively.

Estimated amortization expense related to the patent as of September 30, 2015 is as follows:

Fiscal Years Ending March 31,	
2016 (6 months remaining)	\$41,579
2017	61,492
2018	61,492
2019	61,492
2020	61,492
Thereafter	342,900
Total	\$630,447

Note 4. Short-Term Notes Payable (Related and Unrelated)

In December 2013, we closed an offering of \$775,000 in short-term notes payable (“Short-Term Notes”), \$500,000 of which was purchased by a significant shareholder, \$100,000 was purchased by the family trust of an officer, director and significant shareholder and \$100,000 was purchased by a company controlled by a director and significant

shareholder. During December 31, 2014 the \$100,000 that was purchased by the family trust of an officer, director and significant shareholder is no longer considered to be owned by the officer as he is no longer, nor is any other related party, the trustee and does not exercise control over the trust and is not classified as a related party debt. The Short-Term Notes bear interest at a rate of 2% per annum and were due and payable on December 20, 2014. We also issued 1,291,667 warrants to the Short-Term Note holders for the right to purchase shares of our common stock. Each warrant entitles the holder to purchase one share of our common stock at a price of \$0.45 per share, may be exercised on a cashless basis and are exercisable for a period of five years.

In accordance with the guidance in ASC Topic 470-20 *Debt with Conversion and Other Options* (“ASC 470”), we first calculated the fair value of the warrants issued and then determined the relative value of the Short-Term Notes.

The relative value of the warrants was \$298,232, which was the amount recorded as debt discount. The amounts recorded as debt discount was amortized over the life of the note, one year, and charged to interest expense. We estimated the effective interest rate as calculated to be approximately 52% but paid cash at a rate of 2% per annum.

We exercised our right to extend the due date of the Short-Term Notes to June 20, 2015. The extended Short-Term Notes bear at the rate of 3% per annum and we required us to issue additional warrants (“Extension Warrants”). We issued 898,842 warrants to the Short-Term Note holders for the right to purchase shares of our common stock. Each warrant entitles the holder to purchase one share of our common stock at a price of \$0.485 per share, may be exercised on a cashless basis and are exercisable for a period of three years.

On June 20, 2015, some of the Short-Term Notes were amended, and some of the Short-Term Notes were redeemed. Short-Term Notes totaling \$700,000 were amended to provide for repayment on June 20, 2015 of 50% of the face value, plus accrued interest to that date (\$10,500), and extension of the remaining balance until September 20, 2015, and the interest rate on the notes that were extended was adjusted to 10%. The remaining Short-Term Notes were fully redeemed on June 20, 2015. One such note in the amount of \$25,000 was redeemed for cash, and one such note in the amount of \$50,000 was redeemed for 71,429 shares of our common stock. As a result of the above described amendments and redemptions of the Short-Term Notes, all remaining unamortized debt discount was expensed as of June 20, 2015.

Of the balance of the notes due that were payable on September 20, 2015, one note for \$250,000 was repaid on October 1, 2015, and two notes totaling \$100,000 were extended until December 31, 2015, with 10% interest.

Note 5. Convertible Note (Related and Unrelated)

In August 2012, we closed an offering of \$440,000 of convertible notes, \$50,000 of which was purchased by the family trust of a significant shareholder of ours. The notes bear interest at a rate of 12% per annum and were due and payable on September 6, 2013. In addition, the notes were convertible at any time after the original issue date until the notes are no longer outstanding into our common stock at a conversion price of \$0.372 per share. We also issued 956,519 warrants to the note holders for the right to purchase shares of our common stock. Each warrant entitled the holder to purchase one share of our common stock at a price of \$0.46 per share for a term of seven years.

When the convertible notes were due we settled the notes by repaying \$40,000 of the notes in cash, issuing new convertible notes in the amount of \$400,000 and received payment for another note in the amount of \$20,000. The new notes bear interest at a rate of 12% per annum and are due and payable on September 6, 2015. In addition the new notes are convertible at any time after the original issue date until the new notes are no longer outstanding, into our common stock at a conversion price of \$0.25 per share. We also issued warrants to the new note holders for the right to purchase shares of our common stock. Each warrant entitles the holder to purchase one share of our common stock at a price of \$0.25 per share. There were 1,680,000 warrants issued. The warrants issued with the original notes were cancelled.

In accordance with the guidance in ASC 470, we first calculated the fair value of the warrants issued and then determined the relative value of the notes and determined that there was a beneficial conversion feature.

The fair value of the warrants, \$0.13 per share, (\$216,531 in the aggregate) was calculated using the Black-Sholes option pricing model using the following assumptions:

Expected life (in years)	3
Volatility (based on a comparable company)	85 %
Risk Free interest rate	0.91 %
Dividend yield (on common stock)	-

The relative value of the warrants to the notes was \$142,873, which was the amount recorded as a portion of the debt discount. We also recorded a beneficial conversion feature on the convertible notes of \$125,905. The amounts recorded as debt discount will be amortized over the life of the notes, two years, and charged to interest expense. We estimated the effective interest rate as calculated to be approximately 74% but the face rate was 12% per annum.

As of September 30, 2015 all debt discount has been amortized.

During September 2015 all of the holders of the convertible notes elected to convert the notes, \$420,000, and accumulated interest of \$21,955 to our common stock. We issued 1,557,367 shares of our common stock and will issue the remaining 210,455 shares in the near future.

Note 6. Commitments and Contingencies

We lease office space under a non-cancelable operating lease, which will expire on November 7, 2016.

The aggregate minimum requirements under non-cancelable leases as of September 30, 2015 is as follows:

Fiscal Years ending March 31,	
2016	\$46,368
2017	54,529
	\$100,897

Of the warrants exercised 657,560 were cashless and we issued 427,316 shares of our common stock in exchange for the warrants and 10,000 were exercised for cash and we issued 10,000 shares of our common stock.

Note 9. Interest Expense

Interest expense includes direct interest of \$37,387 and \$33,041 for the six month periods ended September 30, 2015 and 2014, respectively and \$19,362 and \$16,611 for the three months ended September 30, 2015 and 2014, calculated based on the interest rates stated in our various debt instruments.

In addition as more fully described in Notes 4 and 5 above, interest expense includes non-cash amortization of the debt discount of \$172,862 and \$204,715 for the six months ended September 30, 2015 and 2014, respectively and

\$43,145 and \$110,155 for the three months ended September 30, 2015 and 2014.

Note 10. Income Taxes

We account for income taxes in interim periods in accordance with ASC Topic 740, Income Taxes (“ASC 740”). We have determined an estimated annual effective tax rate. The rate will be revised, if necessary, as of the end of each successive interim period during our fiscal year to our best current estimate. As of September 30, 2015 the estimated effective tax rate for the year will be zero.

There are open statutes of limitations for taxing authorities in federal and state jurisdictions to audit our tax returns from 2009 through the current period. Our policy is to account for income tax related interest and penalties in income tax expense in the statement of operations. There have been no income tax related interest or penalties assessed or recorded.

ASC 740 prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. This pronouncement also provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosure, and transition.

For the six months ended September 30, 2015 and 2014, we did not have any interest and penalties associated with tax positions. As of September 30, 2015 we did not have any significant unrecognized uncertain tax positions.

Note 11. Business Segments

During the three months ended September 30, 2015 and 2014, we operated in only one business segment.

Note 12. Subsequent Events

Management has evaluated all activity and concluded that no subsequent events have occurred that would require recognition in the financial statements or disclosure in the notes to the financial statements.

Barfresh is a leader in the creation, manufacturing and distribution of ready to blend frozen beverages. The current portfolio of products includes smoothies, shakes and frappes. All of the products are portion controlled and ready to blend beverage ingredient packs or “beverage packs”. The beverage packs contain all of the solid ingredients necessary to make the beverage, including the base (either sorbet, frozen yogurt or ice cream), real fruit pieces, juices and ice – five ounces of water are added before blending.

Domestic and international patents and patents pending are owned by Barfresh, as well as related trademarks for all of the products. In November 2011, the Company acquired the patent rights in the United States and Canada. The Canadian patent has been granted and the United States patent is “patent pending”. On October 15, 2013, the Company acquired all of the related international patent rights, which were filed pursuant to the Patent Cooperation Treaty and have been granted in 13 jurisdictions. The patents are pending in the remainder of the jurisdictions that have signed the treaty. In addition, on October 15, 2013, the Company purchased all of the trademarks related to the patented products.

The Company has conducted sales through two channels: National Accounts, and through an exclusive nationwide distribution agreement with Sysco Corporation (“Sysco”), the U.S.’s largest broadline distributor, which was entered into during July 2014.

The process of obtaining sales orders for National Accounts generally follows several steps, including product demonstration, product testing, and exclusive flavor development for the larger National Accounts. We are currently in various stages of product development and testing with National Accounts representing over 37,000 restaurant locations. The Company recently moved into full roll out with Shari's Café and Pies, a family dining chain in the Pacific Northwest operating 100 restaurants which are open 24 hours a day, 365 days a year. Barfresh also recently entered into a sales agreement with the Bowling Proprietor's Association of America ("BPAA"), an organization that serves the interests of 3,340 bowling centers nationwide. Under the agreement with BPAA, Barfresh will work with the organization to provide Barfresh's line of smoothies, shakes and frappes to its members.

In addition to the National Accounts, the Company sells to food distributors that supply products to the food services market place. Effective July 2, 2014, the Company entered into an exclusive agreement with Sysco Merchandising and Supply Chain Services, Inc. for resale by the Sysco Corporation ("Sysco") to the foodservice industry of the Company's ready-to-blend smoothies, shakes and frappes. All Barfresh products will be included in Sysco's national core selection of beverage items, making Barfresh its exclusive single-serve, pre-portioned beverage provider. The agreement is mutually exclusive; however, Barfresh may also sell the products to other foodservice distributors, but only to the extent required for such foodservice distributors to service multi-unit chain operators with at least 20 units and where Sysco is not such multi-unit chain operators nominated distributor for our products. The Company has already started shipping to 35 of the 74 Sysco distribution centers under this agreement and anticipates a national rollout over the next 12 months.

On October 26, 2015, Barfresh signed an agreement with PepsiCo North America Beverages, a division of PepsiCo, to become its exclusive sales representative within the food service channel to present Barfresh's line of ready-to-blend smoothies and frozen beverages throughout the United States and Canada. Through this agreement, Barfresh' products will be included as part of PepsiCo's offerings to its significant customer base, which we expect to fast track our growth and expedite the test to market process.

Finally, the Company intends to monetize the international patents outside of the current area of operations, North America, by expanding contract manufacturing to other countries and selling either through selling agents or internal sales personnel. The Company will also consider entering into some form of license or royalty agreements with third parties.

Barfresh currently utilizes contract manufacturers to manufacture all of the products in the United States. Ice cream manufacturers are best suited to produce the products and two production lines are currently operational in our Salt Lake City contract manufacturer location. This manufacturer is currently producing products sold to existing customers as well as producing exclusive products developed for National Accounts. Currently annual production capacity with our existing contract manufacturer is 14 million units per year. The Company is now in advanced discussion with an additional contract manufacturing company that would be able to produce an additional 100 million units per year.

Although there currently is not a contract in place with any suppliers for the raw materials needed to manufacture our products, there are a significant number of sources available and the company does not anticipate becoming dependent on any one supplier. As demand for the range of our products grows, we plan to contract a level of raw material requirements to ensure continuity of supply.

As of September 30, 2015, we had 34 employees and 4 consultants. There are currently 24 employees and 2 consultants selling our products.

Most recently, as part of the Company's expansion due to the acquisition of the international patents, a leading regional Australian food ingredient supply and product developer has been engaged as the wholesaler and distributor for Barfresh products in Australia.

Critical Accounting Policies

The significant accounting policies set forth in Note 2 to our audited consolidated financial statements included in our Annual Report on Form 10-K for the year ended March 31, 2015, as updated by Note 1 to the Unaudited Condensed Consolidated Financial Statements included herein, and Management's Discussion and Analysis of Financial Condition and Results of Operations included in our Annual Report on Form 10-K for the year ended March 31, 2015, appropriately represent, in all material respects, the current status of our critical accounting policies and estimates, the disclosure with respect to which is incorporated herein by reference

Results of Operations

Results of Operation for Three Months Ended September 30, 2015 as Compared to the Three Months Ended September 30, 2014 (References to 2015 and 2014 are to the three months ended September 30, 2015 and 2014, respectively, unless otherwise specified.)

Revenue and cost of revenue

Revenue increased \$185,894 (462%) from \$40,233 in 2014 to \$226,127 in 2015. The increase is a result of our product being distributed through Sysco, a leading national broad line food distributor. We currently sell into 34 of Sysco's 74 distribution locations. At this time last year we sold our product into 2 of Sysco's distribution locations. We expect to have our product in all of Sysco's 74 distribution locations during calendar year 2016.

Cost of revenue for 2015 was \$119,229 as compared to \$19,744 in 2014. Our gross profit was \$106,898 (47.27%) and \$20,489 (50.93%) for 2015 and 2014, respectively. There were no significant change in our selling prices. Revenue in both 2015 and 2014 included sales of blenders and freezers. We only make a nominal profit on these items as they are to accommodate our customers. We anticipate that our gross profit percentage for the remainder of 2015 will be comparable to the current percentage.

Operating expenses

Our operations during 2015 and 2014 were directed towards increasing sales and finalizing flavor profiles. During the current quarter we increased our overhead as a result of the ongoing implementation of the distribution agreement with Sysco. We anticipate further increases to selling costs, mostly related to increasing our sales and marketing staff, as we continue to implement our distribution agreement with Sysco, and as we begin to implement our new sales agreement with PepsiCo North America Beverages.

Our general and administrative expenses increased \$1,360,015 (175%) from \$778,800 in 2014 to \$2,138,815 in 2015, as our business grew, and may not necessarily be indicative of the rate of future increases. The following is a breakdown of our general and administrative expenses for the three months ended September 30, 2015 and 2014:

	Three months ended September 30,		
	2015	2014	Difference
Personnel costs	\$1,040,843	\$239,626	\$801,217
Stock based compensation/options	255,321	116,823	138,498
Legal and professional fees	202,072	105,795	96,277
Travel	110,404	55,323	55,081
Rent	34,482	35,211	(729)
Marketing and selling	158,686	43,610	115,076
Consulting fees	172,090	78,495	93,595
Other expenses	164,917	103,917	61,000
	\$2,138,815	\$778,800	\$1,360,015

Personnel cost represents the cost of employees including salaries, employee benefits and employment taxes and continues to be our largest cost. Personnel cost increased \$801,217 (334%) from \$239,626 to \$1,040,842. We have significantly increased our sales staff primarily as a result of the distribution agreement with Sysco. We currently have 34 full time employees compared to 6 at the end of the prior period. We anticipate personnel cost to increase in the future as we add more staff for both the further implementation of the Sysco distribution agreement and the PepsiCo sales agreement.

Stock based compensation is used as an incentive to attract new employees and to compensate existing employees. Stock based compensation includes stock issued and options granted to employees and non-employees. During the three months ended September 30, 2015, we granted 80,000 options to purchase shares of our common stock to employees. The exercise prices range from \$0.47 to \$0.72. The fair value of the stock was based on the trading value of the shares on the date of grant and are being amortized over the vesting period. The fair value of the stock options was calculated using the Black-Sholes model using the following assumptions: expected life in years, 8; volatility, 98.7% to 99%; risk free rate of return, 1.64% to 2.11%, and no annual dividends and are being amortized over the vesting period. We anticipate making additional grants in the future. Fewer grants were made in 2014.

Legal and professional fees increased \$96,277 (91%) from \$105,795 in 2014 to \$202,072 in 2015. The increase was primarily due to increased accounting costs and more legal services required as a result of increased business and financing activity. We anticipate legal fees related to ongoing Securities and Exchange Commission reporting to remain the same and additional legal fees to be related to the continuing increase in our business and financing activities.

Travel expenses increased \$55,081 (100%) from \$55,323 in 2014 to \$110,404 in 2015. The increase is due to increased travel related to increased personnel engaging in selling and marketing activities. We anticipate that travel cost will continue to increase as we increase our personnel and our customer base.

Rent expense is primarily for our location in Beverly Hills, California. Rent expense for the Beverly Hills office is approximately \$7,600 per month. The lease on the office commenced in November 8, 2014 and expires in November 2016. Rent expense also includes monthly parking fees as well as an offsite storage facilities. The increase is due to a nominal increase on the office and the addition of additional parking fees as our employee base grows.

Marketing and selling expenses increased \$115,076 (264%) from \$43,610 in 2014 to \$158,686 in 2015. The increase relates primarily to the increase in overall sales and marketing activities, including a rebranding project. We anticipate a continued increase in these costs as our business continues to grow.

Consulting fees increased \$93,595 (119%) from \$78,495 in 2014 to \$172,090 in 2015. Our consulting fees vary based on needs. We engage consultants in the areas of sales, operations and accounting. Future consulting fees will be variable.

Other expenses consist of ordinary operating expenses such as office, telephone, insurance, and stock related costs. We anticipate increases in these expenses.

We had operating losses of \$2,074,441 and \$787,507 for 2015 and 2014, respectively.

Interest expense decreased \$64,259 (51%) from \$126,766 in 2014 to \$62,507 in 2015. Interest primarily relates to convertible debt that was issued in August 2012, renewed in September 2013, and converted into stock during September of 2015, and short term notes that were issued in December 2013, which were partially repaid during June of 2015. The stated interest rate on the convertible debt is 12%. After giving effect to the debt discount the effective rate of interest on the short term debt is estimated to be approximately 53% and approximately 74% on the convertible notes. Interest expense includes direct interest of \$19,362 and \$16,611 for 2015 and 2014, respectively, calculated based on the interest rates stated in our various debt instruments. In addition, interest expense includes non-cash amortization of the debt discount of \$43,145 and \$110,155 for 2015 and 2014, respectively

We had net losses of \$2,136,948 and \$914,273 for 2015 and 2014, respectively.

At this time last year we sold our product into 2 of Sysco's distribution locations. We expect to have our product in all of Sysco's 74 distribution locations during calendar year 2016.

Off-Balance Sheet Arrangements

We have no off-balance sheet arrangements that have or are reasonably likely to have a current or future effect on our financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources that are material to stockholders.

Item 3. Quantitative and Qualitative Disclosures About Market Risk.

Not required because we are a smaller reporting company.

Item 4. Controls and Procedures.

Evaluation of Disclosure Controls and Procedures

Under the supervision and with the participation of our management, including our Chief Executive Officer and our Chief Accounting Officer, we conducted an evaluation of our disclosure controls and procedures, as such term is defined under Securities and Exchange Act of 1934 Rules 13a-15(f). Based on this evaluation, our Chief Executive

Officer and our Chief Accounting Officer concluded that the Company's disclosure controls and procedures were effective as of September 30, 2015.

However, management has identified the following material weaknesses in our internal control over financial reporting:

We established an audit committee during our last quarter ended June 30, 2015. We are not currently obligated to have an audit committee, including a member who is an "audit committee financial expert", as defined in Item 407 of Regulation S-K, under applicable regulations or listing standards. It is management's view that such a committee is an important internal control over financial reporting, the lack of which may result in ineffective oversight in the establishment and monitoring of internal control.

We do not have a majority of independent directors on our board of directors, which may result in ineffective oversight in the establishment and monitoring of our internal control.

Inadequate Segregation of Duties: We have an inadequate number of personnel to properly implement internal controls over financial reporting.

Since the assessment of the effectiveness of our internal control over financial reporting did identify material weaknesses, management considers its internal control over financial reporting to be ineffective.

Management believes that the material weakness set forth above did not have an effect on our financial results.

Changes in Internal Control over Financial Reporting

There have been no changes in the Company's internal control over financial reporting during the three months ended September 30, 2015 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

under this Item 1.

Item 1A. Risk Factors.
