Table of Contents

NOTE 1—ORGANIZATION AND BASIS OF PRESENTATION

These financial statements represent the condensed consolidated financial position and results of operations of Walker & Dunlop, Inc. and its subsidiaries. Unless the context otherwise requires, references to “we,” “us,” “our,” “Walker & Dunlop” and the “Company” mean the Walker & Dunlop consolidated companies. The statements have been prepared in conformity with U.S. generally accepted accounting principles (“GAAP”) for interim financial information and with the instructions to Form 10-Q and Regulation S-X. Accordingly, they do not include all of the information and footnotes required by GAAP for complete financial statements. Because the accompanying condensed consolidated financial statements do not include all of the information and footnotes required by GAAP, they should be read in conjunction with the financial statements and notes thereto included in the Company’s Annual Report on Form 10-K for the year ended December 31, 2015 (“2015 Form 10-K”). In the opinion of management, all adjustments (consisting only of normal recurring accruals except as otherwise noted herein) considered necessary for a fair presentation of the results for the Company in the interim periods presented have been included. Results of operations for the three and six months ended June 30, 2016 are not necessarily indicative of the results that may be expected for the year ending December 31, 2016 or thereafter.

Walker & Dunlop, Inc. is a holding company and conducts substantially all of its operations through Walker & Dunlop, LLC, the operating company. Walker & Dunlop is one of the leading commercial real estate finance companies in the United States. The Company originates, sells, and services a range of multifamily and other commercial real estate financing products and provides multifamily investment sales brokerage services. The Company originates and sells loans pursuant to the programs of the Federal National Mortgage Association (“Fannie Mae”), the Federal Home Loan Mortgage Corporation (“Freddie Mac,” and together with Fannie Mae, the “GSEs”), the Government National Mortgage Association (“Ginnie Mae”), and the Federal Housing Administration, a division of the U.S. Department of Housing and Urban Development (together with Ginnie Mae, “HUD”). The Company also offers proprietary loan programs offering interim loans (the “Interim Program”) and loans for a Commercial Mortgage Backed Securities (“CMBS”) execution (the “CMBS Program”).

Prior to 2016, the Company executed the CMBS Program through a partnership in which the Company owned a noncontrolling interest. The Company accounted for its investment in the partnership under the equity method of accounting. Effective January 1, 2016, the Company’s partner exited the CMBS Program, and the Company increased its ownership percentage to 100%. As the CMBS Program is now wholly owned, the Company began to consolidate the activities, financial results, and balances of the CMBS Program beginning in the first quarter of 2016, primarily impacting loans held for sale, warehouse notes payable, and gains from mortgage banking activities.

NOTE 2—SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

**Consolidation**—The condensed consolidated financial statements include the accounts of Walker & Dunlop, Inc., its wholly owned subsidiaries, and its majority owned subsidiaries. All intercompany transactions have been eliminated in consolidation. When the Company has significant influence over operating and financial decisions for an entity but does not own a majority of the voting interests, the Company accounts for the investment using the equity method of accounting.

**Subsequent Events**—The Company has evaluated the effects of all events that have occurred subsequent to June 30, 2016. There have been no material events that would require recognition in the condensed consolidated financial statements. The Company has made certain disclosures in the notes to the condensed consolidated financial statements of events that have occurred subsequent to June 30, 2016. No other material subsequent events have occurred that would require disclosure.

Use of Estimates—The preparation of condensed consolidated financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses, including guaranty obligations, allowance for risk-sharing obligations, allowance for loan losses, capitalized mortgage servicing rights, derivative instruments, and the disclosure of contingent assets and liabilities. Actual results may vary from these estimates.

Comprehensive Income—For the three and six months ended June 30, 2016 and 2015, comprehensive income equaled net income; therefore, a separate statement of comprehensive income is not included in the accompanying condensed consolidated financial statements.

Loans Held for Investment, net—Loans held for investment are multifamily loans originated by the Company through the Interim Program for properties that currently do not qualify for permanent GSE or HUD financing. These loans have terms of up to three years. The loans are carried at their unpaid principal balances, adjusted for net unamortized loan fees and costs, and net of any allowance for loan losses. Interest income is accrued based on the actual coupon rate, adjusted for the amortization of net deferred fees and costs, and is recognized as revenue when earned and deemed collectible. All loans held for investment are multifamily loans with similar risk characteristics. As of

Table of Contents

June 30, 2016, Loans held for investment, net consisted of \$242.1 million of unpaid principal balance less \$1.6 million of net unamortized deferred fees and costs and \$0.6 million of allowance for loan losses. As of December 31, 2015, Loans held for investment, net consisted of \$233.4 million of unpaid principal balance less \$1.1 million of net unamortized deferred fees and costs and \$0.8 million of allowance for loan losses.

The allowance for loan losses is the Company's estimate of credit losses inherent in the interim loan portfolio at the balance sheet date. The Company has established a process to determine the appropriateness of the allowance for loan losses that assesses the losses inherent in the portfolio. That process includes assessing the credit quality of each of the loans held for investment by monitoring the financial condition of the borrower and the financial trends of the underlying property. The allowance levels are influenced by the outstanding portfolio balance, delinquency status, historic loss experience, and other conditions influencing loss expectations, such as economic conditions. The allowance for loan losses is estimated collectively for loans with similar characteristics and for which there is no evidence of impairment. The allowances for loan losses recorded as of June 30, 2016 and December 31, 2015 were based on the Company's collective assessment of the portfolio.

Loans held for investment are placed on non-accrual status when full and timely collection of interest or principal is not probable. Loans held for investment are considered past due when contractually required principal or interest payments have not been made on the due dates and are charged off when the loan is considered uncollectible. The Company evaluates all loans held for investment for impairment. A loan is considered impaired when the Company believes that the facts and circumstances of the loan suggest that the Company will not be able to collect all contractually due principal and interest. Delinquency status and property financial condition are key components of the Company's consideration of impairment status.

None of the loans held for investment was delinquent, impaired, or on non-accrual status as of June 30, 2016 or December 31, 2015. Additionally, we have not experienced any delinquencies related to these loans or charged off any loan held for investment since the inception of the Interim Program.

Provision (benefit) for Credit Losses—The Company records the income statement impact of the changes in the allowance for loan losses and the allowance for risk-sharing obligations within Provision (benefit) for credit losses in the Condensed Consolidated Statements of Income. Note 5 contains additional discussion related to the allowance for risk-sharing obligations. Provision (benefit) for credit losses consisted of the following activity for the three and six months ended June 30, 2016 and 2015:

(in thousands)	For the three months ended		For the six months ended	
	June 30, 2016	2015	June 30, 2016	2015
Provision (benefit) for loan losses	\$ 17	\$ 340	\$ (238)	\$ 274
Provision for risk-sharing obligations	275	58	121	208

Edgar Filing: Walker & Dunlop, Inc. - Form 10-Q

Provision (benefit) for credit losses	\$ 292	\$ 398	\$ (117)	\$ 482
---------------------------------------	--------	--------	----------	--------

Net Warehouse Interest Income—The Company presents warehouse interest income net of warehouse interest expense. Warehouse interest income is the interest earned from loans held for sale and loans held for investment. Substantially all loans that are held for sale are financed with matched borrowings under our warehouse facilities incurred to fund a specific loan held for sale. A portion of all loans that are held for investment is financed with matched borrowings under our warehouse facilities. The portion of loans held for investment not funded with matched borrowings is financed with the Company’s own cash. Warehouse interest expense is incurred on borrowings used to fund loans solely while they are held for sale or for investment. Warehouse interest income and expense are earned or incurred on loans held for sale after a loan is closed and before a loan is sold. Warehouse interest income and expense are earned or incurred on loans held for investment after a loan is closed and before a loan is repaid. Included in Net warehouse interest income for the three and six months ended June 30, 2016 and 2015 are the following components:

6

Total net warehouse interest income	\$ 3,580	\$ 6,610	\$ 10,311	\$ 10,964

Recently Announced Accounting Pronouncements—In the second quarter of 2016, Accounting Standards Update 2016-13 (“ASU 2016-13” or “the Standard”), Financial Instruments – Credit Losses (Topic 326), was issued. ASU 2016-13 represents a significant change to the incurred loss model currently used to account for credit losses. The Standard requires an entity to estimate the credit losses expected over the life of the credit exposure upon initial recognition of that exposure. The expected credit losses consider historical information, current information, and reasonable and supportable forecasts, including estimates of prepayments. Exposures with similar risk characteristics are required to be grouped together when estimating expected credit losses. The initial estimate and subsequent changes to the estimated credit losses are required to be reported in current earnings in the income statement and through an allowance in the balance sheet.

ASU 2016-13 is applicable to financial assets subject to credit losses and measured at amortized cost and certain off-balance-sheet credit exposures. The Standard will modify the way the Company estimates its allowance for risk-sharing obligations and its allowance for loan losses. The effective date of the Standard for the Company is January 1, 2020, with early adoption permitted on January 1, 2019. The Company is still in the process of determining the significance of the impact the Standard will have on its financial statements and the timing of when it will adopt the standard.

There have been no material changes to the accounting policies discussed in Note 2 of the Company’s 2015 Form 10-K other than the changes made pursuant to the adoption of Accounting Standards Update 2016-09, Compensation—Stock Compensation (Topic 718): Improvements to Employee Share-Based Payment Accounting, as disclosed in the Company’s Quarterly Report on Form 10-Q for the quarterly period ended March 31, 2016.

**NOTE 3—GAINS FROM MORTGAGE BANKING ACTIVITIES**

Gains from mortgage banking activities consisted of the following activity for the three and six months ended June 30, 2016 and 2015:

	For the three months ended June 30,	For the six months ended June 30,
--	--	--------------------------------------

Edgar Filing: Walker & Dunlop, Inc. - Form 10-Q

(in thousands)	2016	2015	2016	2015
Contractual loan origination related fees, net	\$ 46,874	\$ 37,592	\$ 69,280	\$ 78,995
Fair value of expected net cash flows from servicing recognized at commitment	59,580	34,558	85,007	68,250
Fair value of expected guaranty obligation recognized at commitment	(4,001)	(2,200)	(5,511)	(4,575)
Total gains from mortgage banking activities	\$ 102,453	\$ 69,950	\$ 148,776	\$ 142,670

The origination fees shown in the table are net of co-broker fees of \$11.1 million and \$6.4 million for the three months ended June 30, 2016 and 2015, respectively, and \$16.6 million and \$12.8 million for the six months ended June 30, 2016 and 2015, respectively. Additionally, included in the contractual loan origination related fees, net balance for the three months ended June 30, 2016 and 2015 are realized and unrealized gains of \$2.7 million and \$0, respectively, and \$0.6 million and \$0 for the six months ended June 30, 2016 and 2015, respectively, from the sale and mark-to-market of loans and derivative instruments related to the CMBS Program.

Table of Contents

## NOTE 4—MORTGAGE SERVICING RIGHTS

Mortgage Servicing Rights (“MSRs”) represent the carrying value of the servicing rights retained by the Company for mortgage loans originated and sold. The initial capitalized amount is equal to the estimated fair value of the expected net cash flows associated with the servicing rights. MSRs are amortized using the interest method over the period that servicing income is expected to be received.

The fair values of the MSRs at June 30, 2016 and December 31, 2015 were \$576.4 million and \$510.6 million, respectively. The Company uses a discounted static cash flow valuation approach, and the key economic assumption is the discount rate. For example, see the following sensitivities:

The impact of a 100 basis point increase in the discount rate at June 30, 2016 is a decrease in the fair value of \$18.6 million.

The impact of a 200 basis point increase in the discount rate at June 30, 2016 is a decrease in the fair value of \$35.8 million.

These sensitivities are hypothetical and should be used with caution. These estimates do not include interplay among assumptions and are estimated as a portfolio rather than individual assets.

Activity related to capitalized MSRs for the three and six months ended June 30, 2016 and 2015 follows:

(in thousands)	For the three months ended		For the six months ended	
	June 30, 2016	2015	June 30, 2016	2015
Beginning balance	\$ 421,651	\$ 375,159	\$ 412,348	\$ 375,907
Additions, following the sale of loan	29,053	43,209	64,026	67,391
Purchases	44,774	—	44,774	—
Amortization	(23,233)	(19,750)	(45,956)	(38,570)
Pre-payments and write-offs	(4,152)	(3,598)	(7,099)	(9,708)
Ending balance	\$ 468,093	\$ 395,020	\$ 468,093	\$ 395,020

As shown in the table above, during the second quarter of 2016, the Company purchased the rights to service a HUD loan portfolio from a third-party servicer for \$44.8 million of cash consideration, with \$43.4 million paid at closing and the remaining \$1.4 million due upon the successful resolution of one defaulted loan, which is expected to occur before the end of 2016. The servicing portfolio consisted of approximately \$3.8 billion of unpaid principal balance and had a weighted average estimated remaining life of 10.8 years.

The following summarizes the components of the net carrying value of the Company’s acquired and originated MSRs as of June 30, 2016:

Edgar Filing: Walker & Dunlop, Inc. - Form 10-Q

(in thousands)	As of June 30, 2016		Net carrying value
	Gross carrying value	Accumulated amortization	
Acquired MSR	\$ 177,611	\$ (100,013)	\$ 77,598
Originated MSR	556,528	(166,033)	390,495
Total	\$ 734,139	\$ (266,046)	\$ 468,093

Table of Contents

The expected amortization of MSR's recorded as of June 30, 2016 is shown in the table below. Actual amortization may vary from these estimates.

(in thousands)	Originated MSR's Amortization	Acquired MSR's Amortization	Total MSR's Amortization
Six Months Ending December 31, 2016	\$ 40,564	\$ 7,443	\$ 48,007

Total	\$ 390,495	\$ 77,598	\$ 468,093

## NOTE 5—GUARANTY OBLIGATION AND ALLOWANCE FOR RISK-SHARING OBLIGATIONS

When a loan is sold under the Fannie Mae DUS program, the Company typically agrees to guarantee a portion of the ultimate loss incurred on the loan should the borrower fail to perform. The compensation for this risk is a component of the servicing fee on the loan. No guaranty is provided for loans sold under the Freddie Mac or HUD loan programs or under the Company's CMBS Program.

Activity related to the guaranty obligation for the three and six months ended June 30, 2016 and 2015 was as follows:

(in thousands)	For the three months ended		For the six months ended	
	June 30, 2016	2015	June 30, 2016	2015
Beginning balance	\$ 28,552	\$ 25,333	\$ 27,570	\$ 24,975
Additions, following the sale of loan	1,777	3,115	3,689	4,870
Amortization	(1,537)	(1,308)	(2,750)	(2,705)
Other	(386)	—	(103)	—
Ending balance	\$ 28,406	\$ 27,140	\$ 28,406	\$ 27,140

The Company evaluates the allowance for risk-sharing obligations by monitoring the performance of each loan for triggering events or conditions that may signal a potential default. In situations where payment under the guaranty is probable and estimable on a specific loan, the Company records an allowance for the estimated risk-sharing loss through a charge to the provision for risk-sharing obligations, which is a component of Provision (benefit) for credit losses in the Condensed Consolidated Statements of Income, along with a write-off of the loan-specific MSR and guaranty obligation. The amount of the provision reflects our assessment of the likelihood of payment by the borrower, the estimated disposition value of the underlying collateral, and the level of risk sharing. Historically, the loss recognition occurs at or before the loan becomes 60 days delinquent. Activity related to the allowance for risk-sharing obligations for the three and six months ended June 30, 2016 and 2015 follows:

(in thousands)	For the three months ended		For the six months ended	
	June 30, 2016	2015	June 30, 2016	2015
Beginning balance	\$ 5,149	\$ 4,054	\$ 5,586	\$ 3,904
Provision for risk-sharing obligations	275	58	121	208
Write-offs	—	(808)	—	(808)
Other	386	—	103	—
Ending balance	\$ 5,810	\$ 3,304	\$ 5,810	\$ 3,304

When the Company places a loan for which it has a risk-sharing obligation on its watch list, the Company ceases to amortize the guaranty obligation and transfers the remaining unamortized balance of the guaranty obligation to the allowance for risk-sharing obligations. When a loan for which the Company has a risk-sharing obligation is removed from the watch list, the loan is transferred from the allowance

Table of Contents

for risk-sharing obligations to the guaranty obligation, and the amortization of the remaining balance over the remaining estimated life is resumed. This net transfer of the unamortized balance of the guaranty obligation from a noncontingent classification to a contingent classification (and vice versa) is presented in the guaranty obligation and allowance for risk-sharing obligations tables above as 'Other.'

As of June 30, 2016, the maximum quantifiable contingent liability associated with the Company's guarantees under the Fannie Mae DUS agreement was \$4.3 billion. The maximum quantifiable contingent liability is not representative of the actual loss the Company would incur. The Company would be liable for this amount only if all of the loans it services for Fannie Mae, for which the Company retains some risk of loss, were to default and all of the collateral underlying these loans was determined to be without value at the time of settlement.

## NOTE 6—SERVICING

The total unpaid principal balance of the Company's servicing portfolio was \$57.3 billion as of June 30, 2016 compared to \$50.2 billion as of December 31, 2015. The June 30, 2016 balance includes the addition of \$3.8 billion related to purchase activity as more fully discussed in Note 4.

## NOTE 7—WAREHOUSE NOTES PAYABLE

At June 30, 2016, to provide financing to borrowers under the GSE and HUD programs and the Company's CMBS and Interim Programs, the Company has arranged for warehouse lines of credit. In support of the GSE and HUD programs, the Company has warehouse lines of credit in the amount of \$2.4 billion with certain national banks and a \$0.8 billion uncommitted facility with Fannie Mae (collectively, the "Agency Warehouse Facilities"). In support of the CMBS Program, the Company has warehouse lines of credit in the amount of \$0.3 billion with certain national banks (the "CMBS Warehouse Facilities"). The Company has pledged substantially all of its loans held for sale against the Agency Warehouse Facilities and the CMBS Warehouse Facilities. The Company has arranged for warehouse lines of credit in the amount of \$0.4 billion with certain national banks to assist in funding loans held for investment under the Interim Program ("Interim Warehouse Facilities"). The Company has pledged substantially all of its loans held for investment against these Interim Warehouse Facilities. The maximum amount and outstanding borrowings under the warehouse notes payable at June 30, 2016 follow:

(dollars in thousands) Facility	June 30, 2016		Loan Type Funded (1)	Interest rate
	Maximum Amount	Outstanding Balance		
Agency warehouse facility #1	\$ 425,000	\$ 336,126	LHFS	30-day LIBOR plus 1.40%
Agency warehouse facility #2	1,150,000	1,096,996	LHFS	30-day LIBOR plus 1.40%
Agency warehouse facility #3	480,000	291,323	LHFS	30-day LIBOR plus 1.35%
Agency warehouse facility #4	450,000	318,095	LHFS	30-day LIBOR plus 1.40%
Fannie Mae repurchase agreement, uncommitted line and open maturity	750,000	91,373	LHFS	30-day LIBOR plus 1.15%
Total agency warehouse facilities	\$ 3,255,000	\$ 2,133,913		

Edgar Filing: Walker & Dunlop, Inc. - Form 10-Q

CMBS warehouse facility #1	\$ 100,000	\$ 17,856	LHFS	30-day LIBOR plus 2.25%
CMBS warehouse facility #2	100,000	—	LHFS	30-day LIBOR plus 2.25%
CMBS warehouse facility #3	100,000	13,455	LHFS	30-day LIBOR plus 2.75%
Total CMBS warehouse facilities	\$ 300,000	\$ 31,311		
Interim warehouse facility #1	\$ 85,000	\$ 36,916	LHFI	30-day LIBOR plus 1.90%
Interim warehouse facility #2	200,000	101,096	LHFI	30-day LIBOR plus 2.00%
Interim warehouse facility #3	75,000	36,005	LHFI	30-day LIBOR plus 2.00% to 2.50%
Total interim warehouse facilities	\$ 360,000	\$ 174,017		
Debt issuance costs	—	(2,316)		
Total warehouse facilities	\$ 3,915,000	\$ 2,336,925		

---

(1) Type of loan the borrowing facility is used to fully or partially fund – loans held for sale (“LHFS”) or loans held for investment (“LHFI”).

During the second quarter of 2016, the Company executed the eighth amendment to the amended and restated credit and security agreement related to Agency Warehouse Facility #2 that extended the maturity date to June 21, 2017. Additionally, the Company executed

Table of Contents

an agreement to provide a temporary increase of \$500.0 million to the maximum borrowing capacity, which expires in August 2016. No other material modifications have been made to the agreement during 2016.

During the second quarter of 2016, the Company executed the fourth amendment to the credit and security agreement related to Agency Warehouse Facility #3. The amendment increased the committed amount to \$280.0 million, reduced the interest rate to the 30-day London Interbank Offered Rate (“LIBOR”) plus 135 basis points, and extended the maturity date to April 30, 2017. Additionally, the Company executed an agreement to provide a temporary increase of \$200.0 million to the maximum borrowing capacity, which expires in September 2016. No other material modifications have been made to the agreement during 2016.

During the second quarter of 2016, the Company executed an agreement to provide a temporary increase of \$200.0 million to the maximum borrowing capacity of Agency Warehouse Facility #4, which expires in August 2016. No other material modifications have been made to the agreement during 2016.

During the second quarter of 2016, Fannie Mae provided a temporary increase of \$300.0 million to the maximum borrowing capacity of the Fannie Mae uncommitted facility. The temporary increase was made permanent in July 2016. No other material modifications have been made to the Fannie Mae facility during 2016.

During the third quarter of 2016, the Company executed a warehousing credit and security agreement to establish Agency Warehouse Facility #5. The committed warehouse facility provides the Company with the ability to fund defaulted HUD and FHA loans. The warehouse agreement provides for a maximum borrowing amount of \$30.0 million and is scheduled to mature in 18 months. The borrowings under the warehouse agreement bear interest at a rate of 30-day LIBOR plus 180 basis points.

During the second quarter of 2016, the Company executed a repurchase agreement to establish CMBS Warehouse Facility #3. The new warehouse facility has a maximum borrowing capacity of \$100.0 million and matures in one year. The agreement provides the Company with the ability to fund first mortgage loans on various real estate property types for a short-term period, using available cash in combination with advances under the facility. All borrowings bear interest at 30-day LIBOR plus 275 basis points. The lender retains a first priority security interest in all mortgages funded by such advances on a cross-collateralized basis. Repayments under the credit agreement mirror the underlying mortgage loan, with each advance repaid upon sale of the underlying mortgage loan.

During the second quarter of 2016, the Company executed the sixth amendment to the credit and security agreement related to Interim Warehouse Facility #1 that extended the maturity date to April 30, 2017. No other material modifications have been made to the agreement during 2016.

During the second quarter of 2016, the Company exercised its option to extend the maturity date of Interim Warehouse Facility #3 to May 19, 2017. Additionally, the Company executed the second amendment to the repurchase agreement related to Interim Warehouse Facility #3. The amendment provides the Company with an additional unilateral option to extend the maturity date one year. As a result of the amendment, the Company now has three remaining one-year options that, if exercised, extend the maturity date through May 19, 2020. No other material modifications have been made to the agreement during 2016.

During the third quarter of 2016, the repurchase agreement related to CMBS Warehouse Facility #2 expired according to its terms, and the Company determined not to renew the facility.

The warehouse notes payable and the note payable are subject to various financial covenants, all of which the Company was in compliance with as of the current period end.

#### NOTE 8—FAIR VALUE MEASUREMENTS

The Company uses valuation techniques that are consistent with the market approach, the income approach, and/or the cost approach to measure assets and liabilities that are measured at fair value. Inputs to valuation techniques refer to the assumptions that market participants would use in pricing the asset or liability. Inputs may be observable, meaning those that reflect the assumptions market participants would use in pricing the asset or liability developed based on market data obtained from independent sources, or unobservable, meaning those that reflect the reporting entity's own assumptions about the assumptions market participants would use in pricing the asset or liability developed based on the best information available in the circumstances. In that regard, accounting standards establish a fair value hierarchy for valuation

Table of Contents

inputs that gives the highest priority to quoted prices in active markets for identical assets or liabilities and the lowest priority to unobservable inputs. The fair value hierarchy is as follows:

- Level 1—Financial assets and liabilities whose values are based on unadjusted quoted prices in active markets for identical assets or liabilities that the Company has the ability to access.
- Level 2—Financial assets and liabilities whose values are based on inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. These might include quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the asset or liability (such as interest rates, volatilities, prepayment speeds, credit risks, etc.) or inputs that are derived principally from or corroborated by market data by correlation or other means.
- Level 3—Financial assets and liabilities whose values are based on inputs that are both unobservable and significant to the overall valuation.

The Company's MSR's are measured at fair value on a nonrecurring basis. That is, the instruments are not measured at fair value on an ongoing basis but are subject to fair value adjustments in certain circumstances (for example, when there is evidence of impairment). The Company's MSR's do not trade in an active, open market with readily observable prices. While sales of multifamily MSR's do occur, precise terms and conditions vary with each transaction and are not readily available. Accordingly, the estimated fair value of the Company's MSR's was developed using discounted cash flow models that calculate the present value of estimated future net servicing income. The model considers contractually specified servicing fees, prepayment assumptions, delinquency rates, late charges, other ancillary revenue, costs to service, and other economic factors. The Company periodically reassesses and adjusts, when necessary, the underlying inputs and assumptions used in the model to reflect observable market conditions and assumptions that a market participant would consider in valuing an MSR asset. MSR's are carried at the lower of amortized cost or fair value.

A description of the valuation methodologies used for assets and liabilities measured at fair value on a recurring basis, as well as the general classification of such instruments pursuant to the valuation hierarchy, is set forth below. These valuation methodologies were applied to all of the Company's assets and liabilities carried at fair value on a recurring basis:

- Derivative Instruments—The derivative instruments used by the Company consist of interest rate lock commitments (“IRLC”), forward sale agreements (“forwards”), interest rate swaps (“IRS”), and, on occasion, synthetic credit default swap index contracts (“CMBX”). The IRLCs and forwards are valued using a discounted cash flow model developed based on changes in the U.S. Treasury rate and other observable market data. The value was determined after considering the potential impact of collateralization, adjusted to reflect nonperformance risk of both the counterparty and the Company, and are classified within Level 3 of the valuation hierarchy. CMBX are traded on an active market with prices determined based on observable inputs such as credit curves, recovery rates, and current credit spreads obtained from market participants. IRS trade in the over-the-counter market where quoted prices are not available. Therefore, the Company uses internal valuation techniques with observable inputs from a liquid market, the most significant of which is the related yield curve, to estimate the fair value of interest rate swaps. There were no CMBX outstanding as of June 30, 2016 as the positions were closed just prior to the end of the first quarter of 2016. During the rest of the first quarter of 2016, the Company had CMBX with a \$25.0 million notional amount outstanding. The Company classifies IRS and CMBX as Level 2.
- Loans Held for Sale—The loans held for sale are reported at fair value as the Company has elected the fair value option for all loans held for sale. The Company determines the fair value of the loans held for sale intended to be sold to the GSEs and HUD using discounted cash flow models that incorporate quoted observable prices from market participants. The Company determines the fair value of the loans held for sale intended to be sold under a CMBS execution using a hypothetical securitization model utilizing market data from recent securitization spreads and pricing of loans with similar characteristics. As necessary, these fair values are adjusted for typical securitization

activities, including portfolio composition, market conditions, and liquidity. The Company classifies all loans held for sale as Level 2.

- Pledged Securities—The pledged securities are valued using quoted market prices from recent trades. Therefore, the Company classifies pledged securities as Level 1.

Table of Contents

The following table summarizes financial assets and financial liabilities measured at fair value on a recurring basis as of June 30, 2016, and December 31, 2015, segregated by the level of the valuation inputs within the fair value hierarchy used to measure fair value:

(in thousands)	Quoted Prices in Active Markets For Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Other Unobservable Inputs (Level 3)	Balance as of Period End
June 30, 2016				
Assets				
Loans held for sale	\$ —	\$ 2,244,329	\$ —	\$ 2,244,329
Pledged securities	78,491	—	—	78,491
Derivative assets	—	—	28,358	28,358
Total	\$ 78,491	\$ 2,244,329	\$ 28,358	\$ 2,351,178
Liabilities				
Derivative liabilities	\$ —	\$ 1,725	\$ 27,758	\$ 29,483
Total	\$ —	\$ 1,725	\$ 27,758	\$ 29,483
December 31, 2015				
Assets				
Loans held for sale	\$ —	\$ 2,499,111	\$ —	\$ 2,499,111
Pledged securities	72,190	—	—	72,190
Derivative assets	—	—	11,678	11,678
Total	\$ 72,190	\$ 2,499,111	\$ 11,678	\$ 2,582,979
Liabilities				
Derivative liabilities	\$ —	\$ —	\$ 1,333	\$ 1,333
Total	\$ —	\$ —	\$ 1,333	\$ 1,333

There were no transfers between any of the levels within the fair value hierarchy during the six months ended June 30, 2016.

Derivative instruments (Level 3) are outstanding for short periods of time (generally less than 60 days). A roll forward of derivative instruments is presented below for the three and six months ended June 30, 2016 and 2015:

(in thousands)	Fair Value Measurements Using Significant Unobservable Inputs: Derivative Instruments			
	For the three months ended June 30,		For the six months ended June 30,	
	2016	2015	2016	2015

Edgar Filing: Walker & Dunlop, Inc. - Form 10-Q

Derivative assets and liabilities, net				
Beginning balance	\$ 9,578	\$ 23,674	\$ 10,345	\$ 9,658

Note payable	164,313	167,879	164,462	168,431
Total financial liabilities	\$ 2,530,721	\$ 2,536,603	\$ 2,815,265	\$ 2,821,775

The following methods and assumptions were used to estimate the fair value of each class of financial instruments for which it is practicable to estimate that value:

**Cash and Cash Equivalents and Restricted Cash**—The carrying amounts, at face value or cost plus accrued interest, approximate fair value because of the short maturity of these instruments (Level 1).

**Pledged Securities**—Consist of highly liquid investments in commercial paper of AAA rated entities, investments in money market accounts invested in government securities, and investments in government guaranteed securities. Investments typically have maturities of 90 days or less and are valued using quoted market prices from recent trades.

**Loans Held For Sale**—Consist of originated loans that are generally transferred or sold within 60 days from the date that the mortgage loan is funded and are valued using (i) discounted cash flow models that incorporate observable prices from market participants or (ii) a hypothetical securitization model utilizing market data from recent securitization spreads and pricing of loans with similar characteristics.

**Loans Held For Investment**—Consist of originated interim loans which the Company expects to hold for investment for the term of the loan, which is three years or less, and are valued using discounted cash flow models that incorporate

primarily observable inputs from market participants and also credit-related adjustments, if applicable (Level 3). As of June 30, 2016 and December 31, 2015, no credit-related adjustments were required.

Derivative Instruments—Consist of IRLCs, forwards, and IRS. IRLCs and forwards are valued using discounted cash flow models developed based on changes in the U.S. Treasury rate and other observable market data. The value is determined after considering the potential impact of collateralization, adjusted to reflect nonperformance risk of both the counterparty and the Company. The fair value of IRS is based on an internal valuation model with observable inputs from an active market.

## Table of Contents

Warehouse Notes Payable—Consist of borrowings outstanding under warehouse line agreements. The borrowing rates on the warehouse lines are based upon 30-day LIBOR plus a margin. The unpaid principal balance of warehouse notes payable approximates fair value because of the short maturity of these instruments and the monthly resetting of the index rate to prevailing market rates (Level 2).

Note Payable—Consists of borrowings outstanding under a term note agreement. The borrowing rate on the note payable is based upon 30-day LIBOR plus an applicable margin. The Company estimates the fair value by discounting the future cash flows at market rates (Level 2).

Fair Value of Derivative Instruments and Loans Held for Sale—In the normal course of business, the Company enters into contractual commitments to originate and sell multifamily GSE and HUD mortgage loans at fixed prices with fixed expiration dates. The commitments become effective when the borrowers "lock-in" a specified interest rate within time frames established by the Company. All mortgagors are evaluated for creditworthiness prior to the extension of the commitment. Market risk arises if interest rates move adversely between the time of the "lock-in" of rates by the borrower and the sale date of the loan to an investor.

To mitigate the effect of the interest rate risk inherent in providing IRLCs to borrowers for GSE and HUD loans, the Company's policy is to enter into a sale commitment with the investor simultaneous with the rate lock commitment with the borrower. The sale contract with the investor locks in an interest rate and price for the sale of the loan. The terms of the contract with the investor and the rate lock with the borrower are matched in substantially all respects, with the objective of eliminating interest rate risk to the extent practical. Forwards with the investors have an expiration date that is longer than our related IRLCs to the borrower to allow, among other things, for the closing of the loan and processing of paperwork to deliver the loan into the sale commitment.

With respect to the Company's loans held for sale intended to be sold under a CMBS execution, the Company is exposed to interest rate risk and credit risk (i.e., the risk that investor spreads will change due to perceived credit risk in CMBS loans). To mitigate the interest-rate risk, the Company's policy is to execute IRS with large national banks. On occasion, the Company executes CMBX with large national banks to mitigate the credit risk.

The IRLCs, forwards, and IRS are undesignated derivatives and, accordingly, are recorded at fair value through Gains on mortgage banking activities in the Condensed Consolidated Statements of Income. The fair value of the Company's IRLCs and loans held for sale and the related input levels includes, as applicable:

- the assumed gain/loss of the expected resultant loan sale to the investor (Level 2);
- the expected net cash flows associated with servicing the loan (Level 2);
- the effects of interest rate movements between the date of the rate lock and the balance sheet date (Level 2); and
- the nonperformance risk of both the counterparty and the Company (IRLCs and forwards only; Level 3).

The fair value of the Company's forwards and IRS considers effects of interest rate movements between the trade date and the balance sheet date (Level 2). The market price changes are multiplied by the notional amount of the forwards and IRS to measure the fair value.

The assumed gain/loss considers the amount that the Company has discounted the price to the borrower from par for competitive reasons, if at all, and the expected net cash flows from servicing to be received upon sale of the loan (Level 2). The fair value of the expected net cash flows associated with servicing the loan is calculated pursuant to the valuation techniques applicable to MSRs (Level 2).

To calculate the effects of interest rate movements, the Company uses applicable published U.S. Treasury prices, and multiplies the price movement between the rate lock date or loan origination date and the balance sheet date by the notional loan commitment amount (Level 2).

The fair value of the Company's forwards considers the market price movement of the same type of security between the trade date and the balance sheet date (Level 2). The market price changes are multiplied by the notional amount of the forwards to measure the fair value.

The fair value of the Company's IRLCs and forwards is adjusted to reflect the risk that the agreement will not be fulfilled. The Company's exposure to nonperformance in IRLCs and forwards is represented by the contractual amount of those instruments. Given the credit quality of our counterparties and the short duration of IRLCs and forwards, the risk of nonperformance by the Company's counterparties has historically not been significant (Level 3).

Table of Contents

The following table presents the components of fair value and other relevant information associated with the Company's derivative instruments and loans held for sale as of June 30, 2016 and December 31, 2015.

	Fair Value Adjustment Components				Balance Sheet Location		Fair Value Adjustment To Loans Held for Sale
	Notional or Principal Amount	Assumed Gain on Sale	Interest Rate Movement or Other Effect	Total Fair Value Adjustment	Derivative Assets	Derivative Liabilities

## NOTE 9—LITIGATION, COMMITMENTS, AND CONTINGENCIES

Fannie Mae DUS Related Commitments—Commitments for the origination and subsequent sale and delivery of loans to Fannie Mae represent those mortgage loan transactions where the borrower has locked an interest rate and scheduled closing and the Company has entered into a mandatory delivery commitment to sell the loan to Fannie Mae. As discussed in Note 8, the Company accounts for these commitments as derivatives recorded at fair value.

The Company is generally required to share the risk of any losses associated with loans sold under the Fannie Mae DUS program. The Company is required to secure these obligations by assigning restricted cash balances and securities to Fannie Mae. The amount of collateral required by Fannie Mae is a formulaic calculation at the loan level and considers the balance of the loan, the risk level of the loan, the age of the loan, and the level of risk-sharing. Fannie Mae requires restricted liquidity for Tier 2 loans of 75 basis points, which is funded over a 48-month period that begins upon delivery of the loan to Fannie Mae. Restricted liquidity held in the form of money market funds holding U.S. Treasuries is discounted 5% for purposes of calculating compliance with the restricted liquidity requirements. As of June 30, 2016, the Company held substantially all of its restricted liquidity in money market funds holding U.S. Treasuries. Additionally, substantially all of the loans for which the Company has risk sharing are Tier 2 loans.

The Company is in compliance with the June 30, 2016 collateral requirements as outlined above. As of June 30, 2016, reserve requirements for the DUS loan portfolio will require the Company to fund \$45.9 million in additional restricted liquidity over the next 48 months, assuming no further principal paydowns, prepayments, or defaults within the at risk portfolio. Fannie Mae periodically reassesses the DUS Capital Standards and may make changes to these standards in the future. The Company generates sufficient cash flow from its operations to meet these capital standards and does not expect any future changes to have a material impact on its future operations; however, any future changes to collateral requirements may adversely impact the Company's available cash.

Fannie Mae has established benchmark standards for capital adequacy, and reserves the right to terminate the Company's servicing authority for all or some of the portfolio if at any time it determines that the Company's financial condition is not adequate to support its obligations under the DUS agreement. The Company is required to maintain acceptable net worth as defined in the agreement, and the Company satisfied the requirements as of June 30, 2016. The net worth requirement is derived primarily from unpaid balances on Fannie Mae loans and the level of risk sharing. At June 30, 2016, the net worth requirement was \$115.5 million, and the Company's net worth was \$531.4 million, as measured at our wholly owned operating subsidiary, Walker & Dunlop, LLC. As of June 30, 2016, the Company was required to maintain at least \$21.2 million of liquid assets to meet operational liquidity requirements for Fannie Mae, Freddie Mac, HUD, and Ginnie Mae. As of June 30, 2016, the Company had operational liquidity of \$107.9 million, as measured at our wholly owned operating subsidiary, Walker & Dunlop, LLC.

Table of Contents

Other Commitments—Under certain limited circumstances, the Company may make preferred equity investments in entities controlled by certain of its borrowers that will assist those borrowers to acquire and reposition properties. The terms of such investments are negotiated with each investment. As of June 30, 2016, the Company has made commitments to fund such preferred equity investments in monthly installments totaling \$42.8 million, \$6.4 million of which has been funded. The Company expects to fund the unfunded commitment amounts over the next 12 to 24 months.

Litigation—In the ordinary course of business, the Company may be party to various claims and litigation, none of which the Company believes is material. The Company cannot predict the outcome of any pending litigation and may be subject to consequences that could include fines, penalties, and other costs, and the Company's reputation and business may be impacted. The Company believes that any liability that could be imposed on the Company in connection with the disposition of any pending lawsuits would not have a material adverse effect on its business, results of operations, liquidity or financial condition.

## NOTE 10—EARNINGS PER SHARE

The following weighted average shares and share equivalents are used to calculate basic and diluted earnings per share for the three and six months ended June 30, 2016 and 2015:

(in thousands)	For the three months ended		For the six months ended	
	June 30, 2016	2015	June 30, 2016	2015
Weighted average number of shares outstanding used to calculate basic earnings per share	29,388	29,057	29,438	30,279
Dilutive securities				
Unvested restricted shares	963	968	1,002	913
Stock options	276	214	274	152
Weighted average number of shares and share equivalents outstanding used to calculate diluted earnings per share	30,627	30,239	30,714	31,344

The assumed proceeds used for calculating the dilutive impact of restricted stock awards under the treasury method includes the unrecognized compensation costs associated with the awards. The following table presents any average outstanding options to purchase shares of common stock and average restricted shares that were not included in the computation of diluted earnings per share because the effect would have been anti-dilutive (the exercise price of the options or the grant date market price of the restricted shares was greater than the average market price of the Company's shares during the periods presented).

For the three months ended	For the six months ended

## NOTE 11—TOTAL EQUITY

A summary of changes in total equity is presented below:

(in thousands)	Stockholders' Equity					Noncontrolling Interests	Total Equity
	Common Shares	Stock Amount	Additional Paid-In Capital	Retained Earnings			
Balance at December 31, 2015	29,466	\$ 295	\$ 215,575	\$ 272,030	\$ 4,449	\$ 492,349	
Cumulative effect from change in accounting for stock compensation	—	—	135	(120)	—	15	
Walker & Dunlop net income	—	—	—	47,479	—	47,479	
Net income (loss) from noncontrolling interests	—	—	—	—	(35)	(35)	
Stock-based compensation	—	—	7,073	—	—	7,073	
Issuance of common stock in connection with equity compensation plans	415	4	3,287	—	—	3,291	
Repurchase and retirement of common stock	(525)	(5)	(7,198)	(4,776)	—	(11,979)	
Other	—	—	(54)	—	(5)	(59)	
Balance at June 30, 2016	29,356	\$ 294	\$ 218,818	\$ 314,613	\$ 4,409	\$ 538,134	

During the six months ended June 30, 2016, the Company repurchased 0.4 million shares of its common stock under a previously announced share repurchase program at a weighted average price of \$23.11 per share and immediately retired the shares, reducing stockholders' equity by \$9.2 million. The Company had \$65.8 million of authorized share repurchase capacity remaining as of June 30, 2016.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion should be read in conjunction with the historical financial statements and the related notes thereto included elsewhere in this Quarterly Report on Form 10-Q. The following discussion contains, in addition to historical information, forward-looking statements that include risks and uncertainties. Our actual results may differ materially from those expressed or contemplated in those forward looking statements as a result of certain factors, including those set forth under the headings "Forward-Looking Statements" and "Risk Factors" elsewhere in this Quarterly Report on Form 10-Q and in the 2015 Form 10-K.

Forward-Looking Statements

Some of the statements in this Quarterly Report on Form 10-Q of Walker & Dunlop, Inc. and subsidiaries (the "Company," "Walker & Dunlop," "we," "us"), may constitute forward-looking statements within the meaning of the federal securities laws. Forward-looking statements relate to expectations, projections, plans and strategies, anticipated events or trends and similar expressions concerning matters that are not historical facts. In some cases, you can identify forward-looking statements by the use of forward-looking terminology such as "may," "will," "should," "expects," "intends," "plans," "anticipates," "believes," "estimates," "predicts," or "potential" or the negative of these words and phrases or similar words or phrases which are predictions of or indicate future events or trends and which do not relate solely to historical matters. You can also identify forward-looking statements by discussions of strategy, plans, or intentions.

The forward-looking statements contained in this Quarterly Report on Form 10-Q reflect our current views about future events and are subject to numerous known and unknown risks, uncertainties, assumptions and changes in circumstances that may cause actual results to differ significantly from those expressed or contemplated in any forward-looking statement. Statements regarding the following subjects, among others, may be forward-looking:

- the future of the Federal National Mortgage Association ("Fannie Mae") and the Federal Home Loan Mortgage Corporation ("Freddie Mac," and together with Fannie Mae, the "GSEs"), including their origination capacities, and their impact on our business;
- changes to the interest rate environment and its impact on our business;
- our growth strategy;
- our projected financial condition, liquidity and results of operations;
- our ability to obtain and maintain warehouse and other loan funding arrangements;
- availability of and our ability to attract and retain qualified personnel and our ability to develop and retain relationships with borrowers, key principals and lenders;
- degree and nature of our competition;
- trends in the commercial real estate finance market, interest rates, commercial real estate values, the credit and capital markets, or the general economy;
- changes in governmental regulations and policies, tax laws and rates, and similar matters and the impact of such regulations, policies, and actions;
- our ability to comply with the laws, rules, and regulations applicable to us;
- general volatility of the capital markets and the market price of our common stock;
- our commitment to make preferred equity investments as part of our overall growth strategy; and
- other risks and uncertainties associated with our business described in the 2015 Form 10-K and our subsequent Quarterly Reports on Form 10-Q and Current Reports on Form 8-K filed with the Securities and Exchange Commission.

While forward-looking statements reflect our good faith projections, assumptions, and expectations, they are not guarantees of future results. Furthermore, we disclaim any obligation to publicly update or revise any forward-looking statement to reflect changes in underlying assumptions or factors, new information, data or methods, future events or other changes, except as required by applicable law. For a further discussion of these and other factors that could

cause future results to differ materially from those expressed or contemplated in any forward-looking statements, see “Risk Factors.”

## Business

We are one of the leading commercial real estate finance companies in the United States, with a primary focus on multifamily lending. We originate, sell, and service a range of multifamily and other commercial real estate financing products and provide multifamily investment sales brokerage services. Our clients are owners and developers of commercial real estate across the country. We originate and sell

## Table of Contents

loans through the programs of the GSEs and HUD, with which we have long-established relationships. We retain servicing rights and asset management responsibilities on substantially all loans that we originate for GSE and HUD programs. We are approved as a Fannie Mae Delegated Underwriting and Servicing ("DUS"™) lender nationally, a Freddie Mac Program Plus™ lender in 23 states and the District of Columbia, a HUD Multifamily Accelerated Processing ("MAP") lender nationally, a HUD LEAN lender nationally, and a Ginnie Mae issuer. We also broker loans for a number of life insurance companies, commercial banks, and other institutional investors, in which cases we do not fund the loan but rather act as a loan broker. We service some of the loans for which we act as a loan broker.

We fund loans for the GSE and HUD programs, generally through warehouse facility financings, and sell them to investors in accordance with the related loan sale commitment, which we obtain prior to rate lock. Proceeds from the sale of the loan are used to pay off the warehouse facility. The sale of the loan is typically completed within 60 days after the loan is closed.

We recognize gains from mortgage banking activities when we commit to both make a loan to a borrower and sell that loan to an investor. The gains from mortgage banking activities reflect the fair value attributable to loan origination fees, premiums on the sale of loans, net of any co-broker fees, and the fair value of the expected net cash flows associated with servicing the loans, net of any guaranty obligations retained. We also generate revenue from (i) net warehouse interest income we earn while the loan is held for sale through one of our warehouse facilities, (ii) net warehouse interest income from loans held for investment while they are outstanding, and (iii) sales commissions for brokering the sale of multifamily properties.

We retain servicing rights on substantially all of the loans we originate and sell and generate revenues from the fees we receive for servicing the loans, from the interest income on escrow deposits held on behalf of borrowers, and from other ancillary fees. Servicing fees set at the time an investor agrees to purchase the loan are generally paid monthly for the duration of the loan, and are based on the unpaid principal balance of the loan. Our Fannie Mae and Freddie Mac servicing arrangements generally provide for prepayment fees to us in the event of a voluntary prepayment. For loans serviced outside of Fannie Mae and Freddie Mac, we typically do not share in any such payments.

We are currently not exposed to unhedged interest rate risk during the loan commitment, closing, and delivery process for our GSE and HUD activities. The sale or placement of each loan to an investor is negotiated prior to establishing the coupon rate for the loan. We also seek to mitigate the risk of a loan not closing. We have agreements in place with the GSEs and HUD that specify the cost of a failed loan delivery, also known as a pair off fee, in the event we fail to deliver the loan to the investor. To protect us against such pair off fees, we require a deposit from the borrower at rate lock that is typically more than the potential pair off fee. The deposit is returned to the borrower only once the loan is closed. Any potential loss from a catastrophic change in the property condition while the loan is held for sale using warehouse facility financing is mitigated through property insurance equal to replacement cost. We are also protected contractually from an investor's failure to purchase the loan. We have experienced an immaterial number of failed deliveries in our history and have incurred immaterial losses on such failed deliveries.

In cases where we do not fund the loan, we act as a loan broker and retain the right to service some of the loans. Our originators who focus on loan brokerage are engaged by borrowers to work with a variety of institutional lenders to find the most appropriate loan instrument for the borrowers' needs. These loans are then funded directly by the institutional lender, and we receive an origination fee for placing the loan, and for those brokered loans we service, we collect ongoing servicing fees while those loans remain in our servicing portfolio. The servicing fees we typically earn on brokered loan transactions are substantially lower than the servicing fees we earn for servicing GSE and HUD loans.

We have risk-sharing obligations on substantially all loans we originate under the Fannie Mae DUS program. When a Fannie Mae DUS loan is subject to full risk-sharing, we absorb losses on the first 5% of the unpaid principal balance

of a loan at the time of loss settlement, and above 5% we share a percentage of the loss with Fannie Mae, with our maximum loss capped at 20% of the original unpaid principal balance of the loan (subject to doubling or tripling if the loan does not meet specific underwriting criteria or if the loan defaults within 12 months of its sale to Fannie Mae). We may, however, request modified risk-sharing at the time of origination, which reduces our potential risk-sharing losses from the levels described above. We occasionally request modified risk-sharing based on the size of the loan. We may also request modified risk-sharing on large transactions if we do not believe that we are being fully compensated for the risks of the transactions or to manage overall risk levels. Our current credit management policy is to cap each loan balance subject to full risk-sharing at \$60.0 million. Accordingly, we generally elect to use modified risk-sharing for loans of more than \$60.0 million in order to limit our maximum loss exposure on any one loan to \$12.0 million (such exposure would occur in the event that the underlying collateral is determined to be completely without value at the time of loss). However, we may on occasion elect to originate a loan with full risk sharing even when the loan balance is greater than \$60.0 million if we believe the loan characteristics support such an approach.

## Table of Contents

Our servicing fees for risk-sharing loans include compensation for the risk-sharing obligations and are larger than the servicing fees we would receive from Fannie Mae for loans with no risk-sharing obligations. We receive a lower servicing fee for modified risk-sharing than for full risk-sharing.

We have an interim loan program offering floating-rate, interest-only loans for terms of up to three years to experienced borrowers seeking to acquire or reposition multifamily properties that do not currently qualify for permanent financing (the “Interim Program”). We underwrite all loans originated through the Interim Program and assume the full risk of loss on the loans while they are outstanding. In addition, we service and asset-manage loans originated through the Interim Program, with the ultimate goal of providing permanent financing on the properties.

We offer commercial mortgage backed securities (“CMBS”) executions through our own proprietary CMBS platform for all commercial property types throughout the United States (the “CMBS Program”). Prior to 2016, the CMBS Program was managed through a partnership with another entity in which we owned less than 50%. At the beginning of the first quarter of 2016, the other partner exited the CMBS Program, and we assumed full ownership of the CMBS Program and now consolidate the CMBS Program in our financial statements. We underwrite all loans originated through the CMBS Program and finance these loans on our balance sheet, using a combination of our own cash and warehouse financing facilities, until they are sold to third-party securitization conduits. Loans originated through the CMBS Program are generally sold into secondary securitization conduits within 120 days of origination. We assume full risk of loss on the loans originated under the CMBS Program while we hold the loans for sale but do not retain any credit risk once the loans are sold. For loans originated for our CMBS Program, we are exposed to the risk of changes in interest rates and credit spreads between the periods when we close the loan and sell the loan. We attempt to mitigate these risks through a variety of hedging strategies, including using interest rate swaps and, on occasion, credit default swaps.

Under certain limited circumstances, we may make preferred equity investments in entities controlled by certain of our borrowers that will assist those borrowers to acquire and reposition properties. The terms of such investments are negotiated with each investment. As of June 30, 2016, we have made commitments to fund such preferred equity investments in monthly installments totaling \$42.8 million, \$6.4 million of which has been funded. We expect to fund the unfunded commitment amounts over the next 12 to 24 months.

During the second quarter of 2015, in connection with an acquisition, our subsidiary, Walker & Dunlop Investment Sales, LLC (“WDIS”), began offering investment sales brokerage services to owners and developers of multifamily properties that are seeking to sell these properties. We seek to maximize proceeds and certainty of closure for our clients through our knowledge of the commercial real estate and capital markets and our experienced transaction professionals. Our services are offered primarily in the eastern United States, with a particular focus in the Southeast and Mid-Atlantic. We will seek to add other investment sales brokerage talent with the goal of expanding these brokerage services nationally. We consolidate the activities of WDIS and present the portion of WDIS that we do not control as Noncontrolling interests in the Condensed Consolidated Balance Sheets and Net income from noncontrolling interests in the Condensed Consolidated Statements of Income.

On June 20, 2016, we purchased the rights to service a HUD loan portfolio with an aggregate \$3.8 billion unpaid principal balance from a third-party servicer for \$44.8 million (the “Servicing Portfolio Acquisition”). The acquisition of the servicing portfolio substantially increases our HUD servicing portfolio and is expected to make us the largest

servicer of HUD commercial real estate loans. We expect the Servicing Portfolio Acquisition to have the following benefits:

- reduce the average cost to service each loan as we leverage our existing servicing platform,
- provide new borrower relationships,
- provide opportunities for additional loan origination volume when these loans mature or prepay, and
- produce a stable stream of cash revenues over the 10.8-year estimated life of the portfolio.

Basis of Presentation

The accompanying condensed consolidated financial statements include all of the accounts of the Company and its wholly owned subsidiaries, and all intercompany transactions have been eliminated.

#### Critical Accounting Policies

Our condensed consolidated financial statements have been prepared in accordance with U.S. generally accepted accounting principles (“GAAP”), which require management to make estimates and assumptions that affect reported amounts. The estimates and assumptions are

Table of Contents

based on historical experience and other factors management believes to be reasonable. Actual results may differ from those estimates and assumptions. We believe the following critical accounting policies represent the areas where more significant judgments and estimates are used in the preparation of our condensed consolidated financial statements.

**Mortgage Servicing Rights (“MSRs”).** MSRs are recorded at fair value at loan sale or upon purchase. The fair value of MSRs acquired through a stand-alone servicing portfolio purchase is equal to the purchase price paid. The fair value upon loan sale is based on estimates of expected net cash flows associated with the servicing rights and takes into consideration an estimate of loan prepayment. The estimated net cash flows are discounted at a rate that reflects the credit and liquidity risk of the MSR over the estimated life of the underlying loan. The discount rates used throughout the periods presented for all MSRs recognized upon loan sale were between 10-15% and varied based on the loan type. The life of the underlying loan is estimated giving consideration to the prepayment provisions in the loan. Our model generally assumes full prepayment of the loan at or near the point where the prepayment provisions have expired.

The assumptions used to estimate the fair value of MSRs at loan sale are based on internal models and are compared to assumptions used by other market participants periodically. Due to the relatively few transactions in the multifamily MSR market, we have experienced little volatility in the assumptions we use during the periods presented, including the most-significant assumption – the discount rate. Additionally, we do not expect to see much volatility in the assumptions for the foreseeable future. Management actively monitors the assumptions used and makes adjustments to those assumptions when market conditions change or other factors indicate such adjustments are warranted. We carry MSRs at the lower of amortized cost or fair value and evaluate the carrying value for impairment on a portfolio basis quarterly. We engage a third party to assist in determining an estimated fair value of our MSR portfolio on a semi-annual basis.

Gains from mortgage banking activities income is recognized when we record a derivative asset upon the simultaneous commitments to originate a loan with a borrower and sell the loan to an investor. The commitment asset related to the loan origination is recognized at fair value, which reflects the fair value of the contractual loan origination related fees and sale premiums, net of any co-broker fees, and the estimated fair value of the expected net cash flows associated with the servicing of the loan, net of the estimated net future cash flows associated with any risk-sharing obligations (the “servicing component of the commitment asset”). Upon loan sale, we derecognize the servicing component of the commitment asset and recognize an MSR. MSRs are amortized into expense over the estimated life of the loan and presented as a component of Amortization and depreciation in the Condensed Consolidated Statements of Income. The MSR is amortized using the interest method over the period that servicing income is expected to be received.

**Allowance for Risk-sharing Obligations and Allowance for Loan Losses.** The allowance for risk-sharing obligations relates to our at risk servicing portfolio and is presented as a separate liability within the Condensed Consolidated Balance Sheets. The allowance for loan losses relates to our loans held for investment from our Interim Program and is presented as a reduction of Loans held for investment, net within the Condensed Consolidated Balance Sheets. The amount of each of these allowances considers our assessment of the likelihood of repayment by the borrower or key principal(s), the risk characteristics of the loan, the loan’s risk rating, historical loss experience, adverse situations affecting individual loans, the estimated disposition value of the underlying collateral, and the level of risk sharing, which for loans held for investment is 100%. Historically, initial loss recognition occurs at or before a loan becomes 60 days delinquent. We regularly monitor each allowance on all applicable loans and update loss estimates as current information is received. Provision (benefit) for credit losses in the Condensed Consolidated Statements of Income reflects the income statement impact of changes to both the allowance for risk-sharing obligations and allowance for loan losses.

We perform a quarterly evaluation of all of our risk-sharing loans to determine whether a loss is probable. Our process for identifying which risk-sharing loans may be probable of loss consists of an assessment of several qualitative and quantitative factors including payment status, property financial performance, local real estate market conditions, loan-to-value ratio, debt-service-coverage ratio, and property condition. When we believe a loan is probable of foreclosure or when the loan is in foreclosure, we record an allowance for that loan (a “specific reserve”). The specific reserve is based on the estimate of the property fair value less selling and property preservation costs and considers the loss-sharing requirements detailed below in the “Credit Quality and Allowance for Risk-Sharing Obligations” section. The estimate of property fair value at initial recognition of the allowance for risk-sharing obligations is based on broker opinions of value, appraisals, or net operating income and market capitalization rates, whichever we believe is the best estimate of the net disposition value. The allowance for risk-sharing obligations for such loans is updated as any additional information is received until the loss is settled with Fannie Mae. The settlement with Fannie Mae is based on the actual sales price of the property and selling and property preservation costs and considers the Fannie Mae loss-sharing requirements. Historically, the initial specific reserves have not varied significantly from the final settlement. We cannot predict whether such a trend will continue in the future.

## Table of Contents

In addition to the specific reserves discussed above, we also record an allowance for risk-sharing obligations related to risk-sharing loans on our watch list (“general reserves”). Such loans are not probable of foreclosure but are probable of loss as the characteristics of these loans indicate that it is probable that these loans include some losses even though the loss cannot be attributed to a specific loan. For all other risk-sharing loans not on our watch list, we continue to carry a guaranty obligation. We calculate the general reserves based on a migration analysis of the loans on our historical watch lists, adjusted for qualitative factors. When we place a risk-sharing loan on our watch list, we cease to amortize the guaranty obligation and transfer the remaining unamortized balance of the guaranty obligation to the general reserves, a component of the allowance for risk-sharing obligations. If a risk-sharing loan is subsequently removed from our watch list due to improved financial performance, we transfer the unamortized balance of the guaranty obligation back to the guaranty obligation classification on the balance sheet and amortize the remaining unamortized balance evenly over the remaining estimated life. For each loan for which we have a risk-sharing obligation, we record one of the following liabilities associated with that loan as discussed above: guaranty obligation, general reserve, or specific reserve. Although the liability type may change over the life of the loan, at any particular point in time, only one such liability is associated with a loan for which we have a risk-sharing obligation.

We evaluate all of our loans held for investment for impairment quarterly. Our impairment evaluation focuses primarily on payment status and property financial performance. We consider a loan impaired when the current facts and circumstances suggest it is not probable that we will collect all contractually due principal and interest payments. When a loan is not considered impaired, we apply a collective allowance that is based on recent historical loss probability and historical loss rates incurred in our risk-sharing portfolio, adjusted as needed for current market conditions (“loss factors”). We use the loss experience from our risk-sharing portfolio as a proxy for losses incurred in our loans held for investment portfolio since (i) we have not experienced any actual losses related to our loans held for investment to date and (ii) the loans in the loans-held-for-investment portfolio have similar characteristics to loans held in the risk-sharing portfolio. Since the inception of the Interim Program, we have not had any delinquent or impaired loans or charged off any loans. The historical loss factors are updated quarterly. We have not experienced significant change in the loss factors during the periods presented in the financial statements. These loss factors may change in the future as economic and market conditions change and as the Interim Program matures and expands.

## Overview of Current Business Environment

The fundamentals of the commercial and multifamily real estate market remain strong. Multifamily occupancy rates and effective rents continue to increase based upon strengthening rental market demand while delinquency rates remain at historic lows, all of which aid loan performance due to their importance to the cash flows of the underlying properties. Most other commercial real estate asset classes have experienced similar performance in underlying fundamentals. The positive performance has boosted the value of many commercial and multifamily properties towards the high end of historical ranges.

In addition to the improved property fundamentals, for the last several years, the U.S. commercial and multifamily mortgage market has experienced historically low interest rates, leading many borrowers to seek refinancing prior to the scheduled maturity date of their loans. As borrowers have sought to take advantage of the interest rate environment and improved property fundamentals, the number of lenders and amount of capital available to lend have increased dramatically. According to the Mortgage Bankers Association, commercial and multifamily loan maturities were expected to increase dramatically through the end of 2017, as the loans originated at the height of the CMBS market begin maturing a decade later. All of these factors have benefited our origination volumes over the past several quarters. Competition among banks, life insurance companies, and the GSEs remains fierce.

During the fourth quarter of 2015, the Federal Reserve raised its targeted Fed Funds Rate by 25 basis points. The increase was long anticipated by market participants. We have not experienced a significant decline in origination volume or profitability as a result of the increase as long-term mortgage interest rates have remained at historically low levels in spite of the increase. However, we cannot be certain that such a trend will continue as the number, timing, and magnitude of any future increases by the Federal Reserve, combined with other macroeconomic factors, may have a different effect on the commercial real estate market.

Late in the second quarter of 2016, citizens of the United Kingdom (“U.K.”) voted to exit the European Union (“E.U.”), commonly referred to as “Brexit.” The referendum itself will not result in the U.K.’s immediate exodus from the E.U. since the vote is not legally binding on the British government. Rather, Parliament, having heard the voice of voters, must now enact laws to facilitate the U.K.’s departure and must notify the European Commission of its intention to leave the E.U. After such notice is provided, the U.K. and European Commission will have a two-year window in which to establish the terms of the U.K.’s departure. Even though the actual formal separation from the E.U. will take several years, Brexit created a significant amount of uncertainty in both the global and domestic financial markets as participants evaluated the impact Brexit would have on the global and domestic economies.

Table of Contents

U.S. financial markets have rebounded from the significant immediate negative reaction to Brexit. However, the “risk-off trade” many participants enacted as an immediate reaction to the uncertainty has continued into the third quarter of 2016, pushing the yield on the benchmark 10-year U.S. Treasury bond and mortgage interest rates to all-time or near all-time lows. The uncertainty and risk aversion in the near term seem likely to persist, with long-term trends uncertain.

Brexit has had minimal impact on our operations and financial results as we have no direct exposure to the U.K. or E.U. Additionally, we believe the indirect impact of Brexit will likely benefit us as borrowers take advantage of low mortgage interest rates and as a “flight to safety” results in an increase of global capital investments in U.S. markets, including commercial real estate, resulting in higher loan origination and investment sales activity. Some of these benefits may be mitigated by higher credit risk spreads demanded by investors in commercial real estate loans. We believe these indirect impacts will continue in the near term but are uncertain about the long-term duration.

We are a market-leading originator with Fannie Mae and Freddie Mac, and the GSEs remain the most significant providers of capital to the multifamily market. The Federal Housing Finance Agency (“FHFA”) 2016 GSE Scorecard (“2016 Scorecard”) established Fannie Mae’s and Freddie Mac’s loan origination caps at \$31.0 billion each for market-rate apartments (“2016 Caps”), an increase of \$1.0 billion each from the 2015 loan origination caps. Affordable housing loans, loans to small multifamily properties, and manufactured housing rental community loans continue to be excluded from the 2016 Caps. Additionally, the definition of the affordable loan exclusion continues to encompass affordable housing in high- and very-high cost markets and to allow for an exclusion from the 2016 Caps for the pro-rata portion of any loan on a multifamily property that includes affordable units. The 2016 Scorecard provides the FHFA the flexibility to review the estimated size of the multifamily loan origination market on a quarterly basis and proactively adjust the 2016 Caps upward should the market be larger than expected in 2016. In early May 2016, the FHFA increased the 2016 Caps to \$35.0 billion for each of the GSEs. The 2016 Scorecard also provides exclusions for loans to properties located in underserved markets including rural, small multifamily, and senior assisted living and for loans to finance energy or water efficiency improvements.

Our GSE loan origination volumes for the first half of 2016 decreased 13% from the first half of 2015 as a result of relatively low loan origination volume during the first quarter of 2016 compared to the first quarter of 2015. The GSEs are expected to maintain their historical market share in a multifamily market that is projected by the Mortgage Bankers Association to be in excess of \$225.0 billion in 2016. The GSEs reported a combined loan origination volume of \$49.7 billion for the first half of 2016. Although our loan origination volumes for the first half of 2016 were down compared to the first half of 2015, we believe our market leadership with the GSEs positions us to be a significant lender with the GSEs for the remainder of 2016. Our originations with the GSEs are some of our most profitable executions as they provide significant non-cash gains from mortgage servicing rights. A decline in our GSE originations would negatively impact our financial results as our non-cash revenues would decrease disproportionately with loan origination volume and future servicing fee revenue would be constrained or decline. We do not know whether the FHFA will impose stricter limitations on GSE multifamily production volume beyond 2016.

We continue to grow our capital markets platform to take advantage of the ongoing wave of loan maturities that began in 2015 and to gain greater access to capital, deal flow, and borrower relationships. The commercial debt origination

market grew substantially from 2014 to 2015. The apparent appetite for debt funding within the broader commercial real estate market, coupled with our acquisition of Johnson Capital Group, Inc. in late 2014, has resulted in significant growth in our brokered originations over the past several years, as evidenced by the 51% year-over-year growth in brokered origination volumes from 2014 to 2015. That growth carried over into 2016 as our brokered loan originations increased 10% from the first half of 2015 to the first half of 2016. With non-bank commercial and multifamily loan maturities expected to grow again in 2016, our outlook for our capital markets platform is positive.

In addition to banks and life insurance companies, there has been a recent increase in CMBS financing for loans to commercial and multifamily properties. The peak of the CMBS market was between 2005 and 2007, and after its collapse in 2008, CMBS originations were close to zero. However, in recent years, the demand for commercial and multifamily bonds increased, resulting in increased competition for us from the CMBS mortgage origination market. According to Wells Fargo Securities, non-agency CMBS issuance totaled \$94.6 billion in 2015, up 6.3% from 2014 as the first wave of CMBS refinancing began. The increased demand at that time for CMBS bonds backed by commercial and multifamily mortgages and the expected wave of refinancing activity this year and over the next two years led us to the development of our proprietary CMBS Program in 2014. During 2015, the CMBS Program originated \$309.5 million of loans and participated in three third-party securitizations, contributing \$279.8 million of assets to the securitizations. During the first half of 2016, the CMBS Program originated \$94.0 million of loans compared to \$160.1 million during the first half of 2015. Volatility in the capital markets resulted in spreads widening and lower demand for CMBS investments in the fourth quarter of 2015 and into the first half of 2016, leading to our lower loan origination volume in the first half of 2016 compared to the first half of 2015. The volatility experienced throughout much of the

Table of Contents

first half of 2016 as a result of uncertain global market conditions, including Brexit, has reduced the demand for CMBS investments and resulted in lowered industry forecasts for the CMBS mortgage origination market in the second half of 2016.

The positive market dynamics that have benefitted the GSEs and broader capital markets have had the opposite effect on HUD's multifamily business. As the economy has recovered and bank and CMBS capital has re-entered the market, borrowers have shied away from the long lead times required to secure a HUD loan. As a result, we originated \$592.0 million of loans with HUD during 2015, down 16% from 2014. This decrease in our HUD lending continued into the first half of 2016 as our HUD loan origination volumes decreased 23% from the first half of 2015. HUD has taken steps to improve the cost of obtaining a loan, making HUD loans more competitive. Additionally, HUD has undergone reorganization efforts over the past 18 months that may improve the speed and efficiency of the process and help return HUD loans to relevance for our core multifamily borrowers. HUD remains a strong source of capital for new construction loans and healthcare. We expect that HUD will continue to be a meaningful supplier of capital to our borrowers in counter-cyclical markets. We remain committed to the HUD multifamily business, adding resources and scale to the platform, particularly in the area of seniors housing and skilled nursing, where HUD remains a dominant provider of capital in the current business environment.

Many of our borrowers continue to seek higher returns by identifying and acquiring the transitional properties that the Interim Program is designed to address. The growth in transitional lending was evident in 2015, as the average balance of our interim loan portfolio was \$281.6 million compared to \$188.6 million in 2014. We originated \$158.6 million of interim loans during the first half of 2016 compared to \$114.9 million during the first half of 2015 and remain optimistic about this market for the foreseeable future. The demand for transitional lending has brought increased competition from lenders, specifically banks and life insurance companies. All are actively pursuing transitional properties by leveraging their low cost of capital and desire for short-term, high-yield commercial real estate investments.

Finally, in the second quarter of 2015, we expanded our offerings to our customers by acquiring a controlling interest in a partnership that offers multifamily investment sales brokerage services. The partnership operates primarily in the eastern United States. As we have stated, multifamily property values are at near historic highs on the back of positive fundamentals across the industry. As a result, we have recently seen increased activity within the investment sales business. We believe this activity will continue throughout the wave of loan maturities, and we will look to capitalize on that demand by expanding the investment sales partnership more broadly across the United States in the coming quarters. During the first half of 2016, our investment sales partnership closed \$780.9 million of investment sales transactions compared to \$319.0 million for the two months that we owned the partnership during the first half of 2015.

## Results of Operations

Following is a discussion of our results of operations for the three and six months ended June 30, 2016 and 2015. The financial results are not necessarily indicative of future results. Our quarterly results have fluctuated in the past and are expected to fluctuate in the future, reflecting the interest-rate environment, the volume of transactions, business acquisitions, regulatory actions, and general economic conditions. Please refer to the table below, which provides supplemental data regarding our financial performance.

## Overview

For the three months ended June 30, 2016, the increase in revenues was primarily attributable to increases in gains from mortgage banking activities and servicing fees. The increase in gains from mortgage banking activities was principally due to a 72% increase in the fair value of the expected net cash flows associated with the servicing of the loan, net of any guaranty obligations retained (“MSR income”) period over period. The increase in MSR income was largely attributable to a 37% increase in loan origination volume. The increase in servicing fees was due to an increase in the average servicing portfolio. The increase in expenses was primarily the result of increased commission costs due to increased loan origination volume, salaries expense due to a rise in headcount, and bonus expense due to our better financial performance year over year. Headcount increased due to acquisition activity and hiring to support the growth of our business. Additionally, amortization and depreciation expense increased as the average MSR balance increased period over period.

For the six months ended June 30, 2016, the increase in revenues was primarily attributable to increases in gains from mortgage banking activities and servicing fees. The increase in gains from mortgage banking activities was principally due to a 25% increase in MSR income period over period, partially offset by a 12% decrease in origination fee income. The increase in MSR income was largely attributable to an increase in Fannie Mae loan origination volume, while the decrease in origination fee income is largely attributed to a decrease in overall loan origination volume. The

increase in servicing fees was due to an increase in the average servicing portfolio. The increase in expenses was primarily the result of increased salaries expense due to a rise in headcount and increased amortization and depreciation expense due to an increase in the average MSR balance period over period. Headcount increased due to acquisition activity and hiring to support the growth of our business.

#### Revenues

**Gains from Mortgage Banking Activities.** Gains from mortgage banking activities reflect the fair value of loan origination fees, the fair value of loan premiums, net of any co-broker fees, CMBS Program activities, and MSR income. For the three months ended June 30, 2016, the increase was primarily attributable to an increase in loan origination volume and an increase in MSR income as a percentage of loan origination volume (“MSR rate”), partially offset by a decrease in origination fees as a percentage of loan origination volume (“origination fee rate”). Loan origination volume increased to \$4.8 billion in 2016 from \$3.5 billion in 2015, a 37% increase. The MSR rate increased 26%, and the origination fee rate decreased 9%. The increase in the MSR rate was largely attributable to a 111% increase in Fannie Mae loan origination volume. Fannie Mae loan originations generate one of the highest levels of MSR income of all our product types. The

## Table of Contents

decrease in the origination fee rate was principally related to a change in the mix of loan origination volume period to period as HUD loan origination volume as a percentage of total loan origination volume for the three months ended June 30, 2016 was less than for the comparable period in 2015. We typically receive higher origination fees on HUD loans than any other loan product type.

For the six months ended June 30, 2016, the increase was primarily attributable to an increase in Fannie Mae loan origination volume, partially offset by a decrease in overall loan origination volume. Fannie Mae loan origination volume increased 26% year over year, leading to a 25% increase in MSR income. Fannie Mae loan originations generate one of the highest levels of MSR income of all our product types. Overall loan origination volume decreased to \$7.2 billion in 2016 from \$7.8 billion in 2015, an 8% decrease.

**Servicing Fees.** The increases were primarily attributable to increases in the servicing portfolio due to new loan originations. The average servicing portfolio during the three months ended June 30, 2016 was \$52.8 billion compared to \$47.2 billion during the three months ended June 30, 2015. For the six months ended June 30, 2016, the average servicing portfolio was \$51.8 billion compared to \$46.1 billion for the six months ended June 30, 2015. Additionally, the weighted average serving fee rate of the portfolio increased slightly from June 30, 2015 to June 30, 2016.

**Net Warehouse Interest Income.** The decrease for the three months ended June 30, 2016 was primarily related to a \$2.2 million decrease in net warehouse interest income from loans held for sale. The decrease in net warehouse interest income from loans held for sale was primarily attributable to a 47% decrease in the average daily outstanding balance of loans held for sale from \$1.5 billion during 2015 to \$0.8 billion during 2016. For the six months ended June 30, 2016, the decrease was primarily attributable to a \$1.2 million decrease in the net warehouse interest income from loans held for investment. The average balance of loans held for investment dropped from \$255.4 million during 2015 to \$203.8 million during 2016 due to an increase in payoffs and prepayments period over period.

## Expenses

**Personnel.** For the three months ended June 30, 2016, the increase was primarily due to increased commission costs due to increased loan origination volume, increased bonus expense as a result of our financial performance period over period, and increased salaries expense due to a rise in headcount. Headcount increased largely as a result of the consolidation of the CMBS Program since the second quarter of 2015 and hiring to support the growth of our business.

For the six months ended June 30, 2016, the increase was primarily due to increased salaries expense due to a rise in headcount. Headcount increased largely as a result of the consolidation of the CMBS Program since the second quarter of 2015 and hiring to support the growth of our business. Partially offsetting the increase due to salaries expense was a decrease in commission costs due to lower loan origination volume year over year.

**Amortization and Depreciation.** For both the three and six months ended June 30, 2016, the increases were primarily attributable to loan origination activity and the resulting growth in the capitalization of MSRs period over period. Also included in amortization and depreciation are write-offs of MSRs resulting from the prepayment or default of the underlying loan prior to its scheduled maturity. During the three months ended June 30, 2016, write-offs of MSRs increased \$0.4 million from the prior year to \$3.7 million. During the six months ended June 30, 2016, write-offs of MSRs decreased \$2.4 million from the prior year to \$6.5 million as a result of fewer prepayments.

**Other Operating Expenses.** For the three months ended June 30, 2016, the increase was primarily attributable to the timing of our annual client conference, which was held in the second quarter during 2016 compared to the third quarter during 2015 and an increase in recruiting fees associated with our efforts to hire additional production talent in 2016.

## Edgar Filing: Walker & Dunlop, Inc. - Form 10-Q

For the six months ended June 30, 2016, the increase was primarily attributable to an increase in costs associated with our annual client conference as this conference was held in the third quarter during 2015.

**Income Tax Expense.** For both the three and six months ended June 30, 2016, the increases in income tax expense were primarily due to increases in income from operations, with small offsets coming from excess tax benefits.

### Non-GAAP Financial Measures

To supplement our financial statements presented in accordance with GAAP, we use adjusted EBITDA, a non-GAAP financial measure. The presentation of adjusted EBITDA is not intended to be considered in isolation or as a substitute for, or superior to, the financial

Table of Contents

information prepared and presented in accordance with GAAP. When analyzing our operating performance, readers should use adjusted EBITDA in addition to, and not as an alternative for, net income. Adjusted EBITDA represents net income before income taxes, interest expense on our term loan facility, and amortization and depreciation, adjusted for provision for credit losses net of write-offs, stock-based incentive compensation charges, unrealized gains and losses from the CMBS Program, and non-cash revenues such as gains attributable to MSRs. Because not all companies use identical calculations, our presentation of adjusted EBITDA may not be comparable to similarly titled measures of other companies. Furthermore, adjusted EBITDA is not intended to be a measure of free cash flow for our management's discretionary use, as it does not reflect certain cash requirements such as tax and debt service payments. The amounts shown for adjusted EBITDA may also differ from the amounts calculated under similarly titled definitions in our debt instruments, which are further adjusted to reflect certain other cash and non-cash charges that are used to determine compliance with financial covenants.

We use adjusted EBITDA to evaluate the operating performance of our business, for comparison with forecasts and strategic plans, and for benchmarking performance externally against competitors. We believe that adjusted EBITDA, when read in conjunction with our GAAP financials, provides useful information to investors by offering:

- the ability to make more meaningful period-to-period comparisons of our on-going operating results;
- the ability to better identify trends in our underlying business and perform related trend analyses; and
- a better understanding of how management plans and measures our underlying business.

We believe that adjusted EBITDA has limitations in that it does not reflect all of the amounts associated with our results of operations as determined in accordance with GAAP and that adjusted EBITDA should only be used to evaluate our results of operations in conjunction with net income. Adjusted EBITDA is calculated as follows:

## ADJUSTED FINANCIAL METRIC RECONCILIATION TO GAAP

(in thousands)	For the three months ended		For the six months ended	
	June 30, 2016	2015	June 30, 2016	2015

Net write-offs	—	(808)	808	(100)	%
Other operating expenses	(11,212)	(8,951)	(2,261)	25	%
Adjusted EBITDA	\$ 27,090	\$ 28,856	\$ (1,766)	(6)	%

(dollars in thousands)	For the six months ended		Dollar Change	Percentage Change	
	June 30, 2016	2015			
Origination fees	\$ 68,449	\$ 78,995	\$ (10,546)	(13)	%
Servicing fees	64,420	54,899	9,521	17	%
Net warehouse interest income	10,311	10,964	(653)	(6)	%
Escrow earnings and other interest income	3,595	1,957	1,638	84	%
Other	15,032	15,419	(387)	(3)	%
Personnel	(82,474)	(78,776)	(3,698)	5	%
Net write-offs	—	(808)	808	(100)	%
Other operating expenses	(19,826)	(18,386)	(1,440)	8	%
Adjusted EBITDA	\$ 59,507	\$ 64,264	\$ (4,757)	(7)	%

See the table above for the components of the change in adjusted EBITDA period over period. For the three months ended June 30, 2016, the increase in origination fees was largely related to the increase in the volumes of loans originated period over period. Servicing fees increased due to an increase in the average servicing portfolio period over period as a result of new loan originations. Net warehouse interest income decreased principally due to a decrease in the average outstanding balance of loans held for sale period over period. The increase in personnel expense was primarily due to increased commission costs due to increased loan origination volume, increased bonus expense due to our improved financial performance period over period, and increased salaries expense due to a rise in headcount. Other operating expenses increased primarily due to increases in recruiting fees and costs associated with our annual client conference.

For the six months ended June 30, 2016, the decrease in origination fees was largely related to the decrease in the volume of loans originated period over period. Servicing fees increased due to an increase in the average servicing portfolio period over period as a result of new loan originations. The increase in personnel expense was primarily due to increased salaries expense due to a rise in headcount, partially offset by decreased commission costs due to decreased loan origination volume.

#### Financial Condition

#### Cash Flows from Operating Activities

Our cash flows from operations are generated from loan sales, servicing fees, escrow earnings, net warehouse interest income and other income, net of loan originations and operating costs. Our cash flows from operations are impacted by the fees generated by our loan originations, the timing of loan closings, and the period of time loans are held for sale in the warehouse loan facility, prior to delivery to the investor.

Table of Contents

## Cash Flow from Investing Activities

We usually lease facilities and equipment for our operations. However, when necessary and cost effective, we invest cash in property, plant and equipment. Our cash flows from investing activities also include funding and repayment of loans held for investment. We opportunistically invest cash for acquisitions and MSR purchases.

## Cash Flow from Financing Activities

We use our warehouse loan facilities and, when necessary, our corporate cash to fund loan closings. We believe that our current warehouse loan facilities are adequate to meet our increasing loan origination needs. Historically, we have used a combination of long-term debt and cash flows from operations to fund acquisitions, repurchase shares, and fund a portion of loans held for investment.

We currently do not pay dividends on our common stock and have never paid a dividend.

## Six Months Ended June 30, 2016 Compared to Six Months Ended June 30, 2015

The following table presents a period-to-period comparison of the significant components of cash flows for the six months ended June 30, 2016 and 2015.

## SIGNIFICANT COMPONENTS OF CASH FLOWS

(dollars in thousands)	Six Months Ended June 30,		Dollar	Percentage	
	2016	2015	Change	Change	
Net cash provided by (used in) operating activities	\$ 321,495	\$ 213,889	\$ 107,606	50	%
Net cash provided by (used in) investing activities	(53,931)	(105,732)	51,801	(49)	%
Net cash provided by (used in) financing activities	(343,559)	(153,722)	(189,837)	123	%
Cash and cash equivalents at end of period	60,993	67,789	(6,796)	(10)	%
Cash flows from operating activities					
Net receipt (use) of cash for loan origination activity	\$ 328,079	\$ 177,522	\$ 150,557	85	%
Net cash provided by (used in) operating activities, excluding loan origination activity	(6,584)	36,367	(42,951)	(118)	%
Cash flows from investing activities					
Acquisitions, net of cash received	\$ —	\$ (12,767)	\$ 12,767	(100)	%
Purchase of mortgage servicing rights	(43,374)	—	(43,374)	N/A	
Originations of loans held for investment	\$ (141,842)	\$ (114,945)	\$ (26,897)	23	%
Principal collected on loans held for investment	133,120	22,920	110,200	481	%
Net payoff of (investment in) loans held for investment	\$ (8,722)	\$ (92,025)	\$ 83,303	(91)	%
Cash flows from financing activities					
	\$ (333,615)	\$ (176,469)	\$ (157,146)	89	%

Borrowings (repayments) of warehouse notes payable, net					
Borrowings of interim warehouse notes payable	98,863	88,325	10,538	12	%
Repayments of interim warehouse notes payable	(97,873)	(17,190)	(80,683)	469	%
Repurchase of common stock	(11,979)	(49,681)	37,702	(76)	%

Changes in cash flows from operations were driven primarily by loans acquired and sold. Such loans are held for short periods of time, generally less than 60 days, and impact cash flows presented as of a point in time. The increase in cash flows from operations for the six months ended June 30, 2016 is primarily attributable to the net receipt of \$328.1 million for the funding of loan originations, net of sales of loans to third parties during the six months ended June 30, 2016 compared to the net receipt of \$177.5 million for the funding of loan originations, net of sales to third parties during the six months ended June 30, 2015. Excluding cash used for the origination and sale of loans, cash flows used in operations was \$6.6 million during 2016 compared to net cash provided of \$36.4 million during 2015. The significant components of the change included a greater reduction to net income related to gains attributable to future servicing rights of \$15.8 million for the six months ended June 30, 2016 compared to the six months ended June 30, 2015, a greater reduction to net income related to the change in the fair value of premiums and origination fees of \$9.9 million, and a \$22.0 million increase in cash used to fund pledged

## Table of Contents

securities and restricted cash, partially offset by an increase of \$5.8 million in net income before noncontrolling interests.

The reduction in cash provided by (used in) investing activities is primarily attributable to a reduction in the net investment in loans held for investment and in net cash used for acquisitions, partially offset by an increase in the cash used for the purchase of mortgage servicing rights. Net investment in loans held for investment during the six months ended June 30, 2016 was \$8.7 million compared to net investment of \$92.0 million during the six months ended June 30, 2015. Of the \$8.7 million of the net investment in loans held for investment during 2016, \$1.0 million was funded using interim warehouse borrowings, with the other \$7.7 million funded using corporate cash. Of the \$92.0 million of the net investment in loans held for investment during 2015, \$71.1 million was funded using interim warehouse borrowings, with the remaining \$20.9 million funded using corporate cash. Net cash paid for acquisitions decreased by \$12.8 million as the Company did not execute any acquisitions during the six months ended June 30, 2016. Net cash paid to purchase mortgage servicing rights increased \$43.4 million as the purchase of mortgage servicing rights was a transaction unique to 2016.

The substantial increase in cash used in financing activities was primarily attributable to the significant change in net warehouse borrowings period to period and an increase in repayments of interim warehouse notes payable, partially offset by a decrease in borrowings of interim warehouse notes payable and a decrease in cash used to repurchase and retire shares of our common stock. The substantial net repayment of warehouse borrowings for the six months ended June 30, 2016 was due to a significant decrease in the unpaid principal balance of loans held for sale from December 31, 2015 to June 30, 2016. During the six months ended June 30, 2015, loans held for sale decreased from their December 31, 2014 balance less significantly. The change in net borrowings of interim warehouse notes payable was principally due to an increase in payoffs of loans held for investment, partially offset by an increase in originations of loans held for investment year over year. During the six months ended June 30, 2015, our repurchases included a single transaction of a large block of our shares of common stock from our largest stockholder at the time. Our share repurchases during the six months ended June 30, 2016 have been in multiple transactions of smaller size.

## Liquidity and Capital Resources

### Uses of Liquidity, Cash and Cash Equivalents

Our significant recurring cash flow requirements consist of (i) short-term liquidity necessary to fund loans held for sale, (ii) liquidity necessary to fund loans held for investment under the Interim Program, (iii) working capital to support our day-to-day operations, including debt service payments, servicing advances consisting of principal and interest advances for Fannie Mae or HUD loans that become delinquent, and advances on insurance and tax payments if the escrow funds are insufficient, and (iv) working capital to satisfy collateral requirements for our Fannie Mae DUS risk-sharing obligations and to meet the operational liquidity requirements of Fannie Mae, Freddie Mac, HUD, Ginnie Mae, and our warehouse facility lenders.

Fannie Mae has established benchmark standards for capital adequacy, and reserves the right to terminate our servicing authority for all or some of the portfolio if at any time it determines that our financial condition is not adequate to support our obligations under the DUS agreement. We are required to maintain acceptable net worth as defined in the standards, and we satisfied the requirements as of June 30, 2016. The net worth requirement is derived primarily from unpaid balances on Fannie Mae loans and the level of risk-sharing. At June 30, 2016, the net worth requirement was \$115.5 million and our net worth was \$531.4 million, as measured at our wholly owned operating subsidiary, Walker & Dunlop, LLC. As of June 30, 2016, we were required to maintain at least \$21.2 million of liquid assets to meet our operational liquidity requirements for Fannie Mae, Freddie Mac, HUD, Ginnie Mae and our warehouse facility lenders. As of June 30, 2016, we had operational liquidity of \$107.9 million, as measured at our wholly owned operating subsidiary, Walker & Dunlop, LLC.

As noted previously, under certain limited circumstances, we may make preferred equity investments in entities controlled by certain of our borrowers that will assist those borrowers to acquire and reposition properties. As of June 30, 2016, we have made commitments to fund such preferred equity investments in monthly installments totaling \$42.8 million, \$6.4 million of which has been funded. We expect to fund the unfunded commitment amounts over the next 12 to 24 months. We may make additional commitments to fund preferred equity investments in the future.

We currently retain all future earnings for the operation and expansion of our business and therefore do not pay cash dividends on our common stock. Since the beginning of 2014, we have repurchased 5.5 million shares of our common stock from large stockholders for an aggregate cost of \$82.3 million and invested \$73.2 million of cash in acquisitions and the purchase of mortgage servicing rights. During the first quarter of 2016, our Board of Directors authorized us to repurchase up to \$75.0 million of our common stock over a 12-month period ending February 9, 2017. We repurchased 0.4 million shares of our stock under this program for an aggregate cost of \$9.2 million during the six months ended June 30, 2016. Additionally, we may execute additional acquisitions if the economics of such acquisitions are favorable.

Table of Contents

Historically, our cash flows from operations and warehouse facilities have been sufficient to enable us to meet our short-term liquidity needs and other funding requirements. We believe that cash flows from operations will continue to be sufficient for us to meet our current obligations for the foreseeable future.

## Restricted Cash and Pledged Securities

Restricted cash consists primarily of good faith deposits held on behalf of borrowers between the time we enter into a loan commitment with the borrower and the investor purchases the loan. We are generally required to share the risk of any losses associated with loans sold under the Fannie Mae DUS program. We are required to secure this obligation by assigning collateral to Fannie Mae. We meet this obligation by assigning pledged securities to Fannie Mae. The amount of collateral required by Fannie Mae is a formulaic calculation at the loan level and considers the balance of the loan, the risk level of the loan, the age of the loan, and the level of risk-sharing. Fannie Mae requires collateral for Tier 2 loans of 75 basis points, which is funded over a 48-month period that begins upon delivery of the loan to Fannie Mae. Collateral held in the form of money market funds holding U.S. Treasuries is discounted 5% for purposes of calculating compliance with the collateral requirements. As of June 30, 2016, we held substantially all of our restricted liquidity in money market funds holding U.S. Treasuries in the aggregate amount of \$75.0 million. Additionally, substantially all of the loans for which we have risk sharing are Tier 2 loans. We fund any growth in our Fannie Mae required operational liquidity and collateral requirements from our working capital.

We are in compliance with the June 30, 2016 collateral requirements as outlined above. As of June 30, 2016, reserve requirements for the DUS loan portfolio will require us to fund \$45.9 million in additional restricted liquidity over the next 48 months, assuming no further principal paydowns, prepayments, or defaults within our at risk portfolio. Fannie Mae periodically reassesses the DUS Capital Standards and may make changes to these standards in the future. We generate sufficient cash flow from our operations to meet these capital standards and do not expect any future changes to have a material impact on our future operations; however, any future changes to collateral requirements may adversely impact our available cash.

Under the provisions of the DUS agreement, we must also maintain a certain level of liquid assets referred to as the operational and unrestricted portions of the required reserves each year. We satisfied these requirements as of June 30, 2016.

## Sources of Liquidity: Warehouse Facilities

The following table provides information related to our warehouse facilities as of June 30, 2016.

(dollars in thousands) Facility	June 30, 2016		
	Maximum Amount	Outstanding Balance	Interest rate
Agency warehouse facility #1	\$ 425,000	\$ 336,126	30-day LIBOR plus 1.40%
Agency warehouse facility #2	1,150,000	1,096,996	30-day LIBOR plus 1.40%
Agency warehouse facility #3	480,000	291,323	30-day LIBOR plus 1.35%
Agency warehouse facility #4	450,000	318,095	30-day LIBOR plus 1.40%
Fannie Mae repurchase agreement, uncommitted line and open maturity	750,000	91,373	30-day LIBOR plus 1.15%
Total agency warehouse facilities	\$ 3,255,000	\$ 2,133,913	
CMBS warehouse facility #1	\$ 100,000	\$ 17,856	30-day LIBOR plus 2.25%
CMBS warehouse facility #2	100,000	—	30-day LIBOR plus 2.25%

Edgar Filing: Walker & Dunlop, Inc. - Form 10-Q

CMBS warehouse facility #3	100,000	13,455	30-day LIBOR plus 2.75%
Total CMBS warehouse facilities	\$ 300,000	\$ 31,311	
Interim warehouse facility #1	\$ 85,000	\$ 36,916	30-day LIBOR plus 1.90%
Interim warehouse facility #2	200,000	101,096	30-day LIBOR plus 2.00%
			30-day LIBOR plus 2.00%

Total interim warehouse facilities	\$ 360,000	\$ 174,017	
Total warehouse facilities	\$ 3,915,000	\$ 2,339,241	
Agency Warehouse Facilities			

At June 30, 2016, to provide financing to borrowers under the GSE and HUD programs, we have four warehouse lines of credit in the amount of \$2.4 billion with certain national banks and a \$0.8 billion uncommitted facility with Fannie Mae (collectively, the “Agency Warehouse Facilities”). Four of these facilities are revolving commitments we expect to renew annually (consistent with industry practice),

Table of Contents

and the other facility is provided on an uncommitted basis without a specific maturity date. Our ability to originate mortgage loans intended to be sold under a GSE or HUD execution depends upon our ability to secure and maintain these types of short-term financing on acceptable terms.

Agency Warehouse Facility #1:

We have a warehousing credit and security agreement with a national bank for a \$425.0 million committed warehouse line that is scheduled to mature on October 31, 2016. The warehousing credit and security agreement provides us with the ability to fund Fannie Mae, Freddie Mac, HUD, and FHA loans. Advances are made at 100% of the loan balance, and borrowings under this line bear interest at the 30-day London Interbank Offered Rate (“LIBOR”) plus 140 basis points. No material modifications have been made to the agreement during 2016.

Agency Warehouse Facility #2:

We have a \$1.2 billion committed warehouse agreement with a syndicate of national banks. The total commitment amount of \$1.2 billion as of June 30, 2016 consists of a base committed amount of \$650.0 million and a temporary increase of \$500.0 million, as more fully described below. The committed warehouse facility provides us with the ability to fund Fannie Mae, Freddie Mac, HUD, and FHA loans. Advances are made at 100% of the loan balance, and borrowings under this line bear interest at 30-day LIBOR plus 140 basis points. During the second quarter of 2016, we executed a temporary commitment increase agreement to the warehousing credit and security agreement that provides a temporary \$500.0 million increase in the maximum borrowing capacity that expires in August 2016, at which time the maximum borrowing capacity returns to \$650.0 million. Additionally, we executed the eighth amendment to the amended and restated credit and security agreement that extended the maturity date to June 21, 2017. No other material modifications have been made to the agreement during 2016.

Agency Warehouse Facility #3:

We have a \$480.0 million committed warehouse credit and security agreement with a national bank. The total commitment amount of \$480.0 million as of June 30, 2016 consists of a base committed amount of \$280.0 million and a temporary increase of \$200.0 million, as more fully described below. The committed warehouse facility provides us with the ability to fund Fannie Mae, Freddie Mac, HUD, and FHA loans. Advances are made at 100% of the loan balance, and the borrowings under the warehouse agreement bear interest at a rate of 30-day LIBOR plus 135 basis points. During the second quarter of 2016, we executed the fourth amendment to the credit and security agreement that increased the committed amount to \$280.0 million, decreased the interest rate to 30-day LIBOR plus 135 basis points, and extended the maturity date to April 30, 2017. Also during the second quarter of 2016, we executed a temporary commitment increase agreement to the warehousing credit and security agreement that provides a temporary \$200.0 million increase in the maximum borrowing capacity that expires in September 2016, at which time the maximum borrowing capacity returns to \$280.0 million. No other material modifications have been made to the agreement during 2016.

Agency Warehouse Facility #4:

We have a \$450.0 million committed warehouse agreement with a national bank that is scheduled to mature December 20, 2016. The total commitment amount of \$450.0 million as of June 30, 2016 consists of a base committed amount of \$250.0 million and a temporary increase of \$200.0 million, as more fully described below. The committed warehouse facility provides us with the ability to fund Fannie Mae, Freddie Mac, HUD, and FHA loans. Advances are made at 100% of the loan balance, and borrowings under this line bear interest at 30-day LIBOR plus 140 basis points. During the second quarter of 2016, we executed a temporary commitment increase agreement to the warehousing agreement that provides a temporary \$200.0 million increase in the maximum borrowing capacity that expires in August 2016, at which time the maximum borrowing capacity returns to \$250.0 million. No other material modifications have been made to the agreement during 2016.

Agency Warehouse Facility #5:

During the third quarter of 2016, we executed a warehousing credit and security agreement to establish Agency Warehouse Facility #5. The committed warehouse facility provides us with the ability to fund defaulted HUD and FHA loans. The warehouse agreement provides for a maximum borrowing amount of \$30.0 million and is scheduled to mature in 18 months. The borrowings under the warehouse agreement bear interest at a rate of 30-day LIBOR plus 180 basis points.

## Table of Contents

### Uncommitted Agency Warehouse Facility:

We have a \$750.0 million uncommitted facility with Fannie Mae under its ASAP funding program. The total borrowing capacity of \$750.0 million as of June 30, 2016 consists of a base amount of \$450.0 million and a temporary increase of \$300.0 million, as more fully described below. After approval of certain loan documents, Fannie Mae will fund loans after closing and the advances are used to repay the primary warehouse line. Fannie Mae will advance 99% of the loan balance, and borrowings under this program bear interest at 30-day LIBOR plus 115 basis points, with a minimum 30-day LIBOR rate of 35 basis points. There is no expiration date for this facility. During the second quarter of 2016, Fannie Mae provided a temporary increase of \$300.0 million in the maximum borrowing capacity that was made permanent in July 2016, at which time the permanent maximum borrowing capacity became \$750.0 million.

### CMBS Warehouse Facilities

In support of the CMBS Program, the Company has three warehouse lines of credit in the amount of \$0.3 billion with certain large national financial institutions as of June 30, 2016 (the "CMBS Warehouse Facilities"). Consistent with industry practice, these facilities are revolving commitments we expect to renew annually. Our ability to originate mortgage loans intended to be sold under a CMBS execution largely depends upon our ability to secure and maintain these types of short-term financing on acceptable terms.

#### CMBS Warehouse Facility #1:

We have a \$100.0 million repurchase agreement that is scheduled to mature on October 31, 2016. The agreement provides us with the ability to fund first mortgage loans on various real estate property types for a short-term period, using available cash in combination with advances under the facility. All borrowings bear interest at 30-day LIBOR plus 225 basis points. The lender retains a first priority security interest in all mortgages funded by such advances on a cross-collateralized basis. Repayments under the credit agreement mirror the underlying mortgage loan, with each advance repaid upon sale of the underlying mortgage loan. No material modifications have been made to the agreement during 2016.

#### CMBS Warehouse Facility #2:

We had a \$100.0 million repurchase agreement that matured on July 1, 2016 according to its terms, and the Company determined not to renew the facility.

#### CMBS Warehouse Facility #3:

During the second quarter of 2016, we executed a repurchase agreement to establish CMBS Warehouse Facility #3. The new warehouse facility has a maximum borrowing capacity of \$100.0 million and matures in one year. The agreement provides us with the ability to fund first mortgage loans on various real estate property types for a short-term period, using available cash in combination with advances under the facility. All borrowings bear interest at 30-day LIBOR plus 275 basis points. The lender retains a first priority security interest in all mortgages funded by such advances on a cross-collateralized basis. Repayments under the credit agreement mirror the underlying mortgage loan, with each advance repaid upon sale of the underlying mortgage loan.

### Interim Warehouse Facilities

To assist in funding loans held for investment under the Interim Program, we have three warehouse facilities with certain national banks in the aggregate amount of \$0.4 billion as of June 30, 2016 (“Interim Warehouse Facilities”). Consistent with industry practice, two of these facilities are revolving commitments we expect to renew annually and one is a revolving commitment we expect to renew every two years. Our ability to originate loans held for investment depends upon our ability to secure and maintain these types of short-term financings on acceptable terms.

Interim Warehouse Facility #1:

We have an \$85.0 million committed warehouse line agreement that provides us with the ability to fund first mortgage loans on multifamily real estate properties for periods of up to three years, using available cash in combination with advances under the facility. Borrowings under the facility are full recourse to the Company and bear interest at 30-day LIBOR plus 190 basis points. Repayments under the credit agreement are interest-only, with principal repayments made upon the earlier of the refinancing of an underlying mortgage or the maturity of an advance under the credit agreement. During the second quarter of 2016, we executed the sixth amendment to the credit and security agreement that extended the maturity date to April 30, 2017. No other material modifications have been made to the agreement during 2016.

Table of Contents

Interim Warehouse Facility #2:

We have a \$200.0 million committed warehouse line agreement that is scheduled to mature on December 13, 2017. The agreement provides us with the ability to fund first mortgage loans on multifamily real estate properties for periods of up to three years, using available cash in combination with advances under the facility. All borrowings bear interest at 30-day LIBOR plus 200 basis points. The lender retains a first priority security interest in all mortgages funded by such advances on a cross-collateralized basis. Repayments under the credit agreement are interest-only, with principal repayments made upon the earlier of the refinancing of an underlying mortgage or the maturity of an advance under the credit agreement. No material modifications have been made to the agreement during 2016.

Interim Warehouse Facility #3:

We have a \$75.0 million repurchase agreement that provides us with the ability to fund first mortgage loans on multifamily real estate properties for periods of up to three years, using available cash in combination with advances under the facility. The borrowings under the agreement bear interest at a rate of 30-day LIBOR plus 200 basis points to 250 basis points (“the spread”). The spread varies according to the type of asset the borrowing finances. Repayments under the credit agreement are interest-only, with principal repayments made upon the earlier of the refinancing of an underlying mortgage or the maturity of an advance under the credit agreement. During the second quarter of 2016, we exercised our option to extend the maturity date of the repurchase agreement to May 19, 2017. Additionally, we executed the second amendment to the repurchase agreement that provides us with an additional unilateral option to extend the maturity date one year. As a result of the amendment, we now have three remaining one-year options that, if exercised, extend the maturity date through May 19, 2020. No other material modifications have been made to the agreement during 2016.

The Agency and Interim Warehouse Facility agreements above contain cross-default provisions, such that if a default occurs under any of those debt agreements, generally the lenders under our other Agency and Interim debt agreements could also declare a default. Similarly, the CMBS agreements above contain cross-default provisions, such that if a default occurs under any of those debt agreements, generally the lenders under our other CMBS debt agreements could also declare a default. We were in compliance with all covenants as of June 30, 2016.

We believe that the combination of our capital and warehouse facilities is adequate to meet our loan origination needs.

Debt Obligations

We have a senior secured term loan credit agreement (the “Term Loan Agreement”). The Term Loan Agreement provides for a \$175.0 million term loan that was issued at a discount of 1.0% (the “Term Loan”). At any time, we may also elect to request the establishment of one or more incremental term loan commitments to make up to three

additional term loans (any such additional term loan, an “Incremental Term Loan”) in an aggregate principal amount for all such Incremental Term Loans not to exceed \$60.0 million.

We are obligated to repay the aggregate outstanding principal amount of the Term Loan in consecutive quarterly installments equal to \$0.3 million on the last business day of each quarter. The Term Loan also requires other prepayments in certain circumstances pursuant to the terms of the Term Loan Agreement. In April of 2015, we made a mandatory prepayment of \$3.6 million. The final principal installment of the Term Loan is required to be paid in full on December 20, 2020 (or, if earlier, the date of acceleration of the Term Loan pursuant to the terms of the Term Loan Agreement) and will be in an amount equal to the aggregate outstanding principal of the Term Loan on such date (together with all accrued interest thereon).

At our election, the Term Loan will bear interest at either (i) the “Base Rate” plus an applicable margin or (ii) the London Interbank Offered Rate (“LIBOR Rate”) plus an applicable margin, subject to adjustment if an event of default under the Term Loan Agreement has occurred and is continuing with a minimum LIBOR Rate of 1.0%. The “Base Rate” means the highest of (a) the administrative agent’s “prime rate,” (b) the federal funds rate plus 0.50% and (c) LIBOR for an interest period of one month plus 1%. In each case, the applicable margin is determined by our Consolidated Corporate Leverage Ratio (as defined in the Term Loan Agreement). If such Consolidated Corporate Leverage Ratio is greater than 2.50 to 1.00, the applicable margin will be 4.50% for LIBOR Rate loans and 3.50% for Base Rate loans, and if such Consolidated Corporate Leverage Ratio is less than or equal to 2.50 to 1.00, the applicable margin will be 4.25% for LIBOR Rate loans and 3.25% for Base Rate loans. The applicable margin is 4.25% for LIBOR Rate loans and 3.25% for Base Rate loans as of June 30, 2016.

Our obligations under the Term Loan Agreement are guaranteed by Walker & Dunlop Multifamily, Inc., Walker & Dunlop, LLC, Walker & Dunlop Capital, LLC, and W&D BE, Inc., each of which is a direct or indirect wholly owned subsidiary of the Company (together

Table of Contents

with the Company, the “Loan Parties”), pursuant to a Guarantee and Collateral Agreement entered into on December 20, 2013 among the Loan Parties and the Agent.

As of June 30, 2016, the outstanding principal balance of the Term Loan was \$167.9 million.

The Term Loan and the warehouse facilities are senior obligations of the Company. The Term Loan Agreement contains affirmative and negative covenants, including financial covenants. As of June 30, 2016, we were in compliance with all such covenants.

---

(1) At risk servicing portfolio is defined as the balance of Fannie Mae DUS loans subject to the risk-sharing formula described below, as well as a small number of Freddie Mac and GNMA - HUD loans on which we share in the risk of loss. Use of the at risk portfolio provides for comparability of the full risk-sharing and modified risk-sharing loans because the provision and allowance for risk-sharing obligations are based on the at risk balances of the associated loans. Accordingly, we have presented the key statistics as a percentage of the at risk portfolio.

For example, a \$15 million loan with 50% risk-sharing has the same potential risk exposure as a \$7.5 million loan with full DUS risk sharing. Accordingly, if the \$15 million loan with 50% risk-sharing were to default, we would view the overall loss as a percentage of the at risk balance, or \$7.5 million,

Table of Contents

to ensure comparability between all risk-sharing obligations. To date, substantially all of the risk-sharing obligations that we have settled have been from full risk-sharing loans.

(2) Represents the maximum loss we would incur under our risk-sharing obligations if all of the loans we service, for which we retain some risk of loss, were to default and all of the collateral underlying these loans was determined to be without value at the time of settlement. The maximum exposure is not representative of the actual loss we would incur.

Fannie Mae DUS risk-sharing obligations are based on a tiered formula and represent substantially all of our risk-sharing activities. The risk-sharing tiers and amount of the risk-sharing obligations we absorb under full risk-sharing are provided below. Except as described in the following paragraph, the maximum amount of risk-sharing obligations we absorb at the time of default is 20% of the origination unpaid principal balance (“UPB”) of the loan.

Risk-Sharing Losses	Percentage Absorbed by Us
First 5% of UPB at the time of loss settlement	100%
Next 20% of UPB at the time of loss settlement	25%
Losses above 25% of UPB at the time of loss settlement	10%
Maximum loss	20% of origination UPB

Fannie Mae can double or triple our risk-sharing obligation if the loan does not meet specific underwriting criteria or if a loan defaults within 12 months of its sale to Fannie Mae. We may request modified risk-sharing at the time of origination, which reduces our potential risk-sharing obligation from the levels described above.

We use several techniques to manage our risk exposure under the Fannie Mae DUS risk-sharing program. These techniques include maintaining a strong underwriting and approval process, evaluating and modifying our underwriting criteria given the underlying multifamily housing market fundamentals, limiting our geographic market and borrower exposures and electing the modified risk-sharing option under the Fannie Mae DUS program.

We may request modified risk-sharing based on such factors as the size of the loan, market conditions and loan pricing. Our current credit management policy is to cap the loan balance subject to full risk-sharing at \$60.0 million. Accordingly, we currently elect to use modified risk-sharing for loans of more than \$60.0 million in order to limit our maximum loss on any loan to \$12.0 million (such exposure would occur in the event that the underlying collateral is determined to be completely without value at the time of loss). However, we occasionally elect to originate a loan with full risk sharing even when the loan balance is greater than \$60.0 million if we believe the loan characteristics support such an approach.

A provision for risk-sharing obligations is recorded, and the allowance for risk-sharing obligations is increased, when it is probable that we have incurred risk-sharing obligations. We regularly monitor the credit quality of all loans for which we have a risk-sharing obligation. Loans with indicators of underperforming credit are placed on watch lists, assigned a numerical risk rating based on our assessment of the relative credit weakness, and subjected to additional evaluation or loss mitigation. Indicators of underperforming credit include poor financial performance, poor physical condition, and delinquency.

The provisions have been primarily for Fannie Mae loans with full risk-sharing. The amount of the provision considers our assessment of the likelihood of payment by the borrower, the value of the underlying collateral and the level of risk-sharing. Historically, the loss recognition occurs at or before the loan becoming 60 days delinquent. Our

estimates of value are determined considering broker opinions, appraisals, and other sources of market value information relevant to the underlying property and collateral. Risk-sharing obligations are written off against the allowance at final settlement with Fannie Mae.

As of June 30, 2016 and 2015, none of our at risk balances was more than 60 days delinquent. For the six months ended June 30, 2016, the provision for risk-sharing obligations was \$0.1 million, or less than one basis point of the at risk balance, compared to \$0.2 million, or less than one basis point of the at risk balance, for the six months ended June 30, 2015.

As of June 30, 2016 and 2015, our allowance for risk-sharing obligations was \$5.8 million and \$3.3 million, respectively, or 3 basis points and 2 basis points of the at risk balance, respectively. Our risk-sharing obligation with Fannie Mae requires, in the event of delinquency or default, that we advance principal and interest payments to Fannie Mae on behalf of the borrower. Advances made by us are used to reduce the proceeds required to settle any ultimate loss incurred. As of June 30, 2016, we had advanced \$0.1 million of principal and interest payments on the loans associated with our \$5.8 million allowance. Accordingly, if the \$5.8 million in estimated losses is ultimately realized,

## Table of Contents

we would be required to fund an additional \$5.7 million. As of June 30, 2015, we had advanced \$0.2 million of principal and interest payments on the loans associated with our \$3.3 million allowance at that time.

We have never been required to repurchase a loan.

### Off-Balance Sheet Arrangements

Other than the risk-sharing obligations under the Fannie Mae DUS Program disclosed previously in this Quarterly Report on Form 10-Q, we do not have any off-balance-sheet arrangements.

### New/Recent Accounting Pronouncements

In the second quarter of 2016, Accounting Standards Update 2016-13 (“ASU 2016-13” of “the Standard”), Financial Instruments – Credit Losses (Topic 326), was issued. ASU 2016-13 represents a significant change to the incurred loss model currently used to account for credit losses. The Standard requires an entity to estimate the credit losses expected over the life of exposure upon initial recognition of the exposure. The expected credit losses consider historical information, current information, and reasonable and supportable forecasts, including estimates of prepayments. Exposures with similar risk characteristics are required to be grouped together when estimating expected credit losses. The initial estimate and subsequent changes to the estimated credit losses are required to be reported in current earnings in the income statement and through an allowance in the balance sheet.

ASU 2016-13 is applicable to financial assets subject to credit losses and measured at amortized cost and certain off-balance-sheet credit exposures. The Standard will modify the way we estimate our allowance for risk-sharing obligations and our allowance for loan losses. The effective date of the Standard for us is January 1, 2020, with early adoption permitted on January 1, 2019. We are still in the process of determining the significance of the impact ASU 2016-13 will have on our financial statements and operations and determining when we will adopt the standard.

## Item 3. Quantitative and Qualitative Disclosure About Market Risk

### Interest Rate Risk

We are not currently exposed to unhedged interest rate or credit spread risk during the loan commitment, closing, and delivery processes for our GSE and HUD lending activities. The sale or placement of each loan to an investor is negotiated prior to closing on the loan with the borrower, and the sale or placement is typically effectuated within 60 days of closing. The coupon rate for the loan is set after we have established the interest rate with the investor. For loans originated for our CMBS Program, we are exposed to the risk of changes in interest rates between the periods when we close the loan and sell the loan. We use interest rate swaps to attempt to mitigate this risk. Due to the low volume of CMBS Program originations and the immaterial balance of these loans held for sale as of the current period end, we do not believe the interest rate risk on CMBS Program loans is material to our overall financial results.

Some of our assets and liabilities are subject to changes in interest rates. Earnings from escrows are generally based on LIBOR. 30-day LIBOR as of June 30, 2016 and 2015 was 46 basis points and 19 basis points, respectively. A 100 basis point increase in the 30-day LIBOR would increase our annual earnings by approximately \$14.2 million based on our escrow balance as of June 30, 2016 compared to \$11.7 million based on our escrow balance as of June 30, 2015. A decrease in 30-day LIBOR to zero would decrease our annual earnings by approximately \$6.3 million based on the escrow balance as of June 30, 2016 compared to \$2.2 million based on our escrow balance as of June 30, 2015.

The borrowing cost of our warehouse facilities used to fund loans held for sale and loans held for investment is based on LIBOR. The interest income on our loans held for investment is based on LIBOR. The LIBOR reset date for loans held for investment is the same date as the LIBOR reset date for the corresponding warehouse facility. A 100 basis point increase in 30-day LIBOR would decrease our annual net warehouse interest income by approximately \$4.1 million based on our outstanding warehouse balance as of June 30, 2016 compared to \$4.7 million based on our outstanding warehouse balance as of June 30, 2015. A decrease in 30-day LIBOR to zero would increase our annual earnings by approximately \$1.9 million based on our outstanding warehouse balance as of June 30, 2016 compared to \$0.9 million as of June 30, 2015.

## Table of Contents

All of our corporate debt is based on 30-day LIBOR, with a floor of 100 basis points. A 100 basis point increase in 30-day LIBOR would decrease our annual earnings by approximately \$0.8 million based on our outstanding corporate debt as of June 30, 2016, compared to \$0.3 million as of June 30, 2015. A decrease in 30-day LIBOR to zero would not have an impact on our 2016 or 2015 annual earnings because of the LIBOR floor.

### Market Value Risk

The fair value of our MSR is subject to market risk. A 100 basis point increase or decrease in the weighted average discount rate would decrease or increase, respectively, the fair value of our MSR by approximately \$18.6 million as of June 30, 2016, compared to \$16.6 million as of June 30, 2015. Our Fannie Mae and Freddie Mac servicing engagements provide for make-whole payments in the event of a voluntary prepayment prior to the expiration of the prepayment protection period. Our servicing contracts with institutional investors and HUD do not require payment of a make-whole amount. As of June 30, 2016, 88% of the servicing fees are protected from the risk of prepayment through make-whole requirements compared to 85% as of June 30, 2015; given this significant level of prepayment protection, we do not hedge our servicing portfolio for prepayment risk.

### Credit Spread Risk

Credit spread risk is the risk that interest rate spreads between two different financial instruments will change. As noted above, we are not currently exposed to unhedged credit spread risk during the loan commitment, closing, and delivery processes for our GSE and HUD lending activities. We are, however, exposed to credit spread risk for our CMBS Program lending activities.

In general, CMBS are priced based on a spread to Treasury or interest rate swaps. We generally benefit if credit spreads narrow during the time that we hold a mortgage loan intended to be sold under a CMBS execution. Conversely, we may experience losses if credit spreads widen during the time that we hold such loans. We actively monitor our exposure to changes in credit spreads. During the first quarter of 2016, we held synthetic credit default swap index contracts to moderate our exposure against losses associated with a widening of credit spreads. During the second quarter of 2016, we did not hedge our exposure to credit spread risk as it is currently not a material risk to us due to the immaterial balance of loans held for sale that are intended to be sold under a CMBS execution.

A 100 point increase in credit spreads would result in a \$3.3 million reduction in the fair value of our loans held for sale intended to be sold under a CMBS execution, with a corresponding reduction in Gains from mortgage banking activities, based on the June 30, 2016 balance of loans held for sale intended to be sold under a CMBS execution. A 100 point decrease in credit spreads would result in a \$3.3 million increase in the fair value of our loans held for sale intended to be sold under a CMBS execution, with a corresponding increase in Gains from mortgage banking activities, based on the June 30, 2016 balance of loans held for sale intended to be sold under a CMBS execution. There were no loans held for sale intended to be sold under a CMBS execution as of June 30, 2015.

### Item 4. Controls and Procedures

As of the end of the period covered by this report, an evaluation was performed under the supervision and with the participation of our management, including the principal executive officer and principal financial officer, of the effectiveness of our disclosure controls and procedures, as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934.

Based on that evaluation, the principal executive officer and principal financial officer concluded that the design and operation of these disclosure controls and procedures as of the end of the period covered by this report were effective to provide reasonable assurance that information required to be disclosed in our reports under the Securities and

Edgar Filing: Walker & Dunlop, Inc. - Form 10-Q

Exchange Act of 1934 is recorded, processed, summarized, and reported within the time periods specified in the U.S. Securities and Exchange Commission's rules and forms and that such information is accumulated and communicated to our management, including our principal executive officer and principal financial officer, as appropriate, to allow timely decisions regarding required disclosure.

There have been no changes in our internal control over financial reporting that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

## PART II

## OTHER INFORMATION

## Item 1. Legal Proceedings

In the ordinary course of business, we may be party to various claims and litigation, none of which we believe is material. We cannot predict the outcome of any pending litigation and may be subject to consequences that could include fines, penalties and other costs, and our reputation and business may be impacted. Our management believes that any liability that could be imposed on us in connection with the disposition of any pending lawsuits would not have a material adverse effect on our business, results of operations, liquidity or financial condition.

## Item 1A. Risk Factors

We have included in Part I, Item 1A of our 2015 Form 10-K descriptions of certain risks and uncertainties that could affect our business, future performance or financial condition (the “Risk Factors”). There have been no material changes from the disclosures provided in the 2015 Form 10-K with respect to the Risk Factors. Investors should consider the Risk Factors prior to making an investment decision with respect to the Company’s stock.

## Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

## Issuer Purchases of Equity Securities

Under the 2015 Equity Incentive Plan, subject to the Company’s approval, grantees have the option of electing to satisfy tax withholding obligations at the time of vesting or exercise by allowing us to withhold and purchase at the prevailing market price the shares of stock otherwise issuable to the grantee. During the quarter ended June 30, 2016, we purchased approximately 39 thousand shares to satisfy grantee tax withholding obligations. Additionally, we announced a share repurchase program in the first quarter of 2016. The repurchase program authorized by our Board of Directors permits us to repurchase up to \$75.0 million of shares of our common stock over a 12-month period ending February 9, 2017. The Company had \$65.8 million of authorized share repurchase capacity remaining as of June 30, 2016. The following table provides information regarding common stock repurchases for the quarter ended June 30, 2016:

Period	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Approximate Dollar Value of Shares that May Yet Be Purchased Under the Plans or Programs
April 1-30, 2016	54,626	\$ 23.51	16,030	\$ 68,197,861
May 1-31, 2016	105,400	22.25	105,400	65,840,546
June 1-30, 2016	—	\$ —	—	\$ 65,840,546
Total	160,026	\$ 22.68	121,430	\$ 65,840,546

Item 3. Defaults Upon Senior Securities
