ASTRONICS CORPORATION

Notes to Consolidated Condensed Financial Statements

July 4, 2015

(Unaudited)

1) Basis of Presentation

The accompanying unaudited statements have been prepared in accordance with U.S. generally accepted accounting principles for interim financial information. Accordingly, they do not include all of the information and footnotes required by U.S. generally accepted accounting principles for complete financial statements. In the opinion of management, all adjustments, consisting of normal recurring accruals, considered necessary for a fair presentation have been included.

Operating Results

The results of operations for any interim period are not necessarily indicative of results for the full year. Operating results for the three and six months ended July 4, 2015 are not necessarily indicative of the results that may be expected for the year ending December 31, 2015.

The balance sheet at December 31, 2014 has been derived from the audited financial statements at that date, but does not include all of the information and footnotes required by U.S. generally accepted accounting principles for complete financial statements.

For further information, refer to the financial statements and footnotes thereto included in Astronics Corporation's 2014 annual report on Form 10-K.

Description of the Business

Astronics Corporation ("Astronics" or the "Company") is a leading supplier of products to the global aerospace, defense, electronics and semiconductor industries. Our products and services include advanced, high-performance electrical power generation & distribution systems, lighting & safety systems, avionics products, aircraft structures, engineering design and systems certification and automated test systems.

We have operations in the United States ("U.S."), Canada and France. We design and build our products through our wholly owned subsidiaries Astronics Advanced Electronic Systems Corp. ("AES"); Astronics AeroSat Corporation ("AeroSat"); Ballard Technology, Inc. ("Ballard"); DME Corporation ("DME"); Luminescent Systems, Inc. ("LSI"); Luminescent Systems Canada, Inc. ("LSI Canada"); Max-Viz, Inc. ("Max-Viz"); Peco, Inc. ("Peco"); PGA Electronic s.a. ("PGA"); Astronics Test Systems, Inc. ("ATS") and Armstrong Aerospace, Inc. ("Armstrong").

On January 14, 2015, the Company acquired 100% of the equity of Armstrong, located in Itasca, Illinois. Armstrong is a leading provider of engineering, design and systems certification solutions for commercial aircraft, specializing in connectivity, in-flight entertainment, and electrical power systems. Armstrong is included in our Aerospace segment.

On February 28, 2014, Astronics acquired, through a wholly owned subsidiary ATS, certain assets and liabilities of EADS North America's Test and Services division, located in Irvine, California. ATS is a leading provider of highly engineered automated test systems, subsystems and instruments for commercial electronics and semiconductor products to both the commercial and defense industries. ATS is included in our Test Systems segment.

Cost of Products Sold, Engineering and Development and Selling, General and Administrative Expenses

Cost of products sold includes the costs to manufacture products such as direct materials and labor and manufacturing overhead as well as all engineering and developmental costs. The Company is engaged in a variety of engineering and design activities as well as basic research and development activities directed to the substantial improvement or new application of the Company's existing technologies. These costs are expensed when incurred and included in cost of products sold. Research and development, design and related engineering amounted to \$21.3 million and \$20.6 million for the three months ended July 4, 2015 and June 28, 2014, respectively, and \$43.6 million and \$37.9 million for the six months ended July 4, 2015 and June 28, 2014, respectively. Selling, general and administrative expenses include costs primarily related to our sales and marketing departments and administrative departments. Interest expense is shown net of interest income. Interest income was insignificant for the three and six months ended July 4, 2015 and June 28, 2014.

Table of Contents

Derivatives

In November 2014, the Company terminated its interest rate swap. Ineffectiveness was not significant for the three and six months ended June 28, 2014. The Company classified the cash flows from hedging transactions in the same category as the cash flows from the respective hedged items. No derivative instruments were outstanding at or for the three or six months ended July 4, 2015.

Foreign Currency Translation

The Company accounts for its foreign currency translation in accordance with Accounting Standards Codification (“ASC”) Topic 830, Foreign Currency Translation. The aggregate transaction gain or loss included in operations was insignificant for the three and six months ended July 4, 2015 and June 28, 2014.

Loss Contingencies

Loss contingencies may from time to time arise from situations such as claims and other legal actions. Loss contingencies are recorded as liabilities when it is probable that a liability has been incurred and the amount of the loss is reasonably estimable. Disclosure is required when there is a reasonable possibility that the ultimate loss will exceed the recorded provision. Contingent liabilities are often resolved over long time periods. In recording liabilities for probable losses, management is required to make estimates and judgments regarding the amount or range of the probable loss. Management continually assesses the adequacy of estimated loss contingencies and, if necessary, adjusts the amounts recorded as better information becomes known.

Accounting Pronouncements Adopted in 2015

There have been no recent accounting pronouncements that have had an impact on the Company’s financial statements.

Reclassification of Prior Year Presentation

Certain prior year amounts have been reclassified for consistency with the current year presentation. These reclassifications had no effect on the reported results of operations.

2) Inventories

Inventories are stated at the lower of cost or market, cost being determined in accordance with the first-in, first-out method. Inventories are as follows:

(In thousands)	July 4, 2015	December 31, 2014
Finished Goods	\$32,784	\$28,763
Work in Progress	31,202	28,488
Raw Material	69,432	57,802
	\$133,418	\$115,053

Table of Contents

3) Property, Plant and Equipment

The following table summarizes Property, Plant and Equipment as follows:

(In thousands)	July 4, 2015	December 31, 2014
Land	\$11,162	\$10,008
Buildings and Improvements	78,900	74,755
Machinery and Equipment	83,380	73,062
Construction in Progress	5,417	4,757
	178,859	162,582
Less Accumulated Depreciation	52,530	46,266
	\$126,329	\$116,316

4) Intangible Assets

The following table summarizes acquired intangible assets as follows:

(In thousands)	Weighted Average Life	July 4, 2015		December 31, 2014	
		Gross Carrying Amount	Accumulated Amortization	Gross Carrying Amount	Accumulated Amortization
Patents	6 Years	\$2,146	\$1,171	\$2,146	\$1,077
Non-compete Agreement	5 Years	2,600	238	—	—
Trade Names	9 Years	10,230	1,748	8,304	1,288
Completed and Unpatented Technology	7 Years	24,079	5,584	18,107	4,396
Backlog and Customer Relationships	12 Years	107,928	24,012	93,448	20,253
Total Intangible Assets	8 Years	\$146,983	\$32,753	\$122,005	\$27,014

All acquired intangible assets other than goodwill and one trade name are being amortized. Amortization expense for acquired intangibles is summarized as follows:

(In thousands)	Six Months Ended		Three Months Ended	
	July 4, 2015	June 28, 2014	July 4, 2015	June 28, 2014
Amortization Expense	\$5,772	\$4,904	\$2,920	\$2,437

Amortization expense for acquired intangible assets expected for 2015 and for each of the next five years is summarized as follows:

(In thousands)	
2015	\$11,452
2016	10,791
2017	10,361
2018	10,048
2019	9,647
2020	9,094

The Company also incurs amortization expense related to other assets. Such amortization expense was not significant in the three or six months ended July 4, 2015 and June 28, 2014.

Table of Contents

5) Goodwill

The following table summarizes the changes in the carrying amount of goodwill for 2015:

(In thousands)	December 31, 2014	Acquisition	Foreign Currency Translation	July 4, 2015
Aerospace	\$ 100,153	\$ 15,174	\$(749) \$ 114,578
Test Systems	—	—	—	—
	\$ 100,153	\$ 15,174	\$(749) \$ 114,578

During the three months ended July 4, 2015, approximately \$5.1 million was reclassified from goodwill to intangible assets as the Company continues the evaluation of the purchase price allocation of Armstrong.

6) Long-term Debt and Notes Payable

The Company's obligations under the Credit Agreement as amended are jointly and severally guaranteed by each domestic subsidiary of the Company other than a non-material subsidiary. The obligations are secured by a first priority lien on substantially all of the Company's and the guarantors' assets.

In connection with the funding of the acquisition of ATS, the Company amended its existing credit facility to exercise its option to increase the revolving credit commitment. The credit agreement provided for a \$125 million, five-year revolving credit facility maturing on June 30, 2018, of which \$58.0 million was drawn to finance the acquisition. In addition, the Company was required to pay a commitment fee quarterly at a rate of between 25 and 50 basis points on the unused portion of the total revolving credit commitment, based on the Company's leverage ratio.

On September 26, 2014, the Company modified and extended its existing credit facility (the "Original Facility") by entering into the Fourth Amended and Restated Credit Agreement (the "Agreement"). On the closing date, there were \$180.5 million of term loans outstanding and \$6 million of revolving loans outstanding under the Original Facility. Pursuant to the Agreement, the Original Facility was replaced with a \$350 million revolving credit line with the option to increase the line by up to \$150 million. The outstanding balances in the Original Facility were rolled into the Agreement on the date of entry. In addition, the maturity date of the loans under the Agreement is now September 26, 2019. At July 4, 2015 there was \$215.0 million outstanding on the revolving credit facility and there remains \$133.9 million available, net of outstanding letters of credit. The credit facility allocates up to \$20 million of the \$350 million revolving credit line for the issuance of letters of credit, including certain existing letters of credit. At July 4, 2015, outstanding letters of credit totaled \$1.1 million.

Covenants in the Agreement have been modified to where the maximum permitted leverage ratio of funded debt to Adjusted EBITDA (as defined in the Agreement) is 3.5 to 1, increasing to 4.0 to 1 for up to 2 fiscal quarters following the closing of an acquisition permitted under the Agreement. The Company will pay interest on the unpaid principal amount of the facility at a rate equal to one-, three- or six-month LIBOR plus between 137.5 basis points and 225 basis points based upon the Company's leverage ratio. The Company will also pay a commitment fee to the lenders in an amount equal to between 17.5 basis points and 35 basis points on the undrawn portion of the credit facility, based upon the Company's leverage ratio. The fixed charge coverage ratio under the Original Facility has been replaced with a minimum interest coverage ratio (Adjusted EBITDA to interest expense) of 3.0 to 1 for the term of the Agreement. The Company's interest coverage ratio was 30.9 to 1 at July 4, 2015. The Company's leverage ratio was 1.7 to 1 at July 4, 2015.

In the event of voluntary or involuntary bankruptcy of the Company or any subsidiary, all unpaid principal and other amounts owing under the Agreement automatically become due and payable. Other events of default, such as failure to make payments as they become due and breach of financial and other covenants, change of control, judgments over a certain amount, and cross default under other agreements give the Agent the option to declare all such amounts immediately due and payable.

Table of Contents

7) Product Warranties

In the ordinary course of business, the Company warrants its products against defects in design, materials and workmanship typically over periods ranging from 12 to 60 months. The Company determines warranty reserves needed by product line based on experience and current facts and circumstances. Activity in the warranty accrual is summarized as follows:

(In thousands)	Six Months Ended		Three Months Ended	
	July 4, 2015	June 28, 2014	July 4, 2015	June 28, 2014
Balance at Beginning of Period	\$4,884	\$2,796	\$5,472	\$3,737
Acquisitions	500	790	—	—
Warranties Issued	1,139	876	401	547
Warranties Settled	(1,427) (803) (701) (469
Reassessed Warranty Exposure	223	266	147	110
Balance at End of Period	\$5,319	\$3,925	\$5,319	\$3,925

8) Income Taxes

The Company recognizes deferred tax assets and liabilities for the expected future tax consequences of temporary differences between the financial reporting and tax basis of assets and liabilities. Deferred tax assets are reduced, if deemed necessary, by a valuation allowance for the amount of tax benefits which are not expected to be realized. ASC Topic 740-10 Overall - Uncertainty in Income Taxes (“ASC Topic 740-10”) clarifies the accounting and disclosure for uncertainty in tax positions. ASC Topic 740-10 seeks to reduce the diversity in practice associated with certain aspects of the recognition and measurement related to accounting for income taxes. The Company is subject to the provisions of ASC Topic 740-10 and has analyzed filing positions in all of the federal and state jurisdictions where it is required to file income tax returns, as well as all open tax years in these jurisdictions. Should the Company need to accrue a liability for uncertain tax benefits, any interest associated with that liability will be recorded as interest expense. Penalties, if any, would be recognized as operating expenses. There were no penalties or interest liability accrued as of July 4, 2015 or December 31, 2014, nor were any penalties or interest costs included in expense for the three or six months ended July 4, 2015 and June 28, 2014. The years under which we conducted our evaluation coincided with the tax years currently still subject to examination by major federal and state tax jurisdictions, those being 2012 through 2014 for federal purposes and 2011 through 2014 for state purposes.

The effective tax rates were approximately 34.5% and 33.9% for the six months and 34.6% and 34.0% for the three months ended July 4, 2015 and June 28, 2014, respectively. The effective tax rate for the second quarter and first six months of 2015 and 2014 were lower than the federal statutory rate, due to the domestic production activity deduction and lower effective tax rates on foreign income.

Table of Contents

9) Shareholders' Equity

The changes in shareholders' equity for the six months ended July 4, 2015 are summarized as follows:

(Dollars and Shares in thousands)	Amount	Number of Shares	
		Common Stock	Convertible Class B Stock
Shares Authorized		40,000	10,000
Share Par Value		\$0.01	\$0.01
COMMON STOCK			
Beginning of Period	\$219	16,608	5,322
Conversion of Class B Shares to Common Shares	—	569	(569)
Exercise of Stock Options	3	94	102
End of Period	\$222	17,271	4,855
ADDITIONAL PAID IN CAPITAL			
Beginning of Period	\$49,659		
Stock Compensation Expense	1,143		
Exercise of Stock Options	1,343		
End of Period	\$52,145		
ACCUMULATED OTHER COMPREHENSIVE LOSS			
Beginning of Period	\$(11,949))	
Foreign Currency Translation Adjustment	(3,214))	
Retirement Liability Adjustment – Net of Tax	323		
End of Period	\$(14,840))	
RETAINED EARNINGS			
Beginning of Period	\$190,248		
Net Income	28,373		
End of Period	\$218,621		
TOTAL SHAREHOLDERS' EQUITY			
Beginning of Period	\$228,177		
End of Period	\$256,148		

10) Earnings Per Share

Basic and diluted weighted-average shares outstanding are as follows:

(In thousands)	Six Months Ended		Three Months Ended	
	July 4, 2015	June 28, 2014	July 4, 2015	June 28, 2014
Weighted Average Shares - Basic	22,055	21,616	22,100	21,684
Net Effect of Dilutive Stock Options	765	1,032	736	954
Weighted Average Shares - Diluted	22,820	22,648	22,836	22,638

The above information has been adjusted to reflect the impact of the one-for-five distribution of Class B Stock for shareholders of record on September 5, 2014.

Stock options with exercise prices greater than the average market price of the underlying common shares are excluded from the computation of diluted earnings per share because they are out-of-the-money and the effect of their inclusion would be anti-dilutive. There were no common shares covered by out-of-the-money stock options at July 4, 2015.

11) Accumulated Other Comprehensive Loss and Other Comprehensive Loss

The components of accumulated other comprehensive loss are as follows:

(In thousands)	July 4, 2015	December 31, 2014
Foreign Currency Translation Adjustments	\$ (6,568) \$ (3,354
Retirement Liability Adjustment – Before Tax	(12,726) (13,223
Tax Benefit	4,454	4,628
Retirement Liability Adjustment – After Tax	(8,272) (8,595
Accumulated Other Comprehensive Loss	\$ (14,840) \$ (11,949

The components of other comprehensive loss are as follows:

(In thousands)	Six Months Ended		Three Months Ended	
	July 4, 2015	June 28, 2014	July 4, 2015	June 28, 2014
Foreign Currency Translation Adjustments	\$ (3,214) \$ (568) \$ 432	\$ (182
Change in Accumulated Income on Derivatives:				
Reclassification to Interest Expense	—	34	—	17
Mark to Market Adjustments for Derivatives	—	(45) —	(59
Tax Expense	—	3	—	14
Change in Accumulated Income on Derivatives	—	(8) —	(28
Retirement Liability Adjustments:				
Reclassifications to General and Administrative Expense:				
Amortization of Prior Service Cost	260	265	130	129
Amortization of Net Actuarial Losses	237	54	119	27
Tax Benefit	(174) (111) (87) (50
Retirement Liability Adjustment	323	208	162	106
Other Comprehensive Loss	\$ (2,891) \$ (368) \$ 594	\$ (104

12) Supplemental Retirement Plan and Related Post Retirement Benefits

The Company has two non-qualified supplemental retirement defined benefit plans (“SERP” and “SERP II”) for certain executive officers. The following table sets forth information regarding the net periodic pension cost for the plans.

(In thousands)	Six Months Ended		Three Months Ended	
	July 4, 2015	June 28, 2014	July 4, 2015	June 28, 2014
Service Cost	\$ 97	\$ 124	\$ 48	\$ 62
Interest Cost	422	376	211	188
Amortization of Prior Service Cost	247	260	124	130
Amortization of Net Actuarial Losses	225	54	112	27
Net Periodic Cost	\$ 991	\$ 814	\$ 495	\$ 407

Table of Contents

Participants in the SERP are entitled to paid medical, dental and long-term care insurance benefits upon retirement under the plan. The following table sets forth information regarding the net periodic cost recognized for those benefits:

(In thousands)	Six Months Ended		Three Months Ended	
	July 4, 2015	June 28, 2014	July 4, 2015	June 28, 2014
Service Cost	\$3	\$1	\$2	\$1
Interest Cost	19	16	10	8
Amortization of Prior Service Cost	13	12	6	6
Amortization of Net Actuarial Losses	12	—	7	—
Net Periodic Cost	\$47	\$29	\$25	\$15

13) Sales to Major Customers

The Company has a significant concentration of business with three major customers, each in excess of 10% of consolidated sales. The loss of any of these customers would significantly, negatively impact our sales and earnings. Sales to these three customers represented 22%, 14% and 11% of consolidated sales for the six months ended July 4, 2015 and 20%, 13% and 18% for the three months ended July 4, 2015. Sales to these customers were in the Aerospace and Test Systems segments. Accounts receivable from these customers at July 4, 2015 was approximately \$47.4 million.

The Company had sales to three customers in the Aerospace and Test Systems segments that represented 17%, 15% and 17% of consolidated sales for the six months ended June 28, 2014 and 15%, 14% and 23% of consolidated sales for the three months ended June 28, 2014.

14) Legal Proceedings

The Company is subject to various legal proceedings, claims, and litigation arising in the ordinary course of business. While the outcome of these matters is currently not determinable, we do not expect these matters will have a material adverse effect on our business, financial position, results of operations, or cash flows. However, the results of these matters cannot be predicted with certainty. Should the Company fail to prevail in any legal matter or should several legal matters be resolved against the Company in the same reporting period, then the financial results of that particular reporting period could be materially adversely affected.

On December 29, 2010, Lufthansa Technik AG (“Lufthansa”) filed a Statement of Claim in the Regional State Court of Mannheim, Germany. Lufthansa’s claim asserts that our subsidiary, AES sold, marketed and brought into use in Germany a power supply system which infringes upon a German patent held by Lufthansa. The relief sought by Lufthansa includes requiring AES to stop selling and marketing the allegedly infringing power supply system, a recall of allegedly infringing products sold to commercial customers since November 26, 2003 and compensation for damages. The claim does not specify an estimate of damages and a damages claim will be made by Lufthansa only if it receives a favorable ruling on the determination of infringement.

On February 6, 2015, the Regional State Court of Mannheim, Germany rendered its decision that the patent was infringed. The judgment does not require AES to recall products which are already installed in aircraft or have been sold to other end users. On July 15, 2015, Lufthansa advised AES of their intention to enforce the accounting provisions of the decision, which require AES to provide certain financial information regarding sales of the infringing product to enable Lufthansa to make an estimate of requested damages. AES is currently evaluating the information requirements. Additionally, if Lufthansa provides the additional required bank guarantees specified in the decision, the Company may be required to cease distribution of infringing products in Germany (if any). No such bank guarantee has been issued to date regarding this provision.

The Company appealed and believes it has valid defenses to refute the decision. The appeal process is estimated to extend up to two years. The enforcement of the accounting provision of the decision, as discussed above, has no

impact on the appeals process. As a result, we do not currently have sufficient information to provide an estimate of AES's potential exposure related to this matter. As loss exposure is neither probable nor estimable at this time, the Company has not recorded any liability with respect to this litigation as of July 4, 2015.

Table of Contents

On November 26, 2014, Lufthansa filed a complaint in the United States District for the Western District of Washington. Lufthansa's complaint in this action alleges that AES manufactures, uses, sells and offers for sale a power supply system which infringes upon a U.S. patent held by Lufthansa. The patent at issue in the U.S. action is based on technology similar to that involved in the German action. However, the U.S. court will not be bound by the ultimate determination made by the German court. The Company believes it has valid defenses to refute Lufthansa's claims and intends to contest this matter vigorously. As this matter is in the early stages of fact discovery, we do not currently have sufficient information to provide an estimate of AES's potential exposure related to this matter. As loss exposure is neither probable nor estimable at this time, the Company has not recorded any liability with respect to this litigation as of July 4, 2015.

15) Segment Information

Below are the sales and operating profit by segment for the three and six months ended July 4, 2015 and June 28, 2014 and a reconciliation of segment operating profit to income before income taxes. Operating profit is net sales less cost of products sold and other operating expenses excluding interest and corporate expenses. Cost of products sold and other operating expenses are directly identifiable to the respective segment.

(Dollars in thousands)	Six Months Ended		Three Months Ended		
	July 4, 2015	June 28, 2014	July 4, 2015	June 28, 2014

Table of Contents

16) Fair Value

ASC Topic 820, Fair value Measurements and Disclosures, (“ASC Topic 820”) defines fair value, establishes a framework for measuring fair value and expands the related disclosure requirements. This statement applies under other accounting pronouncements that require or permit fair value measurements. The statement indicates, among other things, that a fair value measurement assumes that the transaction to sell an asset or transfer a liability occurs in the principal market for the asset or liability or, in the absence of a principal market, the most advantageous market for the asset or liability. ASC Topic 820 defines fair value based upon an exit price model. The Company’s assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment, and involves consideration of factors specific to the asset or liability.

ASC Topic 820 establishes a valuation hierarchy for disclosure of the inputs to valuation used to measure fair value. This hierarchy prioritizes the inputs into three broad levels as follows:

Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2 inputs are quoted prices for similar assets and liabilities in active markets or inputs that are observable for the asset or liability, either directly or indirectly through market corroboration, for substantially the full term of the financial instrument.

Level 3 inputs are unobservable inputs based on our own assumptions used to measure assets and liabilities at fair value.

On a Recurring Basis:

A financial asset or liability’s classification within the hierarchy is determined based on the lowest level input that is significant to the fair value measurement. The following table provides the financial assets and liabilities carried at fair value measured on a recurring basis as of July 4, 2015 and December 31, 2014:

(In thousands)	Classification	Total	Level 1	Level 2	Level 3
Acquisition contingent consideration					
July 4, 2015	Current Liabilities	\$(308)) —	—	\$(308)
December 31, 2014	Current Liabilities	—	—	—	—
July 4, 2015	Other Liabilities	\$(175)) —	—	\$(175)
December 31, 2014	Other Liabilities	\$(1,651)) —	—	\$(1,651)

Our Level 3 fair value liabilities represent contingent consideration recorded related to the 2011 Ballard acquisition, to be paid up to a maximum of \$5.5 million if annual revenue growth targets are met in the years 2012 - 2016 and the 2013 AeroSat acquisition, to be paid up to a maximum of \$53.0 million if annual revenue targets are met in the years 2014 and 2015. The change in the balance of contingent consideration during the three and six months ended July 4, 2015 is primarily due to fair value adjustments of \$1.3 million, resulting from the re-evaluation of the probability of the achievement of the contingent consideration targets. This adjustment was recorded within SG&A expenses in the statement of operations.

Contingent consideration payments related to 2014 were insignificant.

The amounts recorded were calculated using an estimate of the probability of future revenue. The varying contingent payments were then discounted to the present value utilizing a discounted cash flow methodology. The contingent consideration liabilities have no observable Level 1 or Level 2 inputs.

On a Non-recurring Basis:

In accordance with the provisions of ASC Topic 350 Intangibles – Goodwill and Other, the Company estimates the fair value of reporting units, utilizing unobservable Level 3 inputs. Level 3 inputs require significant management judgment due to the absence of quoted market prices or observable inputs for assets of a similar nature. The Company utilizes a discounted cash flow analysis to estimate the fair value of reporting units utilizing unobservable inputs. The fair value measurement of the reporting unit under the step-one and step-two analysis of the quantitative goodwill impairment test are classified as Level 3 inputs.

Intangible assets that are amortized are evaluated for recoverability whenever adverse effects or changes in circumstances indicate that the carrying value may not be recoverable. The recoverability test consists of comparing

the undiscounted

16

Table of Contents

projected cash flows with the carrying amount. Should the carrying amount exceed undiscounted projected cash flows, an impairment loss would be recognized to the extent the carrying amount exceeds fair value. For the Company's indefinite-lived intangible asset, the impairment test consists of comparing the fair value, determined using the relief from royalty method, with its carrying amount. An impairment loss would be recognized for the carrying amount in excess of its fair value.

At July 4, 2015, the fair value of goodwill and intangible assets classified using Level 3 inputs are comprised of the Armstrong goodwill and intangible assets acquired on January 14, 2015, which are currently valued based on management's best estimates. When the accounting for the acquisition is finalized, these intangible assets will be valued using discounted cash flow methodology.

Due to their short-term nature, the carrying value of cash and equivalents, accounts receivable, accounts payable, and notes payable approximate fair value. The carrying value of the Company's variable rate long-term debt instruments also approximates fair value due to the variable rate feature of these instruments. As of July 4, 2015, the Company concluded that no indicators of impairment relating to intangible assets or goodwill existed and an interim test was not performed.

17) Recent Accounting Pronouncements

In May 2014, the Financial Accounting Standards Board ("FASB") issued authoritative guidance regarding revenue recognition. The comprehensive new standard will supersede existing revenue recognition guidance and require revenue to be recognized when promised goods or services are transferred to customers in amounts that reflect the consideration to which the company expects to be entitled in exchange for those goods or services. Adoption of the new rules could affect the timing of revenue recognition for certain transactions. The guidance permits two implementation approaches, one requiring retrospective application of the new standard with restatement of prior years and one requiring prospective application of the new standard with disclosure of results under old standards. On July 9, 2015, the FASB voted to defer the effective date by one year to December 15, 2017 for interim and annual reporting periods beginning after that date and permitted early adoption of the standard, but not before the original effective date of December 15, 2016. Therefore, this authoritative guidance will be effective as of the Company's first quarter of fiscal 2018. The Company is currently evaluating the impact that adoption of this guidance will have on its consolidated financial statements and disclosures.

In April 2015, the FASB issued authoritative guidance regarding the presentation of debt issuance costs. The authoritative guidance requires that all costs incurred to issue debt be presented in the balance sheet as a direct deduction from the carrying value of the debt. This authoritative guidance, which will be applied on a retrospective basis, will be effective as of the Company's first quarter of fiscal 2016, with early adoption permitted. The Company plans to early adopt by the end of fiscal 2015 with no material impact on its consolidated financial statements and disclosures.

18) Acquisitions

Armstrong Aerospace, Inc.

On January 14, 2015, the Company purchased 100% of the equity of Armstrong for \$52.6 million in cash. Armstrong, located in Itasca, Illinois, is a leading provider of engineering, design and certification solutions for commercial aircraft, specializing in connectivity, in-flight entertainment, and electrical power systems. Armstrong is included in our Aerospace segment. This transaction was not considered material to the Company's financial position or results of operations.

Astronics Test Systems

On February 28, 2014, our wholly owned subsidiary, ATS, purchased substantially all of the assets and liabilities of the Test and Services Division of EADS North America, Inc. for \$69.4 million in cash, including a net working capital adjustment of \$16.4 million. Located in Irvine, California, ATS is a leading provider of highly-engineered automated test systems, subsystems and instruments for the semiconductor, commercial electronics, commercial aerospace and defense industries. ATS provides fully customized testing systems and support services for these markets. It also designs and manufactures test equipment under the test instrument brands known as Racal and Talon. The acquisition strengthens our service offerings and expertise in the test market. This subsidiary is included in our Test Systems

segment. The purchase price allocation for this acquisition has been finalized. Purchased intangible assets are deductible for tax purposes.

Table of Contents

Item 2. **MANAGEMENT’S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS**

(The following should be read in conjunction with Management’s Discussion and Analysis of Financial Condition and Results of Operations contained in the Company’s Form 10-K for the year ended December 31, 2014.)

OVERVIEW

Astronics Corporation (“Astronics” or the “Company”) is a leading supplier of products to the global aerospace, defense, consumer electronics and semiconductor industries. Our products and services include advanced, high-performance electrical power generation & distribution systems, lighting & safety systems, avionics products, aircraft structures, engineering design & systems certification and automated test systems.

Our Aerospace segment designs and manufactures products for the global aerospace industry. Product lines include lighting & safety systems, electrical power generation, distribution and motions systems, aircraft structures, engineering design & systems certification and avionics products. Our Aerospace customers are the airframe manufacturers (OEM’s) that build aircraft for the commercial, military and general aviation markets, suppliers to those OEM’s, aircraft operators such as airlines and branches of the U.S. Department of Defense as well as the Federal Aviation Administration and airport operators. Our Test Systems segment designs, develops, manufactures and maintains automated test systems that support the semiconductor, commercial electronics, aerospace, communications and weapons test systems as well as training and simulation devices for both commercial and military applications. In the Test Systems Segment, Astronics’ products are sold to a global customer base including OEM’s and prime government contractors for both commercial electronics and military products.

Our strategy is to increase our value by developing technologies and capabilities either internally or through acquisition, and using those capabilities to provide innovative solutions to the aerospace and defense, commercial electronics, semiconductor and other markets where our technology can be beneficial.

Important factors affecting our growth and profitability are the rate at which new aircraft are produced, government funding of military programs, our ability to have our products designed into new aircraft and the rates at which aircraft owners, including commercial airlines, refurbish or install upgrades to their aircraft. New aircraft build rates and aircraft owners spending on upgrades and refurbishments is cyclical and dependent on the strength of the global economy. Once designed into a new aircraft, the spare parts business is frequently retained by the Company. With the acquisition of ATS in 2014, future growth and profitability of the test business is dependent on developing and procuring new and follow-on business in commercial electronics and semiconductor markets as well as with the military. The nature of our Test Systems business is such that it pursues large multi-year projects. There can be significant periods of time between orders in this business which may result in large fluctuations of sales and profit levels and backlog from period to period.

ACQUISITIONS

On January 14, 2015, the Company purchased 100% of the equity of Armstrong Aerospace, Inc. (“Armstrong”) for \$52.6 million in cash. Specializing in connectivity, in-flight entertainment, and electrical power systems, Armstrong is a leading provider of engineering design and certification solutions for commercial aircraft, and is located in Itasca, Illinois. Armstrong is included in our Aerospace segment.

On February 28, 2014, Astronics completed the acquisition of substantially all of the assets and liabilities of EADS North America’s Test and Services division. ATS is located in Irvine, California and is a leading provider of highly engineered automated test systems, subsystems and instruments for the semiconductor, commercial electronics, commercial aerospace and defense industries. The purchase price was \$69.4 million in cash. The addition of ATS complements products and technologies that the Test Systems segment offers.

A discussion by segment can be found at “Segment Results of Operations and Outlook” in this MD&A.

CONSOLIDATED QUARTERLY RESULTS

Consolidated sales for the second quarter of 2015 were \$173.2 million, down slightly from \$174.6 million for the same period last year as strength in Aerospace sales helped to offset lower Test Systems segment sales. The 2015 second quarter included \$7.1 million in sales from Armstrong Aerospace, Inc. (“Armstrong”), acquired on January 14, 2015. Organic sales for the quarter decreased \$8.5 million, or 4.9%, on lower Test System segment sales.

Consolidated cost of products sold decreased \$7.7 million to \$123.7 million in the second quarter of 2015 from \$131.4 million for the same period last year. Cost of products sold in the second quarter of 2014 was negatively impacted by \$8.7 million related to inventory step-up expense of acquired businesses, as compared to \$0.1 million in the second quarter of 2015. The incremental cost of products sold associated with Armstrong of \$5.5 million were largely offset by lower cost of products sold resulting from the decreased sales volume in the Test Systems segment. Consolidated cost of products sold as a percentage of sales was 71.4% in the second quarter of 2015 compared with 75.3% in the second quarter of 2014. E&D costs were \$21.3 million in the second quarter of 2015 (12.3% of sales), compared to \$20.6 million in last year’s second quarter (11.9% of sales). The increase in E&D costs was attributable to the incremental E&D costs of Armstrong (\$1.6 million).

Selling, general and administrative (“SG&A”) expenses were \$21.3 million, or 12.3% of sales, in the second quarter of 2015 compared with \$20.7 million, or 11.9% of sales, in the same period last year. The increase was due primarily to the incremental SG&A costs of Armstrong, which added \$1.6 million to SG&A in the second quarter of 2015, including \$0.7 million of amortization expense for acquired intangible assets of that business.

Diluted earnings per share for the 2015 second quarter were \$0.77 compared with \$0.58 in the prior year period.

CONSOLIDATED YEAR-TO-DATE RESULTS

Consolidated sales for the first six months of 2015 increased by \$19.3 million, or 6.1%, to \$334.8 million from \$315.5 million for the same period last year. The acquisition of Armstrong contributed \$13.8 million to consolidated sales, while consolidated organic sales increased \$5.5 million, or 1.7%.

Consolidated cost of products sold increased \$2.9 million to \$245.2 million in the first six months of 2015 from \$242.3 million for the same period last year. The increase was due primarily to the incremental cost of products sold associated with Armstrong of \$10.4 million, cost of products sold resulting from increased organic sales volume and increased E&D costs. Cost of products sold in the first six months of 2014 included \$17.4 million related to inventory step-up expense, as compared to \$0.7 million in the first six months of 2015. Consolidated cost of products sold as a percentage of sales was 73.2% in the first six months of 2015 compared with 76.8% in the first six months of 2014. E&D costs were \$43.6 million in the first six months of 2015 (13.0% of sales), compared to \$37.9 million in last year’s second quarter (12.0% of sales). The increase in E&D costs were largely attributable to the incremental E&D costs of Armstrong (\$3.0 million).

Selling, general and administrative (“SG&A”) expenses were \$43.9 million, or 13.1% of sales, in the first six months of 2015 compared with \$37.1 million, or 11.8% of sales, in the same period last year. The increase was due primarily to

the incremental

19

Table of Contents

SG&A costs of Astronics Test Systems, Inc. (“ATS”, acquired on February 28, 2014) and Armstrong, which collectively added \$4.4 million to SG&A in the first six months of 2015, including \$1.7 million of amortization expense for acquired intangible assets of those businesses. Additionally, higher SG&A expense reflects increased headcount and compensation costs to support growth.

Diluted earnings per share for the first six months of 2015 were \$1.24 compared with \$0.91 for the same period last year period.

The effective tax rates were approximately 34.5% and 33.9% for the six months and 34.6% and 34.0% for the three months ended July 4, 2015 and June 28, 2014, respectively. The effective tax rate for the second quarter and first six months of 2015 and 2014 were lower than the federal statutory rate, due to the domestic production activity deduction and lower effective tax rates on foreign income.

For both the three and six months ended July 4, 2015, the earnings per share increase, as compared to the respective periods in the prior year, is due primarily to the increase in net income.

We expect consolidated sales in 2015 to be between \$680 million and \$715 million. Approximately \$545 million to \$570 million of forecasted 2015 revenue is expected from the Aerospace segment, while approximately \$135 million to \$145 million of the forecasted revenue is expected from the Test Systems segment.

Our consolidated backlog at July 4, 2015 was \$352.0 million, of which approximately \$263.0 million is expected to ship in 2015.

We expect our capital equipment spending in 2015 to be in the range of \$20 million to \$27 million. E&D costs are estimated to be in the range of \$75 million to \$80 million.

SEGMENT RESULTS OF OPERATIONS AND OUTLOOK

Operating profit, as presented below, is sales less cost of products sold and other operating expenses, excluding interest expense and other corporate expenses. Cost of products sold and other operating expenses are directly identifiable to the respective segment. Operating profit is reconciled to earnings before income taxes in Note 15 of the Notes to Consolidated Condensed Financial Statements included in this report.

AEROSPACE QUARTERLY RESULTS

Aerospace segment sales increased by \$10.6 million, or 8.8%, when compared with the prior year's second quarter to \$132.2 million. Organic sales grew 2.9%, or \$3.5 million, and sales from Armstrong added \$7.1 million. Sales to the Commercial Transport market increased \$11.1 million, of which \$7.1 million was related to the acquisition of Armstrong, primarily comprised of Systems Certification sales. The remaining increase was primarily higher sales of Electrical Power & Motion products which increased \$8.0 million or 13.9%, partially offset by lower sales of Avionics products. Sales of Avionics products to the Commercial Transport market decreased by \$2.6 million. Sales to the Military market decreased \$1.8 million when compared with last year's second quarter as Electrical Power & Motion and Other product sales decreased. Sales to the Business Jet market increased \$0.8 million compared with the same period last year as increased Avionics sales were partially offset by lower Lighting & Safety product sales. Aerospace operating profit for the second quarter of 2015 was \$20.3 million, or 15.3% of sales, compared with \$20.8 million, or 17.1% of sales, in the same period last year. Operating margins were negatively affected by increased E&D spending, lower operating margin from the Armstrong business and a general increase of operating costs. Organic Aerospace E&D costs increased \$0.4 million compared to last year's second quarter. Aerospace SG&A expense increased \$1.7 million in the second quarter of 2015 as compared with 2014. Incremental SG&A from Armstrong was \$1.6 million, including \$0.7 million of purchased intangible asset amortization expense for acquired intangible assets.

AEROSPACE YEAR-TO-DATE RESULTS

Aerospace segment sales increased by \$30.6 million, or 12.6%, when compared with the prior year's first six months, to \$274.5 million. Organic sales grew 6.9%, or \$16.8 million, and sales from Armstrong added \$13.8 million.

Table of Contents

Sales to the Commercial Transport market increased \$32.0 million, of which \$13.8 million was related to the acquisition of Armstrong, primarily comprised of Systems Certification sales. The remaining increase was primarily higher sales of Electrical Power & Motion, Lighting & Safety and Avionics products. Sales of Electrical Power & Motion products to the Commercial Transport market increased approximately \$12.6 million, or 10.5%. Sales of Lighting & Safety products to the Commercial Transport market increased by \$5.0 million. Sales of Avionics products to the Commercial Transport market increased by \$3.3 million. Sales to the Military market decreased \$1.5 million when compared with last year's first six months, due to lower sales of Electrical Power & Motion and Other products, partially offset by higher sales of Lighting & Safety products to this market. Sales to the Business Jet market decreased \$1.0 million during this period due to lower sales of Lighting & Safety products to this market.

Aerospace operating profit for the first six months of 2015 was \$43.7 million, or 15.9% of sales, compared with \$38.3 million, or 15.7% of sales, in the same period last year. Operating leverage gained on increased volume for the organic business was partially offset by higher organic E&D costs of approximately \$2.3 million. Aerospace SG&A expense increased \$4.3 million in the first six months of 2015 as compared with 2014. Incremental SG&A from Armstrong was \$2.7 million, including \$1.1 million of purchased intangible asset amortization expense for acquired intangible assets. The first six months of 2014 included inventory step-up costs of \$2.4 million that reduced normal operating margins for that period.

AEROSPACE OUTLOOK

We expect 2015 sales for our Aerospace segment to be in the range of \$545 million to \$570 million. The Aerospace segment's backlog at the end of the second quarter of 2015 was \$236.3 million with approximately \$187.6 million expected to be shipped over the remaining part of 2015 and \$214.6 million is expected to ship over the next 12 months.

TEST SYSTEMS SEGMENT

(In thousands)	Six Months Ended		Three Months Ended		
	July 4, 2015	June 28, 2014	July 4, 2015	June 28, 2014	
Sales	\$60,327	\$71,856	\$40,986	\$53,167	
Less Intersegment Sales	(55) (237) —	(127)
Net Sales	\$60,272	\$71,619	\$40,986	\$53,040

(In thousands)	July 4, 2015	December 31, 2014
Total Assets	\$91,817	\$69,247
Backlog	\$115,770	\$146,964

TEST SYSTEMS QUARTERLY RESULTS

Sales in the second quarter of 2015 decreased \$12.0 million to \$41.0 million compared to the same period in 2014, a decrease of 22.7%.

Operating profit was \$9.9 million or 24.1% of sales, compared with \$4.0 million or 7.6% of sales in last year's second quarter. The 2014 second quarter reflects non-recurring purchase accounting-related inventory step-up costs of \$8.7 million that reduced normal operating margins for that period. This effect was partially mitigated by a decrease in E&D costs of \$1.3 million, to \$2.8 million in the second quarter of 2015 from \$4.1 million in the prior year period.

Table of Contents

TEST SYSTEMS YEAR-TO-DATE RESULTS

Sales in the first six months of 2015 decreased 15.8% to \$60.3 million compared with sales of \$71.6 million for the same period in 2014 due to lower shipments to the Commercial Electronics market. Sales to the Commercial Electronics market decreased \$21.2 million compared with the same period in 2014, which was partially offset by increased sales of \$9.9 million to the Military market.

Operating profit was \$7.6 million, or 12.7% of sales, compared with \$2.3 million, or 3.2% of sales, in the first six months of 2014. The first six months of 2014 reflects inventory step-up costs of \$15.0 million that reduced normal operating margins in that period.

TEST SYSTEMS OUTLOOK

We expect sales for the Test Systems segment for 2015 to be in the range of \$135 million to \$145 million. The Test Systems segment's backlog at the end of the second quarter of 2015 was \$115.7 million with approximately \$75.4 million expected to be shipped over the remaining part of 2015 and approximately \$96.7 million scheduled to ship over the next 12 months.

LIQUIDITY AND CAPITAL RESOURCES

Operating Activities:

Cash provided by operating activities totaled \$20.9 million for the first six months of 2015, as compared with \$23.2 million during the same period in 2014. Cash flow from operating activities decreased primarily due to the impact of increases in net operating assets for the first six months of 2015 when compared with the first six months of 2014.

Investing Activities:

Cash used for investing activities was \$67.6 million for the first six months of 2015 compared with \$90.9 million used in the same period of 2014. Cash used for the acquisition of Armstrong in January 2015 was \$52.6 million. Cash used for capital expenditures was \$12.3 million. The Company expects capital spending in 2015 to be in the range of \$20 million to \$27 million.

Financing Activities:

The primary financing activities in 2015 relate to borrowings on our senior credit facility to fund the acquisition of Armstrong.

On February 28, 2014, in connection with the funding of ATS, the Company amended its existing credit facility (the "Original Facility") to exercise its option to increase the revolving credit commitment. The Credit Agreement provided for a \$125 million five-year revolving credit facility maturing on June 30, 2018, of which \$58.0 million was drawn to finance the acquisition.

On September 26, 2014, we modified and extended the Original Facility by entering into the Fourth Amended and Restated Credit Agreement (the "Agreement"). On the closing date, there were \$180.5 million of term loans outstanding, \$6 million of revolving loans outstanding and letters of credit with a face amount of \$8.7 million outstanding under the Original Facility. Pursuant to the Agreement, the Original Facility was replaced with a \$350 million revolving credit line with the option to increase the line by up to \$150 million. The outstanding balances in the Original Facility were rolled into the Agreement on the date of entry. In addition, the maturity date of the loans under the Agreement is now September 26, 2019.

At July 4, 2015 there was \$215.0 million outstanding on the revolving credit facility and there remains \$133.9 million available, net of outstanding letters of credit. The credit facility allocates up to \$20 million of the \$350 million revolving credit line for the issuance of letters of credit, including certain existing letters of credit. At July 4, 2015, outstanding letters of credit totaled \$1.1 million.

The maximum permitted leverage ratio of funded debt to Adjusted EBITDA (as defined in the Agreement) is 3.5 to 1, increasing to 4.0 to 1 for up to two fiscal quarters following the closing of an acquisition permitted under the Agreement. The Company will pay interest on the unpaid principal amount of the facility at a rate equal to one-, three- or six-month Libor plus between 137.5 basis points and 225 basis points based upon the Company's leverage ratio. The Company will also pay a commitment fee to the Lenders in an amount equal to between 17.5 basis points and 35 basis points on the undrawn portion of the credit facility, based upon the Company's leverage ratio. The fixed charge coverage ratio under the Original Facility was replaced with a minimum interest coverage ratio (EBITDA to interest expense) of 3.0 to 1 for the term of the Agreement. At

Table of Contents

July 4, 2015, the Company was in compliance with all of the covenants pursuant to the credit facility. Our interest coverage ratio was 30.9 to 1 and the leverage ratio was 1.7 to 1 at July 4, 2015.

The Company's cash needs for working capital, debt service and capital equipment during 2015 are expected to be met by cash flows from operations and cash balances and, if necessary, utilization of the revolving credit facility.

In the event of voluntary or involuntary bankruptcy of the Company or any subsidiary, all unpaid principal and other amounts owing under the Credit Agreement automatically become due and payable. Other events of default, such as failure to make payments as they become due and breach of financial and other covenants, give the Agent the option to declare all such amounts immediately due and payable.

BACKLOG

The Company's backlog at July 4, 2015 was \$352.0 million compared with \$370.7 million at December 31, 2014 and \$326.8 million at June 28, 2014.

CONTRACTUAL OBLIGATIONS AND COMMITMENTS

The following table represents contractual obligations as of July 4, 2015:

(In thousands)	Payments Due by Period				
	Total	2015	2016-2017	2018-2019	After 2019
Long-term Debt	\$231,171	\$1,315	\$5,327	\$219,565	\$4,964
Purchase Obligations	108,107	101,219	6,828	60	—
Interest on Long-term Debt	19,835	3,989	8,448	7,067	331
Supplemental Retirement Plan and Post Retirement Obligations	21,780	202	807	804	19,967
Operating Leases	9,295	1,849	4,104	3,194	148
Other Long-term Liabilities	620	19	503	26	72
Total Contractual Obligations	\$390,808	\$108,593	\$26,017	\$230,716	\$25,482

Notes to Contractual Obligations Table

Purchase Obligations — Purchase obligations are comprised of the Company's commitments for goods and services in the normal course of business.

Long-Term Debt — See Part 1 Financial Information, Item 1 Financial Statements, Note 6, Long-Term Debt and Notes Payable included in this report.

Operating Leases — Operating lease obligations are primarily related to facility leases for our AES, AeroSat, Ballard, DME, Max-Viz, Peco and Luminescent Systems Canada.

MARKET RISK

The Company believes that there have been no material changes in the current year regarding the market risk information for its exposure to interest rate fluctuations. Although the majority of our sales, expenses and cash flows are transacted in U.S. dollars, we have exposure to changes in foreign currency exchange rates related to the Euro and the Canadian dollar. The Company believes that the impact of changes in foreign currency exchange rates in 2015 have not been significant.

CRITICAL ACCOUNTING POLICIES

Refer to the Company's annual report on Form 10-K for the year ended December 31, 2014 for a complete discussion of the Company's critical accounting policies.

Table of Contents

RECENT ACCOUNTING PRONOUNCEMENTS

In May 2014, the Financial Accounting Standards Board (“FASB”) issued authoritative guidance regarding revenue recognition. The comprehensive new standard will supersede existing revenue recognition guidance and require revenue to be recognized when promised goods or services are transferred to customers in amounts that reflect the consideration to which the company expects to be entitled in exchange for those goods or services. Adoption of the new rules could affect the timing of revenue recognition for certain transactions. The guidance permits two implementation approaches, one requiring retrospective application of the new standard with restatement of prior years and one requiring prospective application of the new standard with disclosure of results under old standards. On July 9, 2015, the FASB voted to defer the effective date by one year to December 15, 2017 for interim and annual reporting periods beginning after that date and permitted early adoption of the standard, but not before the original effective date of December 15, 2016. Therefore, this authoritative guidance will be effective as of the Company’s first quarter of fiscal 2018. The Company is currently evaluating the impact that adoption of this guidance will have on its consolidated financial statements and disclosures.

In April 2015, the FASB issued authoritative guidance regarding the presentation of debt issuance costs. The authoritative guidance requires that all costs incurred to issue debt be presented in the balance sheet as a direct deduction from the carrying value of the debt. This authoritative guidance, which will be applied on a retrospective basis, will be effective as of the Company’s first quarter of fiscal 2016, with early adoption permitted. The Company plans to early adopt by the end of fiscal 2015 with no material impact on its consolidated financial statements and disclosures.

FORWARD-LOOKING STATEMENTS

Information included in this report that does not consist of historical facts, including statements accompanied by or containing words such as “may,” “will,” “should,” “believes,” “expects,” “expected,” “intends,” “plans,” “projects,” “approximate,” “estimates,” “predicts,” “potential,” “outlook,” “forecast,” “anticipates,” “presume” and “assume,” are forward-looking statements. Such forward-looking statements are made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. These statements are not guarantees of future performance and are subject to several factors, risks and uncertainties, the impact or occurrence of which could cause actual results to differ materially from the expected results described in the forward-looking statements. Certain of these factors, risks and uncertainties are discussed in the sections of this report entitled “Risk Factors” and “Management’s Discussion and Analysis of Financial Condition and Results of Operations.” New factors, risks and uncertainties may emerge from time to time that may affect the forward-looking statements made herein. Given these factors, risks and uncertainties, investors should not place undue reliance on forward-looking statements as predictive of future results. We disclaim any obligation to update the forward-looking statements made in this report.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

See Market Risk in Item 2, above.

Item 4. Controls and Procedures

The Company’s management, with the participation of the Company’s Chief Executive Officer and Chief Financial Officer, has evaluated the effectiveness of the Company’s disclosure controls and procedures as of July 4, 2015.

a) Based on that evaluation, the Company’s Chief Executive Officer and Chief Financial Officer concluded that the Company’s disclosure controls and procedures were effective as of July 4, 2015.

Changes in Internal Control over Financial Reporting - There have been no changes in our internal control over financial reporting during the most recent fiscal quarter that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

b) financial reporting during the most recent fiscal quarter that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Table of Contents

PART II - OTHER INFORMATION

Item 1. Legal Proceedings

The Company is subject to various legal proceedings, claims, and litigation arising in the ordinary course of business. While the outcome of these matters is currently not determinable, we do not expect these matters will have a material adverse effect on our business, financial position, results of operations, or cash flows. However, the results of these matters cannot be predicted with certainty. Should the Company fail to prevail in any legal matter or should several legal matters be resolved against the Company in the same reporting period, then the financial results of that particular reporting period could be materially adversely affected.

On December 29, 2010, Lufthansa Technik AG (“Lufthansa”) filed a Statement of Claim in the Regional State Court of Mannheim, Germany. Lufthansa’s claim asserts that our subsidiary, AES sold, marketed and brought into use in Germany a power supply system which infringes upon a German patent held by Lufthansa. The relief sought by Lufthansa includes requiring AES to stop selling and marketing the allegedly infringing power supply system, a recall of allegedly infringing products sold to commercial customers since November 26, 2003 and compensation for damages. The claim does not specify an estimate of damages and a damages claim will be made by Lufthansa only if it receives a favorable ruling on the determination of infringement.

On February 6, 2015, the Regional State Court of Mannheim, Germany rendered its decision that the patent was infringed. The judgment does not require AES to recall products which are already installed in aircraft or have been sold to other end users. On July 15, 2015, Lufthansa advised AES of their intention to enforce the accounting provisions of the decision, which require AES to provide certain financial information regarding sales of the infringing product to enable Lufthansa to make an estimate of requested damages. AES is currently evaluating the information requirements. Additionally, if Lufthansa provides the additional required bank guarantees specified in the decision, the Company may be required to cease distribution of infringing products in Germany (if any). No such bank guarantee has been issued to date regarding this provision.

The Company appealed and believes it has valid defenses to refute the decision. The appeal process is estimated to extend up to two years. The enforcement of the accounting provision of the decision, as discussed above, has no impact on the appeals process. As a result, we do not currently have sufficient information to provide an estimate of AES’s potential exposure related to this matter. As loss exposure is neither probable nor estimable at this time, the Company has not recorded any liability with respect to this litigation as of July 4, 2015.

On November 26, 2014, Lufthansa filed a complaint in the United States District for the Western District of Washington. Lufthansa’s complaint in this action alleges that AES manufactures, uses, sells and offers for sale a power supply system which infringes upon a U.S. patent held by Lufthansa. The patent at issue in the U.S. action is based on technology similar to that involved in the German action. However, the U.S. court will not be bound by the ultimate determination made by the German court. The Company believes it has valid defenses to refute Lufthansa’s claims and intends to contest this matter vigorously. As this matter is in the early stages of fact discovery, we do not currently have sufficient information to provide an estimate of AES’s potential exposure related to this matter. As loss exposure is neither probable nor estimable at this time, the Company has not recorded any liability with respect to this litigation as of July 4, 2015.

Other than this proceeding, we are not party to any significant pending legal proceedings that management believes will result in material adverse effect on our financial condition or results of operations.

Item 1a Risk Factors

In addition to other information set forth in this report, you should carefully consider the factors discussed in Part 1, Item 1A. “Risk Factors,” in our Annual Report on Form 10-K for the year ended December 31, 2014, which could materially affect our business, financial condition or results of operations. The risks described in our Annual Report on Form 10-K are not the only risks facing us. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial also may materially adversely affect our business, financial condition and/or results of operations.
