Report of Executive Compensation and Stock Option Committees

The following report addressing the Company's compensation policies for executive officers is included in the Company's Annual Report. The Executive Compensation and Stock Option Committees (the "Compensation Committee") of the Board of Directors are responsible for the report.

General

The Compensation Committee, which is composed of independent directors who are not employees of the Company, is responsible for the design and administration of the Company's compensation program. The compensation program of the Company has been designed (1) to provide compensation opportunities that are competitive with other companies, thereby allowing the Company to compete for and retain talented executives who are essential to the Company's success, (2) to motivate key senior officers by rewarding them for attainment of profitability and growth objectives, and (3) to align the interests of executives with the long-term interests of stockholders by awarding stock options. The compensation program is designed to provide the compensation provided to them.

In order to develop a competitive compensation package for the executive officers of the Company, the Compensation Committee compares the Company's compensation package with those of a comparison group. The comparison group is composed of public companies in the retail stores and other public companies that were family-founded and continue to be family-managed. The comparison group are included in the Standard & Poor's Supercomposite Department Stores Index. In making these comparisons, the Compensation Committee has made these comparisons, it also has taken into account that as the number of senior executives has not grown proportionately, so that the number of senior executives relative to the number of senior executives at other companies of similar size.

Currently, the Company's compensation program consists of salary, annual cash performance bonus, long-term incentive opportunities in the form of stock options. The compensation program is designed to provide the compensation provided to them.

Edgar Filing: DILLARDS INC - Form DEF 14A

and long-term performance of the Company, rewarding executives for both achievement of profitability

Salary -- Each year the Compensation Committee establishes the salary for all executive officers at the discretion of the Compensation Committee and are not specifically related to any company performance bonus and stock option portions of the compensation program, which are discussed below. However, base any increase in salary on targets based on a regression analysis of salaries of a peer comparison group. For fiscal 2001, the salaries set by the Compensation Committee were below the regression analysis.

Cash Performance Bonus -- Cash performance bonuses may be paid annually to senior management. The Company must have income before federal and state income taxes ("pre-tax income") for the fiscal year within ninety (90) days after the start of a fiscal year, designates those individuals in senior management to receive a performance bonus. Bonuses are paid at the conclusion of a fiscal year from a bonus pool, which is equal to (1-1/2%) of the Company's pre-tax income plus three and one-half (3-1/2%) of the increase in pre-tax income for the year. When the Compensation Committee designates the individuals eligible to participate in the bonus program, it also designates the percent of the bonus pool each individual will be entitled to receive. The Compensation Committee has the authority to adjust downward the amount of bonus any individual may receive pursuant to the terms of the bonus plan. For fiscal 2001, the Company experienced a pre-tax income of \$111,571,000 and no increase in pre-tax income over the prior year.

The Compensation Committee decided to eliminate the amount of bonus, which the named executive officers received for fiscal 2001.

Stock Options -- Stock option grants under the Company's 2000 Incentive and Non-Qualified Stock Option Plan are made for long-term incentive compensation for executive officers. These stock option grants relate to the performance of the Company's stock. The exercise price for the options granted is one hundred percent of the shares underlying such options on the date of grant and have value to the executive officer if the stock price increases. The stock options are exercisable on or after April 24, 2001. When making option grants, the Compensation Committee do not consider the number of options already held by an executive officer.

As discussed in previous Compensation Committee Reports, the Omnibus Budget Reconciliation Act of 1986 limits the amount that can be deducted from a company's taxable income for compensation exceeding \$1 million paid to a company's top executives. This deduction limit does not apply to "performance-based compensation." The Compensation Committee believes that the necessary steps have been taken to qualify as performance-based compensation the compensation bonus and stock option portions of the Company's compensation program.

Chief Executive Officer

In setting the Chief Executive Officer's compensation, the Compensation Committee makes the same decisions regarding cash performance bonus and stock options as discussed above for the other named executive officers. The Chief Executive Officer's salary over the prior fiscal year resulted in a salary lower than the regression analysis discussed above.
