UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

FORM 10-Q

(Mark One)

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended March 31, 2010

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission file number 0-6233

(Exact name of registrant as specified in its charter)

INDIANA
(State or other jurisdiction of
incorporation or organization)

35-1068133
(I.R.S. Employer
Identification No.)

100 North Michigan Street South Bend, Indiana 46601
(Address of principal executive offices) (Zip Code)

(574) 235-2000
(Registrant's telephone number, including area code)

Not Applicable
(Former name, former address and former fiscal year, if changed since last report.)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Edgar Filing: 1ST SOURCE CORP - Form 10-Q

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer," and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer	<input type="radio"/>	Accelerated filer	<input checked="" type="radio"/>
Non-accelerated filer	<input type="radio"/>	Smaller reporting company	<input type="radio"/>

(Do not check if a smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).
Yes No

Number of shares of common stock outstanding as of April 16, 2010 – 24,286,688 shares

Table of Contents

1ST SOURCE CORPORATION
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

Note 1. Basis of Presentation

The accompanying unaudited consolidated financial statements reflect all adjustments (all of which are normal and recurring in nature) which are, in the opinion of management, necessary for a fair presentation of the consolidated financial position, the results of operations, changes in shareholders' equity, and cash flows for the periods presented. These unaudited consolidated financial statements have been prepared according to the rules and regulations of the Securities and Exchange Commission (SEC) and, therefore, certain information and footnote disclosures normally included in financial statements prepared in accordance with U. S. generally accepted accounting principles (GAAP) have been omitted. The Notes to the Consolidated Financial Statements appearing in 1st Source Corporation's Annual Report on Form 10-K (2009 Annual Report), which include descriptions of significant accounting policies, should be read in conjunction with these interim financial statements. The balance sheet at December 31, 2009 has been derived from the audited financial statements at that date but does not include all of the information and footnotes required by U. S. generally accepted accounting principles for complete financial statements. Certain amounts in the prior period consolidated financial statements have been reclassified to conform with the current year presentation.

Note 2. Recent Accounting Pronouncements

Subsequent Events: In February 2010, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2010-09 "Subsequent Events (Topic 855) – Amendments to Certain Recognition and Disclosure Requirements." ASU 2010-09 amends the subsequent events disclosure guidance. The amendments include a definition of an SEC filer, requires an SEC filer or conduit bond obligor to evaluate subsequent events through the date the financial statements are issued, and removes the requirement for an SEC filer to disclose the date through which subsequent events have been evaluated. ASU 2010-09 was effective upon issuance except for the use of the issued date for conduit debt obligors. The impact of ASU 2010-09 on our disclosures is reflected in Note 11 - Subsequent Events.

Fair Value Measurements and Disclosures: In January 2010, the FASB issued ASU No. 2010-06 "Fair Value Measurements and Disclosures (Topic 820) – Improving Disclosures about Fair Value Measurements." ASU 2010-06 amends the fair value disclosure guidance. The amendments include new disclosures and changes to clarify existing disclosure requirements. ASU 2010-06 was effective for interim and annual reporting periods beginning after December 15, 2009, except for the disclosures about purchases, sales, issuances, and settlements of Level 3 fair value measurements. Those disclosures are effective for fiscal years beginning after December 15, 2010, and for interim periods within those fiscal years. The impact of ASU 2010-06 on our disclosures is reflected in Note 10 - Fair Value Measurements.

Consolidations: In December 2009, the FASB issued ASU No. 2009-17 (formerly Statement No. 167), "Consolidations (Topic 810) – Improvements to Financial Reporting for Enterprises involved with Variable Interest Entities". ASU 2009-17 amends the consolidation guidance applicable to variable interest entities. The amendments to the consolidation guidance affect all entities, as well as qualifying special-purpose entities (QSPEs) that are currently excluded from previous consolidation guidance. ASU 2009-17 was effective as of the beginning of the first annual reporting period that begins after November 15, 2009. ASU 2009-17 did not have an impact on our financial condition, results of operations, or disclosures.

Table of Contents

Accounting for Transfers of Financial Assets: In December 2009, the FASB issued ASU No. 2009-16 (formerly Statement No. 166), "Transfers and Servicing (Topic 860) – Accounting for Transfers of Financial Assets". ASU 2009-16 amends the derecognition accounting and disclosure guidance. ASU 2009-16 eliminates the exemption from consolidation for QSPEs and also requires a transferor to evaluate all existing QSPEs to determine whether they must be consolidated. ASU 2009-16 was effective as of the beginning of the first annual reporting period that begins after November 15, 2009. ASU 2009-16 did not have an impact on our financial condition, results of operations, or disclosures.

Note 3. Investment Securities

Investment securities available-for-sale were as follows:

(Dollars in thousands)	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
March 31, 2010				
U.S. Treasury and Federal agencies securities	\$355,055	\$1,319	\$(547)	\$355,827
U.S. States and political subdivisions securities	173,425	5,265	(2,319)	176,371
Mortgage-backed securities - Federal agencies	322,899	6,201	(1,256)	327,844
Corporate debt securities	24,048	185	-	24,233
Foreign government securities	1,688	6	-	1,694
Total debt securities	877,115	12,976	(4,122)	885,969
Marketable equity securities	1,288	1,632	(27)	2,893
Total investment securities available-for-sale	\$878,403	\$14,608	\$(4,149)	\$888,862
December 31, 2009				
U.S. Treasury and Federal agencies securities	\$390,189	\$760	\$(1,780)	\$389,169
U.S. States and political subdivisions securities	188,706	5,450	(2,337)	191,819
Mortgage-backed securities - Federal agencies	286,415	5,996	(1,434)	290,977
Corporate debt securities	26,166	194	(38)	26,322
Foreign government and other securities	675	-	-	675
Total debt securities	892,151	12,400	(5,589)	898,962
Marketable equity securities	1,288	1,417	(29)	2,676
Total investment securities available-for-sale	\$893,439	\$13,817	\$(5,618)	\$901,638

At March 31, 2010, the residential mortgage-backed securities we held consisted primarily of GNMA, FNMA and FHLMC pass-through certificates which are guaranteed by those respective agencies of the United States government (or Government Sponsored Enterprise, GSEs).

The contractual maturities of debt securities available-for-sale at March 31, 2010, are shown below. Expected maturities will differ from contractual maturities, because borrowers may have the right to call or prepay obligations with or without call or prepayment penalties.

(Dollars in thousands)

	Amortized Cost	Fair Value
Due in one year or less	\$ 41,051	\$ 41,462
Due after one year through five years	332,860	336,779
Due after five years through ten years	163,934	165,574

Edgar Filing: 1ST SOURCE CORP - Form 10-Q

Due after ten years	16,371	14,310
Mortgage-backed securities	322,899	327,844
Total debt securities available-for-sale	\$ 877,115	\$ 885,969

The following table shows the gross realized gains and losses on sale of securities from the securities available-for-sale portfolio, including marketable equity securities. Realized gains and losses on the sales of all securities are computed using the specific identification cost basis. The gross gains and losses in the first quarter of 2010 primarily reflect the disposition of FNMA and FHLMC debt securities.

Table of Contents

The gross gains in the first quarter 2009 reflect gains on the sale of FHLB and FNMA debt securities. The gross losses in the first quarter 2009 primarily reflect losses on the sale of preferred equities. There have been no other than temporary impairment (OTTI) writedowns in 2010. There were net gains (losses) of \$5 thousand and \$(1) thousand recorded for the three months ended March 31, 2010 and 2009 on \$0.13 million and \$0.13 million in trading securities outstanding at March 31, 2010, and December 31, 2009, respectively.

(Dollars in thousands)

	Three Months Ended	
	March 31,	
	2010	2009
Gross realized gains	\$ 292	\$ 594
Gross realized losses	(12)	(707)
Net realized gains (losses)	\$ 280	\$ (113)

The following tables summarize our gross unrealized losses and fair value by investment category and age:

Mortgage-backed securities - Federal agencies	90,592	(1,137)	22,330	(297)	112,922	(1,434)
Corporate debt securities	7,149	(38)	-	-	7,149	(38)
Total debt securities	353,163	(3,133)	39,048	(2,456)	392,211	(5,589)
Marketable equity securities	2	(2)	4	(27)	6	(29)
Total investment securities available-for-sale	\$353,165	\$(3,135)	\$39,052	\$(2,483)	\$392,217	\$(5,618)

The initial indication of OTTI for both debt and equity securities is a decline in fair value below amortized cost. Quarterly, the impaired securities are analyzed on a qualitative and quantitative basis in determining OTTI. Declines in the fair value of available-for-sale debt securities below their cost that are deemed to be other-than-temporary are reflected in earnings as realized losses to the extent the impairment is related to credit losses. The amount of impairment related to other factors is recognized in other comprehensive income. In

estimating OTTI impairment losses, we consider among other things, (i) the length of time and the extent to which fair value has been less than cost, (ii) the financial condition and near-term prospects of the issuer, and (iii) whether it is more likely than not that we will not have to sell any such securities before a recovery of cost.

At March 31, 2010, we do not have the intent to sell any of the available-for-sale securities in the table above and believe that it is more likely than not that we will not have to sell any such securities before an anticipated recovery of cost. The unrealized losses are due to increases in market interest rates over the yields available at the time the underlying securities were purchased and market illiquidity on adjustable rate coupon securities which are reflected in U.S. States and Political subdivisions securities.

Table of Contents

The fair value is expected to recover on all debt securities as they approach their maturity date or repricing date or if market yields for such investments decline. We do not believe any of the securities are impaired due to reasons of credit quality. Accordingly, as of March 31, 2010, we believe the impairments detailed in the table above are temporary and no impairment loss has been realized in our consolidated statements of income.

At March 31, 2010 and December 31, 2009, investment securities with carrying values of \$333.59 million and \$351.84 million, respectively, were pledged as collateral to secure government deposits, security repurchase agreements, and for other purposes.

Note 4. Reserve for Loan and Lease Losses

The reserve for loan and lease losses is maintained at a level believed to be adequate by management to absorb probable losses inherent in the loan and lease portfolio. The determination of the reserve requires significant judgment reflecting management's best estimate of probable loan and lease losses related to specifically identified loans and leases as well as probable losses in the remainder of the various loan and lease portfolios. The methodology for assessing the appropriateness of the reserve consists of several key elements, which include: specific reserves for impaired loans, percentage allocations for special attention loans and leases (classified loans and leases and internal watch list credits) without specific reserves, formula reserves for each business lending division portfolio, and reserves for pooled homogeneous loans and leases. Management's evaluation is based upon a continuing review of these portfolios, estimates of customer performance, collateral values and dispositions, and assessments of economic and geopolitical events, all of which are subject to judgment and will change.

Note 5. Mortgage Servicing Assets

We recognize the rights to service residential mortgage loans for others as separate assets, whether the servicing rights are acquired through a separate purchase or through the sale of originated loans with servicing rights retained. We allocate a portion of the total cost of a mortgage loan to servicing rights based on the fair value.

Mortgage servicing assets are evaluated for impairment. For purposes of impairment measurement, mortgage servicing assets are stratified based on the predominant risk characteristics of the underlying servicing, principally by loan type and interest rate. If temporary impairment exists within a tranche, a valuation allowance is established through a charge to income equal to the amount by which the carrying value exceeds the fair value. If it is later determined all or a portion of the temporary impairment no longer exists for a particular tranche, the valuation allowance is reduced through a recovery of income.

Table of Contents

Changes in the carrying value of mortgage servicing assets and the associated valuation allowance follow:

(Dollars in thousands)	Three Months Ended	
	March 31,	
	2010	2009
Mortgage servicing assets:		
Balance at beginning of period	\$8,749	\$6,708
Additions	571	2,496
Amortization	(761)	(724)
Sales	(443)	(623)
Carrying value before valuation allowance at end of period	8,116	7,857
Valuation allowance:		
Balance at beginning of period	(1)	(2,073)
Impairment recoveries (charges)	1	(565)
Balance at end of period	\$-	\$(2,638)
Net carrying value of mortgage servicing assets at end of period	\$8,116	\$5,219
Fair value of mortgage servicing assets at end of period	\$10,575	\$5,397

During the three months ended March 31, 2010 and 2009, management determined that it was not necessary to permanently write-down any previously established valuation allowance. At March 31, 2010, the fair value of mortgage servicing assets exceeded the carrying value reported in the consolidated statement of financial condition by \$2.46 million. This difference represents increases in the fair value of certain mortgage servicing assets that could not be recorded above cost basis.

The key economic assumptions used to estimate the fair value of the mortgage servicing rights follow:

	Three Months Ended	
	March 31,	
	2010	2009
Expected weighted-average life (in years)	3.55	3.21
Weighted-average constant prepayment rate (CPR)	17.64	% 38.34
Weighted-average discount rate	8.48	% 8.34

Mortgage loan contractual servicing fees, including late fees and ancillary income, were \$1.02 million and \$0.86 million for the three months ended March 31, 2010 and 2009, respectively. Mortgage loan contractual servicing fees are included in mortgage banking income in the consolidated statements of income.

Note 6. Financial Instruments with Off-Balance-Sheet Risk and Derivative Transactions

To meet the financing needs of our customers, 1st Source Corporation and its subsidiaries are parties to financial instruments with off-balance-sheet risk in the normal course of business. These off-balance-sheet financial instruments include commitments to originate, purchase and sell loans and standby letters of credit. The instruments involve, to varying degrees, elements of credit and interest rate risk in excess of the amount recognized in the consolidated statements of financial condition. Our exposure to credit loss in the event of nonperformance by the other party to the financial instruments for loan commitments and standby letters of credit is represented by the dollar amount of those instruments. We use the same credit policies and collateral requirements in making commitments and conditional obligations as we do for on-balance-sheet instruments.

Table of Contents

We have certain interest rate derivative positions that are not designated as hedging instruments. These derivative positions relate to transactions in which we enter into an interest rate swap with a client while at the same time entering into an offsetting interest rate swap with another financial institution. In connection with each transaction, we agree to pay interest to the client on a notional amount at a variable interest rate and receive interest from the client on the same notional amount at a fixed interest rate. At the same time, we agree to pay another financial institution the same fixed interest rate on the same notional amount and receive the same variable interest rate on the same notional amount. The transaction allows our client to effectively convert a variable rate loan to a fixed rate. Because the terms of the swaps with our customers and the other financial institution offset each other, with the only difference being counterparty credit risk, changes in the fair value of the underlying derivative contracts are not materially different and do not significantly impact our results of operations.

1st Source Bank (Bank), a subsidiary of 1st Source Corporation, grants mortgage loan commitments to borrowers, subject to normal loan underwriting standards. The interest rate risk associated with these loan commitments is managed by entering into contracts for future deliveries of loans. Loan commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Since many of the commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. Commitments to originate or purchase residential mortgage loans held for sale and forward commitments to sell residential mortgage loans are considered derivative instruments.

At March 31, 2010 and December 31, 2009, the amounts of non-hedging derivative financial instruments are shown in the chart below:

	Notional or contractual amount	Asset derivatives		Liability derivatives	
		Statement of Financial Condition location	Fair value	Statement of Financial Condition location	Fair value
March 31, 2010					
Interest rate swap contracts	\$ 466,823	Other assets	\$ 14,740	Other liabilities	\$ 15,247
Loan commitments	44,641	Mortgages held for sale	184	N/A	-
Forward contracts	42,005	Mortgages held for sale	86	N/A	-
Total			\$ 15,010		\$ 15,247
December 31, 2009					
Interest rate swap contracts	\$ 412,717	Other assets	\$ 13,516	Other liabilities	\$ 13,988
Loan commitments	48,821	Mortgages held for sale	77	N/A	-
Forward contracts	38,940	Mortgages held for sale	411	N/A	-
Total			\$ 14,004		\$ 13,988

Edgar Filing: 1ST SOURCE CORP - Form 10-Q

For the three months ended March 31, 2010 and 2009, the amounts included in the consolidated statements of income for non-hedging derivative financial instruments are shown in the chart below:

- 12 -

Table of Contents

(Dollars in thousands)	Statement of Income location	Gain (loss) Three Months Ended March 31,	
		2010	2009
Interest rate swap contracts	Other expense	\$(35)	\$4)
Loan commitments	Mortgage banking income	107	684
Forward contracts	Mortgage banking income	(325)	(1,307)
Total		\$(253)	\$(619)

We issue letters of credit which are conditional commitments that guarantee the performance of a customer to a third party. The credit risk involved and collateral obtained in issuing letters of credit is essentially the same as that involved in extending loan commitments to customers. Standby letters of credit totaled \$22.66 million and \$19.02 million at March 31, 2010 and December 31, 2009, respectively. Standby letters of credit generally have terms ranging from six months to one year.

Note 7. Earnings Per Share

Earnings per common share is computed using the two-class method. Basic earnings per common share is computed by dividing net income available to common shareholders by the weighted-average number of common shares outstanding during the applicable period, excluding outstanding participating securities. Participating securities include non-vested restricted stock awards. Non-vested restricted stock awards are considered participating securities to the extent the holders of these securities receive non-forfeitable dividends at the same rate as holders of common stock. Diluted earnings per common share is computed using the weighted-average number of shares determined for the basic earnings per common share computation plus the dilutive effect of stock compensation using the treasury stock method. Stock options and warrants, where the exercise price was greater than the average market price of the common shares, were excluded from the computation of diluted earnings per common share because the result would have been antidilutive. Stock options of 49,763 and 54,472 were considered antidilutive as of March 31, 2010 and 2009. Stock warrants of 837,947 were considered antidilutive as of March 31, 2010 and 2009.

The following table presents a reconciliation of the number of shares used in the calculation of basic and diluted earnings per common share for the three months ended March 31, 2010 and 2009.

(Dollars in thousands - except per share amounts)	Three Months Ended March 31,	
	2010	2009
Distributed earnings allocated to common stock	\$3,616	\$3,375
Undistributed earnings allocated to common stock	4,278	1,534
Net earnings allocated to common stock	7,894	4,909
Net earnings allocated to participating securities	74	29
Net income allocated to common stock and participating securities	\$7,968	\$4,938
Weighted average shares outstanding for basic earnings per common share	24,210,242	24,150,200
Dilutive effect of stock compensation	5,264	41,410
Weighted average shares outstanding for diluted earnings per common share	24,215,506	24,191,610
Basic earnings per common share	\$0.33	\$0.20
Diluted earnings per common share	\$0.33	\$0.20

Table of Contents

Note 8. Stock-Based Compensation

As of March 31, 2010, we had five stock-based employee compensation plans, which are more fully described in Note 16 of the Consolidated Financial Statements in 1st Source's Annual Report on Form 10-K for the year ended December 31, 2009. These plans include two stock option plans, the Employee Stock Purchase Plan, the Executive Incentive Plan, and the Restricted Stock Award Plan.

Stock-based compensation expense for all stock-based compensation awards granted is based on the grant-date fair value. For all awards except stock option awards, the grant date fair value is either the fair market value per share or book value per share (corresponding to the type of stock awarded) as of the grant date. For stock option awards, the grant date fair value is estimated using the Black-Scholes option pricing model. For all awards we recognize these compensation costs only for those shares expected to vest on a straight-line basis over the requisite service period of the award, for which we use the related vesting term. We estimate forfeiture rates based on historical employee option exercise and employee termination experience. We have identified separate groups of awardees that exhibit similar option exercise behavior and employee termination experience and have considered them as separate groups in the valuation models and expense estimates.

The stock-based compensation expense recognized in the condensed consolidated statement of income for the three months ended March 31, 2010 and 2009 was based on awards ultimately expected to vest, and accordingly has been adjusted by the amount of estimated forfeitures. GAAP requires forfeitures to be estimated at the time of grant and revised, if necessary, in subsequent periods if actual forfeitures differ from those estimates. Forfeitures were estimated based partially on historical experience.

The aggregate intrinsic value in the table below represents the total pretax intrinsic value (the difference between 1st Source's closing stock price on the last trading day of the first quarter of 2010 (March 31, 2010) and the exercise price, multiplied by the number of in-the-money options) that would have been received by the option holders had all option holders exercised their options on March 31, 2010. This amount changes based on the fair market value of 1st Source's stock. Total fair value of options vested and expensed was \$3 thousand and \$3 thousand, net of tax, for the three months ended March 31, 2010 and 2009, respectively.

	Number of Shares	Weighted Average Exercise Price	Average Remaining Contractual Term (in years)	Total Intrinsic Value (in 000's)
Options outstanding, beginning of year	71,763	\$18.19		
Granted	-	-		
Exercised	-	-		
Forfeited	-	-		
Options outstanding, March 31, 2010	71,763	\$18.19	1.83	\$123
Vested and expected to vest at March 31, 2010	71,763	\$18.19	1.83	\$123
Exercisable at March 31, 2010	66,263	\$18.70	1.72	\$93

No options were granted during the three months ended March 31, 2010.

Table of Contents

As of March 31, 2010, there was \$3.75 million of total unrecognized compensation cost related to nonvested share-based compensation arrangements. That cost is expected to be recognized over a weighted-average period of 3.74 years.

The following table summarizes information about stock options outstanding at March 31, 2010:

Range of Exercise Prices	Number of shares Outstanding	Options Outstanding		Options Exercisable	
		Weighted Average Remaining Contractual Life	Weighted Average Exercise Price	Number of shares Exercisable	Weighted Average Exercise Price
\$12.04 to \$17.99	29,508	2.49	\$13.38	24,008	\$13.69
\$18.00 to \$26.99	36,700	1.33	20.43	36,700	20.43
\$27.00 to \$29.46	5,555	1.57	28.95	5,555	28.95

The fair value of each stock option was estimated on the date of grant using the Black-Scholes option-pricing model.

Note 9. Income Taxes

The total amount of unrecognized tax benefits that would affect the effective tax rate if recognized was \$1.42 million at March 31, 2010 and \$1.30 million at December 31, 2009. Interest and penalties were recognized through the income tax provision. For the three months ending March 31, 2010 and the twelve months ending December 31, 2009, we recognized approximately \$0.04 million and \$(0.73) million in interest, net of tax effect, and penalties, respectively. Interest and penalties of approximately \$0.58 million and \$0.55 million were accrued at March 31, 2010 and December 31, 2009, respectively.

Tax years that remain open and subject to audit include the federal 2006-2009 years and the Indiana 2006-2009 years. Additionally, during the first quarter of 2009 we reached a resolution of audit examinations for the 2002-2007 years and as a result recorded a reduction of unrecognized tax benefits in the amount of \$4.85 million that affected the effective tax rate and increased earnings in the amount of \$2.60 million. We do not anticipate a significant change in the amount of uncertain tax positions within the next 12 months.

Note 10. Fair Value Measurements

We record certain assets and liabilities at fair value. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Fair value measurements are also utilized to determine the initial value of certain assets and liabilities, to perform impairment assessments, and for disclosure purposes. We use quoted market prices and observable inputs to the maximum extent possible when measuring fair value. In the absence of quoted market prices, various valuation techniques are utilized to measure fair value. When possible, observable market data for identical or similar financial instruments are used in the valuation. When market data is not available, fair value is determined using valuation models that incorporate management's estimates of the assumptions a market participant would use in pricing the asset or liability.

Table of Contents

Fair value measurements are classified within one of three levels based on the observability of the inputs used to determine fair value, as follows:

§ Level 1 – The valuation is based on quoted prices in active markets for identical instruments.

§ Level 2 – The valuation is based on observable inputs such as quoted prices for similar instruments in active markets, quoted prices for identical or similar instruments in markets that are not active, and model-based valuation techniques for which all significant assumptions are observable in the market.

§ Level 3 – The valuation is based on unobservable inputs that are supported by minimal or no market activity and that are significant to the fair value of the instrument. Level 3 valuations are typically performed using pricing models, discounted cash flow methodologies, or similar techniques that incorporate management's own estimates of assumptions that market participants would use in pricing the instrument, or valuations that require significant management judgment or estimation.

A financial instrument's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement.

We elected fair value accounting for new mortgages held for sale (MHFS) originations starting on January 1, 2008. We believe the election for MHFS (which are hedged with free-standing derivatives (economic hedges)) will reduce certain timing differences and better match changes in the value of these assets with changes in the value of derivatives used as economic hedges for these assets. At March 31, 2010, all MHFS are carried at fair value.

The following table reflects the differences between fair value carrying amount of mortgages held for sale measured at fair value and the aggregate unpaid principal amount we are contractually entitled to receive at maturity on March 31, 2010:

(Dollars in thousands)	Fair value carrying amount	Aggregate unpaid principal	Excess of fair value carrying amount over (under) unpaid principal
Mortgages held for sale reported at fair value:			
Total loans	\$23,067	\$22,349	\$718 (1)
Nonaccrual loans	-	-	-
Loans 90 days or more past due and still accruing	-	-	-

(1) The excess of fair value carrying amount over unpaid principal is included in mortgage banking income and includes changes in fair value at and subsequent to funding, gains and losses on the related loan commitment prior to funding, and premiums on acquired loans.

The following is a description of the valuation methodologies used for financial instruments measured at fair value on a recurring basis:

Investment securities available for sale are valued primarily by a third party pricing agent and both the market and income valuation approaches are implemented using the following types of inputs:

- U.S. treasuries are priced using the market approach and utilizing live data feeds from active market exchanges for identical securities.
- Government-sponsored agency debt securities and corporate bonds are primarily priced using available market information through processes such as benchmark curves, market valuations of like securities, sector groupings and matrix pricing.

- 16 -

Table of Contents

- Other government-sponsored agency securities, mortgage-backed securities and some of the actively traded REMICs and CMOs, are primarily priced using available market information including benchmark yields, prepayment speeds, spreads and volatility of similar securities.
- Other inactive government-sponsored agency securities are primarily priced using consensus pricing and dealer quotes.
- State and political subdivisions are largely grouped by characteristics, i.e., geographical data and source of revenue in trade dissemination systems. Since some securities are not traded daily and due to other grouping limitations, active market quotes are often obtained using benchmarking for like securities. Local tax anticipation warrants, with very little market activity, are priced using an appropriate market yield curve.
- Marketable equity (common) securities are primarily priced using the market approach and utilizing live data feeds from active market exchanges for identical securities.
- Marketable equity (preferred) securities are primarily priced using available market information through processes such as benchmark curves, benchmarking of like securities, sector groupings and matrix pricing.

Trading account securities are priced using the market approach and utilizing live data feeds from active market exchanges for identical securities.

Mortgages held for sale and the related loan commitments and forward contracts (hedges) are valued using a market value approach and utilizing an appropriate current market yield and a loan commitment closing rate based on historical analysis.

Interest rate swap positions, both assets and liabilities, are valued by a third-party pricing agent using an income approach and utilizing models that use as their basis readily observable market parameters. This valuation process considers various factors including interest rate yield curves, time value and volatility factors.

The table below presents the balance of assets and liabilities at March 31, 2010, measured at fair value on a recurring basis:

(Dollars in thousands)	Level 1	Level 2	Level 3	Total
Assets:				
Investment securities available-for-sale:				
U.S. Treasury and Federal agencies securities	\$20,117	\$335,710	\$-	\$355,827
U.S. States and political subdivisions securities	-	166,570	9,801	176,371
Mortgage-backed securities - Federal agencies	-	327,844	-	327,844
Corporate debt securities	-	25,252	-	25,252
Foreign government securities	-	-	675	675
Total debt securities	20,117	855,376	10,476	885,969
Marketable equity securities	2,884	-	9	2,893
Total investment securities available-for-sale	23,001	855,376	10,485	888,862
Trading account securities	130	-	-	130
Mortgages held for sale	-	23,067	-	23,067
Accrued income and other assets (Interest rate swap agreements)	-	14,740	-	14,740
Total	\$23,131	\$893,183	\$10,485	\$926,799

Liabilities

Accrued expenses and other liabilities (Interest rate swap agreements)	\$-	\$15,247	\$-	\$15,247
Total	\$-	\$15,247	\$-	\$15,247

- 17 -

Table of Contents

The changes in Level 3 assets and liabilities measured at fair value on a recurring basis for the quarter ended March 31, 2010 are summarized as follows:

(Dollars in thousands)	U.S. States and political subdivisions securities	Foreign government securities	Marketable equity securities	Investment securities available-for-sale
Beginning balance January 1, 2010	\$ 18,310	\$ 675	\$9	\$ 18,994
Total gains or losses (realized/unrealized):				
Included in earnings	-	-	-	-
Included in other comprehensive income	88	-	-	88
Purchases	988	-	-	988
Issuances	-	-	-	-
Settlements	-	-	-	-
Expirations	(9,585)	-	-	(9,585)
Transfers into Level 3	-	-	-	-
Transfers out of Level 3	-	-	-	-
Ending balance March 31, 2010	\$ 9,801	\$ 675	\$9	\$ 10,485

There were no gains or losses for the period included in earnings attributable to the change in unrealized gains or losses relating to assets and liabilities still held at March 31, 2010.

We may be required, from time to time, to measure certain other financial assets at fair value on a nonrecurring basis in accordance with GAAP. These other financial assets include loans measured for impairment, venture capital partnership investments, mortgage servicing rights, goodwill, repossessions and other real estate.

Impaired loans and related write-downs are based on the fair value of the underlying collateral if repayment is expected solely from the collateral. Collateral values are estimated using customized discounting criteria, appraisals and dealer and trade magazine quotes which are used in a market valuation approach. Repossessions are similarly valued.

Venture capital partnership investments and the adjustments to fair value primarily result from application of lower of cost or fair value accounting. The partnership investments are priced using financial statements provided by the partnerships.

Mortgage servicing rights (MSRs) and related adjustments to fair value result from application of lower of cost or fair value accounting. For purposes of impairment, MSRs are stratified based on the predominant risk characteristics of the underlying servicing, principally by loan type and interest rate. The fair value of each tranche of the servicing portfolio is estimated by calculating the present value of estimated future net servicing cash flows, taking into consideration actual and expected mortgage loan prepayment rates, discount rates, servicing costs, and other economic factors. A fair value analysis is also obtained from an independent third party agent. MSRs do not trade in an active, open market with readily observable prices and though sales of MSRs do occur, precise terms and conditions typically are not readily available and the characteristics of our servicing portfolio may differ from those of any servicing portfolios that do trade.

Goodwill is reviewed for impairment at least annually, or on an interim basis if an event occurs or circumstances change that would more likely than not reduce the carrying amount. Goodwill is allocated into two reporting units. Fair value for each reporting unit is estimated using stock price multiples or revenue multiples. We do not believe there is a reasonable possibility that either of our reporting units are at risk of failing a future Step 1

impairment test.

- 18 -

Table of Contents

Other real estate is based on the fair value of the underlying collateral less expected selling costs. Collateral values are estimated primarily using appraisals and reflect a market value approach.

For assets measured at fair value on a nonrecurring basis the following represents impairment charges (recoveries) recognized on these assets during the quarter ended March 31, 2010: impaired loans - \$1.03 million; venture capital partnership investments - \$(0.39) million; mortgage servicing rights - \$0.00 million; goodwill - \$0.00 million; repossessions - \$0.60 million, and other real estate - \$0.00 million.

For assets measured at fair value on a nonrecurring basis at March 31, 2010, the following table provides the level of valuation assumptions used to determine each valuation and the carrying value of the related assets:

(Dollars in thousands)	Level 1	Level 2	Level 3	Total
Loans	\$-	\$-	\$73,627	\$73,627
Accrued income and other assets (venture capital partnership investments)	-	-	3,055	3,055
Accrued income and other assets (mortgage servicing rights)	-	-	8,116	8,116
Goodwill and intangible assets (goodwill)	-	83,329	-	83,329
Accrued income and other assets (repossessions)	-	-	9,886	9,886
Accrued income and other assets (other real estate)	-	-	7,568	7,568
	\$-	\$83,329	\$102,252	\$185,581

GAAP requires disclosure of the fair value of financial assets and financial liabilities, including those financial assets and financial liabilities that are not measured and reported at fair value on a recurring or non-recurring basis.

The fair values of our financial instruments as of March 31, 2010, and December 31, 2009, are summarized in the table below.

(Dollars in thousands)	March 31, 2010		December 31, 2009	
	Carrying or Contract Value	Fair Value	Carrying or Contract Value	Fair Value
Assets:				
Cash and due from banks	\$53,518	\$53,518	\$72,872	\$72,872
Federal funds sold and interest bearing deposits with other banks	71,139	71,139	141,166	141,166
Investment securities, available-for-sale	888,862	888,862	901,638	901,638
Other investments and trading account securities	21,142	21,142	21,137	21,137
Mortgages held for sale	23,067	23,067	26,649	26,649
Loans and leases, net of reserve for loan and lease losses	3,018,288	3,064,686	3,004,914	3,042,251
Cash surrender value of life insurance policies	51,853	51,853	51,342	51,342
Mortgage servicing rights	8,116	10,575	8,748	10,180

Table of Contents

The methodologies for estimating fair value of financial assets and financial liabilities that are measured at fair value on a recurring or non-recurring basis are discussed above. The estimated fair value approximates carrying value for cash and cash equivalents and cash surrender value of life insurance policies. The methodologies for other financial assets and financial liabilities are discussed below:

Loans and Leases — For variable rate loans and leases that reprice frequently and with no significant change in credit risk, fair values are based on carrying values. The fair values of loans and leases are estimated using discounted cash flow analyses which use interest rates currently being offered for loans and leases with similar terms to borrowers of similar credit quality.

Deposits — The fair values for all deposits other than time deposits are equal to the amounts payable on demand (the carrying value). Fair values of variable rate time deposits are equal to their carrying values. Fair values for fixed rate time deposits are estimated using discounted cash flow analyses using interest rates currently being offered for deposits with similar remaining maturities.

Short-Term Borrowings — The carrying values of Federal funds purchased, securities sold under repurchase agreements, and other short-term borrowings, including our liability related to mortgage loans available for repurchase under GNMA optional repurchase programs, approximate their fair values.

Long-Term Debt and Mandatorily Redeemable Securities — The fair values of long-term debt are estimated using discounted cash flow analyses, based on our current estimated incremental borrowing rates for similar types of borrowing arrangements. The carrying values of mandatorily redeemable securities are based on approximate fair values.

Subordinated Notes — Fair values are based on quoted market prices, where available. If quoted market prices are not available, fair values are estimated based on calculated market prices of comparable securities.

Off-Balance-Sheet Instruments — Contract and fair values for certain of our off-balance-sheet financial instruments (guarantees) are estimated based on fees currently charged to enter into similar agreements, taking into account the remaining terms of the agreements and the counterparties' credit standing.

Limitations — Fair value estimates are made at a specific point in time based on relevant market information and information about the financial instruments. Because no market exists for a significant portion of our financial instruments, fair value estimates are based on judgments regarding future expected loss experience, current economic conditions, risk characteristics of various financial instruments, and other such factors.

These estimates do not reflect any premium or discount that could result from offering for sale at one time our entire holdings of a particular financial instrument. These estimates are subjective in nature and require considerable judgment to interpret market data. Accordingly, the estimates presented herein are not necessarily indicative of the amounts we could realize in a current market exchange, nor are they intended to represent the fair value of 1st Source as a whole. The use of different market assumptions and/or estimation methodologies may have a material effect on the estimated fair value amounts. The fair value estimates presented herein are based on pertinent information available to management as of the respective balance sheet date. Although management is not aware of any factors that would significantly affect the estimated fair value amounts, such amounts have not been comprehensively revalued since the presentation dates, and therefore, estimates of fair value after the balance sheet date may differ significantly from the amounts presented herein.

Other significant assets, such as premises and equipment, other assets, and liabilities not defined as financial instruments, are not included in the above disclosures. Also, the fair value estimates for deposits do not include the

benefit that results from the low-cost funding provided by the deposit liabilities compared to the cost of borrowing funds in the market.

We have evaluated subsequent events through the date our financial statements were issued. We do not believe any subsequent events have occurred that would require further disclosure or adjustment to our financial statements.

ITEM 2.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Except for historical information contained herein, the matters discussed in this document express "forward-looking statements." Generally, the words "believe," "contemplate," "seek," "plan," "possible," "assume," "expect," "intend," "targeted," "remain," "estimate," "anticipate," "project," "will," "should," "indicate," "would," "may" and similar expressions indicate forward-looking statements. Those statements, including statements, projections, estimates or assumptions concerning future events or performance, and other statements that are other than statements of historical fact, are subject to material risks and uncertainties. We caution readers not to place undue reliance on any forward-looking statements, which speak only as of the date made. We may make other written or oral forward-looking statements from time to time. Readers are advised that various important factors could cause our actual results or circumstances for future periods to differ materially from those anticipated or projected in such forward-looking statements. Such factors include, but are not limited to, changes in law, regulations or U. S. generally accepted accounting principles; our competitive position within the markets we serve; increasing consolidation within the banking industry; unforeseen changes in interest rates; unforeseen changes in loan prepayment assumptions; unforeseen downturns in or major events affecting the local, regional or national economies or the industries in which we have credit concentrations; and other matters discussed in our filings with the SEC, including our Annual Report on Form 10-K for 2009, which filings are available from the SEC. We undertake no obligation to publicly update or revise any forward-looking statements.

The following management's discussion and analysis is presented to provide information concerning our financial condition as of March 31, 2010, as compared to December 31, 2009, and the results of operations for the three months ended March 31, 2010 and 2009. This discussion and analysis should be read in conjunction with our consolidated financial statements and the financial and statistical data appearing elsewhere in this report and our 2009 Annual Report.

FINANCIAL CONDITION

Our total assets at March 31, 2010, were \$4.45 billion, a decrease of \$96.99 million or 2.14% from December 31, 2009. Total loans and leases were \$3.11 billion, an increase of \$12.97 million or 0.42% from December 31, 2009. Fed funds sold and interest bearing deposits with other banks were \$71.14 million, a decrease of \$70.03 million or 49.61% from December 31, 2009. Total investment securities, available for sale were \$888.86 million which represented a decrease of \$12.78 million or 1.42% and total deposits were \$3.54 billion, a decrease of \$113.33 million or 3.10% over the comparable figures at the end of 2009.

Table of Contents

Nonperforming assets at March 31, 2010, were \$95.97 million, which was a decrease of \$5.04 million or 4.99% from the \$101.01 million reported at December 31, 2009. At March 31, 2010, nonperforming assets were 2.98% of net loans and leases compared to 3.15% at December 31, 2009.

Accrued income and other assets were as follows:

(Dollars in thousands)	March 31, 2010	December 31, 2009
Accrued income and other assets:		
Bank owned life insurance cash surrender value	\$51,853	\$51,342
Accrued interest receivable	16,112	16,187
Mortgage servicing assets	8,116	8,748
Other real estate	5,205	4,039
Former bank premises held for sale	2,363	2,490
Repossessions	9,886	10,165
All other assets	55,830	55,620
Total accrued income and other assets	\$149,365	\$148,591

CAPITAL

As of March 31, 2010, total shareholders' equity was \$579.06 million, up \$8.74 million or 1.53% from the \$570.32 million at December 31, 2009. In addition to net income of \$9.68 million, other significant changes in shareholders' equity during the first three months of 2010 included \$5.01 million of dividends paid and/or accrued. The accumulated other comprehensive income/(loss) component of shareholders' equity totaled \$6.50 million at March 31, 2010, compared to \$5.09 million at December 31, 2009. The increase in accumulated other comprehensive income/(loss) during 2010 was primarily a result of changes in unrealized gain/(loss) on securities in the available-for-sale portfolio. Our equity-to-assets ratio was 13.03% as of March 31, 2010, compared to 12.56% at December 31, 2009. Book value per common share rose to \$19.51 at March 31, 2010, from \$19.30 at December 31, 2009.

We declared and paid dividends per common share of \$0.15 during the first quarter of 2010. The trailing four quarters dividend payout ratio, representing dividends per common share divided by diluted earnings per common share, was 65.22%. The dividend payout is continually reviewed by management and the Board of Directors subject to the Corporation's capital and dividend policy.

The banking regulators have established guidelines for leverage capital requirements, expressed in terms of Tier 1 or core capital as a percentage of average assets, to measure the soundness of a financial institution. In addition, banking regulators have established risk-based capital guidelines for U.S. banking organizations. The actual capital amounts and ratios of 1st Source Corporation and 1st Source Bank as of March 31, 2010, are presented in the table below:

Table of Contents

(Dollars in thousands)	Actual		Minimum Capital Adequacy		To Be Well Capitalized Under Prompt Corrective Action Provisions	
	Amount	Ratio	Amount	Ratio	Amount	Ratio
Total Capital (to Risk-Weighted Assets):						
1st Source Corporation	\$613,281	18.01	% \$272,355	8.00	% \$340,444	10.00
1st Source Bank	575,730	16.99	271,154	8.00	338,943	10.00
Tier 1 Capital (to Risk-Weighted Assets):						
1st Source Corporation	569,444	16.73	136,178	4.00	204,266	6.00
1st Source Bank	532,766	15.72	135,577	4.00	203,366	6.00
Tier 1 Capital (to Average Assets):						
1st Source Corporation	569,444	12.96	175,818	4.00	219,772	5.00
1st Source Bank	532,766	12.17	175,050	4.00	218,813	5.00

LIQUIDITY AND INTEREST RATE SENSITIVITY

Effective liquidity management ensures that the cash flow requirements of depositors and borrowers, as well as the operating cash needs of 1st Source Corporation, are met. Funds are available from a number of sources, including the securities portfolio, the core deposit base, Federal Home Loan Bank borrowings, Federal Reserve Bank borrowings, and the capability to package loans for sale. Our loan to asset ratio was 69.88% at March 31, 2010 compared to 68.10% at December 31, 2009 and 69.87% at March 31, 2009. Cash and cash equivalents totaled \$53.52 million at March 31, 2010 compared to \$72.87 million at December 31, 2009 and \$60.44 million at March 31, 2009. At March 31, 2010, the consolidated statement of financial condition was rate sensitive by \$0.49 million more liabilities than assets scheduled to reprice within one year, or approximately 0.82%. Management believes that the present funding sources provide adequate liquidity to meet our cash flow needs.

RESULTS OF OPERATIONS

Net income for the three month period ended March 31, 2010 was \$9.68 million, compared to \$6.25 million for the same period in 2009. Diluted net income per common share was \$0.33 for the three month period ended March 31, 2010, compared to \$0.20 for the same period in 2009. Return on average common shareholders' equity was 6.82% for the three months ended March 31, 2010, compared to 4.31% in 2009. The return on total average assets was 0.88% for the three months ended March 31, 2010, compared to 0.56% in 2009.

The increase in net income for the three months ended March 31, 2010, over the first three months of 2009, was primarily the result of a decrease in provision for loan and leases losses and an increase in net interest income. This positive impact to net income was partially offset by an increase in income tax expense. Details of the changes in the various components of net income are discussed further below.

NET INTEREST INCOME

The taxable equivalent net interest income for the three months ended March 31, 2010 was \$35.78 million, an increase of 13.07% over the same period in 2009. The net interest margin on a fully taxable equivalent basis was 3.50% for the three months ended March 31, 2010, compared to 3.03% for the three months ended March 31, 2009.

During the three month period ended March 31, 2010, average earning assets decreased \$83.51 million or 1.97% over the comparable period in 2009. Average interest-bearing liabilities decreased \$113.35 million or 3.23% for the three month period ended March 31, 2010 over the comparable period one year ago. The yield on average earning assets decreased 3 basis points to 4.92% for the first quarter of 2010 from 4.95% for the first quarter of 2009. The rate earned on assets decreased due to the reduction in short-term market interest rates from a year ago. Total cost of average interest-bearing liabilities decreased 58 basis points to 1.73% for the first quarter 2010 from 2.31% for the first quarter 2009. The cost of interest-bearing liabilities was also affected by short-term market interest rate decreases. The result to the net interest margin, or the difference between interest income on earning assets and interest expense on interest-bearing liabilities, was an increase of 47 basis points for the three month period ended March 31, 2010 from March 31, 2009.

Table of Contents

The largest contributor to the decrease in the yield on average earning assets for the three months ended March 31, 2010, compared to the three months ended March 31, 2009, was a decline in the yield on average other investments, which include federal funds sold, time deposits with other banks, Federal Reserve Bank excess balances, Federal Reserve Bank and Federal Home Loan Bank stock and commercial paper, of 20 basis points. Total average investment securities increased \$114.21 million or 14.67% for the three month period over one year ago. Average mortgages held for sale decreased \$55.55 million or 72.92% for the three month period ended March 31, 2010, over the comparable period a year ago primarily due to a decrease in refinance activity. Average net loans and leases decreased \$144.90 million or 4.47% for the first quarter of 2010 from the first quarter of 2009.

Average interest-bearing deposits decreased \$54.63 million or 1.72% for the first quarter of 2010 over the same period in 2009. The effective rate paid on average interest-bearing deposits decreased 63 basis points to 1.61% for the first quarter 2010 compared to 2.24% for the first quarter 2009. The decline in the average cost of interest-bearing deposits during the first quarter of 2010 as compared to the first quarter of 2009 was primarily the result of decreases in interest rates offered on deposit products due to decreases in market interest rates.

Average short-term borrowings decreased \$56.97 million or 26.18% for the first quarter of 2010 compared to the same period in 2009. The decrease in average short-term borrowings was primarily due to lower repurchase agreements. Interest paid on short-term borrowings decreased 18 basis points for the first quarter of 2010 due to the interest rate decrease on adjustable rate borrowings. Average long-term debt decreased \$1.75 million or 8.00% during the first quarter of 2010 as compared to the first quarter of 2009.

Average demand deposits increased \$41.69 million during the first quarter of 2010, compared to the same period one year ago.

The following table provides an analysis of net interest income and illustrates the interest earned and interest expense charged for each major component of interest-earning assets and interest-bearing liabilities. Yields/rates are computed on a tax-equivalent basis, using a 35% rate. Nonaccrual loans and leases are included in the average loan and lease balance outstanding.

PROVISION AND RESERVE FOR LOAN AND LEASE LOSSES

The provision for loan and lease losses for the three month period ended March 31, 2010 was \$4.39 million, compared to a provision for loan and lease losses in the three month period ended March 31, 2009 of \$7.79 million. Net charge-offs of \$4.80 million were recorded for the first quarter 2010, compared to \$3.20 million for the same quarter a year ago.

On March 31, 2010, 30 day and over loan and lease delinquencies were 0.84% as compared to 1.84% on March 31, 2009. The change in delinquencies was primarily in auto and light trucks and aircraft. The reserve for loan and lease losses as a percentage of loans and leases outstanding at the end of the period was 2.83% as compared to 2.62% one year ago. A summary of loan and lease loss experience during the three month period ended March 31, 2010 and 2009 is provided below.

Summary of Reserve for Loan and Lease Losses
(Dollars in thousands)
Three Months Ended
March 31,

Ratio of net charge-offs/(recoveries) during period to average loans and leases outstanding	0.63	%	0.40	%

A loan or lease is considered impaired, based on current information and events, if it is probable that we will be unable to collect the scheduled payments of principal or interest when due according to the contractual terms of the loan or lease agreement. We evaluate loans and leases exceeding \$100,000 for impairment and establish an allowance as a component of the reserve for loan and lease losses when it is probable all amounts due will not be collected pursuant to the contractual terms of the loan and lease and the recorded investment in the loan or lease exceeds its fair value.

Edgar Filing: 1ST SOURCE CORP - Form 10-Q

As of March 31, 2010 and December 31, 2009, impaired loans and leases totaled \$73.63 million and \$80.54 million respectively, of which \$41.05 million and \$39.67 million had corresponding specific reserves for loan and lease losses totaling \$10.07 million and \$8.92 million, respectively. The remaining balances of impaired loans and leases had no specific reserves for loan and lease losses associated with them. As of March 31, 2010, a total of \$69.76 million of the impaired loans and leases were nonaccrual loans and leases.

- 26 -

Table of Contents

NONPERFORMING ASSETS

Nonperforming assets were as follows:

(Dollars in thousands)

	March 31, 2010	December 31, 2009	March 31, 2009
Loans and leases past due 90 days or more	\$ 272	\$ 628	\$ 678
Nonaccrual and restructured loans and leases	78,094	83,537	60,297
Other real estate	5,205	4,039	1,495
Former bank premises held for sale	2,363	2,490	3,356
Repossessions	9,886	10,165	2,919
Equipment owned under operating leases	150	154	373
Total nonperforming assets	\$ 95,970	\$ 101,013	\$ 69,118

Nonperforming assets totaled \$95.97 million at March 31, 2010, a decrease of 4.99% from the \$101.01 million reported at December 31, 2009, and a 38.85% increase from the \$69.12 million reported at March 31, 2009. The decrease during the first three months of 2010 compared to December 31, 2009 was primarily related to decreases in nonaccrual and restructured loans and leases. The increase during the first three months of 2010 compared to the same period in 2009 was primarily related to increases in nonaccrual and restructured loans and leases and repossessions.

The decrease in nonaccrual and restructured loans and leases at March 31, 2010 from December 31, 2009 was spread among the various loan portfolios except for increases in the medium and heavy duty truck and construction equipment portfolios. The largest dollar decreases during the most recent quarter occurred in the auto and light truck and aircraft portfolios.

As of March 31, 2010, the industry with the largest dollar exposure was with borrowers whose primary source of income was derived from commercial real estate. These loans totaled approximately \$25.90 million which were comprised of \$23.97 million secured by commercial real estate and included in loans secured by real estate and \$1.93 million secured by aircraft and included in aircraft financing. We have limited exposure to commercial real estate. However, our borrowers with commercial real estate exposure, whether they be local real estate developers in our commercial portfolio or customers in our niche portfolios such as aircraft whose underlying business is dependent on developing, marketing and managing real estate properties, have suffered as a result of declining real estate values and minimal sales activity. Furthermore, aircraft values declined during 2009, increasing the risk in aircraft secured transactions. Medium and heavy duty trucks are also a large exposure area for us. Medium and heavy duty trucks non-accrual loans and leases increased to \$15.27 million as of March 31, 2010, up from \$11.62 million as of December 31, 2009. The trucking industry has suffered from overcapacity, underutilization, aging fleets and declining collateral values which are expected to remain weak through 2011.

The increase in other real estate is due to foreclosing on well situated real estate in the local market for which we have a current appraisal and are well secured. The decrease in repossessions related primarily to aircraft. Nonperforming assets as a percentage of total loans and leases were 2.98% at March 31, 2010, 3.15% at December 31, 2009, and 2.09% at March 31, 2009.

Repossessions consisted mainly of aircraft and medium and heavy duty trucks at March 31, 2010. At the time of repossession, the recorded amount of the loan or lease is written down, if necessary, to the estimated value of the

equipment or vehicle by a charge to the reserve for loan and lease losses, unless the equipment is in the process of immediate sale. Any subsequent write-downs are included in noninterest expense.

- 27 -

Table of Contents

A loan is considered a restructured loan in cases where a borrower experiences financial difficulties and we make certain concessionary modifications to contractual terms. Loans restructured at a rate equal to or greater than that of a new loan with comparable risk at the time the contract is modified may be excluded from restructured loan disclosures after a period of six months if they are in compliance with the modified terms. Restructured loans that are accruing interest total \$16.53 million at March 31, 2010 and \$18.31 million at December 31, 2009. As of March 31, 2010 and December 31, 2009, there were no loans classified as troubled debt restructurings.

Supplemental Loan and Lease Information as of March 31, 2010

(Dollars in thousands)	Loans and leases outstanding	Nonaccrual and restructured loans	Other real estate owned and repossessions	Year-to-date net credit losses/ (recoveries)
Commercial and agricultural loans	\$ 546,826	\$ 6,840	\$ 146	\$ 2
Auto, light truck and environmental equipment	364,445	4,654	325	398
Medium and heavy duty truck	200,228	15,266	315	557
Aircraft financing	608,643	2,894	8,858	2,802
Construction equipment financing	303,866	8,262	195	502
Loans secured by real estate	977,667	40,075	5,205	552
Consumer loans	104,440	103	47	284
Total	\$ 3,106,115	\$ 78,094	\$ 15,091	\$ 5,097

For financial statement purposes, nonaccrual loans and leases are included in loan and lease outstandings, whereas repossessions and other real estate are included in other assets. Net credit losses include net charge-offs on loans and leases and valuation adjustments and gains and losses on disposition of repossessions and defaulted operating leases.

Foreign Outstandings — Our foreign loan and lease outstandings, all denominated in U.S. dollars were \$124.99 million and \$131.18 million as of March 31, 2010 and December 31, 2009, respectively. Foreign loans and leases are in aircraft financing. Loan and lease outstandings to borrowers in Brazil were \$87.20 million and \$87.66 million as of March 31, 2010 and December 31, 2009, respectively. Outstanding balances to borrowers in other countries were insignificant.

Table of Contents

NONINTEREST INCOME

Noninterest income for the three month period ended March 31, 2010 and 2009 was \$20.92 million and \$20.55 million, respectively. Details of noninterest income follow:

(Dollars in thousands)	Three Months Ended	
	March 31, 2010	2009
Noninterest income:		
Trust fees	\$3,745	\$3,804
Service charges on deposit accounts	4,620	4,746
Mortgage banking income	777	2,570
Insurance commissions	1,465	1,516
Equipment rental income	6,745	6,147
Other income	2,689	2,235
Investment securities and other investment gains (losses)	881	(469)
Total noninterest income	\$20,922	\$20,549

Noninterest income increased in all categories for the first quarter 2010 as compared to the same period in 2009 except trust fees, service charges on deposit accounts, mortgage banking income, and insurance commissions. Trust fees, service charges on deposits accounts, and insurance commissions declined slightly.

Mortgage banking income decreased \$1.79 million or 69.77% in the first quarter of 2010 as compared to the first quarter of 2009. The decrease was due to lower gains on the sales of mortgage loans as a result of reduced production volume. Equipment rental income generated from operating leases increased during the first three months of 2010 as compared to the first three months of 2009 due to an increase in the operating lease portfolio from one year ago.

Other income increased for the three month period ended March 31, 2010 as compared to the same period in 2009, mainly due to higher earnout fees on the sale of assets of 1st Source Investment Advisors related to the management of the 1st Source Monogram Funds and dividend income. The increase in investment securities and other investments gains (losses) of \$1.35 million or 287.85% was due to partnership gains and gain on sale of securities in the three months ended March 31, 2010 as compared to losses in the same period one year ago.

Table of Contents

NONINTEREST EXPENSE

Noninterest expense for the three month periods ended March 31, 2010 and 2009 was \$37.11 million and \$38.64 million, respectively. Details of noninterest expense follow:

(Dollars in thousands)	Three Months Ended	
	March 31, 2010	2009
Noninterest expense:		
Salaries and employee benefits	\$18,810	\$20,086
Net occupancy expense	2,487	2,601
Furniture and equipment expense	2,800	3,481
Depreciation - leased equipment	5,364	4,956
Professional fees	1,514	1,062
Supplies and communication	1,369	1,568
Business development and marketing expense	567	485
Intangible asset amortization	330	341
Loan and lease collection and repossession expense	1,106	559
FDIC and other insurance	1,674	1,550
Other expense	1,089	1,952
Total noninterest expense	\$37,110	\$38,640

During the first quarter of 2010, salaries and employee benefits decreased \$1.28 million or 6.35% compared to the first quarter of 2009. The decrease was primarily a result of lower base salaries due to fewer employees and higher deferred salaries. Furniture and equipment expense declined in the first quarter 2010 by \$0.68 million or 19.56% as compared to the same period in 2009. The decrease was primarily attributed to lower computer processing charges.

Leased equipment depreciation expense increased in conjunction with the increase in equipment rental income for the three months ended March 31, 2010 as compared to the same period in 2009.

Professional fees increased \$0.45 million or 42.56% for the three month period ended March 31, 2010 as compared to the three month period ended March 31, 2009. The increase in professional fees in 2010 is the result of higher consulting fees. Loan and lease collection and repossession expense increased \$0.55 million or 97.85% for the first quarter as compared to the same period in 2009 due to increased collection and repossession activity.

Other expense decreased \$0.86 million or 44.21% in the first quarter of 2010 from the first quarter of 2009. The decrease was the result of lower forgery and miscellaneous losses, higher gains on sale of equipment, and the reduction of finance lease valuation expense.

Net occupancy, supplies and communication, business development and marketing, intangible asset amortization, and FDIC and other insurance expense all changed slightly in 2010 over the same period in 2009.

INCOME TAXES

The provision(benefit) for income taxes for the three month period ended March 31, 2010 was \$4.65 million and \$(1.41) million for the same period in 2009. The effective tax rates were 32.44% and (28.99)% for the first quarter ended March 31, 2010 and 2009, respectively. The provision for income taxes for the three months ended March 31,

2009 included a one time benefit of \$2.60 million which resulted in the lower effective tax rate. This benefit was the result of a reduction in our tax contingency reserve due to the resolution of tax audits.

ITEM 3.

QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

There have been no material changes in market risks faced by 1st Source since December 31, 2009. For information regarding our market risk, refer to 1st Source's Annual Report on Form 10-K for the year ended December 31, 2009.

ITEM 4.

CONTROLS AND PROCEDURES

As of the end of the period covered by this report an evaluation was carried out, under the supervision and with the participation of our management, including the Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934) pursuant to Exchange Act Rule 13a-14. Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that, at March 31, 2010, our disclosure controls and procedures were effective in ensuring that information required to be disclosed by 1st Source in reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms and are designed to ensure that information required to be disclosed in those reports is accumulated and communicated to management as appropriate to allow timely decisions regarding required disclosure.

In addition, there were no changes in our internal control over financial reporting (as defined in Exchange Act Rule 13a-15(f)) during the first fiscal quarter of 2010 that have materially affected, or are reasonably likely to materially affect, our internal controls over financial reporting.

PART II. OTHER INFORMATION

ITEM 1. Legal Proceedings.

1st Source and its subsidiaries are involved in various legal proceedings incidental to the conduct of our businesses. Management does not expect that the outcome of any such proceedings will have a material adverse effect on our consolidated financial position or results of operations.

ITEM 1A. Risk Factors.

There have been no material changes in risks faced by 1st Source since December 31, 2009. For information regarding our risk factors, refer to 1st Source's Annual Report on Form 10-K for the year ended December 31, 2009.
