Old Second Reports First Quarter 2015 Net Income of \$3.5 million.

AURORA, IL, April 22, 2015 – Old Second Bancorp, Inc. (the “Company” or “Old Second”) (NASDAQ: OSBC), parent company of Old Second National Bank (the “Bank”), today announced financial results for the first quarter of 2015. The Company reported net income of \$3.5 million for the first quarter of 2015, compared to net income of \$2.2 million in the first quarter of 2014. The Company’s net income available to common stockholders of \$2.7 million, or \$0.09 per diluted share, for the quarter, compared to net income available to common stockholders of \$630,000, or \$0.04 per diluted share, in the first quarter of 2014.

Operating Results

· First quarter 2015 net income before taxes increased by \$2.0 million (or 59.4%) from the first quarter of 2014 and \$652,000 from the fourth quarter of 2014. When compared to first quarter of 2014, the quarter reflects flat net interest income after loan loss reserve release, improved non interest income and reduced non interest expense, most notably there was no core deposit intangible amortization expense in 2015 compared to \$512,000 in the first quarter 2014. The increase from the fourth quarter of 2014 was driven by sharply higher residential mortgage banking revenue and an 8.6% decrease in quarter to quarter noninterest expense. Noteworthy linked quarter expense decreases are found in expenses related to other real estate owned (“OREO”). First quarter 2015 net income available

to common stockholders of \$2.7 million compares to \$1.9 million for fourth quarter 2014 and \$630,000 for first quarter 2014. First quarter 2015 noninterest income of \$8.0 million was 26.1% higher than the \$6.3 million recorded in first quarter 2014. Further, 2015 reflects management actions taken last year and again in first quarter to redeem a portion of the outstanding preferred stock and in turn, dividends associated with those securities.

- Noninterest expenses of \$17.2 million were 2.1% lower in the first quarter compared to the first quarter 2014. Expenses declined across several expense lines, notably amortization of core deposit expense, and occupancy. First quarter expenses were down 8.6% compared to the fourth quarter 2014 as decreases in OREO expenses and FDIC insurance expense offset modest increases in selected other expense categories.
- On December 30, 2014, the Company provided notice that it was redeeming approximately one-third of the issued and outstanding shares of the Company's Fixed Rate Cumulative Perpetual Preferred Stock, Series B (the "Series B Preferred Stock"). The effective date for the redemption was January 31, 2015, and the redemption price was the stated liquidation value of \$1,000 per share, together with any accrued and unpaid dividends accumulated to, but excluding, the redemption date. As of December 30, 2014, there were 47,331 shares of the Series B Preferred Stock outstanding, and redeeming one-third of the Series B Preferred Stock resulted in the redemption of 15,778 shares of Series B Preferred Stock. The redemption was successfully completed in the quarter. As of March 31, 2015, 31,553 shares of the Series B Preferred Stock remain outstanding.

- As management has implemented opportunities to be more efficient in serving our customers and communities, staffing levels were evaluated. As a result, the full time equivalent number of employees was reduced by twenty-one in April of 2015.

Asset Quality & Earning Assets

- Nonperforming loans declined by \$3.7 million to \$23.4 million at March 31, 2015, from \$27.1 million at December 31, 2014. This same metric decreased \$15.2 million from March 31, 2014.
- OREO assets moved from \$32.0 million at December 31, 2014, and \$41.5 million at December 31, 2013, to \$35.5 million at March 31, 2015. Valuation writedowns continued with an expense of \$609,000 in the quarter.
- Loans decreased \$8.3 million since year end 2014. First quarter 2015 average loans increased by \$15.4 million from the fourth quarter of 2014 and \$52.6 million compared to the first quarter of last year.
- Securities held-to-maturity at amortized cost total \$257.3 million at March 31, 2015. The end of the first quarter of 2015 total compares to \$259.7 million held-to-maturity at year end 2014. March 31, 2015, available-for-sale securities at fair value totaled \$399.3 million, which is an increase from \$385.5 million at December 31, 2014.
- Management review of the loan portfolio concluded that neither a loan loss reserve release nor an additional provision for loan loss was appropriate in the first quarter.

1 Interest income from loans is shown on a tax equivalent basis as discussed in the table on page 13 and includes fees of \$486,000, \$572,000 and \$550,000 for the first quarter of 2015, the fourth quarter of 2014 and the first quarter of 2014, respectively. Nonaccrual loans are included in the above stated average balances.

Note: Tax equivalent basis is calculated using a marginal tax rate of 35%.

Edgar Filing: OLD SECOND BANCORP INC - Form 8-K

Net interest and dividend income on a linked quarter basis decreased \$544,000. Quarterly average earning assets increased \$22.6 million from the fourth quarter of 2014 for a total of \$1.83 billion while yield on earning assets declined. Management continued to emphasize asset quality in all securities purchases and the year over year quarterly average total securities increased a modest amount. Loan growth in each of the last four quarters, resulted in a year over year first quarter average loans increase of \$52.6 million. On a linked quarter basis, first quarter average earning assets reflected increases in both securities and loans.

Total noninterest income	\$ 7,973	\$ 7,091	\$ 6,321	12.4	26.1

As shown above, noninterest income experienced no significant linked quarter improvements in the first quarter except for residential mortgage banking revenue and other income. The Company experienced strong mortgage loan origination results in the quarter. The Bank saw mortgage originations reach the highest level in the last two years. Robust overall volumes, driven by refinancing volume, were up 57% from the fourth quarter. Other income includes a nonrecurring incentive payment of \$917,000 from a service provider in a long term mutually productive relationship with Old Second. Other income for the quarter also reflects the death benefit realized on a life insurance policy held by the Bank. Year over year noninterest income increased approximately 11% when the items noted above in 2015 are excluded.

The efficiency ratio shown in the table above is calculated as noninterest expense excluding core deposit intangible amortization and OREO expenses divided by the sum of net interest income on a fully tax equivalent basis, total noninterest income less net gains and losses on securities and with a tax equivalent adjustment on the increase in cash surrender value of bank-owned life insurance.

Noninterest expense decreased on a linked quarter basis primarily on lower FDIC expense, as well as reduced debit card interchange, legal and OREO expenses. Expenses were flat or down in the first quarter 2015 compared to the same period in 2014 for most categories, excluding total OREO expense, net. First quarter 2015 total noninterest expense was down from first quarter 2014. Excluding the benefit from the now fully amortized core deposit intangible asset, noninterest expense was essentially flat.

Modest first quarter loan production combined with seasonal reductions in demand resulted in a decrease of \$8.3 million in loans outstanding from the fourth quarter of 2014. Volume decreases for the quarter are seen in most portfolio segments, most notably in Commercial. Management continued to emphasize loan portfolio quality and transactions in our core market area that the Company expects will develop as long-term relationship opportunities. This approach also builds client relationships with core clientele, while leading to reduced portfolio runoff and potential long term business development beneficial to both the Company and the client.

Commercial relationship managers continue to focus on building the loan pipeline with opportunities after a long period of runoff. Management believes that the competitive landscape within the Chicago market is challenging and that it may remain so for a prolonged period.

The investment portfolio ended the first quarter of 2015 at \$656.6 million, an increase of \$11.4 million during the quarter. There were no purchases or sales to the held-to-maturity portion of the portfolio during the first quarter. First quarter available-for-sale purchases totaled \$69.7 million, which included \$30.4 million in asset-backed securities, \$12.8 million in collateralized mortgage obligations, and \$12.0 million in tax anticipation warrants. During the quarter there were sales of corporate bonds, collateralized mortgage obligations, collateralized loan obligations and asset backed securities totaling \$53.2 million.

Net realized losses on sales were \$109,000 during the first quarter of 2015 down from net realized gains of \$262,000 in the fourth quarter of 2014. Unrealized losses, net of deferred taxes, decreased \$690,000 during the quarter.

Nonperforming loans consist of nonaccrual loans, nonperforming restructured accruing loans and loans 90 days or greater past due but still accruing. Total nonperforming loans were \$23.4 million at March 31, 2015 and \$27.1 million at December 31, 2014.

Classified loans include nonaccrual, performing troubled debt restructurings and all other loans considered substandard which also decreased in the quarter as shown below. Management review of the loan portfolio concluded that neither a loan loss reserve release nor an additional loan loss provision was appropriate in the first quarter.

Management attention to credit quality continued as reflected in the nominal net charge-off experience illustrated above.

Deposits

Total deposits ended at \$1.74 billion on March 31, 2015. That amount reflects a sharp increase from deposits of \$1.69 billion at December 31, 2014. While time deposits or certificates of deposit continued to decline in first quarter, the rate of decline slowed when compared to the first quarter of 2014. Strong growth was seen in transaction deposit

accounts, most notably in noninterest bearing demand accounts, up \$31.4 million in first quarter. With only limited deposit building programs in place, management sees this growth as based on client choice.

Borrowings

The Company's borrowings at the Federal Home Loan Bank of Chicago (the "FHLBC") require the Bank to be a member and invest in the stock of the FHLBC. Total borrowings are generally limited to the lower of 35% of total assets or 60% of the book value of certain mortgage loans. As of December 31, 2014, the Bank had \$45.0 million outstanding under FHLBC advances compared to \$30.0 million outstanding in advances at March 31, 2015. After borrowing overnight funds under the advance program virtually every day in first quarter, management had eliminated advances outstanding in late March. Management then took a term advance of \$30.0 million on March 31, 2015 in anticipation that the funds would be needed and in recognition of the fact that the funds taken are beneficially priced under an FHLBC special offering.

The Company is also indebted on \$58.4 million of junior subordinated debentures related to the trust preferred securities issued by its two statutory trust subsidiaries, Old Second Capital Trust I and Old Second Capital Trust II. In April, 2014, the Company concluded a successful capital raise and used some of the capital raise

proceeds to pay interest accrued but previously unpaid on the trust preferred securities and, as of the date hereof, the Company continues to be current on the payments due on these securities.

The Company's total capital ratio (minimum 8.0% for adequately capitalized)	16.96	%
The Company's tier 1 leverage capital ratio (minimum 4.0% for adequately capitalized)	9.93	%

All ratios presented are based on the regulatory capital rules of Basel III, which took effect on January 1, 2015. As of March 31, 2015, the Bank's common equity tier 1 capital ratio of 16.91% and total capital ratio of 18.18% exceeded the minimum capital ratios to be deemed "well capitalized".

Non-GAAP Presentations: Management has traditionally disclosed certain non-GAAP ratios to evaluate and measure the Company's performance, including a net interest margin calculation. The net interest margin is calculated by dividing net interest income on a tax equivalent basis by average earning assets for the period. Management believes this measure provides investors with information regarding balance sheet profitability. Consistent with industry practice, management also disclosed other non-GAAP measures in the discussion immediately above and in the following tables. The tables provide a reconciliation of each non-GAAP measure to the most comparable GAAP equivalent.

Forward Looking Statements: This report may contain forward-looking statements. Forward looking statements are identifiable by the inclusion of such qualifications as expects, intends, believes, may, likely or other indications that the particular statements are not based upon facts but are rather based upon the Company's beliefs as of the date of this release. Actual events and results may differ significantly from those described in such forward-looking statements, due to changes in the economy, interest rates or other factors. Additionally, all statements in this document, including forward-looking statements, speak only as of the date they are made, and the Company undertakes no obligation to update any statement in light of new information or future events. For additional information concerning the Company and its business, including other factors that could materially affect the Company's financial results or cause actual results to differ substantially from those discussed or implied in forward looking statements contained in this release, please review our filings with the Securities and Exchange Commission.
