Trustmark Corporation and Subsidiaries Notes to Consolidated Financial Statements (Unaudited)

Note 1 - Business, Basis of Financial Statement Presentation and Principles of Consolidation

Trustmark Corporation (Trustmark) is a multi-bank holding company headquartered in Jackson, Mississippi. Through its subsidiaries, Trustmark operates as a financial services company providing banking and financial solutions to corporate institutions and individual customers through over 150 offices in Florida, Mississippi, Tennessee and Texas.

The consolidated financial statements in this quarterly report on Form 10-Q include the accounts of Trustmark and all other entities in which Trustmark has a controlling financial interest. All significant intercompany accounts and transactions have been eliminated in consolidation.

The accompanying unaudited condensed consolidated financial statements have been prepared in conformity with U.S. generally accepted accounting principles (GAAP) for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by U.S. GAAP for complete financial statements and should be read in conjunction with the consolidated financial statements, and notes thereto, included in Trustmark's 2009 annual report on Form 10-K.

Operating results for the interim periods disclosed herein are not necessarily indicative of the results that may be expected for a full year or any future period. Certain reclassifications have been made to prior period amounts to conform to the current period presentation. In the opinion of Management, all adjustments (consisting of normal recurring accruals) considered necessary for the fair presentation of these consolidated financial statements have been included. The preparation of financial statements in conformity with these accounting principles requires Management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and income and expense during the reporting period and the related disclosures. Although Management's estimates contemplate current conditions and how they are expected to change in the future, it is reasonably possible that in 2010 actual conditions could vary from those anticipated, which could affect our results of operations and financial condition. The allowance for loan losses, the valuation of other real estate, the fair value of mortgage servicing rights, the valuation of goodwill and other identifiable intangibles and the fair values of financial instruments are particularly subject to change.

Note 2 – Securities Available for Sale and Held to Maturity

The following table is a summary of the amortized cost and estimated fair value of securities available for sale and held to maturity (\$ in thousands):

TUIAI	φ	105,950	φ	(1,930)	φ	0,470	Φ	(299)	φ	190,420	Φ	(2,229))

Declines in the fair value of held-to-maturity and available-for-sale securities below their cost that are deemed to be other than temporary are reflected in earnings as realized losses to the extent the impairment is related to credit losses. The amount of the impairment related to other factors is recognized in other comprehensive income. In estimating other-than-temporary impairment losses, Management considers, among other things, the length of time and the extent to which the fair value has been less than cost, the financial condition and near-term prospects of the issuer and the intent and ability of Trustmark to hold the security for a period of time sufficient to allow for any anticipated recovery in fair value. The unrealized losses shown above are primarily due to increases in market rates over the yields available at the time of purchase of the underlying securities and not credit quality. Because Trustmark does not

intend to sell these securities and it is more likely than not that Trustmark will not be required to sell the investments before recovery of their amortized cost bases, which may be maturity, Trustmark does not consider these investments to be other-than-temporarily impaired at September 30, 2010.

Security Gains and Losses

Gains and losses as a result of calls and dispositions of securities were as follows (\$ in thousands):

	Three Months Ended September 30,				Nine Months Ended Septe 30,				•
Available for Sale		2010		2009		2010	,	2009	
Proceeds from									
sales of securities	\$	-	\$	30,572	\$	65,074	\$	188,460)
Gross realized									
gains		-		999		2,216		5,379	
Gross realized									
(losses)		-		-		-		(10)
Held to Maturity									
Proceeds from									
calls of securities	\$	1,210	\$	3,333	\$	4,960	\$	8,338	
Gross realized									
gains		4		15		12		79	

Realized gains and losses are determined using the specific identification method and are included in noninterest income as securities gains, net.

Contractual Maturities

The amortized cost and estimated fair value of securities available for sale and held to maturity at September 30, 2010, by contractual maturity, are shown below (\$ in thousands). Expected maturities may differ from contractual maturities because borrowers may have the right to call or prepay obligations with or without prepayment penalties.

	Securities Available for Sale		Securities Held to Maturity	
	Availabl		Held to	2

Total	\$1,901,207	\$1,968,624	\$168,849	\$175,744

Note 3 - Loans and Allowance for Loan Losses

For the periods presented, loans consisted of the following (\$ in thousands):

	September 30, 2010	December 31, 2009
Real estate loans:		
Construction, land development and other land loans	\$615,554	\$830,069
Secured by 1-4 family residential properties	1,672,199	1,650,743
Secured by nonfarm, nonresidential properties	1,531,953	1,467,307
Other real estate secured	203,931	197,421
Commercial and industrial loans	1,016,292	1,059,164
Consumer loans	444,927	606,315
Other loans	513,848	508,778
Loans	5,998,704	6,319,797
Less allowance for loan losses	94,458	103,662
Net loans	\$5,904,246	\$6,216,135

Trustmark does not have any loan concentrations other than those reflected in the preceding table, which exceed 10% of total loans. At September 30, 2010, Trustmark's geographic loan distribution was concentrated primarily in its Florida, Mississippi, Tennessee and Texas markets. A substantial portion of construction, land development and other land loans are secured by real estate in markets in which Trustmark is located. Accordingly, the ultimate collectability of a substantial portion of these loans and the recovery of a substantial portion of the carrying amount of other real estate owned, are susceptible to changes in market conditions in these areas.

Changes in the allowance for loan losses were as follows for the periods presented (\$ in thousands):

Nine Months Ended September 30,

	2010	2009	
Beginning balance	\$103,662	\$94,922	
Loans charged-off	(56,014) (60,572)
Recoveries	9,058	9,263	
Net charge-offs	(46,956) (51,309)
Provision for loan losses	37,752	59,403	
Balance at end of period	\$94,458	\$103,016	

At September 30, 2010 and December 31, 2009, the carrying amounts of nonaccrual loans, which are considered for impairment analysis, were \$159.3 million and \$141.2 million, respectively. When a loan is deemed impaired, the full difference between the carrying amount of the loan and the most likely estimate of the asset's fair value less estimated cost of disposition, is charged-off. At September 30, 2010 and December 31, 2009, specifically evaluated impaired loans totaled \$94.5 million and \$74.2 million, respectively. The allowance for loan losses included a specific reserve for impaired loans of \$3.0 million and \$3.2 million at September 30, 2010 and December 31, 2009, respectively. Specific charge-offs related to impaired loans totaled \$26.9 million and \$22.6 million while the provisions charged to net income totaled \$9.6 million and \$15.5 million for the first nine months of 2010 and 2009, respectively.

At September 30, 2010 and December 31, 2009, nonaccrual loans, not specifically impaired and written down to fair value less cost to sell, totaled \$64.8 million and \$67.0 million, respectively. In addition, these nonaccrual loans had allocated allowance for loan losses of \$8.4 million and \$10.0 million at the end of the respective periods. No material interest income was recognized in the income statement on impaired or nonaccrual loans for the periods ended September 30, 2010 and December 31, 2009.

Loans past due 90 days or more totaled \$56.0 million and \$55.6 million at September 30, 2010 and December 31, 2009, respectively. Included in these amounts are \$50.2 million and \$46.7 million, respectively, of serviced loans eligible for repurchase, which are fully guaranteed by GNMA. GNMA optional repurchase programs allow financial institutions to buy back individual delinquent mortgage loans that meet certain criteria from the securitized loan pool for which the institution provides servicing. At the servicer's option and without GNMA's prior authorization, the servicer may repurchase such a delinquent loan for an amount equal to 100 percent of the remaining principal balance of the loan. This buy-back option is considered a conditional option until the delinquency criteria are met, at which time the option becomes unconditional. When Trustmark is deemed to have regained effective control over these loans under the unconditional buy-back option, the loans can no longer be reported as sold and must be brought back onto the balance sheet as loans held for sale, regardless of whether Trustmark intends to exercise the buy-back option. These loans are reported as held for sale with the offsetting liability being reported as short-term borrowings. At September 30, 2010 and December 31, 2009, Trustmark has not exercised their buy-back option on any delinquent loans serviced for GNMA.

Note 4 – Mortgage Banking

Trustmark recognizes as assets the rights to service mortgage loans based on the estimated fair value of the mortgage servicing rights (MSR) when loans are sold and the associated servicing rights are retained. Trustmark also incorporates a hedging strategy, which utilizes a portfolio of derivative instruments to achieve a return that would substantially offset the changes in fair value of MSR attributable to interest rates. Changes in the fair value of these derivative instruments are recorded in noninterest income in mortgage banking, net and are offset by changes in the fair value of MSR.

The fair value of MSR is determined using discounted cash flow techniques benchmarked against third-party valuations. Estimates of fair value involve several assumptions, including the key valuation assumptions about market expectations of future prepayment rates and discount rates. Prepayment rates are projected using an industry standard prepayment model. The model considers other key factors, such as a wide range of standard industry assumptions tied to specific portfolio characteristics such as remittance cycles, escrow payment requirements, geographic factors, foreclosure loss exposure, VA no-bid exposure, delinquency rates and cost of servicing, including base cost and cost to service delinquent mortgages. Prevailing market conditions at the time of analysis are factored into the accumulation of assumptions and determination of servicing value.

Trustmark utilizes a portfolio of exchange-traded derivative instruments, such as Treasury note futures contracts and exchange-traded option contracts, to achieve a fair value return that offsets the changes in fair value of MSR attributable to interest rates. These transactions are considered freestanding derivatives that do not otherwise qualify for hedge accounting. Changes in the fair value of these exchange-traded derivative instruments, including administrative costs, are recorded in noninterest income in mortgage banking, net and are offset by the changes in the fair value of MSR. The MSR fair value represents the effect of present value decay and the effect of changes in interest rates. Ineffectiveness of hedging the MSR fair value is measured by comparing the total hedge cost to the changes in the fair value of the MSR asset attributable to interest rate changes. The impact of this strategy resulted in a net positive ineffectiveness of \$7.6 million for the nine months ended September 30, 2010, as opposed to a net negative ineffectiveness of \$431 thousand experienced for the same period in 2009. The switch to net positive ineffectiveness during 2010 is primarily caused by the spread widening between the primary mortgage rates and the

10-year Treasury note yield when compared to 2009. The accompanying table shows that the MSR value decreased \$14.8 million for the nine months ended September 30, 2010 largely due to higher prepayment expectations resulting from a decline in mortgage rates. More than offsetting the MSR change is a \$22.4 million increase in the value of derivative instruments primarily due to a decline in the 10-year Treasury note yield.

The activity in MSR is detailed in the table below (\$ in thousands):

		onths Ended mber 30,
	2010	2009
Balance at beginning of period	\$50,513	\$42,882
Origination of servicing assets	12,752	20,762
Disposals of mortgage loans sold serviced released	(1,681) (4,151)
Change in fair value:		
Due to market changes	(14,813) 3,897
Due to runoff	(4,799) (7,348)
Balance at end of period	\$41,972	\$56,042

Note 5 – Other Real Estate

Other real estate owned is recorded at the lower of cost or estimated fair value less the estimated cost of disposition. Fair value is based on independent appraisals and other relevant factors. Valuation adjustments required at foreclosure are charged to the allowance for loan losses.

For the periods presented, changes and losses, net on other real estate were as follows (\$ in thousands):

		onths Ended ember 30,	
	2010	2009	
Balance at beginning of period	\$90,095	\$38,566	
Additions	51,213	53,473	
Disposals	(41,322) (14,118)
Writedowns	(15,264) (6,232)
Balance at end of period	\$84,722	\$71,689	
Losses, net on the sale of other real			
estate included in other expenses	\$(401) \$(598)

Other real estate by type of property consisted of the following for the periods presented (\$ in thousands):

	September 30, 2010	December 31, 2009
Construction, land development and other land properties	\$62,723	\$60,276
1-4 family residential properties	12,854	11,001
Nonfarm, nonresidential properties	7,457	7,285
Other real estate properties	1,688	11,533
Total other real estate	\$84,722	\$90,095

Other real estate by geographic location consisted of the following for the periods presented (\$ in thousands):

September	December
30,	31,
2010	2009

Florida	\$31,665	\$45,927
Mississippi (1)	24,548	22,373
Tennessee (2)	16,456	10,105
Texas	12,053	11,690
Total other real estate	\$84,722	\$90,095

(1) - Mississippi includes Central and Southern Mississippi Region

(2) - Tennessee includes Memphis, Tennessee and Northern Mississippi Region

Note 6 – Deposits

Deposits consisted of the following for the periods presented (\$ in thousands):

	September	December
	30,	31,
	2010	2009
Noninterest-bearing demand deposits	\$1,709,311	\$1,685,187
Interest-bearing demand	1,238,205	1,261,181
Savings	1,873,341	1,821,366
Time	2,204,479	2,420,731
Total	\$7,025,336	\$7,188,465

Note 7 - Defined Benefit and Other Postretirement Benefits

Capital Accumulation Plan

Trustmark maintains a noncontributory defined benefit pension plan (Trustmark Capital Accumulation Plan), which covers substantially all associates employed prior to January 1, 2007. The plan provides retirement benefits that are based on the length of credited service and final average compensation, as defined in the plan and vest upon three years of service. In an effort to control expenses, the Board voted to freeze plan benefits effective May 15, 2009. Individuals will not earn additional benefits, except for interest as required by the IRS regulations, after the effective date. Associates will retain their previously earned pension benefits.

The following table presents information regarding the plan's net periodic benefit cost for the periods presented (\$ in thousands):

	Three Months Ended September 30,			Months Ended otember 30,	
	2010	2009	2010	2009	
Net periodic benefit cost (income)					
Service cost	\$138	\$98	\$412	\$294	
Interest cost	1,194	1,210	3,583	3,628	
Expected return on plan assets	(1,481) (352) (4,444) (4,526)
Amortization of prior service credits	-	-	-	(127)
Curtailment gain	-	-	-	(1,886)
Recognized net actuarial loss	849	(438) 2,548	2,154	
Net periodic benefit cost (income)	\$700	\$518	\$2,099	\$(463)

The acceptable range of contributions to the plan is determined each year by the plan's actuary. Trustmark's policy is to fund amounts allowable for federal income tax purposes. The actual amount of the contribution will be determined based on the plan's funded status and return on plan assets as of the measurement date, which is December 31. For 2010, Trustmark's minimum required contribution is expected to be zero, however, in July 2010, Trustmark made a voluntary contribution of \$1.9 million to improve the funded status of the plan. For 2009, the minimum required contribution was zero.

Supplemental Retirement Plan

Trustmark maintains a nonqualified supplemental retirement plan covering directors who elect to defer fees and covered salary for key executive officers and senior officers. Effective March 1, 2010, the directors could no longer make future deferrals into the plan and their vested benefits were frozen. The plan provides for retirement benefits based on a participant's deferred fees and/or covered salary. Trustmark has acquired life insurance contracts on the participants covered under the plan, which may be used to fund future payments under the plan. The measurement date for the plan is December 31. The following table presents information regarding the plan's net periodic benefit cost for the periods presented (\$ in thousands):

	Three months ended September 30,			onths ended ember 30,
	2010	2009	2010	2009
Net periodic benefit cost				
Service cost	\$190	\$226	\$567	\$678
Interest cost	561	552	1,682	1,656
Amortization of prior service cost	38	37	114	111
Recognized net actuarial loss	88	59	266	178
Net periodic benefit cost	\$877	\$874	\$2,629	\$2,623

Note 8 – Stock and Incentive Compensation Plans

Trustmark has granted, and currently has outstanding, stock and incentive compensation awards subject to the provisions of the 1997 Long Term Incentive Plan (the 1997 Plan) and the 2005 Stock and Incentive Compensation Plan (the 2005 Plan). New awards have not been issued under the 1997 Plan since it was replaced by the 2005 Plan. The 2005 Plan is designed to provide flexibility to Trustmark regarding its ability to motivate, attract and retain the services of key associates and directors. The 2005 Plan allows Trustmark to make grants of nonqualified stock options, incentive stock options, stock appreciation rights, restricted stock, restricted stock units and performance units to key associates and directors.

Stock Option Grants

Stock option awards under the 2005 Plan are granted with an exercise price equal to the market price of Trustmark's stock on the date of grant. Stock options granted under the 2005 Plan vest 20% per year and have a contractual term of seven years. Stock option awards, which were granted under the 1997 Plan, had an exercise price equal to the market price of Trustmark's stock on the date of grant, vested equally over four years with a contractual ten-year term. Compensation expense for stock options granted under these plans is estimated using the fair value of each option granted using the Black-Scholes option-pricing model and is recognized on the straight-line method over the requisite service period. During the first nine months of 2010 and 2009, there were no grants of stock option awards.

Restricted Stock Grants

Performance Awards

Trustmark's performance awards are granted to Trustmark's executive and senior management team, as well as Trustmark's Board of Directors. Performance awards granted vest based on performance goals of return on average tangible equity (ROATE) or return on average equity (ROAE) and total shareholder return (TSR) compared to a defined peer group. Awards based on TSR are valued utilizing a Monte Carlo simulation to estimate fair value of the awards at the grant date, while ROATE and ROAE awards are valued utilizing the fair value of Trustmark's stock at the grant date based on the estimated number of shares expected to vest. The restriction period for performance awards covers a three-year vesting period. These awards are recognized on the straight-line method over the requisite service period. These awards provide for excess time-vested shares, if performance measures exceed 100%. Any excess time-vested shares granted are restricted for an additional three-year vesting period. The restricted share agreement provides for voting rights and dividend privileges.

On January 26, 2010, Trustmark awarded 55,787 shares of performance based restricted stock to key members of its executive management team. The performance based restricted stock issued on January 16, 2007, vested on December 31, 2009. On February 22, 2010, the stock related to this grant was issued to the participants free of restriction. As a result of achieving 100% of ROATE and 100% of TSR related to the performance goals during the performance

period, 73,000 excess time-vested restricted shares were awarded and will vest at December 31, 2012.

Time-Vested Awards

Trustmark's time-vested awards are granted in both employee recruitment and retention and are restricted for thirty-six months from the award dates. Time-vested awards are valued utilizing the fair value of Trustmark's stock at the grant date. These awards are recognized on the straight-line method over the requisite service period. During the first nine months of 2010, Trustmark awarded 73,605 shares of time-vested restricted stock to key members of its management team and board of directors.

Performance-Based Restricted Stock Unit Award

On January 27, 2009, Trustmark's Chairman and CEO was granted a cash-settled performance-based restricted stock unit award (the RSU award) for 23,123 units, with each unit having the value of one share of Trustmark's common stock. This award was granted in connection with an employment agreement dated November 20, 2008, that provides for in lieu of receiving an equity compensation award in 2010 or 2011, the 2009 equity compensation award to be twice the amount of a normal award, with one-half of the award being performance-based and one-half service-based. The RSU award was granted outside of the 2005 Plan in lieu of granting shares of performance-based restricted stock that would exceed the annual limit permitted to be granted under the 2005 Plan, in order to satisfy the equity compensation provisions of the employment agreement. Compensation expense for the RSU award is based on the fair value of Trustmark's stock at the end of each reporting period.

The following table presents information regarding compensation expense for stock and incentive plans for the periods presented (\$ in thousands):

	Three months ended September 30,			onths ended ember 30,
	2010	2009	2010	2009
Compensation expense - Stock and Incentive plans:				
Stock option-based awards	\$78	\$193	\$355	\$535
Performance awards	453	468	1,362	1,396
Time-vested awards	636	587	1,970	1,482
RSU award (share price: \$21.74 - 2010, \$19.05 - 2009)	166	94	490	282
Total stock and incentive plan compensation expense	\$1,333	\$1,342	\$4,177	\$3,695

Note 9 – Contingencies

Lending Related

Letters of credit are conditional commitments issued by Trustmark to insure the performance of a customer to a third party. Trustmark issues financial and performance standby letters of credit in the normal course of business in order to fulfill the financing needs of its customers. A financial standby letter of credit irrevocably obligates Trustmark to pay a third-party beneficiary when a customer fails to repay an outstanding loan or debt instrument. A performance standby letter of credit irrevocably obligates Trustmark to pay a third-party beneficiary when a customer fails to repay an outstanding loan or debt instrument. A performance standby letter of credit irrevocably obligates Trustmark to pay a third-party beneficiary when a customer fails to perform some contractual, nonfinancial obligation. When issuing letters of credit, Trustmark uses essentially the same policies regarding credit risk and collateral, which are followed in the lending process. At September 30, 2010 and 2009, Trustmark's maximum exposure to credit loss in the event of nonperformance by the other party for letters of credit was \$186.0 million and \$179.2 million, respectively. These amounts consist primarily of commitments with maturities of less than three years, which have an immaterial carrying value. Trustmark holds collateral to support standby letters of credit when deemed necessary. As of September 30, 2010, the fair value of collateral held was \$57.3 million.

Legal Proceedings

Trustmark's wholly-owned subsidiary, Trustmark National Bank (TNB), has been named as a defendant in a purported class action complaint that was filed on August 23, 2009 in the District Court of Harris County, Texas, by Peggy Roif Rotstain, Guthrie Abbott, Catherine Burnell, Steven Queyrouze, Jaime Alexis Arroyo Bornstein and Juan C. Olano, on behalf of themselves and all others similarly situated, naming TNB and four other financial institutions unaffiliated with the Company as defendants. The complaint seeks to recover (i) alleged fraudulent transfers from each of the

defendants in the amount of fees received by each defendant from entities controlled by R. Allen Stanford (collectively, the "Stanford Financial Group") and (ii) damages allegedly attributable to alleged conspiracies by one or more of the defendants with the Stanford Financial Group to commit fraud and/or aid and abet fraud arising from the facts set forth in pending federal criminal indictments and civil complaints against Mr. Stanford, other individuals and the Stanford Financial Group. Plaintiffs have demanded a jury trial. In November 2009, the lawsuit was removed to federal court by certain defendants and then transferred by the United States Panel on Multidistrict Litigation to federal court in the Northern District of Texas (Dallas) where multiple Stanford related matters are being consolidated for pre-trial proceedings. In May 2010, all defendants (including TNB) filed motions to dismiss the lawsuit.

TNB's relationship with the Stanford Financial Group began as a result of Trustmark's acquisition of a Houston-based bank in August 2006, and consisted of correspondent banking and other traditional banking services in the ordinary course of business. The lawsuit is in its preliminary stages and has been previously reported in the press. Trustmark believes that the lawsuit is entirely without merit and intends to defend vigorously against it.

Trustmark and its subsidiaries are also parties to other lawsuits and other claims that arise in the ordinary course of business. Some of the lawsuits assert claims related to the lending, collection, servicing, investment, trust and other business activities, and some of the lawsuits allege substantial claims for damages. The cases are being vigorously contested. In the regular course of business, Management evaluates estimated losses or costs related to litigation, and provision is made for anticipated losses whenever Management believes that such losses are probable and can be reasonably estimated. At the present time, Management believes, based on the advice of legal counsel and Management's evaluation, that the final resolution of pending legal proceedings will not have a material impact on Trustmark's consolidated financial position or results of operations; however, Management is unable to estimate a range of potential loss on these matters because of the nature of the legal environment in states where Trustmark conducts business.

Note 10 – Earnings Per Share

Basic earnings per share (EPS) is computed by dividing net income available to common shareholders by the weighted-average shares of common stock outstanding. Diluted EPS is computed by dividing net income available to common shareholders by the weighted-average shares of common stock outstanding, adjusted for the effect of potentially dilutive stock awards outstanding during the period. Weighted-average antidilutive stock awards for the nine months ended September 30, 2010 and 2009 totaled 1.26 million and 1.58 million, respectively, and accordingly, were excluded in determining diluted earnings per share. The following table reflects weighted-average shares used to calculate basic and diluted EPS for the periods presented (in thousands):

		onths Ended nber 30,	Nine Months Ended September 30,		
	2010 2009		2010	2009	
Basic shares	63,886	57,431	63,834	57,396	
Dilutive shares	181	128	182	100	
Diluted shares	64,067	57,559	64,016	57,496	

Note 11 - Statements of Cash Flows

For purposes of reporting cash flows, cash and cash equivalents include cash on hand and amounts due from banks. The following table reflects specific transaction amounts for the periods presented (\$ in thousands):

	Nine Mo	onths Ended
	Septe	mber 30,
	2010	2009
Income taxes paid	\$39,291	\$44,640
Interest expense paid on deposits and borrowings	46,192	72,280
Noncash transfers from loans to foreclosed properties	51,213	53,473
Transfer of long-term FHLB advance to short-term	75,000	-

Note 12 - Shareholders' Equity

Common Stock Offering

On December 7, 2009, Trustmark completed a public offering of 6,216,216 shares of its common stock, including 810,810 shares issued pursuant to the exercise of the underwriters' over-allotment option, at a price of \$18.50 per share. Trustmark received net proceeds of approximately \$109.3 million after deducting underwriting discounts, commissions and offering expenses. Proceeds from this offering were used in the redemption of preferred stock

discussed below.

Repurchase of Preferred Stock

On November 21, 2008, Trustmark issued 215,000 shares of Fixed Rate Cumulative Perpetual Preferred Stock, Series A, (Senior Preferred Stock) to the U.S. Treasury (Treasury) in a private placement transaction as part of the Troubled Assets Relief Program Capital Purchase Program (TARP CPP), a voluntary initiative for healthy U.S. financial institutions. As part of its participation in the TARP CPP, Trustmark also issued to the Treasury a ten-year warrant (the Warrant) to purchase up to 1,647,931 shares of Trustmark's common stock, at an initial exercise price of \$19.57 per share, subject to customary anti-dilution adjustments.

On December 9, 2009, Trustmark completed the repurchase of its 215,000 shares of Senior Preferred Stock from the Treasury at a purchase price of \$215.0 million plus a final accrued dividend of \$716.7 thousand. The repurchase of the Senior Preferred Stock resulted in a one-time, non-cash charge of approximately \$8.2 million to net income available to common shareholders in Trustmark's fourth quarter financial statements for the unaccreted discount recorded at the date of issuance of the Senior Preferred Stock. In addition, on December 30, 2009, Trustmark repurchased in full from the Treasury, the Warrant to purchase 1,647,931 shares of Trustmark's common stock, which was issued to the Treasury pursuant to the TARP CPP. The purchase price paid by Trustmark to the Treasury for the Warrant was its fair value of \$10.0 million.

Regulatory Capital

Trustmark and TNB are subject to minimum capital requirements, which are administered by various federal regulatory agencies. These capital requirements, as defined by federal guidelines, involve quantitative and qualitative measures of assets, liabilities and certain off-balance sheet instruments. Failure to meet minimum capital requirements can initiate certain mandatory and possibly additional, discretionary actions by regulators that, if undertaken, could have a direct material effect on the financial statements of Trustmark and TNB. As of September 30, 2010, Trustmark and TNB have exceeded all of the minimum capital standards for the parent company and its primary banking subsidiary as established by regulatory requirements. In addition, TNB has met applicable regulatory guidelines to be considered well-capitalized at September 30, 2010. To be categorized in this manner, TNB must maintain minimum total risk-based, Tier 1 risk-based and Tier 1 leverage ratios as set forth in the accompanying table. There are no significant conditions or events that have occurred since September 30, 2010, which Management believes have affected TNB's present classification.

Trustmark's and TNB's actual regulatory capital amounts and ratios are presented in the table below (\$ in thousands):

	Actual Regulatory Capital		Regulatory Capital Capital Required			Minimum Regulatory Provision to be Well-Capitalized				
At September 30, 2010: Total Capital (to Risk Weighted Assets)	Amount	Ratio		Amount	Ratio		Amount	Ratio

Accumulated Other Comprehensive Income (Loss)

The following table presents the components of accumulated other comprehensive income (loss) and the related tax effects allocated to each component for the periods ended September 30, 2010 and 2009 (\$ in thousands):

			I	Accumulate Other	ed	
	Before-Tax Tax Amount Effect			Comprehensiv Income (Loss		
Balance, January 1, 2010	\$(2,596) \$972		(1,624)	
Unrealized holding gains on AFS arising during period	17,711	(6,774)	10,937		
Adjustment for net gains realized in net income	(2,228) 852		(1,376)	
Pension and other postretirement benefit plans	2,771	(1,060)	1,711		
Balance, September 30, 2010	\$15,658	\$(6,010) \$	9,648		
Balance, January 1, 2009	\$(23,800) \$9,083	\$	(14,717)	
Unrealized holding gains on AFS arising during period	32,366	(12,380)	19,986		
Adjustment for net gains realized in net income	(5,448) 2,084		(3,364)	
Pension and other postretirement benefit plans	1,890	(723)	1,167		
Balance, September 30, 2009	\$5,008	\$(1,936) \$	3,072		

Note 13 - Other Noninterest Expense

Other noninterest expense consisted of the following for the periods presented (\$ in thousands):

	Tł	Three Months Ended September 30,			Nine Months Ended September 30,				September	
		2010			2009		2010			2009
FDIC assessment expense	\$	3,037		\$	2,913	\$	9,219		\$	12,943
ORE/Foreclosure expense:										
Writedowns		7,323			4,466		15,264			6,232
Carrying costs		1,405			1,405		5,803			3,002
Other expense		8,598			8,731		25,451			25,653
Total other expense	\$	20,363		\$	17,515	\$	55,737		\$	47,830

Note 14 - Fair Value

Fair Value Measurements

FASB ASC Topic 820, "Fair Value Measurements and Disclosures," defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles, and requires certain disclosures about fair value measurements. The fair value of an asset or liability is the price that would be received to sell that asset or paid to transfer that liability in an orderly transaction occurring in the principal market (or most advantageous market in the absence of a principal market) for such asset or liability. Depending on the nature of the asset or liability, Trustmark uses various valuation techniques and assumptions when estimating fair value. Inputs to valuation techniques include the assumptions that market participants would use in pricing an asset or liability. FASB ASC Topic 820 establishes a fair value hierarchy for valuation inputs that gives the highest priority to quoted prices in active markets for identical

assets or liabilities and the lowest priority to unobservable inputs. The fair value hierarchy is as follows:

Level 1 Inputs – Valuation is based upon quoted prices (unadjusted) in active markets for identical assets or liabilities that Trustmark has the ability to access at the measurement date.

Level 2 Inputs – Valuation is based upon quoted prices in active markets for similar assets or liabilities, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the asset or liability such as interest rates, yield curves, volatilities and default rates and inputs that are derived principally from or corroborated by observable market data.

Level 3 Inputs – Unobservable inputs reflecting the reporting entity's own determination about the assumptions that market participants would use in pricing the asset or liability based on the best information available.

Financial Instruments Measured at Fair Value

The methodologies Trustmark uses in determining the fair values are based primarily on the use of independent, market-based data to reflect a value that would be reasonably expected upon exchange of the position in an orderly transaction between market participants at the measurement date. The large majority of assets that are stated at fair value are of a nature that can be valued using prices or inputs that are readily observable through a variety of independent data providers. The providers selected by Trustmark for fair valuation data are widely recognized and accepted vendors whose evaluations support the pricing functions of financial institutions, investment and mutual funds, and portfolio managers. Trustmark has documented and evaluated the pricing methodologies used by the vendors and maintains internal processes that regularly test valuations for anomalies.

Trustmark utilizes an independent pricing service to advise it on the carrying value of the securities available for sale portfolio. As part of Trustmark's procedures, the price provided from the service is evaluated for reasonableness given market changes. When a questionable price exists, Trustmark investigates further to determine if the price is valid. If needed, other market participants may be utilized to determine the correct fair value. Trustmark has also reviewed and confirmed its determinations in thorough discussions with the pricing source regarding their methods of price discovery.

Mortgage loan commitments are valued based on the securities prices of similar collateral, term, rate and delivery for which the loan is eligible to deliver in place of the particular security. Trustmark acquires a broad array of mortgage security prices that are supplied by a market data vendor, which in turn accumulates prices from a broad list of securities dealers. Prices are processed through a mortgage pipeline management system that accumulates and segregates all loan commitment and forward-sale transactions according to the similarity of various characteristics (maturity, term, rate, and collateral). Prices are matched to those positions that are deemed to be an eligible substitute or offset (i.e., "deliverable") for a corresponding security observed in the market place.

Trustmark estimates fair value of MSR through the use of prevailing market participant assumptions and market participant valuation processes. This valuation is periodically tested and validated against other third-party firm valuations.

At this time, Trustmark presents no fair values that are derived through internal modeling. Should positions requiring fair valuation arise that are not relevant to existing methodologies, Trustmark will make every reasonable effort to obtain market participant assumptions, or independent evaluation.

Financial Assets and Liabilities

The following table summarizes financial assets and financial liabilities measured at fair value on a recurring basis as of September 30, 2010 and December 31, 2009, segregated by the level of valuation inputs within the fair value hierarchy utilized to measure fair value (\$ in thousands):

	September 30, 2010					
	Total	Level 1	Level 2	Level 3		
U.S. Government agency obligations	\$149,602	\$-	\$149,602	\$-		
Obligations of states and political subdivisions	148,772	-	148,772	-

The amount of total gains (losses) for the period included in			
earnings that are attributable to the change in unrealized			
gains or losses still held at September 30, 2009	\$3,897	\$(600)

Trustmark may be required, from time to time, to measure certain assets at fair value on a nonrecurring basis in accordance with U.S. GAAP. Assets at September 30, 2010, which have been measured at fair value on a nonrecurring basis, include impaired loans. Loans for which it is probable Trustmark will be unable to collect the scheduled payments of principal or interest when due according to the contractual terms of the loan agreement are considered impaired. Specific allowances for impaired loans are based on comparisons of the recorded carrying values of the loans to the present value of the estimated cash flows of these loans at each loan's original effective interest rate, the fair value of the collateral or the observable market prices of the loans. At September 30, 2010, Trustmark had outstanding balances of \$94.5 million in impaired loans that were specifically identified for evaluation and written down to fair value of the underlying collateral less cost to sell based on the fair value of the collateral or other unobservable input compared with \$74.2 million at December 31, 2009. These impaired loans are classified as Level 3 in the fair value hierarchy.

Nonfinancial Assets and Liabilities

Certain nonfinancial assets measured at fair value on a nonrecurring basis include foreclosed assets (upon initial recognition or subsequent impairment), nonfinancial assets and nonfinancial liabilities measured at fair value in the second step of a goodwill impairment test, and intangible assets and other nonfinancial long-lived assets measured at fair value for impairment assessment.

Certain foreclosed assets, upon initial recognition, are remeasured and reported at fair value through a charge-off to the allowance for loan losses based upon the fair value of the foreclosed asset. The fair value of a foreclosed asset, upon initial recognition, is estimated using Level 3 inputs based on adjusted observable market data. Foreclosed assets measured at fair value upon initial recognition totaled \$51.2 million (utilizing Level 3 valuation inputs) during the nine months ended September 30, 2010 compared with \$53.5 million for the same period in 2009. In connection

with the measurement and initial recognition of the foregoing foreclosed assets, Trustmark recognized charge-offs of the allowance for possible loan losses totaling \$5.0 million and \$10.5 million for the first nine months of 2010 and 2009, respectively. Other than foreclosed assets measured at fair value upon initial recognition, \$48.1 million of foreclosed assets were remeasured during the first nine months of 2010, requiring write-downs of \$15.3 million to reach their current fair values compared to \$22.0 million of foreclosed assets that were remeasured during the first nine months of 2009, requiring write-downs of \$6.2 million.

Fair Value of Financial Instruments

The carrying amounts and estimated fair values of financial instruments at September 30, 2010 and December 31, 2009, are as follows (\$ in thousands):

	September 30, 2010 December 31		r 31, 2009	
	Carrying	Estimated	Carrying	Estimated
	Value	Fair Value	Value	Fair Value
Financial Assets:				
Cash and short-term investments	\$202,791	\$202,791	\$219,893	\$219,893
Securities available for sale	1,968,624	1,968,624	1,684,396	1,684,396
Securities held to maturity	168,849	175,744	232,984	240,674

Junior subordinated debt securities	70,104	34,722	70,104	32,536
Other liabilities - derivatives	2,032	2,032	(1,221)	(1,221)

In cases where quoted market prices are not available, fair values are generally based on estimates using present value techniques. Trustmark's premise in present value techniques is to represent the fair values on a basis of replacement value of the existing instrument given observed market rates on the measurement date. These techniques are significantly affected by the assumptions used, including the discount rate and estimates of future cash flows. In that regard, the derived fair value estimates for those assets or liabilities cannot be necessarily substantiated by comparison to independent markets and, in many cases, may not be realizable in immediate settlement of the instruments. The estimated fair value of financial instruments with immediate and shorter-term maturities (generally 90 days or less) is assumed to be the same as the recorded book value. All nonfinancial instruments, by definition, have been excluded from these disclosure requirements. Accordingly, the aggregate fair value amounts presented do not represent the underlying value of Trustmark.

The fair values of net loans are estimated for portfolios of loans with similar financial characteristics. For variable rate loans that reprice frequently with no significant change in credit risk, fair values are based on carrying values. The fair values of certain mortgage loans, such as 1-4 family residential properties, are based on quoted market prices of similar loans sold in conjunction with securitization transactions, adjusted for differences in loan characteristics. The fair values of other types of loans are estimated by discounting the future cash flows using the current rates at which similar loans would be made to borrowers with similar credit ratings and for the same remaining maturities. The processes for estimating the fair value of net loans described above does not represent an exit price under FASB ASC Topic 820 and such an exit price could potentially produce a different fair value estimate at September 30, 2010 and December 31, 2009.

A detailed description of the valuation methodologies used in estimating the fair value of financial instruments can be found in Note 17 included in Item 8 of Trustmark's Form 10-K Annual Report for the year ended December 31, 2009.

Note 15 - Derivative Financial Instruments

Trustmark maintains an overall interest rate risk management strategy that incorporates the use of derivative instruments to minimize significant unplanned fluctuations in earnings and cash flows caused by interest rate volatility. Trustmark's interest rate risk management strategy involves modifying the repricing characteristics of certain assets and liabilities so that changes in interest rates do not adversely affect the net interest margin and cash flows. Under the guidelines of FASB ASC Topic 815, "Derivatives and Hedging," all derivative instruments are required to be recognized as either assets or liabilities and be carried at fair value on the balance sheet. The fair value of derivative positions outstanding is included in other assets and/or other liabilities in the accompanying consolidated balance sheets and in the net change in these financial statement line items in the accompanying consolidated statements of cash flows as well as included in noninterest income in mortgage banking, net in the accompanying consolidated statements of income.

Derivatives Designated as Hedging Instruments

As part of Trustmark's risk management strategy in the mortgage banking area, derivative instruments such as forward sales contracts are utilized. Trustmark's obligations under forward contracts consist of commitments to deliver mortgage loans, originated and/or purchased, in the secondary market at a future date. These derivative instruments are designated as fair value hedges of these transactions that qualify as fair value hedges under FASB ASC Topic 815, the ineffective portion of changes in the fair value of the forward contracts and changes in the fair value of the loans designated as loans held for sale are recorded in noninterest income in mortgage banking, net. Trustmark's off-balance sheet obligations under these derivative instruments totaled \$262.0 million at September 30, 2010, with a negative valuation adjustment of \$1.2 million, compared to \$188.1 million, with a positive valuation adjustment of \$2.2 million as of December 31, 2009.

Derivatives not Designated as Hedging Instruments

Trustmark utilizes a portfolio of exchange-traded derivative instruments, such as Treasury note futures contracts and option contracts, to achieve a fair value return that offsets the changes in fair value of MSR attributable to interest rates. These transactions are considered freestanding derivatives that do not otherwise qualify for hedge accounting. Changes in the fair value of these exchange-traded derivative instruments are recorded in noninterest income in mortgage banking, net and are offset by the changes in the fair value of MSR. The MSR fair value represents the effect of present value decay and the effect of changes in interest rates. Ineffectiveness of hedging the MSR fair value is measured by comparing the total hedge cost to the changes in the fair value of the MSR asset attributable to interest rate changes. The impact of this strategy resulted in a net positive ineffectiveness of \$2.9 million and \$2.1 million for the quarters ended September 30, 2010 and 2009, respectively. For the nine months ended September 30, 2010 and 2009, the impact was a net positive ineffectiveness of \$7.6 million and a net negative ineffectiveness of \$431 thousand, respectively.

Trustmark also utilizes derivative instruments such as interest rate lock commitments in its mortgage banking area. Rate lock commitments are residential mortgage loan commitments with customers, which guarantee a specified interest rate for a specified time period. Changes in the fair value of these derivative instruments are recorded in noninterest income in mortgage banking, net and are offset by the changes in the fair value of forward sales contracts. Trustmark's off-balance sheet obligations under these derivative instruments totaled \$172.4 million at September 30, 2010, with a positive valuation adjustment of \$1.3 million, compared to \$78.9 million, with a negative valuation adjustment of \$61 thousand as of December 31, 2009.

Tabular Disclosures

The following tables disclose the fair value of derivative instruments in Trustmark's balance sheets as well as the effect of these derivative instruments on Trustmark's results of operations for the periods presented (\$ in thousands):

Derivatives in hedging relationships Interest rate contracts:	September 30, 2010	Decembe 31, 2009	r

Note 16 - Segment Information

Trustmark's management reporting structure includes three segments: General Banking, Wealth Management and Insurance. General Banking is primarily responsible for all traditional banking products and services, including loans and deposits. The General Banking Division also consists of internal operations such as Human Resources, Executive Administration, Treasury (Funds Management), Public Affairs and Corporate Finance. The Wealth Management Division provides Trustmark's customers with reliable guidance and sound, practical advice for accumulating, preserving and transferring wealth. Trustmark's Insurance Division provides a full range of retail insurance products, including commercial risk management products, bonding, group benefits and personal lines coverage.

The accounting policies of each reportable segment are the same as those of Trustmark except for its internal allocations. Noninterest expenses for back-office operations support are allocated to segments based on estimated uses of those services. Trustmark measures the net interest income of its business segments with a process that assigns cost of funds or earnings credit on a matched-term basis. This process, called "funds transfer pricing", charges an appropriate cost of funds to assets held by a business unit, or credits the business unit for potential earnings for carrying liabilities. The net of these charges and credits flows through to the General Banking segment, which contains the management team responsible for determining the bank's funding and interest rate risk strategies.

Accounting Policies Recently Adopted and Pending Accounting Pronouncements

ASU 2010-20, "Disclosures about the Credit Quality of Financing Receivables and the Allowance for Credit Losses." In July 2010, the FASB issued Accounting Standards Update (ASU) 2010-20, which will require Trustmark to provide a greater level of disaggregated information about the credit quality of loans and the Allowance for Loan Losses (Allowance). This ASU will also require Trustmark to disclose additional information related to credit quality indicators, past due information, and information related to loans modified in a troubled debt restructuring. Disclosures related to period-end information will be effective in all interim and annual reporting periods ending on or after December 15, 2010. Disclosures of activity that occurs during a reporting period are required in interim or annual periods beginning on or after December 15, 2010. As this ASU amends only the disclosure requirements for loans and the Allowance, the adoption will have no impact on Trustmark's balance sheets or results of operations.

ASU 2010-18, "Effect of a Loan Modification When the Loan is Part of a Pool that is Accounted for as a Single Asset." In April 2010, the FASB issued ASU 2010-18, which states that modifications of loans that are accounted for within a pool under ASC 310-30 do not result in the removal of those loans from the pool even if the modification of those loans would otherwise be considered a troubled debt restructuring. An entity will continue to be required to consider whether the pool of assets in which the loan is included is impaired if expected cash flows for the pool change. The amendments do not affect the accounting for loans under the scope of ASC 310-30 that are not accounted for within pools. Loans accounted for individually under ASC 310-30 continue to be subject to the troubled debt restructuring accounting provisions within ASC 310-40, "Receivables—Troubled Debt Restructurings by Creditors". The amendments are effective for modifications of loans accounted for within pools under Subtopic 310-30 occurring in the first interim or annual period ending on or after July 15, 2010 and is not expected to have a significant impact on Trustmark's financial statements.

ASU 2010-09, "Amendments to Certain Recognition and Disclosure Requirements." In February 2010, the FASB issued ASU 2010-09, to address potential practice issues associated with FASB ASC Topic 855 (Statement 165). The ASU eliminates the requirement for SEC filers to disclose the date through which subsequent events have been evaluated in originally issued and reissued financial statements. This change was immediately effective.

ASU 2010-06, "Improving Disclosures about Fair Value Measurements." In January 2010, the FASB issued ASU 2010-06, which requires additional disclosures related to the transfers in and out of fair value hierarchy and the activity of Level 3 financial instruments. ASU 2010-06 further clarifies that (i) fair value measurement disclosures should be provided for each class of assets and liabilities (rather than major category), which would generally be a subset of assets or liabilities within a line item in the statement of financial position and (ii) companies should provide disclosures about the valuation techniques and inputs used to measure fair value for both recurring and nonrecurring fair value measurements for each class of assets and liabilities included in Levels 2 and 3 of the fair value hierarchy. The disclosures related to the gross presentation of purchases, sales, issuances and settlements of assets and liabilities included in Level 3 of the fair value hierarchy will be required for Trustmark beginning January 1, 2011. The remaining disclosure requirements and clarifications made by ASU 2010-06 became effective for Trustmark on January 1, 2010 and are reported in Note 14 – Fair Value.

SFAS No. 167, "Amendments to FASB Interpretation No. 46(R)." In June 2009, the FASB issued SFAS No. 167, codified as ASU 2009-17, which modifies how a company determines when an variable interest entity (VIE) that is insufficiently capitalized or is not controlled through voting (or similar rights) should be consolidated. The determination of whether a company is required to consolidate a VIE is based on, among other things, the VIE's purpose and design and a company's ability to direct the activities of the VIE that most significantly impact the VIE's economic performance. ASU 2009-17 requires additional disclosures about the reporting entity's involvement with variable-interest entities and any significant changes in risk exposure due to that involvement as well as its effect on

the entity's financial statements. ASU 2009-17 became effective for Trustmark's financial statements on January 1, 2010 and the adoption did not have a significant impact on Trustmark's financial statements.

SFAS No. 166, "Accounting for Transfers of Financial Assets." In June 2009, the FASB issued SFAS No. 166, codified as ASU 2009-16, which amended ASC Topic 860, "Transfers and Servicing," to enhance reporting about transfers of financial assets, including securitizations, and where companies have continuing exposure to the risks related to transferred financial assets. ASU 2009-16 eliminated the concept of a "qualifying special-purpose entity" and changed the requirements for derecognizing financial assets. ASU 2009-16 also required additional disclosures about all continuing involvements with transferred financial assets including information about gains and losses resulting from transfers during the period. ASU 2009-16 also modified the criteria that must be met in order for a transfer of a portion of a financial asset, such as a loan participation, to qualify for sale accounting. ASU 2009-16 became effective for Trustmark's financial statements on January 1, 2010 and the adoption did not have a significant impact on Trustmark's financial statements.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following provides a narrative discussion and analysis of Trustmark Corporation's (Trustmark) financial condition and results of operations. This discussion should be read in conjunction with the consolidated financial statements and the supplemental financial data included elsewhere in this report.

Forward-Looking Statements

Certain statements contained in this document constitute forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. You can identify forward-looking statements by words such as "may," "hope," "will," "should," "expect," "plan," "anticipate," "intend," "believe," "estimate," "predict," "potential," "continue," "con negative of those terms or other words of similar meaning. You should read statements that contain these words carefully because they discuss our future expectations or state other "forward-looking" information. These forward-looking statements include, but are not limited to, statements relating to anticipated future operating and financial performance measures, including net interest margin, credit quality, business initiatives, growth opportunities and growth rates, among other things, and encompass any estimate, prediction, expectation, projection, opinion, anticipation, outlook or statement of belief included therein as well as the management assumptions underlying these forward-looking statements. You should be aware that the occurrence of the events described under the caption "Risk Factors" in Trustmark's filings with the Securities and Exchange Commission could have an adverse effect on our business, results of operations and financial condition. Should one or more of these risks materialize, or should any such underlying assumptions prove to be significantly different, actual results may vary significantly from those anticipated, estimated, projected or expected.

Risks that could cause actual results to differ materially from current expectations of Management include, but are not limited to, changes in the level of nonperforming assets and charge-offs, local, state and national economic and market conditions, including the extent and duration of the current volatility in the credit and financial markets, changes in our ability to measure the fair value of assets in our portfolio, material changes in the level and/or volatility of market interest rates, the performance and demand for the products and services we offer, including the level and timing of withdrawals from our deposit accounts, the costs and effects of litigation and of unexpected or adverse outcomes in such litigation, our ability to attract noninterest-bearing deposits and other low-cost funds, competition in loan and deposit pricing, as well as the entry of new competitors into our markets through de novo expansion and acquisitions, economic conditions and monetary and other governmental actions designed to address the level and volatility of interest rates and the volatility of securities, currency and other markets, the enactment of legislation and related regulations, including those related to the Dodd-Frank Wall Street Reform and Consumer Protection Act, and changes in existing regulations, or enforcement practices, or the adoption of new regulations, changes in accounting standards and practices, including changes in the interpretation of existing standards, that affect our consolidated financial statements, changes in consumer spending, borrowings and savings habits, technological changes, changes in the financial performance or condition of our borrowers, changes in our ability to control expenses, changes in our compensation and benefit plans, greater than expected costs or difficulties related to the integration of new products and lines of business, natural disasters, environmental disasters, acts of war or terrorism and other risks described in our filings with the Securities and Exchange Commission.

Although we believe that the expectations reflected in such forward-looking statements are reasonable, we can give no assurance that such expectations will prove to be correct. Except as required by law, we undertake no obligation to update or revise any of this information, whether as the result of new information, future events or developments or otherwise.

Description of Business

Trustmark Corporation (Trustmark), a Mississippi business corporation incorporated in 1968, is a bank holding company headquartered in Jackson, Mississippi. Trustmark's principal subsidiary is Trustmark National Bank (TNB), initially chartered by the State of Mississippi in 1889. At September 30, 2010, TNB had total assets of \$9.3 billion, which represents approximately 99% of the consolidated assets of Trustmark.

Through TNB and its other subsidiaries, Trustmark operates as a financial services organization providing banking and other financial solutions through approximately 150 offices and 2,501 full-time equivalent associates located in the states of Mississippi, Tennessee (in Memphis and the Northern Mississippi region, which is collectively referred to herein as Trustmark's Tennessee market), Florida (primarily in the northwest or "Panhandle" region of that state) and Texas (primarily in Houston, which is referred to herein as Trustmark's Texas market). The principal products produced and services rendered by TNB and Trustmark's other subsidiaries are as follows:

Trustmark National Bank

Commercial Banking – TNB provides a full range of commercial banking services to corporations and other business customers. Loans are provided for a variety of general corporate purposes, including financing for commercial and industrial projects, income producing commercial real estate, owner-occupied real estate and construction and land development. TNB also provides deposit services, including checking, savings and money market accounts and certificates of deposit as well as treasury management services.

Consumer Banking – TNB provides banking services to consumers, including checking, savings, and money market accounts as well as certificates of deposit and individual retirement accounts. In addition, TNB provides consumer customers with installment and real estate loans and lines of credit.

Mortgage Banking – TNB provides mortgage banking services, including construction financing, production of conventional and government insured mortgages, secondary marketing and mortgage servicing. At September 30, 2010, TNB's mortgage loan portfolio totaled approximately \$1.1 billion, while its portfolio of mortgage loans serviced for others, including, FNMA, FHLMC and GNMA, totaled approximately \$4.3 billion.

Wealth Management and Trust Services – TNB offers specialized services and expertise in the areas of wealth management, trust, investment and custodial services for corporate and individual customers. These services include the administration of personal trusts and estates as well as the management of investment accounts for individuals, employee benefit plans and charitable foundations. TNB also provides corporate trust and institutional custody, securities brokerage, financial and estate planning, retirement plan services as well as life insurance and other risk management services provided by TRMK Risk Management, Inc. (TRMI). TRMI engages in individual insurance product sales as a broker of life and long-term care insurance for wealth management customers. TNB's wealth management division is also served by Trustmark Investment Advisors, Inc. (TIA), a Securities and Exchange Commission (SEC)-registered investment adviser. TIA provides customized investment management services for TNB customers and also serves as investment advisor to The Performance Funds, a proprietary family of mutual funds. At September 30, 2010, assets under management and administration totaled \$7.3 billion.

Insurance – TNB provides a competitive array of insurance solutions for business and individual risk management needs. Business insurance offerings include services and specialized products for medical professionals, construction, manufacturing, hospitality, real estate and group life and health plans. Individual customers are also provided life and health insurance, and personal line policies. Prior to July 30, 2010, TNB provided these services through The Bottrell Insurance Agency, Inc. (Bottrell), which is based in Jackson, Mississippi, and Fisher-Brown, Incorporated (Fisher-Brown), headquartered in Pensacola, Florida. Effective July 30, 2010, Fisher-Brown was merged into Bottrell, which created a newly formed agency named Fisher Brown Bottrell Insurance, Inc. (FBB), a Mississippi corporation and subsidiary of TNB. FBB will maintain the trade names of Bottrell and Fisher Brown and will offer services through divisions under these respective names. Financial results of FBB will be reported in the same manner as the combined results of the prior subsidiaries.

Somerville Bank & Trust Company

Somerville Bank & Trust Company (Somerville), headquartered in Somerville, Tennessee, provides banking services in the eastern Memphis metropolitan statistical area (MSA) through five offices. At September 30, 2010, Somerville had total assets of \$181.0 million.

Capital Trusts

Trustmark Preferred Capital Trust I (Trustmark Trust) is a Delaware trust affiliate formed in 2006 to facilitate a private placement of \$60.0 million in trust preferred securities. Republic Bancshares Capital Trust I (Republic Trust) is a Delaware trust affiliate acquired as the result of Trustmark's 2006 acquisition of Republic Bancshares of Texas, Inc. Republic Trust was formed to facilitate the issuance of \$8.0 million in trust preferred securities. As defined in applicable accounting standards, both Trustmark Trust and Republic Trust are considered variable interest entities for which Trustmark is not the primary beneficiary. Accordingly, the accounts of both trusts are not included in Trustmark's consolidated financial statements. During June 2010, Trustmark's request to payoff the trust preferred securities of the Republic Trust was approved by the Federal Reserve Bank of Atlanta. The actual payoff occurred on October 7, 2010, and would have reduced Trustmark's Tier 1 leverage ratio, Tier 1 risk-based capital ratio and total risk-based capital ratio for September 30, 2010, by 0.09%, 0.13% and 0.12%, respectively.

Executive Overview

During the first nine months of 2010, there have been many signs that the economy is recovering; however, the recovery remains fragile and is still threatened by weak labor markets, household and business uncertainty and tight credit conditions. The effects of the financial crisis and recession are expected to persist for some time, especially as the magnitude of economic distress facing local markets places continued pressure on asset quality and earnings, with the potential for undermining the stability of the banking organizations that serve these markets.

Management has continued to carefully monitor the impact of illiquidity in the financial markets, values of securities and other assets, loan performance, default rates and other financial and macro-economic indicators, in order to navigate the challenging economic environment. In order to reduce exposure to certain loan categories, Management has continued to reduce certain loan classifications, including construction, land development and other land loans and indirect auto loans. During the first nine months of 2010 and throughout 2009, Trustmark and TNB's capital ratios exceeded the minimum levels required for it to be ranked well-capitalized, both prior to and after Trustmark's participation in the U.S. Treasury's Troubled Assets Relief Program – Capital Purchase Program (TARP CPP).

Trustmark did not make significant changes to its loan underwriting standards during the first nine months of 2010. Trustmark's willingness to make loans to qualified applicants that meet its traditional, prudent lending standards has not changed. However, TNB has revised its concentration limits of commercial real estate loans, which adhere to its primary regulator's guidelines. As a result, TNB has been cautious in granting credit involving certain categories of real estate, particularly in Florida. Furthermore, in the current economic downturn, TNB makes fewer exceptions to its loan policy as compared to prior periods.

Management has continued its practice of maintaining excess funding capacity to provide Trustmark with adequate liquidity for its ongoing operations. In this regard, Trustmark benefits from its strong deposit base, its highly liquid investment portfolio and its access to funding from a variety of external funding sources such as upstream Federal funds lines, Federal Reserve Discount Window, FHLB advances, and brokered deposits.

On December 7, 2009, Trustmark completed a public offering of 6,216,216 shares of its common stock, including 810,810 shares issued pursuant to the exercise of the underwriters' over-allotment option, at a price of \$18.50 per share. Trustmark received net proceeds of approximately \$109.3 million after deducting underwriting discounts, commissions and offering expenses. Proceeds from this offering were used in the redemption of Senior Preferred Stock discussed below.

TARP Capital Purchase Program

In the fourth quarter of 2008, Trustmark chose to participate in the TARP CPP in order to reinforce its strong capital position, advance the Treasury's efforts to facilitate additional lending in the markets where Trustmark operates, maintain its competitive advantage over its less well-capitalized competitors, support its foreclosure mitigation programs and support its general operations. Trustmark's decision to participate in the TARP CPP was also affected by discussions with its regulators, including the OCC, the Federal Reserve and the Treasury. Trustmark elected to participate in the TARP CPP as a healthy, well-capitalized bank.

As a participant in the TARP CPP, on November 21, 2008, Trustmark issued to the Treasury 215,000 shares of Senior Preferred Stock, as well as a ten-year warrant (the Warrant) to purchase up to 1,647,931 shares of Trustmark's common stock, at an initial exercise price of \$19.57 per share, subject to customary anti-dilution adjustments.

In the fourth quarter of 2009, Trustmark exited the TARP CPP. Following discussions with its federal banking regulators and the completion of the public offering of common stock discussed above, Trustmark redeemed all the

Senior Preferred Stock from the Treasury on December 9, 2009. The amount paid by Trustmark to redeem the Senior Preferred Stock consisted of \$215.0 million, which was equivalent to both the original issuance price and the liquidation value of the Senior Preferred Stock, plus a final accrued dividend of approximately \$716.7 thousand. As a result of the redemption of the Senior Preferred Stock, in the fourth quarter of 2009, Trustmark incurred a one-time, non-cash charge of \$8.2 million to net income available to common shareholders for the unaccreted discount recorded at the date of issuance of the Senior Preferred Stock. On December 30, 2009, Trustmark repurchased the Warrant from the Treasury for its fair value of \$10.0 million.

Cadence Merger Agreement and Termination

On September 21, 2010, Trustmark and Cadence Financial Corporation, a Mississippi corporation (Cadence) with assets of \$1.9 billion at June 30, 2010, entered into an Agreement and Plan of Reorganization (Agreement) pursuant to which Cadence agreed to merge with and into Trustmark (the Merger). The Agreement contemplated that Cadence's wholly-owned banking subsidiary, Cadence Bank, N.A., would be merged with and into Trustmark's wholly-owned banking subsidiary, Trustmark National Bank immediately following the Merger. On October 6, 2010, Trustmark received notice that the board of directors of Cadence had accepted another acquisition proposal and terminated the Agreement and Plan of Reorganization with Trustmark dated September 21, 2010, triggering the payment of a \$2.0 million termination fee from Cadence, which will be recognized in other noninterest income during the fourth quarter of 2010.

Critical Accounting Policies

Trustmark's consolidated financial statements are prepared in accordance with U.S. generally accepted accounting principles (GAAP) and follow general practices within the financial services industry. Application of these accounting principles requires management to make estimates, assumptions and judgments that affect the amounts reported in the consolidated financial statements and accompanying notes. These estimates, assumptions and judgments are based on information available as of the date of the consolidated financial statements; accordingly, as this information changes, actual financial results could differ from those estimates.

Certain policies inherently have a greater reliance on the use of estimates, assumptions and judgments and, as such, have a greater possibility of producing results that could be materially different than originally reported. There have been no significant changes in Trustmark's critical accounting estimates during the first nine months of 2010.

Recent Legislative Developments

On July 21, 2010, President Obama signed the Dodd-Frank Wall Street Reform and Consumer Protection Act (Dodd-Frank Act) into law. The Dodd-Frank Act represents very broad and complex legislation that enacts sweeping changes to the financial services industry that will have significant regulatory and legal consequences for banks now and for years to come. The more significant provisions of the Dodd-Frank Act include the following:

- Creates the Financial Stability Oversight Council, which will identify, monitor and address systemic risks posed by large and complex banks and nonbank entities as well as certain products and services.
- Requires application of the same leverage and risk-based capital requirements that apply to insured depository institutions to most bank holding companies.
- Changes the assessment base for federal deposit insurance from the amount of insured deposits to average consolidated assets less average tangible equity. The Dodd-Frank Act increases the minimum reserve ratio for the Deposit Insurance Fund from 1.15% to 1.35% of estimated insurable deposits, or the comparable percentage of the assessment base by September 30, 2020. The FDIC must offset the effect of the increase in the minimum reserve ratio on insured depository institutions with total consolidated assets of less than \$10 billion.
- Makes permanent the \$250,000 limit for federal deposit insurance and provides unlimited federal deposit insurance until December 31, 2012 for noninterest-bearing demand transaction accounts at all insured depository institutions.
- Directs the Federal banking regulatory agencies to make capital requirements countercyclical meaning that additional capital will be required in times of economic expansion, but less capital will be required during periods of economic downturn.
- Requires a bank holding company to be well-capitalized and well-managed in order to be approved for an interstate bank acquisition. In addition, the appropriate federal banking agency must determine that the resulting bank will continued to be well-capitalized and well-managed after the transaction.

- Repeals the prohibition on payments of interest by banks on demand deposit accounts held by businesses, beginning July 21, 2011.
- Imposes comprehensive regulation of the over-the-counter derivatives market, which includes certain provisions that would effectively prohibit insured depository institutions from conducting certain derivatives businesses in the institution itself.
- Implements structural changes in the issuance of certain asset-backed securities to require risk retention by securitizers and originators at a default level of up to 5% to promote the credit quality of the assets being securitized.
- Implements corporate governance revisions intended to enhance shareholder understanding of executive compensation, to comprise independence standards upon outside compensation consultants and to increase shareholder involvement in the compensation process. Also provides that federal bank regulators shall issue enhanced reporting requirements for incentive-based compensation of any "covered financial institution," and that federal bank regulators shall prescribe regulations prohibiting any incentive-based payment arrangement that encourages inappropriate risk-taking by the covered financial institution by paying any executive officer, employee, director or principal shareholder of the covered financial institution "excessive compensation, fees, or benefits" or that "could lead to material loss to the covered financial institution."
- Centralizes responsibility for consumer financial protection by creation of the Consumer Financial Protection Bureau (CFPB), which will be responsible for issuing rules, orders and guidance implementing federal consumer financial laws. If and when the bank's consolidated assets exceed \$10 billion, the CFPB will become the exclusive regulator of the bank and all of its affiliates for consumer protection purposes. Until that time, the CFPB has limited jurisdiction over the bank and its affiliate's operations, with the exclusive enforcement authority resting with the bank's primary federal banking regulator, and the CFPB's role limited to requiring reports and participating in examinations with the primary federal banking regulator.
- Amends the Electronic Fund Transfer Act to authorize the Federal Reserve to issue regulations regarding any interchange fee that an issuer may receive or charge for an electronic debit card transaction. Requires that fees must be reasonable and proportional to the cost incurred by the issuer with respect to the transaction.
- Increases the potential for state intervention in the operations of federally chartered depository institutions by narrowing the circumstances in which preemption of state law may apply and by providing statutory recognition of a role for state law enforcement authorities in regard to federally chartered depository institutions.
- Implements mortgage reforms by including provisions, which require mortgage originators to act in the best interests of consumers and to take steps to seek to ensure that consumers will have the capability to repay loans that they obtain. Also creates incentives for lenders to offer loans that better protect the interests of consumers and provide additional protection for borrowers under high cost loans.

As the details of the Dodd-Frank Act turn into specific regulatory requirements, there will be business impacts across a myriad of industries, not just banking. Some of those impacts are obvious. However, other impacts are subtle and do not stem directly from language in the new law. Many of these more subtle impacts will likely only emerge after months and perhaps years of further analysis and evaluation. In addition, certain provisions that affect deposit insurance assessments, payment of interest on demand deposits and interchange fees could increase the costs associated with deposits as well as place limitations on certain revenues those deposits may generate. Finally, implementation of certain significant provisions of the Dodd-Frank Act will occur over a two-to-three year period. Because many aspects of the Dodd-Frank Act are subject to further rulemaking and will take effect over several years, it is difficult to anticipate the potential impact on Trustmark and its customers. It is clear, however, that the implementation of the Dodd-Frank Act will require Management to invest significant time and resources to evaluate the potential impact of this Act. Management will continue to evaluate this impact as more details regarding the implementation of these provisions become available.

Financial Highlights

Trustmark's net income available to common shareholders totaled \$25.9 million in the third quarter of 2010, which represented basic earnings per common share of \$0.40. Trustmark's third quarter net income produced a return on average tangible common equity of 12.38%. During the first nine months of 2010, Trustmark's net income available to common shareholders totaled \$75.5 million, which represented basic earnings per common share of \$1.18. Trustmark's performance during the first nine months of 2010 resulted in a return on average tangible common equity of 12.43%. During the third quarter, Trustmark's Board of Directors declared a quarterly cash dividend of \$0.23 per common share payable December 15, 2010, to shareholders of record on December 1, 2010.

Net income available to common shareholders for the nine months ended September 30, 2010, increased \$16.3 million, or 27.6% compared to the same period in 2009. The increase was primarily the result of a decline in the loan loss provision of \$21.7 million and the elimination of preferred stock dividends and the accretion of preferred stock discount during the first nine months of 2010, which increased net income available to common shareholders by approximately \$9.4 million. These increases in net income available to common shareholders were partially offset by growth in noninterest expense of \$12.6 million primarily resulting from increased real estate/foreclosure expenses of \$11.8 million. For additional information on the changes in noninterest income and noninterest expense, please see accompanying sections included in Results of Operations.

At September 30, 2010, nonperforming assets totaled \$244.0 million, an increase of \$12.8 million, or 5.5%, compared to December 31, 2009, and total nonaccrual loans were \$159.3 million, representing an increase of \$18.2 million relative to December 31, 2009. Total net charge-offs for the nine months ended September 30, 2010 were \$47.0 million compared to total net charge-offs for the nine months ended September 30, 2009 of \$51.3 million.
