

FIRST MIDWEST BANCORP INC
Form 10-Q
May 12, 2014

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

FORM 10-Q
(Mark One)

Quarterly Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934
For the quarterly period ended March 31, 2014

or

Transition report pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934
For the transition period from _____ to _____.

Commission File Number 0-10967

FIRST MIDWEST BANCORP, INC.
(Exact name of registrant as specified in its charter)
Delaware
(State or other jurisdiction of incorporation or
organization)
One Pierce Place, Suite 1500
Itasca, Illinois 60143-9768
(Address of principal executive offices) (zip code)

36-3161078
(IRS Employer Identification No.)

Registrant's telephone number, including area code: (630) 875-7450

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No .

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No .

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer
Non-accelerated filer Smaller reporting company
(Do not check if a smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No .

As of May 9, 2014, there were 75,268,510 shares of common stock, \$.01 par value, outstanding.

NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Presentation – The accompanying unaudited condensed consolidated interim financial statements of First Midwest Bancorp, Inc. (the “Company”), a Delaware corporation, were prepared in accordance with the rules and regulations of the Securities and Exchange Commission (“SEC”) for quarterly reports on Form 10-Q and reflect all adjustments that management deems necessary for the fair presentation of the financial position and results of operations for the periods presented. The results of operations for the quarter ended March 31, 2014 are not necessarily indicative of the results that may be expected for the year ending December 31, 2014.

The accounting and reporting policies of the Company and its subsidiaries conform to U.S. generally accepted accounting principles (“GAAP”) and general practices within the banking industry. The accompanying quarterly statements do not include certain information and footnote disclosures required by GAAP for complete annual financial statements. Therefore, these financial statements should be read in conjunction with the Company’s 2013 Annual Report on Form 10-K (“2013 10-K”). The Company uses the accrual basis of accounting for financial reporting purposes. Certain reclassifications were made to prior year amounts to conform to the current year presentation.

Principles of Consolidation – The accompanying condensed consolidated financial statements include the financial position and results of operations of the Company and its subsidiaries after elimination of all significant intercompany accounts and transactions. Assets held in a fiduciary or agency capacity are not assets of the Company or its subsidiaries and are not included in the condensed consolidated financial statements.

Use of Estimates – The preparation of the condensed consolidated financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the amounts reported in the condensed consolidated financial statements and accompanying notes. Although these estimates and assumptions are based on the best available information, actual results could differ from those estimates.

The accounting policies related to loans, the allowance for credit losses, the FDIC indemnification asset, and derivative financial instruments are presented below. For a summary of all other significant accounting policies, please refer to Note 1, “Summary of Significant Accounting Policies,” in the Company’s 2013 10-K.

Loans – Loans held-for-investment are loans that the Company intends to hold until they are paid in full and are carried at the principal amount outstanding, including certain net deferred loan origination fees. Interest income on loans is accrued based on principal amounts outstanding. Loan origination fees, commitment fees, and certain direct loan origination costs are deferred, and the net amount is amortized as a yield adjustment over the contractual life of the related loans or commitments and included in interest income. Fees related to standby letters of credit are amortized into fee income over the contractual life of the commitment. Other credit-related fees are recognized as fee income when earned. Loans held-for-sale are carried at the lower of aggregate cost or fair value and included in other assets in the Consolidated Statements of Financial Condition.

Purchased Impaired Loans – Purchased impaired loans include acquired loans that had evidence of credit deterioration since origination and it was probable at acquisition that the Company would not collect all contractually required principal and interest payments. Evidence of credit deterioration was evaluated using various indicators, such as past due and non-accrual status. Other key considerations included past performance of the failed institutions' credit underwriting standards, completeness and accuracy of credit files, maintenance of risk ratings, and age of appraisals. Lease and revolving loans do not qualify to be accounted for as purchased impaired loans. Purchased impaired loans are recorded at fair value on the acquisition date, and are accounted for prospectively based on estimates of expected

cash flows. No allowance for credit losses is recorded on these loans at the acquisition date. To estimate the fair value, the Company generally aggregates purchased consumer loans and certain smaller balance commercial loans into pools of loans with common risk characteristics, such as delinquency status, credit score, and internal risk rating. The fair values of larger balance commercial loans are estimated on an individual basis. Expected future cash flows in excess of the fair value of loans at the purchase date (“accretable yield”) are recorded as interest income over the life of the loans if the timing and amount of the future cash flows can be reasonably estimated. The non-accretable yield represents the difference between contractually required payments and the cash flows expected to be collected at acquisition.

Subsequent increases in cash flows are recognized as interest income prospectively. The present value of any decreases in expected cash flows is recognized by recording a charge-off through the allowance for loan and covered loan losses or establishing an allowance for loan and covered loan losses.

Non-accrual Loans – Generally, corporate loans are placed on non-accrual status (i) when either principal or interest payments become 90 days or more past due unless the loan is sufficiently collateralized such that full repayment of both principal and interest is expected and is in the process of collection within a reasonable period or (ii) when an individual analysis of a borrower’s creditworthiness warrants a downgrade to non-accrual regardless of past due status. When a loan is placed on non-accrual status, unpaid interest credited to income in the current year is reversed, and unpaid interest accrued in prior years is charged against the allowance for loan losses. After the loan is placed on non-accrual, all debt service payments are applied to the principal on the loan. Future interest income may only be recorded on a cash basis after recovery of principal is reasonably assured. Non-accrual loans are returned to accrual status when the financial position of the borrower and other relevant factors indicate that the Company will collect all principal and interest.

Commercial loans and loans secured by real estate are charged-off when deemed uncollectible. A loss is recorded if the net realizable value of the underlying collateral is less than the outstanding principal and interest. Consumer loans that are not secured by real estate are subject to mandatory charge-off at a specified delinquency date and are usually not classified as non-accrual prior to being charged-off. Closed-end consumer loans, which include installment, automobile, and single payment loans, are usually charged-off no later than the end of the month in which the loan becomes 120 days past due.

Purchased impaired loans are generally considered accruing loans unless reasonable estimates of the timing and amount of future cash flows cannot be determined. Loans without reasonable cash flow estimates are classified as non-accrual loans, and interest income is not recognized on those loans until the timing and amount of the future cash flows can be reasonably determined.

Troubled Debt Restructurings (“TDRs”) – A restructuring is considered a TDR when (i) the borrower is experiencing financial difficulties and (ii) the creditor grants a concession, such as forgiveness of principal, reduction of the interest rate, changes in payments, or extension of the maturity date. Loans are not classified as TDRs when the modification is short-term or results in an insignificant delay in payments. The Company’s TDRs are determined on a case-by-case basis.

The Company does not accrue interest on a TDR unless it believes collection of all principal and interest under the modified terms is reasonably assured. For a TDR to begin accruing interest, the borrower must demonstrate both some level of past performance and the future capacity to perform under the modified terms. Generally, six months of consecutive payment performance under the restructured terms is required before a TDR is returned to accrual status. However, the period could vary depending on the individual facts and circumstances of the loan. An evaluation of the borrower’s current creditworthiness is used to assess the borrower’s capacity to repay the loan under the modified terms. This evaluation includes an estimate of expected cash flows, evidence of strong financial position, and estimates of the value of collateral, if applicable. For TDRs to be removed from TDR status in the calendar year after the restructuring, the loans must (i) have an interest rate and terms that reflect market conditions at the time of restructuring, and (ii) be in compliance with the modified terms. If the loan was restructured at below market rates and terms, it continues to be separately reported as restructured until it is paid in full or charged-off.

Impaired Loans – Impaired loans consist of corporate non-accrual loans and TDRs.

A loan is considered impaired when it is probable that the Company will not collect all contractual principal and interest. With the exception of accruing TDRs, impaired loans are classified as non-accrual and are exclusive of smaller homogeneous loans, such as home equity, 1-4 family mortgages, and installment loans. Impaired loans with balances under a specified threshold are not individually evaluated for impairment. For all other impaired loans, impairment is measured by comparing the estimated value of the loan to the recorded book value. The value of collateral-dependent loans is based on the fair value of the underlying collateral, less costs to sell. The value of other

loans is measured using the present value of expected future cash flows discounted at the loan's initial effective interest rate. Purchased impaired loans are not reported as impaired loans provided that estimates of the timing and amount of future cash flows can be reasonably determined.

90-Days Past Due Loans –The Company's accrual of interest on loans is discontinued at the time the loan is 90 days past due unless the credit is sufficiently collateralized and in the process of renewal or collection.

Allowance for Credit Losses – The allowance for credit losses is comprised of the allowance for loan losses, the allowance for covered loan losses, and the reserve for unfunded commitments, and is maintained by management at a level believed adequate to absorb estimated losses inherent in the existing loan portfolio. Determination of the allowance for credit losses is subjective since it requires significant estimates and management judgment, including the amounts and timing of expected future cash flows on impaired loans, estimated losses on pools of homogeneous loans, consideration of current economic trends, and other factors.

Loans deemed to be uncollectible are charged-off against the allowance for loan and covered loan losses, while recoveries of amounts previously charged-off are credited to the allowance for loan and covered loan losses. Additions to the allowance for loan and covered loan losses are charged to expense through the provision for loan and covered loan losses. The amount of provision

depends on a number of factors, including net charge-off levels, loan growth, changes in the composition of the loan portfolio, and the Company's assessment of the allowance for loan and covered loan losses based on the methodology discussed below.

Allowance for Loan Losses – The allowance for loan losses consists of (i) specific reserves for individual loans where the recorded investment exceeds the value, (ii) an allowance based on a loss migration analysis that uses historical credit loss experience for each loan category, and (iii) an allowance based on other internal and external qualitative factors.

The specific reserves component of the allowance for loan losses is based on a periodic analysis of impaired loans exceeding a fixed dollar amount. If the value of an impaired loan is less than the recorded book value, the Company either establishes a valuation allowance (i.e., a specific reserve) equal to the excess of the book value over the value of the loan as a component of the allowance for loan losses or charges off the amount if it is a confirmed loss.

The general reserve component is based on a loss migration analysis, which examines actual loss experience by loan category for a rolling 8-quarter period and the related internal risk rating for corporate loans. The loss migration analysis is updated quarterly using actual loss experience. This component is then adjusted based on management's consideration of many internal and external qualitative factors, including:

- Changes in the composition of the loan portfolio, trends in the volume of loans, and trends in delinquent and non-accrual loans that could indicate that historical trends do not reflect current conditions.
- Changes in credit policies and procedures, such as underwriting standards and collection, charge-off, and recovery practices.
- Changes in the experience, ability, and depth of credit management and other relevant staff.
- Changes in the quality of the Company's loan review system and Board of Directors oversight.
- The effect of any concentration of credit and changes in the level of concentrations, such as loan type or risk rating.
- Changes in the value of the underlying collateral for collateral-dependent loans.
- Changes in the national and local economy that affect the collectability of various segments of the portfolio.
- The effect of other external factors, such as competition and legal and regulatory requirements, on the Company's loan portfolio.

Allowance for Covered Loan Losses – The Company's allowance for covered loan losses reflects the difference between the carrying value and the discounted present value of the estimated cash flows of the covered purchased impaired loans. On a periodic basis, the adequacy of this allowance is determined through a re-estimation of cash flows on all of the outstanding covered purchased impaired loans using either a probability of default/loss given default ("PD/LGD") methodology or a specific review methodology. The PD/LGD model is an expected loss model that estimates future cash flows using a probability of default curve and loss given default estimates.

Reserve for Unfunded Commitments – The Company also maintains a reserve for unfunded commitments, including letters of credit, for the risk of loss inherent in these arrangements. The reserve for unfunded commitments is estimated using the loss migration analysis from the allowance for loan losses, adjusted for probabilities of future funding requirements. The reserve for unfunded commitments is included in other liabilities in the Consolidated Statements of Financial Condition.

The establishment of the allowance for credit losses involves a high degree of judgment given the difficulty of assessing the factors impacting loan repayment and estimating the timing and amount of losses. While management utilizes its best judgment and information available, the adequacy of the allowance for credit losses depends on a variety of factors beyond the Company's control, including the performance of its loan portfolio, the economy, changes in interest rates and property values, and the interpretation of loan risk classifications by regulatory authorities.

FDIC Indemnification Asset – The majority of loans and OREO acquired through FDIC-assisted transactions are covered by loss share agreements with the FDIC (the “FDIC Agreements”), under which the FDIC reimburses the Company for the majority of the losses and eligible expenses related to these assets. The FDIC indemnification asset represents the present value of future expected reimbursements from the FDIC. Since the indemnified items are covered loans and covered OREO, which are initially measured at fair value, the FDIC indemnification asset is also initially measured at fair value by discounting the cash flows expected to be received from the FDIC. These cash flows are estimated by multiplying estimated losses on purchased impaired loans and OREO by the reimbursement rates in the FDIC Agreements.

The balance of the FDIC indemnification asset is adjusted periodically to reflect changes in estimated cash flows. Decreases in estimated reimbursements from the FDIC are recorded prospectively through amortization and increases in estimated reimbursements from the FDIC are recognized by an increase in the carrying value of the indemnification asset. Payments from the FDIC for reimbursement of losses result in a reduction of the FDIC indemnification asset.

10

Derivative Financial Instruments – In the ordinary course of business, the Company enters into derivative transactions as part of its overall interest rate risk management strategy to minimize significant unplanned fluctuations in earnings and cash flows caused by interest rate volatility. All derivative instruments are recorded at fair value as either other assets or other liabilities in the Consolidated Statements of Financial Condition. Subsequent changes in a derivative's fair value are recognized in earnings unless specific hedge accounting criteria are met.

On the date the Company enters into a derivative contract, the derivative is designated as a fair value hedge, a cash flow hedge, or a non-hedge derivative instrument. Fair value hedges are designed to mitigate exposure to changes in the fair value of an asset or liability attributable to a particular risk, such as interest rate risk. Cash flow hedges are designed to mitigate exposure to variability in expected future cash flows to be received or paid related to an asset, liability, or other type of forecasted transaction. The Company formally documents all relationships between hedging instruments and hedged items, including its risk management objective and strategy.

At the hedge's inception and quarterly thereafter, a formal assessment is performed to determine the effectiveness of the derivative in offsetting changes in the fair values or cash flows of the hedged items in the current period and prospectively. If a derivative instrument designated as a hedge is terminated or ceases to be highly effective, hedge accounting is discontinued prospectively, and the gain or loss is amortized into earnings. For fair value hedges, the gain or loss is amortized over the remaining life of the hedged asset or liability. For cash flow hedges, the gain or loss is amortized over the same period that the forecasted hedged transactions impact earnings. If the hedged item is disposed of, any fair value adjustments are included in the gain or loss from the disposition of the hedged item. If the forecasted transaction is no longer probable, the gain or loss is included in earnings immediately.

For effective fair value hedges, changes in the fair value of the derivative instruments, as well as changes in the fair value of the hedged item, are recognized in earnings. For cash flow hedges, the effective portion of the change in fair value of the derivative instrument is reported as a component of accumulated other comprehensive loss and is reclassified to earnings when the hedged transaction is reflected in earnings.

Ineffectiveness is calculated based on the change in fair value of the hedged item compared with the change in fair value of the hedging instrument. For all types of hedges, any ineffectiveness in the hedging relationship is recognized in earnings during the period the ineffectiveness occurs.

2. RECENT ACCOUNTING PRONOUNCEMENTS

Income Taxes: In January of 2014, the FASB issued guidance that requires an entity to present an unrecognized tax benefit, or a portion of an unrecognized tax benefit, as a reduction to a deferred tax asset for a net operating loss carryforward, a similar tax loss, or a tax credit carryforward. To the extent a net operating loss carryforward, a similar tax loss, or a tax credit carryforward is not available at the reporting date or, if the tax law of the applicable jurisdiction does not require the entity to use, and the entity does not intend to use, the deferred tax asset for such purpose, the unrecognized tax benefit should be presented in the financial statements as a liability and should not be combined with deferred tax assets. The guidance is effective for annual and interim reporting periods beginning on or after December 15, 2013, and must be applied prospectively. The adoption of this guidance on January 1, 2014 did not impact the Company's financial condition, results of operations, or liquidity.

Receivables - Troubled Debt Restructurings by Creditors: In January of 2014, the FASB issued guidance to clarify when an in substance repossession or foreclosure occurs and an entity is considered to have received physical possession of the residential real estate property such that a loan receivable should be derecognized and the real estate property recognized. Additionally, the guidance requires interim and annual disclosure of the amount of foreclosed residential real estate property held by the entity and the recorded investment in consumer mortgage loans collateralized by residential real estate property that are in the process of foreclosure according to local requirements of the applicable jurisdiction. The guidance is effective for annual and interim periods beginning after December 15,

2014 and can be applied retrospectively or prospectively. Management does not expect the adoption of this guidance to materially impact the Company's financial condition, results of operations, or liquidity.

3. SECURITIES

Securities are classified as held-to-maturity, trading, or available-for-sale at the time of purchase. Securities classified as held-to-maturity are securities for which management has the positive intent and ability to hold to maturity and are stated at cost.

The Company's trading securities consist of diversified investment securities reported at fair value that are held in a grantor trust under deferred compensation arrangements that allow plan participants to direct amounts into a variety of securities, including Company stock. Net trading gains represent changes in the fair value of the trading securities portfolio and are included in other noninterest income in the Condensed Consolidated Statements of Income.

All other securities are classified as available-for-sale and are carried at fair value with unrealized gains and losses, net of related deferred income taxes, recorded in stockholders' equity as a separate component of accumulated other comprehensive loss.

A summary of the Company's securities portfolio by category and maturity is presented in the following tables.

Securities Portfolio

(Dollar amounts in thousands)

	March 31, 2014				December 31, 2013			
	Amortized Cost	Gross Gains	Unrealized Losses	Fair Value	Amortized Cost	Gross Gains	Unrealized Losses	Fair Value
Securities Available-for-Sale

Total equity securities	3,324	1,134	(77)	4,381	3,706	2,046	(90)	5,662
Total available-for-sale securities	\$1,103,522	\$19,424	\$(42,196)	\$1,080,750	\$1,147,114	\$18,425	\$(52,814)	\$1,112,725
Securities Held-to-Maturity								
Municipal securities	\$43,251	\$—	\$(677)	\$42,574	\$44,322	\$—	\$(935)	\$43,387
Trading Securities				\$17,774				\$17,317

Remaining Contractual Maturity of Securities
(Dollar amounts in thousands)

	March 31, 2014		Held-to-Maturity	
	Available-for-Sale Amortized Cost	Fair Value	Amortized Cost	Fair Value
One year or less	\$34,285	\$33,245	\$3,609	\$3,552
After one year to five years	132,257	128,247	10,045	9,888
After five years to ten years	167,497	162,418	7,796	7,674
After ten years	167,161	162,093	21,801	21,460
Securities that do not have a single contractual maturity date	602,322	594,747	—	—
Total	\$1,103,522	\$1,080,750	\$43,251	\$42,574

The carrying value of securities available-for-sale that were pledged to secure deposits or for other purposes as permitted or required by law totaled \$675.5 million at March 31, 2014 and \$755.3 million at December 31, 2013. No securities held-to-maturity were pledged as of March 31, 2014 or December 31, 2013.

Purchases and sales of securities are recognized on a trade date basis. Realized securities gains or losses are reported in net securities gains in the Condensed Consolidated Statements of Income. The cost of securities sold is based on the specific identification method. The following table presents net realized gains on securities.

Securities Gains

(Dollar amounts in thousands)

	Quarters Ended	
	March 31, 2014	2013
Gains on sales of securities:		
Gross realized gains	\$1,101	\$—
Gross realized losses	—	—
Net realized gains on securities sales	1,101	—
Non-cash impairment charges:		
OTTI	(28) —
Portion of OTTI recognized in other comprehensive loss	—	—
Net non-cash impairment charges	(28) —
Net realized gains	\$1,073	\$—
Net trading gains ⁽¹⁾	\$191	\$1,036

⁽¹⁾ All net trading gains relate to trading securities still held as of March 31, 2014 and March 31, 2013 and are included in other income in the Condensed Consolidated Statement of Income.

The non-cash impairment charges in the table above relate to OTTI charges on certain CMOs. Accounting guidance requires that the credit portion of an OTTI charge be recognized through income. If a decline in fair value below carrying value is not attributable to credit deterioration and the Company does not intend to sell the security or believe it would not be more likely than not required to sell the security prior to recovery, the Company records the non-credit related portion of the decline in fair value in other comprehensive income (loss).

The following table presents the cumulative amount of OTTI on CDOs related to credit deterioration recognized by year in earnings.

OTTI on CDOs

(Dollar amounts in thousands)

Number	Quarters Ended		Life-to-Date
	March 31,		
	2014	2013	
1	\$—	\$—	\$10,360
2	—	—	9,402
3	—	—	2,262
4	—	—	1,078
5	—	—	8,570
6	—	—	243
7	—	—	6,750
	\$—	\$—	\$38,665

In deriving the credit component of the impairment on the CDOs, projected cash flows were discounted at the contractual rate and compared to the fair values computed by discounting future projected cash flows at the London Interbank Offered Rate (“LIBOR”) plus an adjustment to reflect the higher risk inherent in these securities given their complex structures and the impact of market factors.

The following table presents a rollforward of life-to-date OTTI recognized in earnings related to all available-for-sale securities held by the Company for the quarters ended March 31, 2014 and 2013.

Changes in OTTI Recognized in Earnings

(Dollar amounts in thousands)

	Quarters Ended	
	March 31,	
	2014	2013
Beginning balance	\$32,422	\$38,803
OTTI included in earnings ⁽¹⁾ :		
Losses on securities that previously had OTTI	28	—
Losses on securities that did not previously have OTTI	—	—
Reduction for securities sales	—	—
Ending balance	\$32,450	\$38,803

⁽¹⁾ Included in net securities gains in the Condensed Consolidated Statements of Income.

The following table presents the aggregate amount of unrealized losses and the aggregate related fair values of securities with unrealized losses as of March 31, 2014 and December 31, 2013.

Securities in an Unrealized Loss Position
(Dollar amounts in thousands)

	Number of Securities	Less Than 12 Months		Greater Than 12 Months		Total	
		Fair Value	Unrealized Losses	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses
As of March 31, 2014							
CMOs	60	\$276,580	\$8,693	\$93,180	\$3,655	\$369,760	\$12,348
Other MBSs	12	17,602	298	29,461	1,274	47,063	1,572
Municipal securities	137	30,970	540	53,560	2,793	84,530	3,333
CDOs	6	—	—	21,666	24,866	21,666	24,866
Equity securities	1	2,192	77	—	—	2,192	77
Total	216	\$327,344	\$9,608	\$197,867	\$32,588	\$525,211	\$42,196
As of December 31, 2013							
CMOs	67	\$338,064	\$14,288	\$57,269	\$2,333	\$395,333	\$16,621
Other MBSs	19	57,311	2,281	356	1	57,667	2,282
Municipal securities	154	65,370	3,245	27,565	2,353	92,935	5,598
CDOs	6	—	—	18,309	28,223	18,309	28,223
Equity securities	1	2,168	90	—	—	2,168	90
Total	247	\$462,913	\$19,904	\$103,499	\$32,910	\$566,412	\$52,814

Substantially all of the Company's CMOs and other MBSs are either backed by U.S. government-owned agencies or issued by U.S. government-sponsored enterprises. Municipal securities are issued by municipal authorities, and the majority are supported by third-party insurance or some other form of credit enhancement. Management does not believe any individual unrealized loss as of March 31, 2014 represents an OTTI related to credit deterioration. The unrealized losses associated with these securities are not believed to be attributed to credit quality, but rather to changes in interest rates and temporary market movements. In addition, the Company does not intend to sell the securities with unrealized losses, and it is not more likely than not that the Company will be required to sell them before recovery of their amortized cost basis, which may be at maturity.

The unrealized losses on CDOs as of March 31, 2014 reflect the illiquidity of these structured investment vehicles. Management does not believe these unrealized losses represent OTTI related to credit deterioration. In addition, the Company does not intend to sell the CDOs with unrealized losses within a short period of time, and the Company does not believe it is more likely than not that it will be required to sell them before recovery of their amortized cost basis, which may be at maturity.

Significant judgment is required to calculate the fair value of the CDOs, all of which are pooled. The Company estimates the fair value of these securities using discounted cash flow analyses with the assistance of a structured credit valuation firm. For additional discussion of the CDO valuation methodology, refer to Note 11, "Fair Value."

4. LOANS

Loans Held-for-Investment

The following table presents the Company's loans held-for-investment by class.

Loan Portfolio

(Dollar amounts in thousands)

	March 31, 2014	December 31, 2013
Commercial and industrial	\$1,917,396	\$1,830,638
Agricultural	321,343	321,702
Commercial real estate:		
Office, retail, and industrial	1,348,094	1,353,685
Multi-family	337,332	332,873
Construction	181,012	186,197
Other commercial real estate	822,934	807,071
Total commercial real estate	2,689,372	2,679,826
Total corporate loans	4,928,111	4,832,166
Home equity	475,103	427,020
1-4 family mortgages	240,561	275,992
Installment	49,315	44,827
Total consumer loans	764,979	747,839
Total loans, excluding covered loans	5,693,090	5,580,005
Covered loans ⁽¹⁾	122,387	134,355
Total loans	\$5,815,477	\$5,714,360
Deferred loan fees included in total loans	\$4,244	\$4,656
Overdrawn demand deposits included in total loans	3,843	5,047

⁽¹⁾ For information on covered loans, refer to Note 5, "Acquired Loans."

The Company primarily lends to small and mid-sized businesses, commercial real estate customers, and consumers in its markets. Within these areas, the Company diversifies its loan portfolio by loan type, industry, and borrower.

It is the Company's policy to review each prospective credit to determine the appropriateness and the adequacy of security or collateral prior to making a loan. In the event of borrower default, the Company seeks recovery in compliance with state lending laws, the Company's lending standards, and credit monitoring and remediation procedures. A discussion of risk characteristics relevant to each portfolio segment is presented in Note 4, "Loans," in the Company's 2013 10-K.

Mortgage Loan Sales

During the quarter ended March 31, 2014, a gain of \$1.1 million was recognized on the sale of \$50.8 million of mortgage loans, of which \$15.5 million were originated with the intent to sell. For the quarter ended March 31, 2013, a gain of \$2.0 million was recognized on \$54.0 million of mortgage loans sold, none of which were originated with the intent to sell. The Company retained servicing responsibilities for a portion of the sold mortgages and collects servicing fees equal to a percentage of the outstanding principal balance. The Company also retained limited recourse for credit losses on the sold loans. A description of the recourse obligation is presented in Note 10, "Commitments, Guarantees, and Contingent Liabilities."

5. ACQUIRED LOANS

Since 2009, the Company acquired the majority of the assets and assumed the deposits of four financial institutions in FDIC-assisted transactions. In three of those transactions, most loans and OREO acquired are covered by the FDIC Agreements. The significant accounting policies related to purchased impaired loans and the related FDIC indemnification asset are presented in Note 1, "Summary of Significant Accounting Policies."

Acquired Loans

(Dollar amounts in thousands)

	March 31, 2014			December 31, 2013		
	Covered	Non-Covered	Total	Covered	Non-Covered	Total
Purchased impaired loans	\$92,621	(1) \$ 15,341	\$ 107,962	\$ 103,525	(1) \$ 15,608	\$ 119,133
Other loans (2)	29,766	14,512	44,278	30,830	17,024	47,854
Total acquired loans	\$ 122,387	\$ 29,853	\$ 152,240	\$ 134,355	\$ 32,632	\$ 166,987

(1) At acquisition, the Company made an election to account for certain covered loans as purchased impaired loans. These loans totaled \$23.3 million at March 31, 2014 and \$24.6 million at December 31, 2013.

(2) These loans did not meet the criteria to be accounted for as purchased impaired loans.

In connection with the FDIC Agreements, the Company recorded an indemnification asset. To maintain eligibility for the loss share reimbursement, the Company is required to follow certain servicing procedures as specified in the FDIC Agreements. The Company was in compliance with those requirements as of March 31, 2014 and December 31, 2013.

Changes in the FDIC Indemnification Asset

(Dollar amounts in thousands)

	Quarters Ended	
	March 31, 2014	2013
Beginning balance	\$ 16,585	\$ 37,051
Amortization	(1,316)	(1,324)
Change in expected reimbursements from the FDIC for changes in expected credit losses	1,161	(942)
Payments received from the FDIC	(893)	(5,827)
Ending balance	\$ 15,537	\$ 28,958

Changes in the accretable yield for purchased impaired loans were as follows.

Changes in Accretable Yield

(Dollar amounts in thousands)

	Quarters Ended	
	March 31, 2014	2013
Beginning balance	\$ 36,792	\$ 51,498
Accretion	(3,510)	(3,886)
Other (1)	(1,272)	(2,080)
Ending balance	\$ 32,010	\$ 45,532

(1) Decreases result from the resolution of certain loans occurring earlier than anticipated.

6. PAST DUE LOANS, ALLOWANCE FOR CREDIT LOSSES, IMPAIRED LOANS, AND TDRS

Past Due and Non-accrual Loans

The following table presents an aging analysis of the Company's past due loans as of March 31, 2014 and December 31, 2013. The aging is determined without regard to accrual status. The table also presents non-performing loans, consisting of non-accrual loans (the majority of which are past due) and loans 90 days or more past due and still accruing interest, as of each balance sheet date.

Aging Analysis of Past Due Loans and Non-Performing Loans by Class
(Dollar amounts in thousands)

	Aging Analysis (Accruing and Non-accrual)				Non-performing Loans		
	Current	30-89 Days Past Due	90 Days or More Past Due	Total Past Due	Total Loans	Non- accrual Loans	90 Days Past Due Loans, Still Accruing Interest

18

Allowance for Credit Losses

The Company maintains an allowance for credit losses at a level deemed adequate by management to absorb probable losses inherent in the loan portfolio. Refer to Note 1, "Summary of Significant Accounting Policies," for the accounting policy for the allowance for credit losses. A rollforward of the allowance for credit losses by portfolio segment for the quarters ended March 31, 2014 and 2013 is presented in the table below.

Allowance for Credit Losses by Portfolio Segment

(Dollar amounts in thousands)

	Commercial Industrial, and Agricultural	Office, Retail, and Industrial	Multi- Family	Construction	Other Commercial Real Estate	Consumer	Covered Loans	Reserve for Unfunded Commitments	Total Allowance

21

Credit Quality Indicators

Corporate loans and commitments are assessed for credit risk and assigned ratings based on various characteristics, such as the borrower's cash flow, leverage, and collateral. Ratings for commercial credits are reviewed periodically. The following tables present credit quality indicators by class for corporate and consumer loans, excluding covered loans, as of March 31, 2014 and December 31, 2013.

Corporate Credit Quality Indicators by Class, Excluding Covered Loans

(Dollar amounts in thousands)

Total corporate loans	\$4,627,742	\$79,227	\$79,537	\$45,660	\$4,832,166

(1) Loans categorized as special mention exhibit potential weaknesses that require the close attention of management since these potential weaknesses may result in the deterioration of repayment prospects in the future.

(2) Loans categorized as substandard exhibit a well-defined weakness or weaknesses that may jeopardize the liquidation of the debt. These loans continue to accrue interest because they are well secured and collection of principal and interest is expected within a reasonable time.

(3) Loans categorized as non-accrual exhibit a well-defined weakness or weaknesses that may jeopardize the liquidation of the debt or result in a loss if the deficiencies are not corrected.

(4) Total special mention and substandard loans includes accruing TDRs of \$2.4 million as of March 31, 2014 and \$2.8 million as of December 31, 2013.

Consumer Credit Quality Indicators by Class, Excluding Covered Loans

(Dollar amounts in thousands)

	Performing	Non-accrual	Total

Total consumer loans	\$733,701	\$14,138	\$747,839

TDRs

TDRs are generally performed at the request of the individual borrower and may include forgiveness of principal, reduction in interest rates, changes in payments, and maturity date extensions. The table below presents TDRs by class as of March 31, 2014 and December 31, 2013. A discussion of our accounting policies for TDRs can be found in Note 1, "Summary of Significant Accounting Policies."

TDRs by Class

(Dollar amounts in thousands)

	As of March 31, 2014			As of December 31, 2013		
	Accruing	Non-accrual ⁽¹⁾	Total	Accruing	Non-accrual ⁽¹⁾	Total

Total loans	\$6,301	\$1,920	\$8,221	\$23,770	\$4,083	\$27,853

⁽¹⁾ These TDRs are included in non-accrual loans in the preceding tables.

TDRs are included in the calculation of the allowance for credit losses in the same manner as impaired loans. There were no specific reserves related to TDRs as of March 31, 2014 and there were \$2.0 million in specific reserves related to TDRs as of December 31, 2013.

During the quarter ended March 31, 2014, no loans were restructured. The following table presents a summary of loans that were restructured during the quarter ended March 31, 2013.

Loans Restructured During the Period
(Dollar amounts in thousands)

	Number of Loans	Pre- Modification Recorded Investment	Funds Disbursed	Interest and Escrow Capitalized	Charge-offs	Post- Modification Recorded Investment
Quarter ended March 31, 2013						
Commercial and industrial	2	\$716	\$—	\$2	\$—	\$718
Office, retail, and industrial	1	215	30	—	—	245
Construction	2	508	—	—	—	508
1-4 family mortgages	1	132	—	4	—	136
Total TDRs restructured during the period	6	\$1,571	\$30	\$6	\$—	\$1,607

Accruing TDRs that do not perform in accordance with their modified terms are transferred to non-accrual. The following table presents TDRs that had payment defaults during the quarters ended March 31, 2014 and 2013 where the default occurred within twelve months of the restructure date.

TDRs That Defaulted Within Twelve Months of the Restructure Date
(Dollar amounts in thousands)

	Quarters Ended March 31, 2014		2013	
	Number of Loans	Recorded Investment	Number of Loans	Recorded Investment
Commercial and industrial	2	\$125	1	\$350
Other commercial real estate	—	—	2	156
Total	2	\$125	3	\$506

A rollforward of the carrying value of TDRs for the quarters ended March 31, 2014 and 2013 is presented in the following table.

TDR Rollforward

(Dollar amounts in thousands)

	Quarters Ended	
	March 31,	
	2014	2013
Accruing		
Beginning balance	\$23,770	\$6,867
Additions	—	1,435
Net payments received	(460) (29
Returned to performing status	(18,821) (5,037
Net transfers from non-accrual	1,812	(649
Ending balance	6,301	2,587
Non-accrual		
Beginning balance	4,083	10,924
Additions	—	172
Net payments received	(134) (495
Charge-offs	(34) (803
Transfers to OREO	(183) (42
Loans sold	—	—
Net transfers to accruing	(1,812) 649
Ending balance	1,920	10,405
Total TDRs	\$8,221	\$12,992

For TDRs to be removed from TDR status in the calendar year after the restructuring, the loans must (i) have an interest rate and terms that reflect market conditions at the time of restructuring, and (ii) be in compliance with the modified terms. TDRs that were returned to performing status totaled \$18.8 million and \$5.0 million for the quarters ended March 31, 2014 and 2013, respectively. Loans that were not restructured at market rates and terms, that are not in compliance with the modified terms, or for which there is a concern about the future ability of the borrower to meet its obligations under the modified terms, continue to be separately reported as restructured until paid in full or charged-off.

There were no commitments to lend additional funds to borrowers with TDRs as of March 31, 2014, and there were \$180,000 in commitments as of December 31, 2013.

7. EARNINGS PER COMMON SHARE

The table below displays the calculation of basic and diluted earnings per share.

Basic and Diluted Earnings per Common Share

(Amounts in thousands, except per share data)

	Quarters Ended	
	March 31,	
	2014	2013
Net income	\$17,664	\$14,642
Net income applicable to non-vested restricted shares	(225) (212
Net income applicable to common shares	\$17,439	\$14,430
Weighted-average common shares outstanding:		
Weighted-average common shares outstanding (basic)	74,147	73,867
Dilutive effect of common stock equivalents	12	7
Weighted-average diluted common shares outstanding	74,159	73,874
Basic earnings per common share	\$0.24	\$0.20
Diluted earnings per common share	\$0.24	\$0.20
Anti-dilutive shares not included in the computation of diluted earnings per common share ⁽¹⁾	1,316	1,594

⁽¹⁾ This amount represents outstanding stock options for which the exercise price is greater than the average market price of the Company's common stock.

8. INCOME TAXES

The following table presents income tax expense and the effective income tax rate for the quarters ended March 31, 2014 and 2013.

Income Tax Expense
(Dollar amounts in thousands)

	Quarters Ended		
	March 31,		
	2014	2013	
Income before income tax expense	\$25,836	\$20,935	
Income tax expense:			
Federal income tax expense	\$6,278	\$4,360	
State income tax expense	1,894	1,933	
Total income tax expense	\$8,172	\$6,293	
Effective income tax rate	31.6	% 30.1	%

Federal income tax expense and the related effective income tax rate are influenced primarily by the amount of tax-exempt income derived from investment securities and BOLI in relation to pre-tax income and state income taxes. State income tax expense and the related effective income tax rate are driven by the amount of state tax-exempt income in relation to pre-tax income and state tax rules related to consolidated/combined reporting and sourcing of income and expense.

Income tax expense was \$8.2 million for the first quarter of 2014 compared to \$6.3 million for the same period in 2013 primarily as a result of higher levels of income subject to tax at statutory rates in 2014.

The increase in the effective income tax rate of 31.6% for the first quarter of 2014 compared to 30.1% for the same period in 2013 was driven by lower tax-exempt income in relation to pre-tax income.

The Company's accounting policies for income taxes are included in Note 1, "Summary of Significant Accounting Policies," and Note 14, "Income Taxes," in the Company's 2013 10-K.

9. DERIVATIVE INSTRUMENTS AND HEDGING ACTIVITIES

In the ordinary course of business, the Company enters into derivative transactions as part of its overall interest rate risk management strategy. The significant accounting policies related to derivative instruments and hedging activities are presented in Note 1, "Summary of Significant Accounting Policies."

The Company hedges the fair value of fixed rate commercial real estate loans using interest rate swaps through which the Company pays fixed amounts and receives variable amounts. These derivative contracts are designated as fair value hedges.

Fair Value Hedges

(Dollar amounts in thousands)

	March 31, 2014		December 31, 2013	
Notional amount outstanding	\$ 14,492		\$ 14,730	
Derivative liability fair value	(1,356)	(1,472)
Weighted-average interest rate received	2.07	%	2.08	%
Weighted-average interest rate paid	6.39	%	6.39	%
Weighted-average maturity (in years)	3.51		3.76	
Cash pledged to collateralize net unrealized losses with counterparties ⁽¹⁾	\$ 1,583		\$ 1,583	
Fair value of assets needed to settle derivative transactions ⁽²⁾	1,385		1,502	

⁽¹⁾ No other collateral was required to be pledged.

⁽²⁾ This amount represents the fair value of assets needed to settle derivative transactions if credit risk related contingent features were triggered.

Hedge ineffectiveness is recognized in other noninterest income in the Condensed Consolidated Statements of Income. For the quarters ended March 31, 2014 and 2013, gains or losses relating to fair value hedge ineffectiveness were not material.

The Company also enters into derivative transactions with its commercial customers and simultaneously enters into an offsetting interest rate derivative transaction with a third-party. This transaction allows the Company's customers to effectively convert a variable rate loan into a fixed rate loan. Due to the offsetting nature of these transactions, the Company does not apply hedge accounting treatment. Transaction fees related to commercial customer derivative instruments of \$204 thousand and \$522 thousand were recorded in noninterest income for the quarters ended March 31, 2014 and 2013, respectively.

Other Derivative Instruments

(Dollar amounts in thousands)

	March 31, 2014		December 31, 2013	
Notional amount outstanding	\$ 160,211		\$ 128,319	
Derivative asset fair value	3,462		2,235	
Derivative liability fair value	(3,462)	(2,235)
Cash pledged to collateralize net unrealized losses with counterparties ⁽¹⁾	2,410		1,420	
Fair value of assets needed to settle derivative transactions ⁽²⁾	5,287		1,305	

⁽¹⁾ No other collateral was required to be pledged.

⁽²⁾ This amount represents the fair value if credit risk related contingent features were triggered.

Derivative instruments are inherently subject to credit risk, which represents the Company's risk of loss when the counterparty to a derivative contract fails to perform according to the terms of the agreement. Credit risk is managed by limiting and collateralizing the aggregate amount of net unrealized losses by transaction, monitoring the size and the maturity structure of the derivatives, and applying uniform credit standards. Company policy establishes limits on credit exposure to any single counterparty. In addition, the Company established bilateral collateral agreements with derivative counterparties that provide for exchanges of marketable securities or cash to collateralize either party's net losses above a stated minimum threshold. At March 31, 2014 and December 31, 2013, these collateral agreements covered 100% of the fair value of the Company's outstanding fair value hedges. Derivative assets and liabilities are presented gross, rather than net, of pledged collateral amounts.

As of March 31, 2014 and December 31, 2013, the Company's derivative instruments generally contained provisions that require the Company's debt to remain above a certain credit rating by each of the major credit rating agencies or that the Company maintain certain capital levels. If the Company's debt were to fall below that credit rating or the Company's capital were to fall below the required levels, it would be in violation of those provisions, and the counterparties to the derivative instruments could terminate the swap transaction and demand cash settlement of the derivative instrument in an amount equal to the derivative liability fair value. As of March 31, 2014 and December 31, 2013, the Company was not in violation of these provisions.

The Company's derivative portfolio also includes other derivative instruments that do not receive hedge accounting treatment consisting of commitments to originate 1-4 family mortgage loans and foreign exchange contracts. In addition, the Company occasionally enters into risk participation agreements with counterparty banks to transfer or assume a portion of the credit risk related to customer transactions. The amounts of these instruments were not material for any period presented. The Company had no other derivative instruments as of March 31, 2014 or December 31, 2013. The Company does not enter into derivative transactions for purely speculative purposes.

10. COMMITMENTS, GUARANTEES, AND CONTINGENT LIABILITIES

Credit Commitments and Guarantees

In the normal course of business, the Company enters into a variety of financial instruments with off-balance sheet risk to meet the financing needs of its customers and to conduct lending activities, including commitments to extend credit and standby and commercial letters of credit. These instruments involve elements of credit and interest rate risk in excess of the amount recognized in the Consolidated Statements of Financial Condition.

Contractual or Notional Amounts of Financial Instruments

(Dollar amounts in thousands)

	March 31, 2014	December 31, 2013
Commitments to extend credit:		
Commercial and industrial	\$1,010,276	\$1,020,617
Agricultural	61,960	56,584
Commercial real estate	145,347	133,867
Home equity	274,639	268,311
Installment	11,109	10,746
Overdraft protection program ⁽¹⁾	170,721	170,956
Total commitments	\$1,674,052	\$1,661,081
Letters of credit:		
Commercial and industrial	\$67,851	\$64,015
Agricultural	1,344	1,581
Commercial real estate	39,230	43,771
Consumer	1,028	1,086
Total letters of credit	\$109,453	\$110,453
Unamortized fees associated with letters of credit ⁽²⁾⁽³⁾	\$563	\$582
Remaining weighted-average term, in months	8.45	9.83
Remaining lives, in years	0.1 to 14.5	0.1 to 14.7
Recourse on assets sold:		
Unpaid principal balance of loans sold	\$174,348	\$170,330
Carrying value of recourse obligation ⁽²⁾	159	162

⁽¹⁾ Federal regulations regarding electronic fund transfers require customers to affirmatively consent to the institution's overdraft service for automated teller machine and one-time debit card transactions before overdraft

fees may be assessed on the account. Customers are provided a specific line for the amount they may overdraw.

- (2) Included in other liabilities in the Consolidated Statements of Financial Condition.
- (3) The Company is amortizing these amounts into income over the commitment period.

29

Commitments to extend credit are agreements to lend funds to a customer, subject to contractual terms and covenants. Commitments generally have fixed expiration dates or other termination clauses, variable interest rates, and fee requirements, when applicable. Since many of the commitments are expected to expire without being drawn, the total commitment amounts do not necessarily represent future cash flow requirements.

In the event of a customer's non-performance, the Company's credit loss exposure is equal to the contractual amount of the commitments. The credit risk is essentially the same as extending loans to customers. The Company uses the same credit policies for credit commitments as its loans and minimizes exposure to credit loss through various collateral requirements.

Letters of credit are conditional commitments issued by the Company to guarantee the performance of a customer to a third party. Standby letters of credit generally are contingent on the failure of the customer to perform according to the terms of the contract with the third party and are often issued in favor of a municipality where construction is taking place to ensure the borrower adequately completes the construction.

The maximum potential future payments guaranteed by the Company under standby letters of credit arrangements are equal to the contractual amount of the commitment. If a commitment is funded, the Company may seek recourse through the liquidation of the underlying collateral, including real estate, production plants and property, marketable securities, or receipt of cash.

As a result of the sale of certain 1-4 family mortgage loans, the Company is contractually obligated to repurchase any non-performing loans or loans that do not meet underwriting requirements at recorded value. In accordance with the sales agreements, there is no limitation to the maximum potential future payments or expiration of the Company's recourse obligation. There were no material loan repurchases during the quarters ended March 31, 2014 and 2013.

Legal Proceedings

In the ordinary course of business, there were certain legal proceedings pending against the Company and its subsidiaries at March 31, 2014. While the outcome of any legal proceeding is inherently uncertain, based on information currently available, the Company's management believes that any liabilities arising from pending legal matters are not expected to have a material adverse effect on the Company's financial position, results of operations, or cash flows.

11. FAIR VALUE

Fair value represents the amount expected to be received to sell an asset or paid to transfer a liability in its principal or most advantageous market in an orderly transaction between market participants at the measurement date. In accordance with fair value accounting guidance, the Company measures, records, and reports various types of assets and liabilities at fair value on either a recurring or non-recurring basis in the Consolidated Statements of Financial Condition. Those assets and liabilities are presented below in the sections titled "Assets and Liabilities Required to be Measured at Fair Value on a Recurring Basis" and "Assets and Liabilities Required to be Measured at Fair Value on a Non-Recurring Basis."

Other assets and liabilities are not required to be measured at fair value in the Consolidated Statements of Financial Condition, but must be disclosed at fair value. Refer to the "Fair Value Measurements of Other Financial Instruments" section of this footnote. Any aggregation of the estimated fair values presented in this footnote does not represent the value of the Company.

Depending on the nature of the asset or liability, the Company uses various valuation methodologies and assumptions to estimate fair value. GAAP provides a three-tiered fair value hierarchy based on the inputs used to measure fair value. The hierarchy is defined as follows:

• Level 1 - Quoted prices in active markets for identical assets or liabilities.

• Level 2 - Observable inputs other than level 1 prices, such as quoted prices for similar instruments, quoted prices in markets that are not active, or other inputs that are observable or can be corroborated by observable market data.

•

Level 3 - Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities. These inputs require significant management judgment or estimation, some of which use model-based techniques and may be internally developed.

Assets and liabilities are assigned to a level within the fair value hierarchy based on the lowest level of significant input used to measure fair value. Assets and liabilities may change levels within the fair value hierarchy due to market conditions or other circumstances. Those transfers are recognized on the date of the event that prompted the transfer. There were no transfers of assets or liabilities between levels of the fair value hierarchy during the periods presented.

30

Assets and Liabilities Required to be Measured at Fair Value on a Recurring Basis

The following table provides the fair value for assets and liabilities required to be measured at fair value on a recurring basis in the Consolidated Statements of Financial Condition by level in the fair value hierarchy.

Recurring Fair Value Measurements

(Dollar amounts in thousands)

	March 31, 2014			December 31, 2013

⁽²⁾ Included in other liabilities in the Consolidated Statements of Financial Condition.

The following sections describe the specific valuation techniques and inputs used to measure financial assets and liabilities at fair value.

Trading Securities

The Company's trading securities consist of diversified investment securities held in a grantor trust and are invested in money market and mutual funds. The fair value of these money market and mutual funds is based on quoted market prices in active exchange markets and is classified in level 1 of the fair value hierarchy.

Securities Available-for-Sale

The Company's available-for-sale securities are primarily fixed income instruments that are not quoted on an exchange, but may be traded in active markets. The fair values are based on quoted prices in active markets or market prices for similar securities obtained from external pricing services or dealer market participants and are classified in level 2 of the fair value hierarchy. Quarterly, the Company evaluates the methodologies used by its external pricing services to develop the fair values to determine whether the results of the valuations are representative of an exit price in the Company's principal markets and an appropriate representation of fair value.

The Company's hedge fund investment is classified in level 2 of the fair value hierarchy. The fair value is derived from monthly and annual financial statements provided by hedge fund management. The majority of the hedge fund's investment portfolio is held in securities that are freely tradable and are listed on national securities exchanges.

CDOs are classified in level 3 of the fair value hierarchy. The Company estimates the fair values for each CDO using discounted cash flow analyses with the assistance of a structured credit valuation firm. This methodology relies on credit analysis and review of historical financial data for each of the issuers of the securities underlying the individual CDO (the “Issuers”) to estimate the cash flows. These estimates are highly subjective and sensitive to several significant, unobservable inputs, including prepayment assumptions, default probabilities, loss given default assumptions, and deferral cure probabilities. The cash flows for each Issuer are then discounted to present values using LIBOR plus an adjustment to reflect the higher risk inherent in these securities given their complex structures and the impact of market factors. Finally, the discounted cash flows for each Issuer are aggregated to derive the estimated fair value for the specific CDO. Information for each CDO, as well as the significant unobservable assumptions, is presented in the following table.

Characteristics of CDOs and Significant Unobservable Inputs

Used in the Valuation of CDOs as of March 31, 2014

(Dollar amounts in thousands)

	CDO Number						
	1	2	3	4	5	6	
Characteristics:							
Class	C-1	C-1	C-1	B1	C	C	
Original par	\$17,500	\$15,000	\$15,000	\$15,000	\$10,000	\$6,500	
Amortized cost	7,140	5,598	12,377	13,922	1,317	6,178	
Fair value	5,002	636	4,666	5,883	3,134	2,345	
Lowest credit rating (Moody’s)Ca		Ca	Ca	Ca	C	Ca	
Number of underlying Issuers	43	55	57	59	55	76	
Percent of Issuers currently performing	83.7	% 80.0	% 77.2	% 54.2	% 69.1	% 69.7	%
Current deferral and default percent ⁽¹⁾	8.7	% 11.4	% 11.3	% 34.8	% 32.4	% 27.1	%
Expected future deferral and default percent ⁽²⁾	11.9	% 12.6	% 15.8	% 24.2	% 16.2	% 11.3	%
Excess subordination percent ⁽³⁾	—	% —	% —	% —	% —	% 3.6	%
Discount rate risk adjustment ⁽⁴⁾	12.5	% 14.3	% 13.3	% 11.8	% 13.3	% 12.3	%
Significant unobservable inputs, weighted average of Issuers:							
Probability of prepayment	15.3	% 7.5	% 4.5	% 6.0	% 5.3	% 3.5	%
Probability of default	18.1	% 23.2	% 21.2	% 24.9	% 35.1	% 29.2	%
Loss given default	88.0	% 83.5	% 89.0	% 93.2	% 93.1	% 96.0	%
Probability of deferral cure	32.9	% 20.2	% 29.5	% 56.3	% 37.3	% 34.8	%

⁽¹⁾ Represents actual deferrals and defaults, net of recoveries, as a percent of the original collateral.

Represents expected future deferrals and defaults, net of recoveries, as a percent of the remaining performing collateral. The probability of future defaults is derived for each Issuer based on a credit analysis. The associated

⁽²⁾ assumed loss given default is based on historical default and recovery information provided by a nationally recognized credit rating agency and is assumed to be 90% for banks, 85% for insurance companies, and 100% for Issuers that have already defaulted.

⁽³⁾ Represents additional defaults that the CDO can absorb before the security experiences any credit impairment. The excess subordination percentage is calculated by dividing the amount of potential additional loss that can be absorbed (before the receipt of all expected future principal and interest payments is affected) by the total balance

of performing collateral.

(4) Cash flows are discounted at LIBOR plus this adjustment to reflect the higher risk inherent in these securities.

Most Issuers have the right to prepay the securities on the fifth anniversary of issuance and under other limited circumstances. To estimate prepayments, a credit analysis of each Issuer is performed to estimate its ability and likelihood to fund a prepayment. If a prepayment occurs, the Company receives cash equal to the par value for the portion of the CDO associated with that Issuer.

The likelihood that an Issuer who is currently deferring payment on the securities will pay all deferred amounts and remain current thereafter is based on an analysis of the Issuer's asset quality, leverage ratios, and other measures of financial viability.

32

The impact of changes in these key inputs could result in a significantly higher or lower fair value measurement for each CDO. The timing of the default, the magnitude of the default, and the timing and magnitude of the cure probability are directly interrelated. Defaults that occur sooner and/or are greater than anticipated have a negative impact on the valuation. In addition, a high cure probability assumption has a positive effect on the fair value, and, if a cure event takes place sooner than anticipated, the impact on the valuation is also favorable.

Management monitors the valuation results of each CDO on a quarterly basis, which includes an analysis of historical pricing trends for these types of securities, overall economic conditions (such as tracking LIBOR curves), and the performance of the Issuers' industries. Management also reviews market activity for the same or similar tranches of the CDOs, when available. Annually, management validates significant assumptions by reviewing detailed back-testing performed by the structured credit valuation firm.

A rollforward of the carrying value of CDOs for the quarters ended March 31, 2014 and 2013 is presented in the following table.

Rollforward of the Carrying Value of CDOs
(Dollar amounts in thousands)

	Quarters Ended	
	March 31, 2014	2013
Beginning balance	\$18,309	\$12,129
Change in other comprehensive income (loss) ⁽¹⁾	3,357	795
Ending balance ⁽²⁾	\$21,666	\$12,924
Change in unrealized losses recognized in earnings related to securities still held at end of period	\$—	\$—

⁽¹⁾ Included in unrealized holding gains (losses) in the Consolidated Statements of Comprehensive Income.

⁽²⁾ There were no purchases, issuances, or settlements of CDOs during the periods presented.

Mortgage Servicing Rights

The Company services loans for others totaling \$216.4 million as of March 31, 2014 and \$214.5 million as of December 31, 2013. These loans are owned by third parties and are not included in the Consolidated Statements of Condition. The Company estimates the fair value of mortgage servicing rights by using a discounted cash flow analysis and classifies them in level 3 of the fair value hierarchy. Additional information regarding the Company's mortgage servicing rights can be found in Note 21, "Fair Value," in the Company's 2013 10-K.

Derivative Assets and Derivative Liabilities

The Company enters into interest rate swaps and derivative transactions with commercial customers. These derivative transactions are executed in the dealer market, and pricing is based on market quotes obtained from the counterparties. The market quotes were developed using market observable inputs, which primarily include LIBOR. Therefore, derivatives are classified in level 2 of the fair value hierarchy. For its derivative assets and liabilities, the Company also considers non-performance risk, including the likelihood of default by itself and its counterparties, when evaluating whether the market quotes from the counterparty are representative of an exit price.

Assets and Liabilities Required to be Measured at Fair Value on a Non-Recurring Basis

The following table provides the fair value for each class of assets and liabilities required to be measured at fair value on a non-recurring basis in the Consolidated Statements of Financial Condition by level in the fair value hierarchy.

Non-Recurring Fair Value Measurements

(Dollar amounts in thousands)

	March 31, 2014			December 31, 2013		
	Level 1	Level 2	Level 3	Level 1	Level 2	Level 3
Collateral-dependent impaired loans ⁽¹⁾	\$—	\$—	\$22,583	\$—	\$—	\$13,103
OREO ⁽²⁾	—	—	7,317	—	—	13,347
Assets held-for-sale ⁽³⁾	—	—	3,985	—	—	4,027

⁽¹⁾ Includes impaired loans with charge-offs and impaired loans with a specific reserve during the periods presented.

⁽²⁾ Includes OREO and covered OREO with fair value adjustments subsequent to initial transfer that occurred during the periods presented.

⁽³⁾ Included in premises, furniture, and equipment in the Consolidated Statements of Financial Condition.

Collateral-Dependent Impaired Loans

Certain collateral-dependent impaired loans are subject to fair value adjustments to reflect the difference between the carrying value of the loan and the value of the underlying collateral. The fair values of collateral-dependent impaired loans are primarily determined by current appraised values of the underlying collateral. Based on the age and/or type, appraisals may be adjusted in the range of 0% to 20%. In certain cases, an internal valuation may be used when the underlying collateral is located in areas where comparable sales data is limited or unavailable. Accordingly, collateral-dependent impaired loans are classified in level 3 of the fair value hierarchy.

Collateral-dependent impaired loans for which the fair value is greater than the recorded investment are not measured at fair value in the Consolidated Statements of Financial Condition and are not included in this disclosure.

OREO

The fair value of OREO is measured using the current appraised value of the properties. In certain circumstances, a current appraisal may not be available or may not represent an accurate measurement of the property's fair value due to outdated market information or other factors. In these cases, the fair value is determined based on the lower of the (i) most recent appraised value, (ii) broker price opinion, (iii) current listing price, or (iv) signed sales contract. Given these valuation methods, OREO is classified in level 3 of the fair value hierarchy.

Assets Held-for-Sale

Assets held-for-sale consist of former branches that are no longer in operation, which were transferred into the held-for-sale category at the lower of their fair value as determined by a current appraisal or their recorded investment. Based on these valuation methods, they are classified in level 3 of the fair value hierarchy.

Financial Instruments Not Required to be Measured at Fair Value

For certain financial instruments that are not required to be measured at fair value in the Consolidated Statements of Financial Condition, the Company must disclose the estimated fair values and the level within the fair value hierarchy as shown in the following table.

Fair Value Measurements of Other Financial Instruments

(Dollar amounts in thousands)

	Fair Value Hierarchy Level	March 31, 2014		December 31, 2013	
		Carrying Amount	Fair Value	Carrying Amount	Fair Value
Assets:					
Cash and due from banks	1	\$198,544	\$198,544	\$110,417	\$110,417
Interest-bearing deposits in other banks	2	393,768	393,768	476,824	476,824
Securities held-to-maturity	2	43,251	42,574	44,322	43,387
FHLB and Federal Reserve Bank stock	2	35,161	35,161	35,161	35,161
Net loans	3	5,734,845	5,650,726	5,628,855	5,544,146
FDIC indemnification asset	3	15,537	7,640	16,585	7,829
Investment in BOLI	3	193,673	193,673	193,167	193,167
Accrued interest receivable	3	25,922	25,922	25,735	25,735
Other interest earning assets	3	5,810	6,025	6,550	6,809
Liabilities:					
Deposits	2	\$6,816,757	\$6,814,218	\$6,766,101	\$6,765,404
Borrowed funds	2	223,699	225,500	224,342	226,839
Senior and subordinated debt	1	190,964	201,958	190,932	201,147
Accrued interest payable	2	5,253	5,253	2,400	2,400

Management uses various methodologies and assumptions to determine the estimated fair values of the financial instruments in the table above. The fair value estimates are made at a discrete point in time based on relevant market information and consider management's judgments regarding future expected economic conditions, loss experience, and specific risk characteristics of the financial instruments.

Short-Term Financial Assets and Liabilities - For financial instruments with a shorter-term or with no stated maturity, prevailing market rates, and limited credit risk, the carrying amounts approximate fair value. Those financial instruments include cash and due from banks, interest-bearing deposits in other banks, other short-term investments, accrued interest receivable, and accrued interest payable.

Securities Held-to-Maturity - The fair value of securities held-to-maturity is estimated using the present value of future cash flows of the remaining maturities of the securities.

FHLB and Federal Reserve Bank Stock - The carrying amounts approximate fair value.

Net Loans - The fair value of loans is estimated using the present value of the future cash flows of the remaining maturities of the loans. Prepayment assumptions that consider the Company's historical experience and current economic and lending conditions were included. The discount rate was based on the LIBOR yield curve with adjustments for liquidity and credit risk. The primary impact of credit risk on the fair value of the loan portfolio was accommodated through the use of the allowance for loan and covered loan losses, which is believed to represent the current fair value of estimated inherent losses in the loan portfolio.

FDIC Indemnification Asset - The fair value of the FDIC indemnification asset is calculated by discounting the cash flows expected to be received from the FDIC. The future cash flows are estimated by multiplying expected losses on covered loans and covered OREO by the reimbursement rates in the FDIC Agreements.

Investment in BOLI - The fair value of the investment in BOLI approximates the carrying amount as both are based on each policy's respective CSV, which is the amount the Company would receive from liquidation of these investments. The CSV is

35

derived from monthly reports provided by the managing brokers and is determined using the Company's initial insurance premium and earnings of the underlying assets, offset by management fees.

Other Interest-Earning Assets - The fair value of other interest-earning assets is estimated using the present value of the future cash flows of the remaining maturities of the assets.

Deposits - The fair values disclosed for deposits, savings deposits, NOW accounts, and money market deposits are equal to the amount payable on demand at the reporting date (i.e., their carrying amounts). The fair value for fixed-rate time deposits was estimated using the future cash flows discounted based on the LIBOR yield curve, plus or minus the spread associated with current pricing.

Borrowed Funds - The fair value of FHLB advances is estimated by discounting the agreements based on maturities using the rates currently offered for FHLB advances of similar remaining maturities adjusted for prepayment penalties that would be incurred if the borrowings were paid off on the measurement date. The carrying amounts of securities sold under agreements to repurchase approximate their fair value due to their short-term nature.

Senior and Subordinated Debt - The fair value of senior and subordinated debt is determined using quoted market prices.

The Company estimated the fair value of lending commitments outstanding to be immaterial based on the following factors: (i) the limited interest rate exposure of the commitments outstanding due to their variable nature, (ii) the short-term nature of the commitment periods, (iii) termination clauses provided in the agreements, and (iv) the market rate of fees charged.

12. SUBSEQUENT EVENTS

On April 22, 2014, First Midwest Bank (the "Bank") entered into a definitive purchase and assumption agreement to acquire the Chicago area banking operations of Banco Popular North America (doing business as Popular Community Bank), which is a subsidiary of Popular, Inc. The acquisition includes Popular Community Bank's retail banking offices and its small business and middle market commercial lending activities in the Chicago metropolitan area.

As part of the transaction, the Bank will acquire twelve full-service retail branches, approximately \$750 million in deposits, and approximately \$525 million in loans. The transaction is subject to customary regulatory approvals and certain closing conditions, and is expected to close before the end of 2014.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

INTRODUCTION

First Midwest Bancorp, Inc. (the "Company") is a bank holding company headquartered in the Chicago suburb of Itasca, Illinois with operations throughout the greater Chicago metropolitan area as well as northwest Indiana, central and western Illinois, and eastern Iowa. Our principal subsidiary is First Midwest Bank (the "Bank"), which provides a broad range of commercial and retail banking and wealth management services to consumer, commercial and industrial, commercial real estate, and municipal customers through approximately 90 banking offices. We are committed to meeting the financial needs of the people and businesses in the communities where we live and work by providing customized banking solutions, quality products, and innovative services that fulfill those financial needs.

The following discussion and analysis is intended to address the significant factors affecting our results of operations and financial condition for the quarters ended March 31, 2014 and 2013. When we use the terms "First Midwest," the "Company," "we," "us," and "our," we mean First Midwest Bancorp, Inc., a Delaware Corporation, and its consolidated subsidiaries. When we use the term "Bank," we are referring to our wholly owned banking subsidiary, First Midwest Bank. Management's discussion and analysis should be read in conjunction with the consolidated financial statements and accompanying notes presented elsewhere in this report, as well as in our 2013 Annual Report on Form 10-K ("2013 10-K"). The results of operations for the quarters ended March 31, 2014 are not necessarily indicative of future results.

Our results of operations are affected by various factors, many of which are beyond our control, including interest rates, local and national economic conditions, business spending, consumer confidence, certain seasonal factors, legislative and regulatory changes, and changes in real estate and securities markets. Our management evaluates performance using a variety of qualitative and quantitative metrics. The primary quantitative metrics used by management include:

• **Net Interest Income** - Net interest income, our primary source of revenue, equals the difference between interest income and fees earned on interest-earning assets and interest expense incurred on interest-bearing liabilities.

• **Net Interest Margin** - Net interest margin equals net interest income divided by total average interest-earning assets.

• **Noninterest Income** - Noninterest income is the income we earn from fee-based revenues, investment in bank-owned life insurance ("BOLI") and other income, and non-operating revenues.

• **Asset Quality** - Asset quality represents an estimation of the quality of our loan portfolio, including an assessment of the credit risk related to existing and potential loss exposure, and can be evaluated using a number of quantitative measures, such as non-performing loans to total loans.

• **Regulatory Capital** - Our regulatory capital is currently classified in one of the following two tiers: (i) Tier 1 capital consists of common equity, retained earnings, and qualifying trust-preferred securities, less goodwill and most intangible assets and (ii) Tier 2 capital includes qualifying subordinated debt and the allowance for credit losses, subject to limitations.

Unless otherwise stated, all earnings per common share data included in this section and throughout the remainder of this discussion are presented on a diluted basis.

CAUTIONARY STATEMENT PURSUANT TO THE PRIVATE SECURITIES LITIGATION REFORM ACT OF 1995

We include or incorporate by reference in this Quarterly Report on Form 10-Q, and from time to time our management may make, statements that may constitute "forward-looking statements" within the meaning of the safe

harbor provisions of the Private Securities Litigation Reform Act of 1995. These statements are not historical facts, but instead represent only management's beliefs regarding future events, many of which, by their nature, are inherently uncertain and outside our control. Although we believe the expectations reflected in any forward-looking statements are reasonable, it is possible that our actual results and financial condition may differ, possibly materially, from the anticipated results and financial condition indicated in such statements. In some cases, you can identify these statements by forward-looking words such as "may," "might," "will," "should," "expect," "plan," "anticipate," "believe," "estimate," "predict," "probable," "potential," or "continue," and the negative of these terms and other comparable terminology. We caution you not to place undue reliance on forward-looking statements, which speak only as of the date of this report or when made. We do not undertake any obligation to update any forward-looking statements to reflect circumstances or events that occur after the date of this quarterly report or the date on which the forward-looking statement is made.

Forward-looking statements are subject to known and unknown risks, uncertainties, and assumptions and may contain projections relating to our future financial performance including our growth strategies and anticipated trends in our business. For a detailed discussion of these and other risks and uncertainties that could cause actual results and events to differ materially from such

forward-looking statements, you should refer to the sections entitled “Risk Factors” and “Management’s Discussion and Analysis of Financial Condition and Results of Operations” in this report and in our 2013 Annual Report on Form 10-K as well as our subsequent periodic and current reports filed with the U.S. Securities and Exchange Commission (“SEC”). However, these risks and uncertainties are not exhaustive. Other sections of this report describe additional factors that could adversely impact our business and financial performance.

CRITICAL ACCOUNTING POLICIES

Our consolidated financial statements are prepared in accordance with GAAP and are consistent with predominant practices in the financial services industry. Critical accounting policies are those policies that management believes are the most important to our financial position and results of operations. Application of critical accounting policies requires management to make estimates, assumptions, and judgments based on information available as of the date of the financial statements that affect the amounts reported in the financial statements and accompanying notes. Future changes in information may affect these estimates, assumptions, and judgments, which may affect the amounts reported in the financial statements.

For additional information regarding critical accounting policies, refer to “Summary of Significant Accounting Policies,” presented in Note 1 to the Condensed Consolidated Financial Statements and the section titled “Critical Accounting Policies” in Management’s Discussion and Analysis of Financial Condition and Results of Operations included in the Company’s 2013 10-K. There have been no significant changes in the Company’s application of critical accounting policies related to the allowance for credit losses, valuation of securities, and income taxes since December 31, 2013.

PERFORMANCE OVERVIEW

Table 1
Selected Financial Data
(Dollar and share amounts in thousands, except per share data)

	Quarters Ended			
	March 31,			
	2014	2013		
Operating Results				
Interest income	\$69,690	\$71,045		
Interest expense	5,995	7,197		
Net interest income	63,695	63,848		
Provision for loan and covered loan losses	1,441	5,674		
Noninterest income	27,250	27,575		
Noninterest expense	63,668	64,814		
Income before income tax expense	25,836	20,935		
Income tax expense	8,172	6,293		
Net income	17,664	14,642		
Net income applicable to non-vested restricted shares	(225)	(212)
Net income applicable to common shares	\$17,439	\$14,430		
Weighted average diluted common shares outstanding	74,159	73,874		
Diluted earnings per common share	\$0.24	\$0.20		
Performance Ratios ⁽¹⁾				
Return on average common equity	6.97	% 6.17		%
Return on average assets	0.86	% 0.74		%
Net interest margin – tax equivalent	3.61	% 3.77		%
Efficiency ratio ⁽²⁾	66.66	% 66.50		%

(1) All ratios are presented on an annualized basis.

The efficiency ratio expresses noninterest expense, excluding OREO expense, as a percentage of tax-equivalent net interest income plus total fee-based revenues, other income, net trading gains (losses), and the tax-equivalent adjustment on BOLI income.

Excludes covered loans and covered OREO. For a discussion of covered loans and covered OREO, refer to Note 5 ⁽¹⁾ of “Notes to Condensed Consolidated Financial Statements” in Part I, Item 1 of this Form 10-Q. Asset quality, including covered loans and covered OREO, is included in the “Loan Portfolio and Credit Quality” section below.

⁽²⁾ Total performing potential problem loans excludes accruing TDRs of \$2.4 million as of March 31, 2014, \$2.8 million as of December 31, 2013, and \$1.3 million as of March 31, 2013.

Net income applicable to common shares for the first quarter of 2014 was \$17.4 million, or \$0.24 per share, compared to net income applicable to common shares of \$14.4 million, or \$0.20 per share, for the first quarter of 2013.

The growth in net income from the first quarter of 2013 resulted primarily from a \$4.2 million reduction in the provision for loan and covered loan losses as well as a \$1.1 million decrease in noninterest expense. Net interest income and noninterest income for the first quarter of 2014 were consistent compared to the prior year period. A discussion of net interest income, noninterest income, and noninterest expense is presented in the following section

titled "Earnings Performance."

Non-performing assets, excluding covered loans, decreased by \$14.2 million, or 11.9%, from December 31, 2013, which resulted primarily from lower levels of accruing TDRs and OREO. Two accruing TDRs totaling \$18.8 million were returned to performing status in the first quarter of 2014 due to sustained payment performance in accordance with their modified terms, which represent market rates at the time of restructuring. Performing potential problem loans remained stable compared to the fourth quarter of 2013 and are at pre-recession levels. Refer to the "Loan Portfolio and Credit Quality" section below for further discussion of non-accrual loans, 90 days past due loans, TDRs, OREO, and performing potential problem loans.

39

EARNINGS PERFORMANCE

Net Interest Income

Net interest income is our primary source of revenue and is impacted by interest rates and the volume and mix of interest-earning assets and interest-bearing liabilities. The accounting policies for the recognition of interest income on loans, securities, and other interest-earning assets are presented in Note 1 to the Consolidated Financial Statements of our 2013 10-K.

Our accounting and reporting policies conform to GAAP and general practices within the banking industry. For purposes of this discussion, both net interest income and net interest margin have been adjusted to a fully tax-equivalent basis to more appropriately compare the returns on certain tax-exempt loans and securities to those on taxable interest-earning assets. Although we believe that these non-GAAP financial measures enhance investors' understanding of our business and performance, they should not be considered an alternative to GAAP. The effect of this adjustment is at the bottom of Table 2.

Table 2 summarizes our average interest-earning assets and interest-bearing liabilities for the quarters ended March 31, 2014 and 2013, the related interest income and interest expense for each earning asset category and funding source, and the average interest rates earned and paid. Table 2 also details differences in interest income and expense from the prior quarter and the extent to which any changes are attributable to volume and rate fluctuations.

Table 2

Tax-equivalent net interest		\$66,671			\$67,002				

income

- (1) For purposes of this table, changes which are not due solely to volume changes or rate changes are allocated to these categories on the basis of the percentage relationship of each to the sum of the two.
- (2) Interest income and yields are presented on a tax-equivalent basis, assuming a federal income tax rate of 35%. This item includes covered interest-earning assets consisting of loans acquired through the Company's Federal Deposit Insurance Corporation ("FDIC")-assisted transactions with loss share agreements and the related FDIC indemnification asset. For additional discussion, please refer to Note 5 of "Notes to the Condensed Consolidated Financial Statements" in Part I, Item 1 of this Form 10-Q.
- (3)

For the first quarter of 2014, average interest-earning assets increased \$287.2 million from the first quarter of 2013 driven primarily by loan growth.

Compared to the first quarter of 2013, total interest-bearing liabilities decreased by \$30.3 million resulting from a reduction in time deposits and senior and subordinated debt, which more than offset the rise in interest-bearing transaction deposits.

41

Tax-equivalent net interest margin for the first quarter of 2014 was 3.61%, declining 16 basis points from the first quarter of 2013. This decrease reflects the lower loan yield resulting from the continued shift in the loan mix to floating rate loans, as well as the decline in higher yielding covered interest earning assets.

Noninterest Income

A summary of noninterest income for the quarters ended March 31, 2014 and 2013 is presented in the following table.

Table 3
Noninterest Income Analysis
(Dollar amounts in thousands)

	Quarters Ended		% Change
	March 31,		
	2014	2013	
Service charges on deposit accounts	\$8,020	\$8,677	(7.6)
Wealth management fees	6,457	5,839	10.6
Card-based fees ⁽¹⁾	5,335	5,076	5.1
Mortgage banking income	1,115	1,966	(43.3)
Merchant servicing fees ⁽²⁾	2,709	2,554	6.1
Other service charges, commissions, and fees ⁽²⁾	1,413	1,646	(14.2)
Total fee-based revenues	25,049	25,758	(2.8)
Net securities gains ⁽³⁾	1,073	—	N/M
Other income ⁽⁴⁾⁽⁶⁾	937	781	20.0
Net trading gains ⁽⁵⁾⁽⁶⁾	191	1,036	(81.6)
Total noninterest income	\$27,250	\$27,575	(1.2)

N/M – Not meaningful.

Card-based fees consist of debit and credit card interchange fees for processing transactions as well as various fees ⁽¹⁾ on both customer and non-customer automated teller machine (“ATM”) and point-of-sale transactions processed through the ATM and point-of-sale networks.

⁽²⁾ These line items are included in other service charges, commissions, and fees in the Condensed Consolidated Statements of Income.

⁽³⁾ For a discussion of this item, see the “Investment Portfolio Management” section below.

⁽⁴⁾ Other income consists of various items, including safe deposit box rentals, miscellaneous recoveries, and gains on the sales of various assets.

Net trading gains result from changes in the fair value of diversified investment securities held in a grantor trust ⁽⁵⁾ under deferred compensation arrangements and are substantially offset by nonqualified plan expense for each period presented.

⁽⁶⁾ These line items are included in other income in the Condensed Consolidated Statements of Income.

Total noninterest income of \$27.3 million was consistent with the first quarter of 2013 as growth in wealth management fees, card-based fees, merchant servicing fees, and net securities gains substantially offset decreases in service charges on deposit accounts, mortgage banking income, and other service charges, commissions, and fees.

A lower volume of non-sufficient funds (“NSF”) transactions contributed to the decrease in service charges on deposit accounts.

New customer relationships drove the increase in wealth management fees and trust assets under management increased 12.4% to \$7.1 billion compared to the first quarter of 2013.

Increases in active cards and customer activity resulted in a rise of 5.1% in card-based fees.

During the first quarter of 2013, we sold \$54.0 million of 1-4 family mortgage loans in the secondary market compared to \$50.8 million of loans sold in the first quarter of 2014. Lower market pricing contributed to the decline in mortgage banking income compared to the first quarter of 2013.

Other service charges, commissions, and fees decreased 14.2% compared to the first quarter of 2013 driven by a reduction in fee income from lower sales of capital market products to commercial clients.

During the first quarter of 2014, the Company recorded a pre-tax securities gain of \$1.1 million from the sale of a portion of its hedge fund investment.

Noninterest Expense

A summary of noninterest expense for the quarters ended March 31, 2014 and 2013 is presented in the following table.

Table 4

Noninterest Expense Analysis (Dollar amounts in thousands)

	Quarters Ended March 31,		
	2014	2013	% Change
Salaries and employee benefits:			
Salaries and wages	\$27,197	\$27,839	(2.3)
Nonqualified plan expense	186	1,124	(83.5)
Retirement and other employee benefits	6,108	7,606	(19.7)
Total salaries and employee benefits	33,491	36,569	(8.4)
Net occupancy and equipment expense	9,391	8,147	15.3
Professional services:			
Loan remediation costs	1,991	2,139	(6.9)
Other professional services	3,398	3,079	10.4
Professional services	5,389	5,218	3.3
Technology and related costs	3,074	2,483	23.8
Net OREO expense	1,556	1,799	(13.5)
Advertising and promotions	1,613	1,410	14.4
Merchant card expense	2,213	2,044	8.3
Cardholder expenses	1,014	929	9.1
Other expenses	5,927	6,215	(4.6)
Total noninterest expense	\$63,668	\$64,814	(1.8)

Total noninterest expense for the first quarter of 2014 decreased nearly 2% from the first quarter of 2013.

The decrease in retirement and other employee benefits expense compared to the prior period presented was primarily the result of changes to the Company's defined benefit pension plan instituted in the second quarter of 2013, partially offset by an increase in other employee benefit accruals.

Net occupancy and equipment expense rose compared to the first quarter of 2013 due primarily to higher utilities and snow removal costs during the first quarter of 2014.

Net OREO expense decreased 13.5% from the first quarter of 2013 driven by net gains on sales of OREO properties in the first quarter of 2014, partially offset by valuation adjustments.

The rise in advertising and promotions expense in the first quarter of 2014 compared to the prior period reflects costs associated with our "Bank with Momentum" branding campaign that was launched in the second quarter of 2013.

Income Taxes

Our provision for income taxes includes both federal and state income tax expense. An analysis of the provision for income taxes is detailed in the following table.

Table 5
Income Tax Expense Analysis
(Dollar amounts in thousands)

	Quarters Ended			
	March 31, 2014	2013		
Income before income tax expense	\$25,836	\$20,935		
Income tax expense:				
Federal income tax expense	\$6,278	\$4,360		
State income tax expense	1,894	1,933		
Total income tax expense	\$8,172	\$6,293		
Effective income tax rate	31.6	% 30.1		%

Federal income tax expense and the related effective income tax rate are influenced by the amount of tax-exempt income derived from investment securities and bank-owned life insurance in relation to pre-tax income and state income taxes. State income tax expense and the related effective tax rate are driven by the amount of state tax-exempt income in relation to pre-tax income and state tax rules related to consolidated/combined reporting and sourcing of income and expense.

Income tax expense was \$8.2 million for the first quarter of 2014 compared to \$6.3 million for the same period in 2013 primarily as a result of higher levels of income subject to tax at statutory rates in 2014.

The increase in the effective income tax rate of 31.6% for the first quarter of 2014 compared to 30.1% for the same period in 2013 was driven by lower tax-exempt income in relation to pre-tax income.

Our accounting policies for the recognition of income taxes in the Consolidated Statements of Financial Condition and Income are included in Notes 1 and 14 to the Consolidated Financial Statements of our 2013 10-K.

FINANCIAL CONDITION

Investment Portfolio Management

Securities that we have the positive intent and ability to hold until maturity are classified as securities held-to-maturity and are accounted for using historical cost, adjusted for amortization of premiums and accretion of discounts. Trading securities are carried at fair value with changes in fair value included in other noninterest income. Our trading securities consist of securities held in a grantor trust for our nonqualified deferred compensation plan and are not considered part of the traditional investment portfolio. All other securities are classified as securities available-for-sale and are carried at fair value with unrealized gains and losses, net of related deferred income taxes, recorded in stockholders' equity as a separate component of accumulated other comprehensive loss.

We manage our investment portfolio to maximize the return on invested funds within acceptable risk guidelines, to meet pledging and liquidity requirements, and to adjust balance sheet interest rate sensitivity to mitigate the impact of changes in interest rates on net interest income.

From time to time, we adjust the size and composition of our securities portfolio based on a number of factors, including expected loan growth, anticipated changes in collateralized public funds on account, the interest rate environment, and the related value of various segments of the securities markets. The following table provides a valuation summary of our investment portfolio.

Table 6
Investment Portfolio Valuation Summary
(Dollar amounts in thousands)

	March 31, 2014				December 31, 2013

Portfolio Composition

As of March 31, 2014, our securities portfolio totaled \$1.1 billion, decreasing 2.8% compared to December 31, 2013. The reduction in CMOs and municipal securities from December 31, 2013 resulted primarily from maturities, calls, and prepayments. During the first quarter of 2014, available-for-sale securities maturities, calls, and prepayments of \$47.8 million more than offset purchases of \$6.1 million.

Approximately 96.2% of our available-for-sale securities portfolio is comprised of municipal securities, CMOs, and other MBSs. The remainder of the portfolio consists of six CDOs with a total fair value of \$21.7 million and miscellaneous other securities with fair values of \$19.4 million.

Investments in municipal securities comprised 41.5%, or \$448.8 million, of the total available-for-sale securities portfolio at March 31, 2014. The majority consists of general obligations of local municipalities. Our municipal securities portfolio has historically experienced very low default rates and provides a predictable cash flow.

N/M - Not meaningful.

- The effective duration represents the estimated percentage change in the fair value of the securities portfolio given a 100 basis point increase or decrease in interest rates. This measure is used to evaluate the portfolio's price volatility at a single point in time and is not intended to be a precise predictor of future fair values since those values will be influenced by a number of factors.
- (1) Average life is presented in years and represents the weighted-average time to receive half of all future cash flows using the dollar amount of principal paydowns, including estimated principal prepayments, as the weighting factor.
- (2) Yields on municipal securities are reflected on a tax-equivalent basis, assuming a federal income tax rate of 35%.

Effective Duration

The average life, effective duration, and yield to maturity of our available-for-sale securities portfolio as of March 31, 2014 are consistent with the December 31, 2013 metrics.

Securities Gains and Losses

Net securities gains of \$1.1 million were driven by the sale of a portion of the Company's hedge fund investment during the first quarter of 2014. We had no securities gains or losses for the first quarter of 2013.

Unrealized Gains and Losses

Unrealized gains and losses on securities available-for-sale represent the difference between the aggregate cost and fair value of the portfolio. These amounts are presented in the Consolidated Statements of Comprehensive Income and reported as a separate component of stockholders' equity in accumulated other comprehensive loss on an after-tax basis. This balance sheet component will fluctuate as current market interest rates and conditions change and affect the aggregate fair value of the portfolio. Net unrealized losses were \$22.8 million at March 31, 2014 compared to \$34.4 million at December 31, 2013.

Net unrealized losses in the CMO portfolio totaled \$10.8 million at March 31, 2014 compared to \$15.2 million at December 31, 2013. CMOs are either backed by U.S. government-owned agencies or issued by U.S. government-sponsored enterprises. We do not believe any individual unrealized loss on this type of security as of March 31, 2014 represents OTTI since the unrealized losses are not believed to be attributed to credit quality.

As of March 31, 2014, net unrealized gains in the municipal securities portfolio totaled \$7.7 million compared to \$4.1 million as of December 31, 2013. Net unrealized gains on municipal securities include unrealized losses of \$3.3 million at March 31, 2014. Substantially all of these securities carry investment grade ratings with the majority supported by the general revenues of the

issuing governmental entity and are supported by third-party bond insurance or other types of credit enhancement. We do not believe the unrealized loss on any of these securities represents an OTTI.

Our investments in CDOs are supported by the credit of the underlying banks and insurance companies. The unrealized losses on these securities declined from \$28.2 million at December 31, 2013 to \$24.9 million at March 31, 2014. We do not believe the unrealized losses on the CDOs as of March 31, 2014 represent OTTI related to credit deterioration. In addition, we do not intend to sell the CDOs with unrealized losses within a short period of time, and we do not believe it is more likely than not that we will be required to sell them before recovery of their amortized cost basis, which may be at maturity. Our estimation of fair values for the CDOs is based on discounted cash flow analyses as described in Note 11 of "Notes to the Condensed Consolidated Financial Statements," in Part I, Item 1 of this Form 10-Q.

LOAN PORTFOLIO AND CREDIT QUALITY

Loans Held-for-Investment

Our loan portfolio is comprised of both corporate and consumer loans with corporate loans representing 86.6% of total loans, excluding covered loans, at March 31, 2014. Consistent with our emphasis on relationship banking, the majority of our loans are made to our core, multi-relationship customers. The customers usually maintain deposit relationships and utilize our other banking services, such as cash management or wealth management services.

To maximize loan income within an acceptable level of risk, we have certain lending policies and procedures that management reviews on a regular basis. In addition, management receives periodic reporting related to loan production, loan quality, credit concentrations, loan delinquencies, and non-performing and performing potential problem loans to mitigate and monitor potential and current risks in the portfolio. We do not offer any sub-prime products and we have policies to limit our exposure to any single borrower.

Commercial, Industrial, and Agricultural Loans

Commercial, industrial, and agricultural loans represent 39.3% of total loans, excluding covered loans, and totaled \$2.2 billion at March 31, 2014, an increase of \$86.4 million, or 16.1% annualized, from December 31, 2013. Our commercial and industrial loans are a diverse group of loans to middle market businesses generally located in the Chicago metropolitan area with purposes that range from supporting seasonal working capital needs to term financing of equipment. The underwriting for these loans is based primarily on the identified cash flows of the borrower and secondarily on the underlying collateral provided by the borrower. Most commercial and industrial loans are secured by the assets being financed or other business assets, such as accounts receivable or inventory, and may incorporate a personal guarantee.

Agricultural loans are generally provided to meet seasonal production, equipment, and farm real estate borrowing needs of individual and corporate crop and livestock producers. As part of the underwriting process, the Company examines projected cash flows, financial statement stability, and the value of the underlying collateral. Seasonal crop production loans are repaid by the liquidation of the financed crop that is typically covered by crop insurance.

Equipment and real estate term loans are repaid by the farming operation.

Commercial Real Estate Loans

Commercial real estate loans are subject to underwriting standards and processes similar to commercial and industrial loans. The repayment of commercial real estate loans depends on the successful operation of the property securing the loan or the business conducted on the property securing the loan. This category of loans may be more adversely affected by conditions in the real estate market. Management monitors and evaluates commercial real estate loans based on cash flow, collateral, geography, and risk rating criteria. The mix of properties securing the loans in our

commercial real estate portfolio are balanced between owner-occupied and investor categories and represent varying types across our market footprint.

Construction loans are generally based on estimates of costs and values associated with the completed projects and are underwritten utilizing feasibility studies, independent appraisal reviews, sensitivity analyses of absorption and lease rates, and financial analyses of the developers and property owners. Sources of repayment may be permanent loans from long-term lenders, sales of developed property, or an interim loan commitment until permanent financing is obtained. Generally, construction loans have a higher risk profile than other real estate loans since repayment is impacted by real estate values, interest rate changes, governmental regulation of real property, demand and supply of alternative real estate, the availability of long-term financing, and changes in general economic conditions.

Consumer Loans

Consumer loans are centrally underwritten using a credit scoring model developed by the Fair Isaac Corporation (“FICO”). It uses a risk-based system to determine the probability that a borrower may default on financial obligations to the lender. Underwriting standards for home equity loans are heavily influenced by statutory requirements, which include loan-to-value and affordability ratios, risk-based pricing strategies, and documentation requirements. The home equity category consists mainly of revolving lines of credit secured by junior liens on owner-occupied real estate. Loan-to-value ratios on home equity loans and 1-4 family mortgages are based on the current appraised value of the collateral.

Table 8

Loan Portfolio

(Dollar amounts in thousands)

	March 31, 2014	% of Total	December 31, 2013	% of Total	Annualized % Change
Commercial and industrial	\$1,917,396	33.7	\$1,830,638	32.8	19.0
Agricultural	321,343	5.6	321,702	5.8	(0.4)

Total commercial real estate	2,689,372	47.3	2,679,826	48.0	1.4
Total corporate loans	4,928,111	86.6	4,832,166	86.6	7.9
Home equity	475,103	8.3	427,020	7.7	45.0
1-4 family mortgages	240,561	4.2	275,992	4.9	(51.4)
Installment	49,315	0.9	44,827	0.8	40.0
Total consumer loans	764,979	13.4	747,839	13.4	9.2
Total loans, excluding covered loans	5,693,090	100.0	5,580,005	100.0	8.1
Covered loans	122,387		134,355		(35.6)
Total loans	\$5,815,477		\$5,714,360		7.1

Total loans, excluding covered loans, of \$5.7 billion rose by \$113.1 million, or 8.1% on an annualized basis, from December 31, 2013 driven by strong growth in the commercial and industrial, other commercial real estate, and home equity portfolios, which more than offset the decline in the 1-4 family mortgages portfolio. In response to market conditions, the Company purchased \$48.7 million of high-quality, shorter duration, floating rate home equity loans and sold \$35.4 million of longer-term, fixed rate 1-4 family mortgages in the first quarter of 2014.

Overall, the loan portfolio continues to benefit from well-balanced growth reflecting credits of varying size, distributed across our market footprint. The strong growth in the commercial and industrial loan category reflects the impact of greater resource investments and expansion into certain sector-based lending areas, such as agri-business, asset-based lending, and healthcare.

The following table presents commercial real estate loan detail.

Table 9

Commercial Real Estate Loans

(Dollar amounts in thousands)

	March 31, 2014	% of Total	December 31, 2013	% of Total

Total commercial real estate	\$2,689,372	100.0	\$2,679,826	100.0
Owner occupied commercial real estate loans, excluding multi-family and construction loans	\$906,837		\$933,151	
Owner occupied as a percent of total	41.8	%	43.2	%

Commercial real estate loans represent 47.3% of total loans, excluding covered loans, and totaled \$2.7 billion at March 31, 2014, consistent with December 31, 2013. Over half of our commercial real estate loans consist of loans for industrial buildings, office buildings, and retail shopping centers. The mix of properties securing the loans in our commercial real estate portfolio continues to be balanced between owner-occupied and investor categories as of March 31, 2014.

Non-performing Assets and Potential Problem Loans

The following table presents our loan portfolio by performing and non-performing status. A discussion of our accounting policies for non-accrual loans, TDRs, and loans 90 days or more past due can be found in Note 1 of “Notes to the Condensed Consolidated Financial Statements” in Part 1, Item 1 of this Form 10-Q.

Non-performing assets to loans plus OREO	2.49	% 2.91	% 3.46	% 3.82	% 3.77	%

⁽¹⁾ Covered loans and covered OREO are covered by FDIC Agreements that substantially mitigate the risk of loss.

Past due covered loans in the tables above are determined by borrower performance compared to contractual terms,

but are generally considered accruing loans since they continue to perform in accordance with our expectations of cash flows. For a discussion of covered loans and covered OREO, refer to Note 5 of “Notes to the Condensed Consolidated Financial Statements” in Part I, Item 1 of this Form 10-Q.

Non-accrual loans, excluding covered loans, increased \$4.4 million, or 7.4%, from December 31, 2013. This increase was largely driven by a corporate loan relationship for which a specific reserve was established. Non-performing assets, excluding covered loans, decreased by \$14.2 million, or 11.9%, from December 31, 2013, which resulted primarily from lower levels of accruing TDRs and OREO. Two accruing TDRs totaling \$18.8 million were returned to performing status in the first quarter of 2014 due

to sustained payment performance in accordance with their modified terms, which represent market rates at the time of restructuring. Refer to the "TDRs" section below for further discussion.

Performing potential problem loans remained stable compared to the fourth quarter of 2013 and are at pre-recession levels.

Loans 30-89 days past due were \$12.9 million at March 31, 2014, decreasing 38% from December 31, 2013.

TDRs

Loan modifications may be performed at the request of the individual borrower and may include reductions in interest rates, changes in payments, and extensions of maturity dates. We occasionally restructure loans at other than market rates or terms to enable the borrower to work through financial difficulties for a period of time, and these restructures remain classified as TDRs for the remaining terms of the loans.

Table 12

TDRs by Type

(Dollar amounts in thousands)

	March 31, 2014		December 31, 2013		March 31, 2013	
	Number of Loans	Amount	Number of Loans	Amount	Number of Loans	Amount
Commercial and industrial	6	\$3,003	10	\$8,659	7	\$3,204

Construction	—	—	—	—	2	504
Other commercial real estate	5	589	7	4,617	2	4,746
Total commercial real estate	12	2,432	17	16,179	7	7,650
Total corporate loans	18	5,435	27	24,838	14	10,854
Home equity	18	1,288	18	1,299	6	270
1-4 family mortgages	12	1,498	14	1,716	15	1,868
Installment	—	—	—	—	—	—
Total consumer loans	30	2,786	32	3,015	21	2,138
Total TDRs	48	\$8,221	59	\$27,853	35	\$12,992
Accruing TDRs	32	\$6,301	39	\$23,770	16	\$2,587
Non-accrual TDRs	16	1,920	20	4,083	19	10,405
Total TDRs	48	\$8,221	59	\$27,853	35	\$12,992
Year-to-date charge-offs on TDRs		\$34		\$1,880		\$803
Specific reserves related to TDRs		—		1,952		2,526

TDRs totaled \$8.2 million at March 31, 2014, decreasing \$19.6 million from December 31, 2013.

Accruing TDRs declined \$17.5 million from December 31, 2013 driven primarily by the return of two TDRs totaling \$18.8 million to performing status during the first quarter of 2014 due to sustained payment performance in accordance with their modified terms, which represent market rates at the time of restructuring. This reduction was partially offset by the addition of a \$1.9 million corporate loan relationship that was upgraded to accruing TDR status

in the first quarter of 2014.

At March 31, 2014, non-accrual TDRs totaled \$1.9 million compared to \$4.1 million at December 31, 2013. TDRs are reported as non-accrual because they are not yet performing in accordance with their modified terms or they have not yet exhibited sufficient performance under their modified terms. The decrease in non-accrual TDRs from December 31, 2013 was driven primarily by the reclassification of one non-accrual TDR to accruing TDR status discussed above.

52

Performing Potential Problem Loans

Performing potential problem loans consist of special mention loans and substandard loans. These loans are performing in accordance with contractual terms, but we have concerns about the ability of the borrower to continue to comply with loan terms due to the borrower's potential operating or financial difficulties.

Table 13

Commercial and industrial	\$30,602	\$13,057	\$43,659	\$23,679	\$14,135	\$37,814
Agricultural	293	—	293	344	—	344
Commercial real estate:						
Office, retail, and industrial	29,178	24,617	53,795	27,871	23,538	51,409
Multi-family	2,780	493	3,273	2,794	499	3,293
Construction	8,810	17,051	25,861	8,309	17,642	25,951
Other commercial real estate	13,245	19,878	33,123	14,567	22,576	37,143
Total commercial real estate	54,013	62,039	116,052	53,541	64,255	117,796
Total performing potential problem corporate loans	\$84,908	\$75,096	\$160,004	\$77,564	\$78,390	\$155,954

(1) Loans categorized as special mention exhibit potential weaknesses that require the close attention of management since these potential weaknesses may result in the deterioration of repayment prospects in the future.

Loans categorized as substandard exhibit a well-defined weakness or weaknesses that may jeopardize the

(2) liquidation of the debt. These loans continue to accrue interest because they are well secured and collection of principal and interest is expected within a reasonable time.

(3) Total performing potential problem loans excludes accruing TDRs of \$2.4 million as of March 31, 2014, \$2.8 million as of December 31, 2013, and \$1.3 million as of March 31, 2013.

Performing potential problem loans remained stable at \$160.0 million compared to December 31, 2013, and are at pre-recession levels. As of March 31, 2014, approximately 40.8% of performing potential problem loans was comprised of 9 corporate loan relationships each having balances greater than \$5.0 million for which management has specific monitoring plans.

OREO

OREO consists of properties acquired as the result of borrower defaults on loans. OREO, excluding covered OREO, was \$30.0 million at March 31, 2014, decreasing \$2.4 million from December 31, 2013.

Table 14

OREO Activity

The following table summarizes disposals of OREO for the quarters ended March 31, 2014 and 2013.

Table 15
OREO Disposals and Write-Downs
(Dollar amounts in thousands)

	Quarters Ended March 31, 2014			March 31, 2013		
	OREO	Covered OREO	Total	OREO	Covered OREO	Total
OREO sales						
Proceeds from sales	\$2,479	\$3,386	\$5,865	\$3,484	\$9	\$3,493
Less: Basis of properties sold	(2,015)	(3,384)	(5,399)	(3,701)	(6)	(3,707)
Net (gains) losses on sales of OREO	\$(464)	\$(2)	\$(466)	\$217	\$(3)	\$214
OREO valuation adjustments	\$1,118	\$—	\$1,118	\$525	\$42	\$567

For the quarter ended March 31, 2014, we sold \$2.0 million of OREO, excluding covered OREO, which consisted of 29 properties with the majority classified as single-family homes.

OREO sales, excluding covered OREO, for the quarter ended March 31, 2013, consisted of 15 properties in the single-family home and commercial property categories.

Allowance for Credit Losses

Methodology for the Allowance for Credit Losses

The allowance for credit losses is comprised of the allowance for loan and covered loan losses and the reserve for unfunded commitments and is maintained by management at a level believed adequate to absorb estimated losses inherent in the existing loan portfolio. Determination of the allowance for credit losses is inherently subjective since it requires significant estimates and management judgment, including the amounts and timing of expected future cash flows on impaired loans, estimated losses on pools of homogeneous loans, and consideration of current economic trends.

While management utilizes its best judgment and information available, the ultimate adequacy of the allowance for credit losses depends on a variety of factors beyond the Company's control, including the performance of its loan portfolio, the economy, changes in interest rates and property values, and the interpretation of loan risk ratings by regulatory authorities. Management believes that the allowance for credit losses is an appropriate estimate of credit losses inherent in the loan portfolio as of March 31, 2014.

The accounting policy for the allowance for credit losses is discussed in Note 1 of "Notes to the Condensed Consolidated Financial Statements" in Part I, Item 1 of this Form 10-Q.

Table 16

Activity in the Allowance for Credit Losses

The allowance for credit losses was \$82.2 million as of March 31, 2014, a decline of \$4.9 million from December 31, 2013. The allowance for credit losses was 1.41% of total loans, including covered loans, at March 31, 2014 compared to 1.52% at December 31, 2013.

Overall, net loan charge-offs, excluding covered loan charge-offs, remained consistent compared to the prior periods presented.

For the first quarter of 2014, the Company realized \$340,000 in net covered loan recoveries compared to net covered loan charge-offs in prior periods. Covered loan charge-offs reflect the decline and recoveries reflect the increase in estimated cash flows of certain acquired loans. Management re-estimates cash flows periodically, and the present value of any decreases in expected cash flows from the FDIC is recorded as either a charge-off or an allowance for covered loan losses is established. Any increases in expected cash flows are recorded through the allowance for

covered loan losses as recoveries to the extent charge-offs were previously taken or prospectively as yield adjustments over the remaining lives of the specific loans.

57

FUNDING AND LIQUIDITY MANAGEMENT

The following table provides a comparison of average funding sources for the quarters ended March 31, 2014, December 31, 2013, and March 31, 2013. We believe that average balances, rather than period-end balances, are more meaningful in analyzing funding sources because of the normal fluctuations that may occur on a daily or monthly basis within funding categories.

Table 17
Funding Sources – Average Balances
(Dollar amounts in thousands)

	Quarters Ended			First Quarter 2014 % Change From			
	March 31, 2014	December 31, 2013	March 31, 2013	Fourth Quarter 2013	First Quarter 2013		
Demand deposits	\$1,928,289	\$1,956,570	\$1,740,825	(1.4)%	10.8	%
Savings deposits	1,159,643	1,126,737	1,107,213	2.9	%	4.7	%
NOW accounts	1,181,297	1,195,471	1,145,482	(1.2)%	3.1	%
Money market accounts	1,311,998	1,356,383	1,251,235	(3.3)%	4.9	%
Transactional deposits	5,581,227	5,635,161	5,244,755	(1.0)%	6.4	%
Time deposits	1,180,374	1,218,450	1,348,263	(3.1)%	(12.5)%
Brokered deposits	16,075	16,067	26,266	—	%	(38.8)%
Total time deposits	1,196,449	1,234,517	1,374,529	(3.1)%	(13.0)%
Total deposits	6,777,676	6,869,678	6,619,284	(1.3)%	2.4	%
Securities sold under agreements to repurchase	107,944	99,207	85,314	8.8	%	26.5	%
FHLB advances	114,547	114,554	114,577	—	%	—	%
Total borrowed funds	222,491	213,761	199,891	4.1	%	11.3	%
Senior and subordinated debt	190,949	207,162	214,796	(7.8)%	(11.1)%
Total funding sources	\$7,191,116	\$7,290,601	\$7,033,971	(1.4)%	2.2	%
Average interest rate paid on borrowed funds	0.70	% 0.72	% 0.90	%			
Weighted-average maturity of FHLB advances	26.6 months	29.3 months	38.1 months				
Weighted-average interest rate of FHLB advances	1.33	% 1.34	% 1.30	%			

Average funding sources for the first quarter of 2014 decreased \$99.5 million from the fourth quarter of 2013 and increased \$157.1 million from the first quarter of 2013. Compared to the linked quarter, declines were driven by lower levels of transactional deposits and a reduction in time deposits. For the first quarter of 2014 compared to the prior year period, growth across transactional deposit categories more than offset the decline in time deposits.

The reduction in average senior and subordinated debt compared to both prior quarters presented was due to the repurchase and retirement of \$24.0 million of junior subordinated debentures during the fourth quarter of 2013.

Table 18
Borrowed Funds
(Dollar amounts in thousands)

	March 31, 2014		March 31, 2013	
	Amount	Weighted-Average Rate (%)	Amount	Weighted-Average Rate (%)
At period-end:				
Securities sold under agreements to repurchase	\$ 109,156	0.03	\$ 94,281	0.03
FHLB advances	114,543	1.33	114,573	1.30
Total borrowed funds	\$ 223,699	0.69	\$ 208,854	0.73
Average for the year-to-date period:				
Securities sold under agreements to repurchase	\$ 107,944	0.03	\$ 85,314	0.02
FHLB advances	114,547	1.33	114,577	1.55
Total borrowed funds	\$ 222,491	0.70	\$ 199,891	0.90
Maximum amount outstanding at the end of any day during the period:				
Securities sold under agreements to repurchase	\$ 116,934		\$ 103,602	
FHLB advances	114,551		114,581	

Average borrowed funds totaled \$222.5 million for the first quarter of 2014 increasing 11.3% compared to the same period in 2013 due to higher levels of securities sold under agreements to repurchase.

Securities sold under agreements to repurchase generally mature within 1 to 90 days from the transaction date.

MANAGEMENT OF CAPITAL

Capital Measurements

A strong capital structure is required under applicable banking regulations and is crucial in maintaining investor confidence, accessing capital markets, and enabling us to take advantage of future growth opportunities. Our capital policy requires that the Company and the Bank maintain capital ratios in excess of the minimum regulatory guidelines. It serves as an internal discipline in analyzing business risks and internal growth opportunities and sets targeted levels of return on equity. Under regulatory capital adequacy guidelines, the Company and the Bank are subject to various capital requirements set and administered by the federal banking agencies. These requirements specify minimum capital ratios, defined as Tier 1 and total capital as a percentage of assets and off-balance sheet items that were weighted according to broad risk categories and a leverage ratio calculated as Tier 1 capital as a percentage of adjusted average assets. We manage our capital ratios for both the Company and the Bank to consistently maintain these measurements in excess of the Federal Reserve's minimum levels to be considered "well-capitalized," which is the highest capital category established.

The following table presents our consolidated measures of capital as of the dates presented and the capital guidelines established by the Federal Reserve to be categorized as "well-capitalized." All regulatory mandated ratios for characterization as "well-capitalized" were exceeded as of March 31, 2014 and December 31, 2013.

All other ratios presented in the table below are capital adequacy metrics used and relied on by investors and industry analysts; however, they are non-GAAP financial measures for SEC purposes. These non-GAAP measures are valuable indicators of a financial institution's capital strength since they eliminate intangible assets from stockholders' equity and retain the effect of accumulated other comprehensive loss in stockholders' equity. Reconciliations of the components of those ratios to GAAP are also presented in the table below.

Table 19
Capital Measurements
(Dollar amounts in thousands)

	March 31, 2014	December 31, 2013	Regulatory Minimum For Well- Capitalized	Excess Over Required Minimums at March 31, 2014

Tangible common equity, excluding other accumulated comprehensive loss, to tangible assets	9.49	% 9.43	% N/A ⁽²⁾	N/A ⁽²⁾	N/A ⁽²⁾
Tangible common equity to risk-weighted assets	10.67	% 10.67	% N/A ⁽²⁾	N/A ⁽²⁾	N/A ⁽²⁾

N/A – Not applicable.

(1) Excludes the impact of trust-preferred securities.

(2) Ratio is not subject to formal Federal Reserve regulatory requirements.

The slight decline in the total capital to risk-weighted assets ratio compared to December 31, 2013 was due to an increase in risk-weighted assets resulting from loan growth, which more than offset the increase in total capital from

earnings for the first quarter of 2014 and the increase in allowable deferred tax assets. The tier 1 leverage to average assets ratio increased 35 basis points from December 31, 2013 driven by strong earnings, the increase in allowable deferred tax assets, and a reduction in average assets.

The Board of Directors reviews the Company's capital plan each quarter, considering the current and expected operating environment as well as an evaluation of various capital alternatives.

61

Basel III Capital Rules

In July of 2013, the Company's primary federal regulator, the Federal Reserve, published final rules establishing a new comprehensive capital framework for U.S. banking organizations. The Basel III Capital Rules are discussed in the "Supervision and Regulation" section in Item 1, "Business" in the Company's 2013 10-K.

Management believes that as of March 31, 2014 the Company and the Bank would meet all capital adequacy requirements under the Basel III Capital Rules on a fully phased-in basis as if such requirements were currently in effect.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Market risk is the risk of loss arising from adverse changes in the fair value of financial instruments due to changes in interest rates, exchange rates, and equity prices. Interest rate risk is our primary market risk and is the result of repricing, basis, and option risk. A description and analysis of our interest rate risk management policies is included in Part II, Item 7A, "Quantitative and Qualitative Disclosures about Market Risk," in our 2013 10-K.

We seek to achieve consistent growth in net interest income and net income while managing volatility that arises from shifts in interest rates. The Bank's Asset Liability Committee ("ALCO") oversees financial risk management by developing programs to measure and manage interest rate risks within authorized limits set by the Bank's Board of Directors. ALCO also approves the Bank's asset and liability management policies, oversees the formulation and implementation of strategies to improve balance sheet positioning and earnings, and reviews the Bank's interest rate sensitivity position. Management uses net interest income simulation modeling to analyze and capture exposure of earnings to changes in interest rates.

Net Interest Income Sensitivity

The analysis of net interest income sensitivity assesses the magnitude of changes in net interest income over a twelve-month measurement period resulting from immediate changes in interest rates using multiple rate scenarios. These scenarios include, but are not limited to, a flat or unchanged rate environment, immediate increases of 100, 200, and 300 basis points, and an immediate decrease of 100 basis points. Due to the low interest rate environment as of March 31, 2014 and December 31, 2013, management determined that an immediate decrease in interest rates greater than 100 basis points was not meaningful.

This simulation analysis is based on actual cash flows and repricing characteristics for balance sheet and off-balance sheet instruments and incorporates market-based assumptions regarding the effect of changing interest rates on the prepayment rates of certain assets and liabilities. In addition, this sensitivity analysis examines assets and liabilities at the beginning of the measurement period and does not assume any changes from growth or business plans over the next twelve months. Interest-earning assets and interest-bearing liabilities are assumed to re-price based on contractual terms over the twelve-month measurement period assuming an instantaneous parallel shift in interest rates in effect at the beginning of the measurement period. The simulation analysis also incorporates assumptions based on the historical behavior of deposit rates in relation to interest rates. Because these assumptions are inherently uncertain, the simulation analysis cannot definitively measure net interest income or predict the impact of the fluctuation in interest rates on net interest income. Actual results may differ from simulated results due to timing, magnitude, and frequency of interest rate changes as well as changes in market conditions and management strategies.

Our balance sheet is asset sensitive based on repricing and maturity characteristics and simulation analysis assumptions. The Bank's current simulation analysis indicates we would benefit from rising interest rates.

Interest-earning assets consist of short and long-term products. As of March 31, 2014, 50% of the loan portfolio consisted of fixed rate loans and 50% were floating rate loans. Investments, consisting of securities and interest-bearing deposits in other banks, are more heavily weighted toward fixed rate securities at 66% of the total compared to 34% for floating rate interest-bearing deposits in other banks. Fixed rate loans are most sensitive to the 3-5 year portion of the yield curve and the Bank limits its loans with maturities that extend beyond 5 years. The

majority of floating rate loans are indexed to the short-term Prime or LIBOR rates. The amount of floating rate loans with interest rate floors was \$777.3 million, or 32%, of the floating rate loan portfolio as of March 31, 2014. On the liability side of the balance sheet, 80% of deposits are demand deposits and interest-bearing transactional deposits, which either do not pay interest or the interest rates are expected to rise at a slower pace than short-term interest rates.

Analysis of Net Interest Income Sensitivity

(Dollar amounts in thousands)

	Immediate Change in Rates			
	+300	+200	+100	-100
March 31, 2014:				
Dollar change	\$42,261	\$26,362	\$10,851	\$(10,553)
Percent change	16.4	% 10.2	% 4.2	% (4.1)
December 31, 2013:				
Dollar change	\$45,209	\$28,307	\$11,925	\$(11,791)
Percent change	17.3	% 10.8	% 4.6	% (4.5)

The sensitivity of estimated net interest income to an instantaneous parallel shift in interest rate changes is reflected as both dollar and percent changes. For example, this table illustrates that an instantaneous 200 basis point rise in interest rates as of March 31, 2014 would increase net interest income by \$26.4 million, or 10.2%, over the next twelve months compared to no change in interest rates. This same measure was \$28.3 million, or 10.8%, as of December 31, 2013.

Overall, in rising interest rate scenarios, interest rate risk volatility was slightly less positive at March 31, 2014 compared to December 31, 2013. During the first quarter of 2014, floating rate loan balances increased, funded through a decrease in short-term investments. Overall, rate sensitive assets did not change from the linked quarter. On the liability side, the mix of our transactional deposits shifted during the first quarter of 2014 from less rate sensitive accounts to more rate sensitive accounts, which drove the variance compared to December 31, 2013. While net interest income is projected to decline in a decreasing interest rate environment, we believe the risk of a significant decrease in interest rates is minimal.

ITEM 4. CONTROLS AND PROCEDURES

At the end of the period covered by this report, (the "Evaluation Date"), the Company carried out an evaluation, under the supervision and with the participation of the Company's management, including the Company's President and Chief Executive Officer and its Executive Vice President and Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures pursuant to Rules 13a-15(e) and 15d-15 of the Securities Exchange Act of 1934, as amended (the "Exchange Act"). Based on that evaluation, the President and Chief Executive Officer and Executive Vice President and Chief Financial Officer concluded that as of the Evaluation Date, the Company's disclosure controls and procedures are effective to ensure that information required to be disclosed by the Company in reports that it files or submits under the Exchange Act is recorded, processed, summarized, and reported within the time periods specified in Securities and Exchange Commission rules and forms. There were no changes in the Company's internal control over financial reporting during the most recent fiscal quarter that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

In the ordinary course of business, there were certain legal proceedings pending against the Company and its subsidiaries at March 31, 2014. While the outcome of any legal proceeding is inherently uncertain, based on information currently available, the Company's management believes that any liabilities arising from pending legal matters are not expected to have a material adverse effect on the Company's financial position, results of operations, or cash flows.

ITEM 1A. RISK FACTORS

The Company provided a discussion of certain risks and uncertainties faced by the Company in its Annual Report on Form 10-K for 2013. However, these factors may not be the only risks or uncertainties the Company faces. Based on currently available information, the Company has not identified any additional material changes in the Company's risk factors as previously disclosed, except as discussed above.

63

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

The following table summarizes the Company's monthly Common Stock purchases during the first quarter of 2014. The Board approved a stock repurchase program on November 27, 2007. Up to 2.5 million shares of the Company's Common Stock may be repurchased, and the total remaining authorization under the program was 2,494,747 shares as of March 31, 2014. The repurchase program has no set expiration or termination date.

Issuer Purchases of Equity Securities

	Total Number of Shares Purchased ⁽¹⁾	Average Price Paid per Share	Total Number of Shares Purchased as Part of a Publicly Announced Plan or Program	Maximum Number of Shares that May Yet Be Purchased Under the Plan or Program
January 1 – January 31, 2014	—	\$—	—	2,494,747
February 1 – February 28, 2014	158,063	15.91	—	2,494,747
March 1 – March 31, 2014	—	—	—	2,494,747
Total	158,063	\$15.91	—	

Consists of shares acquired pursuant to the Company's share-based compensation plans and not the Company's repurchase program approved by its Board on November 27, 2007. Under the terms of these plans, the Company ⁽¹⁾ accepts shares of Common Stock from option holders if they elect to surrender previously owned shares upon exercise to cover the exercise price of the stock options or, in the case of restricted shares of Common Stock, the withholding of shares to satisfy tax withholding obligations associated with the vesting of restricted shares.

ITEM 6. EXHIBITS

Exhibit Number	Description of Documents
3.1	Restated Certificate of Incorporation of the Company is incorporated herein by reference to Exhibit 3.1 to the Company's Annual Report on Form 10-K filed with the Securities and Exchange Commission on February 27, 2009.
