Exhibit 99.1

AMERISERV FINANCIAL REPORTS EARNINGS FOR THE FIRST QUARTER OF 2014

JOHNSTOWN, PA AmeriServ Financial, Inc. (NASDAQ: ASRV) reported first quarter 2014 net income available to common shareholders of \$877,000, or \$0.05 per diluted common share. Net income available to common shareholders in the first quarter of 2014 declined by \$127,000, or 12.6%, from the prior year first quarter due primarily to reduced non-interest revenue and no earnings benefit from a negative loan loss provision as was the case in 2013. Diluted earnings per share was consistent between periods as total shares outstanding were lower in 2014 due to the success of the Company's common stock repurchase program which was completed in the second quarter of 2013. The following table highlights the Company's financial performance for the quarters ended March 31, 2014 and 2013:

	First Quarter 2014	First Quarter 2013
Net income	\$930,000	\$1,056,000
Net income available to common shareholders	\$877,000	\$1,004,000
Diluted earnings per share	\$ 0.05	\$ 0.05

Glenn L. Wilson, President and Chief Executive Officer, commented on the first quarter 2014 financial results: There were several bright spots within our first quarter financial performance despite the overall negative impact that the record cold winter had on business activity within our marketplace. We have grown our loan portfolio by \$72 million, or 10.0%, over the past 12 months which was a key factor responsible for the 6.0% increase in net interest income in the first quarter of 2014. While total non-interest revenue did decline in the first quarter of 2014 due to a sharp decrease in residential mortgage banking revenue, our trust and wealth management business continued to show good growth with fees up 8.0% when compared to last year. Finally, we maintained excellent asset quality as our non-performing assets were only 0.41% of total loans, and there were no net loan charge-offs in the first quarter of 2014.

The Company's net interest income in the first quarter of 2014 increased by \$483,000, or 6.0%, when compared to the first quarter of 2013. The Company's net interest margin of 3.56% for the first quarter of 2014 was three basis points lower than the net interest margin of 3.59% for the first quarter 2013 and only one basis point lower than the more recently reported fourth quarter 2013 performance. We believe that this demonstrates that the recent pace of net interest margin contraction has slowed from the pace of margin decline experienced over the previous two years. The Company has been able to mitigate this net interest margin pressure and to increase net interest income by both

growing its earning assets and reducing its cost of funds. Specifically, the earning asset growth has occurred in the loan portfolio as total loans averaged \$787 million in the first quarter of 2014 which is \$60 million or 8.2% higher than the \$728 million average for the first quarter of 2013. This loan growth reflects the successful results of the Company's more intensive sales calling efforts, with an emphasis on generating commercial loans and owner occupied commercial real estate loans, which qualify as Small Business Lending Fund (SBLF) loans, particularly through its loan production offices. As a result of this growth in SBLF qualified loans, the Company has locked in the lowest preferred dividend rate available under the program of 1% until the first quarter of 2016. Interest income in 2014 has also benefitted from reduced premium amortization on mortgage backed securities due to slower mortgage prepayment speeds. Total interest expense for the first quarter of 2014 declined by \$90,000 from the 2013 first quarter due to the Company's proactive efforts to reduce deposit costs. Even with this reduction in deposit costs, the Company still experienced growth in deposits which reflects the loyalty of our core deposit base and ongoing efforts to cross sell new loan customers into deposit products. Specifically, total deposits reached a record level and averaged \$856 million for the first quarter of 2014 which is \$20 million, or 2.4%, higher than the \$836 million average in the first quarter of 2013. The Company continues to maintain good liquidity as evidenced by a loan to deposit ratio of 90.2% at March 31, 2014.

The Company did not record a provision for loan losses in the first quarter of 2014 as compared to a \$250,000 negative provision recorded in the first quarter of 2013. The Company continued to maintain outstanding asset quality in the first quarter of 2014. At March 31, 2014, non-performing assets are at their lowest point since the financial crisis and totaled \$3.3 million, or 0.41%, of total loans which is \$835,000 lower than they were at the end of 2013. There were no net loan charge-offs in the first quarter of 2014 as compared to net charge-offs of \$1.4 million, or 0.76%, of total loans in the same prior year quarter when the Company resolved its largest non-performing credit of 2013. When determining the provision for loan losses, the Company considers a number of factors, some of which include periodic credit reviews, non-performing assets, loan delinquency and charge-off trends, concentrations of credit, loan volume trends and broader local and national economic trends. In summary, the allowance for loan losses provided a strong 448% coverage of non-performing loans, and was 1.28% of total loans, at March 31, 2014, compared to 327% of non-performing loans, and 1.29% of total loans, at December 31, 2013.

Total non-interest income in the first quarter of 2014 decreased by \$284,000, or 7.4%, from the first quarter of 2013 due primarily to reduced revenue from residential mortgage banking activities. This 2014 reduction was caused by both lower refinance activity due to higher mortgage rates and reduced purchase activity due to the harsh winter weather conditions. As a result, gains realized on residential mortgage loan sales into the secondary market declined by \$285,000 and other income dropped by \$89,000 due largely to lower mortgage related origination and underwriting fees. These negative items were partially offset by increased fees from our trust and wealth management businesses. Specifically, trust and investment advisory fees increased by \$151,000, or 8.0%, for first quarter of 2014 due to increased assets under management which reflects both successful new business development activities and market appreciation of existing assets when compared to the first quarter of 2013.

The Company's total non-interest expense in the first quarter of 2014 increased by \$116,000, or 1.1%, when compared to the first quarter of 2013. Salaries and employee benefits were down modestly between periods as the benefit of lower incentive compensation expense was largely offset by increased health insurance premiums. Professional fees increased by \$273,000 in the first quarter of 2014 due to higher legal costs, recruitment fees, and new recurring costs related to outsourcing our computer operations and statement processing to a third party vendor. The overall cost savings benefit from outsourcing these services is captured in lower personnel costs in these departments and reduced software expense which is a key factor contributing to the \$247,000 decline in other expenses in the first quarter of

2014. Occupancy expense increased by \$66,000 as a result of higher utilities and snow removal costs in the first quarter of 2014 due to the harsh winter weather conditions. Finally, the Company recorded an income tax expense of \$389,000, or an effective tax rate of 29.5%, in the first quarter of 2014 which is comparable with the income tax expense of \$430,000, or an effective tax rate of 28.9%, for the first quarter of 2013.

The Company had total assets of \$1.05 billion, shareholders' equity of \$115 million, a book value of \$4.97 per common share and a tangible book value of \$4.31 per common share at March 31, 2014. The Company has increased its tangible book value per share by 6.2% over the past twelve months. The Company continued to maintain strong capital ratios that exceed the regulatory defined well capitalized status with a risk based capital ratio of 15.34%, an asset leverage ratio of 11.50% and a tangible common equity to tangible assets ratio of 7.80% at March 31, 2014.

This news release may contain forward-looking statements that involve risks and uncertainties, as defined in the Private Securities Litigation Reform Act of 1995, including the risks detailed in the Company's Annual Report and Form 10-K to the Securities and Exchange Commission. Actual results may differ materially.
