- Preliminary Information Statement
- Confidential, for Use of the Commission Only
(as permitted by Rule 14c-5(d)(2))
- Definitive Information Statement

LINCOLN LOGS LTD.
(Name of Registrant as Specified In Its Charter)

Payment of Filing Fee (Check the appropriate box):

- No fee required.
- Fee computed on table below per Exchange Act Rules 14c-5(g) and 0-11.

- 1) Title of each class of securities to which transaction applies.

- 2) Aggregate number of securities to which transaction applies.

- 3) Per unit price or other underlying value of transaction computed pursuant to Exchange Act Rule 0-11 (set forth the amount on which the filing fee is calculated and state how it was determined).

- 4) Proposed maximum aggregate value of transaction.

- 5) Total fee paid.

Fee paid previously with preliminary materials.
 Check box if any part of the fee is offset as provided by Exchange Act Rule 0-11(a)(2) and identify the filing for which the offsetting fee was paid previously. Identify the previous filing by registration number, or the Form or Schedule and the date of its filing.

- 1) Amount Previously Paid:

- 2) Form, Schedule or Registration Statement No.:

NOTICE OF SPECIAL MEETING OF SHAREHOLDERS

To be Held on July 27, 2005

You are cordially invited to attend the Special Meeting (the "Meeting") of Shareholders of Lincoln Logs Ltd. (the "Company"), a New York corporation, that will be held at the offices of Whiteman Osterman & Hanna, LLP, One Commerce Plaza, Albany, New York, at 10:30 a.m. on July 27, 2005.

At the Meeting, the Company's shareholders will be considering and taking action on the following proposals:

1. To approve an amendment to the Company's Certificate of Incorporation that will effect a 1-for-500 reverse stock split of the Company's common stock.
2. The transaction of such other business as may properly come before the Meeting or any adjournments or postponements thereof.

These proposals are more fully described in the enclosed Information Statement.

The holders of approximately 82% of the Company's outstanding shares of common stock have indicated their intention to vote in favor of the proposals summarized above. Therefore, we are not asking you for a proxy and you are requested not to send us a proxy. Further, you will not be asked to vote at the Meeting with respect to the foregoing proposals, although we welcome your attendance.

WE ARE NOT ASKING YOU FOR A PROXY AND YOU ARE REQUESTED NOT TO SEND US A PROXY.

By Order of the Board of Directors

/s/ Benjamin A. Shepherd

Benjamin A. Shepherd
Secretary

Chestertown, New York 12817

INFORMATION STATEMENT
SPECIAL MEETING OF SHAREHOLDERS
July 27, 2005

WE ARE NOT ASKING YOU FOR A PROXY AND YOU ARE REQUESTED NOT TO SEND US A PROXY.

GENERAL

This Information Statement is furnished in connection with the Special Meeting (the "Meeting") of Shareholders of Lincoln Logs Ltd. (the "Company"), a New York corporation, to be held on July 27, 2005, at 10:30 a.m., at the offices of Whiteman Osterman & Hanna, LLP, One Commerce Plaza, Albany, New York, and at any

Edgar Filing: LINCOLN LOGS LTD - Form PRER14C

adjournment. This Information Statement is being first sent to the Company's shareholders on or about July 7, 2005.

At the Meeting, the Company's shareholders will be asked to consider the proposal to amend the Company's Restated Certificate of Incorporation to effect a 1-for-500 reverse stock split (the "Reverse Split"). A form of the Certificate of Amendment to the Company's Restated Certificate of Incorporation is attached hereto as Appendix A. As a result of the Reverse Split, each shareholder of the Company owning fewer than 500 shares immediately prior to the Reverse Split will own only a fractional share of stock and accordingly, will no longer be a shareholder of the Company. Such shareholders will, therefore, receive cash, in lieu of such fractional share, in an amount equal to the result obtained by multiplying \$245.00 by a fraction having as the numerator the number of shares owned and having as the denominator the number 500 (which is equal to \$0.49 per share of stock). Each shareholder owning 500 or more shares prior to the Reverse Split will own 1 share for every 500 shares previously owned by such shareholder and will receive cash for any fractional shares resulting from the Reverse Split.

After the Reverse Split has occurred, the Company anticipates that it will have 132 shareholders of record. In the event that there are fewer than 300 shareholders of record following the Reverse Split, the Company intends to file a Form 15 with the Securities and Exchange Commission (the "SEC") to terminate registration of its common stock under the federal securities laws (together with the Reverse Split, the "Reverse Split Transaction"). As a result, the Company would no longer be subject to, among other things, the annual and periodic reporting requirements under the federal securities laws that are applicable to SEC reporting companies. In addition, the Company's common stock would cease to be traded on the Nasdaq OTC Bulletin Board. The Company has contacted its market makers to request that they continue to make a market in the Company's common stock in an effort to maximize the potential for outlets for the trading of the Company's common stock and at least two (2) of such market makers have agreed to do so. It is likely, however, that any trading in the Company's common stock after the Reverse Split Transaction will generally only occur in privately negotiated sales.

- 2 -

The Company's Board of Directors unanimously authorized the Reverse Split. The Reverse Split will be approved if a majority of all outstanding shares of common stock entitled to vote thereon vote in favor of its approval. John D. Shepherd, Chief Executive Officer and owner of approximately 57% of the outstanding shares of the Company's common stock, and the other members of the Company's management team, who, together with Mr. Shepherd, own approximately 82% of the outstanding shares of the Company's common stock, have indicated their intention to vote in favor of the Reverse Split. If they do so, the Reverse Split will be approved, and effected, without considering the vote of the Company's unaffiliated shareholders.

PLEASE NOTE THAT THIS IS NOT A REQUEST FOR YOUR VOTE OR A PROXY STATEMENT, BUT RATHER AN INFORMATION STATEMENT DESIGNED TO INFORM YOU OF THE ACTION TO BE TAKEN AT THE SPECIAL MEETING OF SHAREHOLDERS.

RECORD DATE AND VOTING

The proposal to be voted on at the Meeting is described in detail in this Information Statement. Shareholders of record at the close of business on June 24, 2005, are entitled to notice of, and to vote at, the Meeting. At the close of business on that date, there were outstanding and entitled to vote 9,040,059 shares of common stock, par value \$0.01 per share ("Common Stock"), which is the only outstanding class of voting securities of the Company. As of the same

Edgar Filing: LINCOLN LOGS LTD - Form PRER14C

date, the Company had 3,100 shareholders of record. Each holder of Common Stock is entitled to one vote for each share of Common Stock held by that shareholder on the record date.

OTHER MATTERS

The Board of Directors does not intend to present at the Meeting any matters other than those set forth in this Information Statement, nor does the Board of Directors know of any other matters which may come before the Meeting.

NEITHER THE SECURITIES AND EXCHANGE COMMISSION NOR ANY STATE SECURITIES COMMISSION HAS APPROVED OR DISAPPROVED OF THE TRANSACTION, PASSED UPON THE MERITS OR FAIRNESS OF THE TRANSACTION, OR PASSED UPON THE ADEQUACY OR ACCURACY OF THE DISCLOSURE IN THE DOCUMENT. ANY REPRESENTATION TO THE CONTRARY IS A CRIMINAL OFFENSE.

SUMMARY TERM SHEET

We have highlighted selected information from this Information Statement in the summary below. This section does not contain all of the information that is important to you. For a more complete description of the proposed Reverse Split Transaction, you should carefully read this entire document, its attachments and the other documents to which we refer.

The following are certain key features of the Reverse Split Transaction:

- How Will I Be Affected by the Reverse Split Transaction If I Currently Own Less Than 500 Shares of the Company's Common Stock? If you are a shareholder of the Company owning fewer than 500 shares of the Company's Common Stock (the "Existing Common Stock") immediately prior to the Reverse Split, you will own only a fractional share of stock as a result of the Reverse Split and, accordingly, you will no longer be a shareholder of the Company. As such, you will no longer have any voting or ownership rights in the Company and you will not be able to participate in any future growth of the Company. In lieu of your fractional share, you will receive cash in an amount equal to the result obtained by multiplying \$245.00 by a fraction having as the numerator the number of shares owned and the denominator as the number 500 (which is equal to \$0.49 per share of Existing Common Stock). For example, if you are the holder of 250 shares of Existing Common Stock at the effective time of the Reverse Split, you

Edgar Filing: LINCOLN LOGS LTD - Form PRER14C

would receive \$122.50 in cash rather than fractional shares. This transaction will not involve commissions or other transaction fees that would be charged if you sold shares on the open market. See "SPECIAL FACTORS RELATING TO APPROVAL OF AMENDMENT TO CERTIFICATE OF INCORPORATION TO EFFECT REVERSE SPLIT -- How the Reverse Split Transaction Will be Effected."

- How Will I Be Effected by the Reverse Split Transaction If I Currently Own More Than 500 Shares of the Company's Common Stock? If you are a shareholder of the Company owning 500 or more shares of the Company's Existing Common Stock at the effective time of the Reverse Split, you will continue to be a shareholder of the Company. Each holder of 500 shares of Existing Common Stock will automatically become the holder of one post-Reverse Split share of common stock (the "New Common Stock"). See "SPECIAL FACTORS RELATING TO APPROVAL OF AMENDMENT TO CERTIFICATE OF INCORPORATION TO EFFECT REVERSE SPLIT -- How the Reverse Split Transaction Will be Effected."

- How Will the Reverse Split Transaction Effect the Current Management of the Company? The current directors and officers of the Company will continue to serve as the directors and officers of the Company immediately after the Reverse Split Transaction and the percentage ownership of the Company's common stock beneficially owned by the directors and officers of the Company as a group will increase from approximately 82% to approximately 85%, based on the shares outstanding as of May 18, 2005. Accordingly, the Reverse Split will not result in any changes in the control of the Company. See "SPECIAL FACTORS RELATING TO APPROVAL OF AMENDMENT TO CERTIFICATE OF INCORPORATION TO EFFECT REVERSE SPLIT -- Summary of the General Effects of the Reverse Split."

- 1 -

- Why is the Reverse Split Transaction Being Proposed? The purpose of the Reverse Split is to relieve the Company of the substantial costs and liability exposure associated with complying with the public document filing requirements of the Securities Exchange Act of 1934, as amended (the "Exchange Act"), and, in particular, the extensive new requirements of the Sarbanes-Oxley Act of 2002. If the Company has fewer than 300 shareholders of record of Common Stock after the completion of the Reverse Split Transaction, the Company will be eligible and intends to "go private" by terminating the registration of its Common Stock with the Securities and Exchange Commission (the "SEC"). Accordingly, it will no longer be obligated to file periodic reports (e.g. annual and quarterly reports) and proxy statements pursuant to the Exchange Act. Moreover, the reporting and restrictions of the Exchange Act, including without limitation, the reporting and short swing profit provisions of Section 16 will no longer apply to the Company's executive officers, directors and 10% shareholders. The Company would also no longer be subject to the Sarbanes-Oxley Act of 2002 or the liability provisions of the Exchange Act. Accordingly, there would be no affirmative regulatory requirement imposed on the Company to, among other things, adopt and maintain internal controls and procedures to ensure that material information, both financial and non-financial, is identified and communicated on a timely basis. See "SPECIAL FACTORS RELATING TO APPROVAL OF AMENDMENT TO CERTIFICATE OF INCORPORATION TO EFFECT REVERSE SPLIT -- Purposes and Reasons for the Proposed Reverse Split."

- What are the Principal Advantages of the Reverse Split Transaction? The principal advantages of the Reverse Split Transaction are the direct and indirect savings of expenses that are expected to be realized by the termination of the Company's reporting company status. The Company believes, based upon historical information, that the Reverse Split Transaction may save it approximately \$300,000 per year in costs associated with being a public

Edgar Filing: LINCOLN LOGS LTD - Form PRER14C

reporting company. The Company also believes that a substantial number of employee hours will be saved and be able to be more profitably redeployed by not having to file Exchange Act reports. However, these direct and indirect cost savings are estimates and the actual savings may be higher or lower. Also, affiliated and unaffiliated shareholders holding a number of shares not evenly divisible by 500 will receive a cash payment for the portion of their interest that would otherwise be represented by a fractional share, without incurring brokerage or other transaction costs. See "SPECIAL FACTORS RELATING TO APPROVAL OF AMENDMENT TO CERTIFICATE OF INCORPORATION TO EFFECT REVERSE SPLIT -- Purposes and Reasons for the Proposed Reverse Split."

- What are the Principal Disadvantages of the Reverse Split Transaction? The principal disadvantages of the Reverse Split Transaction include the facts that (i) shareholders will no longer have an organized trading market in which to purchase and sell shares of the Company's Common Stock because the Company's Common Stock will no longer be quoted on the Nasdaq Over-the-Counter Bulletin Board, (ii) there will be limited information available publicly regarding the Company unless the Company voluntarily elects to disseminate information publicly or it re-registers under the Exchange Act in the future, and (iii) many of the Company's shareholders (those who own less than 500 shares) will cease to be shareholders of the Company and will not be able to participate in any future growth or profits the Company may thereafter experience. See "SPECIAL FACTORS RELATING TO APPROVAL OF AMENDMENT TO CERTIFICATE OF

- 2 -

INCORPORATION TO EFFECT REVERSE SPLIT -- Purposes and Reasons for the Proposed Reverse Split."

- What Effect Will the Reverse Split Transaction Have on the Company's Outstanding Shares? The number of the Company's shareholders of record will be reduced from approximately 3,100 to 132, and the number of the outstanding shares of the Company's Common Stock will be reduced. As of May 18, 2005, there were approximately 9,040,059 shares of the Company's Common Stock outstanding. As a result of the Reverse Split, and the related purchase of all fractional interests, the number of the Company's outstanding shares of Common Stock will be reduced to approximately 17,608. See "SPECIAL FACTORS RELATING TO APPROVAL OF AMENDMENT TO CERTIFICATE OF INCORPORATION TO EFFECT REVERSE SPLIT -- Summary of the General Effects of the Reverse Split."

- What Are the Costs Associated With the Reverse Split Transaction? The Company will pay cash of approximately \$115,669 in the aggregate out of its working capital to repurchase fractional shares and approximately \$63,800 to pay the costs of the Reverse Split Transaction. See "PROPOSAL ONE -- APPROVAL OF AMENDMENT TO CERTIFICATE OF INCORPORATION TO EFFECT REVERSE STOCK SPLIT -- Source and Amount of Funds for and Expenses of the Reverse Split."

- Are There Any Conflicts of Interest Implicated by the Reverse Split Transaction? While the Company's board of directors (the "Board," or the "Board of Directors") and John D. Shepherd, as a control person of the Company by virtue of his serving as Chairman of the Board and Chief Executive Officer of the Company and his ownership of approximately 57% of the outstanding shares of the Company's Common Stock, have concluded that the Reverse Split Transaction is fair to the Company and its shareholders, from both a procedural and a financial point of view, the Board and Mr. Shepherd have interests in the Reverse Split Transaction that are different from your interests as shareholders and have relationships that may present conflicts of interest. For example, (i) each member of the Board and each executive officer (collectively the

Edgar Filing: LINCOLN LOGS LTD - Form PRER14C

"Affiliated Shareholders"), including Mr. Shepherd, owns more than 500 shares of the Company's Existing Common Stock and thus, will remain shareholders of the Company after the Reverse Split Transaction, (ii) certain of the Company's directors and senior executive officers hold options to purchase more than 500 shares of the Company's Existing Common Stock, which will remain outstanding after the Reverse Split Transaction, and (iii) as a result of the Reverse Split Transaction, shareholders owning of record 500 or more shares of Common Stock, including Mr. Shepherd and the rest of the Company's directors and executive officers, will increase their percentage of ownership in the Company (e.g., the current directors and executive officers, as a group, will increase their collective ownership percentage from approximately 82% to approximately 85% as a result in the reduction in the number of outstanding shares). See "SPECIAL FACTORS RELATING TO APPROVAL OF AMENDMENT TO CERTIFICATE OF INCORPORATION TO EFFECT REVERSE SPLIT - Summary of the General Effects of the Reverse Split."

- How Did The Board of Directors and Mr. Shepherd Determine the Fairness of the Reverse Split Transaction? The Board and Mr. Shepherd considered many factors

- 3 -

in their determination to approve the Reverse Split Transaction. Most importantly, the Board and Mr. Shepherd considered whether the Reverse Split Transaction was in the best interests of the Company's shareholders. In connection with that decision, the Board and Mr. Shepherd considered advantages and disadvantages to the Company's going private, as well as the methods and types of transactions available to allow the Company to go private. In connection with that analysis, the Board and Mr. Shepherd also were required to determine the fair value of the Company's Common Stock and, depending on the type of transaction chosen to go private, to determine whether the Board and Mr. Shepherd were permitted to or thought it advisable to recommend the Company pay any premium over the fair value of the Company's Common Stock. The Board and Mr. Shepherd determined that the pre-Reverse Split fair value of the Common Stock was \$0.49 per share. They made this determination based on an opinion of value the Company received from Empire Valuation Consultants, LLC, an independent valuation consultant, and certain other considerations, such as general lack of liquidity of the Common Stock, recent trading volumes, Company projections and recent market trends, that the Board and Mr. Shepherd deemed relevant to their evaluation. See "SPECIAL FACTORS RELATING TO APPROVAL OF AMENDMENT TO CERTIFICATE OF INCORPORATION TO EFFECT REVERSE STOCK SPLIT - Deliberations Regarding the Reverse Split Transaction below.

- What Are the Federal Income Tax Consequences of the Reverse Split Transaction for Shareholders? The receipt of cash in the Reverse Split Transaction will be taxable for federal income tax purposes. Shareholders who only receive shares of New Common Stock should not be subject to taxation as a result of the Reverse Split Transaction. Shareholders who receive cash in lieu of fractional shares of New Common Stock will recognize capital gain or loss in an amount equal to the difference between the amount of cash received and the adjusted basis of the fractional shares surrendered for cash. To review the material tax consequences in greater detail, please read the discussion under "FEDERAL INCOME TAX CONSEQUENCES" below.

- If I Own Fewer than 500 Shares of Existing Common Stock, is There Any Way I Can Continue to be a Shareholder of the Company After the Reverse Split Transaction? If you own fewer than 500 shares before the Reverse Split, the only way you can continue to be a shareholder of the Company after the Reverse Split, is to purchase, prior to the effective date of the Reverse Split, which is expected to be July 27, 2005, (the "Effective Date") sufficient shares to cause you to own a minimum of 500 shares on the Effective Date. We cannot assure you, however, that any shares will be available for such purchase.

Edgar Filing: LINCOLN LOGS LTD - Form PRER14C

- Is There Anything I Can Do if I Own 500 or More Shares of Existing Common Stock, but Would Like to Take Advantage of the Opportunity to Receive Cash for My Shares as a Result of the Reverse Split Transaction? If you own 500 or more shares before the Reverse Split Transaction, you can receive cash for all of your shares if, prior to the Effective Date, you reduce your stock ownership to fewer than 500 shares by selling or otherwise transferring your shares. We cannot assure you, however, that any purchaser for your shares will be available. Alternatively, before the Effective Date, you could divide your shares among different recordholders so that fewer than 500 shares are held in

- 4 -

each account. For example, you could divide your shares between your own name and a brokerage account so that fewer than 500 shares are held in each account.

- What Happens if I Own a Total of 500 or More Shares Beneficially, but I Hold Fewer than 500 Shares of Existing Common Stock of Record in my Name and Fewer than 500 Shares with my Broker in "Street Name?" If you, for example, have 200 shares registered in your own name with the Company's transfer agent, and you have 300 shares held through your broker in street name, you would receive cash for the 200 shares of Existing Common Stock you hold of record and you would also receive cash for the 300 shares held in street name if your broker or other nominee accepts the Company's offer for each beneficial owner of fewer than 500 shares of Existing Common Stock held in the broker's or nominee's name to receive cash for fractional shares.

- If I Own at Least 500 Shares, but the Shares Are Split Among Record Holders as Described Above so That No Record Holder Owns 500 or More Shares, But I Wish to Continue to Own Common Stock After the Reverse Split Transaction, What Should I Do? Before the Effective Date, you could put all of the shares you own beneficially in the name of one recordholder, either in your name or in street name, so that the total shares you own that are held of record in the same name is at least 500 shares, and then you would continue to be a shareholder after the Effective Date.

- What Percentage of Shareholders Must Vote in Favor of the Reverse Split Transaction for it to be Approved? The Reverse Split Transaction will be approved if a majority of the all outstanding shares of Common Stock entitled to vote thereon vote in favor of its approval. John D. Shepherd, Chief Executive Officer and owner of approximately 57% of the outstanding shares of the Company's Existing Common Stock, and the rest of the Affiliated Shareholders, who, together with Mr. Shepherd, own approximately 82% of the Company's Existing Common Stock, have indicated their intention to vote in favor of the Reverse Split Transaction. If they do so, the Reverse Split Transaction will be approved, and effected, without considering the vote of the Company's unaffiliated shareholders. Accordingly, you are not being asked to deliver a proxy, and you will not be asked to vote at the Meeting, with respect to this proposal. You are, however, welcome to attend the Meeting.

- Do I Have Appraisal or Dissenters' Rights? Under New York law, those shareholders who wish to exercise their right to dissent and elect not to receive the cash value in an amount equal to the result obtained by multiplying \$245.00 by a fraction having as the numerator the number of shares owned and the denominator as the number 500 (which is equal to \$0.49 per share of Existing Common Stock) must meet all of the specific requirements stated in Section 623 of the New York State Business Corporation Law (See Appendix B). This means that only holders of shares in increments of less than 500 shares of the Company's Existing Common Stock that would result in receiving a cash payment in lieu of a fractional share are entitled to dissenters' rights. The dissenters' rights

Edgar Filing: LINCOLN LOGS LTD - Form PRER14C

statute provides that shareholders who dissent from the Reverse Split Transaction are entitled to payment in cash for the fair value of their fractional share (if any) resulting from the Reverse Split. See "DISSENTERS' APPRAISAL RIGHTS" below for important details regarding the procedure and specific rights.

- 5 -

SPECIAL FACTORS RELATING TO APPROVAL OF AMENDMENT TO CERTIFICATE OF INCORPORATION TO EFFECT REVERSE SPLIT

Introduction

On February 19, 2005 and March 17, 2005, the Company's Board of Directors unanimously adopted a resolution approving, and decided to recommend to the Company's shareholders, a 1-for-500 reverse stock split (previously defined as the "Reverse Split") of the Company's Existing Common Stock, the preparation of the corresponding amendment of the Company's Certificate of Incorporation, and the payment of the fair value for any fractional shares resulting from the Reverse Split (previously defined as, together with the Reverse Split, the "Reverse Split Transaction"). Mr. Shepherd, as a control person of the Company, also separately approved the Reverse Split Transaction. The Reverse Split Transaction is proposed to reduce the number of shareholders of record to less than 300, thereby allowing the Company to terminate its registration under the Exchange Act and relieving the Company of the costs of filing public documents and allowing the Company to continue its long-term business plans without the burdens of public reporting. As a private company, the Company would no longer be required to file annual and quarterly reports with the SEC.

The Company's Board of Directors and Mr. Shepherd considered many factors in their determination to approve the Reverse Split Transaction and submit the proposal to the shareholders for approval. Most importantly, the Board of Directors and Mr. Shepherd had to determine if the Reverse Split Transaction was in the best interests of the Company's shareholders. In connection with that decision, the Board of Directors and Mr. Shepherd considered advantages and disadvantages to the Company of going private, as well as the methods and types of transactions available to allow the Company to go private. In connection with that analysis, the Board of Directors and Mr. Shepherd also were required to determine the fair value of the Company's Common Stock and, depending on the type of transaction chosen to go private, to determine whether it was permitted or advisable to recommend the Company pay any premium over the fair value of the Company's Common Stock.

The Board of Directors and Mr. Shepherd, after extensive discussions with representatives from Company management and outside legal counsel to the Company, made a preliminary determination that a reverse stock split would be the best transaction structure to achieve, in the most cost effective manner, the Company's going private goal.

The Reverse Split is subject to approval by a majority of all outstanding shares of Common Stock entitled to vote thereon. The Company's officers and directors, who own approximately 82% of the Company's Existing Common Stock (previously defined as the "Affiliated Shareholders"), have indicated their intention to vote in favor of the Reverse Split. Accordingly, the Company is not soliciting the vote of its unaffiliated shareholders with respect to this proposal.

How The Reverse Split Transaction Will Be Effectuated

The Reverse Split of the Company's outstanding Common Stock will automatically occur upon the filing of the Reverse Split amendment to the Company's Certificate of Incorporation ("Reverse Split Amendment"), after such filing has been approved by the Company's Affiliated Shareholders at the Meeting. The "Effective Date," referred to throughout this Information Statement of the Reverse Split will be the date indicated as such in the Reverse Split Amendment, which date is currently expected to be July 27, 2005, the date on which the Reverse Split Amendment is filed with the State of New York. A form of the Reverse Split Amendment is attached hereto as Appendix A.

Following shareholder approval of the Reverse Split Amendment, each holder of at least 500 shares of Existing Common Stock will automatically become the holder of at least one post-Reverse Split share of Common Stock, also referred to herein as "New Common Stock". No fractional shares will be issued in connection with the Reverse Split, and any fractional shares that may result will be redeemed in cash based on the fair value of the Existing Common Stock as required by New York Law. The fair value of the Existing Common Stock was determined (for purposes of the payment for fractional shares) based upon an opinion of value received by the Company by Empire Valuation Consultants, LLC ("Empire") as well as certain other factors that the Board and Mr. Shepherd deemed relevant to their evaluation, including the general lack of liquidity of the Common Stock, historically low trading volumes, Company projections and recent market trends. The Board of Directors and Mr. Shepherd believe that the cash payment in lieu of fractional shares in an amount equal to the result obtained by multiplying \$245.00 by a fraction having as the numerator the number of shares owned and having as the denominator the number 500 (which is equal to \$0.49 per share of Existing Common Stock), accurately reflects the fair value of the Existing Common Stock.

Each current certificate representing issued and outstanding shares of Existing Common Stock prior to the Reverse Split will automatically be deemed to represent the correct number of post-split shares of New Common Stock after the Effective Date. Following the Reverse Split Transaction, the Company or its transfer agent will send an instruction letter to each shareholder. Upon receipt of the stock certificates and properly completed instruction letters, the Company or its transfer agent will issue the appropriate new stock certificates and/or make the appropriate cash payments. Do not send any stock certificates to the Company or its transfer agent until you receive an instruction letter. After the Reverse Split, shareholders being cashed-out will have no rights as shareholders with respect to the pre-Reverse Split Existing Common Stock or the fractional shares that would have resulted from the Reverse Split, whether or not those shareholders have been paid cash consideration.

The Company anticipates that it will pay out approximately \$115,669 to holders of Existing Common Stock that will be holders of fractional shares following the Reverse Split Transaction.

If the Reverse Split is approved and implemented, the number of shareholders of record of the Company's Common Stock will be fewer than 300. The Company intends to terminate the registration of its Common Stock under the Exchange Act pursuant to Section 12(g)(4) of the Exchange Act as soon as possible after the Effective Date. Following the Reverse Split Transaction, the decision by the Company to terminate Exchange Act registration will not require shareholder approval and will not be voted on at this Meeting. After the Company has

de-registered its Common Stock, the Company's duty to file periodic reports with the SEC, such as current quarterly and annual reports, will be suspended.

Purposes and Reasons For the Proposed Reverse Split

Potential Advantages to Going Private

The Company's Board of Directors and Mr. Shepherd considered a number of important advantages to going private which are summarized as follows and discussed in greater detail below:

Cost savings with respect to public reporting and shareholder account servicing;

Increased operating freedom focused on long-term growth rather than quarterly results;

No practical reduction in liquidity for continuing shareholders; and

Elimination of the applicability of the Sarbanes-Oxley Act of 2002 and the attendant liabilities to which the members of the Company's Board of Directors would otherwise be subject.

Elimination of Costs Associated with Being an Exchange Act Reporting Company.

The principal reason for engaging in a going private transaction is to relieve the Company of the costs and burdens of remaining a public company and allow the Company's management team to focus on long-term growth. Because of the Company's relatively small size, limited profitability and limited dividend distributions, the Company's status as a public company has provided little liquidity for the Company's shareholders. The Company's management expects no change in this situation for the foreseeable future. For these reasons, the costs and expenses of remaining a public reporting company are not warranted because the Company has not been and expects that it will not be able to realize one of the principal benefits of public ownership.

There are considerable costs and burdens to the Company that result from it being a public reporting company. To comply with its obligations under the Exchange Act, the Company incurs direct and indirect costs associated with compliance with the filing and reporting requirements imposed on public companies. Examples of direct cost savings from termination of registration of common shares include: lower printing and mailing costs; reduced reporting and disclosure requirements due to the Company's private status; and reduction in direct expenses such as word processing and preparing electronic filings in the EDGAR format prescribed by the SEC. The Company also believes that there will be a reduction in audit and legal fees once the Company is no longer subject to the reporting requirements of the Exchange Act. The Company also incurs substantial indirect costs as a result of executive time expended to prepare and review such Exchange Act filings and to otherwise comply with Exchange Act and Sarbanes-Oxley Act of 2002 requirements applicable to public companies. Termination of registration under the Exchange Act of the Common Stock is expected to substantially reduce many of these costs.

The Company also expects the Reverse Split Transaction to substantially reduce the cost of servicing shareholder accounts. The costs of printing and mailing

Edgar Filing: LINCOLN LOGS LTD - Form PRER14C

materials to shareholders (and dividend checks if and when declared and paid) increases for each shareholder account, regardless of the number of shares held by the shareholder. Many of the Company's shareholders hold a relatively small number of shares, and the cost of servicing such accounts is disproportionate to the size of the holdings. After the Reverse Split Transaction, the Company expects that it will have approximately 132 shareholders, compared to approximately 3,100 shareholders prior to the Reverse Split.

Based on its experience in prior years, the Company believes that annual savings of approximately \$300,000 per year following the Reverse Split Transaction may be realized by going private. This amount, however, is just an estimate based on past experience, and the actual savings to be realized may vary from such estimate, especially in view of the additional requirements of the Sarbanes-Oxley Act of 2002 and related SEC rules if the Company continues to be subject to the Exchange Act. However, the Company cannot guarantee that the benefits of going private will be accomplished as expected or as scheduled. The estimated savings will accrue from the elimination of the following expenses:

Expense	Estimated Dollars
Independent Accountants	\$84,000
Legal	\$22,000
Transfer Agent	\$27,000
Printing and Postage	\$12,000
Directors' Fees	\$65,000
Salaries	\$90,000

Total Annual Estimated Savings	\$300,000

It is anticipated that the Company will also save considerable time by no longer having to comply with the federal securities laws. As previously noted, the Company is legally permitted (and intends to promptly) terminate its registration under the Exchange Act if the Company's New Common Stock is held by less than 300 shareholders of record after the Reverse Split Transaction. Termination of the Company's Exchange Act registration would make certain provisions of the Exchange Act, such as the quarterly (Form 10-QSB) and annual (Form 10-KSB) reporting and proxy statement filing obligations, no longer applicable to the Company. The Company would also no longer be subject to any regulatory legal requirement to adopt and maintain Sarbanes-Oxley internal controls and procedures to insure the timely and appropriate identification and disclosure of material financial and nonfinancial information. The Company believes that a substantial number of employee hours will be saved and be able to be more profitably redeployed by not having to file Exchange Act reports.

The Board of Directors and Mr. Shepherd also believe that the Company, because of its being a public reporting company, has not been able to concentrate to its potential on the long-term growth of the Company's businesses. Rather, the Company has been required to place undue emphasis on quarter-to-quarter earnings. By becoming a private company, the Board of Directors and Mr. Shepherd feel that management can direct its efforts to long-term growth in ways that better reflect the Company's historical business seasonality. Management will gain greater flexibility in operating the Company and planning for its future.

Edgar Filing: LINCOLN LOGS LTD - Form PRER14C

The Reverse Split Transaction also provides for a cash payment to holders in lieu of the issuance of fractional shares. Unaffiliated and affiliated shareholders will benefit from the Reverse Split Transaction in that they will receive a cash payment for all or a portion of their existing holdings. All holders of less than 500 shares of Existing Common Stock will receive a cash payment for their entire interest in the Company, without having to pay brokerage or other transaction costs, which the Company believes provides a substantial benefit since the current market for the shares is very limited. Those shareholders who hold 500 or more shares of Existing Common Stock will receive New Common Stock and will continue to have voting and ownership rights in the Company, as well as payments in cash for any fractional shares resulting from the Reverse Split Transaction for such holders. The holders of New Common Stock will have the opportunity to participate in the increased opportunities for future growth that the Company will experience due to the reduced reporting and administrative costs associated with the Company no longer being public.

Potential Disadvantages to Going Private

While the Company believes the Reverse Split Transaction will result in the benefits described, several disadvantages should also be noted.

Inability to Participate in any Future Increase in the Value of the Company's Common Stock

The ownership interest of shareholders holding less than 500 shares will be terminated, and such shareholders will not participate in any future growth of the company. Additionally, these shareholders will be forced to relinquish their shares of the Company's Common Stock upon the effective date of the Reverse Split Transaction, rather than choosing on their own the time and price for disposing of their holdings of Common Stock of the Company.

Cessation of Public Market of Company's Common Stock

Following the Reverse Split, the Company will apply for the termination of its Exchange Act registration and periodic reporting obligations. Once the Company terminates such obligations, the Company's Common Stock will no longer be eligible to be quoted on the Nasdaq OTCBB. As a result, there will be no effective trading market for the Company's Common Stock. However, the current public market is highly illiquid, as many days go by without any trading whatsoever. Because, as a practical matter, there currently exists very little liquidity for the Common Stock, the Board and Mr. Shepherd determined that any further loss of liquidity would have little effect on remaining shareholders and that any loss of liquidity will be outweighed by the benefits of terminating the Company's Exchange Act registration and periodic reporting obligations.

Cessation of Publicly Available Information

After the Reverse Split Transaction, the Company will terminate the registration of its Common Stock under the Exchange Act and the Company will no longer be subject to the reporting requirements under the Exchange Act. As a result of the termination of the Company's reporting obligations under the Exchange Act:

- 10 -

Less information will be required to be furnished to shareholders or to be made publicly available by the Company;

Various provisions of the Exchange Act, such as quarterly operating

Edgar Filing: LINCOLN LOGS LTD - Form PRER14C

statements and proxy statement disclosure in connection with shareholder meetings, will no longer apply to the Company; and

The reporting requirements and restrictions of the Exchange Act, including without limitation the reporting and short-swing profit provisions of Section 16, will no longer apply to executive officers, directors and 10% shareholders of the Company.

The Company will also no longer be subject to the provisions of the Sarbanes-Oxley Act or the liability provisions of the Exchange Act. Therefore, the chief executive officer and chief financial officer would no longer be required to certify as to the accuracy of the Company's financial statements. Moreover, there would be no affirmative regulatory requirement imposed on the Company to adopt and maintain internal controls and procedures to ensure that material information, both financial and non-financial, is identified and communicated on a timely basis.

Federal Income Tax Consequences

Both affiliated and unaffiliated shareholders of the Company receiving cash as a result of the Reverse Split Transaction will be subject to federal income taxes and possibly state taxes, as if they had sold their shares. As a result, both affiliated and unaffiliated shareholders who receive cash due to the Reverse Split Transaction may be required to pay taxes (or may recognize a capital loss) on their respective shares of Common Stock which are converted into the right to receive cash from the Company. See "FEDERAL INCOME TAX CONSEQUENCES."

As discussed below, after evaluating potential advantages and disadvantages of the Reverse Split Transaction, the Company's Board of Directors and Mr. Shepherd concluded that the advantages of conducting a going private transaction substantially outweighed the disadvantages associated with "going private".

Deliberations Regarding the Reverse Split Transaction

In approving the Reverse Split Transaction, the Board of Directors and Mr. Shepherd took a number of factors into consideration, including the historical and present condition of the Company, the advantages and disadvantages of going private and the fairness of the Reverse Split Transaction to the Company's unaffiliated shareholders.

Initial Review and Consideration

During January 2005, because of the high costs associated with being a public company and the fact that the Company enjoys few benefits from being public, management discussed with the Company's outside legal counsel options for terminating the Company's reporting obligations, including a reverse stock split. After discussions with legal counsel and preparation of preliminary cost savings and recent trading analyses, management decided to present these options to the Board of Directors and Mr. Shepherd for further discussion.

- 11 -

At the February 19, 2005, meeting of the Board of Directors, the Board and Mr. Shepherd considered whether it would be appropriate for the Company to conduct a going private transaction. They then considered the advantages and disadvantages of being a private company. At that time, they considered the following specific advantages and disadvantages to taking the Company private:

Edgar Filing: LINCOLN LOGS LTD - Form PRER14C

Advantages of Going Private

Annual expense savings of up to \$300,000

Management could focus on managing the Company, rather than increasing stock price to maximize shareholder value.

Certain shareholders would receive cash payment for their fractional holdings in the Company, without incurring brokerage fees and gain the ability to liquidate their

Disadvantages of Going Private

Shareholders with fractional shares following reverse split would no longer remain shareholders and would be unable to participate in future potential growth of the Company

limited opportunities for a public market in the Company's securities may reduce the Company's opportunities to raise equity financing and would result in further losses in liquidity of the shares of the Company's Common Stock.

Limited public information regarding the Company (unless the Company voluntarily elects to disseminate information publicly or re-registers under the Exchange Act in the future.

Shareholders receiving cash payment in lieu of their fractional share following the reverse split will be forced to recognize income and pay income tax on any gain realized.

The Board and Mr. Shepherd concluded that the advantages of conducting a going private transaction substantially outweighed the disadvantages associated with going private. The Board and Mr. Shepherd determined this to be true because (i) the outstanding shares of Existing Common Stock were already illiquid, given the typical low or non-existent daily trading volume, and (ii) the Company intends to voluntarily distribute annual financial and certain other information about the Company to its shareholders after the Reverse Split Transaction.

Form of Going Private Transaction.

The Board and Mr. Shepherd next discussed the options available to the Company to accomplish its going private goals, principally a reverse split and an issuer self-tender offer. They determined, comparing such available options, that a reverse stock split was the most feasible and cost-effective option. The Board and Mr. Shepherd considered the following options:

- 12 -

Issuer Tender Offer. The Board and Mr. Shepherd considered, in concept, an issuer tender offer by which the Company would offer to repurchase shares of the Company's outstanding Common Stock. The results of an issuer tender offer would be unpredictable, however, due to its voluntary nature. Neither the Board nor Mr. Shepherd was certain as to whether this alternative would result in shares being tendered by a sufficient number of record holders so as to permit the Company to reduce the number of shareholders below 300, to reduce its administrative costs related to servicing shareholders who own a relatively small number of shares and to terminate its SEC reporting requirements. They were also uncertain as to whether many holders of a small number of shares would make the effort to tender their shares. In addition, they considered that the estimated transaction cost of completing a tender offer would be similar to or greater than the costs of the Reverse Split Transaction, and these costs could

Edgar Filing: LINCOLN LOGS LTD - Form PRER14C

be significant in relation to the value of the shares purchased since there could be no certainty that a significant number of shares would be tendered. Since an issuer tender offer would not necessarily meet the Company's objective of reducing the number of shareholders below 300, neither the Board nor Mr. Shepherd addressed or considered potential purchase prices to be offered in an issuer tender offer.

Purchase of Shares on the Open Market. The Board and Mr. Shepherd also considered purchasing shares of the Company in the open market in order to reduce the number of shareholders to fewer than 300. Given the lack the daily trading volume of the Common Stock, however, there was no assurance that purchasing stock in isolated transactions would result, in a reasonable period of time, in enough shareholders selling their shares to reduce the number of shareholders enough to permit the Company to deregister.

Third Party Acquirer. The Board and Mr. Shepherd also considered seeking a third party acquirer. They noted that no offers were currently outstanding and third-party interest had not been solicited.

Continuing as is. The Board and Mr. Shepherd also considered taking no action at all. However, due to the Company's significant and increasing costs of compliance under the Exchange Act, especially in relation to the Company's overall expenses and cash flow, they decided that taking no action at this time was not in the best interests of the Company. The Company, based on past experience, estimates \$300,000 per year in expenses may continue to be incurred if the Company continues to be a reporting company under the Exchange Act. This estimate is substantially based on past experience, and may not necessarily be indicative of actual future expenses in view of the additional requirements of the Sarbanes-Oxley Act of 2002 and related SEC rules.

Reverse Split. Because the results of a reverse stock split are more predictable and automatic, each of the Board and Mr. Shepherd believes that the Reverse Split is the most expeditious and economical way of reducing the number of holders of record to fewer than 300 and effecting the termination of the Company's Exchange Act registration and periodic reporting obligations. Upon deciding that the Reverse Split was the most effective way to accomplish the Company's going private goals, the Board asked management to prepare materials for its review relating to the possible split ratios that could be used, such as 1-for-300, 1-for-500, 1-for-1000 and 1-for-2000, and the costs to the Company associated with each of such ratios.

- 13 -

Fairness of Reverse Split Transaction.

The Board and Mr. Shepherd next reviewed the fairness of the Reverse Split Transaction to the Company's affiliated and unaffiliated shareholders. Each of the Board and Mr. Shepherd considered whether the Reverse Split Transaction would be both substantively and procedurally fair to the Company's unaffiliated shareholders.

Fairness of Price. After determining that going private was in the Company's best interest, the Board and Mr. Shepherd next considered the methods that could be used to determine a fair purchase price with respect to the repurchase by the Company of the fractional shares resulting from the Reverse Split, including:

Edgar Filing: LINCOLN LOGS LTD - Form PRER14C

Historical and Current Market Price: The Board and Mr. Shepherd reviewed the current market price of the Existing Common Stock. The Board also considered that (i) only approximately 12% of the Company's issued and outstanding shares of Common Stock was legally allowed to trade without restriction, (ii) the Company's Common Stock was extremely illiquid with low trading volume and price volatility occurring from nominal trading volume, (iii) in the past months, other than swings in price due to infrequent larger purchases or sale, the price has been trading in a very narrow trading range, and (iv) with increased future profitability uncertain, and over 9 million shares outstanding, earnings per share growth that would have a beneficial affect upon the stock price is highly improbable.

Net Book Value: The Board and Mr. Shepherd next reviewed with management the net book value of the Existing Common Stock. It considered that for the nine months ended as of October 31, 2004, the Company had a net book value of \$2,269,140. As of the same date, there were 9,544,299 common stock shares outstanding, which includes 504,240 shares of Common Stock that were being held in the Company's treasury at that time, which treasury shares have since been cancelled. The net book value as a result of these numbers on October 31, 2004, was approximately \$0.25 per share (net of the treasury shares). At that time, the per share book value as of the Company's fiscal year ended January 31, 2005 was also expected to be approximately \$0.21 per share.

Other Valuation Methods Considered. The Board and Mr. Shepherd also discussed using a liquidation valuation method to determine a fair price for the fractional interests, but rejected that method (as well as any other method that did not value the Company as a going concern) as the Company's experience and annual audit process and the Company's knowledge of the markets in which its assets are located clearly show the per share liquidation value of the Company's assets to be less than the per share value of the Company as a going concern. Moreover, the Board and Mr. Shepherd considered using a going concern method to determine a fair price for the fractional interests and concluded, as discussed below, that it would be in the Company's best interests for it to engage an independent valuation consultant to evaluate the Company on a going concern basis. They further determined that they would adopt and rely on the findings of the independent valuation consultant in this regard.

- 14 -

Other Valuation Methods Not Considered: Neither the Board nor Mr. Shepherd considered the following valuation methods because such information was not available, or did not apply, to the Company for reasons stated below:

Prices paid in previous purchases by the Company of the Company's securities during the past two years. The Company has not purchased the Company's securities in the past two years.

Firm offers of which the Company or any affiliate is aware made by an unaffiliated person during the past two years. The Company is unaware of any such offer.

Opinion of Value. As noted above, the Board and Mr. Shepherd then discussed engaging an independent valuation consultant to provide it with an opinion of

Edgar Filing: LINCOLN LOGS LTD - Form PRER14C

value (the "Opinion of Value") of the Common Stock. Each of the Board and Mr. Shepherd considered this option to be in the best interests of the Company and its shareholders because it would ensure that the price would be determined by an independent valuation expert and therefore would be fair to the Company's shareholders. Accordingly, the Board asked management to recommend an independent valuation consultant to the Board at its next meeting.

Substantive Fairness. In considering the substantive fairness of Reverse Split Transaction, the Board and Mr. Shepherd also determined the following to be significant:

The fact that those shareholders being paid cash for their fractional share interest will no longer participate in the future growth of the Company, if any;

The fact that the potential loss of liquidity in shares of the Company's Common Stock does not appear to be a significant loss given the historically small trading volume of the Company's Common Stock;

Any detriment associated with the reduction in public information available regarding the Company's business, financial condition and results of operations will be offset by the savings in costs and management time expected to result from termination of the Company's registration and periodic reporting obligations with the SEC; and

The increasing costs associated with remaining a public-reporting company.

Procedural Fairness. In considering the procedural fairness of the Reverse Split Transaction, each of the Board and Mr. Shepherd found to be particularly significant the fact that the Company intended to engage an independent valuation consultant to prepare the Opinion of Value to ensure the fairness of the price to be paid. At this initial meeting, the Board also considered forming an independent Special Committee of the Board to evaluate the fairness of the proposed transaction. As discussed below, however, at its March 17, 2005 meeting, the Board concluded that there was not a sufficient number of truly independent directors to serve on a multi-member independent Special Committee and, therefore, that the expense associated with the creation of a Special Committee was an unnecessary disbursement of shareholder value, as it would not add significant value to the Board's deliberative process.

- 15 -

Additionally, the Board and Mr. Shepherd considered other issues related to the procedural fairness of the going private transaction, including those set forth below:

The fact that the transaction was structured so as to require the approval of a majority of the Company's outstanding shares and does not require approval of a majority of the unaffiliated shareholders of the Company;

The unaffiliated shareholders do not have an independent representative because the cost of such representative outweighs its potential benefits in a transaction of this size;

The Board of Directors approving the Reverse Split Transaction consists of 9 members, three (3) of whom (John D. Shepherd, Benjamin Shepherd and Jeffry LaPell) are officers of the Company, one (1) of whom (William Thyne) is a former officer of the Company, one (1) of whom (Leslie M. Apple) is a partner with the law firm engaged to provide counsel with respect to the Reverse Split Transaction, and two (2) of whom (Richard Farr and Steven

Edgar Filing: LINCOLN LOGS LTD - Form PRER14C

Patlin) are otherwise employed by or serve as independent contractors to the Company;

The Board approving the Reverse Split Transaction also owns, as a group, approximately 80% of the Company's outstanding shares of Existing Common Stock;

Shareholders being cashed-out as a result of the Reverse Split Transaction will be liquidating their historically illiquid holdings at a fair price and without brokerage fees; and

Shareholders that may be cashed out pursuant to the Reverse Split Transaction may decide to remain shareholders of the Company after the Reverse Split Transaction by simply acquiring sufficient shares so that they hold at least 500 shares in their account immediately prior to the Reverse Split Transaction.

After carefully evaluating all of these factors and the economic realities of the total current market value of the shares of Common Stock that will be eliminated by the Reverse Split Transaction, the Board and Mr. Shepherd concluded that the actual facts and circumstances of the Company, its current ownership and the Company's finances clearly supported proceeding with approval of the Reverse Split Transaction without independent evaluation beyond that of an independent valuation consultant. The Board and Mr. Shepherd also concluded there was no financial prejudice to shareholders whose ownership interest will be eliminated by the Reverse Split Transaction.

Funding the Reverse Split Transaction.

The Board and Mr. Shepherd next discussed how the Reverse Split Transaction would be funded. Upon consultation with management, the Board and Mr. Shepherd determined that, subject to the receipt of the Opinion of Value, it was not likely that the repurchase price of the fractional interests upon completion of the Reverse Split Transaction would be very significant. Therefore, they anticipated that total amount paid to shareholders to repurchase the fractional interests could be paid from the working capital of the Company.

- 16 -

Review of the Going Private Process

At their initial meeting, the Board of Directors and Mr. Shepherd also reviewed with legal counsel the duties of directors under the federal securities laws and New York State corporate laws in evaluating a going private transaction. It then discussed the preparation of documents to be filed with the SEC in connection with the Reverse Split Transaction. The costs associated with going private were generally discussed as well as the potential timeline for achieving private company status.

The Company engaged Whiteman Osterman & Hanna, LLP, a law firm of which Leslie M. Apple, a Company director, is a partner, to provide advice and counsel with respect to the proposed going private transaction. Counsel outlined the procedure for conducting a going private transaction, including the (i) preparation by counsel of Schedule 14C and Schedule 13e-3, (ii) review of such documents by the SEC, (iii) printing and distributing of the Information Statement to shareholders, (iv) the conducting of the Special Shareholders Meeting, and (v) the effectuation the proposed transaction.

Conclusion

At the initial meeting of the Board and Mr. Shepherd on February 19, 2005,

Edgar Filing: LINCOLN LOGS LTD - Form PRER14C

each of the Board and Mr. Shepherd concluded that a going private transaction was in the best interests of the Company and its shareholders and unanimously approved the Reverse Split Transaction in concept. So that the Board could further review the fairness of the Reverse Split Transaction, however, it directed management to prepare certain materials for its review, including materials relating to split ratios, and to interview potential independent valuation consultant candidates. The Board also instructed management and the Company's legal counsel to proceed with the preparation of the documents necessary to effect the proposed transaction in an expedited manner.

March 17, 2005 Meeting

The Company's Board of Directors and Mr. Shepherd convened again on March 17, 2005, to discuss the progress of the Reverse Split Transaction. Management had previously provided the Board and Mr. Shepherd with materials previously requested by the Board and Mr. Shepherd relating to various split ratios. At management's recommendation, each of the Board and Mr. Shepherd approved the split ratio of 1-for-500. This split ratio would reduce the number of the Company's shareholders to 132, a number well below 300, which is the number necessary for the Company to deregister its securities. Accordingly, the Board and Mr. Shepherd concluded that it was very likely that the split ratio would accomplish the Company's going private goals. The Board therefore approved proceeding subject to receipt of the Opinion of Value, and fixing the repurchase price pursuant thereto.

The Board also re-considered at this meeting the value of forming a Special Committee of the Board of Directors to evaluate the fairness of the Reverse Split Transaction. After deliberation, the Board concluded that there were not a sufficient number of truly independent directors to serve on a multi-member independent Special Committee and, therefore, that the formation of a Special Committee would not add significant value to the Board's deliberative process.

- 17 -

Management also proposed for the Board's and Mr. Shepherd's consideration, the ratification of the selection and engagement of Empire Valuation Consultants, LLC (previously defined as "Empire") to serve as independent valuation consultant to the Company in connection with the Reverse Split Transaction and the preparation of the Opinion of Value. The Board and Mr. Shepherd were provided with Empire's qualifications and were informed that Empire had an excellent reputation within its field. Based on management's recommendation and because of Empire's experience and credentials in the valuation area, the Board ratified management's selection and engagement of Empire.

Opinion of Value

General

Pursuant to the Company's engagement of Empire to prepare the Opinion of Value for the Company in connection with the Reverse Split Transaction, Empire delivered the Opinion of Value to the Company as of March 20, 2005, which was subsequently revised to provide more detail on the methods used by Empire to determine the value of the Company (the "Opinion of Value"). The Opinion of Value states that, for purposes of the Reverse Split Transaction, the aggregate fair value of the Company is reasonably stated as \$4,000,000 as of March 18, 2005. This total value equates to approximately \$0.44 per share of Existing Common Stock. A copy of the Opinion of Value is attached hereto as Appendix C. Empire is under no obligation to update the Opinion of Value.

Edgar Filing: LINCOLN LOGS LTD - Form PRER14C

In consideration for its delivery to the Company of the Opinion of Value, Empire received approximately \$10,000 from the Company. Empire has also received fees in the aggregate amount of \$30,000 in connection with valuation services rendered by Empire to the Company during 2003 and 2004.

Empire's Qualifications

Empire was founded in 1988 and is a highly respected independent valuation consulting firm. Empire's experience includes thousands of valuations involving businesses and intangible assets worldwide. Empire's principals and staff include long-time, active members of major professional societies such as the American Society of Appraisers, Institute of Chartered Financial Analysts, AICPA, and the Institute of Business Appraisers, among others. All of Empire's professionals hold MBA degrees. The credentials of the representatives of Empire assigned to this engagement are attached as an addendum to the Opinion of Value, a copy of which is attached hereto as Appendix C.

Empire provides objective, third-party conclusions of value. As a valuations-only firm, it seeks to reduce the potential for conflicts of interest that occur when auditing, banking or brokerage services are offered by the same firm. Empire maintains a strict internal code of conduct and adheres to the ethical and professional valuation standards, including the Uniform Standards of Professional Appraisal Practices, set forth by various professional organizations.

- 18 -

Summary of the Opinion of Value

In preparing the Opinion of Value, Empire's professionals examined the Company, in-depth. It gathered information on those aspects of the Company's past, present and future that impact the value of the Company. For purposes of its engagement, "fair value" was defined as "the price at which ownership interests would change hands between a willing buyer and a willing seller, neither being under any compulsion to buy or sell and both having reasonable knowledge of relevant facts."

According to the Opinion of Value, Empire valued the Company based on the assumption that the Company is a going concern. The appraisal was conducted in accordance with guidelines established by the Internal Revenue Service ("IRS") and appraisal practices promulgated by the American Society of Appraisers in the Principles of Appraisal Practice and Code of Ethics, together with such standards as Empire deemed relevant to the engagement. Since the Company is a thinly traded publicly held company, Empire, following valuation industry protocol, valued the Company in the same manner as a privately held company. In this regard, Empire's definition of "fair value" was virtually identical to the definition of "fair market value" as defined by the Internal Revenue Code. Accordingly, in determining the "fair value" of the Company, Empire reviewed the factors considered by the Internal Revenue Service to be relevant in determining "fair market value" for a privately held company including, without limitation, (i) the nature of the business and the history of the enterprise from its inception; (ii) the general economic outlook and condition of, and outlook for, the subject industry; (iii) the book value of the equity and the Company's financial condition; (iv) the earning capacity of the Company; (v) the Company's dividend paying capacity; (vi) whether or not goodwill or other intangible value exists; (vii) past sales of the equity and the size of the block under consideration; and (viii) the market price of actively traded interests of public corporations engaged in the same or similar lines of business.

Edgar Filing: LINCOLN LOGS LTD - Form PRER14C

Empire reviewed the following in determining the fair value of the Company: (i) the Company's filings with the SEC for its fiscal years ended January 31, 2001 through 2005 and various interim periods, (ii) the Company's pro-forma results for 2006, including a balance sheet, income statement and statement of cash flow as well as a projected income statement for the Company's fiscal year ending January 31, 2006, provided by management of the Company, (iii) an on-site visit to one of the Company's divisions during 2002; (iv) Hoover's Online, Edgarscan, Multex and Yahoo!Finance databases, (v) economic and industry information from Value Line, the Wall Street Journal, and Standard & Poor's Industry Surveys and Log Home Council, among others, (vi) conversations with certain members of the Company's management, legal counsel and its primary lender, and (vii) other reviews, analyses and research as Empire deemed necessary.

After consideration of a number of generally accepted valuation methodologies, Empire employed a capitalization of income analysis and an adjusted book value calculation and reviewed the market price of the Company's Common Stock in arriving at its opinion, each of which are described in further detail below. Empire also conducted a sensitivity analysis by employing a small company rule of thumb based on earnings before interest, taxes, depreciation and amortization ("EBITDA") and a small company multiple of 5.0 to gauge the reasonableness of the Empire's conclusions.

- 19 -

Rule of Thumb. Generally, rules of thumb are secondary valuation techniques used to test a formal valuation. In order to determine the applicable rule of thumb in any given case, an appraiser will review the valuations of similar companies that have recently been sold in terms of, for example, a multiple of sales, EBITDA or net profit. The appraiser will then use that formula to gauge the reasonableness of the valuation at issue.

After consulting a number of well-known sources among appraisers, such as the Handbook of Small Business Valuation Formulas and Rules of Thumb by Glenn Desmond and Pratt's Stats, a database of transactions involving small companies, Empire concluded that the Company was most closely analogous to micro-cap companies, which typically use EBITDA multipliers as valuation measures. Empire also consulted Pratt's Stats for a range of multiples used to value similar sized companies and noted that unless a company is in a "hot" market, EBITDA multiples generally range between 4 times to 7 times, with the multiples more commonly ranging between 4.5 times and 5.5 times. Accordingly, Empire concluded that it was reasonable to conduct its sensitivity analysis using a conservative rule of thumb based on EBITDA multiples of 5.0 times to 6.0 times.

Empire then determined that all of the values Empire derived using the above-mentioned methodologies, except for adjusted book value, fell well within the appropriate range based on this rule of thumb. The sensitivity analysis was conducted as follows: (a) the adjusted pre-tax income and the weightings used to create a normalized earnings base for use with the rule of thumb were identical to those used in the two capitalization of income calculations discussed below; (b) since the selected multipliers used by Empire were EBITDA multipliers, (i) the Company's depreciation and amortization for each year were added to the base, and (ii) no income tax was imputed; and (c) the small company multiple was applied to each potential EBITDA base and the Company's debt was subtracted. The resulting equity values ranged from \$1,455,901 to \$4,115,595, with a median of \$ 2,634,293 and an average of \$2,829,386. As

Edgar Filing: LINCOLN LOGS LTD - Form PRER14C

noted below, using capitalization of income, capitalization of debt-free income, trading history and adjusted book value calculations to determine the Company's valuation yielded valuations of \$4,030,000, \$4,080,000, \$3,977,626 and \$600,000, respectively. The first three calculations fell within the upper end of the sensitivity analysis range. Empire's adjusted book value calculation fell below the low end of the range, which was not surprising to Empire, as it felt that, in this case, adjusted book value was a worst case value here.

Capitalization of Income Analysis. Empire first reviewed the Company's historical net income for the years 2000 through 2005 and its projected results for 2006 and made adjustments for certain non-recurring items and the anticipated improvement in the Company's operating income. The adjustments for non-recurring items included (i) adding back to the Company's pre-tax income \$240,000 per year, which was, at that time, the Company's estimate of SEC filing related expenses; and (ii) adding back the amount of selling, general and administrative expenses reported by the Company in 2004 (\$4,666,927), as it was unusually high as a percentage of sales due to non-recurring acquisition activities, and deducting a more normalized percentage (26.7% of sales or \$4,217,348, based on 2005 numbers, instead.

The adjusted results were then weighted in several ways and results reviewed on a pre-tax and a post-tax basis. The adjusted results were weighted in several ways. First, the adjusted figure for 2001 was excluded from

- 20 -

computations because it was unusually low and not considered to be indicative of the Company's ongoing earning power. Secondly, the Company's 2005 loss was given a weight of 1.0 times in all scenarios. The results for 2005 represented the Company's worst financial performance over the review period. Empire did not feel that it should be disregarded since (i) it captured some of the difficulties involved in assimilating the Company's acquisitions and (ii) it was, in fact, the latest actual reported year. However, the Company had been profitable and Empire believed there was a reasonable expectation that it will be profitable again. Accordingly, after reviewing the results of the various scenarios, Empire selected \$850,000 as a reasonable predicate for the Company's ongoing pre-tax earning power, which was its normalized earnings base.

The Company's pre-tax earnings base was then tax-affected using a marginal tax rate of 39%. The Company's after-tax earnings base then became \$518,925, which assumed that the Company's capital expenditures and depreciation expense would offset one another over the long-term and, thus, the earnings base was equivalent to the Company's cash flow.

The normalized net income figure was then capitalized using the following formula: $\text{base net income} \times (1 + \text{growth rate}) / \text{capitalization rate}$. For purposes of this calculation, Empire used a growth rate of 4% and a capitalization rate of 17.38%. Empire determined the 4% rate to be a reasonable long-term growth expectation for the Company based on Empire's analysis and Value Line's forecasts for inflation. The capitalization rate represented the required rate of return that an investor would demand at a point in time in order to hold equity in a company under study and accounts for the risks inherent in a company's capital. In order to determine the Company's capitalization rate, Empire reviewed certain of Ibbotson Associates' annual studies of marketable minority interests in publicly traded securities. According to such studies, the expected rate of return of the market (i.e., the S&P 500) in excess of the risk-free rate (i.e., arithmetic mean) had been 7.0%,

Edgar Filing: LINCOLN LOGS LTD - Form PRER14C

based on a study of actual returns from January 1926 to December 2003. Ibbotson further identified a small-company premium of 6.6% based on a market value-weighted index of micro capitalization stocks traded on the New York Stock Exchange, the American Stock Exchange and NASDAQ. This premium recognized that equity holders generally demand higher returns from companies that are riskier by virtue of their smaller revenue base and capitalization. Empire then added 4.78%, which represents the risk-free rate (using twenty year Treasuries as a guide) to arrive at a capitalization rate of 18.38%. Finally, Empire adjusted this capitalization rate (by 1.0%) to reflect the Company's industry and company specific risk. Empire believed this to be appropriate given (i) the highly competitive nature of the Company's industry and its high leverage, (ii) the Company's small capitalization relative to those of the companies included in the Ibbotson study, and (iii) the Company's historical profitability, its projected improvement and the taxable outlook for its industry. Accordingly, Empire used a capitalization rate of 17.38% in its analysis.

Based on this analysis, Empire concluded that the fair value of the Company was \$4,030,000.

Capitalization of Debt-Free Income. Empire then conducted a similar analysis using a debt-free approach whereby interest expense was added back for each year within the review period (\$56,658, \$99,756, \$57,966, \$55,284, and \$171,591 for each of the years ended January 31, 2001 through 2005, respectively, and a projected \$251,103 for the year ending January 31, 2006. The result of this calculation was a value for the total invested capital available to equity

- 21 -

holders and debt holders. Then, in order to determine the value of the Company's equity, the Company's outstanding debt (\$4,323,633) was subtracted. As a result of this analysis, Empire concluded that the Company's fair value was \$4,080,000.

Adjusted Book Value. Empire then reviewed the adjusted book value (i.e. generally the value of a company's bundle of assets, less its liabilities) of the Company, using the Company's balance sheet for January 31, 2005, as the starting point. Empire then adjusted the Company's assets and liabilities to reflect their fair market values. The following adjustments were made by Empire (i) the cost-basis book value of the Company's land, buildings and improvements (\$3,926,347) was reduced by \$1,456,347 to \$2,470,000 to reflect the fair market value of such assets, which was provided by the Company's primary lender and was based on an appraisal for lending purposes; (ii) the cost-basis book value of the Company's machinery and equipment was conservatively reduced by 10% to \$1,862,594 based on Empire's discussions with management; (iii) the cost-basis book value of the Company's furniture and fixtures was reduced by 50% based on discussions with management; Empire felt this estimate was conservative since nearly all of the items were typical office furnishings that would sell for considerably less; (iv) the cost-basis book value of transportation equipment, which are typical of that for the industry in general, was reduced by 30% to \$436,503; and (v) the book value of goodwill and other intangible assets was eliminated because they cannot be transferred or sold and, thus, have no realizable book value. Based on this analysis, Empire concluded that the fair value of the Company was \$600,000.

Market Price. Finally, Empire reviewed the Company's trading history for the twelve month period ended on March 18, 2005. Empire noted that, during this time, (i) there were only 59 reported trades for a total of 149,753 shares; (ii) the maximum price was \$1.01 per share; (iii) the minimum was \$0.40 per share;

Edgar Filing: LINCOLN LOGS LTD - Form PRER14C

(iv) the most recent price was \$0.44 per share, and (v) that, within the thirty (30) day period ending on March 18, 2005, there were only six (6) trades. The weighted average price per share during the thirty (30) day period ending on March 18, 2005 was \$0.67, but Empire noted that the price was skewed by a larger than average trade of 10,000 shares on February 23, 2005. Empire noted that it was unable to locate any rationale for the spike, but further noted the price declined again quickly. Based on this analysis, Empire concluded that the Company's value based on this method was \$3,977,626 (\$0.44 per share times 9,040,059 shares outstanding), but that the Company's limited trading history implied that this was not a true reflection of fair value.

Conclusion. Despite the range of values from \$600,000 to \$4,080,000, after weighing and evaluating the results achieved by the foregoing valuation methods, Empire concluded that the aggregate fair value of the Company as of March 18, 2005, was \$4,000,000. In reaching this conclusion, Empire noted that the valuation of privately-held or thinly traded companies is more of an art than a science and is dependent upon the judgment of the expert, which is, in this case, Empire. It noted that it selected the final valuation figure of \$4,000,000 from within the reasonable range of value of \$600,000 to \$4,080,000, taking into consideration all of the factors that were relevant to its valuation calculations.

The Opinion of Value states that its reported analyses, opinions and conclusions represented the personal, unbiased professional analyses, opinions and conclusions of Empire and that the professional fee paid to Empire in

- 22 -

connection with the preparation of the Opinion of Value was not contingent upon the opinion of value stated therein. Moreover, it states that neither Empire nor any of its employees has a present or intended financial interest in the Company or in any of its affiliates and that, except as specifically mentioned in the Opinion of Value, no one provided significant professional assistance to Empire in connection with the preparation of the Opinion of Value.

Limitations on the Opinion of Value

The opinion expressed in the Opinion of Value assumes the continuation of prudent management policies over whatever time period is deemed reasonable and necessary to maintain the character and integrity of the Company as a going concern. Moreover, while Empire believes that the information supplied to it by others and that was considered in its valuation is from sources that are reliable, Empire has expressly disclaimed any responsibility for its accuracy. Furthermore, the information used by Empire was limited to what was available on or before March 18, 2005, or which could be reasonably ascertained as of that date. Empire reserves the right to make such adjustments to the valuation discussed in the Opinion of Value as may be required by consideration of additional or more reliable data that may become available subsequent to the issuance of the Opinion of Value.

For purposes of the Opinion of Value, Empire assumed that there were no hidden or unexpected conditions of the Company's assets that would adversely affect value and did not give consideration to liability resulting from hazardous substances or its impact on value. Any such actual or potential liability could adversely affect the marketability and value of the Company's business or its underlying assets. Moreover, Empire stated that no opinion was intended to be expressed requiring legal or specialized expertise, investigation or knowledge, beyond that customarily employed by appraisers.

The Opinion of Value further states that all opinions of market value

Edgar Filing: LINCOLN LOGS LTD - Form PRER14C

contained in the Opinion of Value are presented as Empire's considered opinion based on the facts and data obtained during the course of the appraisal investigation. Empire assumes no responsibility for changes in market conditions that might require a change in appraised value. Moreover, the value conclusion derived in the Opinion of Value was for the specific purpose and date set forth in the Opinion of Value and may not be used for any other purpose.

As noted above, Empire's fee established for formulation and reporting of the conclusions contained in the Opinion of Value is not contingent upon the value or other opinions presented. Additionally, neither Empire nor any of its officers or employees has any interest in the Company or its properties.

The Opinion of Value states that depositions, expert testimony, attendance in court and all preparations/ support for same, arising from the appraisal are required, unless arrangements for such services have been previously made.

March 22, 2005 Meeting

The Company's Board of Directors and Mr. Shepherd met again on March 22, 2005, to consider the recommendation of Empire that the aggregate fair value of the Company is \$4,000,000 (or \$0.44 per share of Existing Common Stock) and to

- 23 -

determine the purchase price of the fractional interests to be repurchased in connection with the Reverse Split Transaction. All directors were present during this meeting, other than Benjamin Shepherd.

The Board and Mr. Shepherd first considered Empire's recommendation of an aggregate fair value of \$4,000,000, by examining the values reached by employing other valuation methods. In particular, the Board and Mr. Shepherd once again considered using historical and current market price as the basis for determining the Company's value. In this regard, the Board and Mr. Shepherd reviewed Company's recent trading history. They noted that within the past six (6) months the maximum price was \$1.01 per share and the minimum was \$0.40 per share. The weighted average price per share during such period was \$0.67, but they concluded that, as Empire had noted, the price was not representative of true value because it reflected a larger than average trade of 10,000 shares on February 23, 2005. The Board and Mr. Shepherd also considered that (i) only approximately 12% of the Company's issued and outstanding shares of Common Stock was legally allowed to trade without restriction, (ii) the Company's Common Stock was extremely illiquid with low trading volume and price volatility occurring from nominal trading volume, (iii) in the past months, other than swings in price due to infrequent larger purchases or sale, the price has been trading in a very narrow trading range, and (iv) with increased future profitability uncertain, and over 9 million shares outstanding, earnings per share growth that would have a beneficial affect upon the stock price is highly improbable. Based on this analysis, each of the Board and Mr. Shepherd, like Empire, concluded that the market price of the Company's Common Stock was not a true reflection of fair value.

Since, as indicated by the Opinion of Value, the book value of the Company is significantly lower than the Company's value as calculated using other methods, neither the Board nor Mr. Shepherd considered again using net book value as a method to calculate the Company's value for purposes of the Reverse Split Transaction. Neither did they consider the following valuation methods because such information was not available, or did not apply, to the Company for reasons stated below:

Edgar Filing: LINCOLN LOGS LTD - Form PRER14C

Prices paid in previous purchases by the Company of the Company's securities during the past two years. The Company has not purchased the Company's securities in the past two years.

Firm offers of which the Company or any affiliate is aware made by an unaffiliated person during the past two years. The Company is unaware of any such offer.

The Board and Mr. Shepherd next discussed using the value of the Company set forth in the Opinion of Value as the basis for calculating the purchase price for the fractional interests, but adding a premium to such purchase price to account for reasonable differences of opinion. In this regard, they considered the overall substantive and procedural fairness of the Reverse Split Transaction to the Company's shareholders. After discussion, each of the Board and Mr. Shepherd concluded that it would be appropriate to establish the purchase price of the Company's fractional interests based on a fair value of \$0.49 per share of Existing Common Stock. Each of the Board and Mr. Shepherd unanimously concluded that this value was fair and reasonable to the Company's shareholders because it reflected a ten percent (10%) premium over Empire's recommended value.

The Board and Mr. Shepherd then considered other aspects of the substantive

- 24 -

fairness of the Reverse Split Transaction to the Company's shareholders. In particular, they considered again the fact that, upon completion of the Reverse Split Transaction, those remaining shareholders of the Company will not have an organized trading market in which to purchase and sell shares of the Company's Common Stock because the Common Stock will no longer be quoted on the Nasdaq OTC Bulletin Board. They considered whether it would be possible for the Company to maintain relationships with certain of its market makers, so that their market making activities would continue after the Reverse Split Transaction. Counsel then advised the Board and Mr. Shepherd that the Company could not guarantee that there would be any organized trading market for the Company's Common Stock after the Reverse Split Transaction. The Board and Mr. Shepherd considered this, and then directed the Company to contact the Company's market makers to determine whether it would be possible for them to continue to make a market in the Company's Common Stock after the Reverse Split Transaction. As previously noted, at least two (2) of the Company's market makers have agreed to do so.

Finally, each of the Board and Mr. Shepherd approved the filing with the SEC of a preliminary information statement and a Schedule 13E-3 in connection with the Reverse Split Transaction, drafts of which had been prepared in advance of the meeting and were circulated after the meeting for review and approval.

Final Deliberations

The Board and Mr. Shepherd convened again to discuss the Reverse Split Transaction on June 22, 2005. All directors were present during this meeting, other than Reginald W. Ray, Jr. During this meeting, the Board and Mr. Shepherd, among other things, reviewed the revised Opinion of Value that had been prepared by Empire, a copy of which is attached hereto as Appendix C. After reviewing the revised Opinion of Value, the Board and Mr. Shepherd reaffirmed their previous decision to establish the purchase price of the Company's fractional interests based on a fair value of \$0.49 per share of Existing Common Stock. Each of the Board and Mr. Shepherd concluded that this value was fair and reasonable to the Company's shareholders because it reflected

Edgar Filing: LINCOLN LOGS LTD - Form PRER14C

a ten percent (10%) premium over Empire's recommended value.

Each of the Board and Mr. Shepherd then approved the filing, subject to such changes as may be approved by the duly authorized officers of the Company, with the SEC of a revised preliminary information statement and an amendment to the Company's Schedule 13E-3 transaction statement in connection with the Reverse Split Transaction.

Conclusion Reached As A Result of the Deliberations

Based on all of the foregoing, each of the Board and Mr. Shepherd concluded that the Reverse Split Transaction was both substantively and procedurally fair to the Company and its shareholders.

Summary of the General Effects of the Reverse Split

- 25 -

Rights, Preferences And Limitations:

There are no differences between the respective rights, preferences or limitations of the Existing Common Stock and the New Common Stock. If the Reverse Split Transaction is approved and implemented, each remaining shareholder's percentage interest will be the same as it was prior to the approval of the proposal, except for the effect of the elimination of fractional shares. There will be no differences with respect to dividend, voting, liquidation or other rights associated with the Company's Common Stock before and after the Reverse Split Transaction.

HOLDERS OF FEWER THAN 500 SHARES OF EXISTING COMMON STOCK WILL NO LONGER HAVE ANY VOTING OR OWNERSHIP RIGHTS IN THE COMPANY AFTER THE REVERSE SPLIT TRANSACTION IS EFFECTED. AS A RESULT, SUCH HOLDERS WILL NO LONGER BE ABLE TO PARTICIPATE IN ANY FUTURE GROWTH OF THE COMPANY.

Effect on Number of Shareholders and Number of Outstanding Shares:

The Company believes that the Reverse Split Transaction will reduce the number of record shareholders from approximately [3,100] to approximately 132. As noted earlier, approximately 236,059 shares held by shareholders with fewer than 500 shares in their account will receive cash for their shares in the Reverse Split Transaction. The number of outstanding shares of Common Stock as of May 18, 2005 is 9,040,059. As a result of the Reverse Split and the related purchase of fractional interests, there will be approximately 17,608 shares of Common Stock outstanding. The fractional interests repurchased in connection with the Reverse Split Transaction will be retired.

All shareholders owning fewer than 500 shares of Existing Common Stock and who are cashed out will receive a cash payment in an amount equal to the result obtained by multiplying \$245.00 by a fraction having as the numerator the number of shares owned and having as the denominator the number 500 (which is equal to \$0.49 per share of Existing Common Stock), without interest. Such shareholders will no longer have any equity interest in the Company and, therefore, will not participate in its future potential earnings or growth. They will also be required to pay federal and, if applicable, state and local income taxes on the

cash amount received in the Reverse Split Transaction or recognize loss for tax purposes depending on the purchase price of their stock.

Financial Effect:

Edgar Filing: LINCOLN LOGS LTD - Form PRER14C

The total number of fractional shares to be purchased is estimated to be approximately 236,059 at a repurchase cost of approximately \$115,669. The total cost of the Reverse Split Transaction will come from the Company's available cash balances, and, accordingly, will reduce the Company's cash balance. The Company is financing the Reverse Split Transaction with its available cash balance and has not arranged for any alternative financing to consummate the transaction in the event its available cash balance is insufficient. As a result of the reduction in the number of shares outstanding, the Company's earnings per share and book value per share will proportionately, approximately increase by a factor of 500. The proposed Reverse Split Transaction will not affect the par

- 26 -

value of the Company's Common Stock. As a result, on the Effective Date of the Reverse Split Transaction, the stated capital on the Company's balance sheet attributable to common stock will be reduced in proportion to the Reverse Split ratio, and the additional paid-in capital account will be credited with the amount by which the stated capital is reduced. No other material impact on the Company's financial statements is expected other than the expenses related to the Reverse Split as indicated below and the payment of approximately \$115,669 for the purchase of fractional shares. Pro-forma financial statements illustrating the effect of the Reverse Split Transaction on the Company's balance sheet, income statement and book value per share are summarized below in "INFORMATION REGARDING THE COMPANY AND CERTAIN TRANSACTIONS."

The Company will pay all of the expenses related to the Reverse Split Transaction. In addition to the cash-out of fractional shares, the Company estimates that the expenses of the Reverse Split Transaction will be as follows:

Legal Fees	\$40,000.00
Preparation of Opinion of Value	\$10,000.00
Transfer Agent Fees	\$ 8,200.00
Filing Fees	\$ 100.00
Printing and Mailing Expenses	\$ 3,500.00
Miscellaneous Expenses	\$ 2,000.00

Total	\$63,800.00

The Company will not make any payments to its officers and directors other than payments for fractional interests cancelled as a result of the Reverse Split Transaction. It is estimated that the officers and directors listed below will receive the following for their fractional interests:

Name and Title	Fractional Interest Payment
-----	-----
John D. Shepherd, Chairman, President and Chief Executive Officer	\$226.00
Richard Farr, Director and Independent Contractor	\$148.00
Samuel Padula, Director	\$99.00
Reginald W. Ray, Director	\$247.00

Edgar Filing: LINCOLN LOGS LTD - Form PRER14C

William Thyne, Director	\$42.00
Steven Patlin, Director and Independent Contractor	\$49.00

- 27 -

Mr. Shepherd does not anticipate that he will experience a significant financial effect with respect to his ownership of the Company's Common Stock as a result of the Reverse Split Transaction. The following is a summary of the pro-forma effect of the Reverse Split Transaction on Mr. Shepherd's interest in the net book value or net earnings of the Company as of January 31, 2005:

	Before Reverse Split Transaction	After Reverse Split Transaction
Net Book Value in Dollars	\$1,010,571	\$1,037,579
Net Book Value as a Percentage	59.84%	61.44%

	Before Reverse Split Transaction	After Reverse Split Transaction
Net Loss in Dollars	\$(469,314)	\$(481,857)
Net Loss as a Percentage	59.84%	61.44%

Effect on Market For Shares:

The Company estimates that the number of shares of New Common Stock outstanding after the Reverse Split Transaction is affected will be approximately 17,608 shares in the hands of approximately 132 shareholders. There will be no organized market for the Company's shares. Even though the Company's Common Stock is currently very thinly traded, this will have a further adverse effect on the liquidity of the Common Stock. While certain of the Company's market makers have agreed to continue to make a market in the Company's securities, any trading in the Company's Common Stock after the Reverse Split Transaction will generally only occur in privately negotiated sales.

The Company has no current plans to issue additional shares of stock, but the Company reserves the right to do so at any time and from time to time at such price and on such terms as the Board of Directors determines to be in the best interests of the Company and its then shareholders. Persons who continue as shareholders following implementation of the Reverse Split Transaction will not have any preemptive or other preferential rights to purchase any of the Company's stock that may be issued by the Company in the future, unless such rights are currently specifically granted to such shareholder.

Termination of Exchange Act Registration of New Common Stock:

The Reverse Split proposal will affect the public registration of the New

- 28 -

Common Stock with the SEC under the Exchange Act, as the Company intends to terminate this registration as soon as practicable after approval of the Reverse Split proposal by the Affiliated Shareholders. The Company may terminate registration under the Exchange Act if the New Common Stock is no longer held by

Edgar Filing: LINCOLN LOGS LTD - Form PRER14C

300 or more shareholders of record. Termination of registration of the New Common Stock under the Exchange Act would substantially reduce the information required to be furnished by the Company to its shareholders and to the SEC and would make certain provisions of the Exchange Act, such as the periodic report and proxy statement filing obligations, no longer applicable to the Company. Moreover, the Company would no longer be subject to any regulatory legal requirement to adopt and maintain internal controls and procedures to insure the timely and appropriate identification and disclosure of material financial and nonfinancial information.

With respect to the executive officers and directors of the Company, upon termination of registration of the Common Stock under the Exchange Act, executive officers, directors and other affiliates would no longer be subject to many of the reporting requirements and restrictions of the Exchange Act, including, without limitation, the reporting and short-swing profit provisions of Section 16 thereof.

Upon termination of Exchange Act registration, the Company will continue to be subject to the general anti-fraud provisions of federal and applicable state securities laws.

Beneficial Owners of Company Stock:

The Reverse Split Transaction will affect shareholders holding Company stock in street name through a nominee (such as a bank or broker). Nominees may have different procedures, and shareholders holding Company stock in street name should contact their nominees to determine how they are affected by the Reverse Split Transaction.

Directors, Officers and the Affiliated Shareholders:

The Company intends that the current directors and officers of the Company will be the directors and officers of the Company immediately following the effectiveness of the Reverse Split Transaction. In anticipation of the termination of the Company's registration and reporting obligations under the Exchange Act, and the associated reduction in directors responsibility and liability exposure, the Company has reduced directors' fees by half as follows: (i) annual retainers have been reduced from \$8,000 to \$4,000; (ii) board "per meeting" fees have been reduced from \$1,500 to \$750; and (iii) committee "per meeting" fees have been reduced from \$500 to \$250. Since the Company typically holds four (4) board meetings per year and eighteen (18) committee meetings per year, the Company estimates that it will realize annual savings of approximately \$67,500 by reducing the fees.

As a result of the Reverse Split Transaction, the percentage of Common Stock beneficially owned by the current executive officers and directors of the Company, as a group, will increase from approximately 82% to 85%. All officers and directors of the Company will retain beneficial ownership of the Company's shares following completion of the Reverse Split Transaction.

Effect of the Reverse Split on Optionholders:

- 29 -

Upon the effectiveness of the Reverse Split, any outstanding options under the Company's Amended and Restated Stock Option Plan will have their number of shares and exercise prices adjusted to give effect to the 1-for-500 Reverse Split, with any fractional shares resulting from such adjustment converting to a right to receive cash in an amount equal to the result obtained by multiplying \$245.00 by a fraction having as the numerator the number of shares owned and the

Edgar Filing: LINCOLN LOGS LTD - Form PRER14C

denominator as the number 500 (which is equal to \$0.49 per share of Existing Common Stock) less the exercise price of the shares subject to exercise of the option. The vesting schedule will remain unchanged. Any authorized but unissued options under the Company's Amended and Restated Stock Option Plan will have the number of shares adjusted to give effect to the 1-for-500 Reverse Split.

Effect of the Reverse Split Transaction on the Conduct of the Company Business:

Following the Reverse Split, the Company will no longer be a public-reporting company, but rather will operate as a private company. The Company expects its business and operations to continue as they are currently being conducted and except as disclosed in this Information Statement, the Reverse Split is not anticipated to materially affect the conduct of the Company's business. The Company expects to be subject to substantially the same risks and uncertainties after the Reverse Split.

The Company has no current plans or proposals to effect any extraordinary corporate transactions, such as a merger, reorganization sale or liquidation; to materially change the Company's Board of Directors or senior management; to change materially the Company's capitalization; or otherwise to effect any material change in the Company's corporate business structure. Other than actions discussed in this Information Statement, the Affiliated Shareholders have no further plans, proposals or arrangements to acquire more shares or otherwise reduce or eliminate the shareholdings of the Company's minority shareholders. The Company may, however, from time to time explore various methods to provide liquidity to shareholders, including a sale or merger of the Company or its assets.

The Company is not aware of any existing voting agreements that would have an impact on the Company's future business plans.

Effect on the Aggregate Number of Shares of the Company's Common Stock:

	Number of Shares as of May 18, 2005	Pro Forma for the Reverse Split
Common Stock:		
Authorized	12,000,000	12,000,000
Outstanding	9,040,059	17,608
Available for issuance	2,959,941	11,982,392
Per share par value	\$0.01	\$0.01

- 30 -

PROPOSAL ONE-APPROVAL OF AMENDMENT TO CERTIFICATE OF INCORPORATION TO EFFECT REVERSE STOCK SPLIT

The Board of Directors has unanimously adopted a resolution approving the preparation and filing of a Certificate of Amendment to the Company's Certificate of Incorporation (previously defined as the "Reverse Split Amendment") providing for (a) a 1-for-500 reverse stock split of the Company's Common Stock, and (b) a cash payment in an amount equal to the result obtained by multiplying \$245.00 by a fraction having as the numerator the number of shares owned and having as the denominator the number 500 (which is equal to \$0.49 per share of Existing Common Stock) ("Cash Consideration"), in lieu of the issuance of any resulting fractional shares of Common Stock to any shareholders who, after the Reverse Split, own a fractional share of Common Stock. A form of the Reverse Split Amendment is attached hereto as Appendix A. The purpose, effects and fairness of the Reverse Split are described above under "SPECIAL FACTORS RELATING TO APPROVAL OF AMENDMENT TO CERTIFICATE OF INCORPORATION TO

Edgar Filing: LINCOLN LOGS LTD - Form PRER14C

EFFECT REVERSE SPLIT."

Source and Amount of Funds for and Expenses of the Reverse Split

Estimated fees and expenses incurred or to be incurred by the Company in connection with the Reverse Split are as follows:

Item	Approximate Amount
Payment of Cash Consideration	\$115,669.00
Legal Fees	\$ 40,000.00
Preparation of Opinion of Value	\$ 10,000.00
Transfer Agent Fees	\$ 8,200.00
Filing Fees	\$ 100.00
Printing and Mailing Expenses	\$ 3,500.00
Miscellaneous Expenses	\$ 2,000.00

Total	\$179,469.00
	=====

The Company has paid or will be responsible for paying all of such expenses. It will pay such expenses from its available cash resources.

Exchange of Shares and Payment in Lieu of Issuance of Fractional Shares

Each current certificate representing issued and outstanding shares of Existing Common Stock prior to the Reverse Split will automatically be deemed to represent the correct number of post Reverse Split shares of New Common Stock after the Effective Date. Promptly after the Reverse Split Transaction, the Company or its transfer agent will send an instruction letter to each shareholder. The letter will describe the procedures for surrendering stock certificates in exchange for new certificates and/or cash consideration. Upon receipt of the stock certificates and properly completed instruction letters, the Company or its transfer agent will issue the new certificates and/or make the appropriate cash payments. Do not send any stock certificates to the Company or its transfer agent until you receive an instruction letter. After

- 31 -

the Reverse Split, shareholders being cashed-out will have no rights as shareholders with respect to the pre-Reverse Split Existing Common Stock or the fractional shares that would have resulted from the Reverse Split, whether or not those shareholders have been paid cash consideration.

The Company anticipates that it will pay out approximately \$115,669 to holders of Existing Common Stock that will be holders of fractional shares following the Reverse Split Transaction.

Shareholder Approval

The Reverse Split will be approved if a majority of all outstanding shares of Common Stock entitled to vote thereon. The Affiliated Shareholders who own approximately 82% of the Company's Existing Common Stock have indicated their intention to vote in favor of the Reverse Split. If they do so, the Reverse Split will be approved, and affected, without considering the vote of the Company's unaffiliated shareholders. Accordingly, you are not being asked to deliver a proxy, and you will not be asked to vote at the Meeting, with respect to this Proposal.

Conflicts of Interest

Edgar Filing: LINCOLN LOGS LTD - Form PRER14C

The Company's directors and executive officers may have interests in the Reverse Split Transaction that are different from your interests as a shareholder, and have relationships that may present conflicts of interest, including the following: (i) each member of the Board of Directors and each executive officer of the Company holds more than 500 shares of the Company's Existing Common Stock and thus, will remain shareholders of the Company after the Reverse Split Transaction, and as a result of the Reverse Split Transaction, the shareholders who own of record 500 or more shares of Existing Common Stock, including the Company's directors and executive officers, will increase their percentage of ownership in the Company. For example, the beneficial ownership percentage of the current directors and executive officers as a group (taking into account shares received by such individuals upon the exercise of options that are vested and exercisable within 60 days, as discussed below) will increase from approximately 82% to approximately 85% as a result of the reduction of the number of shares of Common Stock outstanding.

Each of the Company's directors and senior executive officers holds options to purchase more than 500 shares of Common Stock, which options will remain outstanding. After completion of the Reverse Split Transaction, the Company's directors and senior executive officers will, as a group, hold options to purchase 490,000 shares of the Company's Existing Common Stock, as adjusted to give effect to the Reverse Split. Of that amount, 410,000 of such options are fully vested and exercisable within 60 days. If all of such options are exercised, the directors and senior executive officers, as a group, will own approximately 85% of the then outstanding shares.

The Company will not make any payments to its officers and directors other than payments for fractional interests cancelled as a result of the Reverse Split Transaction. It is estimated that the officers and directors listed below will receive the following for their fractional interests:

- 32 -

Name and Title	Fractional Interest Payment
John D. Shepherd, Chairman, President and Chief Executive Officer	\$226.00
Richard Farr, Director and Independent Contractor	\$148.00
Samuel Padula, Director	\$99.00
Reginald W. Ray, Director	\$247.00
William Thyne, Director	\$42.00
Steven Patlin, Director and Independent Contractor	\$49.00

Mr. Shepherd does not anticipate that he will experience a significant financial effect with respect to his ownership of the Company's Common Stock as a result of the Reverse Split Transaction. The following is a summary of the pro-forma effect of the Reverse Split Transaction on Mr. Shepherd's interest in the net book value or net earnings of the Company as of January 31, 2005:

Before Reverse	After Reverse
----------------	---------------

Edgar Filing: LINCOLN LOGS LTD - Form PRER14C

	Split Transaction	Split Transaction
Net Book Value in Dollars	\$1,010,571	\$1,037,579
Net Book Value as a Percentage	59.84%	61.44%
	Before Reverse Split Transaction	After Reverse Split Transaction
Net Loss in Dollars	\$ (469,314)	\$ (481,857)
Net Loss as a Percentage	59.84%	61.44%

Reservation of Right to Abandon the Reverse Split

Each of the Board of Directors and Mr. Shepherd retains the right to abandon

- 33 -

the Reverse Split, even though approved by the Affiliated Shareholders, if it determines prior to the Effective Date that the Reverse Split is not then in the Company's best interest or the best interest of the Company's shareholders. Among the circumstances that might cause the Board or Mr. Shepherd to abandon the Reverse Split is the development of a significant risk of the Reverse Split failing to achieve the overall goal of reducing the number of its recordholders to fewer than 300, or where the expense of cashing out shareholders with fewer than 500 shares of Existing Common Stock becomes so high that the Reverse Split Transaction becomes cost prohibitive. If the Reverse Split is not implemented, then the Company will be unable to terminate its public reporting obligations until it has fewer than 300 shareholders of record and satisfies certain other SEC requirements.

Recommendations of the Board of Directors and Mr. Shepherd

Each of Mr. Shepherd and the Board of Directors unanimously concluded that, on the basis of the factors discussed above in the section captioned "SPECIAL FACTORS RELATING TO APPROVAL OF AMENDMENT TO CERTIFICATE OF INCORPORATION TO EFFECT REVERSE SPLIT," the Reverse Split, both from a procedural and financial point of view, is fair to the Company and its shareholders.

INFORMATION REGARDING THE COMPANY AND CERTAIN TRANSACTIONS

Lincoln Logs Ltd. is a corporation organized under the laws of New York with its principal place of business at 5 Riverside Drive Chestertown, New York 12817. The telephone number at its principal place of business is (518) 494-5500.

As of May 18, 2005, the Company had 12,000,000 authorized shares of Common Stock, par value \$0.01, of which 9,040,059 were issued and outstanding.

The Company's securities are currently traded on the Nasdaq OTC Bulletin Board under the symbol LLOG. The high and low trading prices for the previous three fiscal years are as follows:

PERIOD	HIGH	LOW
Year ended January 31, 2003		
First Quarter	\$0.21	\$0.21
Second Quarter	\$0.33	\$0.20
Third Quarter	\$0.50	\$0.14

Edgar Filing: LINCOLN LOGS LTD - Form PRER14C

Fourth Quarter	\$0.40	\$0.14
Year ended January 31, 2004		
First Quarter	\$0.48	\$0.27
Second Quarter	\$0.80	\$0.40
Third Quarter	\$0.85	\$0.45
Fourth Quarter	\$1.60	\$0.65
Year ended January 31, 2005		
First Quarter	\$1.01	\$0.55
Second Quarter	\$0.90	\$0.54

- 34 -

PERIOD	HIGH	LOW
Third Quarter	\$1.01	\$0.30
Fourth Quarter	\$1.01	\$0.42

The Company has not paid any dividends on its shares of common stock since 1999. Any future payment of cash dividends will depend upon the Company's earnings, financial condition, capital requirements and other factors deemed relevant by the Board of Directors. The Company is also subject to certain contractual restrictions with respect to the payment of dividends, including, without limitation, restrictions imposed by the Company's primary lender.

Summary Historical Financial Information

The following summary of historical consolidated financial data was derived from the Company's audited consolidated financial statements as of and for each of the fiscal years ended January 31, 2005 and January 31, 2004 and unaudited consolidated financial statements for the fiscal quarter ended April 30, 2005. This financial information is only a summary and should be read in conjunction with the financial statements of the Company and other financial information, including the notes thereto, contained in the Company's Annual Report on Form 10-KSB for the fiscal year ended January 31, 2005 and the Company's Quarterly Report for the quarter ended April 30, 2005, which information is incorporated by reference in this Information Statement. See "DOCUMENTS INCORPORATED BY REFERENCE".

Summary Unaudited Pro-Forma Financial Information

The following pro-forma condensed statements of operations and pro-forma balance sheet are based on historical data, adjusted to give effect to the cash payment for fractional shares resulting from the Reverse Split Transaction. The pro-forma condensed statements of operations and pro-forma balance sheet are based on the assumption that an aggregate of approximately [236,059] shares of Existing Common Stock will result in fractional shares and will be purchased by the Company for approximately \$115,669.00, with approximately \$63,800.00 in costs incurred.

The following unaudited pro-forma condensed statement of operations data for the year ended January 31, 2005 and the quarter ended April 30, 2005, and the pro-forma condensed balance sheet data of the Company at January 31, 2005 and April 30, 2005, give effect to the Reverse Split Transaction as if it had occurred during the relevant periods. The pro-forma information set forth below is not necessarily indicative of what the Company's actual financial position would have been had the Reverse Split Transaction been consummated as of January 31, 2005 or April 30, 2005, as the case may be, or of the financial position that may be reported by the Company in the future.

(1) Reduction in operating expenses reflects the savings that the Company expects to realize as a result of its no longer being a public reporting company, as well as the payment of the estimated expenses associated with conducting the Reverse Split Transaction (\$63,800). For purposes of this pro-forma financial information, the Company has assumed that it will realize savings of \$75,000 on a quarterly basis and \$300,000 on an annual basis as a result of its not being a public reporting company. There is, of course, no guarantee that the Company will realize costs savings as set forth above.

(2) Assumes that there will be 17,608 shares of the Company's New Common Stock outstanding after the Reverse Split Transaction.

Samuel J. Padula has been President and Chief Executive Officer of Padula Construction Corp., a real estate development and construction firm in Toms River, New Jersey, and Samuel J. Padula Real Estate Company in Toms River, N.J. for more than the past five years. Since January 1987, Mr. Padula had been a Special Administrative Assistant to the President. Mr. Padula was, until his resignation from that office in December 1997, a member of the Company's Office of the Chief Executive since May 1997. Mr. Padula resigned his position as Special Administrative Assistant to the President on January 31, 2003, and no longer holds any position with the Company other than as a Director.

Steven Patlin has been, and continues to be, an independent dealer of the Company since June 1985. Mr. Patlin served as an independent consultant to the Company on sales and marketing matters from January 1998 through February 1999. From March 1999 through February 2000 Mr. Patlin served as Vice President of Sales for the Company at which time he resigned that position. From February 2000 to January 2003, Mr. Patlin served as Special Administrative Assistant to the President of the Company. Mr. Patlin has been Vice President and Treasurer of Patlin Enterprises Inc., a distributor of home maintenance products and home building kits, for more than the past five years. Mr. Patlin no longer holds any position with the Company other than as a Director and independent dealer.

Reginald W. Ray, Jr. had been President of The Hunter Corporation, a holding company in Sherborn, Massachusetts, for more than the past five years, a position from which he retired in September 2003. Since January 1987, Mr. Ray had been a Special Administrative Assistant to the President. Mr. Ray resigned his position as Special Administrative Assistant to the President on January 31, 2003 and no longer holds any position with the Company other than as a Director.

Richard C. Farr was, until his resignation from those offices on July 8, 1997, Chairman of the Board of the Company since January 1990 and President and Treasurer of the Company since December 1991. Mr. Farr served as the Company's Chief Executive Officer from December 1991 to May 1997, at which time he became a Member of the Office of Chief Executive, a position that he resigned on July 8, 1997. Mr. Farr has also been Chairman and Chief Executive Officer of Farr Investment Company, a private investment firm in West Hartford, Connecticut, for more than the past five years. Mr. Farr is a Director of H. L. Bouton Co., Inc. and several privately owned companies. From January 1987 to December 1991, Mr. Farr was a Special Administrative Assistant to the President, a position he has resumed since his resignation in July 1997.

John D. Shepherd has been Chairman of the Board, President and Chief Executive Officer of the Company since December 1997. From December 1997 through January 2001 Mr. Shepherd also served as Treasurer of the Company. Mr. Shepherd has been President of Sweetbrier Ltd., an equestrian facility, since June 1992 and a private investor since May 1991. Mr. Shepherd was Co-Chairman and Treasurer of Aquatherm Products Corporation, a manufacturer and distributor of health care products for home and institutional use, in Rahway, New Jersey, from January 1986 to May 1991. From January 1987 until December 1997, Mr. Shepherd had been a Special Administrative Assistant to the President, and from May 1997 until December 1997, Mr. Shepherd was a member of the Company's Office of the Chief Executive. Mr. Shepherd is the brother of Benjamin A. Shepherd, Vice President - Finance and Corporate Development and Chief Financial Officer, and a Director of the Company.

William J. Thyne, CPA, currently serves as Director of Finance and Chief

Edgar Filing: LINCOLN LOGS LTD - Form PRER14C

Financial Officer of Finch, Pruyn & Company, Incorporated, a privately owned manufacturer of paper. Until his resignation in April 2005, Mr. Thyne was Vice President, Secretary and Treasurer of the Company and has served in such positions for more than the past five years. Mr. Thyne had also served as Chief Financial Officer from January 1998 until March 2004. Mr. Thyne continues to serve as a director of the Company.

Jeffrey J. LaPell has served as Chief Operating Officer of the Company since his appointment to that position in August 2001. During the period from December 1999 to February 2002, Mr. LaPell also served as Vice President - Sales of the Company. Prior to re-joining the Company, Mr. LaPell was Director of Sales for Asperline Log Homes, Inc., a wholly owned subsidiary of Imagineering Services, Inc., in Lock Haven, Pennsylvania from December 1998 to December 1999. Prior to that position, and for more than five years, Mr. LaPell was employed by the Company in various sales positions the most recent of which was National Sales Manager.

Benjamin A. Shepherd joined the Company in March 2003 as Vice President of Corporate Development. In March 2004, Mr. Shepherd was appointed to the additional position of Vice President - Finance and Chief Financial Officer. In June 2005, Mr. Shepherd was elected as Secretary of the Company. Prior to joining the Company, Mr. Shepherd had been President of Armstrong Pharmaceuticals, Inc., a manufacturer of inhalation pharmaceutical products in Boston, Massachusetts, since February 1991. Prior to that, Mr. Shepherd held a number of positions at Armstrong Pharmaceuticals, Inc. including Treasurer, Chief Financial Officer and Executive Vice President. Mr. Shepherd is the brother of John D. Shepherd, Chairman of the Board of Directors, President and Chief Executive Officer of the Company.

Executive Officers

The executive officers of the Company, each of whom was elected by the Board of Directors of the Company to serve in the capacities set forth below opposite their names, and, except as otherwise noted, are currently serving a one-year term to expire on the date of the 2005 Annual Meeting of Shareholders, are as follows:

Name	Age	Office(s)
John D. Shepherd	59	President and Chief Executive Officer
Jeffrey J. LaPell	45	Vice President and Chief Operating Officer
Benjamin A. Shepherd	51	Vice President - Finance and Chief Financial Officer; Vice President - Corporate Development
Charles A. Clark	57	Vice President - Western Region
Richard H. Berry	44	Vice President; President - Snake River Logs Homes, LLC (a wholly owned subsidiary of the Company)

- 40 -

John D. Shepherd has been Chairman of the Board, President and Chief Executive Officer of the Company since December 1997. From December 1997 through January 2001, Mr. Shepherd also served as Treasurer of the Company. Mr. Shepherd has been President of Sweetbrier Ltd., an equestrian facility, since June 1992 and a private investor since May 1991. Mr. Shepherd was Co-Chairman and Treasurer of

Edgar Filing: LINCOLN LOGS LTD - Form PRER14C

Aquatherm Products Corporation, a manufacturer and distributor of health care products for home and institutional use, in Rahway, New Jersey, from January 1986 to May 1991. From January 1987 until December 1997, Mr. Shepherd had been a Special Administrative Assistant to the President, and from May 1997 until December 1997, Mr. Shepherd was a member of the Company's Office of the Chief Executive. Mr. Shepherd is the brother of Benjamin A. Shepherd, Vice President - Finance and Corporate Development and Chief Financial Officer, and a Director of the Company.

Jeffrey J. LaPell has served as Chief Operating Officer of the Company since his appointment to that position in August 2001. During the period from December 1999 to February 2002, Mr. LaPell also served as Vice President - Sales of the Company. Prior to re-joining the Company, Mr. LaPell was Director of Sales for Asperline Log Homes, Inc., a wholly owned subsidiary of Imagineering Services, Inc., in Lock Haven, Pennsylvania from December 1998 to December 1999. Prior to that position, and for more than five years, Mr. LaPell was employed by the Company in various sales positions the most recent of which was National Sales Manager.

Benjamin A. Shepherd joined the Company in March 2003 as Vice President of Corporate Development. In March 2004, Mr. Shepherd was appointed to the additional position of Vice President - Finance and Chief Financial Officer. Prior to joining the Company, Mr. Shepherd had been President of Armstrong Pharmaceuticals, Inc., a manufacturer of inhalation pharmaceutical products in Boston, Massachusetts, since February 1991. Prior to that, Mr. Shepherd held a number of positions at Armstrong Pharmaceuticals, Inc. including Treasurer, Chief Financial Officer and Executive Vice President. Mr. Shepherd is the brother of John D. Shepherd, Chairman of the Board of Directors, President and Chief Executive Officer of the Company.

Charles A. Clark joined in Company July 1999 as a sales representative in the Company's Auburn, California office, and was promoted to the position of Manager of the Auburn, CA sales office in October 1999. In February 2001, Mr. Clark was promoted to the additional position of Western Regional Manager until his recent promotion to Vice President - Western Region in April 2003. Prior to joining the Company and for more than the past five years, Mr. Clark was President of Clark and Associates, an import company of consumer related products. Prior to that position, Mr. Clark held several positions as senior sales manager of companies whose primary business was the import and distribution of electronics.

Richard H. Berry joined the Company upon the Company's acquisition of Snake River Log Homes, LLC on November 17, 2003. Mr. Berry was one of two principals

- 41 -

who owned Snake River Log Homes, LLC and had served as President of that company for three years. In November 2003, Mr. Berry was retained as President of Snake River Log Homes, LLC and appointed to the additional position of Vice President - Marketing of the Company. Prior to that position, and for more than five years, Mr. Berry was Vice President of Sales and Marketing as well as a partner in the firm Cape Athletic, LLC.

Security Ownership of Certain Beneficial Owners

The following table identifies each person known to the Company to be the beneficial owner of more than five percent of the Company's Common Stock and sets forth the number of shares of the Company's Common Stock beneficially owned by each such person and the percentage of the shares of the Company's outstanding Common Stock beneficially owned by each such person.

Edgar Filing: LINCOLN LOGS LTD - Form PRER14C

Name and Address Of Beneficial Owner	Number of Shares of Common Stock of the Company Beneficially Owned as of May 18, 2005	Percent of Outstanding Common Stock of the Company Beneficially Owned as of May 18, 2005
John D. Shepherd 1020 Sport Hill Road Easton, CT 06612	5,409,461 (1)	57.7%
Herman R. Shepherd and Carol R. Shepherd 704B Weed Street New Canaan, CT 06840	574,500 (2)	6.14%
Richard C. Farr 40 Colony Road W. Hartford, CT 06117	1,110,802 (3) (4)	11.86%
Marcille M. Farr 1028 Farmington Avenue W. Hartford, CT 06107	520,401 (3)	5.56%

(1) Includes (i) 250,000 owned by Mrs. Susan Shepherd, Mr. Shepherd's wife, as to which Mr. Shepherd disclaims beneficial ownership, and (ii) 50,000 shares owned Mr. Jason Tunick, Mr. Shepherd's son, as to which Mr. Shepherd disclaims beneficial ownership.

(2) Includes 132,000 shares owned individually by Mrs. Carol R. Shepherd.

(3) Pursuant to an agreement between Richard C. Farr and Mr. Farr's wife, Marcille M. Farr, Mr. Farr and Mrs. Farr each beneficially own 520,401 shares. Mr. Farr maintains legal title to all of the shares that he and Mrs. Farr own. Mr. Farr disclaims beneficial ownership with respect to the 520,401 shares beneficially owned by Mrs. Farr.

(4) Includes 70,000 shares subject to options which are exercisable within 60 days.

Security Ownership of Management

- 42 -

The following table sets forth the number of shares of the Company's Common Stock beneficially owned by the following executive officers and directors of the Company and all directors and officers of the Company as a group as of May 18, 2005. Except as otherwise noted, the named individual has sole voting power and sole investment power over the securities.

Name and Address Of Beneficial Owner	Number of Shares of Common Stock of the Company Beneficially Owned as of May 18, 2005	Percent of Outstanding Common Stock of the Company Beneficially Owned May 18, 2005
John D. Shepherd	5,409,461 (6)	57.77%
Richard C. Farr	1,110,802 (4) (5)	11.86%
Samuel J. Padula	298,743 (1) (2)	3.19%
Reginald W. Ray, Jr.	221,504 (1) (3)	2.37%
William J. Thyne	96,085 (7)	1.03%
Benjamin A. Shepherd	191,000 (8)	2.04%
Steven Patlin	60,100 (9)	0.64%
Jeffrey LaPell	25,000 (10)	0.27%
Leslie M. Apple	75,000 (1)	0.80%

Edgar Filing: LINCOLN LOGS LTD - Form PRER14C

Richard H. Berry	160,000 (11)	1.71%
All officers and directors as a group (10 persons)	7,647,695 (12)	81.68%

(1) Includes 25,000 shares subject to options which are exercisable within 60 days.

(2) Includes (i) 2,100 shares owned jointly by Mr. Padula with his wife, Mrs. Eleanor Padula, with whom Mr. Padula shares voting and investment power, and (ii) 263,603 shares held by Mrs. Padula, as to which Mr. Padula disclaims beneficial ownership.

(3) Includes 12,702 shares owned by Mr. Ray's wife, as to which Mr. Ray disclaims beneficial ownership.

(4) Includes 520,401 shares to which Mr. Farr disclaims beneficial ownership. Pursuant to an agreement between Mr. Farr and his wife, Marcille M. Farr, Mr. Farr and Mrs. Farr each beneficially own 520,401 shares. Mr. Farr maintains legal title to all of the shares that he and Mrs. Farr own.

(5) Includes 70,000 shares subject to options which are exercisable within 60 days.

(6) Includes (i) 250,000 shares owned by Mrs. Susan Shepherd, Mr. Shepherd's wife, as to which Mr. Shepherd disclaims beneficial ownership, and (ii) 50,000 shares owned Mr. Jason Tunick, Mr. Shepherd's son, as to which Mr. Shepherd disclaims beneficial ownership.

(7) Includes 61,085 shares owned jointly by Mr. Thyne with his wife with whom Mr. Thyne shares voting and investment power.

(8) Includes (i) 50,000 shares subject to options, which are exercisable within 60 days, (ii) 20,000 shares owned by Mr. Shepherd's children, as to which Mr. Shepherd disclaims beneficial ownership, and (iii) 111,000 shares owned jointly by Mr. Shepherd with his wife with whom Mr. Shepherd shares voting and investment power.

(9) Includes 50,000 shares of common stock owned jointly by Mr. Patlin with his

- 43 -

wife with whom Mr. Patlin shares voting and investment power.

(10) Includes 25,000 shares of common stock owned jointly by Mr. LaPell with his wife with whom Mr. LaPell shares voting and investment power.

(11) Includes 10,000 shares subject to options, which are presently exercisable.

(12) Includes 245,000 shares subject to options of which 195,000 are exercisable within 60 days and 50,000 that become exercisable over the next five years commencing with 10,000 that became exercisable on November 17, 2004.

There are no arrangements known to the Company the operation of which may at a subsequent date result in a change in control of the Company.

Legal Proceedings

On January 12, 2005, the Company filed a Demand for Arbitration with the American Arbitration Association (the "Arbitration") pursuant to which the Company is seeking monetary damages against Robert Gordon Hart and Judith Anne Hart (collectively, the "Harts"). The Arbitration asserts the Company has suffered monetary damages in a minimum amount of \$1,225,720 as a result of the Harts' breaches of various representations and warranties made by them in the Stock Purchase Agreement dated June 27, 2003, between the Company, 666764 B.C. Ltd., True-Craft Log Structures Ltd., Hart & Son Industries Ltd., Robert Gordon Hart, Judith Anne Hart, Matthew Joseph Mellof and Shelly L. Mellof, pursuant to which the Company acquired its Canadian operations, which are owned and operated through the Company's wholly-owned subsidiary, True-Craft Log Structures Co.

Certain Transactions

Edgar Filing: LINCOLN LOGS LTD - Form PRER14C

Description of certain transactions and agreements to which the Company and certain of the officers and directors of the Company are parties are set forth below.

The Company received legal services from the law firm of Whiteman, Osterman & Hanna LLP ("WOH"), of which Leslie M. Apple, a director of the Company, is a partner, and paid and accrued fees of approximately \$41,300 for such legal services rendered to the Company during the fiscal year ended January 31, 2005. The Company has also retained WOH to provide legal services to it in connection with the Reverse Split Transaction. The Company believes that the legal fees charged, and anticipated to be charged, in connection with WOH's services are fair and reasonable to the Company in light of the services performed and that the terms of the Company's relationship with WOH are no less favorable to the Company than those that could be obtained from an independent third party.

On November 17, 2003, the Company completed the acquisition of all of the outstanding limited liability company membership interests of Snake River Log Homes, LLC ("Snake River"), a privately-held limited liability company for consideration of approximately \$1,260,000, subject to certain adjustments. Snake River is a company organized under the laws of Idaho. The acquisition of membership interests was effected pursuant to a Membership Interests Purchase Agreement, dated November 17, 2003, (the "Purchase Agreement") by and among the Company and the membership interest holders of Snake River (the "Members"), including Richard Berry, who, after consummation of the acquisition, became an officer of the Company. The consideration paid by the Company to the Members

- 44 -

consisted of the following: cash payment, promissory notes issued by the Company to the Members, and common shares of the Company conveyed to select Members. The primary business of Snake River is the designing, manufacturing, and marketing of a line of log homes targeted for purchase and assembly by custom builders and "do-it-yourself" consumers. Any plant assets, equipment or other physical property acquired as part of this transaction continues to be used for those purposes. The Purchase Agreement and the purchase prices referenced therein were negotiated at arm's length between representatives of the respective parties. Except for the transactions described in the Agreements or as set forth herein, there are no material relationships between the Company, the respective selling parties, their respective directors, officers, affiliates, or associates thereof.

The Company is party to employment contracts with Jeffrey J. LaPell, Vice President and Chief Operating Officer, and Richard Berry, Vice President - Marketing and President of Snake River Log Homes LLC. The contract with Mr. LaPell is for a term of two years, calls for a certain base salary (adjusted annually for the change in the Consumer Price Index), and includes incentives for an annual bonus based on the achievement of defined goals related to sales revenues and the Company's backlog of contracts. It also contains non-competition clauses that would be effective upon conclusion of employment with the Company, and severance provisions whereby Mr. LaPell would be paid an amount equal to three months' base salary. As of January 31, 2005, the base salary for Mr. LaPell is \$120,000. The contract of Mr. LaPell expires on May 31, 2006. The Company believes that the terms of this contract are fair and reasonable to the Company.

Mr. Berry's contract is for a term of five years and automatically extends for successive one year periods unless either Mr. Berry or the Company has given thirty days prior written notice of its intention not to renew the contract for an additional one year term. The contract calls for a certain base salary and includes incentives for an annual bonus based on the achievement of

Edgar Filing: LINCOLN LOGS LTD - Form PRER14C

defined goals related to delivery of products from Snake River Log Homes LLC and sales revenue goals related to Snake River and the Company, and contains a non-competition clause that would be effective upon conclusion of employment with the Company. The contract also contains a severance provision that under certain conditions would continue the payment of Mr. Berry's annual base salary until the end of the initial five-year employment term, and the payment of an amount equal to three months base salary if the termination occurs during any of the one-year extension periods. As of January 31, 2005, the base salary for Mr. Berry is \$85,000. Mr. Berry's employment contract expires on November 17, 2008. The Company believes that the terms of this contract are fair and reasonable to the Company.

Steven Patlin, a director of the Company, is a dealer in the Company's products. Accordingly, he is paid commissions with respect to each of his sales of the Company's products. The Company's arrangement with Mr. Patlin is subject to the same terms and conditions as those applicable to other dealers with similar sales volumes.

Stock Purchases

The Company has not repurchased any of its shares of Common Stock during the past two years.

Public Offerings

- 45 -

The Company has not made an underwritten public offering of its securities for cash that was registered under the Securities Act of 1933 or exempt from registration under Regulation A during the past three years.

FEDERAL INCOME TAX CONSEQUENCES

Summarized below are the material federal income tax consequences to the Company and its shareholders resulting from the Reverse Split Transaction. This summary is based on existing federal income tax law, which may change, even retroactively. This summary does not discuss all aspects of federal income taxation that may be important to you in light of your individual circumstances. Many types of shareholders (such as financial institutions, insurance companies, broker-dealers, tax-exempt organizations, and foreign persons) may be subject to special tax rules. Other shareholders may also be subject to special tax rules including, but not limited to, shareholders who received the Company's Common Stock as compensation for services or pursuant to the exercise of an employee stock option, or shareholders who have held, or will hold, stock as part of a straddle, hedging, or conversion transaction for federal income tax purposes. In addition, this summary does not discuss any state, local, foreign, or other tax considerations.

This summary assumes that you are one of the following:

- a citizen or resident of the United States;
- a corporation or an entity taxable as a corporation created or organized under U.S. law (federal or state);
- an estate the income of which is subject to federal income taxation regardless of its sources;
- a trust if a U.S. court is able to exercise primary supervision over the administration of the trust and one or more U.S. persons have authority to control all substantial decisions of the trust; or

Edgar Filing: LINCOLN LOGS LTD - Form PRER14C

- any other person whose worldwide income and gain is otherwise subject to federal income taxation on a net basis.

This summary also assumes that you have held and will continue to hold your shares as capital assets.

NO RULING FROM THE INTERNAL REVENUE SERVICE OR OPINION OF COUNSEL WILL BE OBTAINED REGARDING THE FEDERAL INCOME TAX CONSEQUENCES TO THE SHAREHOLDERS OF THE COMPANY IN CONNECTION WITH THE REVERSE SPLIT TRANSACTION. ACCORDINGLY, EACH SHAREHOLDER IS ENCOURAGED TO CONSULT THEIR OWN TAX ADVISOR AS TO THE PARTICULAR FEDERAL, STATE, LOCAL, FOREIGN, AND OTHER TAX CONSEQUENCES, IN LIGHT OF THEIR INDIVIDUAL CIRCUMSTANCES.

The Reverse Split Transaction

- 46 -

We believe that the Reverse Split Transaction will be treated as a tax-free "recapitalization" for federal income tax purposes. This will result in no material federal income tax consequences to the Company.

Federal Income Tax Consequences to Shareholders, Including Affiliates, Who Are Not Cashed-Out in the Reverse Split Transaction

If you continue to hold the Company's Common Stock immediately after the Reverse Split Transaction, and you receive no cash as a result of the Reverse Split Transaction, you will not recognize any gain or loss in the Reverse Split Transaction and will have the same adjusted tax basis and holding period in the Company's Common Stock as you had in such stock immediately prior to the Reverse Split Transaction.

Federal Income Tax Consequences to Shareholders, Including Affiliates, Who Both Receive Cash and Own, or Are Considered to Own for Federal Income Tax Purposes, The Company's Common Stock After the Reverse Split Transaction

In some instances you may be entitled to receive cash in the Reverse Split Transaction for shares you hold in one capacity, but continue to hold shares in another capacity. For example, you may own less than 500 shares in your own name (for which you will receive cash) and own more than 500 shares that are held in your brokerage account in street name. Alternatively, for federal income tax purposes you may be deemed to own shares held by others. For instance, if you own less than 500 shares in your own name (for which you will receive cash) and your spouse owns more than 500 shares (which will continue to be held following the completion of the Reverse Split Transaction), the shares owned by your spouse will be attributable to you. As a result, in some instances the shares you own in another capacity, or which are attributed to you, may remain outstanding. In determining whether you are deemed to continue to hold stock immediately after the Reverse Split Transaction, you will be treated as owning shares actually or constructively owned by certain family members and entities in which you have an interest (such as trusts and estates of which you are a beneficiary and corporations and partnerships of which you are an owner, and shares you have an option to acquire).

If you both receive cash as a result of the Reverse Split Transaction and continue to hold the Company's Common Stock either directly or through attribution, you will recognize gain, if any, in an amount not to exceed the amount of cash received. Generally no loss will be recognized. The receipt of cash will be characterized as either a dividend or as a payment received in exchange for the stock. The Reverse Split Transaction will be taxed as a dividend unless the payment:

Edgar Filing: LINCOLN LOGS LTD - Form PRER14C

- is not essentially equivalent to a dividend with respect to you as determined under Section 302(b)(1) of the Internal Revenue Code of 1986, as amended (the "Code");
- is a substantially disproportionate redemption of stock with respect to you as determined under Section 302(b)(2) of the Code; or
- results in the complete termination of your interest in the Company under Section 302(b)(3) of the Code (which would be possible if you ceased to own

- 47 -

any shares directly and if the only shares attributed to you were from a family member and you properly waive family attribution).

If you satisfy one of these tests, you will recognize income in an amount equal to the excess of the cash received for your shares over your adjusted basis in those shares, and this income will be characterized as capital gain.

If you fail to satisfy one of these tests, then the cash received will be treated as a dividend to you to the extent of your ratable share of the Company's undistributed earnings and profits, then as a tax-free return of capital to the extent of your aggregate adjusted tax basis in your shares, and any remaining amount will be treated as capital gain.

If you, or a person or entity whose ownership of the Company's shares would be attributed to you, will continue to hold the Company's Common Stock immediately after the Reverse Split Transaction, you are urged to consult with your tax advisor as to the particular federal, state, local, foreign, and other tax consequences of the Reverse Split Transaction, in light of your specific circumstances.

Federal Income Tax Consequences to Cashed-out Shareholders, including Affiliates, Who do not Own, and Are Not Deemed to Own, the Company's Common Stock After the Reverse Split Transaction

If you receive cash as a result of the Reverse Split Transaction and do not own, and are not deemed to own the Company's Common Stock immediately after the Reverse Split Transaction, you will recognize capital gain or loss. The amount of capital gain or loss you recognize will equal the difference between the cash you receive for your cashed-out stock and your adjusted tax basis in such stock.

DISSENTERS' APPRAISAL RIGHTS

Lincoln Logs Ltd. shareholders have rights under New York law to dissent from the Reverse Split Transaction and to demand appraisal of, and to receive payment in cash of the fair value of their shares of Common Stock. The following is a brief summary of the statutory procedures to be followed by a holder of shares of Common Stock who does not wish to accept the per share cash consideration pursuant to the Reverse Split Transaction in order to dissent from the Reverse Split Transaction and perfect dissenters' rights under New York law.

THIS SUMMARY IS NOT INTENDED TO BE COMPLETE AND IS QUALIFIED IN ITS ENTIRETY BY REFERENCE TO SECTIONS 623 AND 910 OF THE NEW YORK BUSINESS CORPORATION LAW, THE TEXT OF WHICH IS SET FORTH IN APPENDIX B TO THIS PROXY STATEMENT. ANY SHAREHOLDER CONSIDERING DEMANDING APPRAISAL IS ADVISED TO CONSULT LEGAL COUNSEL. DISSENTERS' RIGHTS WILL NOT BE AVAILABLE UNLESS AND UNTIL THE REVERSE SPLIT TRANSACTION IS CONSUMMATED.

Edgar Filing: LINCOLN LOGS LTD - Form PRER14C

A holder of shares of Common Stock who desires to exercise his dissenters'

- 48 -

rights must fully satisfy the following conditions. Dissenters' rights of appraisal will be lost and waived if the procedural requirements of Section 623 are not fully and precisely satisfied. If dissenters' rights are lost and waived, the shareholder will be entitled to receive the consideration provided for in the Reverse Split Transaction agreement.

How To Exercise Dissenters' Rights

Any holder of Common Stock who elects to exercise dissenters' rights with respect to the Reverse Split Transaction must file with the Company, before the Meeting, or at the Meeting but before the vote, written objection to the Reverse Split Transaction. The objection must include a notice of his election to dissent, his name and residence address, the number of shares of Common Stock as to which he dissents and a demand for payment of the fair value of his shares of Common Stock if the Reverse Split Transaction is completed. Such objection is not required from any shareholder to whom the Company did not give notice of the meeting in accordance with the New York Business Corporation Law. A vote against the Reverse Split Transaction will not itself constitute an objection. Within 10 days after the shareholders' authorization date, which term as used in Section 623 would mean in this context July 27, 2005, the date on which the shareholders' vote authorizing the Reverse Split Transaction is taken, the Company must give written notice of such authorization by registered mail to each shareholder who filed written objection or from whom written objection was not required. However, written notice of such authorization will not be sent to any shareholder who votes for the Reverse Split Transaction because that shareholder will be deemed to have elected not to enforce his rights to receive payment for his shares. The failure to vote against the Reverse Split Transaction will not itself constitute a waiver of a shareholder's dissenters' rights.

Within 20 days after the giving of notice to him, any shareholder from whom written objection was not required and who elects to dissent must file with the corporation a written notice of such election, stating his name and residence address, the number of shares of Common Stock as to which he dissents and a demand for payment of the fair value of his such shares.

A shareholder may not dissent as to less than all the shares of Common Stock as to which he has a right of dissent, held by him of record and that he owns beneficially. A nominee or fiduciary may not dissent on behalf of any beneficial owner as to less than all the shares of Common Stock of such owner, as to which such nominee or fiduciary has a right to dissent, held of record by such nominee or fiduciary. Furthermore, if the shares of Common Stock are owned of record in a fiduciary capacity, such as by a trustee, guardian or custodian, the demand should be made in that capacity, and if the shares of Common Stock are owned of record by more than one person, as in a joint tenancy or tenancy in common, the demand should be made by or for all owners of record.

All demands for appraisal should be delivered before the vote on the Reverse Split Transaction is taken at the special meeting. All demands for appraisal and notices of election to dissent should be addressed to the:

Corporate Secretary
Lincoln Logs Ltd.
5 Riverside Drive
Chestertown, New York 12817

- 49 -

Edgar Filing: LINCOLN LOGS LTD - Form PRER14C

At the time of filing a notice of election to dissent or within one month thereafter, a dissenting shareholder must submit all of his certificates representing shares of Common Stock to the Company or its transfer agent for notation thereon of the election to dissent, after which such certificates will be returned to the shareholder. Failure to submit such certificates may result in the loss of dissenters' rights.

Procedure For Appraisal Proceeding

Within 15 days after the expiration of the period within which shareholders may file their notices of election to dissent, or within 15 days after the effective date of the Reverse Split Transaction, whichever is later, the Company is required to make a written offer, by registered mail, to each shareholder who has filed a notice of election to dissent, to pay for such holder's shares of Common Stock at a specified price which the Company considers to be their fair value. Such offer will be accompanied by a statement setting forth the aggregate number of shares of common stock with respect to which such notices of election to dissent from the Reverse Split Transaction have been received and the aggregate number of holders of such shares of Common Stock.

If the Reverse Split Transaction has been completed at the time such offer is made, such offer will also be accompanied by (a) advance payment to each dissenting shareholder who has submitted his certificates for notation thereon of the election to dissent of an amount equal to 80% of the amount of such offer or (b) as to each dissenting shareholder who has not yet submitted his certificates for notation thereon, a statement that advance payment to such shareholder of an amount equal to 80% of the amount of such offer will be made promptly upon submission of his certificates. Acceptance of such advance payment by a dissenting shareholder will not constitute a waiver of his dissenter's rights.

If within 30 days after the making of such written offer, the surviving corporation and any dissenting shareholder agree upon the price to be paid for such holder's shares of Common Stock, payment therefore will be made within 60 days after the making of such offer or the effective date of the Reverse Split Transaction, whichever is later, upon the surrender of the certificates representing such shares of Common Stock. If the Company fails to make such an offer within the 15-day period described above, or if it makes an offer but the Company and a dissenting shareholder do not agree within 30 days of its making of the offer upon the price to be paid for such shareholder's shares of Common Stock, the Company must, within 20 days of such 15-or 30-day period, as the case may be, institute a special proceeding in the Supreme Court of New York to determine the rights of dissenting shareholders and fix the fair value of their shares of Common Stock.

The fair value of the shares of common stock shall be the fair value as of the close of business on the day before the shareholders' authorization date. In fixing the fair value of the shares, the court will consider the nature of the Reverse Split Transaction and its effects on the Company and its shareholders, the concepts and methods then customary in the relevant securities and financial markets for determining fair value of shares of a corporation engaging in a similar transaction under comparable circumstances and all other relevant factors. The court shall determine the fair value without a jury and without referral to an appraiser. If the Company does not institute such a proceeding within the 20-day period, any dissenting shareholder may, within 30 days after

such 20-day period, institute a proceeding for the same. If such proceeding is

Edgar Filing: LINCOLN LOGS LTD - Form PRER14C

not instituted within such 30-day period, any dissenting shareholders who have not agreed with the Company as to the price to be paid for their shares of Common Stock will lose their dissenters' rights, unless the court, for good cause shown, otherwise directs.

Within 60 days after the completion of any such court proceeding, the Company must pay to each dissenting shareholder the amount found to be due him, with interest thereon at such rate as the court finds to be equitable, from the effective date of the Reverse Split Transaction to the date of payment, upon surrender by such shareholder of the certificates representing such shares of Common Stock. If the court finds that the refusal of any dissenting shareholder to accept the Company's offer was arbitrary, vexatious or otherwise not in good faith, no interest will be allowed to such shareholder.

The parties to such court proceeding will bear their own costs and expenses, including the fees and expenses of their counsel and any experts employed by them, except that the court, in its discretion and under certain conditions, may apportion and assess all or any part of the costs, expenses and fees incurred by dissenting shareholders against the surviving corporation or may apportion and assess all or any part of the costs, expenses and fees incurred by the surviving corporation against any dissenting shareholders, including any dissenting shareholders who have withdrawn their notices of election to dissent from the Reverse Split Transaction, who the court finds were arbitrary, vexatious or otherwise not acting in good faith in refusing the Company's offer of payment. Any shareholder who has filed a notice of election to dissent will not, after the effective date of the Reverse Split Transaction, have any of the rights of a shareholder with respect to his shares of Common Stock other than the right to be paid the fair value of such shares of Common Stock under the New York Business Corporation Law.

Any notice of election to dissent may be withdrawn by a dissenting shareholder at any time before the acceptance in writing of an offer by the Company, but in no case later than 60 days after the effective date of the Reverse Split Transaction unless the Company consents in writing. However, if the Company fails to make a timely offer to pay such shareholder the fair value of his shares of Common Stock as provided above, the dissenting shareholder may withdraw his election to dissent at any time within 60 days after any date such an offer is made.

DOCUMENTS INCORPORATED BY REFERENCE

The SEC allows the Company to "incorporate by reference" information into this document. This means that the Company can disclose important information to you by referring you to another document filed separately with the SEC. The information incorporated by reference is considered to be part of this document, except for any information that is superseded by information that is included directly in this document or in any other subsequently filed document that is also incorporated herein by reference.

This document incorporates by reference the documents listed below that the Company has filed previously with the SEC. They contain important information about the Company and its financial condition.

The Company's Annual Report on Form 10-KSB for the fiscal year ended January 31, 2005 (File No. 0-12172).

- 51 -

The Company's Quarterly Report on Form 10-QSB for the fiscal quarter ended April 30, 2005 (File No. 0-12172).

Edgar Filing: LINCOLN LOGS LTD - Form PRER14C

The Company will amend this Information Statement and its Schedule 13E-3 to incorporate by reference any additional documents that we may file with the SEC under Section 13(a), 13(c), 14 or 15(d) of the Exchange Act after the date of this document and before the date of the Meeting to the extent required to fulfill our obligations under the Exchange Act.

The Company will provide, without charge, to each person to whom this Information Statement is delivered, upon written or oral request of such person and by first class mail or other equally prompt means within one business day of receipt of such request, a copy of any and all information that has been incorporated by reference in this Information Statement. You may obtain a copy of these documents and any amendments thereto by writing to Benjamin Shepherd, Chief Financial Officer, at the following address: Lincoln Logs Ltd., 5 Riverside Drive, Chestertown, New York 12817.

These documents is also included in the Company's SEC filings, which you can access electronically at the SEC's website at <http://www.sec.gov>.

OTHER MATTERS

The directors do not know of any matters to be presented at the Meeting other than as described in this Information Statement.

The Board has not authorized anyone to give any information or make any representation about the Reverse Split Transaction or the Company that differs from, or adds to, the information in this Information Statement or in the Company's documents that are publicly filed with the SEC. If anyone gives you different or additional information, you should not rely on it.

Appendix A

Certificate of Amendment of the Company's Restated Certificate of Incorporation

CERTIFICATE OF AMENDMENT
OF
CERTIFICATE OF INCORPORATION OF
LINCOLN LOGS LTD.

Under Section 805 Of The Business Corporation Law

The undersigned, being the President and the Secretary of LINCOLN LOGS LTD., pursuant to Section 805 of the Business Corporation Law of the State of New York, do hereby restate, certify and set forth:

1. The name of the corporation is LINCOLN LOGS LTD. (the "Corporation")

Edgar Filing: LINCOLN LOGS LTD - Form PRER14C

2. The certificate of incorporation of the Corporation was filed by the Department of State on the 25th day of February 1977.

3. Immediately upon the effectiveness of this Amendment to the Corporation's Certificate of Incorporation pursuant to the New York Business Corporation Law (the "Effective Date"), each five hundred (500) issued and outstanding shares of the Corporation's Common Stock, par value \$0.01 per share (the "Old Common Stock"), shall automatically, without further action on the part of the Corporation or any holder of such Old Common Stock, be converted into one (1) new share of the Corporation's Common Stock, \$0.01 par value per share ("New Common Stock"), as constituted following the Effective Date. The conversion of the Old Common Stock into New Common Stock, will be deemed to occur on the Effective Date, regardless of when the certificates representing such Old Common Stock are physically surrendered to the Corporation for exchange into certificates representing New Common Stock. After the Effective Date, certificates representing the Old Common Stock will, until such shares are surrendered to the Corporation for exchange into New Common Stock, represent the number and class of New Common Stock into which such Old Common Stock shall have been converted pursuant to this amendment.

In cases in which the conversion of the Old Common Stock into New Common Stock results in any shareholder holding a fraction of a share, the Company will pay in lieu of such fractional share, an amount in cash (the "Cash Consideration") equal to the product of \$245.00 and a fraction, the numerator of which is the number of shares owned by the shareholder and the denominator of which is the number 500. No interest shall be payable on the Cash Consideration.

Following the Effective Date, the total number of authorized shares of common stock of the Corporation (including all shares of New Common Stock and all shares of treasury stock of the Corporation) shall remain 12,000,000, and the par value of the New Common Stock shall remain \$0.01 per share.

- 1 -

4. The Amendment of the Certificate of Incorporation was authorized by vote of the Board of Directors of the Corporation followed by the affirmative vote of the holders of a majority of all outstanding shares entitled to vote thereon at a special meeting of the Corporation's shareholders duly called and held on , 2005.

IN WITNESS WHEREOF, we have signed this certificate as of the th day of 2005, and we affirm the statements contained herein as true under penalties of perjury.

/s/ John D. Shepherd

John D. Shepherd
President and Chief Executive Officer

/s/ Benjamin A. Shepherd

Edgar Filing: LINCOLN LOGS LTD - Form PRER14C

Appendix B

Business Corporation Law of the State of New York

Section 623. Procedure to enforce shareholder's right to receive payment for shares

(a) A shareholder intending to enforce his right under a section of this chapter to receive payment for his shares if the proposed corporate action referred to therein is taken shall file with the corporation, before the meeting of shareholders at which the action is submitted to a vote, or at such meeting but before the vote, written objection to the action. The objection shall include a notice of his election to dissent, his name and residence address, the number and classes of shares as to which he dissents and a demand for payment of the fair value of his shares if the action is taken. Such objection is not required from any shareholder to whom the corporation did not give notice of such meeting in accordance with this chapter or where the proposed action is authorized by written consent of shareholders without a meeting.

(b) Within ten days after the shareholders' authorization date, which term as used in this section means the date on which the shareholders' vote authorizing such action was taken, or the date on which such consent without a meeting was obtained from the requisite shareholders, the corporation shall give written notice of such authorization or consent by registered mail to each shareholder who filed written objection or from whom written objection was not required, excepting any shareholder who voted for or consented in writing to the proposed action and who thereby is deemed to have elected not to enforce his right to receive payment for his shares.

(c) Within twenty days after the giving of notice to him, any shareholder from whom written objection was not required and who elects to dissent shall file with the corporation a written notice of such election, stating his name and residence address, the number and classes of shares as to which he dissents and a demand for payment of the fair value of his shares. Any shareholder who elects to dissent from a merger under section 905 (Merger of subsidiary corporation) or paragraph (c) of section 907 (Merger or consolidation of domestic and foreign corporations) or from a share exchange under paragraph (g) of section 913 (Share exchanges) shall file a written notice of such election to dissent within twenty days after the giving to him of a copy of the plan of merger or exchange or an outline of the material features thereof under section 905 or 913.

(d) A shareholder may not dissent as to less than all of the shares, as to which he has a right to dissent, held by him of record, that he owns beneficially. A nominee or fiduciary may not dissent on behalf of any beneficial owner as to less than all of the shares of such owner, as to which such nominee or fiduciary has a right to dissent, held of record by such nominee or fiduciary.

(e) Upon consummation of the corporate action, the shareholder shall cease to have any of the rights of a shareholder except the right to be paid the fair value of his shares and any other rights under this section. A notice of election may be withdrawn by the shareholder at any time prior to his acceptance in writing of an offer made by the corporation, as provided in paragraph (g), but in no case later than sixty days from the date of consummation of the corporate action except that if the corporation fails to make a timely offer, as

- 1 -

provided in paragraph (g), the time for withdrawing a notice of election shall be extended until sixty days from the date an offer is made. Upon expiration of

Edgar Filing: LINCOLN LOGS LTD - Form PRER14C

such time, withdrawal of a notice of election shall require the written consent of the corporation. In order to be effective, withdrawal of a notice of election must be accompanied by the return to the corporation of any advance payment made to the shareholder as provided in paragraph (g). If a notice of election is withdrawn, or the corporate action is rescinded, or a court shall determine that the shareholder is not entitled to receive payment for his shares, or the shareholder shall otherwise lose his dissenters' rights, he shall not have the right to receive payment for his shares and he shall be reinstated to all his rights as a shareholder as of the consummation of the corporate action, including any intervening preemptive rights and the right to payment of any intervening dividend or other distribution or, if any such rights have expired or any such dividend or distribution other than in cash has been completed, in lieu thereof, at the election of the corporation, the fair value thereof in cash as determined by the board as of the time of such expiration or completion, but without prejudice otherwise to any corporate proceedings that may have been taken in the interim.

(f) At the time of filing the notice of election to dissent or within one month thereafter the shareholder of shares represented by certificates shall submit the certificates representing his shares to the corporation, or to its transfer agent, which shall forthwith note conspicuously thereon that a notice of election has been filed and shall return the certificates to the shareholder or other person who submitted them on his behalf. Any shareholder of shares represented by certificates who fails to submit his certificates for such notation as herein specified shall, at the option of the corporation exercised by written notice to him within forty-five days from the date of filing of such notice of election to dissent, lose his dissenter's rights unless a court, for good cause shown, shall otherwise direct. Upon transfer of a certificate bearing such notation, each new certificate issued therefor shall bear a similar notation together with the name of the original dissenting holder of the shares and a transferee shall acquire no rights in the corporation except those which the original dissenting shareholder had at the time of transfer.

(g) Within fifteen days after the expiration of the period within which shareholders may file their notices of election to dissent, or within fifteen days after the proposed corporate action is consummated, whichever is later (but in no case later than ninety days from the shareholders' authorization date), the corporation or, in the case of a merger or consolidation, the surviving or new corporation, shall make a written offer by registered mail to each shareholder who has filed such notice of election to pay for his shares at a specified price which the corporation considers to be their fair value. Such offer shall be accompanied by a statement setting forth the aggregate number of shares with respect to which notices of election to dissent have been received and the aggregate number of holders of such shares. If the corporate action has been consummated, such offer shall also be accompanied by (1) advance payment to each such shareholder who has submitted the certificates representing his shares to the corporation, as provided in paragraph (f), of an amount equal to eighty percent of the amount of such offer, or (2) as to each shareholder who has not yet submitted his certificates a statement that advance payment to him of an amount equal to eighty percent of the amount of such offer will be made by the corporation promptly upon submission of his certificates. If the corporate action has not been consummated at the time of the making of the offer, such advance payment or statement as to advance payment shall be sent to each shareholder entitled thereto forthwith upon consummation of the corporate action. Every advance payment or statement as to advance payment shall include advice to the shareholder to the effect that acceptance of such payment does not constitute a waiver of any dissenters' rights. If the corporate action has not been consummated upon the expiration of the ninety day period after the shareholders' authorization date, the offer may be conditioned upon the consummation of such action. Such offer shall be made at the same price per

Edgar Filing: LINCOLN LOGS LTD - Form PRER14C

share to all dissenting shareholders of the same class, or if divided into series, of the same series and shall be accompanied by a balance sheet of the corporation whose shares the dissenting shareholder holds as of the latest available date, which shall not be earlier than twelve months before the making of such offer, and a profit and loss statement or statements for not less than a twelve month period ended on the date of such balance sheet or, if the corporation was not in existence throughout such twelve month period, for the portion thereof during which it was in existence. Notwithstanding the foregoing, the corporation shall not be required to furnish a balance sheet or profit and loss statement or statements to any shareholder to whom such balance sheet or profit and loss statement or statements were previously furnished, nor if in connection with obtaining the shareholders' authorization for or consent to the proposed corporate action the shareholders were furnished with a proxy or information statement, which included financial statements, pursuant to Regulation 14A or Regulation 14C of the United States Securities and Exchange Commission. If within thirty days after the making of such offer, the corporation making the offer and any shareholder agree upon the price to be paid for his shares, payment therefor shall be made within sixty days after the making of such offer or the consummation of the proposed corporate action, whichever is later, upon the surrender of the certificates for any such shares represented by certificates.

(h) The following procedure shall apply if the corporation fails to make such offer within such period of fifteen days, or if it makes the offer and any dissenting shareholder or shareholders fail to agree with it within the period of thirty days thereafter upon the price to be paid for their shares:

(1) The corporation shall, within twenty days after the expiration of whichever is applicable of the two periods last mentioned, institute a special proceeding in the supreme court in the judicial district in which the office of the corporation is located to determine the rights of dissenting shareholders and to fix the fair value of their shares. If, in the case of merger or consolidation, the surviving or new corporation is a foreign corporation without an office in this state, such proceeding shall be brought in the county where the office of the domestic corporation, whose shares are to be valued, was located.

(2) If the corporation fails to institute such proceeding within such period of twenty days, any dissenting shareholder may institute such proceeding for the same purpose not later than thirty days after the expiration of such twenty day period. If such proceeding is not instituted within such thirty day period, all dissenter's rights shall be lost unless the supreme court, for good cause shown, shall otherwise direct.

(3) All dissenting shareholders, excepting those who, as provided in paragraph (g), have agreed with the corporation upon the price to be paid for their shares, shall be made parties to such proceeding, which shall have the effect of an action quasi in rem against their shares. The corporation shall serve a copy of the petition in such proceeding upon each dissenting shareholder who is a resident of this state in the manner provided by law for the service of a summons, and upon each nonresident dissenting shareholder either by registered mail and publication, or in such other manner as is permitted by law. The jurisdiction of the court shall be plenary and exclusive.

(4) The court shall determine whether each dissenting shareholder, as to whom the corporation requests the court to make such determination, is entitled to

Edgar Filing: LINCOLN LOGS LTD - Form PRER14C

receive payment for his shares. If the corporation does not request any such determination or if the court finds that any dissenting shareholder is so entitled, it shall proceed to fix the value of the shares, which, for the purposes of this section, shall be the fair value as of the close of business on the day prior to the shareholders' authorization date. In fixing the fair value of the shares, the court shall consider the nature of the transaction giving rise to the shareholder's right to receive payment for shares and its effects on the corporation and its shareholders, the concepts and methods then customary in the relevant securities and financial markets for determining fair value of shares of a corporation engaging in a similar transaction under comparable circumstances and all other relevant factors. The court shall determine the fair value of the shares without a jury and without referral to an appraiser or referee. Upon application by the corporation or by any shareholder who is a party to the proceeding, the court may, in its discretion, permit pretrial disclosure, including, but not limited to, disclosure of any expert's reports relating to the fair value of the shares whether or not intended for use at the trial in the proceeding and notwithstanding subdivision (d) of section 3101 of the civil practice law and rules.

(5) The final order in the proceeding shall be entered against the corporation in favor of each dissenting shareholder who is a party to the proceeding and is entitled thereto for the value of his shares so determined.

(6) The final order shall include an allowance for interest at such rate as the court finds to be equitable, from the date the corporate action was consummated to the date of payment. In determining the rate of interest, the court shall consider all relevant factors, including the rate of interest which the corporation would have had to pay to borrow money during the pendency of the proceeding. If the court finds that the refusal of any shareholder to accept the corporate offer of payment for his shares was arbitrary, vexatious or otherwise not in good faith, no interest shall be allowed to him.

(7) Each party to such proceeding shall bear its own costs and expenses, including the fees and expenses of its counsel and of any experts employed by it. Notwithstanding the foregoing, the court may, in its discretion, apportion and assess all or any part of the costs, expenses and fees incurred by the corporation against any or all of the dissenting shareholders who are parties to the proceeding, including any who have withdrawn their notices of election as provided in paragraph (e), if the court finds that their refusal to accept the corporate offer was arbitrary, vexatious or otherwise not in good faith. The court may, in its discretion, apportion and assess all or any part of the costs, expenses and fees incurred by any or all of the dissenting shareholders who are parties to the proceeding against the corporation if the court finds any of the following: (A) that the fair value of the shares as determined materially exceeds the amount which the corporation offered to pay; (B) that no offer or required advance payment was made by the corporation; (C) that the corporation failed to institute the special proceeding within the period specified therefor; or (D) that the action of the corporation in complying with its obligations as provided in this section was arbitrary, vexatious or otherwise not in good faith. In making any determination as provided in clause (A), the court may consider the dollar amount or the percentage, or both, by which the fair value of the shares as determined exceeds the corporate offer.

(8) Within sixty days after final determination of the proceeding, the corporation shall pay to each dissenting shareholder the amount found to be due him, upon surrender of the certificates for any such shares represented by certificates.

- 4 -

(i) Shares acquired by the corporation upon the payment of the agreed value

Edgar Filing: LINCOLN LOGS LTD - Form PRER14C

therefor or of the amount due under the final order, as provided in this section, shall become treasury shares or be cancelled as provided in section 515 (Reacquired shares), except that, in the case of a merger or consolidation, they may be held and disposed of as the plan of merger or consolidation may otherwise provide.

(j) No payment shall be made to a dissenting shareholder under this section at a time when the corporation is insolvent or when such payment would make it insolvent. In such event, the dissenting shareholder shall, at his option:

(1) Withdraw his notice of election, which shall in such event be deemed withdrawn with the written consent of the corporation; or

(2) Retain his status as a claimant against the corporation and, if it is liquidated, be subordinated to the rights of creditors of the corporation, but have rights superior to the non-dissenting shareholders, and if it is not liquidated, retain his right to be paid for his shares, which right the corporation shall be obliged to satisfy when the restrictions of this paragraph do not apply.

(3) The dissenting shareholder shall exercise such option under subparagraph (1) or (2) by written notice filed with the corporation within thirty days after the corporation has given him written notice that payment for his shares cannot be made because of the restrictions of this paragraph. If the dissenting shareholder fails to exercise such option as provided, the corporation shall exercise the option by written notice given to him within twenty days after the expiration of such period of thirty days.

(k) The enforcement by a shareholder of his right to receive payment for his shares in the manner provided herein shall exclude the enforcement by such shareholder of any other right to which he might otherwise be entitled by virtue of share ownership, except as provided in paragraph (e), and except that this section shall not exclude the right of such shareholder to bring or maintain an appropriate action to obtain relief on the ground that such corporate action will be or is unlawful or fraudulent as to him.

(l) Except as otherwise expressly provided in this section, any notice to be given by a corporation to a shareholder under this section shall be given in the manner provided in section 605 (Notice of meetings of shareholders).

(m) This section shall not apply to foreign corporations except as provided in subparagraph (e)(2) of section 907 (Merger or consolidation of domestic and foreign corporations).

- 5 -

Section 910. Right of shareholder to receive payment for shares upon merger or consolidation, or sale, lease, exchange or other disposition of assets, or share exchange

(a) A shareholder of a domestic corporation shall, subject to and by complying with section 623 (Procedure to enforce shareholder's right to receive payment for shares), have the right to receive payment of the fair value of his shares and the other rights and benefits provided by such section, in the following cases:

(1) Any shareholder entitled to vote who does not assent to the taking of an action specified in clauses (A), (B) and (C).

(A) Any plan of merger or consolidation to which the corporation is a party; except that the right to receive payment of the fair value of his shares shall not be available:

Edgar Filing: LINCOLN LOGS LTD - Form PRER14C

(i) To a shareholder of the parent corporation in a merger authorized by section 905 (Merger of parent and subsidiary corporations), or paragraph (c) of section 907 (Merger or consolidation of domestic and foreign corporations); or

(ii) To a shareholder of the surviving corporation in a merger authorized by this article, other than a merger specified in subclause (i), unless such merger effects one or more of the changes specified in subparagraph (b) (6) of section 806 (Provisions as to certain proceedings) in the rights of the shares held by such shareholder; or

(iii) Notwithstanding subclause (ii) of this clause, to a shareholder for the shares of any class or series of stock, which shares or depository receipts in respect thereof, at the record date fixed to determine the shareholders entitled to receive notice of the meeting of shareholders to vote upon the plan of merger or consolidation, were listed on a national securities exchange or designated as a national market system security on an interdealer quotation system by the National Association of Securities Dealers, Inc.

(B) Any sale, lease, exchange or other disposition of all or substantially all of the assets of a corporation which requires shareholder approval under section 909 (Sale, lease, exchange or other disposition of assets) other than a transaction wholly for cash where the shareholders' approval thereof is conditioned upon the dissolution of the corporation and the distribution of substantially all of its net assets to the shareholders in accordance with their respective interests within one year after the date of such transaction.

(C) Any share exchange authorized by section 913 in which the corporation is participating as a subject corporation; except that the right to receive payment of the fair value of his shares shall not be available to a shareholder whose shares have not been acquired in the exchange or to a shareholder for the shares of any class or series of stock, which shares or depository receipt in respect thereof, at the record date fixed to determine the shareholders entitled to receive notice of the meeting of shareholders to

- 6 -

vote upon the plan of exchange, were listed on a national securities exchange or designated as a national market system security on an interdealer quotation system by the National Association of Securities Dealers, Inc.

(2) Any shareholder of the subsidiary corporation in a merger authorized by section 905 or paragraph (c) of section 907, or in a share exchange authorized by paragraph (g) of section 913, who files with the corporation a written notice of election to dissent as provided in paragraph (c) of section 623.

(3) Any shareholder, not entitled to vote with respect to a plan of merger or consolidation to which the corporation is a party, whose shares will be cancelled or exchanged in the merger or consolidation for cash or other consideration other than shares of the surviving or consolidated corporation or another corporation.

Opinion of Value

EMPIRE VALUATION CONSULTANTS, LLC
3255 Brighton Henrietta Town Line Road
Rochester, NY 14623

PRIVATE & CONFIDENTIAL

March 20, 2005

Mr. Benjamin A. Shepherd
Vice President - Finance, CFO
Lincoln Logs, Ltd.
5 Riverside Drive
Chestertown, NY 12817

Dear Mr. Shepherd:

You have requested Empire Valuation Consultants, LLC ("Empire") to render its opinion as to the fair value of Lincoln Logs Ltd. ("LLOG" or the "Company") as of March 18, 2005 (the "Valuation Date"). It is our understanding that this valuation will be used for a proposed reverse stock split and the resultant deregistration of the Company's common stock under the Securities Exchange Act of 1934. Empire's conclusion of the aggregate fair value of LLOG is \$4,000,000.

Methodology

LLOG has been valued under the assumption that the Company is a going concern. This appraisal was conducted according to guidelines established by the Internal Revenue Service ("IRS") and in conformity with appraisal practices promulgated by the American Society of Appraisers in the Principles of Appraisal Practice and Code of Ethics, and the Uniform Standards of Professional Appraisal Practice ("USPAP"), together with such standards as were deemed relevant to this engagement.

For the purpose of this engagement, fair value is defined as the price at which ownership interests would change hands between a willing buyer and a willing seller, neither being under any compulsion to buy or sell and both having reasonable knowledge of relevant facts.

Fair value is essentially identical to fair market value as defined by the Internal Revenue Code. Revenue Ruling 59-60 lists factors which are useful in

- 1 -

determining fair market value for a privately-held company (footnote 1), and these are appropriate in establishing fair value as well. In this analysis, all pertinent factors listed in Revenue Ruling 59-60 were considered, including, but not limited to, the following:

- The nature of the business and the history of the enterprise from its inception;
- The general economic outlook and condition of, and outlook for, the subject industry;
- The book value of the equity and the Company's financial condition;
- The earning capacity of LLOG;

Edgar Filing: LINCOLN LOGS LTD - Form PRER14C

- Its dividend-paying capacity;
- Whether or not goodwill or other intangible value exists;
- Past sales of the equity and the size of the block under consideration; and
- The market price of actively traded interests of public corporations engaged in the same or similar lines of business.

Sources of Information

Information used in determining the fair market value of LLOG was provided by the documents and sources listed below:

- The Company's filings with the Securities and Exchange Commission ("SEC"), for its fiscal years ended January 31, 2000 through 2004 (footnote 2) and for various interim periods;
- LLOG's pro forma results for 2005, including a balance sheet, income statement and statement of cash flow, all provided by management of the Company, as well

(Footnotes)

1. Thinly traded public companies are frequently valued by third-party appraisers in the same manner, i.e., as if they were privately held.
2. Unless otherwise indicates, all further references to the Company's year end are for fiscal year ended January 31.

- 2 -

as a projected income statement for LLOG's fiscal year ending January 31, 2006;

- An on-site visit to one of LLOG's divisions in 2002;
- Hoover's Online ("Hoover's"), Edgarscan, Multex, and Yahoo!Finance databases;
- Economic and industry information from Value Line, the Wall Street Journal, Standard & Poor's Industry Surveys, and the Log Home Council, among others;
- Conversations and correspondence with: yourself; John S. Shepherd, CEO; William Thyne, Vice President, Treasurer; Richard Waters, LLOG's Controller, regarding the Company's history, operations, finances, and outlook as of the Valuation Date;
- Correspondence and a conversation with Christopher Truso, Vice President, of First Pioneer Credit, ACA, concerning appraisals of the Company's fixed assets;
- Conversations and correspondence with Leslie M. Apple, Esq. and Patricia Franchini, Esq. of the firm Whiteman Osterman and Hanna, counsel to the Company; and
- Other reviews, analyses, and research as were deemed necessary.

Business Profile

LLOG is primarily engaged in the business of designing, manufacturing and marketing a broad line of log and panelized homes to be erected by custom builders and "do-it-yourself" buyers. The Company planes cants (logs milled on

Edgar Filing: LINCOLN LOGS LTD - Form PRER14C

four sides) at its own manufacturing facilities in Chestertown, New York ("NY") and Maple Ridge, British Columbia ("BC") and delivers to its customers by truck trailer a weather-tight log home or panelized shell package. While the Company historically did not provide construction services to customers (including the sale and installation of foundations, plumbing, electrical wiring and fixtures, cabinets, and other amenities), its newly acquired subsidiary, Snake River Log Homes LLC ("Snake River"), does provide this service from time to time. The Company also provides its customers with services related to the sale of its housing packages, such as the preparation of customized blueprints and ongoing

- 3 -

customer service through its organization of independent representatives located throughout the United States ("U.S."). Approximately 89% of the Company's total sales were derived from log home and panelized home sales in the fiscal year ended January 31, 2005.

The Company was incorporated in New York in 1977 and has the following wholly-owned subsidiaries:

- Thermo-Home Inc., a NY corporation through which the Company's panelized homes were previously manufactured and marketed (the manufacture and marketing operations of the Company's panelized homes were integrated into the operation of LLOG during its fiscal year ended January 31, 1988);
- Snake River, a sole-member limited liability company organized under the laws of the State of Idaho whose principal activity is the marketing and sale of log homes constructed of rustic logs in the Swedish-cope style;
- AFI Acquisitions Company, LLC ("AFI"), a sole-member limited liability company organized under the laws of NY whose principal activity is the manufacture of dimensional wood products for consumption by LLOG;
- Lincoln Logs Canada Ltd. ("LL-Canada"), a holding company incorporated under the laws of BC, Canada through which the Company acquired two affiliated companies with common ownership;
- True Craft Log Structures Ltd., a company organized under the laws of BC, Canada whose principal activity is the marketing and sale of log homes;
- Hart and Son Industries Ltd., a company organized under the laws of BC, Canada whose principal activity is the manufacture of log homes for Hart and Son Industries Ltd. and the Company (footnote 3).

During the fiscal year ended January 31, 2004, the Company made several acquisitions. On August 29, 2003, the Company completed the acquisition of TCHSI. On October 7, 2003, the Company, through AFI, purchased certain assets of Adirondack Forest Industries, Inc. On November 17, 2003, the Company completed the acquisition of all of the outstanding limited liability company interests of Snake River. True CRAFT Log Structures Co., a Nova Scotia Unlimited Liability Corporation organized under the laws of Nova Scotia, Canada, was formed in November 2004 as a holding company into which the Company's

(Footnotes)

3. True Craft Log Structures, Ltd. and Hart and Son Industries Ltd. are together referred to as TCHSI.

- 4 -

Edgar Filing: LINCOLN LOGS LTD - Form PRER14C

Canadian subsidiaries, TCHSI and LL-Canada, were amalgamated and whose principal activity is the manufacture, marketing and sales of log homes principally to the Canadian, European and Pacific Rim markets.

A. Products

The Company's products include over 125 standard models of log homes ranging in size from 560 to 4,000 square feet, and in price from approximately \$27,000 to \$208,000, as well as custom-designed homes with prices and sizes ranging up to approximately \$750,000 and 10,000 square feet, respectively. A majority of the Company's sales are of log homes to be occupied as primary residences by the buyers.

The Company has a product line for the general housing market utilizing a pre-engineered structural wall system, which when assembled with other standard building components, facilitates the construction of non-log traditional homes, as well as log-like structures. These product lines are marketed as the Thermo-Home(R) system and the Lincoln-Panel(R) system. Sales of this product line were approximately 13% of total sales in fiscal year 2005.

The Company also has a product line for the solarium/sunspace market utilizing architectural arches which, when assembled with other standard building components, will permit the construction of room additions for log and traditional homes. The product line is referred to as Lincoln Solarium(TM). Sales of this product line as a stand-alone product were approximately 1% of total sales in fiscal year 2005, which does not include those solariums that are built into and are an integral part of the design of the Company's log home products.

B. Marketing & Customers

Fifty percent (50%) of the purchase price of the building package is usually received prior to the manufacture by the Company of any of the solid timber components or the pre-engineered structural wall panels. The complete log home shell package or panelized home package is shipped via truck trailers and delivered to a customer upon payment of the balance of the purchase price. International sales are completed with the use of letters of credit, or are conditioned upon receipt of full payment prior to shipment.

The Company markets its products in the U.S. through a network of approximately 61 independent sales representatives in approximately 31 states, and through four Company-owned and operated sales centers, one in northern NY, one in northern California, one in southeastern Idaho and one in northwestern

- 5 -

Canada. All Company-operated sales centers are staffed by Company-employee salespersons. Each of the Company's independent sales representatives has a written agreement with the Company that specifies the representative's sales territory and provides for the payment of a commission ranging from 13% to 17.5% of the purchase price for the log home shell package. A majority of the Company's independent sales representatives have purchased and erected one of the Company's log homes for use as a sales model. The Company maintains a cooperative advertising program for independent sales representatives pursuant to which the Company shares in the cost of advertising undertaken by qualified sales representatives.

Substantially all of the Company's sales have been to customers in the U.S., with the remainder to customers in Japan (less than 5% in each fiscal year).

Edgar Filing: LINCOLN LOGS LTD - Form PRER14C

C. Raw Materials

The Company manufactures log components from rough-sawn eastern white pine cants, western red cedar cants and western spruce cants. The cants are milled to various dimensions to produce the Company's finished product. The pine cants are purchased from several mills in the region of the Company's facilities in Chestertown, NY; Maple Ridge, British Columbia, Canada; and Rigby, Idaho. Cedar cants are purchased from several mills in northern California, Oregon and western Canada. Finished logs of lodge pole pine for delivery to some of the Company's customers are purchased from an unaffiliated company on a subcontract basis. Logs constitute approximately 24% of the cost of a typical log home shell package.

Other components of the Company's log home shell package are purchased from several suppliers. These components include prefabricated roof trusses, windows, doors, nails, sheathing, dimensional lumber, shingles, caulking, and between-log sealant. The Company has not recently experienced any significant supply shortages, and does not anticipate any such shortages in the near future based upon currently available information. Alternative sources of raw materials are readily available to the Company.

D. Competition

The Company believes that there are approximately 350 firms engaged in the sale of log home materials, of which approximately 125 firms sell log home packages or kits and are in direct competition with the Company.

According to management, the Company's principal competitors are: Tennessee Log Homes, Real Log Homes, Northeastern Log Homes, Inc. ("NLH"), Kuhns Bros.,

- 6 -

and Jim Barna Log Systems. The Company believes that its competitive position with respect to those firms is favorable, especially in the areas of quality and range of product, price, appearance, and energy efficiency.

Hoover's listed LLOG's top competitors as Anthony Forest Products Co. ("Anthony"), Home Depot, and NLH. While Home Depot is publicly traded, it is more commonly recognized as the largest U.S. retailer of myriad building products than as a log home supplier. Anthony and NLH are both privately held with estimated annual revenues of \$130 million and \$8 million, respectively. In all, Hoover's listed 31 competitors. As with Home Depot, they all have some connection to the building products industry, but none of them are directly comparable to LLOG. A company fact sheet from Hoover's for each of the 31 is attached as Appendix A to this report.

E. Facilities

The Company owns several parcels of real estate located in NY, California, and Vermont.

New York:

1. An approximately 8.5-acre parcel of land on Riverside Drive, Chestertown, NY, on which are located (1) the Company's executive offices, consisting of a 6,000-square-foot log building and a 2,000-square-foot log building, (2) the Company's production facilities, consisting of two milling machines located in a 10,200-square-foot metal building; a 10,440-square-foot metal-framed, open storage structure; a 4,800-square-foot, log-sided pole shed, and (3) a 14,000-square-foot Thermo-Home(R) and log building containing corporate offices, storage and fabricating facilities for the Company's Thermo-Home(R) product line. The

Edgar Filing: LINCOLN LOGS LTD - Form PRER14C

remainder of the 8.5-acre parcel is utilized by the Company for outside storage of cants, logs and building materials used in the Company's log home and panelized home packages.

2. An approximately 19-acre parcel of undeveloped land on Route 8, Chestertown, NY, which is utilized by the Company for storage of cants and logs.

3. An approximately one-acre parcel of land on Pine Street, Chestertown, NY, on which is located a 7,680-square-foot building which was previously used as a manufacturing facility for the Company's Thermo-Home(R) product line and is

- 7 -

currently used for additional storage of building materials for this product line.

4. An approximately 1.4-acre parcel of land in Lake George, NY on which is located the Company's new Northern Regional Sales Office in a 3,050-square-foot log home erected by the Company.

5. Approximately 15 acres of land comprised of three contiguous parcels of land on Fish House Road, Galway, NY, on which is located the Company's saw mill operation, consisting of a 13,520-square-foot metal building that houses log sawing production equipment, a 1,752-square-foot wood-frame office building, a 900-square-foot building that contains a drying kiln, and eight additional storage buildings and drying sheds ranging in size from 667 square feet to 3,528 square feet. The remainder of the 15 acres is utilized by the Company for outside storage of logs, cants, timbers and other dimensional lumber products.

6. In addition, the Company owns a parcel of approximately 1 acre of undeveloped land in Northeastern NY acquired by the Company for potential future use.

California:

1. The Company owns an approximately one-acre parcel of land in Auburn, California, on which is located the Company's Western Regional Sales Office in a 4,000-square-foot western cedar Ranch-style log home, and a 2,500-square-foot western cedar Cape-style log home planed in the Weatherbloc(R) clapboard style.

Vermont:

1. The Company owns a parcel of land of approximately 1.4 acres in Southwest Vermont, acquired by the Company for potential future use.

The Company considers these facilities to be in good condition and suitable for their respective purposes. As collateral for its Revolving Credit and Loan Agreement, dated October 7, 2003, the Company has granted mortgages on all of the real estate described above.

F. Employees

As of January 31, 2005, the Company employed 109 persons, 104 of whom are full-time employees and 5 individuals who are part-time employees. The Company

- 8 -

has never had a work stoppage and regards its employee relations as satisfactory. Employees are not covered by collective bargaining agreements.

G. Capital Stock

Edgar Filing: LINCOLN LOGS LTD - Form PRER14C

The Company's Common Stock is traded over-the-counter on the OTC Bulletin Board(R) under the ticker symbol LLOG.OB. LLOG has one class of capital stock issued and outstanding, voting common stock. There were 9,040,059 registered shares as of the Valuation Date. The last reported price for the Company's shares according to Yahoo!Finance was \$0.44 per share as of March 18, 2004.

Closing bid prices for the Company's common stock represent inter-dealer quotations. They do not represent actual transactions, and they do not include retail mark-ups, mark-downs or commissions. Prices are determined from information provided by a majority of the market makers for the Company's common stock, including the underwriter for such securities of the Company.

No cash dividends were declared by the Company during the fiscal years ended January 31, 2005 and 2004. While the payment of dividends rests within the discretion of the Board of Directors, it was not anticipated that cash dividends would be paid in the foreseeable future, as the Company intended to retain earnings, if any, for use in the development of its business. The payment of dividends is contingent upon the Company's future earnings, if any, the Company's financial condition and its capital requirements, general business conditions and other factors. Further, the Company's Credit Agreement with its primary lender prohibits the Company's ability to make distributions without the lender's prior written consent.

On August 29, 2003, the Company completed the acquisition of two companies, i.e., TCHSI, affiliated through common ownership for approximately \$1,895,400. In connection with this transaction and as part of the consideration paid for these entities the Company issued a total of 287,500 unregistered shares of the Company's common stock to two individual owners of the companies. On the date of the transaction, the shares conveyed to such individuals were valued at approximately \$76,300. Empire prepared the independent valuation for these shares. The shares issued to such individuals were issued by the Company pursuant to an exemption from registration set forth in Section 4(2) of the Securities Act of 1933, as amended.

On November 17, 2003, the Company completed the acquisition of a limited liability company, i.e., Snake River, for approximately \$1,209,800. In connection with this transaction and as part of the consideration paid for this

- 9 -

entity the Company issued a total of 300,000 unregistered shares of the Company's common stock to the two individual owners of the company. On the date of the transaction, the shares conveyed to such individuals were valued at approximately \$141,600. The shares issued to such individuals were issued by the Company pursuant to an exemption from registration set forth in Section 4(2) of the Securities Act of 1933, as amended.

Economic, Industry & Company Outlook

In the appraisal of any company, the general economic factors prevailing at the valuation date, as well as those foreseen then, must be considered. Assimilation of these facts and forecasts provides insight into the economic climate in which investors are dealing. Although individual factors may or may not have a direct impact upon a particular industry, the overall economy and its outlook have a strong influence on how investors perceive investment opportunities.

A. General Economy

For this analysis, the general economic climate that prevailed through the

Edgar Filing: LINCOLN LOGS LTD - Form PRER14C

first quarter of 2005 was considered, as was the outlook for the domestic economy. This section of the report contains an overview of selected economic factors, such as gross domestic product ("GDP"), inflation, and U.S. monetary and fiscal policy.

The Value Line forecast closest to the Valuation Date was utilized, as it was considered to be most reasonable. In its Quarterly Economic Review, dated February 25, 2005, Value Line remained optimistic about the continued recovery in the U.S. economy, and stated that the economy continued to grow at a steady pace in the first quarter of 2005. Factors supporting the reserved outlook included (1) a strong housing market, (2) fairly healthy levels of retail spending, (3) continued growth in manufacturing, and (4) steady gains in the service sector. In addition, the economy should be supported by a steadier recovery in employment, further growth in personal income, additional increases in export volume, and continued strength in capital spending. GDP increased by 3.3%, 4.0%, and 3.1% in the second, third, and fourth quarters of 2004, respectively. Longer-term projections called for GDP growth to average only 3.4% from 2005 through 2008.

In addition to the factors listed above, Value Line's forecast incorporates assumptions that the Bush administration's efforts to reduce the record federal budget deficit will meet with moderate success, the recent elections in Iraq will help reduce tensions currently being experienced in that nation, and that oil prices will remain in a \$40 to \$45 barrel range in 2005 rather than surge to new highs. Such growth should be accompanied by benign levels of inflation, and

- 10 -

a reasonable monetary policy on the part of the Federal Reserve that should help extend the maturing economic expansion through 2006.

According to Value Line, inflation will continue to remain benign, with the exception of energy and food. In 2004, producer prices rose by 3.6% versus a gain of 3.2% in 2003, while consumer price rose 2.7%, up from 2.3% in 2003. Growth in the consumer price index was estimated at 2.0% and 2.2% for the first and second quarters of 2005, respectively. The change in industrial production was estimated to be 4.3% during the first quarter of 2005, and was expected to average 3.5% from 2005 through 2009. Increases in the producer price index were forecast to range between 1.5% and 2.0% over the same period.

Value Line expected both short-term and long-term borrowing costs to remain comparatively stable. The three-month Treasury bill rate was 2.7% at the publication date and was expected to increase to 2.8% by the second quarter of 2005. The Prime Lending Rate was 5.5% at the publication date and was forecast to slowly grow, reaching 7.5% by 2009. Value Line believed the Fed's accommodative monetary policy had achieved its goals, resulting in only a half point growth in Prime over the third and fourth quarters of 2004.

Corporate earnings remained in a recovery mode in 2004, supported by increasing productivity, corporate cost cutting, recovering demand, low bond yields, and generally low inflation. Value Line believes this trend will continue in 2005, with after-tax profits increasing by more than 13%. Earnings growth is anticipated to improve thereafter, averaging 8% from 2006 to 2009.

In sum, Value Line was forecasting real, inflation-adjusted GDP to rise at a rate of 3.5% for all of 2005. Longer-term projections continued to call for between 3.3% and 3.5% in real year-over-year GDP growth. In the absence of any severe problems (i.e., an increase in oil prices from current levels, more worldwide terrorist attacks, or other exogenous shocks), Value Line believed that the long-term economic recovery would continue.

Edgar Filing: LINCOLN LOGS LTD - Form PRER14C

B. Pacific Rim Economic Outlook

TCHSI is one of LLOG's newer acquisitions and is expected to be a source of increasing revenue. Therefore, Empire reviewed the economic outlook for the subsidiary's market territory. TCHSI's management indicated that nearly 70% of its business was generated in the Pacific Rim countries of Japan, South Korea, and Taiwan. As such, TCHSI's outlook was partly dependent upon general economic conditions in these three countries. Each is discussed in further detail below.

- 11 -

Publications from Scotiabank and PricewaterhouseCoopers ("PWC") provided most of the information.

Japan: PWC's European Economic Outlook for October 2004 and February 2005 ("EEO") included some information that was global as well. The data available in October indicated that the Japanese economy expanded by only 0.4% in the second quarter of 2004, which represented a significant decline from 1.6% the previous quarter. Business investment also stagnated while consumer spending growth slowed to 0.6%. Unemployment fell moderately to 4.6% in June 2004 from 5.3% a year earlier, although it peaked at 4.9% in July 2004. However, it was considered premature to predict an economic recovery for the Japanese economy given concerns regarding deflation, a strong yen, over-reliance on exports to China, and a troubled banking sector and high debt. GDP growth was expected to average 4.3% in 2004 and then moderate to 1.8% in 2005. By the end of 2004, however, increases in oil prices contributed to noticeable deceleration in the Japanese economy. It expanded by just 0.1% in the third quarter of 2004. Consumer spending proved weaker than expected while exports also slowed. This reflected, in part, weaker demand from China. Private investment growth, however, remained relatively stable. The full year forecast for 2004 GDP growth was lowered to 2.9% and 2005 GDP growth was expected to reach only 1.1%. However, the slowdown was expected to be temporary with renewed momentum in 2006.

South Korea: Scotiabank indicated that South Korea's economic growth might average less than 4% in 2005/2006. Since economic expansion is heavily dependent on exports, South Korea will probably still do well compared to the overall international community. Around the Valuation Date, manufacturing output was rising at a near double-digit annual pace. Nevertheless, more vigorous economic growth was not likely to occur without a recovery in household spending, which had declined for two consecutive years. Consumer confidence was low due to a jobless rate which hovered around a three-year high of 3.6%. Although unemployment colored attitudes toward spending, employment was actually up about 2% year-over-year by the end of 2004. A rise in household incomes was expected to increase consumer outlays, along with an accommodative monetary policy stance by the central bank. Policymakers were concerned about overheating in the housing market, but they continued to prefer to address this problem through administrative measures and selective tax increases rather than through higher interest rates. South Korea's biggest advantage remains its position between the high-cost, high-productivity of Japanese competitors and the low-cost but (on average) lower valued-added of Chinese competitors.

Taiwan: Scotiabank was predicting solid, somewhat reduced, economic growth for Taiwan. Political uncertainties regarding relations with mainland China

- 12 -

continued to be a concern, but the pro-independence party still did not gain a majority in December 2004 elections, which helped to lower the anxiety level to

Edgar Filing: LINCOLN LOGS LTD - Form PRER14C

some degree. The Taiwanese economy was forecast to grow about 4.5% in 2005 and 2006 following a near-6% rise in output in 2004. Orders were at record highs. Labor market conditions were improving, as the jobless rate had fallen back to a three and half year low of just over 4%. Commercial relations between China and Taiwan continued to strengthen in spite of political tensions. China accounts for more than one-third of Taiwan's total exports.

C. Industry Outlook (U.S.)

General U.S. Homebuilding Outlook: In its January 6, 2005 Industry Survey for Homebuilding, Standard & Poor's ("S&P") was forecasting a fourth consecutive record year for U.S. homebuilding in 2004 based on information through the first ten months.

S&P indicated that mortgage rates typically had the largest influence of any factor driving home sales, due to their impact on expected mortgage payments and the level of income required to secure a mortgage. U.S. mortgage rates remained near historical lows at the Valuation Date, but were beginning to rise marginally. With the economy showing relatively solid strength since the middle of 2003, even the modest upturn in mortgage rates was not slowing the buying trend. Consumers who had put off buying a home were now acting before interest rates got any higher.

Over the first eleven months of 2004, total housing start rose 6.3% year-over-year, to 1.81 million. Thus, for the full year, S&P was expecting the total to top 1.5 million single-family starts. With all the feverish activity, builders continued to acquire other builders. The top 100 companies in the industry made more than a dozen acquisitions in 2003.

Overall for 2005, S&P was expecting some moderation in the market. As of December 2004, S&P was projecting that rates for 30-year conventional mortgages would average 5.9% for all of 2004, and then move up to an average of 6.5% in 2006, 6.9% in 2006, 7.1% in 2007, and 7.3% in 2008. In the short-term, these anticipated increases will spur buying, but home affordability would start to slow the pace. Home prices reached their highest level in some thirty years in the first quarter of 2004.

Finally, S&P believed that the present housing cycle was mature. With new single-family homes on an upswing since 1992, there is simply less pent-up

- 13 -

demand. This could be offset by immigrant buyers as well as baby boomers trading up. An ongoing revival in labor markets also boded well for this market.

U.S. Log Home Outlook: A November 29, 2004 article in Times reported that, according to the Log Home Council ("LHC") of the National Association of Home Builders, more than 25,000 log homes are built each year, up from about 7,000 in the mid-1980s. Sales in the U.S. and Canada have more than doubled since 1998, to \$1.37 billion. Log homes now account for 7% of the custom-home-building market.

The LHC website also reported that a typical log home built during the 1990s had over 2,000 square feet of living space compared to about 1,100 square feet fifteen years earlier. The pool of mortgage bankers for log home buyers has increased over the last fifteen years as well, although financing for a log home is still more complex than for a conventional site-built one.

One of LHC's goals is to educate consumers about the difference between a log home and a log cabin: "The phrase 'log home' refers to a method of construction,

Edgar Filing: LINCOLN LOGS LTD - Form PRER14C

not a style of house." Costs to build a log home range from \$125 per square foot to more than \$1,000 per square foot. Where once 75% of all log homes were owner-built, today less than 25% of them are. Almost 90% of log homes are their owners' primary residences, and 84% are built in or near metropolitan areas.

LLOG is one of the approximately 50 members of LHC. On LHC's website, the Company is listed alphabetically under "T" as "The Original Lincoln Logs, Ltd."

D. Company Outlook

For its fiscal year ended January 31, 2002, LLOG reported net income of \$1.2 million on revenues of about \$14 million. This was followed by two years of losses as sales rose to nearly \$22 million. LLOG's improved revenues were largely due to its acquisitions, and it did experience some growing pains. Management for the TCHSI division was replaced, the Western Regional Manager's involvement with that division was increased, and a more experienced financial director was hired. Management provided Empire with projections for the Company's fiscal year ending January 31, 2006, showing revenues growing by another \$6 million to \$27.7 million. Operating income is forecast at \$1.5 million and net income, at \$1 million. In Empire's view, the outlook for the housing industry in general and the outlook for log home manufacturers in particular help support management's optimism. Steps have been taken to enhance management and control costs. Overall, Empire believes that the

- 14 -

prospects for LLOG are fair to good. One concern is the Company's financial condition which is discussed in the next section of this report.

Financial Review

LLOG's balance sheets, income statements and statements of cash flow for the last five years are presented in a comparative format in Exhibits A through D attached to this report. In conducting its analysis, Empire studied this financial information as well the audited financial statements included in the Company's SEC filings. Empire was assured by management that the financial condition of the Company and its outlook did not changed materially between January 31, 2005 and the Valuation Date.

For this review, financial ratios for companies similar to LLOG were sought. In doing so, its financial performance was compared with composite statements published in the RMA's 2004-2005 Annual Statement Studies using the closest SIC(footnote 4)/NAICS(footnote 5) available: 2452/321992 (Prefabricated Wood Buildings & Components)(footnote 6). The RMA study provided comparative industry statistical data for companies with year-ends between April 1, 2003 and March 31, 2004. The subgroups selected for this comparison had sales between \$10 million and \$25 million (25 companies) and total assets between \$10 million and \$50 million (17 companies). Please see Exhibit E.

In discussing these statements, trends have been noted and various ratios and indications of financial condition have been calculated. The purpose of this analysis is to identify underlying business phenomena through LLOG's accounting variables and to determine its ability to generate future earnings. Many variables were considered before commenting, but only trends and ratios important to LLOG's earnings capacity are discussed below.

A. Income Statement Analysis

From approximately \$10.3 million in 2001, LLOG's annual revenues more than doubled to \$21.7 million in 2005. The most significant growth occurred in the

Edgar Filing: LINCOLN LOGS LTD - Form PRER14C

(Footnotes)

4. Standard Industrial Classification.

5. North American Industrial Classification System.

6. SIC 2452/NAICS 321992 includes establishments primarily engaged in manufacturing prefabricated wood buildings, sections, and panels. It includes manufacturers of components for prefabricated log cabins.

- 15 -

2004/2005 time frame as the result of various acquisitions which were noted above. Average annual compound increases in LLOG's revenues were 20.4% over the review period.

Apparently due to line item accounting differences in cost of goods sold, LLOG's gross profit margin tended to be higher than those reported by the RMA subsets. Its operating expenses as a percentage of annual sales, on the other hand, were nearly double those of the two industry samples. For 2004 and 2005, LLOG posted operating losses of (1.3%) and (2.4%) of sales, respectively. The median operating margins for the RMA samples were 4.6% and 5.4%.

Other income/(expense) were negligible amounts for LLOG in 2004 and 2005. Therefore, its profit before taxes ("PBT") was negative in each of those years. The RMA groups reported PBTs of 3.7% and 4.5%. Overall, on an unadjusted basis, LLOG's operations were less profitable than was typical of other companies in the same industry classification.

B. Ratio Analysis

Financial ratios may be classified into three types: liquidity and efficiency; leverage and coverage; and profitability and operating. Each of these categories was reviewed to determine how LLOG compared to companies that operate in its industry.

Liquidity & Efficiency Ratios: Liquidity is a measure of the quality and adequacy of a company's current assets to meet its current obligations as they come due. Efficiency ratios measure a company's ability to turn its receivables and inventory into cash.

As can be seen in Exhibit D, LLOG's working capital was negative during the entire review period. Its 2004 and 2005 current ratios were 0.7 times and 0.6 times, respectively, as compared to 1.2 times for both of the RMA subsets. The Company's quick ratios were 0.2 times in 2004 and 2005. The RMA medians were 0.6 times.

LLOG's days' receivable were a surprisingly low 8 days in 2004 and 5 days in 2005 versus the RMA's 25-day median. The Company's inventory, in contrast, turned much slower in 2004 than those of the RMA samples. LLOG's 2005 ratio showed a considerable improvement to 61 days, more in-line with the 56 days for the asset-based sample's median.

- 16 -

Even at 60 days for payables turnover in 2004, LLOG's working capital was negative, as noted. The Company shortened payables to 34 days in 2005, but this was still higher than the 26-day and 23-day medians for the RMA.

Edgar Filing: LINCOLN LOGS LTD - Form PRER14C

Clearly, LLOG's balance sheet demonstrated weaker, if not outright inadequate, liquidity than that of the typical company in its industry as measured by the RMA. On the other hand, the Company has historically operated in this fashion, has not received a going concern opinion from its accountants, has been profitable in some years, and expects to be profitable again.

Leverage & Coverage Ratios: Because highly leveraged companies are more vulnerable to business downturns than are those with lower debt-to-equity positions, leverage ratios are an indication of financial risk. Coverage ratios measure a company's ability to service debt.

None of LLOG's 2004 and 2005 leverage and coverage ratios measured up to the RMA medians. First Pioneer is LLOG's primary lender. Total interest-bearing debt at January 31, 2005 represented 37% of total assets for LLOG. For the RMA groups, the averages were 33% and 26%. The following item is quoted directly from LLOG's January 31, 2005 10KSB:

At January 31, 2005, we were required to achieve a fixed charge coverage ratio of not less than 2.0 to 1.0; achieve a current ratio of not less than 1.0 to 1.0; and to maintain a minimum tangible net worth of \$3,606,298. During Fiscal 2005, the Company failed to meet the financial covenants. Failing to meet these financial covenant constitutes an "event of default" under the terms of the First Pioneer Credit Facility. The Company applied for and received a waiver from First Pioneer with regard to these financial covenants for the fiscal year ended January 31, 2005. There were no other events of default with respect to the First Pioneer Credit Facility at January 31, 2005.

Most of LLOG's debt pays interest at prime and all debt funded by First Pioneer is collateralized with Company assets.

Profitability & Operating Ratios: Profitability and operating ratios help to evaluate a company's use of the resources available to it.

Neither the 2004 nor the 2005 profitability and operating ratios were favorable for LLOG on an unadjusted basis. Return on equity (as measured by PBT divided by tangible net worth) was 15.6% for the RMA's sales-based sample

- 17 -

and 7.9% for the asset-based sample. Return on assets (as measured by PBT divided by total assets) was 6.7% and 2.4% for the two samples, respectively.

C. Financial Summary

LLOG was not profitable in 2005, but it has been so and it is reasonable to expect that it will be again. On the other hand, as of the Valuation Date, it was highly leveraged relative to its industry's norm and its working capital was negative. These factors point to a higher-than-average amount of financial risk, and this has been taken into account in the subsequent valuation analysis.

Valuation of Lincoln Logs Ltd.

The purpose of the valuation section is to incorporate the information considered and/or presented previously into a quantitative representation, thus assigning a value to the ownership privileges of the closely-held entity. The valuation methodology reflects the analyst's expectation of how free and open capital markets would assign value to the economic activities of the business asset under analysis.

A. Valuation Methodologies

Edgar Filing: LINCOLN LOGS LTD - Form PRER14C

There are a number of generally accepted methods in use for valuing a closely-held business asset, none of which is necessarily superior to the others. It is more a question as to which of the methods or combination of methods is best suited to the business, industry, and economic circumstances of the particular company being appraised at a specific valuation date. The purpose of the engagement and the percentage of equity being valued are additional factors to be considered when selecting a valuation method.

The following discussion summarizes the most generally accepted valuation methods.

Discounted Future Income Method: The discounted future income method can use cash flows ("DCF") or earnings ("DFE") as a basis to forecast the income which the business will generate. Thereafter, an aggregate present value is calculated for the future cash flows using a required rate of return known as the discount rate. The strength of this method is that it facilitates the analysis of operational practices and their impact upon the business' value. Its weakness, however, is that it relies heavily upon projections of cash flows or net income which, for some firms, are difficult to make with any accuracy.

- 18 -

This methodology was not applied in valuing LLOG. Management was only able to provide Empire with projections for 2006. This one-year forecast was used in conjunction with an adjusted historical valuation treatment.

Capitalization of Income Method: The capitalization of income method utilizes historical results to determine the value of a company's owners' capital. An income base is first derived, and then divided (i.e., capitalized) by a separately computed required rate of return, or capitalization ("cap") rate. The income base can be defined variously as a company's adjusted earnings, cash flows, or dividends. For the cap rate to be appropriate, it must correspond to the specific inputs used in developing the income base.

Generally, this method is considered a reasonable one to use in valuing a going concern. However, its application weakens when a company's historical income, even when adjusted, is not considered to be a good proxy for that expected in the future.

This methodology was applied in valuing LLOG. On an adjusted basis, the Company's historical performance was deemed indicative of its prospects going forward.

In addition, the capitalization of debt-free income, which is a variant of the capitalization of income, was also explored. A debt-free method assumes that a company's historical income before interest expense provides an adequate base from which to project the income streams that will be available to its total invested capital (i.e., both interest-bearing debt and equity).

A debt-free approach is often applied in situations when: (1) the company has had a significant change in its total invested capital; (2) there is a planned transaction where there will be a significant change in its total invested capital; and/or (3) the company is either highly leveraged or has a relatively low amount of leverage. In applying the debt-free approach, the company's earnings capacity is derived at a level of earnings (i.e., income) that is available to both debt holders and equity holders. The debt-free income base is capitalized with a cap rate that uses the company's weighted average cost of capital ("WACC"). The company's WACC is a blended cost of debt and equity. When the debt-free income base is capitalized, the result is the marketable value of the company's total invested capital. Its aggregate marketable equity value is derived by subtracting the market value of its debt from the value of

Edgar Filing: LINCOLN LOGS LTD - Form PRER14C

its total invested capital.

Our valuation of LLOG's total invested capital employed the Company's adjusted debt-free operating income. After so doing, the Company's equity value basis

- 19 -

was calculated by subtracting the value of its debt from the value derived for its total invested capital.

Guideline Company Method: The objective of the guideline company valuation technique is to identify business entities that have publicly traded securities, and business and financial risks which are comparable to those of the entity being valued. The pricing multiples of the selected public companies are then used to derive a market value for the owners' capital of the company under analysis.

This methodology was not applied in valuing LLOG. Using various databases, including Hoover's and Compustat, Empire was unable to identify any publicly traded companies similar enough to LLOG such that they could be used in valuing the Company. LLOG is unique in that it is a publicly traded log home manufacturer.

Adjusted Net Asset Value Method: Adjusted NAV is a method that focuses primarily on the balance sheet. It requires restatement of the company's assets and liabilities in order to reflect their market values. Application of this method is most useful in determining a fully marketable controlling interest (i.e., enterprise) value. However, the method's relevance generally weakens when valuing a minority or other ownership interest in a going concern which lacks the right to liquidate assets or sell the business. Exceptions are when liquidation of the business is considered highly probable, when the realizable value of its assets equals, or exceeds, the value of its distributions to its owners, or when the company's value is tied directly to the value of its underlying investments.

Adjusted book value ("ABV") is a variant of NAV. It is usually used in the valuation of holding companies whose main assets are publicly traded securities or other investments such as real estate, notes receivable, partnership interests, or equity investments in other business enterprises. ABV is distinguished from the traditional NAV method in that it does not consider the transaction or liquidation costs necessary to realize the cash value of the holding company's underlying assets.

This methodology was applied in valuing LLOG. Log home manufacturing is a capital intensive industry. Therefore, consideration was given to the market value of its assets less the market value of its liabilities. In this instance, Empire regarded it as a worst case scenario for the Company's shareholders and, as such, it provides a floor value.

- 20 -

B. Outline of Valuation Process

After consideration of a number of generally accepted valuation methodologies, Empire elected to use a capitalization of income analysis, and an adjusted book value calculation. A small company rule of thumb based on earnings before interest, taxes, depreciation and amortization ("EBITDA") served to create a sensitivity analysis to gauge the reasonableness of Empire's conclusions. In addition, recent trading prices for the Company's stock were taken into account.

Edgar Filing: LINCOLN LOGS LTD - Form PRER14C

Exhibits F, G, H, and J present the results of Empire's analyses which are discussed in detail below.

C. Capitalization of Income

Modern financial theory holds the value of any asset to be a function of several interrelated factors:

- The stream of benefits the owner of the assets expects to receive;
- The timing of the receipt of these benefits; and
- The risk borne by the owner.

Thus, appraisal methodologies rely on the premise that the value of a business enterprise is equal to the present value of the income which it can expect to generate going forward. From an investor's standpoint, these future income streams represent the dividend-paying (i.e., distribution-paying) capacity of the company or, in the case of a leveraged company, monies available for all invested capital (i.e., interest-bearing debt plus owners' capital).

To value LLOG's income, it is necessary to determine both the income base and the yield which an investor would require in order to purchase an interest in its future distributions. Thereafter, it is simply a matter of dividing the income base by the yield. As noted, this process is referred to as capitalizing.

Derivation of Income Base: Exhibit F contains a capitalization of adjusted historical net income starting from the Company's historical results for 2001 through 2005 and its projected results for 2006. Historical pre-tax income was used as the starting point in each year. Next, the following adjustments were made, including certain non-recurring items and the anticipated improvement in LLOG's operating income:

- 21 -

- Management estimated that the Company disbursed at least \$240,000 per year in fees related to SEC filings. Therefore, this figure was added back to pre-tax income.

- In 2004, S,G&A expenses (excluding commission expense) were unusually high as a percentage of sales primarily due to non-recurring acquisition activities. Therefore, the actual figure reported for S,G&A was added back and a more normalized percentage, based on 2005 numbers, was deducted.

The adjusted results were weighted in several ways. First, the adjusted figure for 2001 was excluded from the computations because it was unusually low and not considered as indicative of the Company's ongoing earning power. Secondly, the 2005 loss was given a weight of 1.0 times in all the scenarios. The results for 2005 represented the Company's worst over the review period. Empire did not feel that it should be disregarded since (1) it captures some of the difficulties involved in assimilating LLOG's acquisitions and (2) it is, in fact, the latest actual reported year. However, the Company has been profitable and there is a reasonable expectation that it will be so again. After reviewing the results of the various scenarios, \$850,000 was selected as a reasonable proxy for LLOG's ongoing pre-tax earning power, its normalized earnings base.

LLOG's pre-tax earnings base was tax-affected using a marginal tax rate of 39%. The Company's after-tax earnings base thus becomes \$518,925. Again, see Exhibit F. It assumed that the Company's capital expenditures and depreciation expense will offset one another over the long-term, and therefore, the earnings

Edgar Filing: LINCOLN LOGS LTD - Form PRER14C

base is equivalent to LLOG's cash flow.

Derivation of Capitalization Rate: The cap rate represents the required rate of return which an investor would demand at a point in time in order to hold equity in a company under study. This rate accounts for the risks inherent in a company's capital. The build-up method was utilized, described below, to derive a cap rate for LLOG's equity.

One source for equity rates of return is the firm Ibbotson Associates ("Ibbotson"); it performs annual studies of marketable minority interests in publicly traded equity securities. According to Ibbotson's studies, the expected return of the market (specifically the S&P 500) in excess of the risk-free rate (arithmetic mean) has been 7.0%, based on a study of actual returns from January 1926 to December 2003. Ibbotson also identifies a small-company

- 22 -

premium based on a market value-weighted index of micro capitalization stocks (non-beta adjusted) which trade on the NYSE, the AMEX and the NASDAQ. This latter 6.6% premium recognizes that equity holders demand higher returns from companies which are riskier by virtue of their smaller revenue base and capitalization. Since the risk-free rate (using twenty-year Treasuries as a proxy) was 4.78% at the Valuation Date, the total required return for small capitalization companies was 18.38%.

In our opinion, an addition must be considered for application to this 18.38% rate of return for small public companies, so as to reflect LLOG's industry and company-specific risk. This risk premium adjustment recognizes the highly competitive nature of the Company's industry and its high leverage, as well as LLOG's small capitalization relative to those of the companies included in the Ibbotson study. Offsetting these factors are the Company's historical profitability, its projected improvement, and the favorable outlook for its industry. For LLOG, it is our opinion that a net risk premium of (1.0%) is warranted to reflect its industry and company-specific risk at the Valuation Date.

Taking all of these factors into account, the required rate for LLOG's equity may be built-up as follows:

Table I
Equity Discount Rate

Investment Return Component	Rate of Return
Add: Risk-Free Rate (LT U.S. Treasuries at 2/28/2005)	4.78%
Generic Equity Premium	7.00
Small Stock Risk Premium	6.60
Industry & Company-Specific Risk Premium	(1.00)
Equity Discount Rate	17.38%

Conclusion of Value: To calculate the value for LLOG, the Company's income base was capitalized (i.e., divided) using the Gordon Growth Model. The Gordon Growth Model can be expressed by the formula presented below:

$$V = \frac{I \times (1 + g)}{(r - g)}$$

Where:

V = Value of equity

I = Adjusted income base

Edgar Filing: LINCOLN LOGS LTD - Form PRER14C

g = Expected growth rate

r = Required rate of return (discount rate)

- 23 -

Based upon this analysis and Value Line's long-term forecasts for inflation, 4% was selected as a reasonable long-term growth expectation for LLOG. Inserting the various rates and adjusted cash flows into this formula results in the following:

$$\frac{\$850,000 \times (1 + .04)}{(.1738 - .04)}$$

This calculation yielded a value for LLOG of \$4,030,000. Again, see Exhibit F.

D. Capitalization of Debt-Free Income

As noted earlier, the capitalization of debt-free income is a variant of the capitalization of income, a method which assumes that a company's historical income before interest expense provides an adequate base from which to project the income streams that will be available to its total invested capital (i.e., both interest-bearing debt and equity).

Derivation of Debt-Free Income Base: Exhibit G contains a capitalization of adjusted historical debt-free net income starting from the Company's historical results for 2001 through 2005 and its projected results for 2006. Historical pre-tax income was used as the starting point in each year. The same income adjustments were made as in the capitalization of income analysis above. In addition, however, the Company's interest expense was added back as well.

Next, the same weightings for the various scenarios were used as previously and for the same reasons. From these results, \$900,000 was selected as a reasonable pre-tax debt-free income base. This figure was also tax-affected at 39%. The adjusted, debt-free, normalized net income base becomes \$549,450. See Exhibit G.

Derivation of Required Rate of Return: The appropriate required rate of return on all invested capital is the WACC. Development of a WACC requires that the cost of debt and the cost of equity for the company be derived separately.

Cost of Equity: The cost of equity was built up in the manner described above. Thus, the equity discount rate is 17.38%.

Cost of Debt: Having derived the discount rate that would be demanded by an equity holder, the Company's cost of debt was estimated. As noted, most of LLOG's debt carries interest at prime, although it does have some debt at higher rates, up to 7.9%. Based on Empire's analysis of LLOG, Value Line's long-term estimate of prime at 7.0% was selected as the Company's cost of debt. After tax, LLOG's effective cost of debt becomes 4.27%. $(7.0\% \times (1 - .39))$

- 24 -

Weighted Average Cost of Capital: The WACC for LLOG was calculated by using the required rates of return derived from the entity's equity and debt, and an assumed market value for its capital structure of 50% equity to 50% debt. Given 17.38% and 4.27% as the respective costs of equity and debt, the WACC is calculated to be 10.83% as shown below:

Edgar Filing: LINCOLN LOGS LTD - Form PRER14C

Table II
Weighted Average Cost of Capital

	Assumed Required Rate	Weighting	Average
	-----	-----	-----
Equity	17.83%	50%	8.69%
Debt	4.27%	50%	2.14%

WACC			10.83%

Conclusion of Value: The normalized debt-free net income figure was capitalized using the Gordon Growth Model. See Exhibit G. The result of this calculation is a value of \$8,403,353 for total invested capital available to equity holders and debt holders. Therefore, in order to determine the value of the Company's equity, the debt outstanding, \$4,323,633, is subtracted. The concluded fair value was \$4,080,000.

E. Adjusted Book Value

As discussed above, a willing buyer would typically assess the value of LLOG's capital on the basis of its underlying assets. Thus, it is reasonable to utilize ABV as a valuation method. By definition, this methodology should be based on going concern value, not on the assumption of business liquidation. In reality, though, holders of non-controlling ownership interests can only receive their pro rata share of Company's assets if it is liquidated.

Adjusted Book Value: Book value, unadjusted, is another name for the shareholders' equity account as it appears on the balance sheet. Again, ABV as a willing buyer would assess it involves determining the value of a company's bundle of assets, less its liabilities, but before transaction costs.

This analysis began by using the Company's January 31, 2005 balance sheet. In doing so, each asset and liability was assessed to determine its estimated market value as of the Valuation Date. The following adjustments were made:

- The fair market value of the Company's land, buildings and improvements were provided by Mr. Christopher Truso of First Pioneer. He stated that the figures were based on appraisals conducted for lending purposes. The cost-basis book value of these assets, \$3,926,347, was reduced by \$1,456,347 to \$2,470,000.

- 25 -

- The cost-basis book value of the Company's machinery and equipment was conservatively reduced by 10% to \$1,862,594 based on Empire's discussions with management.

- The cost-basis book value of LLOG's furniture and fixtures was reduced by 50%, again, based on discussions with management. This estimate is felt to be conservative since nearly all of these items are typical office furnishings which would fetch considerably less in a sale. Empire specifically inquired about the existence of any luxury, antique or art furnishings and was told there were none.

- Based on discussions with management, the cost-basis book value of transportation equipment was reduced by 30% to \$436,503. The transportation equipment is typical of that for the industry in general. There are no luxury, personal, or collector's vehicles in the mix.

- The book value of goodwill and other intangible assets was eliminated as they

Edgar Filing: LINCOLN LOGS LTD - Form PRER14C

can not actually be transferred or sold.

After all adjustments, the Company's ABV can be stated at \$600,000. See Exhibit H.

F. Rule of Thumb

Rules of thumb are popular as a valuation tool primarily because they are easy to use. Empire consulted the Handbook of Small Business Valuation Formulas and Rules of Thumb by Glenn Desmond; this is a well-known source among business appraisers. There were, unfortunately, no examples for companies like LLOG. Nevertheless, appraisers frequently will refer to a rule of thumb, if it appears to be an industry standard, to gauge the reasonableness of valuation opinions obtained through more rigorous methods (footnote 8). EBITDA multipliers are some of the most often cited measures. Although Empire could not explicitly locate a

(Footnotes)

8. A rule of thumb is usually, in practice, a guideline company method since it relies on transaction knowledge specific to small businesses. There do, nevertheless, exist rules of thumb for large businesses as well. E.g. when the cellular telephone business was a newcomer, transactions were often based on a POP (price per population in a subscriber area), and it remains a popular yardstick in that industry. In fact, deviations from a broadly accepted rule of thumb usually require a valuation expert to explain, in detail, why the particular case does not fall within an "expected range."

- 26 -

rule of thumb for LLOG's industry, we did consider some statistics from Pratt's Stats, a database of transactions, generally of small companies. (Mergerstat by FactSet was also consulted but yielded no usable information.) LLOG would at best be considered a micro cap company; its market capitalization is smaller than that of the smallest companies used in the Ibbotson studies.

Exhibit J presents some of the data from Pratt's Stats for SIC 2452/NAICS 321992. The MVIC to EBITDA multiples span a broad range, but there is a cluster around 4.5 times to 5.5 times. It therefore seemed reasonable to at least conduct a sensitivity analysis using a small company rule of thumb based on EBITDA multiples of 5.0 times to 6.0 times. Since the multiples selected by Empire are slightly above the cluster, these calculations represent a conservative viewpoint. This means that, if the values derived via other methodologies fall within the range, it will help mitigate concerns that LLOG's stock has been either overvalued or undervalued. It is Empire's experience that, unless the subject company is in a "hot" industry or market, its EBITDA multiple will tend to fall within a range of 4 times to 7 times.

Exhibit I presents the sensitivity analysis. The adjusted pre-tax income and the weightings used to create a normalized earnings base for use with the rule of thumb are identical to those used in the two capitalization of income calculations. Since the selected multiples are for EBITDA, (1) LLOG's depreciation and amortization for each year were added to the base and (2) no income tax calculation was imputed. The small company multiple was applied to each potential EBITDA base and LLOG's debt was subtracted. The resulting equity values ranged from a low of \$1,455,901 to a high of \$4,115,595, with a median of \$2,634,293 and an average of \$2,829,386. The \$4,030,000 value from the capitalization of income calculations was at the upper end of the sensitivity analysis range, as was the \$4,080,000 from the capitalization of debt-free income. The Company's trading history (discussed below) also arrived at a value toward the upper end of the range. Not surprisingly, the \$600,000

Edgar Filing: LINCOLN LOGS LTD - Form PRER14C

ABV was below the low end of the range; it is, as noted, considered by Empire to be a worst case value.

The values derived for LLOG using other methodologies fall well within the range shown and moreover, toward the upper end of it, based on Empire's rule of thumb computations. The exception is the ABV which, as noted, is a worst case scenario.

G. Historical Trading Data

One of the guidelines included in Revenue Ruling 59-60 is actual trading history. For the trailing 12 months ended with the Valuation Date, Yahoo!Finance reported only 59 trades of a total of 149,753 shares.

- 27 -

See Exhibit K. The maximum price during this time was \$1.01 per share and the minimum was \$0.40 per share. The most recent price was \$0.44 per share. There were only 6 reported trades within the last 30 days. The weighted average price per share in the last 30 days was \$0.67, but it was skewed by a larger-than-average trade of 10,000 shares on February 23, 2005. Empire was unable to locate any rationale for this spike in LLOG's share price, but the price declined again quickly. In sum, the scant trading history of LLOG implies that it is not a true reflection of fair value. Nevertheless, it was considered in arriving at a conclusion of fair value for LLOG.

The Company's issued and outstanding shares totaled 9,040,059 as of the Valuation Date. Based on the most recent share price of \$0.44 per share, the value of 9,040,059 shares equals \$3,977,626.

H. Summary of Values

The table below summarizes the range of values derived for LLOG.

Table III
Summary of Value Range

Method	Value
Capitalization of Income	\$4,030,000
Capitalization of Debt-Free Income	\$4,080,000
Adjusted Book Value	\$600,000
Trading History	\$3,977,626

In the final analysis, valuation of privately held or thinly traded companies is as much art as science; it relies on the expert's judgment. From within a reasonable range of values and considering all factors that went into the valuation, the valuation expert selects a final figure. Based on all factors considered in this valuation, it is Empire's opinion that the aggregate fair value of LLOG is found to be reasonably stated at \$4,000,000 as of the Valuation Date.

- 28 -

Valuation Summary

Given the foregoing review and analysis, and subject to the attached Statement of Limiting Conditions, it is our opinion that the aggregate fair value of Lincoln Logs Ltd. is reasonably stated as \$4,000,000 as of March 18, 2005, for a proposed reverse stock split and the resultant deregistration of the Company's

Edgar Filing: LINCOLN LOGS LTD - Form PRER14C

common stock under the Securities Exchange Act of 1934.

Respectfully submitted,

Addendum 1

STATEMENT OF LIMITING CONDITIONS

Litigation Support: Depositions, expert testimony, attendance in court, and all preparations/support for same, arising from this appraisal shall not be required unless arrangements for such services have been previously made.

Management: The opinion of value expressed herein assumes the continuation of prudent management policies over whatever period of time is deemed reasonable and necessary to maintain the character and integrity of the appraised business entity as a going concern.

Information and Data: Information supplied by others that was considered in this valuation is from sources believed to be reliable, and no further responsibility is assumed for its accuracy. Information used was limited to that available on or before the Valuation Date, or which could be reasonably ascertained as of that date. We reserve the right to make such adjustments to the valuation herein reported as may be required by consideration of additional or more reliable data that may become available subsequent to the issuance of this report.

Purpose: All opinions of market value are presented as Empire Valuation Consultants, LLC's considered opinion based on the facts and data obtained during the course of the appraisal investigation. We assume no responsibility for changes in market conditions which might require a change in appraised value. The value conclusion derived in this appraisal was for the specific purpose and date set forth in this appraisal and may not be used for any other purpose.

Fee: The fee established for the formulation and reporting of these conclusions is not contingent upon the value or other opinions presented.

Interest: Neither the appraiser nor any officer or employee of Empire

Edgar Filing: LINCOLN LOGS LTD - Form PRER14C

Valuation Consultants, LLC has any interest in the property appraised.

Unexpected Conditions: We assume that there are no hidden or unexpected conditions of the assets valued that would adversely affect value.

Non Appraisal Expertise: No opinion is intended for matters which require legal or specialized expertise, investigation or knowledge, beyond that customarily employed by appraisers.

Hazardous Substances: Hazardous substances, if present within the facilities of a business, can introduce an actual or potential liability that will adversely affect the marketability and value of the business or its underlying assets. In the development of our opinion of value, no consideration has been given to such liability or its impact on value unless otherwise indicated in the report.

Addendum 2

CERTIFICATION OF APPRAISERS

We the appraisers certify that, to the best of our knowledge and belief:

1. Our analyses, opinions, and conclusions were developed, and this report has been prepared, in conformity with the Uniform Standards of Professional Appraisal Practice.
2. All statements of fact contained in this report are true and correct.
3. The reported analyses, opinions, and conclusions are limited only by the reported assumptions and limiting conditions, and are our personal, unbiased professional analysis, opinions, and conclusions.
4. The professional fee paid to Empire for the preparation of this report is not contingent upon the opinion of value stated herein.
5. Neither Empire nor any of its employees has, to the best of our knowledge, a present or intended financial interest in either the entity being valued or in any affiliates that may exist.
6. No one provided significant professional assistance to the persons signing this report, unless specifically stated herein.

The American Society of Appraisers has a mandatory recertification program for all of its Accredited Senior Appraisers. The senior members signing below, designated by the "ASA," are in compliance with that program.
