This information is being provided under Item 12 of Form 8-K.

The Company today issued the following press release:

First National Lincoln Corporation Reports Record Earnings,
Up 8.7% Year-to-Date

DAMARISCOTTA, ME., July 15 - First National Lincoln Corporation (Nasdaq NM: FNLC), today announced earnings per share of \$1.37 on a fully diluted basis for the six months ended June 30, 2003, an increase of \$0.11 or 8.7% over the \$1.26 reported for the same period in 2002. Net income for the first six months of 2003 was \$3,408,000, an increase of \$289,000 or 9.3% over the \$3,119,000 posted in 2002. Both earnings per share and net income reported by the Company for 2003 set new records for the first six months of the year.

The Company also announced earnings per share of \$0.70 on a fully diluted basis for the quarter ended June 30, 2003, an increase of \$0.04 or 6.1% over the \$0.66 reported for the same period in 2002. Net income for the second quarter was \$1,729,000, an increase of \$83,000 or 5.0% over the \$1,646,000 posted in the second quarter of 2002. Both earnings per share and net income reported by the Company for 2003 set new single-quarter records.

Year-to-date change on the balance sheet showed total assets at \$531.1 million on June 30, 2003 - an increase of 7.5% over December 31, 2002. Loans totaled \$367.9 million, up 10.8% over December 31, 2002, while investments increased by 5.1% to \$128.3 million. Deposits of \$359.0 million were up 7.4% over year end. As of June 30, 2003, First National Lincoln Corporation had total equity of \$45.6 million, an increase of 6.8% or \$2.9 million over December 31, 2002.

"I am happy to report another record quarter as well as record earnings for the first six months," commented the Company's President and Chief Executive Officer, Daniel R. Daigneault. "Our second-quarter income of \$1,729,000 eclipses the previous single-quarter record of \$1,699,000 set in the fourth quarter of 2002. Balance sheet growth has been the key driver of this performance - not only in the loan portfolio, but also with investments and deposits. At the same time, asset quality remains excellent, with past-due loans at the lowest levels we have seen in many years and the percentage of non-performing assets to total assets down slightly from year end.

"For many other banks, generating quality loan growth has been challenging in 2003," President Daigneault continued, "however, that has not been the case for us. Portfolio loans have increased \$35.8 million or 10.8% since December 31, 2002, and the majority of this growth has been in commercial loans - up \$17.4 million - as well as home equity loans - up \$12.0 million. The current record-low interest rate environment has resulted in exceptionally high levels of mortgage origination due to refinancing of existing mortgages, and in the first six months of 2003 we originated nearly the same volume of mortgages that we did for the entire year in 2002. A large portion of the mortgage production was sold, and secondary market loans posted a net increase of \$11.9 million or 16.4% since December 31, 2002. In addition, our portfolio mortgage loans saw a net increase of \$6.0 million or 4.2% during the same period."

"Although we experienced a decline in net interest income during the first six months of 2003 compared to the first six months of 2002, this was more than made up for in non-interest income," noted F. Stephen Ward, the Company's Treasurer and Chief Financial Officer. "While balance sheet growth is very important to us, our primary focus in managing the Company is long-term, not short-term. Since we have had excellent growth in both commercial and home equity loans this year, we opted to sell the majority of our fixed-rate

Edgar Filing: FIRST NATIONAL LINCOLN CORP /ME/ - Form 8-K

mortgage production to the secondary market, allowing us to effectively manage interest rate risk. As a result, we were able to replace the shortfall in net interest income with non-interest income arising from the sale of these mortgage loans.

"Similar to many other banks, margin compression has been the other factor impacting net interest income in 2003," Mr. Ward continued. "This compression was anticipated, and assuming that interest rates remain at record low levels, we expect our margins will begin to widen as we reprice a significant volume of liabilities downward."

"This was also a good quarter for our shareholders," President Daigneault concluded. "Following the pattern established for more than seven years, our cash dividend increased again by another \$0.01 to \$0.28 per share per quarter. This results in an annual dividend of \$1.12 per share and in turn produces an annual dividend yield of 2.9% based on the June 30, 2003 closing price of \$39.18. At the same time, our stock increased in value by 24.5% or \$7.70 from the December 31, 2002 closing price of \$31.48 per share. In our opinion, the combination of all the factors presented here - strong earnings, asset growth, excellent credit quality, as well as our stock price and dividend yield - reinforce the attractiveness of FNLC as an investment."

First National Lincoln Corporation, headquartered in Damariscotta, Maine, is the holding company for The First National Bank of Damariscotta and Pemaquid Advisors. The First is an independent community bank serving Mid-Coast Maine with seven offices in Lincoln and Knox Counties that provide consumer and commercial banking products and services. Pemaquid Advisors provides investment advisory, private banking and trust services from offices in Damariscotta, Boothbay Harbor, and Portland, Maine.
