HICKORY TECH CORPORATION  
(Exact name of registrant as specified in its charter)

Minnesota  
(State or other jurisdiction of  
incorporation or organization)

41-1524393  
(I.R.S. Employer  
Identification No.)

221 East Hickory Street  
Mankato, Minnesota 56002-3248  
(Address of principal executive offices and zip code)

(800) 326-5789  
(Registrant's telephone number, including area code)

Indicate by check mark whether the Registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the Registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes  No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to

Edgar Filing: HICKORY TECH CORP - Form 10-Q

submit and post such files). Yes  No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See the definition of "large accelerated filer, accelerated filer, and smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer  Accelerated filer  Non-accelerated filer  Smaller reporting company

Indicate by check mark whether the Registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes  No

The total number of shares of the Registrant's common stock outstanding as of October 28, 2011: 13,379,816.

HICKORY TECH CORPORATION

September 30, 2011

Item 1. Condensed Notes to Consolidated Financial Statements (Unaudited)

Note 1. Basis of Presentation and Consolidation

The accompanying unaudited condensed consolidated financial statements of HickoryTech Corporation and its subsidiaries have been prepared in accordance with accounting principles generally accepted in the United States (GAAP) for interim financial information and with the rules and regulations of the Securities and Exchange Commission (SEC). Certain information and disclosures normally included in annual financial statements prepared in accordance with GAAP have been omitted or condensed pursuant to such rules and regulations. In the opinion of management, the unaudited condensed consolidated financial statements reflect all adjustments (consisting only of normal and recurring accruals) considered necessary for the fair presentation of the financial statements and present fairly the results of operations, financial position, and cash flows for the interim periods presented as required by Regulation S-X, Rule 10-01. These unaudited interim condensed consolidated financial statements should be read in conjunction with the consolidated financial statements and notes thereto, together with our audited consolidated financial statements and notes thereto contained in our Annual Report on Form 10-K for the year ended December 31, 2010.

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenue, expenses and related disclosures at the date of the financial statements and during the reporting period. Actual results could differ from these estimates. The results of operations for the interim periods presented are not necessarily indicative of the results that may be expected for the fiscal year as a whole or any other interim period.

Our consolidated financial statements include HickoryTech Corporation and its subsidiaries in the following two business segments: the Business Sector and the Telecom Sector. All inter-company transactions have been eliminated from the consolidated financial statements.

Cost of Sales (excluding depreciation and amortization)

Cost of sales for the Business Sector includes costs associated with the installation of products for customers. These costs are primarily for equipment and materials. Labor associated with installation work is not included in this category, but is included in cost of services (excluding depreciation and amortization) described below.

Cost of Services (excluding depreciation and amortization)

Cost of services includes all costs related to delivery of communication services and products for all sectors. These operating costs include all costs of performing services and providing related products including engineering, customer service, billing and collections, network monitoring and transport costs.

Selling, General and Administrative Expenses

Selling, general and administrative expenses include direct and indirect selling expenses, advertising and all other general and administrative costs associated with the operations of the business.

Depreciation Expense

Depreciation expense is determined using the straight-line method based on the lives of various classes of depreciable assets. Business and Telecom Sector depreciation is entirely associated with services revenue.

Table of Contents

Recent Accounting Developments

In September 2011, the FASB issued new guidance related to testing of goodwill for impairment. The amendment allows a company to first assess qualitative factors to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount to determine whether it is necessary to perform the two-step goodwill impairment test. This amendment becomes effective for annual and interim goodwill impairment tests performed for fiscal years beginning after December 15, 2011. We do not believe this will have a material impact on our disclosures or consolidated financial statements.

In June 2011, the FASB issued new guidance related to the presentation of comprehensive income. The guidance requires that all non-owner changes in stockholder's equity be presented either in a single continuous statement of comprehensive income or in two separate but consecutive statements and eliminates the option for companies to present components of other comprehensive income as part of the statement of changes in stockholder's equity. It also requires reclassification adjustments and the effect of those adjustments on net income and other comprehensive income to be presented on the face of the financial statement where the components of net income and other comprehensive income are presented. This guidance is effective for fiscal years, and interim periods within those years, beginning after December 15, 2011. We do not believe this will have a material impact on our disclosures or consolidated financial statements.

In May 2011, the FASB issued new guidance related to fair value measurement. The purpose of this guidance is to achieve commonality between US GAAP and IFRS pertaining to fair value measurement and disclosure requirements. It changes certain fair value measurement principles and enhances the disclosure requirements particularly for Level 3 fair value measurements. The amendment becomes effective for annual periods beginning after December 15, 2011. We do not believe this will have a material impact on our disclosures or our consolidated financial statements.

In January 2010, the FASB issued new guidance related to disclosures about the transfer in and out of levels 1 and 2 and the activity in level 3 fair value measurements. It also clarifies disclosures about the level of disaggregation, inputs and valuation techniques. Our adoption of this guidance, which was effective in Q1 2010 except for the new requirements relating to a Level 3 activity, did not have a material impact on our disclosures. Our adoption of the Level 3 requirements on January 1, 2011 did not have a material impact on our disclosures.

In the first quarter of 2011 we adopted new guidance for separating consideration in multiple-deliverable arrangements. This guidance addresses how to determine whether an arrangement involving multiple deliverables contains more than one unit of accounting and how the consideration should be allocated among the separate units of accounting. We have multiple-deliverable arrangements with several units of accounting within our Business and Telecom Sectors which are described below. The adoption of this guidance did not have a material impact on our financial statements.

Business Sector (This is a discussion of multi-deliverable arrangements only. It does not attempt to describe all types of service agreements available within our Business Sector.) Multiple-deliverable arrangements primarily include the sale of Cisco communications equipment and associated support contracts, along with professional services providing design, configuration, and installation consulting. Cisco equipment, maintenance contracts and professional services all meet the criteria to qualify as separate units of accounting. We utilize Cisco list prices as third party evidence for standalone value for our equipment and support contracts. We analyze professional services billings quarterly to determine vendor-specific objective evidence of selling price. We calculate the median of all services performed on a standalone basis and consider fair value of professional services performed as part of a multiple element arrangement to be any rate that is within 15% of the median.

Table of Contents

In instances where we sell Cisco voice and data communications equipment with no installation obligations (equipment only sales), all warranty obligations reside with Cisco. Therefore, revenue is recognized when the equipment is delivered to the customer site. In instances where we sell Cisco voice and data communications equipment with installation obligations, terms of the agreements typically provide for installation services without customer-specific acceptance provisions and we recognize revenue for the equipment when title passes to the customer and services revenue when work is performed based on the relative fair value of the element being sold on a stand-alone basis. For contracts with customer specific acceptance provisions, we recognize revenue upon formal customer acceptance for the elements for which the acceptance provisions apply assuming that all other revenue recognition criteria have been met. Support contracts state that Cisco will provide all support services and therefore revenue is recognized immediately. Support services also include “24x7” support of a customer’s voice and data systems. Most of these contracts are billed on a time and materials basis and revenue is recognized either as services are provided or over the term of the contract. Support services also include professional support services, which are typically sold on a time and materials basis but may be sold as a pre-paid block of time.

Telecom Sector (This is a discussion of multi-deliverable arrangements only. It does not attempt to describe all types of service agreements available within our Telecom Sector.)

Our Telecom Sector markets competitive service bundles which may contain several deliverables. Our base bundles consist of voice services including a business or residential phone line, features and long distance. Customers may choose to add additional services including internet, digital subscriber line (DSL) and digital/IP TV services to the base bundle packages. Separate units of accounting within the bundled packages include voice services, internet, DSL and digital or IP TV services. Revenue for services included in our bundles are recognized over the same service period which is the time period in which service is provided to the customer, creating no overall impact on the Telecom Sector operating revenue. Service bundle discounts are recognized concurrently with the associated revenue and are allocated to the various services in the bundled offering based on the relative selling price of the services included in each bundled combination.

We reviewed all other significant newly issued accounting pronouncements and determined they are either not applicable to our business or that no material effect is expected on our financial position, results of operations or disclosures.

## Note 2. Earnings and Cash Dividends per Common Share

Basic earnings per share (EPS) are computed by dividing net income by the weighted average number of shares of common stock outstanding during the applicable period. Shares used in the EPS dilution calculation are based on the weighted average number of shares of common stock outstanding during the period increased by potentially dilutive common shares. Potentially dilutive common shares include stock options and stock subscribed under the HickoryTech Corporation Amended and Restated Employee Stock Purchase Plan (ESPP). Dilution is determined using the treasury stock method.

	Three Months Ended September 30		Nine Months Ended September 30	
(Dollars in thousands, except share and earnings per share amounts)	2011	2010	2011	2010
Net Income	\$ 2,971	\$ 5,043	\$ 7,807	\$ 9,980
Weighted average shares outstanding	13,394,225	13,263,600	13,363,874	13,215,046
Stock options (dilutive only)	13,310	1,396	11,272	2,279
Stock subscribed (ESPP)	1,879	-	1,115	-

Earnings per share:				
Basic and Diluted	\$ 0.22	\$ 0.38	\$ 0.58	\$ 0.76
Dividends per share	\$ 0.135	\$ 0.13	\$ 0.405	\$ 0.39

8

---

Table of Contents

Options to purchase 179,250 and 316,700 for the three months ended September 30, 2011 and 2010, respectively and 195,250 and 316,700 for the nine months ended September 30, 2011 and 2010 were not included in the computation of diluted EPS, because their effect on diluted EPS would have been anti-dilutive.

Cash dividends are based on the number of common shares outstanding at their respective record dates. The number of shares outstanding as of the record date for the first three quarters of 2011 and 2010, respectively, are as follows:

Shares outstanding on record date	2011	2010
First quarter (Feb. 15)	13,311,817	13,120,514
Second quarter (May 15)	13,358,971	13,223,197
Third quarter (August 15)	13,383,012	13,244,504

Dividends per share are based on the quarterly dividend per share as declared by the HickoryTech Board of Directors. HickoryTech paid dividends of \$0.135 and \$0.13 per share in the third quarter of 2011 and 2010, respectively. During the first nine months of 2011 and 2010, shareholders have elected to reinvest \$204,000 and \$181,000, respectively, of dividends into HickoryTech common stock pursuant to the HickoryTech Corporation Dividend Reinvestment Plan.

In September 2011, we did acquire and retire 36,248 shares. Details of the transactions can be found in Part II, Item II.

### Note 3. Accumulated Other Comprehensive Income (Loss)

In addition to net income, our comprehensive income includes changes in the market value of the cumulative unrealized gain or loss, net of tax, on financial derivative instruments qualifying and designated as cash flow hedges and unrecognized Net Periodic Benefit Cost related to our Post-Retirement Benefit Plans. Additional information on our interest-rate swap agreements, which are classified as financial derivative instruments, can be found under Note 10. "Financial Derivative Instruments." Comprehensive income for the three months ended September 30, 2011 and 2010 was \$2,197,000 and \$5,095,000 respectively, in relation to reported net income of \$2,971,000 and \$5,043,000. Comprehensive income for the nine months ended September 30, 2011 and 2010 was \$7,022,000 and \$10,451,000, respectively in relation to reported net income of \$7,807,000 and \$9,980,000. The following summary sets forth the components of accumulated other comprehensive income (loss), net of tax.

	Unrecognized Net Actuarial Loss (1)	Unrecognized Prior Service Credit (1)	Unrecognized Transition Asset (1)	Unrecognized Unrealized Gain/(Loss) Derivatives on	Accumulated Other Comprehensive Income/(Loss)
(Dollars in thousands)					
December 31, 2010	\$ (3,651 )	\$ 180	\$ (73 )	\$ (651 )	(4,195 )
2011 Q1 Activity				204	204
Q1 Net Periodic Benefit Cost	64	(8 )	9		65
March 31, 2011	\$ (3,587 )	\$ 172	\$ (64 )	\$ (447 )	(3,926 )
2011 Q2 Activity				(345 )	(345 )
Q2 Net Periodic Benefit Cost	64	(8 )	9		65
June 30, 2011	\$ (3,523 )	\$ 164	\$ (55 )	\$ (792 )	(4,206 )
2011 Q3 Activity				(839 )	(839 )
Q3 Net Periodic Benefit Cost	64	(8 )	9		65
September 30, 2011	\$ (3,459 )	\$ 156	\$ (46 )	\$ (1,631 )	(4,980 )

(1) Amounts pertain to our post-retirement benefit plans.

Note 4. Fair Value of Financial Instruments

The fair value of our long-term obligations, after deducting current maturities, is estimated to be \$124,261,000 at September 30, 2011 and \$116,483,000 at December 31, 2010, compared to carrying values of \$119,169,000 and \$114,067,000, respectively. The fair value estimates are based on the overall weighted average interest rates and maturity compared to rates and terms currently available in the long-term financing markets. Our financial instruments also include cash equivalents, trade accounts receivable and accounts payable for which current carrying amounts approximate fair market value.

Table of Contents

## Note 5. Inventories

Inventory includes parts, materials and supplies stored in our warehouses to support basic levels of service and maintenance as well as scheduled capital projects and equipment awaiting configuration for customers. Inventory also includes parts and equipment shipped directly from vendors to customer locations while in transit and parts and equipment returned from customers which is being returned to vendors for credit, as well as maintenance contracts associated with customer sales which have not yet transferred to the customer. The inventory value in the Business Sector, comprised of finished goods in transit to customers as of September 30, 2011 and December 31, 2010 was \$4,152,000 and \$3,460,000, respectively. The inventory level in the Business Sector is subject to the variations in the equipment revenue and the timing of individual customer orders. The inventory value in the Telecom Sector, comprised of raw materials, as of September 30, 2011 and December 31, 2010 was \$1,772,000 and \$1,745,000, respectively.

We value inventory using the lower of cost (perpetual weighted average-cost or specific identification) or market method. We make estimates related to the valuation of inventory. We adjust our inventory carrying value for estimated obsolescence or unmarketable inventory to the estimated market value based upon assumptions about future demand and market conditions. As market and other conditions change, we may establish additional inventory reserves.

## Note 6. Goodwill and Other Intangible Assets

We have goodwill in two of our reporting units. In our Business Sector, we have \$4,255,000 of goodwill carrying value as of September 30, 2011, resulting from our acquisition of Enventis Telecom in 2005 and our acquisition of CP Telecom in 2009. In our Telecom Sector, we have \$23,048,000 of goodwill carrying value as of September 30, 2011, resulting from our acquisition of Heartland Telecommunications in 1997.

We test acquired goodwill for impairment annually using a fair value approach. We also test goodwill for impairment between annual tests if an event occurs or circumstances change that would more likely than not reduce the fair value of an entity below its carrying value. We completed our annual impairment test for acquired goodwill as of December 31, 2010, which resulted in no impairment charges to goodwill. In the first nine months of 2011, there was no event or change in circumstance that would have more likely than not reduced the fair value below its carrying value.

Intangible assets with finite lives are amortized over their respective estimated useful lives to their estimated residual value. Identifiable intangible assets that are subject to amortization are evaluated for impairment. The components of other intangible assets are as follows:

(Dollars in thousands)	Useful Lives	As of September 30, 2011		As of December 31, 2010	
		Gross Carrying Amount	Accumulated Amortization	Gross Carrying Amount	Accumulated Amortization
<b>Definite-Lived Intangible Assets</b>					
Customer relationships	1 - 8 years	\$ 5,299	\$ 4,692	\$ 5,299	\$ 4,532
Other intangibles	1 - 5 years	2,830	1,034	2,830	929
<b>Total</b>		<b>\$ 8,129</b>	<b>\$ 5,726</b>	<b>\$ 8,129</b>	<b>\$ 5,461</b>

We periodically reassess the carrying value, useful lives and classifications of identifiable assets. Amortization expense related to the definite-lived intangible assets was \$265,000 and \$268,000 for the nine months ended September 30, 2011 and 2010, respectively. Total estimated amortization expense for the remaining three months of 2011 and the five years subsequent to 2011 is as follows: 2011 (October 1 – December 31) – \$89,000; 2012 - \$354,000;

2013 - \$354,000; 2014 - \$265,000; 2015 - \$140,000; 2016 - \$140,000.

Table of Contents

## Note 7. Quarterly Sector Financial Summary

Our operations are conducted in two segments as: (i) Business Sector and (ii) Telecom Sector. Segment information for the three and nine months ended September 30, 2011 and 2010 is as follows:

(Dollars in thousands)			Corporate and Eliminations	Consolidated
Three Months Ended September 30, 2011	Business	Telecom

## Note 8. Commitments and Contingencies

We are involved in certain contractual disputes in the ordinary course of business. We do not believe the ultimate resolution of any of these existing matters will have a material adverse effect on our financial position, results of operations or cash flows.

Refer to the Company's Annual Report on Form 10-K for the year ended December 31, 2010 for the discussion relating to commitments and contingencies.

In August 2010, we were awarded a National Telecommunications Information Administration (NTIA) Broadband Technology Opportunities Program (BTOP) grant to extend our middle mile fiber-optic network across greater Minnesota connecting health care facilities, schools, libraries, higher education institutions and public offices with an advanced high-capacity broadband network. This project involves approximately \$24,000,000 of capital expenditures of which \$16,800,000 is funded by the NTIA grant. We began capitalizing costs associated with this project in 2010 and began receiving grant funds in June 2011. The table below provides an overview of the capital expenditures incurred on this project along with reimbursements pending or received from the program.

(Dollars in thousands)

Capital Expenditures Incurred as of September 30, 2011	Capital Expenditures Pending Reimbursement from NTIA	NTIA Reimbursements Received as of September 30, 2011
\$5,786	\$3,385	\$666

We anticipate the completion of this project by August 2013.

## Note 9. Stock Compensation

Refer to our Annual Report on Form 10-K for the year ended December 31, 2010 for a complete description of all stock-based compensation plans.

Our stock award plan provides for granting non-qualified stock options, stock awards and restricted stock awards to employees. We recognize stock compensation charges related to stock award plans when management concludes it is probable the participant will earn the award. Share-based compensation expense includes amounts recognized related to the Company Employee Stock Purchase Plan. This plan allows participating employees to acquire shares of common stock at 85% of fair market value on one specified date. Stock-based compensation expense was \$725,000 and \$390,000 respectively in the nine months ended September 30, 2011 and 2010. The increase in the stock-based compensation expense was primarily driven by the increase in our stock price in 2011. This includes compensation expense for share-based payment awards granted prior to, but not vested as of September 30, 2011.

Table of Contents

The fair value of each option award is estimated on the date of the grant using a Black-Scholes option valuation model. We use a seven-year period to calculate the historical volatility of its stock price for use in the valuation model. The dividend yield rate is based on our current dividend payout pattern and current market price. The risk-free rate for options is based on a U.S. Treasury rate commensurate with the expected terms. The expected term of options granted is derived from historical experience and represents the period of time that options granted are expected to be outstanding. Historical data is used to estimate pre-vesting forfeitures and are estimated at the time of the grant and revised, if necessary, in subsequent periods if actual forfeitures differ from the estimate.

In April 2011, 10,000 options were granted associated with the acceptance of the Chief Operating Officer position. Other than this stock award issued, options were last granted under the Company's Stock Award Plan in September 2006. The weighted average grant date fair value of options issued was \$0.80.

As of September 30, 2011, there was \$6,000 of total unrecognized compensation costs related to non-vested stock options granted under the Company's Stock Award Plan. This expense is expected to be recognized over a weighted average period of three years.

A summary of stock option activity is as follows:

	Shares	Weighted Average Exercise Price
Outstanding at January 1, 2011	343,250	\$ 12.45
Granted	10,000	9.03
Exercised	(10,000 )	8.48
Forfeited	-	-
Expired	(78,000 )	15.82
Outstanding at September 30, 2011	265,250	\$ 11.48
Exercisable at September 30, 2011	255,250	\$ 11.58

The following table provides certain information with respect to stock options outstanding at September 30, 2011:

Range of Exercise Prices	Stock Options Outstanding	Weighted Average Exercise Price	Weighted Average Remaining Contractual Life
\$6.00 - \$8.00	15,000	\$ 6.95	4.92
\$8.00 - \$12.00	156,950	10.25	2.70

Aggregate Intrinsic Value	\$ 85,000
---------------------------------	-----------

Table of Contents

## Note 10. Financial Derivative Instruments

We utilize interest-rate swap agreements that qualify as cash-flow hedges to manage our exposure to interest rate fluctuations on a portion of our variable-interest rate debt. Our interest-rate swaps increase or decrease the amount of cash paid for interest depending on the increase or decrease of interest required on the variable rate debt. We account for derivative instruments on the balance sheet at fair value.

Fair value is the price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. Three levels of inputs may be used to measure fair value:

- Level 1 – quoted prices in active markets for identical assets and liabilities.
- Level 2 – observable inputs other than quoted prices in active markets for identical assets and liabilities.
- Level 3 – unobservable inputs in which there is little or no market data available, which require the reporting entity to develop its own assumptions.

The fair value of our interest rate swap agreements were determined based on Level 2 inputs. Listed below are the interest-rate swap agreements which lock in our interest rates on existing variable-interest rate debt.

Interest-Rate Swap Agreement Effective Dates	Coverage Amount	Rate
September 2011 - September 2014	\$ 24,000,000	1.66 %
September 2011 - March 2015	\$ 24,000,000	1.91 %
September 2011 - September 2015	\$ 24,000,000	2.14 %

The fair value of our newly effective derivatives at September 30, 2011 is recorded as financial derivatives under the long-term liabilities section of our balance sheet. As our former interest-rate swap agreement expired in September 2011, the fair value of our derivatives at December 31, 2010 was recorded as financial derivative instruments under the short-term liabilities section of our balance sheet. The fair value of our derivatives at September 30, 2011 and December 31, 2010 is a net liability of \$2,708,000 and \$1,079,000, respectively. The cumulative gain or (loss) on the market value of financial derivative instruments is reported as a component of accumulated other comprehensive income (loss) in shareholders' equity, net of tax. If we were to terminate our interest rate swap positions, the cumulative change in fair value at the date of termination would be reclassified from accumulated other comprehensive income (loss), which is classified in shareholder's equity, into earnings in the Consolidated Statements of Operations. The table below illustrates the effect of derivative instruments on consolidated operations for the periods ending September 30, 2011 and 2010, respectively.

(Dollars in thousands)	Gain Reported in Accumulated Other Comprehensive Loss		Location of Gain/Proceeds Reclassified from Accumulated Other Comprehensive Income into	Amount of Gain/Proceeds Recognized in	
	2011	2010		2011	2010
Derivative Instruments			Interest Expense	\$-	\$-
Cash Flow					
Hedging Relationships					
Interest Rate Contracts	\$980	\$291	Interest Expense	\$-	\$-

Note 11. Employee Post-Retirement Benefits

HickoryTech provides post-retirement health care and life insurance benefits for eligible employees. We are currently not funding these post-retirement benefits, but have accrued these liabilities. We are required to recognize the funded status of our post-retirement benefit plans on our consolidated balance sheet and recognize as a component of accumulated other comprehensive income (loss), net of tax, the gains and losses and prior service costs or credit that arise during the period but are not recognized as components of net periodic benefit cost. New employees are not eligible for post-retirement health care and life insurance benefits.

Table of Contents

(Dollars in thousands)	Three Months Ended September 30		Nine Months Ended September 30	
	2011	2010	2011	2010

Employer's contributions for current premiums:				September 30, 2011
Contributions made for the nine months ended September 30, 2011				\$ 264
Expected contributions for remainder of 2011				66
Total estimated employer contributions for fiscal year 2011				\$ 330

## Note 12. Income Taxes

The effective income tax rate from operations for the third quarter of 2011 and 2010 was 39.1% and 4.3%, lower than historical effective tax rates as a result of the release of income tax reserves and associated interest during the specified quarters. The effective tax rate from operations differs from the federal statutory rate primarily due to state income taxes.

As of September 30, 2011, we had unrecognized tax benefits totaling \$153,000 excluding interest. The amount of the unrecognized tax benefits, if recognized, that would affect the effective income tax rates of future periods is \$133,000. It is reasonably possible that the total amount of unrecognized tax benefits may decrease by approximately \$11,000, including interest, during the next 12 months as a result of expirations of the statute of limitations.

We recognize interest and penalties related to income tax matters as income tax expense. As of September 30, 2011, we have accrued \$4,000 (net of tax) for interest related to unrecognized tax benefits.

We file consolidated income tax returns in the United States federal jurisdiction and combined or separate income tax returns in various state jurisdictions. In general, we are no longer subject to United States federal income tax examinations for the years prior to 2007 except to the extent of losses utilized in subsequent years.

## Note 13. Subsequent Events

We have evaluated and disclosed subsequent events through the filing date of the Quarterly Report on Form 10-Q.

Table of Contents

Item 2. Management’s Discussion and Analysis of Financial Condition and Results of Operations

Forward Looking Statements

The Private Securities Litigation Reform Act of 1995 contains certain safe harbor provisions regarding forward-looking statements. This Quarterly Report on Form 10-Q may include forward-looking statements. These statements may include, without limitation, statements with respect to anticipated future operating and financial performance, growth opportunities and growth rates, acquisition and divestiture opportunities, business strategies, business and competitive outlook, and other similar forecasts and statements of expectation. Words such as “expects,” “anticipates,” “intends,” “plans,” “believes,” “seeks,” “estimates,” “targets,” “projects,” “will,” “may,” “continues,” and “should” of these words and similar expressions, are intended to identify these forward-looking statements. Such forward-looking statements are subject to risks and uncertainties that could cause our actual results to differ materially from such statements. Factors that might cause such a difference include, but are not limited to, those contained in Item 1A of Part II, “Risk Factors” of this quarterly report on Form 10-Q and Item 1A, “Risk Factors” of our Annual Report on Form 10-K for the year ended December 31, 2010 which is incorporated herein by reference.

Because of these risks, uncertainties, and assumptions and the fact that any forward-looking statements made by us and our management are based on estimates, projections, beliefs, and assumptions of management, they are not guarantees of future performance and you should not place undue reliance on them. In addition, forward-looking statements speak only as of the date they are made. With the exception of the requirements set forth in the federal securities laws or the rules and regulations of the Securities and Exchange Commission, we do not undertake any obligations to update any forward-looking information, whether as a result of new information, future events or otherwise.

Critical Accounting Policies

The preparation of our financial statements requires management to make estimates and judgments that affect the reported amounts of assets, liabilities, revenue and expenses, and the related disclosure of contingent assets and liabilities. A description of the accounting policies that we consider particularly important for the portrayal of our results of operations and financial position, and which may require a higher level of judgment by our management, is contained under the caption, “Critical Accounting Policies,” in the Management’s Discussion and Analysis of Financial Condition and Results of Operations in our Annual Report on Form 10-K for the year ended December 31, 2010.

Results of Operations

Overview-Trends and Highlights

We conduct our operations in two business segments: (i) Business Sector and (ii) Telecom Sector.

Our Business Sector serves customers primarily across a five-state region with IP-based voice, transport, data and network solutions, managed services, network integration and support services. Through our regional fiber network, this sector provides retail and wholesale services to regional and national service providers such as interexchange and wireless carriers within the communications industry. It also specializes in providing integrated unified communication solutions for businesses of all sizes - from enterprise multi-office organizations to small and medium-sized businesses, primarily in the upper Midwest.

Our Telecom Sector provides bundled residential and business services including high-speed Internet, broadband services, digital TV, local voice and long distance services in our legacy telecom service area. Telecom is comprised of two markets. The first includes an incumbent local exchange carrier (“ILEC”) operating in 13 south central

Minnesota communities and 13 rural northwest Iowa communities. The second market is a competitive local exchange carrier (“CLEC”) operation. We own our network in both the ILEC and CLEC communities. The Telecom Sector, through National Independent Billing, Inc., also provides data processing and related billing services to HickoryTech and external communication providers including wireline, wireless and entertainment providers.

Table of Contents

Operating revenue increased 4% in the third quarter of 2011 driven by higher sales of Cisco equipment, which increased by \$4,315,000 or 43% compared to the same period in 2010. Third quarter services revenue of \$30,975,000 reflects an 8% decline of which \$1,889,000 or 74% of the decline is from our Business Sector fiber and data services. This is due to \$3,257,000 and \$4,352,000 of non-recurring revenue realized in the third quarter and year-to-date periods in 2010 related to a joint construction project to extend our fiber network. Excluding this non-recurring revenue, our core recurring fiber and data business realized a 14% growth rate for the third quarter and year-to-date periods compared to the same periods in 2010. Strategic investments made in 2010 to expand our network and increase capacity into existing facilities provide the base for continued growth in the fiber and data product line. We have continued this emphasis in 2011 with our middle mile fiber-optic network expansion through our participation in the National Telecommunications Information Administration (NTIA) Broadband Technology Opportunities Program (BTOP).

Telecom Sector services revenue accounted for \$645,000 or 25% of the revenue decline experienced in the third quarter of 2011 compared to the same period in 2010, reflecting the continued and expected decline in Telecom local service and access revenue, an industry-wide trend. Growth in broadband revenue streams of 10% in the first nine months of 2011 has completely offset the year-to-date decline in local service and network access revenue; however we expect future broadband growth to slow as we reach higher DSL and digital TV service penetrations in many of our markets. While our Telecom sector EBITDA continues its gradual decline we continue to focus on maintaining strong cash flows from this line of business.

In the third quarter we experienced a 3% growth in EBITDA compared to the same period in 2010. EBITDA growth from our core operations was 22% in the third quarter, after excluding the impact of the joint construction project noted above. See the additional information and reconciliation to the most directly comparable GAAP measure provided below.

In August of 2011 we announced the completion of our new debt financing agreement which provides an aggregate credit facility of \$150,000,000. This new facility includes \$120,000,000 in secured term loans which are currently in place and a \$30,000,000 revolving debt facility which is unused as of September 30, 2011. The term of the new facility runs through December 31, 2016. An adjustment to record amortization expense of debt fees related to our previous credit facility increased interest expense by \$310,000 in the third quarter of 2011. Under our new agreement we anticipate quarterly interest expense to amount to \$1,300,000 to \$1,400,000.

Income tax expense in third quarter and year-to-date 2011 and 2010 periods has been impacted by a reduction of accrued income taxes due to the expiration of federal and state statutes of limitations. Favorable tax impacts on the third quarter and year-to-date periods of 2011 are \$63,000 and \$406,000, respectively and \$1,919,000 and \$2,726,000 in the third quarter and year-to-date periods in 2010. Excluding the tax releases noted above, net income for the third quarter is 7% lower than 2010 and is 2% higher than 2010 results on a year-to-date basis.

Our reference to EBITDA, a non-GAAP measure, should be considered in addition to results prepared under current accounting standards but are not a substitute for, or superior to, GAAP results. Non-GAAP measures are provided to enhance investors' overall understanding of our current financial performance, financial position and ability to generate cash flows. It also provides investors with insight into the core earnings capacity of providing communications services to our customers. The table below is a reconciliation of net income (loss) to EBITDA for the quarters and nine-month periods ended September 30, 2011 and 2010.

Revenue

Equipment. This revenue is generated primarily from the sale of communications and data products provided by third party manufacturers. Due to the non-recurring nature of equipment sales, equipment revenue fluctuates quarterly and is entirely dependent upon new sales from existing and new customers.

Revenue from equipment sales has increased \$4,315,000 or 43% and \$3,593,000 or 13% in the third quarter and year-to-date periods of 2011, respectively as compared to the same periods in 2010 driven by customer demand and spending.

## Table of Contents

Support Services. We earn this revenue by providing services related to our equipment sales, such as network and equipment monitoring, maintenance, and professional service consulting and equipment installation.

Support services revenue remained relatively unchanged for the third quarter but has grown by \$714,000 or 11% in the first nine months of 2011 compared to the same period in 2010. Maintenance contract sales have increased by \$916,000 in the year-to-date period of 2011 compared to 2010. Cisco rebates reward us for high maintenance contract renewal rates. Our success in this area has increased our overall margin on this product and is a contributor to the 2011 revenue increase. Offsetting the increase from maintenance contracts has been a decline in contract services revenue of \$364,000 in the first nine months of 2011 compared to the same period in 2010 due to larger service projects in 2010. We have active plans to add to the support services product line with recurring revenue business.

Fiber and Data. This revenue is primarily of a monthly recurring basis and consists of billing for the use of our fiber network and network connections primarily through multi-year contracts with retail business, regional and national service providers and wireless carriers. This product line also includes revenue from all of our business to business communication products and services including our hosted VoIP product along with small-medium business (SMB) retail sales.

Third quarter and year-to-date fiber and data revenue declined \$1,889,000 or 14% and \$282,000 or 1% respectively, compared to the same periods in 2010. Results for the third quarter and year-to-date period of 2010 include \$3,257,000 and \$4,352,000 of non-recurring revenue related to a joint construction project to extend our fiber network. Excluding this non-recurring revenue from 2010, our core recurring fiber and data business would show an 14% growth rate the quarter and year-to-date as compared to the same periods in 2010. Our principle revenue-growth initiatives include:

- Extending our network to reach additional businesses and wireless carriers;
- expansion of our business services to new communities and enhancement of our products in these markets;
  - focus on the SMB customer segment; and
  - expansion of our network to new geographies.

We continue to experience strong demand from regional and national service providers and wireless carriers for increased bandwidth and capacity. Our wholesale sales channel continues to leverage our network capabilities, including DWDM, MPLS and Ethernet technology, to lead the market with high-bandwidth data solutions. We expect this demand to continue and have made significant investments in our fiber and broadband network to meet these needs.

In 2010, we completed our network expansion to Sioux Falls, South Dakota and Fargo, North Dakota, and increased network capacity to our Des Moines, Iowa facilities. In 2011, our expansion continues, backed in part by the receipt of a broadband stimulus grant, building a middle mile fiber-optic network across greater Minnesota connecting health care facilities, school, libraries, higher education institutions and public offices.

We also have continued to make investments in our SMB products and services, with the addition of several new collocations to our network and the expansion of our sales force to drive growth in this product line. We continue to expand our SMB business offerings, which include a wide range of services including: Data, Internet, Voice and VoIP, Hosted Services and Equipment Solutions.

### Cost of Sales (excluding Depreciation and Amortization)

Higher equipment sales volume in the third quarter and year-to-date periods of 2011 as compared to the same periods in 2010 drove the 43% and 13% change in cost of sales for those periods. Business Sector cost of sales is composed

primarily of equipment material costs. Labor associated with installation work is included in cost of services (excluding depreciation and amortization) described below.

Table of Contents

Cost of Services (excluding Depreciation and Amortization)

Business Sector cost of services (excluding depreciation and amortization) decreased by \$1,132,000 or 13% and by \$538,000 or 2% in the third quarter and year-to-date periods as compared to 2010. The third quarter and year-to-date period expense changes were substantially impacted by \$1,392,000 and \$2,157,000, respectively of expenses in 2010 that related to a joint construction project to extend our fiber network which were non-recurring in nature. The other items impacting the change in cost of services for the quarter and year-to-date periods as compared to 2010 include a \$302,000 increase for the quarter and a \$727,000 year-to-date increase in wages and benefits primarily due to increased staffing levels to support our strategic growth in fiber and data services and a \$817,000 increase in the year-to-date period in volume-driven circuit costs supporting increased revenue. These increases were offset by a \$124,000 and a \$460,000 decrease for the quarter and year-to-date periods as compared to 2010 in contract labor expense primarily within our equipment product line.

Selling, General and Administrative Expenses

Selling, general and administrative expenses remained relatively flat in the third quarter of 2011 and increased \$710,000 or 7% in the year-to-date period as compared to the same periods in 2010. The year-to-date increases were primarily due to: 1) a increase of \$428,000 in commission expense due to sales growth, 2) a \$220,000 increase in incentive and bonus plan expense due to favorable operating results thus far in 2011, higher retention and stock-based incentive expense, and a small increase in the number of employees, and 3) a \$172,000 increase in corporate costs. This was offset by a \$111,000 decline in regulatory fees.

Depreciation and Amortization

Depreciation and amortization expense increased by \$136,000 or 9% and \$647,000 or 15% in the third quarter and year-to-date periods respectively, compared to the same periods in 2010. We invested \$8,738,000 and \$14,464,000 in 2009 and 2010, respectively in capital expenditures adding capacity and upgrading our network supporting our strategic plan to grow services revenue. We will continue to experience increases in depreciation for the next few years as we invest in our fiber network. Our network constitutes the majority of our asset base and the related assets are depreciated over 12 to 25 years.

Amortization expense of \$88,000 in the third quarter and \$265,000 year-to-date is the same as it was in 2010 and is related to intangible assets acquired with our CP Telecom acquisition in 2009.

----------------------	--------	--------	---	---

Certain revenue amounts in our 2010 Telecom Sector financial statements have been reclassified to conform to the presentation in our 2011 financial statement.

#### Revenue

**Local Service.** We receive monthly recurring revenue from end-user customers primarily for providing local telephone services, enhanced calling features, miscellaneous local services and reciprocal compensation from wireless carriers.

Local service revenue declined by \$298,000 or 8% and \$706,000 or 6%, respectively in the third quarter and year-to-date periods as compared to the same periods in 2010. Over the past two years we have realized residential line loss rates of 10% - 11% while experiencing a business customer line loss of 4% which continue to be impacted by wireless substitution and intensified competition in our marketplace. Growth in business hosted VoIP services has partially offset the decline of traditional voice services by \$20,000 and \$166,000 in the quarter and year-to-date periods as compared to last year.

Table of Contents

Our efforts to retain access lines center around marketing a competitive broadband service bundle, increasing customer loyalty, providing exceptional, local customer service and offering more value to our customers. Over 45% of our customers subscribe to our Select bundles, which include local phone service and long distance as well as a variety of features and broadband options including: DSL, high-speed internet, and digital TV.

Network Access. We receive a variety of fees and settlements to compensate us for the origination, transport, and termination of calls and traffic on our network. These include the fees assessed to interexchange carriers, subscriber line charges imposed on end-users, and settlements from nationally administered and jointly funded revenue pools.

Our industry continues to experience access line loss driven by increased competition from wireless carriers and cable TV providers as technological developments in features, applications, network capacity and economies of scale improve, providing our customers alternatives to the traditional local telephone service we provide. Future changes to the regulatory environment may have a significant impact on this revenue stream and while we cannot predict the impact of future developments we believe network access revenue will continue the gradual decline we have experienced during the past few years.

Network access revenue declined by \$300,000 or 5% and \$703,000 or 4% in the third quarter and year-to-date periods compared to the same periods in 2010. Loss of access lines has impacted overall minutes-of use on our network, end-user based revenue streams and settlements received from nationally administered pools. An additional impact to 2011, and to a greater extent on 2012, is the decline in traffic sensitive interstate rates which went into effect as July 1, 2011.

Long Distance. We charge our end-user customers for toll or long distance service on either a per-call or flat-rate basis. Services include the provision of directory assistance, operator service, and long distance private lines.

Long distance revenue declined by \$83,000 and \$247,000 in the third quarter and year-to-date periods compared to 2010 equating to a 10% decline in both periods. The customer loss rate in our long distance base was 5% in the third quarter, consistent with loss rates experienced in 2010. Our declining customer base, a growing number of residential customers selecting unlimited long distance calling plans and our decision to reduce rates-per-minute charged to customers due to aggressive competition in the markets we serve are the factors for the decline.

Broadband. We receive monthly recurring revenue for a variety of residential and business broadband data network services. Broadband services include: DSL service, Internet service, digital TV services, and business Ethernet and other data services.

Broadband revenue grew by \$244,000 or 5% in the third quarter and \$1,420,000 or 10% in the year-to-date period as compared to the same periods in 2010 due to business data service offerings such as Ethernet and on-going growth in our digital TV and DSL product lines. Revenue from digital TV services has increased by \$176,000 or 13% and \$625,000 or 16% in the third quarter and year-to-date periods of 2011 compared to the same periods in 2010. This growth is driven by several factors including a rate increase implemented in March 2011, the continued expansion of enhanced services including Digital Video Recorder (DVR) services and High Definition (HD) within our IPTV capable communities and a 2% increase in our subscriber base from one year ago.

Revenue from our DSL product grew \$66,000 or 3% and \$239,000 or 4% in the third quarter and year-to-date periods of 2011, respectively compared to the same periods in 2010. Our DSL customer base has declined from prior year growth rates as our markets mature due to successful market penetration and intensifying competition. Business data services have remained relatively unchanged for the third quarter and have grown by \$574,000 or 23% during the first nine months of 2011 compared to the same period in 2010 benefiting from a contract to provide broadband services to a consortium of schools in south central Minnesota beginning July 1, 2010.

Cost of Services (excluding Depreciation and Amortization)

Cost of services (excluding depreciation and amortization) decreased by \$695,000 or 8% and \$712,000 or 3% in the third quarter and year-to-date periods of 2011, respectively, compared to the same periods in 2010.

## Table of Contents

The quarterly and year-to-date decreases as compared to the same periods in 2010 were primarily due to: 1) a \$380,000 decrease for the quarter and a \$443,000 year-to-date decrease in bad debt expense which are attributable to expense accrued in 2010 related to uncertainty of collectability from a large customer, 2) a \$246,000 for the quarter and a \$369,000 year-to-date decrease in wages and benefits, 3) a \$149,000 decrease for the quarter and a \$181,000 year-to-date decrease in directory expense which correlates to the decline in directory revenue and 4) a \$128,000 decrease for the quarter and a \$302,000 year-to-date decrease in long distance access expenses. The expense declines noted above were partially offset by an increase in programming costs of \$66,000 for the third quarter and \$201,000 for year-to-date 2011 compared to the same periods in 2010.

### Selling, General and Administrative Expenses

Selling, general and administrative expenses decreased by \$266,000 or 8% and \$133,000 or 1% in the third quarter and year-to-date period as compared to the same periods in 2010. Significant savings in legal fees of \$273,000 and \$413,000 for the quarter and year-to-date period, respectively as compared to the prior year periods, have helped to offset slight growth in wages and benefits along with an increase in corporate costs.

### Depreciation and Amortization

Depreciation and amortization expense increased by \$220,000 or 6% and \$365,000 or 3% in the third quarter and year-to-date periods respectively, compared to the same periods in 2010. These increases are primarily due to our continued investment to support broadband and infrastructure enhancements.

### Net Income

Net income for the third quarter declined 2%, however reported net income for the 2011 year-to-date period represents a 2% increase in net income over the comparable periods in 2010.

### Consolidated Results

#### Interest Expense

Consolidated interest expense increased 32% in the three months ended September 30, 2011 and decreased 7% in the nine months ended September 30, 2011 compared to the same periods in 2010. The quarterly increase is driven by an adjustment of \$310,000 to record amortization expense of debt fees relating to the expiration of our previous debt agreement. Excluding the adjustment in the third quarter of 2011, interest expense for the quarter increased \$49,000 over the same period in 2010. The refinancing took place approximately halfway through the third quarter of 2011. The year-to-date interest expense decrease is due to lower debt holding levels on an intra-quarter basis, lower interest rates and the implementation of interest rate protection strategies. The outstanding balance of our debt obligations (long-term and current portion) has decreased \$1,378,000 from \$121,983,000 at September 30, 2010 to \$120,605,000 as of September 30, 2011. The September 30, 2011 debt balance is \$1,646,000 higher than the December 31, 2010 balance of \$118,959,000. For periods within the first nine months of 2011, the outstanding debt balance was lower than the quarter-end balance, contributing to the year-to-date interest expense reduction.

#### Income Taxes

Our effective income tax rate for the third quarter of 2011 and 2010 was 39.1% and 4.3%, respectively. The effective tax rate in 2011 and 2010 was impacted by the releases of income tax reserves and associated interest of \$63,000 and \$1,919,000, respectively. Without the release of income tax reserves and associated interest the effective tax rate would have been 40.5% in 2011 and 40.6% in 2010. The effective tax rate from operations differs from the federal

statutory rate primarily due to state income taxes.

Table of Contents

## Liquidity and Capital Resources

## Capital Structure

The total capital structure (long-term and current maturities of long-term debt obligations plus shareholders' equity) was \$164,392,000 at September 30, 2011, reflecting 27% equity and 73% debt. This compares to a total capital structure of \$160,263,000 at December 31, 2010, reflecting 26% equity and 74% debt. In the communications industry, debt financing is most often based on multiples of operating cash flows. Specifically, our current use of the senior credit facility is in a ratio of approximately 2.77 times debt to Earnings before Interest, Tax, Depreciation and Amortization, ("EBITDA") as defined in our credit agreement; well within acceptable limits for our agreement and our industry. Management believes we will have the ability to meet our current and long-term liquidity and capital requirements through operating cash flows, borrowings available under our credit facility and other internal and available external resources. Our primary uses of cash include capital expenditures, business development, debt service, temporary financing of trade accounts receivable and the payment of potential dividends.

We employ an extended term payable financing arrangement within our Business Sector for the equipment provisioning portion of our equipment product line and view this arrangement as a structured accounts payable that is paid within 60 days with no separate interest charge. As such, the extended term payable financing amount of \$12,631,000 and \$8,254,000 as of September 30, 2011 and December 31, 2010, respectively, is not considered to be part of our capital structure and has been excluded from the amounts above.

Our primary source of liquidity continues to be from internal operations of our business. We have invested in capital expenditures, paid interest, taxes, dividends and other obligations, while our debt balance (current and long-term portion) remained relatively consistent (i.e. \$120,605,000 September 30, 2011; \$118,692,000 June 30, 2011; \$118,959,000 December 31, 2010). We have not changed our equity capitalization and equity was not a source of liquidity during this period. Our liquidity situation has been similar since our acquisition of Enventis in December 2005.

We expect our liquidity needs to arise from routine payment of dividends, interest and principal payments on our indebtedness, income taxes and capital expenditures. We use our cash inflow to manage the temporary increases in cash demand and utilize our senior revolving credit facility for more significant fluctuations in liquidity caused by growth initiatives. We have shifted to a strategy of holding higher levels of cash on hand in 2011. We feel that this combined with our access to funds in our revolving credit agreement with our senior lenders, provides further protection against any interruption to our business plan due to financing.

While it is often difficult for us to predict the impact of general economic conditions on our business, we believe that we will be able to meet our current and long-term cash requirements through our operating cash flows. As of September 30, 2011 we were in full compliance with our debt covenants and anticipate that we will be able to plan for and match future liquidity needs with future internal and available external resources. Our senior debt agreement will be the sole external source of financing, and serve to augment the substantial levels of internal financial support provided by our successful operations.

## Cash Flows

The following table summarizes our cash flow:

(Dollars in thousands)	Nine Months Ended September	
	2011	2010

Net cash provided by (used for):

Operating activities	\$ 24,798	\$ 12,906
Investing activities	(14,012 )	(15,633 )
Financing activities	457	407
Increase (decrease) in cash and cash equivalents	\$ 11,243	\$ (2,320 )

Table of Contents

Cash from operating activities represents the amount of cash generated by our business operations after the payment of operating obligations. This continues to be our primary source of funds. Cash generated from operations was \$24,798,000 in the first nine months of 2011 compared to \$12,906,000 in 2010. Receipt of routine tax refunds related to the benefit of bonus depreciation permitted by legislation signed in 2010 is the primary contributor to the increase in cash provided by operating activities.

As we continue to enhance, extend and upgrade our network and service offerings our capital spending has been invested in success-based capital projects along with maintenance capital projects to sustain our current revenue streams. Capital expenditures in the first nine months of 2011 are \$2,212,000 less compared to the same period in 2010 primarily as a result of timing. Excluding the reimbursements for the Broadband Stimulus Grant, capital expenditures in 2011 are expected to range from \$20,500,000 to \$24,000,000 which is similar to capital spending in 2010.

Financing activities primarily consist of payments on our outstanding debt and our quarterly dividends. Cash provided by financing activities was \$457,000 in the first nine months of 2011 compared to \$407,000 in 2010. On August 11, 2011 we entered into a \$150,000,000 credit agreement with a syndicate of banks which replaced our previous credit facility. The proceeds were used to repay the outstanding obligations under the previous credit facility, and pay fees and expenses associated with the new credit facility. Our long and short-term debt of \$120,605,000 as of September 30, 2011 is \$1,646,000 higher than the year-end balance and \$1,913,000 higher compared to the previous quarter. Due to the timing and volume of equipment orders in our equipment product line, there was a \$4,377,000 increase in our extended term payable in the first nine months of 2011 compared to a \$3,025,000 increase in the first nine months of 2010.

Extended-Term Payable

The Business Sector utilizes an \$18,000,000 wholesale financing agreement with a financing company to fund the equipment provisioning portion of the equipment product line from certain approved vendors. Advances under the financing arrangement are collateralized by the accounts receivable and inventory of the Business Sector and a guaranty from the parent company. The parent company funds full payment of the balances due under the financing agreement within standard terms or when required by certain collateralization conditions within the agreement. The agreement provides 60-day, interest-free payment terms for inventory purchases and can be terminated at any time by either party. The balance outstanding under the financing arrangement increased from \$8,254,000 at December 31, 2010 to \$12,631,000 at September 30, 2011 due to recent increases in equipment sales activity. These balances are classified as current liabilities in the accompanying balance sheets and are not considered part of our debt financing.

Long-Term Debt Obligations

Our long-term obligations as of September 30, 2011 were \$119,169,000 excluding current maturities of \$1,200,000 on debt and \$236,000 on capital leases. Long-term obligations as of December 31, 2010, were \$114,067,000 excluding current maturities of \$4,550,000 on debt and \$342,000 on capital leases.

On August 11, 2001, we entered into a \$150,000,000 credit agreement with a syndicate of nine banks that matures on December 31, 2016. The credit facility is comprised of a \$30,000,000 revolving credit component (\$29,965,000 available to borrow as of September 30, 2011; \$35,000 is reserved for outstanding letters of credit) and a \$120,000,000 term loan component.

The term loans are structured in a Term Loan B facility. The outstanding principal balance of Term Loan B is \$120,000,000 as of September 30, 2011. Under the terms, we are required to make quarterly principal payments of \$300,000 beginning December 31, 2011. There was no outstanding principal balance under the revolving credit

component as of September 30, 2011 and the revolving credit component does not require quarterly principal payments. Any remaining amounts outstanding on the revolving credit component and Term Loan B will be due at maturity on December 31, 2016.

Under the credit facility, interest is payable based on a LIBOR or base rate plus an applicable margin. Margins under the credit facility range from 150-225 basis points on base rate loans and 250-325 basis points on LIBOR rate loans and are dependent on the leverage ratio of HickoryTech. As of September 30, 2011, we are subject to a 200 basis point margin on base rate loans and a 300 basis point margin on LIBOR rate loans. In addition, we are eligible to receive periodic patronage refunds from three of the nine banks in the lending syndicate. We record patronage refunds as an offset to interest expense.

Table of Contents

Our credit facility requires us to comply, on a consolidated basis, with specified financial ratios and tests. Specifically, the maximum leverage ratio is not to exceed 3.50 through December 31, 2012. Our leverage ratio as of September 30, 2011 was 2.77. The second financial ratio, the debt service coverage ratio, must not be less than 2.5 during the term of the agreement. Our debt service coverage ratio as of September 30, 2011 was 7.46. The credit facility includes new allowances for continued payment of dividends and common stock repurchases and eliminates a specific capital expenditures limitation which was in place in our previous facility.

Our obligations under the credit facility are secured by a first-priority lien on the property and assets, tangible and intangible, of HickoryTech and its current subsidiaries totaling \$216,810,000, which includes total assets except for the Business Sector accounts receivable and inventory. We have also given a first-priority pledge of the capital stock of our current subsidiaries to secure the credit facility. The credit facility contains certain restrictions that, among other things, limit or restrict our ability to create liens or encumbrances; incur additional debt; issue stock; make asset sales, transfers, or dispositions; and engage in mergers and acquisitions over specified maximum values.

The credit facility requires us to enter in or maintain effective interest rate protection agreements on at least 50% of the Term Loans outstanding balance for a period of two years to manage our exposure to interest rate fluctuations. We continually monitor the interest rates on our bank loans. We currently have interest rate swap agreements, effectively fixing the LIBOR rate portion of the interest rate on \$72,000,000 of our variable interest rate debt, and covering 60% of our debt. The table below provides details surrounding the effective interest rate swap agreements.

Interest-Rate Swap Agreement Effective Dates	Coverage	
	Amount	Rate
September 2011 - September 2014	\$ 24,000,000	1.66 %
September 2011 - March 2015	\$ 24,000,000	1.91 %
September 2011 - September 2015	\$ 24,000,000	2.14 %

**Working Capital**

Working capital (i.e. current assets minus current liabilities) was \$20,213,000 as of September 30, 2011 compared to working capital of \$8,731,000 as of December 31, 2010. The ratio of current assets to current liabilities was 1.55 and 1.29 as of September 30, 2011 and December 31, 2010. The primary reason for the increase in working capital is our strategy of holding higher levels of cash on hand in 2011.

**New Accounting Pronouncements**

The financial statement impact relating to new accounting standards that have not yet been adopted by us can be found under Note 1. Basis of Presentation and Consolidation - "Recent Accounting Developments."

**Item 3. Quantitative and Qualitative Disclosures about Market Risk**

We do not have operations subject to risks of foreign currency fluctuations. We do, however, use derivative financial instruments to manage exposure to interest rate fluctuations. Our objective for holding derivatives is to minimize interest rate risks using the most effective methods to eliminate or reduce the impact of these exposures. Variable rate debt instruments are subject to interest rate risk. For any portion of our debt not covered with interest rate swap agreements, our earnings are affected by changes in interest rates as a portion of its long-term debt has variable interest rates based on LIBOR. If interest rates for the portion of our long-term debt based on variable rates had averaged 10% more for the quarter ended September 30, 2011, our interest expense would have increased \$43,000.

The market value of the cumulative gain or (loss) on financial derivative instruments is reported as a component of accumulated other comprehensive income (loss) in shareholder's equity and is recognized in earnings when the term of a protection agreement is concluded. Additional information on our interest-rate swap agreements can be found under Note 10. "Financial Derivative Instruments."

Item 4. Controls and Procedures

As of the end of the period covered by this Quarterly Report on Form 10-Q (the Evaluation Date), we carried out an evaluation, under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, regarding the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Rule 13a-15(e) promulgated under the Securities and Exchange Act of 1934, as amended). Based upon that evaluation, our Chief Executive Officer and Chief Financial Officer have concluded, as of the end of the period covered by this Quarterly Report, that our disclosure controls and procedures ensure that information required to be disclosed by us in the reports that we file or submit under the Exchange Act are recorded, processed, summarized and reported within the time periods specified in applicable rules and forms and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, in a manner that allows timely decisions regarding required disclosure.

There have been no changes in our internal control over financial reporting during our most recently completed fiscal quarter that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Part II Other Information

Item 1. Legal Proceedings.

Other than routine litigation incidental to our business there are no pending material legal proceedings to which we are a party or to which any of our property is subject.

Item 1A. Risk Factors.

Except as noted below there have not been any material changes to the risk factors previously disclosed in Item 1A, "Risk Factors," of our Annual Report on Form 10-K for the fiscal year ended December 31, 2010.

During the third quarter of 2011 we have taken several actions which have mitigated risks identified in our Annual Report on Form 10-K under the section heading, "Risks Related to Our Indebtedness and Our Capital Structure." In August of 2011 we completed a new debt financing agreement which provides an aggregate credit facility of \$150,000,000 with a term through December 31, 2016. In September of 2011 three interest-rate swap agreements became effective, fixing the LIBOR rate portion of the interest rate on 60% of our long-term debt. See Note 10 to the Notes of our Consolidated Financial Statements and the Liquidity and Capital Resources section within the Management's Discussion and Analysis of Financial Condition and Results of Operations for more information on our financial derivative instruments and our long-term debt obligations.

In its meeting on October 27, 2011, the FCC has ordered changes in the Inter-Carrier Compensation and Universal Service Funding regimes. Some of these changes were introduced in the National Broadband Plan and in the NPRM issued by the FCC on February 8, 2011 while others have been the result of public input. Further, it also appears that substantive portions of the new rules contemplated have been deferred into another Further Notice of Proposed Rulemaking (FNPRM). As of this writing, the actual text of the FCC's October 27, 2011 Order and FNPRM has not yet been published. We cannot estimate the impact of the yet unpublished changes and we cannot predict the outcome of any FCC rulemaking or pending legislation regarding our Inter-Carrier Compensation or Universal Service Funds we receive.

## Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.

During the third quarter of 2011, we announced that our board of directors authorized a stock repurchase plan to repurchase up to \$3,000,000 of our common stock. During the quarter ended September 30, 2011, we acquired and retired 36,248 common shares. Details of the 2011 transactions are below:

Transactions	Total Number of Shares Purchased	Average Price Paid per Share	Maximum Dollar Value that May Yet be Purchased under Plan
Balance, July 1, 2011			\$3,000,000
September 23, 2011	7,100	\$9.03	2,935,887
September 26, 2011	9,716	8.94	2,849,007
September 27, 2011	9,716	8.77	2,763,832
September 28, 2011	9,716	9.06	2,675,820
Balance, September 30, 2011	36,248	\$8.94	\$2,675,820

## Item 3. Defaults Upon Senior Securities.

None.

## Item 4. Removed and Reserved.

None.

## Item 5. Other Information.
