On April 22, 2003, Coca-Cola Enterprises Inc. issued a press release announcing first quarter 2003 results. A copy of the press release is attached as Exhibit 99.

The press release contains a reference to EBITDA and provides a reconciliation of EBITDA to Income Before Income Taxes on the face of the consolidated income statements. EBITDA is used by management for comparisons to other companies within our industry as an alternative to GAAP measures and is used by investors and analysts in evaluating performance.

EBITDA, which is earnings before interest, taxes, depreciation, and amortization, is computed by adding back net interest expense, income tax expense, depreciation expense, and amortization expense to net income as reported or alternatively, as shown in our reconciliation, adding back amortization, depreciation and net interest expense to income before income taxes. EBITDA should be considered in addition to, but not as a substitute for, other measures of financial performance reported in accordance with accounting principles generally accepted in the United States. EBITDA, as defined above, may not be comparable to similarly titled measures reported by other companies.
