ADVANCED MATERIALS GROUP, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1) BASIS OF PRESENTATION

The accompanying unaudited consolidated financial statements have been prepared in accordance with the rules and regulations of the Securities and Exchange Commission and therefore do not include all information and footnotes necessary for a complete presentation of financial position, results of operations and cash flows in conformity with accounting principles generally accepted in the United States of America.

The unaudited consolidated financial statements do, however, reflect all adjustments, consisting of only normal recurring adjustments, which are, in the opinion of management, necessary to state fairly the financial position as of February 28, 2007 and the results of operations and cash flows for the interim periods ended February 28, 2007 and February 28, 2006. However, these results are not necessarily indicative of results for any other interim period or for the year. The accompanying consolidated financial statements should be read in conjunction with the Company's audited consolidated financial statements and accompanying notes thereto included in the Company's Annual Report on Form 10-KSB for the fiscal year ended November 30, 2006.

Principles of Consolidation

The consolidated financial statements include the accounts of Advanced Materials Group, Inc. ("AM") and its wholly owned subsidiaries, Advanced Materials, Inc. ("AM") and Advanced Materials, Ltd. All significant intercompany accounts and transactions have been eliminated.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ materially from those estimates.

2) EARNINGS PER SHARE

The Company has adopted the provisions of Statement of Financial Accounting Standards No. 128, "Earnings per Share" ("SFAS 128"). SFAS 128 requires the presentation of basic and diluted net income per share. Basic earnings per share exclude dilution and are computed by dividing net income by the weighted average of common shares outstanding during the period. Diluted earnings per share reflect the potential dilution that would occur if securities or other contracts to issue common stock were exercised or converted into common stock. Potential common share equivalents including stock options and warrants have been excluded for the three-month periods ended February 28, 2007 and February 28, 2006, as their effect would be antidilutive.

There were 225,000 and 686,000 potentially dilutive options and warrants outstanding at February 28, 2007 and February 28, 2006, respectively, that were not included in the computation of net income per share because the impact would be anti-dilutive.

3) STOCK BASED COMPENSATION

On November 1, 2006, the Company adopted Statement of Financial Accounting Standard No. 123(R), *Share-Based Payment* ("SFAS 123(R)"), and has elected to use the modified prospective method, which requires the application of the accounting standard to all share-based awards issued on or after November 1, 2006 and any outstanding

share-based awards that were issued but not vested as of November 1, 2006. Accordingly, the consolidated financial statements as of February 28, 2006 and for the three months then ended have not been restated to reflect the impact of SFAS 123(R).

For the quarter ended February 28, 2007, the adoption of FAS 123(R) resulted in incremental stock-based compensation expense of \$1,700. This amount includes compensation expense related to stock options granted prior to November 1, 2006, but not yet vested as of November 1, 2006, based on the grant date fair value estimated in accordance with the pro-forma provisions of SFAS 123. No options have been granted subsequent to November 1, 2006. The \$1,700 of compensation expense has been recorded as selling, general and administrative expense in the accompanying consolidated statement of income.

Prior to the adoption of SFAS 123(R), the Company applied APB 25 to account for its stock-based awards. The following table details the effect on net income and earnings per share had compensation expense for employee stock-based awards been recorded in the first quarter of 2006 based on the fair value method under FAS 123:

		Three Months Ended February 28, 2006
Net income available to common shareholders	\$	152,693
Plus: Stock-based employee compensation expense included in reported net income		--
Less: Total stock-based employee compensation determined using fair value based method		(4,750)
Pro forma net income available to common stockholders	\$	147,943
Net income per common share - basic and diluted - as reported	\$	0.01
Net income per common share - basic and diluted - pro forma	\$	0.01

As of February 28, 2007 there was \$19,267 of total unrecognized stock based compensation related to nonvested share-based compensation awards granted under the stock option plans. This cost is expected to be recognized over a weighted average period of approximately 2 years.

The Company used the Black-Scholes Option Pricing Model to determine the fair value of option grants. No option grants were made during the first quarter of fiscal 2007 or 2006.

The following is a summary of all stock option transactions for the three months ended February 28, 2007:

	Shares	Weighted Average Price	Weighted Average Remaining Contractual Term	Aggregate Intrinsic Value
Outstanding at November, 2006	475,000	\$ 0.94		
Cancelled or expired	(10,000)	\$ 1.78		
Exercised	(30,000)	\$ 0.17		
Outstanding at February 28, 2007	435,000	\$ 0.97	3.23	\$ 62,900
Options exercisable at February 28, 2007	350,000	\$ 1.14	2.40	\$ 36,450

The total intrinsic value of options exercised during the quarter ended February 28, 2007 was \$9,900 resulting in a tax benefit of \$3,400.

4) INVENTORIES

Inventories are stated at the lower of cost (determined on the first-in, first-out method) or market. Inventories consisted of the following:

	February 28, 2007 (unaudited)	November 30, 2006
Raw Materials	\$ 518,496	\$ 355,773
Work-in-process	143,019	94,949
Finished Goods	485,281	364,700
Less allowance for obsolete inventories	3,600	--
	\$ 1,143,196	\$ 815,422

5) SINGAPORE ROYALTY AGREEMENT

Consolidated net sales and gross profit include income from the Singapore royalty agreement of \$97,225 and \$160,968 for the three-month periods ended February 28, 2007 and 2006, respectively. Based on the structure of the

agreement, the Company has no cost of sales related to this income. Net income attributable to this agreement was \$87,503 and \$144,871 for the three-month periods ended February 28, 2007 and 2006, respectively.

6) INCOME TAXES

The Company recorded an income tax benefit of \$178,944 in the first quarter of 2007. This benefit was mainly a result of the Company releasing its deferred tax asset allowance as management has determined that it is more likely than not that these assets will be realized. This transaction increased the Deferred Tax Asset balance to \$812,944, as of February 28, 2007.

As of February 28, 2007, the Company has a net operating tax loss carryforward of approximately \$6,140,056 available to offset future Federal tax liabilities.

ITEM 2 -MANAGEMENT'S DISCUSSION AND ANALYSIS OR PLAN OF OPERATIONS

The following discussion should be read in conjunction with the unaudited consolidated financial statements and the related notes that appear elsewhere in this report.

This document contains forward-looking statements that involve risks and uncertainties that could cause the results of the Company and its consolidated subsidiaries to differ materially from those expressed or implied by such forward-looking statements. These risks include, but are not limited to, the timely development, production and delivery of new products; the challenge of managing asset levels, including inventory and trade receivables; the difficulty of keeping expense growth at modest levels while increasing revenues and other risks described from time to time in the Company's filings with the Securities and Exchange Commission, including but not limited to the Annual Report on Form 10-KSB for the year ended November 30, 2006 and in "Factors That Could Affect Future Results" below.

Forward-looking statements reflect the current views of the Company with respect to future events and are subject to certain risks, uncertainties and assumptions. Should one or more of these risks or uncertainties materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those described herein as anticipated, believed, estimated or expected. Advanced Materials Group, Inc. undertakes no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.

GENERAL

As of February 28, 2007, we had working capital of \$2,458,224 compared to working capital of \$2,153,864 at November 30, 2006.

RESULTS OF OPERATIONS THREE MONTHS ENDED FEBRUARY 28, 2007 COMPARED TO THE THREE MONTHS ENDED FEBRUARY 28, 2006

Net sales for the quarter ended February 28, 2007 were \$2,563,854 versus \$2,375,337 for the same period of fiscal 2006, an increase of \$188,517 or 7.9%. Revenues from the Singapore royalty agreement decreased to \$97,225 in the three-month period ended February 28, 2007 from \$160,968 in the comparable period in 2006. Revenues from U.S. operations increased to \$2,466,629 in the first quarter of 2007 from \$2,214,369 in 2006.

The increase in sales for U.S. operations is due to increased sales volumes. The Company's primary strategic focus is generating its own proprietary opportunities with both its existing customer base as well as new prospects in order to build a more competitive base of business in the United States. During the first quarter of 2007 the Company launched "Nundies," a new women's undergarment product owned by the Company. This product is being sold through retailers and is available for direct purchase at mynundies.com.

The Singapore royalty agreement generated gross profit of \$97,225 and \$160,968 for the three month periods ended February 28, 2007 and 2006, respectively. Net income attributable to this agreement was \$87,503 and \$144,871 for the three-month periods ended February 28, 2007 and 2006, respectively.

Cost of goods sold for the quarters ended February 28, 2007 and February 28, 2006 were \$2,072,293 and \$1,700,786, respectively. The Company's gross profit margin was 19% in the 2007 period, compared to 28% in the 2006 period. Partially, the increased cost of goods sold is due to the launch of the new fashion product "Nundies." During the launch period, the Company was not able to obtain bulk order pricing from suppliers. The Company continues its strategy of negotiating supply contracts to guard against changing market conditions that may increase costs and buying in bulk quantities, when available, to achieve lower costs. Cost of goods increased due to cost of launching of the "Nundies" product in anticipation of sales.

Selling, general and administrative expenses for the first quarter of fiscal 2007 and 2006 were \$359,175 and \$464,727, respectively, representing a decrease of \$105,552 or 23%.

Interest expense for the first quarter of fiscal 2007 and 2006 was \$22,217 and \$41,884, respectively. Interest expense relates primarily to bank borrowings and will increase or decrease based on interest rate fluctuations.

The Company recorded an income tax benefit of \$178,944 in the first quarter of 2007. This benefit was mainly a result of the Company reducing its deferred tax asset allowance as management has determined that it is more likely than not that these assets will be realized. This transaction increased the Deferred Tax Asset balance to \$812,944, as of February 28, 2007. As of February 28, 2007, the Company has a net operating tax loss carryforward of approximately \$6,140,056 available to offset future Federal tax liabilities.

Net income for the first quarter of fiscal 2007 was \$272,985, compared to \$152,693 for the first quarter of fiscal 2006. Basic and diluted net income per share for the first quarter of fiscal 2007 was \$0.02 per share, compared to \$0.01 per share for the first quarter of fiscal 2006.

LIQUIDITY AND CAPITAL RESOURCES

Cash and cash equivalents were \$290,736 at February 28, 2007, compared with \$441,860 at November 30, 2006. Operating activities used \$14,794 of cash during the first quarter of fiscal 2007, compared with cash provided of \$33,097 in the corresponding period of fiscal 2006. The cash used by operating activities in the first quarter of 2007 resulted primarily from an increase in inventories of \$327,774 offset by an increase in accounts payable of \$199,161. Significant non-cash items included an adjustment to deferred tax assets of \$178,944 and depreciation and amortization expense of \$51,005.

Capital expenditures were \$22,915 for the three months ended February 28, 2007, compared to \$20,694 for the corresponding period in fiscal 2006. The Company has instituted a Company-wide program to reduce non-essential capital expenditures that are not specifically focused on revenue growth.

The Company uses short- and long-term borrowings to supplement internally generated cash flow. Activity related to short- and long-term borrowings in the three-months ended February 28, 2007 resulted in cash used in financing activities of \$113,415 compared to cash provided in financing activities of \$29,683 in the same period of 2006.

In October 2006, the Company obtained a line of credit agreement with a financial institution, which provides for borrowings up to \$1,500,000. The line of credit bears interest at the prime rate of interest plus 0.25%. The line of credit is secured by substantially all of the assets of the Company. The line of credit agreement requires the Company to maintain certain financial covenants including (i) a fixed charge coverage ratio of not less than 1.25:1 for the immediately preceding rolling twelve month period, (ii) an adjusted tangible net worth of not less than \$1,000,000 as of end of each fiscal quarter, for the immediately preceding rolling twelve month period, (ii) inventory turnover of not more than eighty (80) days as determined on a rolling twelve (12) month basis, and (iv) unfunded capital expenditures not in excess of \$100,000.00 in any fiscal year. As of the last day of the first fiscal quarter of 2007, the Company was in compliance with all covenants contained in the line of credit loan agreement, and the amount outstanding under the line of credit was \$756,721.

FACTORS THAT COULD AFFECT FUTURE RESULTS

BANKING - The Company continues to improve the balance sheet through the realization of positive earnings quarter over quarter. This has allowed the Company to seek out conventional bank financing other than the current asset based credit facility in place. The Company is working towards moving to conventional bank line of credit by the second quarter of 2007.

COMPETITION - The Company encounters aggressive competition in all areas of its business. It has numerous competitors, ranging from several comparable-size companies to many relatively small companies. The majority of the competitors are private, closely held companies. There is also the risk that a supplier to the Company could become a competitor. The Company competes primarily on the basis of performance, price, quality and customer service. To remain competitive, the Company must be able to quickly develop new products and enhance existing products in response to customer demands. In some of its markets, the Company may not be able to successfully compete against current and future competitors, and the competitive pressures faced could harm the Company's business and prospects.

NEW PRODUCT INTRODUCTIONS - The process of developing new products and corresponding manufacturing processes is complex and uncertain. The customer decision-making process can be lengthy and some raw materials have extremely long lead times. These circumstances often lead to long delays in new product introductions. After a product is developed, the Company must be able to manufacture sufficient volumes quickly at low enough costs. To do this it must accurately forecast volumes and mix of products. Customer orders have also been subject to dramatic swings from customer provided forecasts. Thus, matching customers' demand and timing for particular products makes the process of planning production and managing inventory levels increasingly difficult. If the Company

cannot continue to rapidly develop and manufacture innovative products that meet customer requirements for performance, price, quality and customer service, it may lose market share and future revenue and earnings may suffer.

RELIANCE ON SUPPLIERS - The Company's manufacturing operations depend on its suppliers' ability to deliver quality raw materials and components in time for the Company to meet critical manufacturing and distribution schedules. The Company sometimes experiences a short supply of certain raw materials as a result of supplier out-of-stock situations or long manufacturing lead times. If shortages or delays exist, the Company's future operating results could suffer. Furthermore, it may not be able to secure enough raw materials at reasonable prices to manufacture new products in the quantities required to meet customer demand. Sudden or large raw materials price increases could also cause future operating results to suffer if the Company is not able to increase its sales prices to account for the materials price increases. Any of these factors, if realized, could reduce the Company's profitability and operating results.

EARTHQUAKE - The AM manufacturing division in California is located near major earthquake faults. The ultimate impact on the Company and its general infrastructure is unknown, but operating results could be materially affected in the event of a major earthquake. The Company is predominantly uninsured for losses and interruptions caused by earthquakes.

INTELLECTUAL PROPERTY - The Company's success will depend, in part, on its ability to obtain and enforce intellectual property protection for our technology in both the United States and other countries. Although the Company has issued certain patents, it has filed patent applications in the United States Patent and Trademark Office with respect to certain patents that have not yet been issued. The Company cannot provide any assurance that patents will issue from these applications or that, with respect to any patents, issued or pending, the claims allowed are, or will be, sufficiently broad to protect the key aspects of our technology, or that the patent laws will provide effective legal or injunctive remedies to stop any infringement of its patents. In addition, the Company cannot assure investors that any owned patent rights will not be challenged, invalidated or circumvented, that the rights granted under patents will provide competitive advantages, or that competitors will not independently develop or patent technologies that are substantially equivalent or superior to our technology. The Company's business plan assumes that it will obtain and maintain comprehensive patent protection of its technologies. The Company cannot assure investors that such protection will be obtained, or that, if obtained, it will withstand challenge. Furthermore, if an action is brought, a court may find that the Company has infringed on the patents owned by others. The Company may have to go to court to defend its patents, to prosecute infringements, or to defend infringement claims made by others. Patent litigation is expensive and time-consuming, and well-funded adversaries can use such actions as part of a strategy for depleting the resources of a small company such as AM. The Company cannot assure investors that we will have sufficient resources to successfully prosecute our interests in any litigation that may be brought.

ENVIRONMENTAL - Some of the Company's operations use substances regulated under various federal, state and international laws governing the environment. It is the Company's policy to apply strict standards for environmental protection to sites inside and outside the U.S., even when not subject to local government regulations. The Company has not been notified of any environmental infractions.

STOCK PRICE - The Company's stock price has historically been volatile. Some of the factors that can affect the stock price are:

- o The Company's, its customer's or its competitor's announcement of new or discontinued products,
- o Quarterly increases or decreases in earnings,
- o Changes in revenue or earnings estimates by the investment community, and
- o Speculation in the press or investment community.

General market conditions and domestic or international macroeconomic factors unrelated to the Company's performance may also affect the stock price. For these reasons, investors should not rely on recent trends to predict future stock prices or financial results. In addition, following periods of volatility in a company's securities, securities class action litigation against a company is sometimes instituted. This type of litigation could result in substantial costs and the diversion of management time and resources.

ITEM 3 - CONTROLS AND PROCEDURES

The Company's Chief Executive Officer and President/Chief Financial Officer (the Company's principal executive officer and principal financial officer), have evaluated the effectiveness of the Company's disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934) as of the period ended February 28, 2007, the period covered by this Quarterly Report on Form 10-QSB. Based upon that evaluation, the Company's principal Chief Executive Officer and Chief Financial Officer have concluded that as of February 28, 2007, the Company's disclosure controls and procedures are effective in recording, processing, summarizing and reporting, on a timely basis, information required to be disclosed by the Company in the reports that it files or submits under the Exchange Act.

There were no changes in the Company's internal control over financial reporting that occurred during the period ended February 28, 2007 that have materially affected, or are reasonable likely to materially affect, the Company's internal control over financial reporting.

PART II - OTHER INFORMATION

CERTIFICATIONS

I, Ricardo G. Brutocao, certify that:

1. I have reviewed this quarterly report on Form 10-QSB of Advanced Materials Group, Inc.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the consolidated financial statements, and other financial information included in this report, fairly present in all material respects the consolidated financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) [language omitted pursuant to SEC Release 34-47986] for the registrant and have:
 - (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - (b) [Omitted pursuant to SEC Release 34-47986];
 - (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - (d) Disclosed in this report any change in the registrant's internal Control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the small business issuer's board of directors (or persons performing the equivalent functions):
 - (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
