Form 10-K
March 02, 2018
UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

FORM 10-K

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF
THE SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended December 31, 2017

Commission File Number 0-16587
Summit Financial Group, Inc.
(Exact name of registrant as specified in its charter)
West Virginia 55-0672148
(State or other jurisdiction of (I.R.S. Employer
incorporation or organization) Identification No.)

300 N. Main Street 26836
Moorefield, West Virginia (Zip Code)
(Address of principal executive offices)

(304) 530-1000
(Registrant's telephone number, including area code)

Securities registered pursuant to Section 12(b) of the Act:

Common
(Title of Class)

The NASDAQ Capital Market
(Name of Exchange on which registered)

Securities registered pursuant to Section 12(g) of the Act: None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.
Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act.
Yes No

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports) and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its Website, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this

chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K (§229.405 of this chapter) is not contained herein and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendments to this Form 10-K.

Indicate by check mark whether the registrant is large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company or emerging growth company. See definitions of "large accelerated filer", "accelerated filer", "smaller reporting company" and "emerging growth company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer
Non-accelerated filer (Do not check if a smaller reporting company) Smaller reporting company
Emerging growth company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).
Yes No

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes No

The aggregate market value of the voting common equity held by non-affiliates of the registrant at June 30, 2017, was approximately \$237,632,000. Registrant has assumed that all of its executive officers and directors are affiliates. Such assumption shall not be deemed to be conclusive for any other purpose.

The number of shares of the Registrant's Common Stock outstanding on February 28, 2018 was 12,465,496.

Documents Incorporated by Reference

The following lists the documents which are incorporated by reference in the Annual Report Form 10-K and the Parts and Items of the Form 10-K into which the documents are incorporated.

Document	Part of Form 10-K into which document is incorporated

PART I.

Item 1. Business

Summit Financial Group, Inc. (“Company” or “Summit”) is a \$2.13 billion financial holding company headquartered in Moorefield, West Virginia incorporated on March 5, 1987. We provide community banking services primarily in the Eastern Panhandle and Southern regions of West Virginia and the Northern, Shenandoah Valley and Southwestern regions of Virginia. We provide these services through our community bank subsidiary, Summit Community Bank (“Summit Community” or “Bank”). We also operate Summit Insurance Services, LLC in Moorefield, West Virginia and Leesburg, Virginia, which provides insurance brokerage services to individuals and businesses covering corporate and personal property and casualty insurance products, as well as group health and life insurance products and consulting services.

Community Banking

We provide a wide range of community banking services, including demand, savings and time deposits; commercial, real estate and consumer loans; trust and wealth management services; and cash management services. The deposits of Summit Community are insured by the Federal Deposit Insurance Corporation (“FDIC”).

In order to compete with other financial service providers, we principally rely upon personal relationships established by our officers, directors and employees with our clients and specialized services tailored to meet our clients’ needs. We have maintained a strong community orientation by, among other things, supporting the active participation of staff members in local charitable, civic, school, religious and community development activities. We also have a marketing program that primarily utilizes local radio and newspapers to advertise. Banking, like most industries, is becoming more dependent on technology as a means of marketing to customers, including the Internet, which we also utilize. This approach, coupled with continuity of service by the same staff members, enables Summit Community to develop long-term customer relationships, maintain high quality service and respond quickly to customer needs. We believe that our emphasis on local relationship banking, together with a prudent approach to lending, are important factors in our success and growth.

All operational and support functions that are transparent to clients are centralized in order to achieve consistency and cost efficiencies in the delivery of products and services by each banking office. The central office provides services such as data processing, deposit operations, accounting, treasury management, loan administration, loan review, compliance, risk management and internal auditing to enhance our delivery of quality service. We also provide overall direction in the areas of credit policy and administration, strategic planning, marketing, investment portfolio management, human resources administration and other financial and administrative services. The banking offices work closely with us to develop new products and services needed by their customers and to introduce enhancements to existing products and services.

Lending

Our primary lending focus is providing commercial loans to local businesses with annual sales generally ranging from \$300,000 to \$30 million and providing owner-occupied real estate loans to individuals. Typically, our customers have financing requirements between \$50,000 and \$10 million. We generally do not seek loans of more than \$15 million but will consider larger lending relationships exhibiting above-average credit quality. Under our commercial banking strategy, we focus on offering a broad line of financial products and services to small and medium-sized businesses through full service banking offices. Summit Community Bank has senior management with extensive lending experience. These managers exercise substantial authority over credit and pricing decisions, subject to loan committee approval for larger credits.

We segment our loan portfolio in to the following major lending categories: commercial, commercial real estate, construction and land development, residential real estate, consumer and mortgage warehouse lines of credit. Commercial loans are loans made to commercial borrowers that are not secured by real estate. These encompass loans secured by accounts receivable, inventory and equipment, as well as unsecured loans. Commercial real estate loans consist of commercial mortgages, which generally are secured by nonresidential and multi-family residential properties. Commercial real estate loans are made to many of the same customers and carry similar industry risks as the commercial loan portfolio. Construction and development loans are loans made for the purpose of financing construction or development projects. This portfolio includes commercial and residential land development loans, one-to-four family housing construction, both pre-sold and speculative in nature, multi-family housing construction, non-residential building construction and undeveloped land. Residential real estate loans are mortgage loans to consumers and are secured primarily by a first lien deed of trust. These loans are traditional one-to-four family residential mortgages. Also included in this category of loans are second liens on one-to-four family properties, commercial loans secured by one-to-four family residence and home equity loans. Consumer loans are loans that establish consumer credit that is granted for the consumer's personal use. These loans include automobile loans and recreational vehicle

Table of Contents

1

loans, as well as personal secured and unsecured loans. Our mortgage warehouse lines of credit result solely from a participation arrangement with a regional bank to fund residential mortgage warehouse lines of medium- and large-sized mortgage originators located throughout the United States.

Our loan underwriting guidelines and standards are consistent with the prudent banking practices applicable to the relevant exposure and are updated periodically and presented to the Board of Directors for approval. The purpose of these standards and guidelines are: to grant loans on a sound and collectible basis; to invest available funds in a safe and profitable manner; to serve the legitimate credit needs of our primary market area; and to ensure that all loan applicants receive fair and equal treatment in the lending process. It is the intent of the underwriting guidelines and standards to: minimize losses by carefully investigating the credit history of each applicant; verify the source of repayment and the ability of the applicant to repay; collateralize those loans in which collateral is deemed to be required; exercise care in the documentation of the application, review, approval and origination process; and administer a comprehensive loan collection program.

Our real estate underwriting loan-to-value (“LTV”) policy limits are at or below current bank regulatory guidelines, as follows:

	Regulatory LTV Guideline	Summit LTV Policy Limit
Undeveloped land	65%	65%
Land development	75%	70%
Land development - Finished building lots	85%	85%
Construction:		
Commercial, multifamily and other non-residential	80%	80%
1-4 family residential, consumer borrower	85%	85%
1-4 family residential, pre-sold commercial borrower	80%	80%
1-4 family residential, spec, commercial borrower	80%	70%
Improved property:		
Residential real estate - nonowner occupied	85%	85%
Commercial real estate - owner occupied	85%	85%
Commercial real estate - nonowner occupied	85%	85%
Owner occupied 1-4 family	90%	90%
Home equity	90%	90%

Exceptions are permitted to these regulatory guidelines as long as such exceptions are identified, monitored and reported to the Board of Directors at least quarterly and the total of such exceptions do not exceed 100% of Summit Community’s total regulatory capital, which totaled \$207.6 million as of December 31, 2017. As of this date, we had loans approximating \$97.1 million which exceeded the above regulatory LTV guidelines, as follows:

Undeveloped land	\$5.3 million
Land development	\$1.7 million
Land development - Finished building lots	\$—
Construction:	
Commercial, multifamily and other non-residential	\$0.3 million
1-4 family residential, consumer borrower	\$—
1-4 family residential, pre-sold, commercial borrower	\$4.7 million
1-4 family residential, spec, commercial borrower	\$3.8 million
Improved property:	
Residential real estate - nonowner occupied	\$26.6 million
Commercial real estate - owner occupied	\$23.6 million
Commercial real estate - nonowner occupied	\$18.1 million

Owner occupied 1-4 family	\$12.4million
Home equity	\$0.6 million

Our underwriting standards and practice are designed to originate both fixed and variable rate loan products, consistent with the underwriting guidelines discussed above. Adjustable rate and variable rate loans are underwritten, giving consideration both to the loan's initial rate and to higher assumed rates, commensurate with reasonably anticipated market conditions. Accordingly, we want to insure that adequate primary repayment capacity exists to address both future increases in interest rates and

Table of Contents

2

fluctuations in the underlying cash flows available for repayment. Historically, we have not offered “payment option ARM” loans. Further, we have had no loan portfolio products which were specifically designed for “sub-prime” borrowers (defined as consumers with a credit score of less than 599).

Supervision and Regulation

General

We are subject to regulation by the Board of Governors of the Federal Reserve System (“FRB”), the West Virginia Division of Financial Institutions, the Securities and Exchange Commission (the “SEC”) and other federal and state regulators. As a financial holding company, we are subject to the restrictions of the Bank Holding Company Act of 1956, as amended (“BHCA”), are registered pursuant to its provisions and are subject to examination by the FRB. As a financial holding company doing business in West Virginia, we are also subject to regulation by and must submit annual reports to the West Virginia Division of Financial Institutions.

The BHCA prohibits the acquisition by a financial holding company of direct or indirect ownership of more than five percent (5%) of the voting shares of any bank within the United States without prior approval of the FRB. With certain exceptions, a financial holding company is prohibited from acquiring direct or indirect ownership or control of more than five percent (5%) of the voting shares of any company that is not a bank and from engaging directly or indirectly in business unrelated to the business of banking or managing or controlling banks.

The FRB, in its Regulation Y, permits financial holding companies to engage in non-banking activities closely related to banking or managing or controlling banks. Approval of the FRB is necessary to engage in these activities or to make acquisitions of corporations engaging in these activities as the FRB determines whether these acquisitions or activities are in the public interest. In addition, by order, and on a case by case basis, the FRB may approve other non-banking activities.

The BHCA permits us to purchase or redeem our own securities. However, Regulation Y provides that prior notice must be given to the FRB if the total consideration for such purchase or consideration, when aggregated with the net consideration paid by us for all such purchases or redemptions during the preceding 12 months is equal to ten percent (10%) or more of our consolidated net worth. Prior notice is not required if (i) both before and immediately after the redemption, the financial holding company is well capitalized; (ii) the financial holding company is well managed and (iii) the financial holding company is not the subject of any unresolved supervisory issues.

The FRB has broad authority to prohibit activities of bank holding companies and their non-banking subsidiaries that represent unsafe and unsound banking practices or which constitute violations of laws or regulations. The FRB also can assess civil money penalties for certain activities conducted on a knowing and reckless basis, if those activities caused a substantial loss to a depository institution. The penalties can be as high as \$1 million for each day the activity continues.

Summit Community, our only bank subsidiary, is subject to West Virginia banking statutes and regulations, and is primarily regulated by the West Virginia Division of Financial Institutions and the FDIC. The Bank is also subject to regulations promulgated by the FRB. As a member of the FDIC, Summit Community’s deposits are insured as required by federal law. Bank regulatory authorities regularly examine revenues, loans, investments, management practices and other aspects of Summit Community. These examinations are conducted primarily to protect depositors and not shareholders. In addition to these regular examinations, the Bank must furnish to regulatory authorities quarterly reports containing full and accurate statements of its affairs.

Because we are a public company, we are subject to regulation by the SEC. SEC regulations require us to disclose certain types of business and financial data on a regular basis to the SEC and to our shareholders. We are required to

file annual, quarterly and current reports with the SEC. We prepare and file an annual report on Form 10-K with the SEC that contains detailed financial and operating information, as well as a management response to specific questions about our operations. SEC regulations require that our annual reports to shareholders contain certified financial statements and other specific items such as management's discussion and analysis of our financial condition and results of operations. We must also file quarterly reports with the SEC on Form 10-Q that contain detailed financial and operating information for the prior quarter and we must file current reports on Form 8-K to provide the public with information on recent material events.

In addition to periodic reporting to the SEC, we are subject to proxy rules and tender offer rules issued by the SEC. Our officers, directors and principal shareholders (holding 10% or more of our stock) must also submit reports to the SEC regarding their holdings of our stock and any changes to such holdings and they are subject to short-swing profit liability. Because we are traded on the NASDAQ, we are also subject to the listing standards of NASDAQ.

3

Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010

The “Dodd-Frank Wall Street Reform and Consumer Protection Act” (the “Dodd-Frank Act”), which is complex and broad in scope, established the Bureau of Consumer Financial Protection (the “CFPB”), which has extensive regulatory and enforcement powers over consumer financial products and services, and the Financial Stability Oversight Council, which has oversight authority for monitoring systemic risk. We will be required to comply with the Consumer Financial Protection Act and the CFPB’s rules; however, these rules will be enforced by our primary regulator, the FRB, not the CFPB. In addition, the Dodd-Frank Act alters the authority and duties of the federal banking and securities regulatory agencies, implements certain corporate governance requirements for all public companies, including financial institutions with regard to executive compensation, proxy access by shareholders and certain whistleblower provisions and restricts certain proprietary trading and hedge fund and private equity activities of banks and their affiliates. Although the regulations that directly affect our business have been adopted, many of the provisions of the Dodd-Frank Act are subject to final rulemaking by the U.S. financial regulatory agencies and the implications of the Dodd-Frank Act for our business will depend to some extent on how such rules are adopted and implemented by the primary U.S. financial regulatory agencies.

Bank Holding Company Activities

In general, the BHC Act limits the business of bank holding companies to banking, managing or controlling banks and other activities that the FRB has determined to be so closely related to banking as to be a proper incident thereto. In addition, bank holding companies that qualify and elect to be financial holding companies may engage in any activity, or acquire and retain the shares of a company engaged in any activity, that is either (i) financial in nature or incidental to such financial activity (as determined by the FRB in consultation with the Secretary of the Treasury) or (ii) complementary to a financial activity and does not pose a substantial risk to the safety and soundness of depository institutions or the financial system generally (as solely determined by the FRB), without prior approval of the FRB.

Activities that are financial in nature include securities underwriting and dealing, insurance underwriting and making merchant banking investments. Some examples of non-banking activities which presently may be performed by a financial holding company are: making or acquiring, for its own account or the account of others, loans and other extensions of credit; operating as an industrial bank, or industrial loan company, in the manner authorized by state law; servicing loans and other extensions of credit; performing or carrying on any one or more of the functions or activities that may be performed or carried on by a trust company in the manner authorized by federal or state law; acting as an investment or financial advisor; leasing real or personal property; making equity or debt investments in corporations or projects designed primarily to promote community welfare, such as the economic rehabilitation and the development of low income areas; providing bookkeeping services or financially oriented data processing services for the holding company and its subsidiaries; acting as an insurance agent or a broker; acting as an underwriter for credit life insurance, which is directly related to extensions of credit by the financial holding company system; providing courier services for certain financial documents; providing management consulting advice to non-affiliated banks; selling retail money orders having a face value of not more than \$1,000, traveler’s checks and U.S. savings bonds; performing appraisals of real estate; arranging commercial real estate equity financing under certain limited circumstances; providing securities brokerage services related to securities credit activities; underwriting and dealing in government obligations and money market instruments; providing foreign exchange advisory and transactional services; and acting, under certain circumstances, as futures commission merchant for non-affiliated persons in the execution and clearance on major commodity exchanges of futures contracts and options.

To maintain financial holding company status, a financial holding company and all of its depository institution subsidiaries must be “well capitalized” and “well managed.” A depository institution subsidiary is considered to be “well capitalized” if it satisfies the requirements for this status discussed in the section captioned “Capital Requirements” included elsewhere in this item. A depository institution subsidiary is considered “well managed” if it received a composite rating and management rating of at least “satisfactory” in its most recent examination. A financial holding

company's status will also depend upon it maintaining its status as "well capitalized" and "well managed" under applicable FRB regulations. If a financial holding company ceases to meet these capital and management requirements, the FRB's regulations provide that the financial holding company must enter into an agreement with the FRB to comply with all applicable capital and management requirements. Until the financial holding company returns to compliance, the FRB may impose limitations or conditions on the conduct of its activities and the company may not commence any of the broader financial activities permissible for financial holding companies or acquire a company engaged in such financial activities without prior approval of the FRB. If the company does not return to compliance within 180 days, the FRB may require divestiture of the holding company's depository institutions. Bank holding companies and banks must also be both well capitalized and well managed in order to acquire banks located outside their home state.

Table of Contents

4

In order for a financial holding company to commence any new activity permitted by the BHC Act or to acquire a company engaged in any new activity permitted by the BHC Act, each insured depository institution subsidiary of the financial holding company must have received a rating of at least “satisfactory” in its most recent examination under the Community Reinvestment Act. See the section captioned “Community Reinvestment Act” included elsewhere in this item.

The FRB has the power to order any bank holding company or its subsidiaries to terminate any activity or to terminate its ownership or control of any subsidiary when the FRB has reasonable grounds to believe that continuation of such activity or such ownership or control constitutes a serious risk to the financial soundness, safety or stability of any bank subsidiary of the bank holding company.

The Dodd-Frank Act amends the BHC Act to require the federal financial regulatory agencies to adopt rules that prohibit banks and their affiliates from engaging in proprietary trading and investing in and sponsoring certain unregistered investment companies (defined as hedge funds and private equity funds). The statutory provision is commonly called the “Volcker Rule”. The Volcker Rule has not had a material impact on our operations as we do not generally engage in activities prohibited by the Volcker Rule.

The BHC Act, the Bank Merger Act, the West Virginia Banking Code and other federal and state statutes regulate acquisitions of commercial banks. The BHC Act requires the prior approval of the FRB for the direct or indirect acquisition by a bank holding company of more than 5.0% of the voting shares of a commercial bank or its parent holding company. Under the Bank Merger Act, the prior approval of the FRB or other appropriate bank regulatory authority is required for a member bank to merge with another bank or purchase the assets or assume the deposits of another bank. In reviewing applications seeking approval of merger and acquisition transactions, the bank regulatory authorities will consider, among other things, the competitive effect and public benefits of the transactions, the capital position of the combined organization, the risks to the stability of the U.S. banking or financial system, the applicant’s performance record under the Community Reinvestment Act (see the section captioned “Community Reinvestment Act” included elsewhere in this item) and its compliance with fair housing and other consumer protection laws and the effectiveness of the subject organizations in combating money laundering activities.

Dividends

The principal source of our liquidity is dividends from Summit Community. The prior approval of the Federal Reserve is required if the total of all dividends declared by a state-chartered member bank in any calendar year would exceed the sum of the bank’s net profits for that year and its retained net profits for the preceding two calendar years, less any required transfers to surplus or to fund the retirement of preferred stock. Federal law also prohibits a state-chartered, member bank from paying dividends that would be greater than the bank’s undivided profits. Summit Community is also subject to limitations under West Virginia state law regarding the level of dividends that may be paid.

In addition, the Company and Summit Community are subject to other regulatory policies and requirements relating to the payment of dividends, including requirements to maintain adequate capital above regulatory minimums. The appropriate federal regulatory authority is authorized to determine under certain circumstances relating to the financial condition of a bank holding company or a bank that the payment of dividends would be an unsafe or unsound practice and to prohibit payment thereof. The appropriate federal regulatory authorities have stated that paying dividends that deplete a bank’s capital base to an inadequate level would be an unsafe and unsound banking practice and that banking organizations should generally pay dividends only out of current operating earnings.

Credit and Monetary Policies and Related Matters

Summit Community is affected by the fiscal and monetary policies of the federal government and its agencies, including the FRB. An important function of these policies is to curb inflation and control recessions through control

of the supply of money and credit. The operations of Summit Community are affected by the policies of government regulatory authorities, including the FRB, which regulates money and credit conditions through open-market operations in United States Government and Federal agency securities, adjustments in the discount rate on member bank borrowings and requirements against deposits and regulation of interest rates payable by member banks on time and savings deposits. These policies have a significant influence on the growth and distribution of loans, investments and deposits, and interest rates charged on loans, or paid for time and savings deposits, as well as yields on investments. The FRB has had a significant effect on the operating results of commercial banks in the past and is expected to continue to do so in the future. Future policies of the FRB and other authorities and their effect on future earnings cannot be predicted.

Table of Contents

5

The FRB has a policy that a financial holding company is expected to act as a source of financial and managerial strength to each of its subsidiary banks and to commit resources to support each such subsidiary bank. Under the source of strength doctrine, the FRB may require a financial holding company to contribute capital to a troubled subsidiary bank and may charge the financial holding company with engaging in unsafe and unsound practices for failure to commit resources to such a subsidiary bank. This capital injection may be required at times when Summit may not have the resources to provide it. Any capital loans by a holding company to any subsidiary bank are subordinate in right of payment to deposits and to certain other indebtedness of such subsidiary bank. In addition, the Crime Control Act of 1990 provides that in the event of a financial holding company's bankruptcy, any commitment by such holding company to a Federal bank or thrift regulatory agency to maintain the capital of a subsidiary bank will be assumed by the bankruptcy trustee and entitled to a priority of payment.

Capital Requirements

As a financial holding company, we are subject to FRB risk-based capital guidelines. In general, the guidelines establish a systematic analytical framework that makes regulatory capital requirements more sensitive to differences in risk profiles among banking organizations, takes off-balance sheet exposures into explicit account in assessing capital adequacy and minimizes disincentives to holding liquid, low-risk assets. Summit Community is subject to substantially similar capital requirements adopted by the FDIC. Under the guidelines and related policies, financial holding companies must maintain capital sufficient to meet both a risk-based asset ratio test and leverage ratio test on a consolidated basis.

Under the requirements, banking organizations are required to maintain minimum ratios for Tier 1 capital and total capital to risk-weighted assets (including certain off-balance sheet items, such as letters of credit). For purposes of calculating the ratios, a banking organization's assets and some of its specified off-balance sheet commitments and obligations are assigned to various risk categories. A depository institution's or holding company's capital, in turn, is classified in one of two tiers, depending on type:

Core Capital (Tier 1). Tier 1 capital includes common equity, retained earnings, qualifying non-cumulative perpetual preferred stock, minority interests in equity accounts of consolidated subsidiaries (and, under existing standards, a limited amount of qualifying trust preferred securities and qualifying cumulative perpetual preferred stock at the holding company level), less goodwill, most intangible assets and certain other assets.

Supplementary Capital (Tier 2). Tier 2 capital includes, among other things, perpetual preferred stock and trust preferred securities not meeting the Tier 1 definition, qualifying mandatory convertible debt securities, qualifying subordinated debt and allowances for loan and lease losses, subject to limitations.

In July 2013, the Company's and Summit Community's federal banking regulators published the Basel III Capital Rules establishing a new comprehensive capital framework for U.S. banking organizations. The rules implement the Basel Committee on Banking Supervision's (the "Basel Committee") December 2010 framework known as "Basel III" for strengthening international capital standards as well as certain provisions of the Dodd-Frank Act. The Basel III Capital Rules substantially revise the risk-based capital requirements applicable to financial holding companies and depository institutions, including the Company and Summit Community. The Basel III Capital Rules define the components of capital and address other issues affecting the numerator in banking institutions' regulatory capital ratios. The Basel III Capital Rules also address risk weights and other issues affecting the denominator in banking institutions' regulatory capital ratios and replace the existing risk-weighting approach, which was derived from the Basel I capital accords of the Basel Committee, with a more risk-sensitive approach based, in part, on the standardized approach in the Basel Committee's 2004 "Basel II" capital accords. The Basel III Capital Rules also implement the requirements of Section 939A of the Dodd-Frank Act to remove references to credit ratings from the federal banking agencies' rules. The Basel III Capital Rules were effective for the Company and Summit Community on January 1, 2015 (subject to a phase-in period).

The Basel III Capital Rules, among other things, (i) introduced a new capital measure called “Common Equity Tier 1” (“CET1”), (ii) specified that Tier 1 capital consists of CET1 and “Additional Tier 1 capital” instruments meeting specified requirements, (iii) defined CET1 narrowly by requiring that most deductions/adjustments to regulatory capital measures be made to CET1 and not to the other components of capital and (iv) expanded the scope of the deductions/adjustments as compared to existing regulations.

When fully phased in on January 1, 2019, the Basel III Capital Rules will require the Company and Summit Community to maintain (i) a minimum ratio of CET1 to risk-weighted assets of at least 4.5%, plus a 2.5% “capital conservation buffer” (which is added to the 4.5% CET1 ratio as that buffer is phased in, effectively resulting in a minimum ratio of CET1 to risk-weighted assets of at least 7% upon full implementation), (ii) a minimum ratio of Tier 1 capital to risk-weighted assets of at least 6.0%, plus the capital conservation buffer (which is added to the 6.0% Tier 1 capital ratio as that buffer is phased in, effectively

Table of Contents

6

resulting in a minimum Tier 1 capital ratio of 8.5% upon full implementation), (iii) a minimum ratio of Total capital (that is, Tier 1 plus Tier 2) to risk-weighted assets of at least 8.0%, plus the capital conservation buffer (which is added to the 8.0% total capital ratio as that buffer is phased in, effectively resulting in a minimum total capital ratio of 10.5% upon full implementation) and (iv) a minimum leverage ratio of 4%, calculated as the ratio of Tier 1 capital to average assets (as compared to a current minimum leverage ratio of 3% for banking organizations that either have the highest supervisory rating or have implemented the appropriate federal regulatory authority's risk-adjusted measure for market risk).

The aforementioned capital conservation buffer is designed to absorb losses during periods of economic stress. Banking institutions with a ratio of CET1 to risk-weighted assets above the minimum but below the conservation buffer will face regulatorily prescribed limitations on dividend payments, discretionary payments on tier 1 capital instruments, share buybacks and discretionary bonus payments to certain Company officers based on the amount of the shortfall.

Under the Basel III Capital Rules, the applicable minimum capital ratios inclusive of the phased-in conservation buffer effective as of January 1, 2018 are as follows:

- 6.375% CET1 to risk-weighted assets
- 7.875% Tier 1 capital to risk-weighted assets
- 9.875% Total capital to risk-weighted assets
- 4.0% Tier 1 capital to average assets (leverage ratio)

The Basel III Capital Rules provide for a number of deductions from and adjustments to CET1. These include, for example, the requirement that mortgage servicing rights, deferred tax assets arising from temporary differences that could not be realized through net operating loss carrybacks and significant investments in non-consolidated financial entities be deducted from CET1 to the extent that any one such category exceeds 10% of CET1 or all such categories in the aggregate exceed 15% of CET1. Furthermore, the effects of accumulated other comprehensive income items included in capital are excluded for the purposes of determining regulatory capital ratios under current capital standards. However, under the Basel III Capital Rules, the effects of certain accumulated other comprehensive items are not excluded; however, certain banking organizations, including the Company and Summit Community, were permitted to make a one-time permanent election to continue to exclude these items. The Company and Summit Community made this election in order to minimize variations in the level of capital.

The Basel III Capital Rules also preclude certain hybrid securities, such as trust preferred securities, as Tier 1 capital of bank holding companies, subject to phase-out. However, for holding companies of depository institutions with less than \$15 billion in consolidated total assets as of December 31, 2009, the rules do not require a phase out of trust preferred securities issued prior to May 19, 2010. This means that all of our trust preferred securities are permanently grandfathered as Tier 1 capital instruments.

Implementation of the deductions and other adjustments to CET1 began on January 1, 2015 and will be phased-in over a four-year period (beginning at 40% on January 1, 2015 and an additional 20% per year thereafter). The implementation of the capital conservation buffer began on January 1, 2016 at the 0.625% level and will be phased in over a four-year period (increasing by that amount on each subsequent January 1, until it reaches 2.5% on January 1, 2019).

With respect to Summit Community, the Basel III Capital Rules also revise the "prompt corrective action" regulations pursuant to Section 38 of the Federal Deposit Insurance Act, as discussed below under "Prompt Corrective Action."

The Basel III Capital Rules prescribe a standardized approach for risk weightings that expand the risk-weighting categories from the current four Basel I-derived categories (0%, 20%, 50% and 100%) to a much larger and more

risk-sensitive number of categories, depending on the nature of the assets, generally ranging from 0% for U.S. government and agency securities, to 600% for certain equity exposures and resulting in higher risk weights for a variety of asset categories. Specific changes to current rules impacting our determination of risk-weighted assets include, among other things:

- Applying a 150% risk weight instead of a 100% risk weight for certain high volatility commercial real estate acquisition, development and construction loans.

- Assigning a 150% risk weight to exposures (other than residential mortgage exposures) that are 90 days past due.

- Providing for a 20% credit conversion factor for the unused portion of a commitment with an original maturity of one year or less that is not unconditionally cancellable (currently set at 0%).

- Providing for a risk weight, generally not less than 20% with certain exceptions, for securities lending transactions based on the risk weight category of the underlying collateral securing the transaction.

Table of Contents

7

In addition, the Basel III Capital Rules provide more advantageous risk weights for derivatives and repurchase-style transactions cleared through a qualifying central counterparty and increase the scope of eligible guarantors and eligible collateral for purposes of credit risk mitigation.

The Basel III Capital Rules continue to apply the previously applicable risk-based standard for residential mortgage loans which includes a 50% risk-weight for prudently underwritten first-lien mortgages that are not past due.

Our regulatory capital ratios and Summit Community's capital ratios as of year end 2017 are set forth in the table in Note 19 of the notes to the consolidated financial statements beginning on page 96. The Company and Summit Community Bank exceed all capital adequacy requirements, including applicable conservation buffers, under the Basel III Capital Rules as if such requirements were currently in effect on a fully phased-in basis.

Prompt Corrective Action. The Federal Deposit Insurance Corporation Improvement Act of 1991 ("FDICIA") establishes a new regulatory scheme, which ties the level of supervisory intervention by bank regulatory authorities primarily to a depository institution's capital category. Among other things, FDICIA authorizes regulatory authorities to take "prompt corrective action" with respect to depository institutions that do not meet minimum capital requirements. FDICIA establishes five capital tiers: well capitalized, adequately capitalized, undercapitalized, significantly undercapitalized and critically undercapitalized. The relevant capital measures, which reflect changes under the Basel III Capital Rules, are the total capital ratio, the CET1 capital ratio, the Tier 1 capital ratio and the leverage ratio.

A bank will be (i) "well capitalized" if the institution has a total risk-based capital ratio of 10.0% or greater, a CET1 capital ratio of 6.5% or greater, a Tier 1 risk-based capital ratio of 8.0% or greater and a leverage ratio of 5.0% or greater and is not subject to any order or written directive by any such regulatory authority to meet and maintain a specific capital level for any capital measure; (ii) "adequately capitalized" if the institution has a total risk-based capital ratio of 8.0% or greater, a CET1 capital ratio of 4.5% or greater, a Tier 1 risk-based capital ratio of 6.0% or greater and a leverage ratio of 4.0% or greater and is not "well capitalized"; (iii) "undercapitalized" if the institution has a total risk-based capital ratio that is less than 8.0%, a CET1 capital ratio less than 4.5%, a Tier 1 risk-based capital ratio of less than 6.0% or a leverage ratio of less than 4.0%; (iv) "significantly undercapitalized" if the institution has a total risk-based capital ratio of less than 6.0%, a CET1 capital ratio less than 3.0%, a Tier 1 risk-based capital ratio of less than 4.0% or a leverage ratio of less than 3.0%; and (v) "critically undercapitalized" if the institution's tangible equity is equal to or less than 2.0% of average quarterly tangible assets. An institution may be downgraded to, or deemed to be in, a capital category that is lower than indicated by its capital ratios if it is determined to be in an unsafe or unsound condition or if it receives an unsatisfactory examination rating with respect to certain matters. A bank's capital category is determined solely for the purpose of applying prompt corrective action regulations and the capital category may not constitute an accurate representation of the bank's overall financial condition or prospects for other purposes."

Community Reinvestment Act

Financial holding companies and their subsidiary banks are also subject to the provisions of the Community Reinvestment Act of 1977 ("CRA"). Under the CRA, the FRB (or other appropriate bank regulatory agency) is required, in connection with its examination of a bank, to assess such bank's record in meeting the credit needs of the communities served by that bank, including low and moderate income neighborhoods. Further, such assessment is also required of any financial holding company that has applied to (i) charter a national bank, (ii) obtain deposit insurance coverage for a newly chartered institution, (iii) establish a new branch office that will accept deposits, (iv) relocate an office, or (v) merge or consolidate with, or acquire the assets or assume the liabilities of a federally-regulated financial institution. In the case of a financial holding company applying for approval to acquire a bank or other financial holding company, the FRB will assess the record of each subsidiary of the applicant financial holding company and such records may be the basis for denying the application or imposing conditions in connection with approval of the application.

In the most recent CRA examination by the bank regulatory authorities, Summit Community was given a “satisfactory” CRA rating.

Graham-Leach-Bliley Act of 1999

The enactment of the Graham-Leach-Bliley Act of 1999 (the “GLB Act”) represents a pivotal point in the history of the financial services industry. The GLB Act swept away large parts of a regulatory framework that had its origins in the Depression Era of the 1930s. New opportunities were available for banks, other depository institutions, insurance companies and securities firms to enter into combinations that permit a single financial services organization to offer customers a more complete array of financial products and services. The GLB Act provides a new regulatory framework through the financial

Table of Contents

8

holding company, which has as its “umbrella regulator” the FRB. Functional regulation of the financial holding company’s separately regulated subsidiaries is conducted by their primary functional regulators. The GLB Act makes a CRA rating of satisfactory or above necessary for insured depository institutions and their financial holding companies to engage in new financial activities. The GLB Act specifically gives the FRB the authority, by regulation or order, to expand the list of “financial” or “incidental” activities, but requires consultation with the U.S. Treasury Department, and gives the FRB authority to allow a financial holding company to engage in any activity that is “complementary” to a financial activity and does not “pose a substantial risk to the safety and soundness of depository institutions or the financial system generally.”

Under the GLB Act, all financial institutions are required to adopt privacy policies, restrict the sharing of nonpublic customer data with nonaffiliated parties at the customer’s request and establish procedures and practices to protect customer data from unauthorized access. We have established policies and procedures to assure our compliance with all privacy provisions of the GLB Act. Pursuant to Title V of the GLB Act, we, like all other financial institutions, are required to:

- provide notice to our customers regarding privacy policies and practices,
- inform our customers regarding the conditions under which their non-public personal information may be disclosed to non-affiliated third parties and
- give our customers an option to prevent certain disclosure of such information to non-affiliated third parties.

Deposit Acquisition Limitation

Under West Virginia banking law, an acquisition or merger is not permitted if the resulting depository institution or its holding company, including its affiliated depository institutions, would assume additional deposits to cause it to control deposits in the State of West Virginia in excess of twenty five percent (25%) of such total amount of all deposits held by insured depository institutions in West Virginia. This limitation may be waived by the Commissioner of Banking by showing good cause.

Consumer Laws and Regulations

In addition to the banking laws and regulations discussed above, bank subsidiaries are also subject to certain consumer laws and regulations that are designed to protect consumers in transactions with banks. Among the more prominent of such laws and regulations are the Truth in Lending Act, the Home Mortgage Disclosure Act and Regulation C, the Electronic Funds Transfer Act, the Expedited Funds Availability Act, the Equal Credit Opportunity Act, the Fair Credit Reporting Act, the Fair Debt Collection Act, the Right to Financial Privacy Act and the Fair Housing Act. These laws and regulations mandate certain disclosure requirements and regulate the manner in which financial institutions must deal with customers when taking deposits or making loans to such customers. Bank subsidiaries must comply with the applicable provisions of these consumer protection laws and regulations as part of their ongoing customer relations.

Dodd-Frank centralized responsibility for consumer financial protection by creating the CFPB and giving it responsibility for implementing, examining and enforcing compliance with federal consumer protection laws. The CFPB has broad rulemaking, supervisory and enforcement authority over consumer financial products and services, including deposit products, residential mortgages, home-equity loans and credit cards. The CFPB’s functions include investigating consumer complaints, rulemaking, supervising and examining banks’ consumer transactions and enforcing rules related to consumer financial products and services including mortgage lending and servicing, fair lending requirements, and automotive finance. Summit Community Bank, as a bank with less than \$10 billion in assets, is subject to these federal consumer financial laws, but continues to be examined for compliance by the FDIC, its primary federal banking regulator.

The CFPB has issued final regulations implementing provisions of the Dodd-Frank Act that require all creditors to determine a consumer's ability to repay a mortgage loan before making a loan. The final rule, referred to as the Ability-to Repay (ATR)/Qualified Mortgage (QM) standards, provide that a lender making a special type of loan, known as a Qualified Mortgage, is entitled to presume that the loan complies with the ATR safe harbor requirements. The rule establishes different types of Qualified Mortgages that are generally identified as loans with restrictions on loan features, limits on fees being charged and underwriting requirements.

USA Patriot Act of 2001

The USA Patriot Act of 2001 and its related regulations require insured depository institutions, broker-dealers and certain other financial institutions to have policies, procedures and controls to detect, prevent and report money laundering and terrorist financing. The statute and its regulations also provide for information sharing, subject to conditions, between federal law enforcement agencies and financial institutions, as well as among financial institutions, for counter-terrorism purposes. Federal

Table of Contents

9

banking regulators are required, when reviewing bank holding company acquisition and bank merger applications, to take into account the effectiveness of the anti-money laundering activities of the applicants. Summit expects to continue to devote significant resources to its Bank Secrecy Act/anti-money laundering program, particularly as risks persistently emerge and evolve and as regulatory expectations escalate.

Sarbanes-Oxley Act of 2002

The Sarbanes-Oxley Act of 2002 (“SOA”) addresses, among other issues, corporate governance, auditing and accounting, executive compensation and enhanced and timely disclosure of corporate information. SOA requires our Chief Executive Officer and Chief Financial Officer each to certify that Summit’s Quarterly and Annual Reports do not contain any untrue statement of a material fact. The rules have several requirements, including requiring these officers certify that: they are responsible for establishing, maintaining and regularly evaluating the effectiveness of our internal controls; they have made certain disclosures to our auditors and the audit committee of the Board of Directors about our internal controls; and they have included information in Summit’s Quarterly and Annual Reports about their evaluation and whether there have been significant changes in our internal controls or in other factors that could significantly affect internal controls subsequent to the evaluation.

Furthermore, in response to the directives of the SOA, NASDAQ adopted substantially expanded corporate governance criteria for the issuers of securities quoted on the NASDAQ Capital Market (the market on which our common stock is listed for trading). The new NASDAQ rules govern, among other things, the enhancement and regulation of corporate disclosure and internal governance of listed companies and of the authority, role and responsibilities of their boards of directors and, in particular, of “independent” members of such boards of directors, in the areas of nominations, corporate governance, compensation and the monitoring of the audit and internal financial control processes.

Cybersecurity

In 2015, federal regulators issued two related statements regarding cybersecurity. One statement indicates that financial institutions should design multiple layers of security controls to establish lines of defense and to ensure that their risk management processes also address the risk posed by compromised customer credentials, including security measures to reliably authenticate customers accessing internet-based services of the financial institution. The other statement indicates that a financial institution’s management is expected to maintain sufficient business continuity planning processes to ensure the rapid recovery, resumption and maintenance of the institution’s operations after a cyber-attack involving destructive malware. A financial institution is also expected to develop appropriate processes to enable recovery of data and business operations and address rebuilding network capabilities and restoring data if the institution or its critical service providers fall victim to this type of cyber-attack. If we fail to observe the regulatory guidance, we could be subject to various regulatory sanctions, including financial penalties.

In the ordinary course of business, we rely on electronic communications and information systems to conduct our operations and to store sensitive data. We employ an in-depth, layered, defensive approach that leverages people, processes and technology to manage and maintain cybersecurity controls. We employ a variety of preventative and detective tools to monitor, block and provide alerts regarding suspicious activity, as well as to report on any suspected advanced persistent threats. Notwithstanding the strength of our defensive measures, the threat from cyber attacks is severe, attacks are sophisticated and increasing in volume and attackers respond rapidly to changes in defensive measures. While to date, we have not experienced a significant compromise, significant data loss or any material financial losses related to cybersecurity attacks, our systems and those of our customers and third-party service providers are under constant threat and it is possible that we could experience a significant event in the future. Risks and exposures related to cybersecurity attacks are expected to remain high for the foreseeable future due to the rapidly evolving nature and sophistication of these threats, as well as due to the expanding use of Internet banking, mobile banking and other technology-based products and services by us and our customers. See Item 1A. Risk Factors for a

further discussion of risks related to cybersecurity.

Transactions with Affiliates

Federal law restricts subsidiary banks of a financial holding company from making certain extensions of credit to the parent financial holding company or to any of its subsidiaries; from investing in the holding company stock; and limits the ability of a subsidiary bank to take its parent company stock as collateral for the loans of any borrower. Additionally, federal law prohibits a financial holding company and its subsidiaries from engaging in certain tie-in arrangements in conjunction with the extension of credit or furnishing of services.

There are various statutory and regulatory limitations, including those set forth in sections 23A and 23B of the Federal Reserve Act and the related Federal Reserve Regulation W, governing the extent to which the bank will be able to purchase assets from or securities of or otherwise finance or transfer funds to us or our non-banking affiliates. Among other restrictions, such

Table of Contents

10

transactions between the bank and any one affiliate (including Summit) generally will be limited to ten percent (10%) of the bank's capital and surplus and transactions between the bank and all affiliates will be limited to twenty percent (20%) of the bank's capital and surplus. Furthermore, loans and extensions of credit are required to be secured in specified amounts and are required to be on terms and conditions consistent with safe and sound banking practices.

In addition, any transaction by a bank with an affiliate and any sale of assets or provisions of services to an affiliate generally must be on terms that are substantially the same, or at least as favorable, to the bank as those prevailing at the time for comparable transactions with non-affiliated companies.

Incentive Compensation

The Federal Reserve Board reviews, as part of its regular, risk-focused examination process, the incentive compensation arrangements of banking organizations, such as Summit, that are not "large, complex banking organizations." These reviews are tailored to each organization based on the scope and complexity of the organization's activities and the prevalence of incentive compensation arrangements. The findings of this supervisory initiative will be included in reports of examination. Deficiencies will be incorporated into the organization's supervisory ratings, which can affect the organization's ability to make acquisitions and take other actions. Enforcement actions may be taken against a banking organization if its incentive compensation arrangements, or related risk-management control or governance processes, pose a risk to the organization's safety and soundness and the organization is not taking prompt and effective measures to correct the deficiencies.

In June 2010, the Federal Reserve Board, OCC and FDIC issued comprehensive final guidance on incentive compensation policies intended to ensure that the incentive compensation policies of banking organizations do not undermine the safety and soundness of such organizations by encouraging excessive risk-taking. The guidance, which covers all employees that have the ability to materially affect the risk profile of an organization, either individually or as part of a group, is based upon the key principles that a banking organization's incentive compensation arrangements should (i) provide incentives that do not encourage risk-taking beyond the organization's ability to effectively identify and manage risks, (ii) be compatible with effective internal controls and risk management and (iii) be supported by strong corporate governance, including active and effective oversight by the organization's board of directors.

In April and May of 2016, the Federal Reserve Board, other federal banking agencies and the SEC (the "Agencies") issued proposed rules to prohibit incentive-based compensation arrangements at covered institutions that could encourage inappropriate risks by providing excessive compensation or that could lead to a material loss. The proposed rules expand significantly beyond the June 2010 principals-based guidance and broadened the scope of covered institutions to include community banks. The proposed rules categorize covered institutions by size and compliance requirements vary according to the size of the covered institutions. The proposed rule (i) prohibits incentive-based compensation arrangements that encourage executive officers, employees, directors or principal shareholders to expose the institution to inappropriate risks by providing excessive compensation (based on the standards for excessive compensation adopted pursuant to the FDIA) and (ii) prohibits incentive-based compensation arrangements for executive officers, employees, directors or principal shareholders that could lead to a material financial loss for the institution. Final rules have not been adopted as of February 2018. If these or other regulations are adopted in a form similar to that initially proposed, they will impose limitations on the manner in which we may structure compensation for our executives.

The scope and content of the U.S. banking regulators' policies on incentive compensation are continuing to develop. It cannot be determined at this time whether or when a final rule will be adopted and whether compliance with such a final rule will adversely affect the ability of Summit and its subsidiaries to hire, retain and motivate their key employees.

Competition

We engage in highly competitive activities. Each activity and market served involves competition with other banks and savings institutions, as well as with non-banking and non-financial enterprises that offer financial products and services that compete directly with our products and services. We actively compete with other banks, mortgage companies and other financial service companies in our efforts to obtain deposits and make loans, in the scope and types of services offered, in interest rates paid on time deposits and charged on loans and in other aspects of banking.

Of particular note, banking laws limit the total amount we can lend to any one borrower generally to 15 percent of Summit Community's Tier 1 capital plus its allowance for loan losses. Summit Community evaluated the risks and rewards of lending up to this legal lending limit and established a self-imposed lending limit equal to 85 percent of its legal lending limit. Accordingly, institutions larger than Summit Community have a natural competitive advantage to serve the loan needs of larger clients as their legal lending limits are proportionally greater than ours.

Table of Contents

11

In addition to competing with other banks and mortgage companies, we compete with other financial institutions engaged in the business of making loans or accepting deposits, such as savings and loan associations, credit unions, industrial loan associations, insurance companies, small loan companies, finance companies, real estate investment trusts, certain governmental agencies, credit card organizations and other enterprises. In addition, competition for money market accounts from securities brokers has also intensified. Additional competition for deposits comes from government and private issues of debt obligations and other investment alternatives for depositors, such as money market funds. We take an aggressive competitive posture and intend to continue vigorously competing for market share within our service areas by offering competitive rates and terms on both loans and deposits.

Employees

At February 28, 2018, we employed 349 full-time equivalent employees.

Available Information

Our Internet website address is www.summitfgi.com and our Annual Reports on Form 10-K, Quarterly Reports on Form 10-Q, current reports on Form 8-K and amendments to such filed reports with the SEC are accessible through this website free of charge as soon as reasonably practicable after we electronically file such reports with the SEC. The information on our website is not and shall not be deemed to be, a part of this report or incorporated into any other filing with the SEC.

These reports are also available at the SEC's Public Reference Room at 100 F Street, NE, Washington, D.C. 20549. You may read and copy any materials that we file with the SEC at the Public Reference Room on official business days during the hours of 10:00 a.m. to 3:00 p.m. You may obtain information on the operation of the Public Reference Room by calling the SEC at 1-800-SEC-0330. The SEC also maintains a website at www.sec.gov that contains reports, proxy and information statements and other information regarding issuers that file electronically with the SEC.

Item 1A. Risk Factors

We, like other financial holding companies, are subject to a number of risks that may adversely affect our financial condition or results of operation, many of which are outside of our direct control, though efforts are made to manage those risks while optimizing returns. Among the risks assumed are: (i) credit risk, which is the risk of loss due to loan clients or other counterparties not being able to meet their financial obligations under agreed upon terms, (ii) market risk, which is the risk of loss due to changes in the market value of assets and liabilities due to changes in market interest rates, equity prices and credit spreads, (iii) liquidity risk, which is the risk of loss due to the possibility that funds may not be available to satisfy current or future commitments based on external market issues, investor and customer perception of financial strength and events unrelated to the Company such as war, terrorism, or financial institution market specific issues and (iv) operational risk, which is the risk of loss due to human error, inadequate or failed internal systems and controls, violations of, or noncompliance with, laws, rules, regulations, prescribed practices, or ethical standards and external influences such as market conditions, fraudulent activities, disasters and security risks.

In addition to the other information included or incorporated by reference into this report, readers should carefully consider that the following important factors, among others, could materially impact our business, future results of operations and future cash flows.

RISKS RELATING TO THE ECONOMIC ENVIRONMENT

Our business may be adversely affected by conditions in financial markets and economic conditions generally.

Our business is concentrated in West Virginia and the Northern, Shenandoah Valley and Southwestern regions of Virginia. As a result, our financial condition, results of operations and cash flows are subject to changes if there are changes in the economic conditions in these areas. A prolonged period of economic recession or other adverse economic conditions in these areas could have a negative impact on Summit. A significant decline in general economic conditions nationally, caused by inflation, recession, acts of terrorism, outbreak of hostilities or other international or domestic occurrences, unemployment, changes in securities markets, declines in the housing market, a tightening credit environment or other factors could impact these local economic conditions and, in turn, have a material adverse effect on our financial condition and results of operations.

The soundness of other financial institutions could adversely affect us.

Financial services institutions are interrelated as a result of trading, clearing, counterparty or other relationships. We have exposure to many different industries and counterparties and routinely execute transactions with counterparties in the financial services industry, including brokers and dealers, commercial banks, or other institutional firms. Defaults by financial services institutions and even rumors or questions about a financial institution or the financial services industry in general, have led to market wide liquidity problems and could lead to losses or defaults by us or other institutions. Any such losses could adversely affect our financial condition or results of operations.

The value of certain investment securities is volatile and future declines or other-than-temporary impairments could have a materially adverse effect on future earnings and regulatory capital.

Volatility in the fair value for certain investment securities, whether caused by changes in market conditions, interest rates, credit risk of the issuer, the expected yield of the security, or actual defaults in the portfolio could result in significant fluctuations in the value of the securities as well as any regulatory rulemaking which could exclude or limit the holdings of certain investment securities. This could have a material adverse impact on our accumulated other comprehensive income and shareholders' equity depending on the direction of the fluctuations. Furthermore, future

downgrades, defaults or prepayments, including the liquidation of the underlying collateral in certain securities, could result in future classifications as other-than-temporarily impaired. This could have a material impact on our future earnings, although the impact on shareholders' equity will be offset by any amount already included in other comprehensive income for securities that were temporarily impaired.

RISKS RELATING TO OUR BUSINESS

We are subject to extensive government regulation and supervision.

The Company and Summit Community are subject to extensive federal and state regulation and supervision, which vests a significant amount of discretion in the various regulatory authorities. Banking regulations are primarily intended to protect depositors and customers, the Federal Deposit Insurance fund and the banking system as a whole, not security holders. These regulations and supervisory guidance affect our lending practices, capital structure, investment practices, dividend policy and

Table of Contents

13

growth, among other things. Congress and federal regulatory agencies continually review banking laws, regulations and policies for possible changes. The Dodd-Frank Act instituted major changes to the banking and financial institutions regulatory regimes. Other changes to statutes, regulations or regulatory policies or supervisory guidance, including changes in interpretation or implementation of statutes, regulations, policies or supervisory guidance, could affect us in substantial and unpredictable ways. Such changes could subject us to additional costs, limit the types of financial services and products we may offer and/or increase the ability of non-banks to offer competing financial services and products, among other things. Failure to comply with laws, regulations, policies or supervisory guidance could result in enforcement and other legal actions by Federal or state authorities, including criminal and civil penalties, the loss of FDIC insurance, the revocation of a banking charter, other sanctions by regulatory agencies, civil money penalties and/or reputation damage. In this regard, government authorities, including the bank regulatory agencies, are pursuing aggressive enforcement actions with respect to compliance and other legal matters involving financial activities, which heightens the risks associated with actual and perceived compliance failures. Any of the foregoing could have a material adverse effect on our business, financial condition and results of operations.

See the section captioned “Supervision and Regulation” included in Item 1. Business on page 1.

We may become subject to additional regulatory restrictions in the event that our regulatory capital levels decline.

Although the Bank is qualified as “well capitalized” under the regulatory framework for prompt corrective action as of December 31, 2017, there is no guarantee that we will not have a decline in our capital category in the future. In the event of such a capital category decline, we would be subject to increased regulatory restrictions that could have a material adverse effect on our business, financial condition, results of operations, cash flows and/or future prospects.

If a bank is classified as undercapitalized, the bank is required to submit a capital restoration plan to the FDIC. Pursuant to FDICIA, an undercapitalized bank is prohibited from increasing its assets, engaging in a new line of business, acquiring any interest in any company or insured depository institution, or opening or acquiring a new branch office, except under certain circumstances, including the acceptance by the FDIC of a capital restoration plan for the bank. Furthermore, if a state non-member bank is classified as undercapitalized, the FDIC may take certain actions to correct the capital position of the bank; if a bank is classified as significantly undercapitalized or critically undercapitalized, the FDIC would be required to take one or more prompt corrective actions. These actions would include, among other things, requiring sales of new securities to bolster capital; improvements in management; limits on interest rates paid; prohibitions on transactions with affiliates; termination of certain risky activities and restrictions on compensation paid to executive officers. If a bank is classified as critically undercapitalized, FDICIA requires the bank to be placed into conservatorship or receivership within ninety (90) days, unless the Federal Reserve determines that other action would better achieve the purposes of FDICIA regarding prompt corrective action with respect to undercapitalized banks.

Under FDICIA, banks may be restricted in their ability to accept brokered deposits, depending on their capital classification. “Well capitalized” banks are permitted to accept brokered deposits, but all banks that are not well capitalized could be restricted from accepting such deposits. The FDIC may, on a case-by-case basis, permit banks that are adequately capitalized to accept brokered deposits if the FDIC determines that acceptance of such deposits would not constitute an unsafe or unsound banking practice with respect to the bank. These restrictions could materially and adversely affect our ability to access lower costs funds and thereby decrease our future earnings capacity.

Our financial flexibility could be severely constrained if we are unable to renew our wholesale funding or if adequate financing is not available in the future at acceptable rates of interest. We may not have sufficient liquidity to continue to fund new loan originations and we may need to liquidate loans or other assets unexpectedly in order to repay obligations as they mature. Our inability to obtain regulatory consent to accept or renew brokered deposits could have a material adverse effect on our business, financial condition, results of operations, cash flows and/or future prospects

and our ability to continue as a going concern.

Finally, the capital classification of a bank affects the frequency of examinations of the bank, the deposit insurance premiums paid by such bank and the ability of the bank to engage in certain activities, all of which could have a material adverse effect on our business, financial condition, results of operations, cash flows and/or future prospects. Under FDICIA, the FDIC is required to conduct a full-scope, on-site examination of every bank at least once every twelve (12) months.

Our decisions regarding credit risk could be inaccurate and our allowance for loan losses may be inadequate, which could materially and adversely affect our business, financial condition, results of operations, cash flows and/or future prospects.

Our loan portfolio subjects us to credit risk. Inherent risks in lending also include fluctuations in collateral values and economic downturns. Making loans is an essential element of our business and there is a risk that our loans will not be repaid.

Table of Contents

14

We attempt to maintain an appropriate allowance for loan losses to provide for estimated probable credit losses inherent in our loan portfolio. As of December 31, 2017, our allowance for loan losses totaled \$12.6 million, which represents approximately 0.78% of our total loans. There is no precise method of predicting loan losses and therefore, we always face the risk that charge-offs in future periods will exceed our allowance for loan losses and that we would need to make additional provisions to our allowance for loan losses.

Our methodology for the determination of the adequacy of the allowance for loan losses for impaired loans is based on classifications of loans into various categories and the application of generally accepted accounting principles in the United States. For non-classified loans, the estimated allowance is based on historical loss experiences as adjusted for changes in trends and conditions on at least an annual basis. In addition, on a quarterly basis, the estimated allowance for non-classified loans is adjusted for the probable effect that current environmental factors could have on the historical loss factors currently in use. While our allowance for loan losses is established in different portfolio components, we maintain an allowance that we believe is sufficient to absorb all estimated probable credit losses inherent in our portfolio.

The FDIC and the West Virginia Division of Financial Institutions review our allowance for loan and lease losses and may require us to establish additional reserves. Additions to the allowance for loan and lease losses will result in a decrease in our net earnings and capital and could hinder our ability to grow our assets.

We do business with other financial institutions that could experience financial difficulty.

We do business through the purchase and sale of Federal funds, check clearing and through the purchase and sale of loan participations with other financial institutions. Because these financial institutions have many risks, as do we, we could be adversely affected should one of these financial institutions experience significant financial difficulties or fail to comply with our agreements with them.

We may elect or be compelled to seek additional capital in the future, but capital may not be available when it is needed.

We are required by federal and state regulatory authorities to maintain adequate levels of capital to support our operations. In addition, we may elect to raise additional capital to support our business or to finance acquisitions, if any, or we may otherwise elect to raise additional capital. Our ability to raise additional capital, if needed, will depend on conditions in the capital markets, economic conditions and a number of other factors, many of which are outside our control and on our financial performance. Accordingly, we cannot be assured of our ability to raise additional capital, if needed or on terms acceptable to us. If we cannot raise additional capital when needed, it may have a material adverse effect on our financial condition, results of operations and prospects.

We rely on funding sources to meet our liquidity needs, such as brokered deposits and FHLB borrowings, which are generally more sensitive to changes in interest rates and can be adversely affected by general economic conditions.

We have frequently utilized, as a source of funds, certificates of deposit obtained through third parties that solicit funds from their customers for deposit with us, or brokered deposits. Brokered deposits, when compared to retail deposits attracted through a branch network, are generally more sensitive to changes in interest rates and volatility in the capital markets and could reduce our net interest spread and net interest margin. In addition, brokered deposit funding sources may be more sensitive to significant changes in our financial condition. As of December 31, 2017, brokered deposits totaled \$216.9 million, or approximately 13.6% of our total deposits, compared to brokered deposits in the amount of \$205.7 million or approximately 15.9% of our total deposits at December 31, 2016. As of December 31, 2017, approximately \$46.4 million in brokered deposits, or approximately 21.4% of our total brokered deposits, mature within one year. Our ability to continue to acquire brokered deposits is subject to our ability to price these deposits at competitive levels, which may increase our funding costs and the confidence of the market. In

addition, if our capital ratios fall below the levels necessary to be considered “well capitalized” under current regulatory guidelines, we could be restricted from using brokered deposits as a funding source.

We also have borrowings with the Federal Home Loan Bank of Pittsburgh, or the FHLB. As of December 31, 2017, our FHLB borrowings maturing within one year totaled \$200.0 million. If we were unable to borrow from the FHLB in the future, we may be required to seek higher cost funding sources, which could materially and adversely affect our net interest income.
