Table of Contents

Notes to Condensed Consolidated Financial Statements (Unaudited)

1. Basis of Presentation

These statements have been prepared pursuant to the rules and regulations of the U.S. Securities and Exchange Commission ("SEC") and, in accordance with those rules and regulations, do not include all information and footnote disclosures normally included in annual financial statements prepared in accordance with accounting principles generally accepted in the United States of America ("GAAP"). In the opinion of management, the condensed consolidated financial statements reflect all adjustments, consisting only of normal recurring adjustments, necessary to fairly state the results of operations, financial position and cash flows of Teradata Corporation ("Teradata" or the "Company") for the interim periods presented herein. The year-end 2015 condensed consolidated balance sheet data was derived from audited financial statements, but does not include all disclosures required by GAAP. The preparation of condensed consolidated financial statements in conformity with GAAP requires management to make use of estimates and assumptions that affect the reported amounts and disclosures. Actual results may vary from these estimates. These condensed consolidated interim financial statements should be read in conjunction with the consolidated financial statements and notes thereto included in Teradata's most recent Annual Report on Form 10-K for the fiscal year ended December 31, 2015 (the "2015 Annual Report"). The results of operations for any interim period are not necessarily indicative of the results of operations to be expected for the full year.

2. New Accounting Pronouncements

**Revenue Recognition.** In May 2014, the Financial Accounting Standards Board ("FASB") issued new guidance that affects any entity that either enters into contracts with customers to transfer goods or services or enters into contracts for the transfer of nonfinancial assets unless those contracts are within the scope of other standards. The new guidance will supersede the revenue recognition requirements in the current revenue recognition guidance, and most industry-specific guidance. In addition, the existing requirements for the recognition of a gain or loss on the transfer of nonfinancial assets that are not in a contract with a customer are amended to be consistent with the guidance on recognition and measurement in this update. The core principle of the guidance is that an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. To achieve that core principle, the FASB defines a five step process which includes the following: (1) identify the contract with a customer, (2) identify the performance obligations in the contract, (3) determine the transaction price, (4) allocate the transaction price to the performance obligations in the contract, and (5) recognize revenue when (or as) the entity satisfies a performance obligation.

In July 2015, the FASB issued a one-year delay in the effective date of the new standard. Under this guidance, the new revenue standard will be effective for annual reporting periods beginning after December 15, 2017, with early application permitted. The standard allows entities to apply the standard retrospectively for all periods presented or alternatively an entity is permitted to recognize the cumulative effect of initially applying the guidance as an opening balance sheet adjustment to retained earnings in the period of initial application.

In March 2016, the FASB issued an update that amends and clarifies the implementation guidance on principal versus agent considerations for reporting revenue gross rather than net. In April 2016, the FASB issued an update that amends and clarifies the identification of performance obligations and accounting for licenses of intellectual property. Both updates issued in 2016 have the same deferred effective date. The Company is currently evaluating the impact on its consolidated financial position, results of operations and cash flows, as well as the method of transition that will be used in adopting the standard.

**Leases.** In February 2016, the FASB issued new guidance which requires a lessee to account for leases as finance or operating leases. Both leases will result in the lessee recognizing a right-of-use asset and a corresponding lease liability on its balance sheet, with differing methodology for income statement recognition. For lessors, the standard modifies the classification criteria and the accounting for sales-type and direct financing leases. Entities will classify leases to determine how to recognize lease-related revenue and expense. This standard is effective for

## Table of Contents

public entities for fiscal years, and interim periods within those years, beginning after December 15, 2018, and early adoption is permitted. A modified retrospective approach is required for leases existing or entered into after the beginning of the earliest comparative period in the Consolidated Financial Statements. The Company is currently assessing the impact of this update on its Consolidated Financial Statements.

**Stock Compensation: Improvements to Employee Share-Based Payment Accounting.** In March 2016, the FASB issued an update which simplifies several aspects of the accounting for share-based payment transactions, including the income tax consequences, classification of awards as either equity or liabilities, and classification on the Statements of Cash Flows. Under the new standard, income tax benefits and deficiencies are to be recognized in the income statement and the tax effects of exercised or vested awards should be treated as discrete items in the reporting period in which they occur. This provision is to be applied prospectively. Excess tax benefits should be recognized regardless of whether the benefit reduces taxes payable in the current period, along with any valuation allowance, on a modified retrospective basis as a cumulative-effect adjustment to the retained earnings as of the date of adoption. Excess tax benefits should be classified along with other income tax cash flows as an operating activity. This provision can be applied prospectively or retrospectively for all periods presented. The standard is effective for public entities for annual reporting periods beginning after December 15, 2016, and interim periods therein. Early adoption is permitted. The Company is currently assessing the impact of this update on its Consolidated Financial Statements.

### Recently Adopted Guidance

**Accounting for Share-based Payments with Performance Targets.** In June 2014, the FASB issued new guidance that requires that a performance target that affects vesting and that could be achieved after the requisite service period, be treated as a performance condition. A reporting entity should apply existing guidance as it relates to awards with performance conditions that affect vesting to account for such awards. As such, the performance target should not be reflected in estimating the grant-date fair value of the award. Compensation cost should be recognized in the period in which it becomes probable that the performance target will be achieved and should represent the compensation cost attributable to the periods for which the requisite service has already been rendered. The Company adopted this guidance on January 1, 2016. This amendment did not have an impact on the Company's consolidated financial statements.

**Income Statement Presentation by Eliminating the Concept of Extraordinary Items.** This update eliminates from GAAP the concept of extraordinary items. The Company adopted this guidance on January 1, 2016. This amendment did not have an impact on the Company's results of operations.

**Simplifying the Presentation of Debt Issuance Costs.** To simplify presentation of debt issuance costs, the amendments in this update require that debt issuance costs related to a recognized debt liability be presented in the balance sheet as a direct deduction from the carrying amount of that debt liability, consistent with debt discounts. The recognition and measurement guidance for debt issuance costs are not affected by the amendments in this update. The Company adopted this guidance on January 1, 2016 on a retrospective basis. Debt issuance costs of \$3 million have been presented as a deduction from the carrying value of the related long-term liabilities in our Consolidated Balance Sheets as of December 31, 2015 and March 31, 2016, respectively.

**Intangibles, Goodwill and Other Internal-Use Software.** The amendments in this update provide guidance to customers about whether a cloud computing arrangement includes a software license. If a cloud computing arrangement includes a software license, then the customer should account for the software license element of the arrangement consistent with the acquisition of other software licenses. If a cloud computing arrangement does not include a software license, the customer should account for the arrangement as a service contract. The guidance will not change current guidance for a customer's accounting for service contracts. The Company adopted this guidance on January 1, 2016. This amendment did not have an impact on the Company's consolidated financial statements.

**Business Combinations.** In September 2015, the FASB issued new guidance that eliminates the requirement that an acquirer in a business combination account for measurement-period adjustments retrospectively. An acquirer will recognize a measurement-period adjustment during the period in which it determines the amount of the adjustment.

Table of Contents

The Company adopted this guidance on January 1, 2016. This amendment did not have an impact on the Company's consolidated financial statements.

## 3. Supplemental Financial Information

In millions	As of	
	March 31, 2016	December 31, 2015

## Inventories

Finished goods	\$37	\$ 32
Service parts	17	17
Total inventories	\$54	\$ 49

## Deferred revenue

Deferred revenue, current	\$506	\$ 367
Long-term deferred revenue	15	15
Total deferred revenue	\$521	\$ 382

Above amounts exclude assets and liabilities held for sale. Refer to Note 13 for further information on the Company's assets and liabilities held for sale.

## 4. Goodwill and Acquired Intangible Assets

The following table identifies the activity relating to goodwill by operating segment:

In millions	Balance, December 31, 2015	Adjustments	Currency Translation Adjustments	Balance, March 31, 2016
<b>Goodwill</b>				
Americas Data and Analytics	\$ 251	\$	—\$ —	\$ 251
International Data and Analytics	129	—	4	133
Total goodwill	\$ 380	\$	—\$ 4	\$ 384

In the fourth quarter of 2015, the Company committed to a plan to exit the marketing applications business, which met the criteria for held for sale and continued to be reported under continuing operations. Not included in the table above is \$56 million at March 31, 2016 and \$113 million at December 31, 2015 for goodwill that has been classified as held for sale. See Note 13 for additional disclosures related to impairment charges recorded for goodwill that has been classified as held for sale.

Table of Contents

Acquired intangible assets were specifically identified when acquired, and are deemed to have finite lives. The gross carrying amount and accumulated amortization for Teradata's acquired intangible assets were as follows:

In millions	Amortization Life (in Years)	March 31, 2016		December 31, 2015	
		Gross Carrying Amount	Accumulated Amortization	Gross Carrying Amount	Accumulated Amortization
Acquired intangible assets					
Intellectual property/developed technology	1 to 7	\$71	\$ (56 )	\$ 83	\$ (63 )
Customer relationships	3 to 10	—	—	3	(3 )
Trademarks/trade names	5	1	(1 )	1	(1 )
In-process research and development	5	5	(3 )	5	(3 )
Total acquired intangible assets		\$77	\$ (60 )	\$ 92	\$ (70 )

Not included in the table above is \$25 million at March 31, 2016 and \$44 million at December 31, 2015 for intangible assets that were classified as held for sale. See Note 13 for additional disclosures related to impairment charges recorded for intangible assets that have been classified as held for sale.

The aggregate amortization expense (actual and estimated) for acquired intangible assets is as follows:

In millions	Three Months Ended March 31,		For the years ended (estimated)				
	2016	2015	2015	2016	2017	2018	2019
Amortization expense	\$ 5	\$ 11	\$ 40	\$ 10	\$ 7	\$ 3	\$ 2

Table of Contents

## 5. Income Taxes

Income tax provisions for interim periods are based on estimated annual income tax rates, adjusted to reflect the effects of any significant infrequent or unusual items which are required to be discretely recognized within the current interim period. The Company's intention is to permanently reinvest its foreign earnings outside of the United States. As a result, the effective tax rates in the periods presented are largely based upon the forecasted pre-tax earnings mix and allocation of certain expenses in various taxing jurisdictions where the Company conducts its business that apply a broad range of statutory income tax rates, a large majority of which are less than the U.S. statutory rate.

The effective tax rate is as follows:

	Three Months Ended March 31,	
In millions	2016	2015
Effective tax rate	(2.2)%	26.7%

For the three months ended March 31, 2016, there was a discrete tax item resulting from the \$76 million impairment recorded in the first quarter, of which \$57 million is related to non-deductible goodwill and \$19 million is related to intangible assets for which \$6 million of deferred tax benefit has been recorded. This results in income tax expense in Q1 2016 of \$1 million, on a pre-tax net loss of \$45 million, causing a negative tax rate of (2.2%). There were no material discrete tax items for the three months ended March 31, 2015. The decrease in the effective tax rate was primarily driven by the tax impact of the goodwill impairment for the three months ended March 31, 2016.

## 6. Derivative Instruments and Hedging Activities

As a portion of Teradata's operations is conducted outside the United States and in currencies other than the U.S. dollar, the Company is exposed to potential gains and losses from changes in foreign currency exchange rates. In an attempt to mitigate the impact of currency fluctuations, the Company uses foreign exchange forward contracts to hedge transactional exposures resulting predominantly from foreign currency denominated inter-company receivables and payables. The forward contracts are designated as fair value hedges of specified foreign currency denominated inter-company receivables and payables and generally mature in three months or less. The Company does not hold or issue derivative financial instruments for trading purposes, nor does it hold or issue leveraged derivative instruments. By using derivative financial instruments to hedge exposures to changes in exchange rates, the Company exposes itself to credit risk. The Company manages exposure to counterparty credit risk by entering into derivative financial instruments with highly rated institutions that can be expected to fully perform under the terms of the applicable contracts.

All derivatives are recognized in the consolidated balance sheets at their fair value. The fair values of foreign exchange contracts are based on market spot and forward exchange rates and represent estimates of possible value that may not be realized in the future. Changes in the fair value of derivative financial instruments, along with the loss or gain on the hedged asset or liability, are recorded in current period earnings. The notional amounts represent agreed-upon amounts on which calculations of dollars to be exchanged are based, and are an indication of the extent of Teradata's involvement in such instruments. These notional amounts do not represent amounts exchanged by the parties and, therefore, are not a measure of the instruments. Across its portfolio of contracts, Teradata has both long and short positions relative to the U.S. dollar. As a result, Teradata's net involvement is less than the total contract notional amount of the Company's foreign exchange forward contracts.

The following table identifies the contract notional amount of the Company's foreign exchange forward contracts:

	As of	
In millions	March 31, 2016	December 31, 2015
Contract notional amount of foreign exchange forward contracts	\$94	\$ 138
Net contract notional amount of foreign exchange forward contracts	\$14	\$ 25

Table of Contents

The fair value of derivative assets and liabilities recorded in other current assets and accrued liabilities at March 31, 2016 and December 31, 2015, were not material.

Gains and losses from the Company's fair value hedges (foreign currency forward contracts and related hedged items) were immaterial for the three months ended March 31, 2016 and March 31, 2015. Gains and losses from foreign exchange forward contracts are fully recognized each period and reported along with the offsetting gain or loss of the related hedged item, either in cost of products or in other income (expense), depending on the nature of the related hedged item.

#### 7. Commitments and Contingencies

In the normal course of business, the Company is subject to proceedings, lawsuits, governmental investigations, claims and other matters, including those that relate to the environment, health and safety, employee benefits, export compliance, intellectual property, tax matters and other regulatory compliance and general matters.

**Guarantees and Product Warranties.** Guarantees associated with the Company's business activities are reviewed for appropriateness and impact to the Company's financial statements. Periodically, the Company's customers enter into various leasing arrangements coordinated with a leasing company. In some instances, the Company guarantees the leasing company a minimum value at the end of the lease term on the leased equipment. As of March 31, 2016, the maximum future payment obligation of this guaranteed value and the associated liability balance was \$3 million.

The Company provides its customers a standard manufacturer's warranty and records, at the time of the sale, a corresponding estimated liability for potential warranty costs. Estimated future obligations due to warranty claims are based upon historical factors such as labor rates, average repair time, travel time, number of service calls and cost of replacement parts. For each consummated sale, the Company recognizes the total customer revenue and records the associated warranty liability using pre-established warranty percentages for that product class.

The following table identifies the activity relating to the warranty reserve for the three months ended March 31:

In millions	2016	2015
Warranty reserve liability		
Beginning balance at January 1	\$ 6	\$ 7
Provisions for warranties issued	2	2
Settlements (in cash or in kind)	(2 )	(3 )
Balance at March 31	\$ 6	\$ 6

The Company also offers extended and/or enhanced coverage to its customers in the form of maintenance contracts. The Company accounts for these contracts by deferring the related maintenance revenue over the extended and/or enhanced coverage period. Costs associated with maintenance support are expensed as incurred. Amounts associated with these maintenance contracts are not included in the table above.

In addition, the Company provides its customers with certain indemnification rights. In general, the Company agrees to indemnify the customer if a third party asserts patent or other infringement on the part of the customer for its use of the Company's products. The Company has entered into indemnification agreements with the officers and directors of its subsidiaries. From time to time, the Company also enters into agreements in connection with its acquisition and divestiture activities that include indemnification obligations by the Company. The fair value of these indemnification obligations is not readily determinable due to the conditional nature of the Company's potential obligations and the specific facts and circumstances involved with each particular agreement, and as such the Company has not recorded a liability in connection with these indemnification arrangements. Historically, payments made by the Company under these types of agreements have not had a material effect on the Company's consolidated financial condition, results of operations or cash flows.

Table of Contents

## 8. Fair Value Measurements

Fair value measurements are established utilizing a three-tier fair value hierarchy, which prioritizes the inputs used in measuring fair value. These tiers include: Level 1, defined as observable inputs such as quoted prices in active markets for identical assets or liabilities; Level 2, defined as significant other observable inputs, such as quoted prices in active markets for similar assets or liabilities, or quoted prices in less-active markets for identical assets; and Level 3, defined as unobservable inputs in which little or no market data exists, therefore requiring an entity to develop its own assumptions. Financial assets and liabilities are classified in their entirety based on the lowest level of input that is significant to the fair value measurement.

The Company's assets and liabilities measured at fair value on a recurring basis include money market funds and foreign currency exchange contracts. A portion of the Company's excess cash reserves are held in money market funds which generate interest income based on the prevailing market rates. Money market funds are included in cash and cash equivalents in the Company's balance sheet. Money market fund holdings are measured at fair value using quoted market prices and are classified within Level 1 of the valuation hierarchy.

When deemed appropriate, the Company minimizes its exposure to changes in foreign currency exchange rates through the use of derivative financial instruments, specifically, foreign exchange forward contracts. The fair value of these contracts are measured at the end of each interim reporting period using observable inputs other than quoted prices, specifically market spot and forward exchange rates. As such, these derivative instruments are classified within Level 2 of the valuation hierarchy. Fair value gains for open contracts are recognized as assets and fair value losses are recognized as liabilities. The fair value derivative assets and liabilities recorded in other current assets and accrued liabilities at March 31, 2016 and December 31, 2015, were not material. Any realized gains or losses would be mitigated by corresponding gains or losses on the underlying exposures.

The Company's assets measured at fair value on a recurring basis and subject to fair value disclosure requirements at March 31, 2016 and December 31, 2015 were as follows:

In millions	Total	Fair Value Measurements at Reporting Date Using		
		Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Assets				
Money market funds, March 31, 2016	\$447	\$ 447	\$ —	\$ —
Money market funds, December 31, 2015	\$351	\$ 351	\$ —	\$ —

## 9. Debt

Teradata's revolving credit facility (the "Credit Facility") has a borrowing capacity \$400 million. The Credit Facility ends on March 25, 2020 at which point any remaining outstanding borrowings would be due for repayment unless extended by agreement of the parties for up to two additional one-year periods. The interest rate charged on borrowings pursuant to the Credit Facility can vary depending on the interest rate option the Company chooses to utilize and the Company's leverage ratio at the time of the borrowing. In the near term, Teradata would anticipate choosing a floating rate based on the London Interbank Offered Rate ("LIBOR"). The Credit Facility is unsecured and contains certain representations and warranties, conditions, affirmative, negative and financial covenants, and events of default customary for such facilities.

As of March 31, 2016, the Company had \$80 million outstanding under the Credit Facility and carried an interest rate of 1.7329%, leaving \$320 million in additional borrowing capacity available. Unamortized deferred costs on the original credit facility and new lender fees of approximately \$1 million are being amortized over the five-year term of the credit facility. The Company was in compliance with all covenants as of March 31, 2016.

Table of Contents

Teradata's \$600 million term loan is payable in quarterly installments, which commenced on March 31, 2016, with all remaining principal due in March 2020. The outstanding principal amount under the term loan agreement bears interest at a floating rate based upon a negotiated base rate or a Eurodollar rate plus a margin based on the leverage ratio of the Company. As of March 31, 2016, the term loan principal outstanding was \$593 million and carried an interest rate of 1.9375%. Unamortized deferred issuance costs of approximately \$2 million are being amortized over the five-year term of the loan. The Company was in compliance with all covenants as of March 31, 2016.

Annual contractual maturities of principal on the term loan outstanding at March 31, 2016 are as follows:

In millions	Amounts Due
2016	\$ 23
2017	30
2018	60
2019	68
2020	412
Total	\$ 593

Teradata's term loan is recognized on the Company's balance sheet at its unpaid principal balance, and is not subject to fair value measurement. However, given that the loan carries a variable rate, the Company estimates that the unpaid principal balance of the term loan would approximate its fair value. If measured at fair value in the financial statements, the Company's term loan would be classified as Level 2 in the fair value hierarchy.

#### 10. Earnings per Share

Basic earnings per share is calculated by dividing net income by the weighted average number of shares outstanding during the reported period. The calculation of diluted earnings per share is similar to basic earnings per share, except that the weighted average number of shares outstanding includes the dilution from potential shares resulting from stock options, restricted stock awards and other stock awards. The components of basic and diluted earnings per share are as follows:

In millions, except per share amounts	Three Months Ended March 31,	
	2016	2015
Net (loss) income attributable to common stockholders	\$(46 )	\$22
Weighted average outstanding shares of common stock	129.4	145.2
Dilutive effect of employee stock options, restricted stock and other stock awards	—	2.5
Common stock and common stock equivalents	129.4	147.7
(Loss) income per share:		
Basic	\$(0.36)	\$0.15
Diluted	\$(0.36)	\$0.15

For the three months ended March 31, 2016, due to the net loss attributable to Teradata common stockholders, potential common shares that would cause dilution, such as employee stock options, restricted stock and other stock awards, have been excluded from the diluted share count because their effect would have been anti-dilutive. For the three months ended March 31, 2016, the fully diluted shares would have been 130.9 million.

Options to purchase 5.7 million shares of common stock for the three months ended March 31, 2016 and 3.1 million shares of common stock for the three months ended March 31, 2015 were not included in the computation of diluted earnings per share because their exercise prices were greater than the average market price of the common shares for the period, and therefore would have been anti-dilutive.

Table of Contents

## 11. Segment and Other Supplemental Information

Effective January 1, 2016, Teradata implemented an organizational change in which Teradata now manages its business under two geographic regions and the marketing applications division prior to its expected sale, which are also the Company's operating segments: (1) Americas Data and Analytics (North America and Latin America); (2) International Data and Analytics (Europe, Middle East, Africa, Asia Pacific and Japan); and (3) Marketing Applications. This change reflects the dynamics of each market, and how we bring solutions to our customers. For purposes of discussing results by segment, management excludes the impact of certain items, consistent with the manner by which management evaluates the performance of each segment. This format is useful to investors because it allows analysis and comparability of operating trends. It also includes the same information that is used by Teradata management to make decisions regarding the segments and to assess financial performance. The chief operating decision maker evaluates the performance of the segments based on revenue and multiple profit measures, including segment gross margin. For management reporting purposes assets are not allocated to the segments. Prior period segment information has been reclassified to conform to the current period presentation.

The following table presents segment revenue and segment gross margin for the Company:

In millions	Three Months Ended March 31, 2016 2015	
Segment revenue		
Americas Data and Analytics	\$295	\$336
International Data and Analytics	216	208
Total Data and Analytics	511	544
Marketing Applications	34	38
Total revenue	545	582
Segment gross margin		
Americas Data and Analytics	164	179
International Data and Analytics	97	93
Total Data and Analytics	261	272
Marketing Applications	17	15
Total segment gross margin	278	287
Stock-based compensation costs	(4 )	(4 )
Amortization of acquisition-related intangible assets costs	(2 )	(5 )
Acquisition, integration and reorganization-related costs	(3 )	(1 )
Selling, general and administrative expenses	174	184
Research and development expenses	57	63
Impairment of goodwill, acquired intangibles and other assets	80	—
(Loss) income from operations	\$(42 )	\$30

Table of Contents

The following table presents revenue by product and services for the Company:

In millions	Three Months Ended March 31,	
	2016	2015
Products (software and hardware) <sup>(1)</sup>	\$ 194	\$ 241
Consulting services	179	172
Maintenance services	172	169
Total services	351	341
Total revenue	\$545	\$582

<sup>(1)</sup> Our analytic database software and hardware products are often sold and delivered together in the form of a “node” of capacity as an integrated technology solution. Accordingly, it is impracticable to provide the breakdown of revenue from various types of software and hardware products.

#### Note 12 Reorganization and Business Transformation

In the fourth quarter of 2015 the Company announced a plan to realign Teradata’s business by reducing its cost structure and focusing on the Company’s core data and analytics business. This business transformation includes exiting the marketing applications business (see Note 13), rationalizing costs, and modifying the Company’s go-to-market approach. The Company incurred the following costs for the three months ended March 31, 2016 related to these actions:

- \$9 million for employee severance and other employee-related costs,
- \$80 million charge for asset write-downs, and
- \$8 million for professional services, legal and other associated costs.

From the amounts incurred above, \$80 million was for non-cash write-downs of goodwill, acquired intangibles and other assets (see Note 4). In addition to the costs and charges incurred above, the Company made cash payments of \$8 million for employee severance that did not have a material impact on its Statement of Operations due to Teradata accounting for its postemployment benefits under Accounting Standards Codification 712, Compensation - Nonretirement Postemployment Benefits (“ASC 712”), which uses actuarial estimates and defers the immediate recognition of gains or losses. Because the Company accounts for postemployment benefits under ASC 712, it did not record any liability associated with ASC 420, Exit or Disposal Cost Obligations.

#### Note 13 Assets and Liabilities Held for Sale

In the fourth quarter of 2015, the Company committed to a plan to exit the marketing applications business. The Company determined that it was in the long-term best interests of the Company and its shareholders to realign Teradata’s business by focusing on the Company’s core data and analytics business. The assets and liabilities for this business, which are included within our marketing applications segment, were classified as held for sale in the fourth quarter of 2015 and, therefore, the corresponding depreciation and amortization expense was ceased at that time. The anticipated divestiture is not presented as discontinued operations in our consolidated financial statements, because it does not have a major effect on the Company's operations and financial results.

For the quarter ended March 31, 2016, we generated revenue from these assets of \$34 million. Additionally, for the quarter ended March 31, 2016 we recognized operating loss from these assets of \$96 million (includes loss from impairment of goodwill and acquired intangibles of \$76 million).

When an asset is classified as held for sale, the asset’s carrying amount is evaluated and adjusted to the lower of its carrying amount or fair value less costs to sell. On April 22, 2016, the Company entered into a definitive Asset Purchase Agreement with an affiliate of Marlin Equity Partners to sell the marketing applications business for \$90 million in cash, subject to customary adjustments based on, among other things, the amount of cash, debt and working capital in the business at the closing date. The Company performed a goodwill impairment analysis on the business to

be disposed of based on the fair value as determined using the Asset Purchase Agreement. As a result of this analysis, the Company recognized an impairment of goodwill of \$57 million in the first quarter of 2016. The

Table of Contents

remaining goodwill of \$56 million is disclosed in the assets held for sale in the Consolidated Balance Sheets. In addition, acquired intangible assets were reduced by \$19 million to adjust the carrying amount of the disposal group's net assets and liabilities down to its fair value less cost to sell.

A summary of the carrying amounts of assets and liabilities held for sale on our consolidated balance sheets as of March 31, 2016 related to the anticipated divestiture discussed above is detailed below:

In millions	As of March 31, 2016	As of December 31, 2015
Current assets held for sale		
Accounts receivable, net	\$ 36	\$ 41
Other current assets	2	3
Total current assets held for sale	38	44
Property and equipment, net	17	12
Goodwill	56	113
Acquired intangibles, net	25	44
Other assets	3	1
Total assets held for sale	\$ 139	\$ 214
Current liabilities held for sale		
Accounts payable	8	10
Payroll and benefits liabilities	7	12
Deferred Revenue	31	30
Other current liabilities	1	5
Total current liabilities held for sale	47	57
Other liabilities	8	1
Total liabilities held for sale	\$ 55	\$ 58

During the three months ended March 31, 2016, the Company entered into an agreement to broker the sale of its corporate plane. The Company recognized an impairment loss of \$4 million based on the market value of the plane held for sale and has presented the plane in assets held for sale in the consolidated Balance Sheets. The carrying amount of \$5 million is included in the above table under Property and equipment, net. On April 21, 2016, the Company signed an agreement for the sale of its corporate plane for \$5 million.

#### Note 14 Subsequent Events

On May 5, 2016, the Company announced that Michael F. Koehler stepped down as Teradata's President and Chief Executive Officer and is no longer a director of the Company as of that date. The Company also announced that Victor L. Lund, a current member of the Board of Directors, had been elected the President and Chief Executive Officer of the Company effective May 5, 2016. In connection with the departure of Mr. Koehler, the Company expects to recognize a one-time pre-tax charge of approximately \$3 million in the second quarter of 2016.

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations ("MD&A"). You should read the following discussion in conjunction with the Condensed Consolidated Financial Statements and the notes to those statements included elsewhere in this Quarterly Report on Form 10-Q. This Quarterly Report on Form 10-Q contains certain statements that are forward-looking within the meaning of the Private Securities Litigation Reform Act of 1995. Certain statements contained in the MD&A are forward-looking statements that involve risks and uncertainties. The forward-looking statements are not historical facts, but rather are based on current expectations, estimates, assumptions and projections about our industry, business and future financial results. Our actual results could differ materially from the results contemplated by these forward-looking statements due to a number of factors, including those discussed in other sections of this Quarterly Report on Form 10-Q and in the 2015 Annual Report on Form 10-K.

First Quarter Financial Overview

As more fully discussed in later sections of this MD&A, the following were significant financial items for the first quarter of 2016:

Total revenue was \$545 million for the first quarter of 2016, down from the first quarter of 2015, with an underlying 20% decrease in product revenue and a 3% increase in services revenue.

Gross margin increased to 49.4% in the first quarter of 2016 up from 47.6% in the first quarter of 2015, driven by higher product and services gross margin.

Operating loss was \$42 million in the first quarter of 2016, compared to operating income of \$30 million in the first quarter of 2015, driven by an impairment loss on goodwill, acquired intangibles and other assets.

Net loss in the first quarter of 2016 was \$46 million, compared to net income of \$22 million in the first quarter of 2015.

Strategic Overview

Teradata empowers data-driven companies to achieve competitive advantage and win in their markets by exploiting data for insight and value. With Teradata's industry-leading analytic data solutions and proven consulting experience and expertise, companies can become more competitive by leveraging insights from integrated data to, among other things, increase revenue and profitability, improve effectiveness, drive innovation, enhance customer relationships, improve business processes and reduce costs.

Our strategy is centered on providing the world's best data solutions to drive competitive advantage for our customers, by focusing on these critical areas:

Deliver our solutions on-premises or via the cloud (as a service), offering customers choice in how they deploy a Teradata analytics environment and leverage the power of our solutions. These flexible delivery options are designed to extend our market opportunity.

Expand our analytical ecosystem offerings, including our big data portfolio, which helps organizations architect, integrate data into, and manage their analytic environment. We also focus on enhancing and extending value-added services, including big data consulting, ecosystem architecture consulting and managed services across customers' complex analytical ecosystems.

Building analytic solutions and providing consulting that creates actionable insights and/or automates decisions that deliver high impact return on investment, by packaging replicable analytical use cases, based on learnings from our top customers, many of which are the leaders and innovators in analytics.

Optimize our go-to-market approach to improve effectiveness in demand creation and address new and expanded market opportunities, such as with our cloud offerings.

Continue investing in partnerships to increase the number of solutions available on Teradata platforms, maximize customer value, and increase our market coverage.

We believe that these strategic areas will best position us to be our customers' trusted advisor and partner of choice for architecting, implementing, and managing their analytic solutions.

Table of Contents

Future Trends

We believe that future demand for our analytic data platforms will increase due to high levels of data growth being driven by new types of data, such as big data and the internet of things, including: machine-generated data, sensor data, data from connected devices, social network data, internet text and search indexing, call detail records, genomics, biological research, medical records, seismic/exploration data, photography and video archives, and large scale e-commerce data.

Analytic environments are becoming more complex to design and manage as there are increasing types of analytic tools and techniques, multiple data management systems both on-premises and in the cloud, varying service level requirements, and the growth and volume of data. This complexity drives the need for an overall architecture to manage such environments. Demand for value-added services is growing as customers seek help with evolving their analytic architectures, rapidly deploying their analytic architectural solutions, and increasingly look to purchase analytic capabilities "as a service".

Overall, analytics are growing in importance as global businesses seek new means to drive business value from the ever-increasing amounts and types of data and as a result, we expect Teradata's leadership position and investments in strategic areas of focus to position us for future growth.

This growth, however, is not expected to be without its challenges from general economic conditions, competitive pressures, alternative technologies, and other risks and uncertainties. Since mid-2012, we have seen a shift in the market and in customers' buying patterns, with respect to large capital investments and related services. Currently, we believe that the greatest challenges for future revenue growth relate to pressures on large capital expenditures and the way customers want to purchase and deploy analytic technologies.

We believe that a number of factors have contributed to the pressures on large capital expenditures and the resulting slowdown in our revenue growth, including: the evolving information technology market, as customers focus investments in their analytical ecosystems which have lower average selling prices than traditional on-premises integrated data warehouse ("IDW") environments and changing customer behavior as buying decisions are shifting from IT to business users.

Overall, we believe that the IDW will remain a critical part of companies' analytical ecosystems and Teradata's technology is highly differentiated with our ability to handle the concurrency and service level agreements of hundreds to thousands of mission-critical users and applications. Further, we believe the Company has the opportunity for continued revenue growth from both the expansion of our existing customers' analytical ecosystems (through growth in IDW, Teradata private and public cloud, Teradata big data analytics, and our value-added services and solutions) as well as the addition of new customers. Teradata has expanded our offerings as well as our pricing options to make it easier and to provide more flexibility for customers to buy and expand with Teradata including cloud offerings and subscription pricing.

There is risk that pricing and competitive pressures on our solutions could occur in the future as major customers evaluate and rationalize their analytics infrastructure, particularly to the extent that cost becomes a top focus and lower-cost alternatives are more seriously and frequently considered. However, such alternatives generally do not enable companies to perform mission-critical, complex business analytic workloads or provide a Unified Data Architecture to address mission-critical analytics, discovery analytics, and data management such as those enabled by Teradata's offerings. As the market continues to evolve, we could be challenged to generate revenue growth shorter term as customers purchase in smaller deal sizes, and we potentially shift from upfront perpetual licenses to recurring subscription models for both on-premises and cloud offerings.

As described above, we continue to believe that analytics will remain a high priority for companies and longer term will drive growth for Teradata's leading solutions. Moreover, we continue to be committed to new product development and achieving a positive yield from our research and development spending and resources, which are intended to drive future demand. In addition, we will continue to optimize our go-to-market structure and rationalize our cost structure as we work to broaden our product and services portfolios and market reach.

Table of Contents

As a portion of the Company's operations and revenue occur outside the United States, and in currencies other than the U.S. dollar, the Company is exposed to fluctuations in foreign currency exchange rates. Based on currency rates as of April 30, 2016, Teradata is expecting no additional impact from currency translation on our full year reported revenue growth rate.

**BUSINESS TRANSFORMATION**

During 2015, the Company announced a plan to realign Teradata's business by reducing its cost structure and focusing on the Company's core data and analytics business. In addition to exiting the marketing applications business, this plan is intended to lead to a comprehensive transformation of the Company that will place it on a trajectory of meaningful revenue growth, by building on our strengths in high performance data analytics and consulting services, advancing our technology leadership positions, and expanding our market opportunities. This transformation plan addresses the challenges of the analytical ecosystem, cloud, software-only, and open source. It also addresses customers' changing behaviors in how they buy, consume, and deploy analytic solutions.

Our broad-reaching transformation is intended to drive change in four key revenue generating areas and create a more diversified, stable, and predictable revenue stream:

On premises data warehouse - We plan to make it easier to buy, expand, and seamlessly upgrade data warehouses - through pricing options, software-only, and Teradata Labs innovation. We believe that we have a solid opportunity for revenue growth in this market by growing the portion of IT budgets our existing customers spend on Teradata solutions, and by penetrating the more than 75% of the Global 5000 that do not use Teradata. We expect that our recently announced Intelliflex platform architecture will provide more flexible configurations and seamless expansions of our customers' IDW environments, and our software-only version of Teradata will also allow us to expand with both new and existing customers.

Cloud - We plan to make our data warehouse available on and across both Teradata's managed cloud and public cloud environments, which is intended to expand our data warehouse market opportunity in the Global 5000. Our existing managed cloud solution is now complemented by the release of our initial software-only version of Teradata on a public cloud during the first quarter of 2016, and we plan to make our fully scalable version of Teradata available on public clouds in early 2017. We are building new services for cloud migration as well as for design, implementation and management of cloud and hybrid cloud environments.

Analytical ecosystem - We plan to continue to add to our software and service offerings that focus on enabling customers to easily load and integrate data and to manage their analytical ecosystem through products such as Unity, QueryGrid, and Listener. These offerings help connect and manage the ecosystem including not only Teradata IDW environments, but also with Aster and Hadoop to help manage and extract value from the data. Additionally, the analytical ecosystem portfolio will become a foundation to enable hybrid cloud use cases.

Value-added services and solutions - We plan to provide analytic consulting and replicable analytic solutions including packaged service offers, use cases, and intellectual property. We believe we have a strong foundation for building repeatable solutions with our logical data models, business improvement opportunities, and analytic use cases we enable with our customers. We intend to expand our investments to systematically capture more of these use cases and intellectual property from engagements around the world and to package them for ease of delivery and implementation.

We expect the mix of our revenues to shift toward cloud, analytical ecosystem, and value added analytic services over time, as these are fast growing markets. We believe this shift also will help increase our recurring revenue.

Another central and critical element of Teradata's transformation plan is modifying our go-to-market approach to integrate with our four revenue generating initiatives. We have already begun taking steps to optimize our go-to-market approach for on-premises data warehouse and analytical ecosystem, and we are also exploring new ways to generate additional demand within the Global 5000.

The Company is also engaged in a thorough review of its costs and is taking significant steps to rationalize its expense structure. This broad-based cost rationalization effort includes reducing Teradata's infrastructure costs as it transitions its focus solely to its data and analytics business, optimizes its go-to-market resources and approach, and prioritizes research and development projects based on revenue generation and profitability.

Table of Contents

Although we believe the demand for our marketing applications solutions is likely to increase as marketing continues to be transformed by the increased usage of data and analytics, Teradata has concluded it is in the long-term best interests of the Company and its shareholders to exit the marketing applications business in order to exclusively focus on its data and analytics business.

Results of Operations for the Three Months Ended March 31, 2016

Compared to the Three Months Ended March 31, 2015

## Revenue

In millions	2016	% of Revenue	2015	% of Revenue
Product revenue	\$194	35.6 %	\$241	41.4 %
Service revenue	351	64.4 %	341	58.6 %
Total revenue	\$545	100 %	\$582	100 %

Teradata revenue decreased \$37 million or 6% in the first quarter of 2016 compared to the first quarter of 2015.

Foreign currency fluctuations had a 2% adverse impact on revenue in the quarter. Product revenue decreased 20% in the first quarter of 2016 from the prior-year period primarily due to a decrease in large capital expenditure transactions. Services revenue increased 3% in the first quarter of 2016 compared to the prior-year period. This was primarily due to a 4% increase in consulting revenue and a 2% increase in maintenance revenue from the prior period.

## Gross Margin

In millions	2016	% of Revenue	2015	% of Revenue
Product gross margin	\$116	59.8 %	\$132	54.8 %
Service gross margin	153	43.6 %	145	42.5 %
Total gross margin	\$269	49.4 %	\$277	47.6 %

Product gross margin increase was driven by improved deal and product mix. The services gross margin increase was primarily driven by improved utilization.

## Operating Expenses

In millions	2016	% of Revenue	2015	% of Revenue
Operating expenses				
Selling, general and administrative expenses	\$174	31.9 %	\$184	31.6 %
Research and development expenses	57	10.5 %	63	10.8 %
Impairment of goodwill, acquired intangibles and other assets	80	14.7 %	—	— %
Total operating expenses	\$311	57.1 %	\$247	42.4 %

The decrease in Selling, General and Administrative ("SG&A") expense of \$10 million was primarily due to cost reduction initiatives. Research and Development ("R&D") expenses decreased \$6 million due to cost reduction initiatives and software capitalization.

During the first quarter of 2016, the Company entered into a definitive Asset Purchase Agreement with an affiliate of Marlin Equity Partners to sell the marketing applications business for \$90 million in cash, subject to customary adjustments based on, among other things, the amount of cash, debt and working capital in the business at the closing date. The Company performed a goodwill impairment analysis on the business to be disposed of based on the fair value as determined using the Asset Purchase Agreement. As a result of this analysis, the Company recognized an impairment of goodwill of \$57 million in the first quarter of 2016.

Table of Contents

In addition, acquired intangible assets were reduced by \$19 million to adjust the carrying amount of the disposal group's net assets and liabilities down to its fair value less cost to sell.

The Company also recorded a \$4 million impairment charge related to its corporate plane that was classified as held for sale.

## Other Expense, net

In millions	2016	2015
Interest income	1	1
Interest expense	(3 )	(1 )
Other	(1 )	—
Other income, net	\$(3 )	\$ —

Other expense in the first quarter of 2016 arose primarily from \$3 million in interest expense on long-term debt.

## Provision for Income Taxes

Income tax provisions for interim periods are based on estimated annual income tax rates, adjusted to reflect the effects of any significant infrequent or unusual items which are required to be discretely recognized within the current interim period. The Company's intention is to permanently reinvest its foreign earnings outside of the United States. As a result, the effective tax rates in the periods presented are largely based upon the forecasted pre-tax earnings mix between the United States and other foreign taxing jurisdictions where the Company conducts its business under its current structure. The Company estimates its full-year effective tax rate for 2016 to be approximately 34.5%, which takes into consideration, among other things, the forecasted earnings mix by jurisdiction for 2016 and the discrete tax impact to our effective rate resulting from the \$57 million non-deductible goodwill impairment, which resulted in no tax benefit. This estimate also includes the estimated discrete tax impact that will occur upon the disposition of the Marketing Applications business, which is expected to close around the end of second quarter of 2016. The forecasted tax rate is based on the overseas profits being taxed at an overall effective tax rate of approximately 12.5%, as compared to the federal statutory tax rate of 35% in the United States.

The effective tax rate for the three months ended March 31, 2016 and March 31, 2015 were as follows:

	2016	2015
Effective tax rate	(2.2)%	26.7%

For the three months ended March 31, 2016, the effective tax rate includes a material discrete tax item resulting from the \$76 million impairment of goodwill and acquired intangibles recorded in the first quarter, of which \$57 million is related to non deductible goodwill. This results in income tax expense in Q1 2016 of \$1 million, on a pre-tax net loss of \$45 million, causing a negative tax rate of (2.2%). There were no material discrete tax items for the three months ended March 31, 2015. The decrease in the effective tax rate was primarily driven by the tax impact of the goodwill impairment for the three months ended March 31, 2016.

Table of Contents

## Revenue and Gross Margin by Operating Segment

Effective January 1, 2016, Teradata implemented an organizational change in which Teradata now manages its business under two geographic regions and the marketing applications division prior to its expected sale, which are also the Company's operating segments: (1) Americas Data and Analytics (North America and Latin America); (2) International Data and Analytics (Europe, Middle East, Africa, Asia Pacific and Japan); and (3) Marketing Applications. This change reflects the dynamics of each market, and how we bring solutions to our customers. For purposes of discussing results by segment, management excludes the impact of certain items, consistent with the manner by which management evaluates the performance of each segment. This format is useful to investors because it allows analysis and comparability of operating trends. It also includes the same information that is used by Teradata management to make decisions regarding the segments and to assess financial performance. The chief operating decision maker evaluates the performance of the segments based on revenue and multiple profit measures, including segment gross margin. For management reporting purposes assets are not allocated to the segments. Our segment results are reconciled to total company results reported under U.S. generally accepted accounting principles ("GAAP") in Note 11 of Notes to Condensed Consolidated Financial Statements (Unaudited). Prior period segment information has been reclassified to conform to the current period presentation.

The following table presents revenue and operating performance by segment for the three months ended March 31:

In millions	% of		% of	
	2016	Revenue	2015	Revenue
Segment revenue				
Americas Data and Analytics	\$295	54.1 %	\$336	57.8 %
International Data and Analytics	216	39.6 %	208	35.7 %
Total Data and Analytics	511	93.8 %	544	93.5 %
Marketing Applications	34	6.2 %	38	6.5 %
Total segment revenue	\$545	100 %	\$582	100 %
Segment gross margin				
Americas Data and Analytics	\$164	55.6 %	\$179	53.3 %
International Data and Analytics	97	44.9 %	93	44.7 %
Total Data and Analytics	261	51.1 %	272	50.0 %
Marketing Applications	17	50.0 %	15	39.5 %
Total segment gross margin	\$278	51.0 %	\$287	49.3 %

Americas Data and Analytics: Revenue decreased 12% in the first quarter of 2016 from the first quarter of 2015, which included a 1% adverse revenue impact from foreign currency fluctuations. The revenue decline was driven by a decline in large capital expenditure transaction revenue in the first quarter of 2016 as compared to first quarter of 2015. Segment gross margins were up from first quarter of 2015 driven by increases in both product and services gross margins. Segment product gross margin was 59.7% in the first quarter of 2016 as compared to 52.8% in the first quarter of 2015. Improvement in the product gross margin was driven by improved deal and product mix. Service margins were flat.

International Data and Analytics: Revenue increased 4% in the first quarter of 2016 from the first quarter of 2015, which included a 3% adverse revenue impact from foreign currency fluctuations. The revenue increase was driven by improved revenues in the Europe and Asia Pacific regions in the first quarter of 2016 as compared to first quarter of 2015. Segment gross margins were flat as compared to the first quarter of 2015.

Marketing Applications: Revenue decreased 11% in the first quarter of 2016 from the first quarter of 2015. The revenue decrease included a 5% adverse revenue impact from foreign currency fluctuations. The decline in revenue was driven by lower recurring revenues in the first quarter of 2016 as compared to the first quarter of 2015. The overall segment gross margin increase is primarily driven by higher professional services margins. In the first quarter of 2015 the Company made investments to help better position the Company to go broader in the market, this resulted in lower service margins in 2015.

Table of Contents

## Financial Condition, Liquidity and Capital Resources

Cash provided by operating activities increased by \$29 million in the three months ended March 31, 2016 compared to the three months ended March 31, 2015. The increase in cash provided by operating activities was primarily due to changes in working capital.

Teradata's management uses a non-GAAP measure called "free cash flow," which is not a measure defined under GAAP. We define free cash flow as net cash provided by operating activities, less capital expenditures for property and equipment, and additions to capitalized software, as one measure of assessing the financial performance of the Company, and this may differ from the definition used by other companies. The components that are used to calculate free cash flow are GAAP measures taken directly from the Condensed Consolidated Statements of Cash Flows (Unaudited). We believe that free cash flow information is useful for investors because it relates the operating cash flow of the Company to the capital that is spent to continue and improve business operations. In particular, free cash flow indicates the amount of cash available after capital expenditures, for among other things, investments in the Company's existing businesses, strategic acquisitions and repurchase of Teradata common stock. Free cash flow does not represent the residual cash flow available for discretionary expenditures since there may be other non-discretionary expenditures that are not deducted from the measure. This non-GAAP measure should not be considered a substitute for, or superior to, cash flows from operating activities under GAAP.

The table below shows net cash provided by operating activities and capital expenditures for the following periods:

	Three Months Ended March 31,	
In millions	2016	2015
Net cash provided by operating activities	\$251	\$222
Less:		
Expenditures for property and equipment	(8 )	(17 )
Additions to capitalized software	(18 )	(15 )
Free cash flow	\$225	\$190

Financing activities and certain other investing activities are not included in our calculation of free cash flow. These other investing activities included the additional release of funds from previous acquisitions in the three months ended March 31, 2016. There were no other investing activities in the first quarter of 2015.

Teradata's financing activities for the three months ended March 31, 2016 consisted of cash outflows for share repurchases, payments on credit facility borrowings and long-term debt. The Company purchased 2.0 million shares of its common stock at an average price per share of \$23.38 in the three months ended March 31, 2016 and 6.3 million shares at an average price per share of \$43.34 in the three months ended March 31, 2015. The first program (the "dilution offset program"), allows the Company to repurchase Teradata common stock to the extent of cash received from the exercise of stock options and the Teradata Employee Stock Purchase Plan ("ESPP") to offset dilution from shares issued pursuant to these plans. As of March 31, 2016, under the Company's second share repurchase program (the "general share repurchase program"), the Company had \$528 million of authorization remaining to repurchase outstanding shares of Teradata common stock. Share repurchases made by the Company are reported on a trade date basis. Our share repurchase activity depends on factors such as our working capital needs, our cash requirements for capital investments, our stock price, and economic and market conditions.

Proceeds from the ESPP and the exercise of stock options were \$8 million for the three months ended March 31, 2016. These proceeds are included in other financing activities, net in the Condensed Consolidated Statements of Cash Flows (Unaudited). Additionally, during the three months ended March 31, 2016, the Company repaid \$100 million against the principal balance of its revolving credit facility, which is discussed further below.

Our total in cash and cash equivalents held outside the United States in various foreign subsidiaries was \$891 million as of March 31, 2016 and \$819 million as of December 31, 2015. The remaining balance held in the United States was \$26 million as of March 31, 2016 and \$20 million as of December 31, 2015. Under current tax laws and regulations, if

cash and cash equivalents and short-term investments held outside the United States are distributed to

24

---

Table of Contents

the United States in the form of dividends or otherwise, we would be subject to additional U.S. income taxes (subject to an adjustment for foreign tax credits) and possible foreign withholding taxes. As of March 31, 2016, we have not provided for the U.S. federal tax liability on approximately \$1.2 billion of foreign earnings that are considered permanently reinvested outside of the United States.

Management believes current cash, Company cash flows from operations and its \$320 million available under the credit facility will be sufficient to satisfy future working capital, research and development activities, capital expenditures, pension contributions, and other financing requirements for at least the next twelve months. The Company principally holds its cash and cash equivalents in bank deposits and highly-rated money market funds. The Company's ability to generate positive cash flows from operations is dependent on general economic conditions, competitive pressures, and other business and risk factors described in the Company's 2015 Annual Report on Form 10-K (the "2015 Annual Report"), and elsewhere in this Quarterly Report. If the Company is unable to generate sufficient cash flows from operations, or otherwise to comply with the terms of the credit facility and term loan agreement, the Company may be required to seek additional financing alternatives.

**Long-term Debt.** Teradata's revolving credit facility (the "Credit Facility") has a borrowing capacity \$400 million. The Credit Facility ends on March 25, 2020 at which point any remaining outstanding borrowings would be due for repayment unless extended by agreement of the parties for up to two additional one-year periods. The interest rate charged on borrowings pursuant to the Credit Facility can vary depending on the interest rate option the Company chooses to utilize and the Company's leverage ratio at the time of the borrowing. In the near term, Teradata would anticipate choosing a floating rate based on the London Interbank Offered Rate ("LIBOR"). The Credit Facility is unsecured and contains certain representations and warranties, conditions, affirmative, negative and financial covenants, and events of default customary for such facilities.

As of March 31, 2016, the Company had \$80 million outstanding under the Credit Facility and carried an interest rate of 1.7329%, leaving \$320 million in additional borrowing capacity available. Unamortized deferred costs of approximately \$1 million are being amortized over the five-year term of the credit facility. The Company was in compliance with all covenants as of March 31, 2016.

Teradata's \$600 million term loan is payable in quarterly installments, which commenced on March 31, 2016, with all remaining principal due in March 2020. The outstanding principal amount under the term loan agreement bears interest at a floating rate based upon a negotiated base rate or a Eurodollar rate plus a margin based on the leverage ratio of the Company. As of March 31, 2016, the term loan principal outstanding was \$593 million and carried an interest rate of 1.9375%. Unamortized deferred issuance costs of approximately \$2 million are being amortized over the five-year term of the loan. The Company was in compliance with all covenants as of March 31, 2016.

**Contractual and Other Commercial Commitments.** There has been no significant change in our contractual and other commercial commitments as described in the 2015 Annual Report. Our guarantees and product warranties are discussed in Note 7 of Notes to Condensed Consolidated Financial Statements (Unaudited).

#### Critical Accounting Policies and Estimates

Our financial statements are prepared in accordance with GAAP. In connection with the preparation of these financial statements, we are required to make assumptions, estimates and judgments that affect the reported amounts of assets, liabilities, revenues, expenses and the related disclosure of contingent liabilities. These assumptions, estimates and judgments are based on historical experience and assumptions that are believed to be reasonable at the time. However, because future events and their effects cannot be determined with certainty, the determination of estimates requires the exercise of judgment. Our critical accounting policies are those that require assumptions to be made about matters that are highly uncertain. Different estimates could have a material impact on our financial results. Judgments and uncertainties affecting the application of these policies and estimates may result in materially different amounts being reported under different conditions or circumstances. Our management periodically reviews these estimates and assumptions to ensure that our financial statements are presented fairly and are materially correct.

Table of Contents

In many cases, the accounting treatment of a particular transaction is specifically dictated by GAAP and does not require significant management judgment in its application. There are also areas in which management's judgment in selecting among available alternatives would not produce a materially different result. The significant accounting policies and estimates that we believe are the most critical to aid in fully understanding and evaluating our reported financial results are discussed in the 2015 Annual Report. Teradata's senior management has reviewed these critical accounting policies and related disclosures and determined that there were no significant changes in our critical accounting policies in the three months ended March 31, 2016. Also, there were no significant changes in our estimates associated with those policies, except as discussed below.

During the first quarter of 2016, the Company entered into a definitive Asset Purchase Agreement with an affiliate of Marlin Equity Partners to sell the marketing applications business for \$90 million in cash, subject to customary adjustments based on, among other things, the amount of cash, debt and working capital in the business at the closing date. The Company performed a goodwill impairment analysis on the business to be disposed of based on the revised fair value. As a result of this analysis, the Company recognized an impairment of goodwill of \$57 million in the first quarter of 2016. In addition, acquired intangible assets were reduced by \$19 million to adjust the carrying amount of the disposal group's net assets and liabilities down to its fair value less cost to sell.

The Company will continue to evaluate goodwill on an annual basis as of the beginning of its fourth quarter, and whenever events or changes in circumstances, such as significant adverse changes in operating results, market conditions or changes in management's business strategy, indicate that there may be an indicator of impairment. It is possible that the assumptions used by management related to the evaluation may change or that actual results may vary significantly from management's estimates. As a result, additional impairment charges may occur in the future.

**New Accounting Pronouncements**

See discussion in Note 2 of Notes to Condensed Consolidated Financial Statements (Unaudited) for new accounting pronouncements.

**Item 3. Quantitative and Qualitative Disclosures About Market Risk.**

There have not been any material changes to the market risk factors previously disclosed in Part II, Item 7A of the Company's 2015 Annual Report on Form 10-K.

**Item 4. Controls and Procedures.**

**Evaluation of Disclosure Controls and Procedures**

Teradata maintains a system of disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934 (the "Exchange Act")) that are designed to provide reasonable assurance that information required to be disclosed in its reports filed or submitted under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to management, including, as appropriate, the Chief Executive Officer and the Chief Financial Officer, to allow timely decisions regarding required disclosures. In designing and evaluating the disclosure controls and procedures, management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives.

Based on their evaluation, our Chief Executive Officer and Chief Financial Officer have concluded that our disclosure controls and procedures were effective to provide reasonable assurance as of March 31, 2016.

**Changes in Internal Control over Financial Reporting**

There have been no changes in our internal control over financial reporting that occurred during the last fiscal quarter ended March 31, 2016 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

**Part II—OTHER INFORMATION**

Table of Contents

## Item 1. Legal Proceedings.

The information required by this item is included in the material under Note 7 of Notes to Condensed Consolidated Financial Statements (Unaudited) of this Quarterly Report on Form 10-Q and is incorporated herein by reference.

## Item 1A. Risk Factors.

There have not been any material changes to the risk factors previously disclosed in Part I, Item IA of the Company's Annual Report on Form 10-K.

## Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.

## Purchase of Company Common Stock

During the first quarter of 2016, the Company executed purchases of 2.0 million shares of its common stock at an average price per share of \$23.38 under the two share repurchase programs that were authorized by our Board of Directors. The first program (the "dilution offset program"), allows the Company to repurchase Teradata common stock to the extent of cash received from the exercise of stock options and the Teradata Employee Stock Purchase Plan ("ESPP") to offset dilution from shares issued pursuant to these plans. As of March 31, 2016, under the Company's second share repurchase program (the "general share repurchase program"), the Company had \$528 million of authorization remaining to repurchase outstanding shares of Teradata common stock. Share repurchases made by the Company are reported on a trade date basis.

Section 16 officers occasionally sell vested shares of restricted stock to the Company at the current market price to cover their withholding taxes. For the three months ended March 31, 2016, the total of these purchases was 5,846 shares at an average price of \$23.51 per share.

The following table provides information relating to the Company's share repurchase programs for the three months ended March 31, 2016:

Month	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Announced Dilution Offset Program	Total Number of Shares Purchased as Part of Announced General Share Repurchase Program	Maximum Dollar Value that May Yet Be Purchased Under the Dilution Offset Program	Maximum Dollar Value that May Yet Be Purchased Under the General Share Repurchase Program
January 2016	1,700,000	\$ 23.30	100,000	1,600,000	\$ 1,559,864	\$ 535,629,410
February 2016	303,600	\$ 23.79	3,600	300,000	\$ 3,258,665	\$ 528,496,830
March 2016	—	NA	—	—	\$ 9,929,458	\$ 528,496,830
