(Mark One)

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE
SECURITIES EXCHANGE ACT OF 1934
For the quarterly period ended March 31, 2010

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE
SECURITIES EXCHANGE ACT OF 1934
For the transition period from _____ to _____

Commission file number 0-18676

COMMERCIAL NATIONAL FINANCIAL CORPORATION
(Exact name of registrant as specified in its charter)

PENNSYLVANIA
(State or other jurisdiction of incorporation or
organization)

25-1623213
(I.R.S. Employer Identification No.)

900 LIGONIER STREET LATROBE, PA
(Address of principal executive offices)

15650
(Zip Code)

Registrant's telephone number, including area code:
539-3501

(724)

Indicate by checkmark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (section 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See definition of “large accelerated filer”, “accelerated filer”, and “smaller reporting company” in Rule 12b-2 of the Exchange Act. (Check one):

Large Accelerated filer Accelerated filer Non-accelerated filer Smaller Reporting Company

Indicate by check mark whether the registrant is a shell company(as defined in Rule 12b-2 of the Exchange Act).

Yes No

Indicate the number of shares outstanding of each of the issuer's classes of common stock.

COMMERCIAL NATIONAL FINANCIAL CORPORATION
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
 March 31, 2010

Note 1 Basis of Presentation

The accompanying consolidated financial statements include the accounts of Commercial National Financial Corporation (the Corporation) and its wholly owned subsidiaries, Commercial Bank & Trust of PA and Ridge Properties, Inc. All material intercompany transactions have been eliminated.

The accompanying unaudited consolidated interim financial statements have been prepared in accordance with generally accepted accounting principles for interim financial information. However, they do not include all information and footnote disclosures required by generally accepted accounting principles for complete financial statements and should be read in conjunction with the annual consolidated financial statements of the Corporation for the year ended December 31, 2009, including the notes thereto. In the opinion of management, the unaudited interim consolidated financial statements include all adjustments (consisting of only normal recurring adjustments) necessary for a fair presentation of financial position as of March 31, 2010 and the results of operations for the three-month period ended March 31, 2010 and 2009. The results of operations for the three months ended March 31, 2010 are not necessarily indicative of the results to be expected for the entire year.

Reclassifications

Certain comparative amounts for the prior year have been reclassified to conform to current year classifications. Such classifications had no effect on consolidated net income or changes in shareholders' equity.

Note 2 Allowance for Loan Losses

The provision for loan losses is the amount added to the allowance against which actual loan losses are charged. The amount of the provision is determined by management through an evaluation of the size and quality of the loan portfolio, economic conditions, concentrations of credit, recent loan loss trends, delinquencies and other risks inherent within the loan portfolio.

The corporation did not record a provision for the three-month periods ended March 31, 2010 and 2009.

Description of changes:

	(dollars in thousands)	
	2010	2009
Allowance balance January 1	\$1,722	\$1,821
Provision charged to operating expenses	0	0
Recoveries on previously charged off loans	1	0
Loans charged off	0	(15)
Allowance balance March 31	\$1,723	\$1,806

The following table presents a comparison of loan quality as of March 31, 2010 with that as of December 31, 2009. Cash payments received on non-accrual loans are recognized as interest income as long as the remaining balance of the loan is deemed to be fully collectible. When doubt exists as to the collectibility of a loan in non-accrual status, any payments received are applied to principal to the extent the doubt is eliminated. Once a loan is placed on non-accrual

status, any unpaid interest is charged against income.

	At March 31, 2010	At December 31, 2009
(dollars in thousands)		
Non-performing loans:		
Loans on non-accrual basis	\$ 250	\$ 261
Past due loans > 90 days	-	-
Renegotiated loans	969	979
Total non-performing loans	1,219	1,240
Foreclosed real estate	638	639
Total non-performing assets	\$ 1,857	\$ 1,879

Note 3 - Securities

The amortized cost and fair values of securities available for sale are as follows:

	Amortized Cost	Gross Unrealized Gains (In Thousands)	Gross Unrealized Losses	Fair Value
March 31, 2010:				
Obligations of states and political subdivisions	\$ 51,617	\$1,268	\$ (84)	\$ 52,801
Mortgage-backed securities	82,920	6,222	-	89,142
	\$134,537	\$7,490	\$ (84)	\$141,943
December 31, 2009:				
Obligations of states and political subdivisions	\$ 41,629	\$ 975	\$ (241)	\$ 42,363
Mortgage-backed securities	90,300	6,255	-	96,555
	\$131,929	\$7,230	\$ (241)	\$138,918

The amortized cost and fair value of securities at March 31, 2010 by contractual maturity, are shown below. Expected maturities will differ from contractual maturities because borrowers may have the right to call or prepay obligations with or without call or prepayment penalties.

	Amortized Cost (In Thousands)	Fair Value
Due within one year	\$ -	\$ -
Due after one year through five years	-	-
Due after five years through ten years	-	-
Due after ten years	51,617	52,801
Mortgage Backed Securities	82,920	89,142
	\$134,537	\$141,943

The following table shows the Corporation's gross unrealized losses and fair value, aggregated by investment category and length of time that individual securities have been in a continuous unrealized loss position at March 31, 2010:

(In Thousands)		
March 31, 2010		
Less than 12 Months	12 Months or More	Total

	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses
Obligations of states and political subdivisions	\$10,775	\$ (84)	\$ -	\$ -	\$10,775	\$ (84)

The Corporation reviews its position quarterly to determine if there is Other-Than-Temporary Impairment (OTTI) on any of its securities. All of the Corporation's securities are debt securities and we assess whether OTTI is present when the fair value of a security is less than its amortized cost basis. The Corporation monitors the credit ratings of all securities for downgrades as well as any other indication of OTTI condition. As of March 31, 2010 there were seven municipal bonds in an unrealized loss position. These unrealized losses are considered to be temporary impairments. The decline in the value of these debt securities is due only to interest rate fluctuations and not any deterioration in credit quality. As a result, the Corporation currently expects full payment of contractual cash flows, including principal from these securities.

The following table shows the Corporation's gross unrealized losses and fair value, aggregated by investment category and length of time that individual securities have been in a continuous unrealized loss position at December 31, 2009:

(In Thousands)						
December 31, 2009						
Less than 12 Months			12 Months or More		Total	
Fair Value	Unrealized Losses		Fair Value	Unrealized Losses	Fair Value	Unrealized Losses
Obligations of states and political subdivisions						
\$12,900	\$ (241)	\$ -	\$ -	\$12,900	\$ (241)	

Note 4 Comprehensive Income

The components of other comprehensive income and related tax effects for the three month periods ended March 31, 2010 and 2009 are as follows: (dollars in thousands)

	three months ended	For
	March 31	ended
	2010	2009
Net unrealized gains on securities available for sale	\$ 417	\$ 1,904
Tax effect	(142)	(647)
Net of tax amount	\$ 275	\$ 1,257

Note 5 Legal Proceedings

Other than proceedings which occur in the normal course of business, there are no legal proceedings to which either the Corporation or any of its subsidiaries is a party, which, in the opinion of management, will have any material effect on the financial position or results of operations of the Corporation and its subsidiaries.

Note 6 Guarantees

The Corporation does not issue any guarantees that would require liability recognition or disclosure, other than its standby letters of credit. Standby letters of credit written are conditional commitments issued by the Bank to secure the performance of a customer to a third party. Of these letters of credit, \$425,000 automatically renews within the next twelve months and \$2,152,000 will expire within thirteen to one hundred and thirteen months. The Bank, generally, holds collateral and/or personal guarantees supporting these commitments. The credit risk involved in issuing letters of credit is essentially the same as those that are involved in extending loan facilities to customers. The current amount of the liability as of March 31, 2010 for guarantees under standby letters of credit issued is not material.

Note 7 Earnings per share

The Corporation has a simple capital structure. Basic earnings per share equals net income divided by the weighted average common shares outstanding during each period presented. The weighted average common shares outstanding for the three months ended March 31, 2010 and 2009 was 2,860,953 and 2,876,191 respectively.

Note 8 New Accounting Standards

ASU 2010-06

The FASB has issued ASU 2010-06, Fair Value Measurements and Disclosures (Topic 820): Improving Disclosures about Fair Value Measurements. This ASU requires some new disclosures and clarifies some existing disclosure requirements about fair value measurement as set forth in Codification Subtopic 820-10. The FASB's objective is to improve these disclosures and, thus, increase the transparency in financial reporting. Specifically, ASU 2010-06 amends Codification Subtopic 820-10 to now require:

- A reporting entity to disclose separately the amounts of significant transfers in and out of Level 1 and Level 2 fair value measurements and describe the reasons for the transfers; and
- In the reconciliation for fair value measurements using significant unobservable inputs, a reporting entity should present separately information about purchases, sales, issuances, and settlements.

In addition, ASU 2010-06 clarifies the requirements of the following existing disclosures:

- For purposes of reporting fair value measurement for each class of assets and liabilities, a reporting entity needs to use judgment in determining the appropriate classes of assets and liabilities; and
- A reporting entity should provide disclosures about the valuation techniques and inputs used to measure fair value for both recurring and nonrecurring fair value measurements.

ASU 2010-06 is effective for interim and annual reporting periods beginning after December 15, 2009, except for the disclosures about purchases, sales, issuances, and settlements in the roll forward of activity in Level 3 fair value measurements. Those disclosures are effective for fiscal years beginning after December 15, 2010, and for interim periods within those fiscal years. Early adoption is permitted. Adoption of this ASU did not have a material impact on the Corporation's financial condition or results of operation.

Note 9 Restricted Investment in Bank Stock

Federal law requires the Bank, a member institution of the Federal Home Loan Bank system, to hold stock of its district Federal Home Loan Bank according to a predetermined formula. This restricted stock is carried at cost and as of March 31, 2010, consists of the common stock of FHLB of Pittsburgh. In December 2008, the FHLB of Pittsburgh notified member banks that it was suspending dividend payments and the repurchase of capital stock.

The Corporation evaluates impairment in FHLB stock when certain conditions warrant further consideration. In December 2008, the FHLB voluntarily suspended dividend payments on its stock as well as the repurchase of excess stock from members. The FHLB stated that this was due to a reduction in core earnings and concern over the FHLB's capital position. After evaluating such factors as the capital adequacy of the FHLB, its overall operating performance and the FHLB's liquidity and funding position, the Corporation concluded that the par value was ultimately recoverable and no impairment charge was recognized at March 31, 2010.

Management believes no impairment charge is necessary related to the FHLB stock as of March 31, 2010. Our evaluation of the factors described above in future periods could result in the recognition of impairment charges on FHLB stock.

Note 10 Fair Value Measurements and Fair Value of Financial Instruments

The Corporation adopted FASB ASC 820 "Fair Value Measurements" effective January 1, 2008 for financial assets and liabilities that are measured and reported at fair value. There was no impact from the adoption of FASB ASC-820 on

the amounts reported in the consolidated financial statements. The primary impact of FASB ASC-820 on the Corporation's financial statements was to expand required disclosures pertaining to the methods used to determine fair values.

FASB ASC-820 establishes a fair value hierarchy that prioritizes the inputs to valuation methods used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy under FASB ASC-820 are as follows:

Level 1: Unadjusted quoted prices in active markets that are accessible at the measurement date for identical,unrestricted assets or liabilities.

Level 2: Quoted prices in markets that are not active, or inputs that are observable either directly or indirectly, forsubstantially the full term of the asset or liability.

Level 3: Prices or valuation techniques that require inputs that are both significant to the fair value measurement andunobservable (ie., supported with little or no market activity).

Edgar Filing: COMMERCIAL NATIONAL FINANCIAL CORP /PA - Form 10-Q

For assets measured at fair value on a recurring basis, the fair value measurement by level within the fair value hierarchy used at March 31, 2010 are as follows (in thousands).

(Level 1)	(Level 2)	(Level 3)
Quoted Prices	Significant Other In Active Observable	Significant Unobservable Inputs
Markets For Identical Assets	Inputs	Inputs
Securities available for sale	-	
\$ 141,943	-	

For assets measured at fair value on a recurring basis, the fair value measurement by level within the fair value hierarchy used at December 31, 2009 are as follows (in thousands).

(Level 1)	(Level 2)	(Level 3)
Quoted Prices	Significant Other In Active Markets Unobservable	Significant Inputs
Observable For Identical Assets	Inputs	Inputs
Securities available for sale	\$ 138,918	-
-		

The following valuation techniques were used to measure fair value for available for sale securities as of March 31, 2010 and December 31, 2009

Securities Available for Sale: The Corporation utilizes a third party in determining the fair values for securities held as available for sale. For the Corporation's agency mortgage backed securities, the third party utilizes market data, pricing models that vary based on asset class and include available trade, bid and other market information. Methodology includes broker quotes, proprietary models, vast descriptive terms and conditions. The third party uses their own proprietary valuation Matrices in determining fair values for municipal bonds. These Matrices utilize comprehensive municipal bond interest rate tables daily to determine market price, movement and yield relationships.

We may be required to measure certain other financial assets at fair value on a nonrecurring basis. These adjustments to fair value usually result from the application of lower-of-cost-or-market accounting or write-downs of individual assets. The Level 3 disclosures shown below represent the carrying value of loans for which adjustments are primarily based on the appraised value of collateral or the present value of expected future cash flows, which often results in significant management assumptions and input with respect to the determination of fair value. There were no realized or unrealized gains or losses relating to Level 3 financial assets and liabilities measured on a nonrecurring basis for the quarter ended March 31, 2010 and December 31, 2009.

For assets measured at fair value on a nonrecurring basis, the fair value measurement by level within the fair value hierarchy used at March 31, 2010 are as follows (in thousands).

(Level 1)	(Level 2)	(Level 3)
Quoted Prices	Significant Other In Active Observable	Significant Unobservable
Markets	Observable	Unobservable

For Identical Assets	Inputs	Inputs
Impaired Loans	-	\$ 852

Impaired loans at March 31, 2010, which are measured using the fair value of the collateral less estimated costs to sell for collateral-dependent loans, had a carrying amount of \$969,000 with a valuation allowance of \$117,000.

For assets measured at fair value on a nonrecurring basis, the fair value measurement by level within the fair value hierarchy used at December 31, 2009 are as follows (in thousands).

(Level 1) Quoted Prices Unobservable For Identical Assets	(Level 2) Significant Other In Active Markets Inputs	(Level 3) Observable Inputs	Significant
Impaired Loans	-	-	\$ 866

Impaired loans at December 31, 2009, which are measured using the fair value of the collateral less estimated costs to sell for collateral dependent loans, had a carrying amount of \$985,000 with a valuation allowance of \$119,000.

ASC 825-10-65, Transition Related to FSP FAS 107-1 and APB 28-1, "Interim Disclosures about Fair Value of Financial Instruments," require disclosure of the fair value of financial assets and financial liabilities, including those financial assets and financial liabilities that are not measured and reported at fair value on a recurring basis or non-recurring basis. The methodologies for estimating the fair value of financial assets and financial liabilities that are measured at fair value on a recurring or non-recurring basis are as discussed above. The methodologies for other financial assets and financial liabilities are discussed below.

The carrying amounts and fair values of the Corporation's financial instruments as of March 31, 2010 and December 31, 2009 are presented in the following table:

	March 31, 2010		December 31, 2009	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
	(In Thousands)			
Financial assets:				
Cash and equivalents	\$ 5,583	\$ 5,583	\$ 6,741	\$ 6,741
Securities available for sale	141,943	141,943	138,918	138,918
Restricted investments in bank stock	4,567	4,567	4,567	4,567
Net loans receivable	198,372	198,288	203,370	203,553
Accrued interest receivable	1,398	1,398	1,456	1,456
Financial liabilities:				
Deposits	\$ 277,457	\$ 271,805	\$ 269,730	\$ 264,300
Short-term borrowings	37,575	37,575	48,850	48,850
Long-term borrowings	10,000	10,178	10,000	10,139
Accrued interest payable	417	417	451	451
Off-balance sheet financial instruments	-	-	-	-

Cash and Short-Term Investments

The carrying amounts for cash and short-term investments approximate the estimated fair values of such assets.

Securities

The Corporation utilizes a third party in determining the fair values for securities held as available for sale. For the Corporation's agency mortgage backed securities, the third party utilizes market data, pricing models that vary based on asset class and include available trade, bid and other market information. Methodology includes broker quotes, proprietary modes, vast descriptive terms and conditions. The third party uses their own proprietary valuation Matrices in determining fair values for municipal bonds. These Matrices utilize comprehensive municipal bond interest rate tables daily to determine market price, movement and yield relationships.

Restricted Investments in Bank Stock

The carrying amounts of restricted investments in bank stock approximate the estimated fair value of such assets.

Loans Receivable

Fair values of variable rate loans subject to frequent repricing and which entail no significant credit risk are based on the carrying values. The estimated fair values of other loans are estimated by discounting the future cash flows using interest rates currently offered for loans with similar terms to borrowers of similar credit quality.

Deposits

For deposits which are payable on demand at the reporting date, representing all deposits other than time deposits, management estimated that the carrying value of such deposits is a reasonable estimate of fair value. Fair values of time deposits are estimated by discounting the future cash flows using interest rates currently being offered and a schedule of aggregate expected maturities.

Short-Term Borrowings

The carrying amounts for short-term borrowings approximate the estimated fair value of such liabilities.

Long-Term Borrowings

Fair values of long-term borrowings are estimated by discounting the future cash flows using interest rates currently available for borrowings with similar terms and maturity.

Off-Balance Sheet Instruments

The fair value of commitments to extend credit and for outstanding letters of credit is estimated using the fees currently charged to enter into similar agreements, taking into account market interest rates, the remaining terms and present credit worthiness of the counterparties.

Note 11 Subsequent Events

Commercial National Corporation has evaluated subsequent events through the date these consolidated financial statements were filed with the Securities and Exchange Commission. We have incorporated into these consolidated financial statements the effect of all material known events determined by ASC Topic 855, "Subsequent Events," to be recognizable events.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

SAFE HARBOR STATEMENT

Forward-looking statements (statements which are not historical facts) in this Quarterly Report on Form 10-Q are made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. For this purpose, any statements contained herein that are not statements of historical fact may be deemed to be forward-looking statements. Without limiting the generality of the foregoing, words such as "may," "will," "to," "expect," "believe," "anticipate," "intend," "could," "would," "estimate," or "continue" or the negative or other variations thereof or comparable terminology are intended to identify forward-looking statements. These statements are based on information currently available to the Corporation, and the Corporation assumes no obligation to update these statements as circumstances change. Investors

are cautioned that all forward-looking statements involve risk and uncertainties, including changes in general economic and financial market conditions, unforeseen credit problems, and the Corporation's ability to execute its business plans. The actual results of future events could differ materially from those stated in any forward-looking statements herein.

CRITICAL ACCOUNTING ESTIMATES

Disclosure of the Corporation's significant accounting policies is included in Note 1 to the Corporation's Consolidated Financial Statements contained in the Corporation's Annual Report on Form 10-K for the year ended December 31, 2009 (the 2009 Annual Report). Some of these policies are particularly sensitive, requiring that significant judgments, estimates and assumptions be made by management. Additional information is contained in the Management's Discussion and Analysis section of the 2009 Annual Report for the most sensitive of these issues, including the provision and allowance for loan losses.

Significant estimates are made by management in determining the allowance for loan losses. Management considers a variety of factors in establishing these estimates, including current economic conditions, diversification of the loan portfolio, delinquency statistics, results of internal loan reviews, financial and managerial strengths of borrowers, adequacy of collateral (if collateral dependent) and other relevant factors. Estimates related to the value of collateral also have a significant impact on whether or not the Corporation continues to accrue income on delinquent loans and on the amounts at which foreclosed real estate is recorded in the Consolidated Statements of Financial Condition. Management discussed the development and selection of critical accounting estimates and related Management and Discussion and Analysis disclosure with the Corporation's Audit Committee. There were no material changes made to the critical accounting estimates during the periods presented within.

OVERVIEW

The Corporation had net income of \$1.4 million or \$0.47 per share, for the first quarter ended March 31, 2010 compared to \$1.3 million or \$0.44 per share for the quarter ended March 31, 2009. The Corporation's return on average assets for the first quarter of 2010 and 2009 was 1.45% and 1.37%, respectively. Return on average equity for the same two periods was 12.31% and 12.76%, respectively.

The Corporation's largest segment of operating results is dependent upon net interest income. Net interest income is interest earned on interest-earning assets less interest paid on interest-bearing deposits. For the first quarter ended March 31, 2010 and 2009, net interest income was \$3.9 million and \$3.8 million, respectively.

The Corporation began purchasing municipal bonds in the middle of 2009, these purchases of tax-free municipals has significantly lowered the corporations effective tax rate in 2010. In 2009 the effective tax was rate 29.9% for the first three months, compared with 21.9% for the first three months of 2010.

FINANCIAL CONDITION

The Corporation's total assets decreased by \$2.8 million, or 0.75% from December 31, 2009 to March 31, 2010. Investments Available for Sale increased by \$3.0 million. The increase in investments was mainly due to the purchase of \$11.7 million in tax-free municipal bonds, principal pay-downs on mortgage backed securities of \$7.4 million, \$1.7 million in calls on municipal bonds and \$417,000 increase in the fair value of the securities. Net loans outstanding decreased by \$5.0 million. The decrease in loans was a result of declines in the following categories; \$500,000 in commercial loans, \$1.0 million in commercial mortgages, \$1.1 million in installment loans and \$2.1 million in mortgages. The Corporation attributes the loan declines to consumer and commercial customers being cautious during the first quarter of 2010.

The Corporation's total deposits increased \$7.7 million from December 31, 2009 to March 31, 2010. Non-interest bearing deposits decreased by \$511,000 and interest-bearing deposits increased by \$8.2 million. The increase in interest-bearing deposits was mainly due to a \$6.4 million increase in money market accounts, a \$2.1 million increase in savings accounts and a \$1.1 million increase in NOW accounts. These increases were offset by a \$1.3 million decline in certificate of deposits and a \$228,000 decrease in individual retirement accounts. The Corporation attributes the increase in deposit accounts due to customers maintaining higher average balances in their money market, NOW and savings accounts.

Shareholders' equity was \$44.5 million on March 31, 2010 compared to \$43.5 million on December 31, 2009. Total shareholders equity increased due to the \$1.4 million in net income and a \$275,000 increase in other comprehensive income due to increases in fair value of securities available for sale. These increases were offset by \$629,000 in dividends paid to shareholders. Book value per common share increased from \$15.20 at December 31, 2009 to \$15.55 at March 31, 2010.

RESULTS OF OPERATIONS

First Three Months of 2010 as compared to the First Three Months of 2009

Net income for the first three months of 2010 was \$1.4 million compared to \$1.3 million for the same period of 2009, representing a 6.38% increase. The increase in net income in 2010 is mainly due to lower interest expense on liabilities in 2010 compared with 2009, as noted below.

Interest income for the three months ended March 31, 2010 was \$4.7 million, compared with \$5.0 million for the three months ending March 31, 2009. Loan income decreased in 2010 due to average loan balances decreasing 4.77% in 2010 compared with 2009 and slightly lower yields. The yield on the loan portfolio for the first three months of 2010 decreased four (4) basis points to 5.76% from 5.80% in 2009. The security portfolio of the Corporation is significantly different in composition for the first three months of 2010 compared with 2009. The Corporation's average balance for tax-free municipal bonds was \$42.2 million in 2010 compared with \$1.0 million in 2009. These bonds provided a significant benefit of decreasing the corporation's overall tax rate in 2010. Security income for the three months ended March 31, 2010 was \$1.8 million, a decrease of 8.52% or \$165,000 in comparison to security income in 2009. The average securities balances increased 5.45% in 2010 compared to 2009. The yield on total average earning assets for the first three months of 2010 decreased thirty-four (34) basis points to 5.55% compared to 2009.

Total interest expense of \$750,000 for the first three months of 2010 decreased by \$462,000 or 38.11% from the first three months of 2009. In the first quarter of 2010, the average interest-bearing liabilities balances decreased 3.29% and the cost of these liabilities decreased to 1.18% in 2010 from 1.85% in 2009. The cost of interest-bearing liabilities declined in 2010 due to lower market rates for certificates of deposit. In addition the Corporation's FHLB borrowing costs declined due the maturity of an advance that was replaced at a significantly lower short-term rate.

As a result of the foregoing, net interest income for the first three months of 2010 was \$3.9 million compared to \$3.8 million for the first three months of 2009.

The Corporation did not record a provision for loan losses for the three months ended March 31, 2010, or March 31, 2009. The Corporation's high credit quality and the decrease in loan balances led to the determination that no provision was necessary for the first three months of 2010.

Non-interest income for the first three months of 2010 was \$713,000, a decrease from \$759,000 for first three months of 2009. Asset management and trust income declined by \$35,000 mainly due to the following; the fees on sweep accounts decreased by \$22,000 due to the current low yield environment on these products, estate settlement fees declined by \$21,000 in 2010 compared to 2009 and mutual fund commissions declined by \$9,000 in 2010 compared to 2009. These decreases were offset by an increase in managed asset revenue of \$17,000. Service charges on deposit accounts decreased by \$12,000 and other service charges increased by \$5,000.

Non-interest expense for the first three months of 2010 was \$2.9 million compared with \$2.8 million in 2009. Personnel costs increased \$85,000 due to higher wages in 2010, net occupancy increased \$19,000, furniture and equipment expense increased \$19,000. The increases in occupancy and furniture and equipment can be attributed to the opening of one additional branch in the fall of 2009. PA shares tax decreased slightly by \$4,000 and legal and audit increased slightly by \$1,000. The FDIC insurance expense increased by \$71,000 due to an increase in FDIC assessment fees in the second quarter of 2009. Other expenses decreased by \$27,000.

Federal income tax for the first three months of 2010 was \$378,000 compared to \$541,000 for the same period in 2009. The effective tax rates for the first three months of 2010 and 2009 were 21.87% and 29.89%, respectively. The reduction in the effective tax rate for the first quarter of 2010 is the result of a higher percentage of municipal bonds in the investment portfolio.

LIQUIDITY

Liquidity measurements evaluate the Corporation's ability to meet the cash flow requirements of its depositors and borrowers. The most desirable source of liquidity is deposit growth. Additional liquidity is provided by the maturity of investments in loans and securities and the principal and interest received from those earning assets. Another source of liquidity is represented by the Corporation's ability to sell both loans and securities. The Bank is a member of the Federal Home Loan Bank (FHLB) system. The FHLB provides an additional source for liquidity for long- and short-term funding. Additional sources of funding from financial institutions have been established for short-term funding needs.

The statement of cash flows for the first three months of 2010, indicates cash was provided by the decrease in loan balances, the maturities and calls of securities and the increase in deposits. These sources of cash were used to purchase securities and pay down short-term borrowings.

As of March 31, 2010, the Corporation had available funding of approximately \$75 million at the FHLB, with an additional \$20 million of short-term funding available through other lines of credit. The Corporation's maximum borrowing capacity with the Federal Home Loan Bank (FHLB) as of March 31, 2010 was \$120 million, with \$45 million borrowed resulting in the \$75 million as available.

OFF BALANCE SHEET ARRANGEMENTS

The Corporation's financial statements do not reflect off balance sheet arrangements that consist of commitments to purchase securities or commitments to extend credit. Commitments to extend credit are agreements to lend to a customer as long as there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Since many of the commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. The Corporation evaluates each customer's credit worthiness on a case-by-case basis. The amount of collateral, if any, which the Corporation obtains from the customer upon extension of credit, is based on management's credit evaluation of the customer or other obligor. The types of collateral obtained by the Corporation may include accounts receivable, inventory, property, plant and equipment and income-producing commercial properties.

Standby letters of credit, financial standby letters of credit and commercial letters of credit written are conditional commitments issued by the Corporation to guarantee the performance of a customer to a third party. Those guarantees are primarily issued to support public and private borrowing arrangements. The credit risk involved in issuing letters of credit is essentially the same as that involved in extending loan facilities to customers.

The following table identifies the Corporation's commitments to extend credit and obligations under letters of credit as of March 31, 2010 (dollars in thousands):

	TOTAL AMOUNT COMMITTED
Financial instruments whose contractual amounts represent credit risk:	
Commitments to extend credit	\$32,956
Standby letters of credit	425
Financial standby letters of credit	2,152

CREDIT QUALITY RISK

The following table presents a comparison of loan quality as of March 31, 2010 with that as of December 31, 2009. Cash payments received on non-accrual loans are recognized as interest income as long as the remaining balance of the loan is deemed to be fully collectible. When doubt exists as to the collectibility of a loan in non-accrual status, any payments received are applied to principal to the extent the doubt is eliminated. Once a loan is placed on non-accrual status, any unpaid interest is charged against income.

	At or For the Three months ended March 31, 2010	At or For the Year ended December 31, 2009		
	(dollars in thousands)			
Non-performing loans:				
Loans on non-accrual basis	\$250	\$261		
Past due loans > 90 days	-	-		
Renegotiated loans	969	979		
Total non-performing loans	1,219	1,240		
Foreclosed real estate	638	639		
Total non-performing assets	\$1,857	\$1,879		
Loans outstanding at end of period	\$200,095	\$205,092		
Average loans outstanding (year-to-date)	\$202,823	\$207,972		
Non-performing loans as a percent of total loans	0.61	%	0.60	%

Provision for loan losses	\$0		\$0	
Net charge-offs	\$(1)	\$99	
Net charge-offs as a percent of average loans	0.00	%	0.05	%
Provision for loan losses as a percent of net charge-offs	0.00	%	0.00	%
Allowance for loan losses	\$1,723		\$1,722	
Allowance for loan losses as a percent of average loans outstanding	0.86	%	0.83	%

As of March 31, 2010, \$84,000 of non-accrual loans were paying principal or principal and interest with payments recognized on a cash basis. The renegotiated loan total comprises two loan relationships, one involved in the retail segment and one in public protection. At present, the Corporation has no knowledge of other outstanding loans that present a serious doubt in regard to the borrower's ability to comply with current loan repayment terms.

In 2010, the gross amount of interest that would have been recorded on non-accrual loans would have been \$3,000. The actual interest reflected in income on these loans was \$1,000.

CAPITAL RESOURCES

The Federal Reserve Board's risk-based capital guidelines are designed principally as a measure of credit risk. These guidelines require that: (1) at least 50% of a banking organization's total capital be common and certain other "core" equity capital ("Tier I Capital"); (2) assets and off-balance sheet items be weighted according to risk; and (3) the total capital to risk-weighted assets ratio be at least 8.00%; and (4) a minimum 4.00% leverage ratio of Tier I capital to average total assets be maintained for financial institutions that meet certain specified criteria, including asset quality, high liquidity, low interest-rate exposure and the highest regulatory rating. As of March 31, 2010, Commercial Bank & Trust of PA, under these guidelines, had Tier I and total equity capital to risk weighted assets ratios of 18.55% and 19.37% respectively. The leverage ratio was 10.74%.

The table below presents the Bank's capital position at March 31, 2010
(Dollar amounts in thousands)

	Amount	Percent of Adjusted Assets	
Tier I Capital	\$39,295	18.55	%
Tier I Capital Requirement	8,472	4.00	
Total Equity Capital	\$41,018	19.37	%
Total Equity Capital Requirement	16,944	8.00	
Leverage Capital	\$39,295	10.74	%
Leverage Requirement	14,633	4.00	

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The Corporation's primary market risk is interest rate risk. Interest rate risk arises due to timing differences between interest sensitive assets and liabilities. Interest rate management seeks to maintain a balance between consistent income growth and the risk that is created by variations in the ability to reprice deposit and investment categories. The effort to determine the effect of potential interest rate changes normally involves measuring the "gap" between assets (loans and securities) subject to rate fluctuation and liabilities (interest bearing deposits and long-term borrowings) subject to rate fluctuation as related to earning assets over different time periods and calculating the ratio of interest sensitive assets to interest sensitive liabilities.

Repricing periods for the loans, securities, interest bearing deposits and long-term borrowings are based on contractual maturities, where applicable, as well as the Corporation's historical experience regarding the impact of interest rate fluctuations on the prepayment and withdrawal patterns of certain assets and liabilities. Regular savings, NOW and other similar interest bearing demand deposit accounts are subject to immediate withdrawal without penalty. However, based upon historical performance, management considers a certain portion of the accounts to be stable core deposits and therefore are projected to reprice over a variety of time periods.

The Corporation utilizes a computer simulation analysis that projects the impact of changing interest rates on earnings. Simulation modeling projects a baseline net interest income (assuming no changes in interest rate levels) and estimates changes to that baseline resulting from changes in interest rate levels. The Corporation utilizes the results of this model in evaluating its interest rate risk. This model incorporates a number of additional factors. These factors

include: (1) the expected exercise of call features on various assets and liabilities; (2) the expected rates at which various rate sensitive assets and liabilities will reprice; (3) the expected relative movements in different interest rate indexes that are used as the basis for pricing or repricing various assets and liabilities; (4) expected changes in administered rates on interest-bearing transaction, savings, money market and time deposit accounts and the expected impact of competition on the pricing or repricing of such accounts; and (5) other factors. Inclusion of these factors in the model is intended to estimate the Corporation's changes in net interest income resulting from an immediate and sustained parallel shift in interest rates of up 100, 200 and 300 basis points or 100, 200 and 300 basis points down. While the Corporation believes this model provides a useful projection of its interest rate risk, the model includes a number of assumptions and predictions that are subject to continual refinement. These assumptions and predictions include inputs to compute baseline net interest income, growth rates and a variety of other factors that are difficult to accurately predict.

The March 31, 2010 computer simulations analysis projects the following changes in net interest income based on an immediate and sustained parallel shift in interest rates for a twelve month period compared to baseline, with baseline representing no change in interest rates. The model projects net interest income will decrease 2.0% if rates rise 100 bps, will decrease 5.3% if rates rise 200 bps and projects a 9.1% decrease of net interest income if rates rise 300 bps. If rates decrease 100 bps, the model projects a 0.3% decrease in net interest income, a 1.6% decrease if rates decrease 200 bps and if rates decrease 300 bps, the model projects net interest income will decrease 3.1%.

Management regularly monitors the interest sensitivity position and considers this position in its decisions with regard to the Corporation's interest rates and maturities for interest-earning assets and interest-bearing liabilities.

ITEM 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

The Corporation maintains a system of disclosure controls and procedures that is designed to ensure that information required to be disclosed by the Corporation in this Form 10-Q, and in other reports required to be filed under the Securities Exchange Act of 1934 (Exchange Act), is recorded, processed, summarized and reported within the time periods specified in the rules and forms for such filings. Management of the Corporation, under the direction of the Corporation's Chief Executive Officer and Chief Financial Officer, reviewed and performed an evaluation of the effectiveness of the Corporation's disclosure controls and procedures (as defined in Rules 13a-15a(e) and 15d-15(e) under the Exchange Act) as of March 31, 2010. Based on that review and evaluation, the Chief Executive Officer and Chief Financial Officer, along with other key management of the Corporation, have determined that the disclosure controls and procedures were and are effective as designed to ensure that material information relating to the Corporation and its consolidated subsidiaries required to be disclosed by the Corporation by the Exchange Act, was recorded, processed, summarized and reported within the applicable time periods.

Changes in Internal Controls

There have been no significant changes in Commercial National Financial Corporation's internal control over financial reporting during the quarter ended March 31, 2010, that has materially affected, or is reasonably likely to materially affect Commercial National Financial Corporation's internal control over financial reporting.

ITEM 4T. CONTROLS AND PROCEDURES

See Item 4. above.

PART II - OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

Other than proceedings which occur in the normal course of business, there are no legal proceedings to which either the Corporation or any of its subsidiaries is a party, which, in management's opinion, will have any material effect on the financial position of the Corporation and its subsidiaries.

ITEM 1A. RISK FACTORS

A smaller reporting company is not required to provide information required of this item.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

2 (a) None

2 (b) None

2 (c) In 2000, the Board of Directors authorized the repurchase of up to 360,000 shares of the Corporation's common stock from time to time when warranted by market conditions. There have been 245,174 shares purchased under this authorization through March 31, 2010. There were no shares purchased during the first quarter 2010, see table below.

ISSUER PURCHASES OF EQUITY SECURITIES				
Period	(a) Total Number of Shares Purchased	(b) Average Price Paid per Share	(c) Total Number of Shares Purchased as Part of Publicly Announced Plans	(d) Maximum Number of Shares that May Yet Be Purchased Under the Plans
January 1- January 31	0	0	0	114,826
February 1 - February 28	0	0	0	114,826
March 1- March 31	0	0	0	114,826
