**TASEKO UPDATES STATUS OF  
THE GIBRALTAR MILL EXPANSION AND SX/EW RESTART**

**August 14, 2006, Vancouver, BC** - Taseko Mines Limited (TSX: TKO; AMEX: TGB) announces a status update on the Mill Expansion Project and restart of the Solvent Extraction/Electrowinning (SX/EW) Plant at its Gibraltar Mine, located near the City of Williams Lake in south-central British Columbia.

The **Mill Expansion Project** is proceeding on schedule and on budget. This Project will result in a 30% increase in annual metal production capacity and a 10% reduction in Gibraltar's site unit operating costs by the end of 2007. These improvements will be achieved by increasing mill throughput to 46,000 tons per day with a new semi-autogenous grinding (SAG) mill, and by increasing metal recovery with new state of the art flotation equipment.

The international engineering firm HATCH Ltd has been retained to perform overall engineering, procurement, construction and management services for the project and Farnell-Thompson has been retained to direct source the components of the SAG Mill.

Major SAG Mill components are ordered and scheduled to arrive at site by mid 2007. The new large tank flotation cells are on order from Outokumpu, with delivery to site in late 2006.

The project construction team is on the mine site and work has commenced. Major excavation for the SAG mill facility will begin August 16<sup>th</sup> and the foundations will be completed prior to the end of 2006. Winter construction will focus on the flotation installation inside the existing mill building. The expansion project will not cause any significant interruption to mill operations during the construction phase.

The new flotation cells will be commissioned in August 2007 and the new SAG mill in December 2007.

**The SX/EW Plant**, which has been idled since 1997, is undergoing a re-start program. The project is on schedule and on budget. Refurbishment of the plant mechanical and electrical systems and an upgrade of the plant control system are underway. As the restart work has progressed, many components have been found to be in better condition than anticipated and the availability and pricing of operating supplies is as good, or better, than anticipated.

The SX/EW plant has the capacity to add 7 million pounds to Gibraltar's annual copper production. Cathode copper production from the plant will commence in late 2006.

The TSX Exchange and the American Stock Exchange have neither approved nor disapproved of the contents of this press release.

This news release contains forward-looking statements that are based on current expectations and which involve risks and uncertainties, including those referred to in Taseko's Annual Information Form ("AIF") filed with Canadian securities regulatory authorities, or Taseko's annual Form on 20F ("20F") filed with United States securities regulatory authorities, that could cause actual events or results to differ materially from estimated or anticipated events or results reflected in the forward-looking statements. Such forward-looking statements include statements regarding financial results and expectations for 2006 and include, among other things, statements regarding targets, estimates and/or assumptions in respect of copper production and/or copper prices, cash operating costs, expenditures on property, plant and equipment, increases and decreases in production, reserves and/or resources and anticipated grades and recovery rates and are or may be based on assumptions and/or estimates related to future economic, market and other conditions. Factors that could cause actual results, developments or events to differ materially from those anticipated include, among others, the factors described or referred to elsewhere herein and/or in the AIF and 20F, and include unanticipated and/or unusual events. Many of such factors are beyond Taseko's ability to control or predict. Actual results may differ materially from those anticipated. Readers are cautioned not to put undue reliance on forward-looking statements due to the inherent uncertainty therein. Taseko disclaims any intent or obligation to update publicly any forward-looking statements, whether as a result of new information, future events or results or otherwise.
