## KOHL'S CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

## 1. Basis of Presentation

The accompanying financial statements have been prepared in accordance with accounting principles generally accepted in the United States for interim financial information. Accordingly, they do not include all of the information and footnotes required by generally accepted accounting principles for fiscal year end financial statements. In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included. For further information, refer to the financial statements and related footnotes included in our Annual Report on Form 10-K for the fiscal year ended February 2, 2013 (Commission File No. 1-11084) as filed with the Securities and Exchange Commission on March 22, 2013.
Due to the seasonality of our business, results for any quarter are not necessarily indicative of the results that may be achieved for a full fiscal year. In addition, quarterly results of operations may be impacted by the timing and amount of sales and costs associated with the opening of new stores.
We operate as a single business unit.
To conform to the current year presentations, we have corrected the presentation of $\$ 27$ million of deferred revenues that were previously recorded as a reduction to merchandise inventory as of July 28, 2012.
2. Debt

Long-term debt consists of the following non-callable and unsecured senior debt:

During the quarter, we amended the $\$ 1$ billion revolving line of credit that we finalized in June 2011. The amendment extended the remaining term from June 2016 to June 2018 and changed the debt ratio covenant.

## 3. Fair Value Measurements

ASC No. 820, "Fair Value Measurements and Disclosures," requires fair value measurements be classified and disclosed in one of the following pricing categories:

Level 1: $\quad$ Financial instruments with unadjusted, quoted prices listed on active market exchanges.
Level 2: Financial instruments lacking unadjusted, quoted prices from active market exchanges, including over-the-counter traded financial instruments. The prices for the financial instruments are determined using prices for recently traded financial instruments with similar underlying terms as well as directly
or indirectly observable inputs, such as interest rates and yield curves that are observable at commonly quoted intervals.

Financial instruments that are not actively traded on a market exchange. This category includes situations where there is little, if any, market activity for the financial instrument. The prices are determined using significant unobservable inputs or valuation techniques.

## KOHL'S CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS-(Continued)

The following table summarizes our financial instruments:

|  | Pricing Category | August 3, 2013 |  | February 2, 2013 |  | July 28, 2012 |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | $\begin{aligned} & \text { Cost } \\ & \text { (In Mi } \end{aligned}$ | Fair Value <br> s) | Cost | Fair Value | Cost | Fair Value |
| Cash and cash equivalents | Level 1 | \$592 | \$592 | \$537 | \$537 | \$600 | \$600 |
| Long-term investments | Level 3 | 83 | 58 | 84 | 53 | 142 | 102 |
| Debt | Level 1 | 2,492 | 2,663 | 2,492 | 2,702 | 2,141 | 2,511 |

Our long-term investments consist primarily of investments in auction rate securities ("ARS"). The fair value for our ARS were based on third-party pricing models which utilized a discounted cash flow model for each of the securities as there was no recent activity in the secondary markets in these types of securities. This model used a combination of observable inputs which were developed using publicly available market data obtained from independent sources and unobservable inputs that reflect our own estimates of the assumptions that market participants would use in pricing the investments. Observable inputs include interest rate currently being paid, maturity and credit ratings.

Unobservable inputs include expected redemption date and discount rate. We assumed a seven-year redemption period in valuing our ARS. We intend to hold our ARS until maturity or until we can liquidate them at par value. Based on our other sources of income, we do not believe we will be required to sell them before recovery of par value. In some cases, holding the security until recovery may mean until maturity, which ranges from 2037 to 2039. The discount rate was calculated using the closest match available for other insured asset backed securities. Discount rates ranged from $6.57 \%$ to $9.47 \%$. The weighted-average discount rate was $7.64 \%$. A market failure scenario was employed as recent successful auctions of these securities were very limited. Assuming a longer redemption period and a higher discount rate would result in a lower fair market value. Similarly, assuming a shorter redemption period and a lower discount rate would result in a higher fair market value.

The following table presents a rollforward of our long-term investments:

|  | Six Months Ended <br>  <br> August 3, July 28, |  |
| :--- | :--- | :--- |
|  | 2013 | 2012 |
|  | (In Millions) |  |

| Stock options granted | 489 | 1,135 |
| Restricted shares, excluding shares earned in lieu of cash dividends, granted | 859 | 799 |
| Total stock-based compensation grants | 1,348 | 1,934 |
| Weighted average fair value at grant date: | $\$ 10.37$ | $\$ 11.64$ |
| Stock options | $\$ 47.91$ | $\$ 48.36$ |

## 5. Contingencies

We are subject to certain legal proceedings and claims arising out of the conduct of our business. In the opinion of management, the outcome of these proceedings and litigation will not have a material adverse impact on our consolidated financial statements.
6. Net Income Per Share

The following table summarizes our basic and diluted net income per share calculations:

## Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations
For purposes of the following discussion, all references to "the quarter" and "the second quarter" are for the 13-week fiscal periods ended August 3, 2013 and July 28, 2012 and all references to "year to date" are for the 26 -week fiscal periods ended August 3, 2013 and July 28, 2012.
The following discussion should be read in conjunction with our Consolidated Financial Statements and the related notes included elsewhere in this report, as well as the financial and other information included in our 2012 Annual Report on Form 10-K (our "2012 Form 10-K"). The following discussion may contain forward-looking statements that reflect our plans, estimates and beliefs. Our actual results could materially differ from those discussed in these forward-looking statements. Factors that could cause or contribute to those differences include, but are not limited to, those discussed elsewhere in this report and in our 2012 Form 10-K (particularly in "Risk Factors").

## Executive Summary

As of August 3, 2013, we operated 1,155 family-oriented department stores and a website (www.Kohls.com) that sell moderately priced apparel, footwear and accessories for women, men and children; soft home products such as sheets and pillows; and housewares. Our product offerings include quality private and exclusive brands which are found "Only at Kohl's" as well as national brands which appeal to classic, modern classic and contemporary customers. Our stores generally carry a consistent merchandise assortment with some differences attributable to regional preferences. Our website includes merchandise which is available in our stores, as well as merchandise which is available only on-line.
The following table summarizes our results for the quarter and year to date:

Net sales
Net sales increase
Comparable store sales increase (decrease)
Gross margin as a percent of net sales
Selling, general and administrative expenses
Net income
Net earnings per diluted share
Shares repurchased (In Millions)
Treasury stock purchases
$\left.\begin{array}{lll}\text { Quarter } & \begin{array}{l}\text { Year to } \\ \text { Date }\end{array} \\ \text { (Dollars in } & \text { Millions) }\end{array}\right)$

Our main business objective is to profitably increase sales. In order to increase sales, we believe that we need to continue to improve the quality of our merchandise and to offer items at great value. We are pleased with the progress we have made in these areas, but believe that we need to continue to progress in order to increase transactions per store, which is our primary sales driver.

After a successful pilot in Texas during the second quarter, we expect to expand our loyalty program to California in the third quarter. The loyalty program allows enrolled customers to earn various rewards or discounts based upon the volume of their purchases. We continue to review the results of these pilots and modify earning thresholds, redemption time frames, in-store communication and other elements of the program. We believe that over the long-term the loyalty program could be a powerful tool to increase customer traffic and sales.

Our marketing remains focused on the great values that Kohl's offers, but also has an increased emphasis on the various brands that we offer. This includes both our "Only-at-Kohl's" brands and our national brands. This marketing message had a positive impact on our national brands - especially our largest brands - in the quarter.

We remain committed to meeting the changing shopping needs of our customer, to strengthening our omni-channel experience and to investing in our future in a strategic and profitable manner. During the quarter, we successfully replaced our E-Commerce platform. The replatform occurred in stages throughout the quarter. We also invested in several IT projects which will provide the infrastructure and other tools necessary to support our omni-channel strategy.

## Table of Contents

Results of Operations
Net sales.
Net sales increased $\$ 84$ million, or $2.0 \%$, to $\$ 4.3$ billion in the second quarter of 2013. Year to date, net sales increased $\$ 41$ million, or $0.5 \%$, to $\$ 8.5$ billion. On a comparable store basis, sales increased $0.9 \%$ for the quarter and decreased $0.5 \%$ year to date. We define comparable store sales as sales from stores (including relocated and remodeled stores) open throughout the full current and prior fiscal periods and from E-Commerce.
The following table summarizes the changes in sales:

|  | Quarter |  |  | Year to Date |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | \% |  |  | \$ \% |  |  |  |
|  | (Dollars in Millions) |  |  |  |  |  |  |
| Comparable store sales: |  |  |  |  |  |  |  |
| Stores | \$(28 | ) (0.7 | )\% | \$(188 | ) | (2.4 | )\% |
| E-Commerce | 66 | 27.9 |  | 144 |  | 29.6 |  |
| Total | 38 | 0.9 |  | (44 | ) | (0.5 | ) |
| New stores and other revenues | 46 | - |  | 85 |  | - |  |
| Increase in net sales | \$84 | 2.0 | \% | \$41 |  | 0.5 | \% |

Drivers of the changes in comparable store sales were as follows:

|  | $\begin{array}{l}\text { Quarter }\end{array}$ |  |  |  | $\begin{array}{l}\text { Year to } \\ \text { Date }\end{array}$ |
| :--- | :--- | :--- | :--- | :---: | :---: |
| Selling price per unit | $(3.6$ | $) \%$ | $(2.4$ |  |  |$) \%$

The decrease in selling price per unit was due to lower prices and higher penetration of clearance merchandise, partially offset by higher selling prices on regular-priced merchandise. Units per transaction increased as customers purchased more items in response to the lower prices. Increases in the number of E-Commerce transactions were more than offset by decreases in our stores. Year-to-date transactions were also negatively impacted by an unseasonably cold spring which reduced customer visits early in the year.

All of our warmer weather regions - the West, South Central and Southeast - reported higher comparable store sales for the quarter. Year to date, the West region reported the highest increase in comparable store sales. The Midwest and Northeast reported lower comparable store sales for the quarter. The Mid-Atlantic region was the poorest performing region in both the quarter and year to date.

E-Commerce revenues totaled $\$ 303$ million for the quarter and $\$ 632$ million year to date. E-Commerce sales increased in both periods primarily due to more transactions which were the result of investments in this business, including digital marketing to drive traffic to the site, and increases in the number of merchandise offerings which are available only on-line.
For the quarter, Children's was the strongest line of business. Footwear and Men's also outperformed the Company. The Home business reported higher comparable store sales, but was slightly below the Company average. Notable Home categories included luggage, bedding and electrics. In Women's, active/fitness and national branded bottoms reported the highest sales increases. In Accessories, bath and beauty was the strongest category.
Year to date, Children's reported the highest sales increases. Footwear and Home outperformed the Company average. Sales in the Men's, Women's and Accessories businesses all decreased slightly. Notable sales increases were reported in Men's basics, Women's active/fitness, bath and beauty Accessories and athletic Footwear. In the Home business, electrics and luggage reported the highest sales increases.

## Table of Contents

Gross margin.
Gross margin includes the total cost of products sold, including product development costs, net of vendor payments other than reimbursement of specific, incremental and identifiable costs; inventory shrink; markdowns; freight expenses associated with moving merchandise from our vendors to our distribution centers; shipping and handling expenses of E-Commerce sales; and terms cash discount. Our gross margin may not be comparable with that of other retailers because we include distribution center costs in selling, general and administrative expenses while other retailers may include these expenses in cost of merchandise sold.

The following table summarizes gross margin as a percent of sales:

|  | Quarter |  |  |  |  | Year to Date |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | 2013 |  | 2012 |  | Increase (Decrease) | 2013 |  | 2012 |  | Increase (Decrease) |
| Merchandise margin | 39.7 | \% | 39.6 | \% | 6 bp | 38.3 | \% | 38.1 | \% | 34 bp |
| Shipping impact | (0.6 | ) | (0.6 |  | (4 | (0.6 |  |  | ) | (7 |
| Gross margin | 39.1 | \% | 39.0 | \% | 2 bp | 37.7 | \% | 37.5 |  | 27 bp |

The increases in merchandise margin reflect lower markdowns and reduced inventory shortage. The decrease in gross margin attributable to shipping is due to growth in our E-Commerce business, partially offset by lower shipping losses.
E-Commerce decreased our gross margin rate by approximately 80 basis points for both the quarter and year to date. Our E-Commerce business currently has a lower gross margin than our stores due to the mix of products sold on-line and free or related shipping promotions. As our E-Commerce business has grown, it has had a more significant impact on our overall gross margin results.
Selling, general and administrative expenses.

Selling, general and administrative expenses ("SG\&A") include compensation and benefit costs (including stores, headquarters, buying and merchandising and distribution centers); occupancy and operating costs of our retail, distribution and corporate facilities; freight expenses associated with moving merchandise from our distribution centers to our retail stores and among distribution and retail facilities; marketing expenses, offset by vendor payments for reimbursement of specific, incremental and identifiable costs; net revenues from our Kohl's credit card operations; and other administrative revenues and expenses. SG\&A also includes the costs incurred prior to new store openings, such as advertising, hiring and training costs for new employees, processing and transporting initial merchandise, and rent expense. We do not include depreciation and amortization in SG\&A. The classification of these expenses varies across the retail industry.

The following table summarizes the changes in SG\&A by expense type:
$\left.\begin{array}{lll} & \begin{array}{l}\text { Quarter } \\ \text { Year to } \\ \text { Date }\end{array} \\ \text { (In Millions) }\end{array}\right) \$ 24$
$\left.\begin{array}{lll}\text { Distribution costs } & 2 & 6 \\ \text { Net revenues from credit card operations } & (7 & ) \\ \text { Increase in SG\&A } & \$ 25 & \$ 20\end{array}\right)$

12

## Table of Contents

Many of our expenses, including store payroll and distribution costs, are variable in nature. These costs generally increase as sales increase and decrease as sales decrease. We measure both the change in these variable expenses and the expense as a percent of sales. If the expense as a percent of sales decreased from the prior year, the expense "leveraged" and indicates that the expense was well-managed or effectively generated additional sales. If the expense as a percent of sales increased over the prior year, the expense "deleveraged" and indicates that sales growth was less than expense growth. SG\&A as a percent of sales increased, or "deleveraged," by approximately 10 basis points for both the quarter and year to date.

The increases in store expenses are the result of higher store payroll to support the higher sales, higher rent-related expenses due to new stores, and higher controllable expenses including repairs and maintenance and expenses associated with rolling out our merchandise location system. Year to date, these increases were partially offset by lower remodel costs.

Marketing costs deleveraged for the quarter as we increased our spending in digital and broadcast and added Texas to our loyalty program pilot. Year to date, advertising leveraged approximately 10 basis points.

Corporate expenses leveraged as savings in payroll and benefits, including incentive compensation, were partially offset by increased IT spending related to growth and infrastructure investments related to our omni-channel strategy.

Distribution costs deleveraged in both the quarter and year to date. We continue to improve our efficiency in E-Commerce fulfillment, however, which reported significant leverage as a percent of E-Commerce sales.

The increases in net revenues from credit card operations are the result of higher finance charge revenues and late fees due to growth in the portfolio. Partially offsetting these increases were higher bad debt expenses and other operational costs. Year-to-date expenses are also higher as a result of the new credit card servicing platform which was implemented in the first quarter of 2012.

Other Expenses.

The increases in depreciation and amortization are primarily due to technology investments across the company. The increases in interest expense are primarily due to the September 2012 debt issuance. The increase in the effective tax rate for the quarter was primarily due to favorable settlements of state tax audits in 2012.
Seasonality and Inflation
Our business, like that of most retailers, is subject to seasonal influences, with the major portion of sales and income typically realized during the second half of each fiscal year, which includes the back-to-school and holiday seasons. Approximately $15 \%$ of annual sales typically occur during the back-to-school season and $30 \%$ during the holiday season. Because of the seasonality of our business, results for any quarter are not necessarily indicative of the results that may be achieved for a full fiscal year. Revenues and expenses associated with the opening of new stores may also effect our quarterly results.

Although we expect that our operations will be influenced by general economic conditions, including rising food, fuel and energy prices, we do not believe that inflation has had a material effect on our results of operations. However, there can be no assurance that our business will not be affected by such factors in the future. In 2012, we saw modest increases in apparel costs in the first six months and mid-single-digit decreases in the last six months of the year. In 2013, we have seen decreases in apparel costs.

Financial Condition and Liquidity
Our primary ongoing cash requirements are for capital expenditures for new stores, remodels and IT spending and for seasonal and new store inventory purchases. Share repurchases and dividend payments to shareholders are currently other

## Table of Contents

significant usages of cash. These payments are discretionary and can be discontinued at any time should we require cash for other uses. Our primary sources of funds are cash flows provided by operations, short-term trade credit and our lines of credit. Short-term trade credit, in the form of extended payment terms for inventory purchases, often represents a significant source of financing for merchandise inventories. We may from time to time issue new debt. The amount of new debt issued, if any, will depend on prevailing market conditions, our cash needs and our capital structure. Seasonal cash needs may be met by cash on hand and/or the line of credit available under our revolving credit facility. Our working capital and inventory levels typically build throughout the fall, peaking during the November and December holiday selling season.

Net cash provided by (used in):
$\begin{array}{lllllll}\text { Operating activities } & \$ 762 & \$ 582 & \$ 180 & 31 & \%\end{array}$

| Investing activities | $(270$ | $)$ | $(376$ | $)$ | 106 | 28 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- |

Financing activities
(437 ) (811 ) $374 \quad 46 \quad \%$
Operating Activities. Operating activities generated $\$ 762$ million of cash in 2013, compared to $\$ 582$ million in 2012. Merchandise inventory, excluding E-Commerce, increased 6\% over July 28, 2012 to $\$ 3.2$ million per store as we increased inventory during 2013 to more normalized levels. Accounts payable as a percent of inventory was $36.2 \%$ at August 3, 2013, compared to $43.5 \%$ at July 28, 2012. The decrease is primarily due to reducing our second quarter inventory receipts to manage our inventory levels as well as slower inventory turnover.
Investing Activities. Net cash used in investing activities reflects a $\$ 145$ million decrease in capital spending primarily due to fewer remodels and new stores as well as lower spending on E-Commerce fulfillment centers, partially offset by higher technology spending.
Financing Activities. Financing activities used cash of \$437 million in 2013 and $\$ 811$ million in 2012.
We paid cash for treasury stock purchases of $\$ 279$ million in 2013 and $\$ 623$ million in 2012. Share repurchases are discretionary in nature. The timing and amount of repurchases is based upon available cash balances, our stock price and other factors. We paid cash dividends of $\$ 153$ million in both 2013 and 2012. On August 13, 2013, our board of directors declared a quarterly cash dividend of $\$ 0.35$ per common share. The dividend is payable September 25, 2013 to shareholders of record at the close of business on September 11, 2013.

Free Cash Flow. We generated free cash flow of $\$ 426$ million in the first six months of 2013, more than four times higher than the first six months of 2012. The increase is primarily due to higher cash from operating activities and lower capital expenditures, as discussed in more detail above. Free cash flow is a non-GAAP financial measure which we define as net cash provided by operating activities and proceeds from financing obligations (which generally represent landlord reimbursements of construction costs) less capital expenditures and capital lease and financing obligations. Free cash flow should be evaluated in addition to, and not considered a substitute for, other financial measures such as net income and cash flow provided by operations. We believe that free cash flow represents our ability to generate excess cash flow from our business operations.

The following table reconciles net cash provided by operating activities (a GAAP measure) to free cash flow (a non-GAAP measure).

Net cash provided by operating activities
Acquisition of property \& equipment
Capital lease \& financing obligation payments
Proceeds from financing obligations
Free cash flow

## Table of Contents

Key financial ratios. Key financial ratios that provide certain measures of our liquidity are as follows:
August 3, $\quad$ July 28, 2012
2013
Liquidity Ratios:
Working capital (In Millions) \$2,199
\$1,840
Current ratio 1.821.69

Debt/capitalization
The increases in working capital and the current ratio as of August 3, 2013 compared to July 28, 2012 are due to higher inventory levels and lower accounts payable, partially offset by leases and other accrued liabilities. The increase in the debt/capitalization ratio reflects the issuance of $\$ 350$ million of debt in September 2012 and lower capitalization, primarily due to share repurchases.

Debt Covenant Compliance. As of August 3, 2013, we were in compliance with all debt covenants and expect to remain in compliance during fiscal 2013. During the quarter, we amended the $\$ 1$ billion revolving line of credit that we finalized in June 2011. The amendment extended the remaining term from June 2016 to June 2018 and changed the required debt covenant.
(Dollars in Millions)

## Table of Contents

## Contractual Obligations

There have been no significant changes in the contractual obligations disclosed in our 2012 Form 10-K.
Off-Balance Sheet Arrangements
We have not provided any financial guarantees as of August 3, 2013. We have not created, and are not party to, any special-purpose or off-balance sheet entities for the purpose of raising capital, incurring debt or operating our business. We do not have any arrangements or relationships with entities that are not consolidated into our financial statements that are reasonably likely to materially affect our liquidity or the availability of capital resources.
Critical Accounting Policies and Estimates
The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires us to make estimates and assumptions that affect reported amounts. Management has discussed the development, selection and disclosure of its estimates and assumptions with the Audit Committee of our Board of Directors. There have been no significant changes in the critical accounting policies and estimates discussed in our 2012 Form 10-K.

Item 3. Quantitative and Qualitative Disclosures About Market Risk
There have been no significant changes in the market risks described in our 2012 Form 10-K.
Item 4. Controls and Procedures
(a) Evaluation of Disclosure Controls and Procedures

Under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, we carried out an evaluation of the effectiveness of the design and operation of our disclosure controls and procedures (the "Evaluation") at a reasonable assurance level as of the last day of the period covered by this Report.
Based upon the Evaluation, our Chief Executive Officer and Chief Financial Officer have concluded that our disclosure controls and procedures are effective at the reasonable assurance level. Disclosure controls and procedures are defined by Rules 13a-15(e) of the Securities Exchange Act of 1934 (the "Exchange Act") as controls and other procedures that are designed to ensure that information required to be disclosed in the reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified by the SEC's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed in the reports that we file or submit under the Exchange Act is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, to allow timely decisions regarding required disclosures.
It should be noted that the design of any system of controls is based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving our stated goals under all potential future conditions, regardless of how remote.
(b) Changes in Internal Control Over Financial Reporting

There were no changes in our internal control over financial reporting during the quarter ended August 3, 2013 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

## PART II. OTHER INFORMATION

Item 1A. Risk Factors
There have been no significant changes in our risk factors from those described in our 2012 Form 10-K.
Forward-looking Statements
This report contains statements that may constitute forward-looking statements within the meaning of the safe harbor provisions for forward-looking statements contained in the Private Securities Litigation Reform Act of 1995. Those statements relate to developments, results, conditions or other events we expect or anticipate will occur in the future.

## Edgar Filing: KOHLS Corp - Form 10-Q

Words such as "believes," "anticipates," "plans," "expects" and similar expressions are intended to identify forward-looking statements. Without limiting the foregoing, these statements may relate to future outlook, revenues, earnings, store openings, planned capital expenditures, market conditions, new strategies and the competitive environment. Forward-looking statements are based

## Table of Contents

on our management's then current views and assumptions and, as a result, are subject to certain risks and uncertainties that could cause actual results to differ materially from those projected. Any such forward-looking statements are qualified by the important risk factors, described in Item 1A of our 2012 Form 10-K, that could cause actual results to differ materially from those predicted by the forward-looking statements. Forward-looking statements relate to the date initially made, and we undertake no obligation to update them. An investment in our common stock or other securities carries certain risks. Investors should carefully consider the risks as stated in our 2012 Form 10-K and other risks which may be disclosed from time to time in our filings with the SEC before investing in our securities.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds
We did not sell any securities during the quarter ended August 3, 2013 which were not registered under the Securities Act.
The following table contains information for shares repurchased and shares acquired from employees in lieu of amounts required to satisfy minimum tax withholding requirements upon the vesting of the employees' restricted stock during the three fiscal months ended August 3, 2013:
