

DELPHI FINANCIAL GROUP INC/DE
Form 10-Q
August 08, 2008

**UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549
FORM 10-Q**

(Mark One)

**QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES
EXCHANGE ACT OF 1934**

For the Quarterly Period Ended June 30, 2008

**TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES
EXCHANGE ACT OF 1934**

For the transition period from _____ to _____

Commission File Number 001-11462

DELPHI FINANCIAL GROUP, INC.

(Exact name of registrant as specified in its charter)

Delaware

(302) 478-5142

13-3427277

(State or other jurisdiction of
incorporation or organization)

(Registrant's telephone number,
including area code)

(I.R.S. Employer Identification
Number)

1105 North Market Street, Suite 1230, P.O. Box 8985, Wilmington,
Delaware

19899

(Address of principal executive offices)

(Zip Code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required

to file such reports) and (2) has been subject to filing requirements for the past 90 days:

Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of large accelerated filer, accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company

(Do not check if a smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes No

As of July 31, 2008, the Registrant had 41,177,716 shares of Class A Common Stock and 5,706,967 shares of Class B Common Stock outstanding.

DELPHI FINANCIAL GROUP, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

Note A Significant Accounting Policies

The financial statements of Delphi Financial Group, Inc. (the Company, which term includes the Company and its consolidated subsidiaries unless the context indicates otherwise) included herein were prepared in conformity with accounting principles generally accepted in the United States (GAAP) for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by GAAP for complete financial statements. The information furnished includes all adjustments and accruals of a normal recurring nature, which are in the opinion of management, necessary for a fair presentation of results for the interim periods. Operating results for the three and six months ended June 30, 2008 are not necessarily indicative of the results that may be expected for the year ended December 31, 2008. For further information refer to the consolidated financial statements and footnotes thereto included in the Company's annual report on Form 10-K for the year ended December 31, 2007 (the 2007 Form 10-K). Capitalized terms used herein without definition have the meanings ascribed to them in the 2007 Form 10-K.

Accounting Changes

Fair Value Measurements. As of January 1, 2008, the Company adopted Financial Accounting Standards Board (FASB) Statement of Financial Accounting Standards (SFAS) No. 157, Fair Value Measurements, which addresses the manner in which the fair value of companies' assets and liabilities should be measured under GAAP. SFAS No. 157 provides a common definition of fair value and establishes a framework for conducting fair value measures under GAAP, but this statement does not supersede existing guidance on when fair value measures should be used. This standard also requires companies to disclose the extent to which they measure assets and liabilities at fair value, the methods and assumptions they use to measure fair value, and the effect of fair value measures on their earnings. SFAS No.157 establishes a fair value hierarchy of three levels based upon the transparency and availability of information used in measuring the fair value of assets or liabilities as of the measurement date. The levels are categorized as follows:

Level 1 Valuation is based upon quoted prices for identical assets or liabilities in active markets. Level 1 fair value is not subject to valuation adjustments or block discounts.

Level 2 Valuation is based upon quoted prices for similar assets or liabilities in active markets or quoted prices for identical or similar instruments in markets that are not active. In addition, a company may use various valuation techniques or pricing models that use observable inputs to measure fair value.

Level 3 Valuation is generated from techniques in which one or more of the significant inputs are not observable. These inputs may reflect the Company's estimates of the assumptions that market participants would use in valuing the financial assets and financial liabilities.

In February 2008, the FASB issued Staff Position (FSP) FAS 157-2, Effective Date of FASB Statement No. 157 , which delayed the effective date of SFAS No. 157 until January 1, 2009 for certain nonfinancial assets and nonfinancial liabilities. This deferral is not applicable to financial assets and financial liabilities. The adoption of SFAS No. 157 did not have a material effect on the Company's financial condition or results of operations. The Company's fair value measurements are described further in Note C.

Fair Value Option. As of January 1, 2008, the Company adopted SFAS No. 159, The Fair Value Option for Financial Assets and Financial Liabilities. SFAS No. 159 allows companies to choose, at specified election dates, to measure many financial assets and financial liabilities (as well as certain nonfinancial instruments that are similar to financial instruments) at fair value (the fair value option). The election is made on an instrument-by-instrument basis and is irrevocable. Upon initial adoption, SFAS No. 159 provides entities with a one-time chance to elect the fair value option for existing eligible items, and any differences between the carrying amount of the selected item and its fair value as of the effective date are included in the cumulative-effect adjustment to beginning retained earnings. All subsequent changes in fair value for the instrument elected are reported in earnings. The adoption of SFAS No. 159 did not have an effect on the Company's financial condition or results of operations as the Company elected not to apply the provisions of SFAS No. 159 to any of its existing eligible financial assets or liabilities on the date of

adoption.

DELPHI FINANCIAL GROUP, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Unaudited)

Note A Significant Accounting Policies (Continued)

Stock-Based Compensation. As of January 1, 2008, the Company adopted Securities and Exchange Commission (SEC) Staff Accounting Bulletin (SAB) No. 110. SAB No. 110 allows companies to continue using the simplified method as prescribed under SAB No. 107 under certain circumstances to estimate the expected term of options granted in accordance with SFAS No. 123 (Revised), Share-Based Payment. SAB No. 110 permits use of the simplified method when sufficient historical data is not available to provide a reasonable basis upon which to estimate the expected term of the options granted. The assumptions made by the Company with regard to its stock-based compensation are described in Note F.

Recently Issued Accounting Standards

In December 2007, the FASB issued SFAS No. 141 (Revised) (141R), Business Combinations. SFAS No. 141R establishes principles and requirements for how the acquirer in a business combination: (a) recognizes and measures in its financial statements the identifiable assets acquired, the liabilities assumed, and any noncontrolling interest in the acquiree, (b) recognizes and measures the goodwill acquired in the business combination or a gain from a bargain purchase and (c) determines what information to disclose to enable users of the financial statements to evaluate the nature and financial effects of the business combination. This statement requires an acquirer to recognize the assets acquired, the liabilities assumed, and any noncontrolling interest in the acquiree at the acquisition date, measured at their fair values as of that date, with limited specified exceptions. SFAS No. 141R is effective for business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after December 15, 2008. Earlier application is prohibited. Assets and liabilities arising from a business combination having an earlier acquisition date are not to be adjusted upon the effectiveness of this statement.

In December 2007, the FASB issued SFAS No. 160, Noncontrolling Interests in Consolidated Financial Statements, an amendment of ARB No. 51, which prescribes the accounting for and the financial reporting of a noncontrolling interest in a company's subsidiary, which is the portion of the equity (residual interest) in the subsidiary attributable to owners thereof other than the parent and the parent's affiliates. SFAS No. 160 requires that a noncontrolling interest in a consolidated subsidiary be presented in a consolidated statement of financial position as a separate component of equity and that changes in ownership interests in a consolidated subsidiary that does not result in a loss of control be recorded as an equity transaction with no gain or loss recognized. For a change in the ownership interests in a consolidated subsidiary that results in a loss of control or a deconsolidation, a gain or loss is recognized in the amount of the difference between the proceeds of that sale and the carrying amount of the interest sold. In the case of a deconsolidation, SFAS No. 160 requires the establishment of a new fair value basis for the remaining noncontrolling ownership interest, with a gain or loss recognized for the difference between that new basis and the historical cost basis of the remaining ownership interest. Upon adoption, the amounts of consolidated net income and consolidated comprehensive income attributable to the parent and the noncontrolling interest must be presented separately on the face of the consolidated financial statements. A detailed reconciliation of the changes in the equity of a noncontrolling interest during the period is also required. SFAS No. 160 is effective for fiscal years, and interim periods within those fiscal years, beginning on or after December 15, 2008. Prospective adoption is required with some exceptions. Earlier application of SFAS No. 160 is prohibited. The adoption of SFAS No. 160 is not expected to have a material effect on the Company's consolidated financial position or results of operations.

In March 2008, the FASB issued SFAS No. 161, Disclosures about Derivative Instruments and Hedging Activities, an amendment of SFAS No. 133. SFAS No. 161 requires entities to provide enhanced disclosures about (a) how and why an entity uses derivative instruments, (b) how derivative instruments and related hedged items are accounted for under SFAS No. 133 and its related interpretations and (c) how derivative instruments and related hedged items affect an entity's financial position, results of operations and cash flows. SFAS No. 161 requires qualitative disclosures about objectives and strategies for using derivatives, quantitative disclosures about fair value amounts of gains and losses on derivative instruments and credit-risk-related contingent features in derivative instruments. SFAS No. 161 is effective for financial statements issued for fiscal years and interim periods beginning after November 15, 2008, with early

application encouraged. In years after initial adoption, SFAS No. 161 requires comparative disclosures only for periods subsequent to initial adoption. SFAS No. 161 is a disclosure standard and as such will not impact the Company's consolidated financial position or results of operations.

In May 2008, the FASB issued SFAS No. 162, The Hierarchy of Generally Accepted Accounting Principles. SFAS No. 162 identifies the sources of accounting principles and the framework for selecting the principles to be used in the preparation of financial statements of nongovernmental entities that are presented in conformity with GAAP. SFAS No. 162 is effective sixty

DELPHI FINANCIAL GROUP, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Unaudited)

Note A Significant Accounting Policies (Continued)

days following the SEC's approval of the Public Company Accounting Oversight Board amendments to AU Section 411, "The Meaning of Present Fairly in Conformity With Generally Accepted Accounting Principles." SFAS No. 162 identifies the sources of accounting principles that are generally accepted and categorizes them in descending order of authority and as such will not impact the Company's consolidated financial position or results of operations. In June 2008, the FASB issued FSP EITF 03-6-1, "Determining Whether Instruments Granted in Share-Based Payment Transactions Are Participating Securities." FSP EITF 03-6-1 addresses whether instruments granted in share-based payment transactions are participating securities prior to vesting and, therefore, need to be included in the earnings allocation in computing earnings under SFAS No. 128, "Earnings per Share." FSP EITF 03-6-1 provides guidance of calculation of earnings per share for share-based payment awards with rights to dividends or dividend equivalents. FSP EITF 03-6-1 is effective for financial statements issued for fiscal years beginning after December 15, 2008, and interim periods within those years. The adoption of FSP EITF 03-6-1 is not expected to have a material effect on the Company's consolidated financial position or results of operations.

Note B Investments

At June 30, 2008, the Company had fixed maturity securities available for sale with a carrying value and a fair value of \$3,811.8 million and an amortized cost of \$4,030.0 million. At December 31, 2007, the Company had fixed maturity securities available for sale with a carrying value and a fair value of \$3,691.7 million and an amortized cost of \$3,747.0 million.

The amortized cost and fair value of investments in fixed maturity securities available for sale are as follows:

The Company regularly evaluates its investment portfolio utilizing its established methodology to determine whether declines in the fair values of its investments are other than temporary. The gross unrealized losses at June 30, 2008 are attributable to over thirteen hundred fifty fixed maturity security positions, with no unrealized loss associated with any one security exceeding \$6.4 million. At June 30, 2008 approximately 22% of the aggregate gross unrealized losses were attributable to fixed maturity security positions as to which the unrealized loss represents 10% or less of the amortized cost for such security. Unrealized losses attributable to fixed maturity securities having investment grade ratings by nationally recognized statistical rating organizations at June 30, 2008 comprised 80% of the aggregate gross unrealized losses, with the remainder of such losses being attributable to non-investment grade fixed maturity securities. For fixed maturity securities, management evaluated, among other things, the financial position and prospects of the issuers, conditions in the issuers' industries and geographic areas, liquidity of the investments, changes in the amount or timing of expected cash flows from the investment, recent changes in credit ratings by nationally recognized rating agencies and the length of time and extent to which the fair value of the investment is lower than amortized cost. Based on these evaluations, and taking into account the Company's ability and intent to retain the investments to allow for the anticipated recovery in their fair values, management concluded that the unrealized losses reflected in the table above were temporary.

Note C Fair Value Measurements

As of January 1, 2008, the Company adopted SFAS No. 157, which addresses the manner in which the fair value of companies' assets and liabilities should be measured under GAAP. For a discussion of the SFAS No. 157 framework, see Note A.

Assets and liabilities measured at fair value on a recurring basis are summarized below:

	Total	June 30, 2008		Level 3
		Level 1	Level 2	
(dollars in thousands)				
Assets:				
Fixed maturity securities, available for sale:				
Mortgage-backed securities	\$ 1,122,388	\$	\$ 1,084,251	\$ 38,137
Corporate securities	1,553,784		1,021,264	532,520
U.S. Treasury and other U.S. Government guaranteed securities	50,072	23,575	24,753	1,744
U.S. Government-sponsored enterprise securities	22,257		22,257	
Obligations of U.S. states, municipalities and political subdivisions	1,063,262		1,063,262	
Other investments	153,870	125,937		27,933
Assets held in separate account	118,592			118,592
Total	\$ 4,084,225	\$ 149,512	\$ 3,215,787	\$ 718,926
Liabilities:				
Other liabilities	\$ 69,093	\$ 69,093	\$	\$

The following table provides a reconciliation of the beginning and ending balance of Level 3 assets measured at fair value on a recurring basis:

	Six Months Ended June 30, 2008

certain
corporate
activities.

Note E Comprehensive (Loss) Income

Total comprehensive (loss) income is comprised of net income and other comprehensive (loss) income, which includes the change in unrealized gains and losses on securities available for sale, change in net periodic pension cost and the change in the loss on the cash flow hedge described in the 2007 Form 10-K. Total comprehensive (loss) income was \$(65.4) million and \$38.6 million for the first six months of 2008 and 2007, respectively, and \$(18.2) million and \$(1.4) million for the second quarters of 2008 and 2007, respectively. The changes in such amounts, as between the current and prior year periods, are primarily attributable to increased in unrealized losses in the Company's fixed maturity securities.

DELPHI FINANCIAL GROUP, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Unaudited)

Note F Stock-Based Compensation

The Company recognized stock-based compensation expenses of \$5.3 million and \$4.5 million in the first six months of 2008 and 2007, respectively, of which \$2.7 million and \$2.3 million was recognized in the second quarter of 2008 and 2007, respectively. The remaining unrecognized compensation expense related to unvested awards at June 30, 2008 was \$25.0 million and the weighted average period of time over which this expense will be recognized is 3.7 years.

The fair values of options were estimated at the grant date using the Black-Scholes option pricing model with the following weighted average assumptions for the first half of 2008: expected volatility 19.2%, expected dividends 1.3%, expected lives of the options 6.9 years and the risk free rate 3.2%. The following weighted average assumptions were used for the first half of 2007: expected volatility 19.6%, expected dividends 0.8%, expected lives of the options 6.5 years and the risk free rate 4.7%.

The expected volatility reflects the Company's past monthly stock price volatility. The Company used the historical average period from the Company's issuance of an option to its exercise or cancellation and the average remaining years until expiration for the Company's outstanding options to estimate the expected life of options granted in the first half of 2008 for which the Company had sufficient historical exercise data. The Company used the simplified method in accordance with SAB No. 110 for options granted in the first half of 2008 for which sufficient historical data was not available due to significant differences in the vesting periods of these grants compared to previously issued grants. The expected lives of options granted in the first half of 2007 were calculated using the simplified method in accordance with SAB No. 107. The dividend yield is based on the Company's historical dividend payments. The risk-free rate is derived from public data sources at the time of each option grant. Compensation cost for service-based options is recognized over the requisite service period of the option using the straight-line method.

Option activity with respect to the Company's plans, excluding the performance-contingent incentive options referenced further below, was as follows:

Options	Number of Options	Weighted Average Exercise Price	Weighted Average Remaining Contractual Term (In Years)	Aggregate Intrinsic Value (\$000)
Outstanding at January 1, 2008	3,260,251	\$27.15		
Granted	990,231	28.81		
Exercised	(63,770)	19.05		
Forfeited	(20,295)	35.11		
Expired	(13,575)	25.05		
Outstanding at June 30, 2008	4,152,842	27.64	6.2	\$8,215
Exercisable at June 30, 2008	2,024,559	\$21.76	3.3	\$8,214

The weighted average grant date fair value of options granted during the first half of 2008 and 2007 was \$6.75 and \$11.91, respectively, and during the second quarter of 2008 and 2007 was \$5.49 and \$12.12, respectively. The cash proceeds from stock options exercised were \$0.4 million and \$7.1 million for the first half of 2008 and 2007, respectively. The total intrinsic value of options exercised during the first half of 2008 and 2007 was \$3.8 million and \$9.1 million, respectively.

At June 30, 2008, 4,438,250 performance contingent incentive options were outstanding with a weighted average exercise price of \$25.95, a weighted average contractual term of 6.8 years and an intrinsic value of \$5.2 million. 2,053,250 options with a weighted average exercise price of \$22.24, a weighted average contractual term of 5.2 years and an intrinsic value of \$5.2 million were exercisable at June 30, 2008.

DELPHI FINANCIAL GROUP, INC.
ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Introduction

The Company, through its subsidiaries, underwrites a diverse portfolio of group employee benefit products, primarily disability, group life and excess workers' compensation insurance. Revenues from this group of products are primarily comprised of earned premiums and investment income. The profitability of group employee benefit products is affected by, among other things, differences between actual and projected claims experience, the retention of existing customers, product mix and the Company's ability to attract new customers, change premium rates and contract terms for existing customers and control administrative expenses. The Company transfers its exposure to a portion of its group employee benefit risks through reinsurance ceded arrangements with other insurance and reinsurance companies. Accordingly, the profitability of the Company's group employee benefit products is affected by the amount, cost and terms of reinsurance it obtains. The profitability of those group employee benefit products for which reserves are discounted; in particular, the Company's disability and primary and excess workers' compensation products, is also significantly affected by the difference between the yield achieved on invested assets and the discount rate used to calculate the related reserves. The Company continues to benefit from the favorable market conditions which have in recent years prevailed for its excess workers' compensation products as to pricing and other contract terms for these products; however, due primarily to improvements in the primary workers' compensation market resulting in lower premium rates in that market, conditions relating to new business production and growth in premiums for these products are less favorable at present. In addition, the Company is presently experiencing more competitive market conditions, particularly as to pricing, for its other group employee benefit products. These conditions may impact the Company's ability to achieve levels of new business production and growth in premiums for these products commensurate with those achieved in recent years. For these products, the Company is continuing to enhance its focus on the small case niche (insured groups of 10 to 500 individuals), including employers which are first-time providers of these employee benefits, which the Company believes to offer opportunities for superior profitability. The Company is also emphasizing its suite of voluntary group insurance products, which includes, among others, its group limited benefit health insurance product. The Company markets its other group employee benefit products on an unbundled basis and as part of an integrated employee benefit program that combines employee benefit insurance coverages and absence management services. The integrated employee benefit program, which the Company believes helps to differentiate itself from competitors by offering clients improved productivity from reduced employee absence, has enhanced the Company's ability to market its other group employee benefit products to large employers.

The Company also operates an asset accumulation business that focuses primarily on offering fixed annuities to individuals. In addition, during the first quarter of 2006, the Company issued \$100 million in aggregate principal amount of fixed and floating rate funding agreements with maturities of three to five years in connection with the issuance by an unconsolidated special purpose vehicle of funding agreement-backed notes in a corresponding principal amount. The Company believes that the funding agreement program enhances the Company's asset accumulation business by providing an alternative source of distribution for this business. The Company's liabilities for the funding agreements are recorded in policyholder account balances. Deposits from the Company's asset accumulation business are recorded as liabilities rather than as premiums. Revenues from the Company's asset accumulation business are primarily comprised of investment income earned on the funds under management. The profitability of asset accumulation products is primarily dependent on the spread achieved between the return on investments and the interest credited to holders of these products. The Company sets the crediting rates offered on its asset accumulation products in an effort to achieve its targeted interest rate spreads on these products, and is willing to accept lower levels of sales on these products when market conditions make these targeted spreads more difficult to achieve.

The management of the Company's investment portfolio is an important component of its profitability. Over the second half of 2007 and continuing in the first half of 2008, due to the extraordinary decline in housing prices and the consequences in the credit markets, particularly the structured mortgage securities market, the investment markets

have been the subject of substantially increased volatility and dramatically widened spreads in certain sectors. At the same time the overall level of risk-free interest rates has declined substantially. These market conditions have resulted in a high degree of variability in the carrying values of certain portions of its investment portfolio. Such conditions may persist or worsen in the future, and, in the cases of those investments whose changes in value, positive or negative, are included in the Company's net investment income, such as investment funds organized as limited partnerships and limited liability companies, trading account securities and hybrid financial instruments, this variability may continue to result in significant fluctuations in net investment income, and as a result, in the Company's results of operations. In addition, the Company may determine that declines in market value relative to cost of certain securities are other than temporary; in which event the declines will be reported as realized investment losses in the Company's results of operations.

-16-

The following discussion and analysis of the results of operations and financial condition of the Company should be read in conjunction with the Consolidated Financial Statements and related notes included in this document, as well as the Company's annual report on Form 10-K for the year ended December 31, 2007 (the 2007 Form 10-K). Capitalized terms used herein without definition have the meanings ascribed to them in the 2007 Form 10-K. The preparation of financial statements in conformity with GAAP requires management, in some instances, to make judgments about the application of these principles. The amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period could differ materially from the amounts reported if different conditions existed or different judgments were utilized. A discussion of how management applies certain critical accounting policies and makes certain estimates is contained in the 2007 Form 10-K in the section entitled Management's Discussion and Analysis of Financial Condition and Results of Operations Critical Accounting Policies and Estimates and should be read in conjunction with the following discussion and analysis of results of operations and financial condition of the Company. In addition, a discussion of uncertainties and contingencies which can affect actual results and could cause future results to differ materially from those expressed in certain forward-looking statements contained in this Management's Discussion and Analysis of Financial Condition and Results of Operations can be found below under the caption Forward-Looking Statements And Cautionary Statements Regarding Certain Factors That May Affect Future Results, in Part I, Item 1A of the 2007 Form 10-K, Risk Factors.

Results of Operations

Six Months Ended June 30, 2008 Compared to

Six Months Ended June 30, 2007

Summary of Results. Net income was \$48.0 million, or \$0.97 per diluted share, in the first half of 2008 as compared to \$82.1 million, or \$1.59 per diluted share, in the first half of 2007. Net income in the first half of 2008 and 2007 included realized investment (losses) gains (net of the related income tax (benefit) expense) of \$(16.9) million, or \$(0.34) per diluted share, and \$0.4 million, or \$0.01 per diluted share, respectively. Net income in the first half of 2008 benefited from growth in income from the Company's core group employee benefit products and was adversely impacted by realized investment losses and a significant decrease in net investment income. Core group employee benefit products include disability, group life, excess workers' compensation, travel accident and dental insurance. Premiums from these core group employee benefit products increased 6% in the first half of 2008. The combined ratio (loss ratio plus expense ratio) for group employee benefit products decreased to 91.6% in the first half of 2008 from 92.8% in the first half of 2007. In the first half of 2008 and 2007, realized investment losses included losses of \$(24.3) million and \$(1.9) million, respectively, due to the other than temporary declines in the market values of certain fixed maturity and other securities. Net investment income decreased in the first half of 2008 from the first half of 2007 due to a lower tax equivalent weighted average annualized yield on invested assets of 4.2% in the 2008 period as compared to 6.5% for the prior period.

Premium and Fee Income. Premium and fee income in the first half of 2008 was \$683.1 million as compared to \$646.6 million in the first half of 2007, an increase of 6%. Premiums from core group employee benefit products increased 6% to \$648.3 million in the first half of 2008 from \$609.7 million in the first half of 2007. This increase reflects normal growth in employment and salary levels for the Company's existing customer base, price increases, and new business production. Premiums from excess workers' compensation insurance for self-insured employers were \$130.7 million in the first half of 2008 as compared to \$141.1 million in the first half of 2007. Excess workers' compensation premiums in the first half of 2007 included \$3.5 million of 2006 policy year premiums from Canadian policies assumed by SNCC in the first quarter of 2007 under the renewal rights agreement into which SNCC entered in 2005 (the Renewal Rights Agreement), pursuant to Canadian regulatory approval received in the first quarter of 2007. Excess workers' compensation new business production, which represents the amount of new annualized premium sold, was \$8.0 million in the first half of 2008 compared to \$19.5 million in the first half of 2007, which included new business production of \$3.4 million from the Renewal Rights Agreement. The retention of existing customers in the first half of 2008 remained strong. In its July 2008 renewal season, which is not reflected in the Company's results for the first half of 2008, SNCC's rates declined modestly and SIRs were on average up modestly on new and renewal policies, excluding Canadian policies written under the Renewal Rights Agreement.

Premiums from the Company's other core group employee benefit products increased 10% to \$517.6 million in the first half of 2008 from \$468.6 million in the first half of 2007, primarily reflecting a 12% increase in premiums from the Company's group life products, a 9% increase in premiums from the Company's disability products and new business production. During the first half of 2008, premiums from the Company's group life products increased to \$201.0 million from \$179.7 million in the first half of 2007, primarily reflecting new business production and a decrease in premiums ceded by the Company to reinsurers. During the first half of 2008, premiums from the Company's group disability products increased to \$282.8 million from \$259.1 million in the first half of 2007, primarily reflecting new business production. Premiums from the Company's turnkey disability business were \$24.1 million and \$25.5 million in the first half of 2008 and 2007, respectively. New business production for the Company's other core group employee benefit products was \$111.7 million and \$128.2 million in the first half of 2008 and

2007, respectively. New business production includes only directly written business, and does not include premiums from the Company's turnkey disability business. The level of production achieved from these other core group employee benefit products also reflects the Company's focus on the small case niche (insured groups of 10 to 500 individuals). The Company continues to implement price increases for certain existing group disability and group life insurance customers.

Non-core group employee benefit products include LPTs, primary workers' compensation, bail bond insurance, workers' compensation reinsurance and reinsurance facilities. Premiums from non-core group employee benefit products were \$14.8 million in the first half of 2008 as compared to \$19.4 million in the first half of 2007, primarily due to a lower level of premium from LPTs, which are episodic in nature.

Deposits from the Company's asset accumulation products were \$151.8 million in the first half of 2008 as compared to \$51.2 million in the first half of 2007. This increase in deposits is primarily due to increased sales of the Company's multi-year rate guarantee products. Deposits from the Company's asset accumulation products, consisting of new annuity sales and issuances of funding agreements, are recorded as liabilities rather than as premiums.

Net Investment Income. Net investment income in the first half of 2008 was \$93.1 million as compared to \$140.4 million in the first half of 2007. This decrease reflects a decrease in the tax equivalent weighted average annualized yield on invested assets to 4.2% for the first half of 2008 from 6.5% for the first half of 2007. This decrease in yield was primarily due to adverse performance in the Company's investments in investment funds organized as limited partnerships and limited liability companies, trading account securities and hybrid financial instruments which resulted from adverse market conditions for financial assets in the first half of 2008. This adverse performance was partially offset by a 6% increase in average invested assets to \$4,815.3 million in the first half of 2008 from \$4,527.1 million in the first half of 2007.

Net Realized Investment (Losses) Gains. Net realized investment losses were \$(25.9) million in the first half of 2008 as compared to net realized investment gains of \$0.6 million in the first half of 2007. The Company monitors its investments on an ongoing basis. When the market value of a security declines below its cost, the decline is included as a component of accumulated other comprehensive income or loss, net of the related income tax benefit and adjustment to cost of business acquired, on the Company's balance sheet, and if management judges the decline to be other than temporary, the decline is reported as a realized investment loss. In the first half of 2008 and 2007, the Company recognized \$(24.3) million and \$(1.9) million, respectively, of losses due to the other than temporary declines in the market values of certain fixed maturity and other securities. The Company's investment strategy results in periodic sales of securities and, therefore, the recognition of realized investment gains and losses. During the first half of 2008 and 2007, the Company recognized \$(1.6) million and \$2.5 million, respectively, of net (losses) gains on the sales of securities.

The Company may recognize additional losses due to other than temporary declines in security market values in the future, particularly if the general market conditions described above were to persist or worsen. See Introduction. The extent of such losses will depend on, among other things, future market developments, the outlook for the performance by the issuers of their obligations under such securities and changes in security values. The Company continuously monitors its investments in securities whose fair values are below the Company's amortized cost pursuant to its procedures for evaluation for other than temporary impairment in valuation, which are described in the section entitled Management's Discussion and Analysis of Financial Condition and Results of Operations Critical Accounting Policies and Estimates Investments in the 2007 Form 10-K and in Note A to the Consolidated Financial Statements included in this document. It is not possible to predict the extent of any future changes in value, positive or negative, or the results of the future application of these procedures, with respect to these securities. There can be no assurance that the Company will realize investment gains in the future in an amount sufficient to offset any such losses. For further information concerning the Company's investment portfolio, see Liquidity and Capital Resources Investments.

Loss on Redemption of Junior Subordinated Deferrable Interest Debentures. During the first half of 2007, the Company recognized a pre-tax loss of \$2.2 million from the redemption of the 9.31% junior subordinated deferrable interest debentures (Junior Debentures) underlying the 9.31% Capital Securities, Series A (Capital Securities) of Delphi Funding L.L.C. On March 27, 2007, Delphi Funding L.L.C. redeemed the remaining \$36.0 million liquidation amount of Capital Securities concurrently with the redemption by the Company of the underlying Junior Debentures

held by Delphi Funding L.L.C. The redemption price was \$1,046.55 per Capital Security plus accrued dividends. As a result, the \$103.1 million principal amount of the Junior Debentures ceased to be outstanding and dividends on the Capital Securities ceased to accrue.

Benefits and Expenses. Policyholder benefits and expenses were \$671.2 million in the first half of 2008 as compared to \$655.1 million in the first half of 2007. This increase primarily reflects the increase in premiums from the Company's group employee benefit products discussed above, and reflects a small amount of positive development in the Company's excess workers' compensation line. The combined ratio (loss ratio plus expense ratio) for group employee benefit products decreased to 91.6% in the first half of 2008 from 92.8% in the first half of 2007.

Amortization of cost of business acquired was decelerated by \$5.7

-18-

million during the first half of 2008 primarily due to the decrease in the Company's tax equivalent weighted average annualized yield on invested assets. The weighted average annualized crediting rate on the Company's asset accumulation products, which reflects the effects of the first year bonus crediting rate on certain newly issued products, was 4.2% and 4.3% in the first half of 2008 and 2007, respectively.

Interest Expense. Interest expense was \$15.8 million in the first half of 2008 as compared to \$12.8 million in the first half of 2007, an increase of \$3.0 million. This increase is primarily due to interest payments on the 2007 Junior Debentures issued by the Company in the second quarter of 2007. This increase was partially offset by a decrease in the weighted average borrowing rate under the Company's revolving credit facility due to decreases in the levels of short-term interest indices referenced under such facility.

Income Tax Expense. Income tax expense was \$15.2 million in the first half of 2008 as compared to \$35.4 million in the first half of 2007 primarily due to the lower level of the Company's operating income. The Company's effective tax rate decreased to 24.0% in the first half of 2008 from 30.2% in the first half of 2007 primarily due to the proportionately higher level of tax-exempt interest income earned on invested assets.

*Three Months Ended June 30, 2008 Compared to
Three Months Ended June 30, 2007*

Summary of Results. Net income was \$26.9 million, or \$0.55 per diluted share, for the second quarter of 2008 as compared to \$42.9 million, or \$0.83 per diluted share, for the second quarter of 2007. Net income in the second quarter of 2008 and 2007 included realized investment (losses) gains (net of the related income tax (benefit) expense) of \$(12.7) million, or \$(0.26) per diluted share, and \$0.6 million, or \$0.01 per diluted share, respectively. Net income in the second quarter of 2008 benefited from the growth in income from the Company's core group employee benefit products and was adversely impacted by realized investment losses and a decrease in net investment income.

Premiums from the Company's core group employee benefit products increased 4% in the second quarter of 2008 and the combined ratio (loss ratio plus expense ratio) for group employee benefit products decreased to 91.8% in the second quarter of 2008 from 92.4% in the second quarter of 2007. In the second quarters of 2008 and 2007, realized investment losses included losses of \$(18.1) million and \$(0.5) million, respectively, due to the other than temporary declines in the market values of certain fixed maturity and other securities. Net investment income decreased in the second quarter of 2008 from the second quarter of 2007 due to a lower tax equivalent weighted average annualized yield on invested assets of 5.4% in the 2008 period as compared to 6.3% for the prior period.

Premium and Fee Income. Premium and fee income for the second quarter of 2008 was \$340.8 million as compared to \$324.3 million for the second quarter of 2007, an increase of 5%. Premiums from core group employee benefit products increased 4% to \$324.0 million in the second quarter of 2008 from \$310.1 million in the second quarter of 2007. This increase reflects normal growth in employment and salary levels for the Company's existing customer base, price increases, and new business production. Premiums from excess workers' compensation insurance for self-insured employers were \$64.1 million in the second quarter of 2008 as compared to \$68.7 million in the second quarter of 2007. Excess workers' compensation new business production, which represents the amount of new annualized premium sold, was \$3.7 million in the second quarter of 2008 compared to \$5.0 million in the second quarter of 2007. SNCC's rates declined modestly on its second quarter 2008 renewals and SIRs are on average up modestly in second quarter 2008 new and renewal policies. The retention of existing customers in the second quarter of 2008 remained strong.

Premiums from the Company's other core group employee benefit products increased 8% to \$260.0 million for the second quarter of 2008 from \$241.4 million for the second quarter of 2007, primarily reflecting an 11% increase in premiums from the Company's group life products, a 5% increase in premiums from the Company's group disability products and new business production. During the second quarter of 2008, premiums from the Company's group life products increased to \$101.5 million from \$91.6 million in the second quarter of 2007, primarily reflecting new business production and a decrease in premiums ceded by the Company to reinsurers. During the second quarter of 2008, premiums from the Company's group disability products increased to \$141.1 million from \$134.3 million in the second quarter of 2007, primarily reflecting new business production. Premiums from the Company's turnkey disability business were \$11.9 million during the second quarter of 2008 compared to \$13.4 million during the second quarter of 2007. New business production for the Company's other core group employee benefit products was

\$50.6 million in the second quarter of 2008 as compared to \$63.2 million in the second quarter of 2007. New business production includes only directly written business, and does not include premiums from the Company's turnkey disability business. The level of production achieved from these products reflects the Company's focus on the small case niche (insured groups of 10 to 500 individuals). The Company continued to implement price increases for certain existing disability and group life customers.

-19-

Deposits from the Company's asset accumulation products were \$99.6 million for the second quarter of 2008 as compared to \$31.8 million for the second quarter of 2007. This increase in deposits is primarily due to increased sales of the Company's multi-year rate guarantee products. Deposits from the Company's asset accumulation products, consisting of new annuity sales and issuances of funding agreements, are recorded as liabilities rather than as premiums.

Net Investment Income. Net investment income in the second quarter of 2008 was \$60.8 million as compared to \$69.1 million in the second quarter of 2007. This decrease reflects a decrease in the tax equivalent weighted average annualized yield on invested assets to 5.4% for the second quarter of 2008 from 6.3% for the second quarter of 2007. This decrease in yield was primarily due to a lower level of performance of the Company's investments in investment funds organized as limited partnerships and limited liability companies, trading account securities and hybrid financial instruments compared to the second quarter of 2007, which resulted from adverse market conditions for financial assets in the second quarter of 2008. This performance was partially offset by a 3% increase in average invested assets to \$4,771.9 million in the second quarter of 2008 from \$4,622.7 million in the second quarter of 2007.

Net Realized Investment (Losses) Gains. Net realized investment losses were \$19.5 million in the second quarter of 2008 as compared to net realized investment gains of \$0.9 million in the second quarter of 2007. The Company monitors its investments on an ongoing basis. When the market value of a security declines below its cost, the decline is included as a component of accumulated other comprehensive income or loss, net of the related income tax benefit and adjustment to cost of business acquired, on the Company's balance sheet, and if management judges the decline to be other than temporary, the decline is reported as a realized investment loss. In the second quarters of 2008 and 2007, the Company recognized \$(18.1) million and \$(0.5) million, respectively, of losses due to the other than temporary declines in the market values of certain fixed maturity and other securities. The Company's investment strategy results in periodic sales of securities and, therefore, the recognition of realized investment gains and losses. During the second quarters of 2008 and 2007, the Company recognized \$(1.4) million and \$1.4 million, respectively, of net (losses) gains on sales of securities.

The Company may recognize additional losses due to other than temporary declines in security market values in the future particularly if the general market conditions described above were to persist or worsen. See Introduction and Six Months Ended June 30, 2008 Compared to Six Months Ended June 30, 2007 Net Realized Investment (Losses) Gains.

Benefits and Expenses. Policyholder benefits and expenses were \$338.4 million in the second quarter of 2008 as compared to \$326.3 million in the second quarter of 2007. This increase primarily reflects the increase in premiums from the Company's group employee benefit products discussed above. The Company experienced adverse development in the amount of \$6.2 million in the second quarter of 2008 arising from a small number of individual excess workers' compensation claims. While management's analysis indicates that these occurrences are not indicative of a trend, if similar adverse development were to recur in the future, the Company's results of operations in future periods could be adversely affected. Despite these occurrences, the combined ratio (loss ratio plus expense ratio) for group employee benefit products decreased to 91.8% in the second quarter of 2008 from 92.4% in the second quarter of 2007. Amortization of cost of business acquired was decelerated by \$1.1 million during the second quarter of 2008 primarily due to the decrease in the Company's tax equivalent weighted average annualized yield on invested assets. The weighted average annualized crediting rate on the Company's asset accumulation products, which reflects the effect of the first year bonus crediting rate on certain newly issued products, was 4.3% in the second quarters of 2008 and 2007.

Interest Expense. Interest expense was \$7.9 million in the second quarter of 2008 as compared to \$6.5 million in the second quarter of 2007, an increase of \$1.4 million. This increase primarily resulted from interest payments on the 2007 Junior Debentures issued by the Company in the second quarter of 2007.

Income Tax Expense. Income tax expense was \$8.8 million in the second quarter of 2008 as compared to \$18.7 million in the second quarter of 2007 primarily due to the lower level of the Company's operating income. The Company's effective tax rate decreased to 24.7% in the second quarter of 2008 from 30.3% in the second quarter of 2007 primarily due to the proportionately higher level of tax-exempt interest income earned on invested assets.

Liquidity and Capital Resources

General. The Company had approximately \$83.7 million of financial resources available at the holding company level at June 30, 2008, which were primarily comprised of investments in the common stock of its investment subsidiaries, investments in investment funds organized as limited partnerships and limited liability companies and short-term investments. The assets of the investment subsidiaries are primarily invested in investment funds organized as limited partnerships and limited liability companies. Other sources of liquidity at the holding company level include dividends paid from subsidiaries, primarily generated from operating cash flows and investments. The Company's insurance subsidiaries would be permitted, without prior

-20-

regulatory approval, to make dividend payments totaling \$99.5 million during 2008, of which \$1.8 million has been paid to the Company during the first six months of 2008. In general, dividends from the Company's non-insurance subsidiaries are not subject to regulatory or other restrictions. At June 30, 2008, the Company had \$221.0 million of borrowings available under the Amended Credit Agreement. A shelf registration statement is also in effect under which securities yielding proceeds of up to \$106.2 million may be issued by the Company. In addition, the Company is categorized as a well known seasoned issuer under Rule 405 of the Securities Act. As such, the Company has the ability to file automatically effective shelf registration statements for unspecified amounts of different securities, allowing for immediate, on-demand offerings.

The Company's current liquidity needs, in addition to funding its operating expenses, include principal and interest payments on outstanding borrowings under the Amended Credit Agreement and interest payments on the 2033 Senior Notes and 2007 Junior Debentures. The Company has elected to redeem the \$20.6 million principal amount of the junior subordinated deferrable interest debentures underlying the 2003 Capital Securities, and such redemption will occur on August 15, 2008 at a price equal to 100% of the principal amount of the debentures, plus accrued interest. As a result, the \$20.0 million principal amount of the 2003 Capital Securities will cease to be outstanding and dividends on the 2003 Capital Securities will cease to accrue. The Company expects to utilize borrowings under its Amended Credit Agreement and cash on hand to fund such redemption. The maximum amount of borrowings under the Amended Credit Agreement, which expires in October 2011, is \$350.0 million. The 2033 Senior Notes mature in their entirety in May 2033 and are not subject to any sinking fund requirements but are redeemable by the Company at par at any time. The 2007 Junior Debentures will become due on May 15, 2037, but only to the extent that the Company has received sufficient net proceeds from the sale of certain specified qualifying capital securities. Any remaining outstanding principal amount will be due on May 1, 2067. The Company may elect to redeem any or all of the 2007 Junior Debentures at any time. In the case of a redemption before May 15, 2017, the redemption price will be equal to the greater of 100% of the principal amount of the 2007 Junior Debentures being redeemed and the applicable make-whole amount, in each case plus any accrued and unpaid interest. In the case of a redemption on or after May 15, 2017, the redemption price will be equal to 100% of the principal amount of the debentures being redeemed plus any accrued and unpaid interest.

On August 6, 2008, the Company's Board of Directors declared a cash dividend of \$0.10 per share, which will be paid on the Company's Class A Common Stock and Class B Common Stock on September 3, 2008.

The Company and its subsidiaries expect available sources of liquidity to exceed their current and long-term cash requirements.

Share Repurchase Program. On November 7, 2007, the Company's Board of Directors authorized a new share repurchase program under which up to 1,500,000 shares of the Company's Class A Common Stock may be repurchased. This program replaced the share repurchase program previously in effect. On February 22, 2008, the Company's Board of Directors authorized a 1,000,000 share increase in such new share repurchase program and on May 7, 2008, the Company's Board of Directors authorized a further 1,000,000 share increase in such program. Share repurchases are effected by the Company in the open market or in negotiated transactions in compliance with the safe harbor provisions of Rule 10b-18 under the Securities Exchange Act of 1934. Execution of the share repurchase program is based on management's assessment of market conditions for its common stock and other potential uses of capital. During the first half of 2008, the Company repurchased 1,533,800 shares of its Class A Common Stock at a total cost of \$42.7 million with a volume weighted average price of \$27.86 per share. At June 30, 2008, the repurchase of 1,000,000 shares remained authorized under the share repurchase program.

Investments. The Company's overall investment strategy emphasizes safety and liquidity, while seeking the best available return, by focusing on, among other things, managing the Company's interest-sensitive assets and liabilities and seeking to minimize the Company's exposure to fluctuations in interest rates. The Company's investment portfolio, which totaled \$4,769.4 million at June 30, 2008, consists primarily of investments in fixed maturity securities, short-term investments, mortgage loans and equity securities. The Company's investment portfolio also includes investments in investment funds organized as limited partnerships and limited liability companies, trading account securities and hybrid financial instruments, which collectively totaled \$490.7 million at June 30, 2008. During the first half of 2008, the market value of the Company's investment portfolio, in relation to its amortized cost, decreased by

\$162.7 million from year-end 2007, before related increases in the cost of business acquired of \$11.6 million and a decrease in the income tax provision of \$37.2 million. At June 30, 2008, gross unrealized appreciation and gross unrealized depreciation, before the related income tax expense or benefit and the related adjustment to cost of business acquired, with respect to the fixed maturity securities in the Company's portfolio totaled \$47.1 million (of which \$46.3 million was attributable to investment grade securities) and \$265.4 million (of which \$213.6 million was attributable to investment grade securities), respectively. During the first six months of 2008, the Company recognized pre-tax net investment losses of \$25.9 million. The weighted average credit rating of the securities in the Company's fixed maturity portfolio having ratings by nationally recognized statistical rating organizations was AA at June 30, 2008. While ratings of this type address credit risk, they do not address other risks, such as prepayment and extension risks. See Forward-Looking Statements and Cautionary Statements Regarding Certain Factors That May Affect Future Results, and Part I, Item 1A of the 2007 Form 10-K, Risk Factors as supplemented by Part II, Item 1A hereof, for a discussion of various risks relating to the Company's investment portfolio.

-21-

Reinsurance. The Company cedes portions of the risks relating to its group employee benefit products and variable life insurance products under indemnity reinsurance agreements with various unaffiliated reinsurers. The Company pays reinsurance premiums which are generally based upon specified percentages of the Company's premiums on the business reinsured. These agreements expire at various intervals as to new risks, and replacement agreements are negotiated on terms believed appropriate in light of then-current market conditions. The Company currently cedes through indemnity reinsurance 100% of its excess workers' compensation risks between \$10.0 million and \$50.0 million per occurrence, 85% of its excess workers' compensation risks between \$50.0 million and \$100.0 million per occurrence, and 75% of its excess workers' compensation risks between \$100.0 million and \$150.0 million per occurrence. In addition, in March 2008, the Company entered into a ceded reinsurance agreement that provides up to \$10 million of coverage with respect to workers' compensation losses resulting from certain naturally occurring catastrophic events. Effective January 1, 2008, the Company cedes through indemnity reinsurance risks in excess of \$300,000 (compared to \$200,000 previously) per individual and type of coverage for new and existing employer-paid group life insurance policies. Reductions in the Company's reinsurance coverages will decrease the reinsurance premiums paid by the Company under these arrangements and thus increase the Company's premium income, and will also increase the Company's risk of loss with respect to the relevant policies. Generally, increases in the Company's reinsurance coverages will increase the reinsurance premiums paid by the Company under these arrangements and thus decrease the Company's premium income, and will also decrease the Company's risk of loss with respect to the relevant policies.

Cash Flows. Operating activities increased cash by \$162.6 million and \$181.1 million in the first half of 2008 and 2007, respectively. Net investing activities used \$276.5 million and \$168.2 million of cash during the first half of 2008 and 2007, respectively, primarily for the purchase of securities. Financing activities provided \$106.2 million of cash during the first half of 2008, principally from deposits to policyholder accounts. During the first half of 2007, financing activities used \$7.7 million of cash principally for the repayment of outstanding borrowings under the Amended Credit Agreement and for the redemption of the Junior Debentures held by Delphi Funding L.L.C., partially offset by proceeds from the issuance of the 2007 Junior Debentures.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

There have been no material changes in the Company's exposure to market risk or its management of such risk since December 31, 2007.

Item 4. Controls and Procedures

As of the end of the period covered by this report, an evaluation was performed under the supervision and with the participation of the Company's management, including the Company's Chief Executive Officer (CEO) and Senior Vice President and Treasurer (the individual who acts in the capacity of chief financial officer), of the effectiveness of the design and operation of the Company's disclosure controls and procedures (as defined in the rules and regulations of the Securities and Exchange Commission). Based on that evaluation, the Company's management, including the CEO and Senior Vice President and Treasurer, concluded that the Company's disclosure controls and procedures were effective. There were no changes in the Company's internal control over financial reporting during the fiscal quarter to which this report relates that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

Forward-Looking Statements And Cautionary Statements Regarding Certain Factors That May Affect Future Results

In connection with, and because it desires to take advantage of, the "safe harbor" provisions of the Private Securities Litigation Reform Act of 1995, the Company cautions readers regarding certain forward-looking statements in the above Management's Discussion and Analysis of Financial Condition and Results of Operations and elsewhere in this Form 10-Q and in any other statement made by, or on behalf of, the Company, whether in future filings with the Securities and Exchange Commission or otherwise. Forward-looking statements are statements not based on historical information and which relate to future operations, strategies, financial results, prospects, outlooks or other developments. Some forward-looking statements may be identified by the use of terms such as "expects," "believes," "anticipates," "intends," "judgment," "outlook" or other similar expressions. Forward-looking statements are necessarily based upon estimates and assumptions that are inherently subject to significant business, economic, competitive and other

uncertainties and contingencies, many of which are beyond the Company's control and many of which, with respect to future business decisions, are subject to change. Examples of such uncertainties and contingencies include, among other important factors, those affecting the insurance industry generally, such as the economic and interest rate environment, federal and state legislative and regulatory developments, including but not limited to changes in financial services, employee benefit and tax laws and regulations, changes in accounting rules and interpretations thereof, market pricing and competitive trends relating to insurance products and services, acts of terrorism or war, and the availability and cost of reinsurance, and those relating specifically to the Company's business, such as the level of its insurance premiums and fee income, the claims experience, persistency and other factors affecting the profitability of its insurance products, the performance

-22-

of its investment portfolio and changes in the Company's investment strategy, acquisitions of companies or blocks of business, and ratings by major rating organizations of the Company and its insurance subsidiaries. These uncertainties and contingencies can affect actual results and could cause actual results to differ materially from those expressed in any forward-looking statements made by, or on behalf of, the Company. Certain of these uncertainties and contingencies are described in more detail in Part I, Item 1A of the 2007 Form 10-K, Risk Factors, and Part II, Item 1A of this Quarterly Report, Risk Factors. The Company disclaims any obligation to update forward-looking information.

PART II. OTHER INFORMATION

Item 1A. Risk Factors

The following discussion, which supplements the significant factors that may affect our business and operations described in Part I, Item 1A of the 2007 Form 10-K, Risk Factors, updates and supersedes the discussion contained therein under the heading The market values of the Company's investments fluctuate :

The market values of the Company's investments fluctuate.

The market values of the Company's investments vary depending on economic and market conditions, including, among other things, interest rates, and such values can decline as a result of changes in such conditions. Increasing interest rates or a widening in the spread between interest yields available on U.S. Treasury securities and other types of fixed maturity securities, such as corporate debt and mortgage-backed securities, will typically have an adverse impact on the market values of a substantial portion of the fixed maturity securities in the Company's investment portfolio. If interest rates decline, the Company generally achieves a lower overall rate of return on investments of cash generated from the Company's operations. In addition, in the event that investments are called or mature in a declining interest rate environment, the Company may be unable to reinvest the proceeds in securities with comparable interest rates. The Company may also in the future be required to, or determine to, sell certain investments, whether to meet contractual obligations to its policyholders or otherwise, at a price and a time when the market value of such investments is less than the book value of such investments, resulting in losses to the Company. Declines in the fair value of investments below the Company's amortized cost that are considered in the judgment of management to be other than temporary are reported as realized investment losses. See Critical Accounting Policies and Estimates Investments in Part II, Item 7 of the 2007 Form 10-K for a description of management's evaluation process in this regard. Declines that are considered to be temporary are included as a component of accumulated other comprehensive income or loss, net of the related income tax benefit and adjustment to cost of business acquired, on the Company's balance sheet. The Company has experienced and may in the future experience losses from declines in security values that it determines to be other than temporary. Such losses are recorded as realized investment losses in the income statement. See Results of Operations Six Months Ended June 30, 2008 Compared to Six Months Ended June 30, 2007 - Net Realized Investment (Losses) Gains and Liquidity and Capital Resources Investments in Item 2 Management's Discussion and Analysis of Financial Condition and Results of Operations. In addition, the Company invests in certain investment funds organized as limited partnerships and limited liability companies that invest in various financial assets, as well as certain hybrid financial instruments whose return is based upon the return of similar types of limited partnerships and limited liability companies. Investments in such limited partnerships and limited liability companies are reflected in the Company's financial statements under the equity method, and such hybrid financial instruments are carried in the financial statements at fair value. In all of these cases, positive or negative changes in the value of these investments are included in the Company's net investment income. Thus, the Company's results of operations, in addition to its liquidity and financial condition, could be materially adversely affected if the limited partnerships and limited liability companies were to experience losses in the values of their financial assets.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

There were no unregistered sales of equity securities during the period covered by this report.

Issuer Purchases of Equity Securities.

The following table shows the purchases of registered equity securities under the Company's existing repurchase program during the three months ended June 30, 2008:

	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs ⁽¹⁾	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs ⁽¹⁾	Maximum Number of Shares that May Yet Be Purchased Under the Plans or Programs ⁽²⁾
April 1-30, 2008	412,000	\$25.49	412,000	553,200
May 1-31, 2008	553,200	\$27.45	553,200	1,000,000
June 1-30, 2008		\$		
Total	965,200	\$26.61	965,200	1,000,000

(1) As of June 30, 2008, the Company had purchased 7,741,452 shares of its Class A Common Stock, at a total cost of \$187.8 million, in the open market and had previously received 19,764 shares of the Company's Class A Common Stock with an aggregate value of \$0.3 million in liquidation of a partnership interest,

resulting in a total number of shares of treasury stock outstanding on such date of 7,761,216.

- (2) On May 7, 2008, the Board authorized a 1,000,000 share increase in the Company's existing share repurchase program. The program has no expiration date.

Item 3. Legal Proceedings

A putative class action, Moore v. Reliance Standard Life Insurance Company, was filed in the United States District Court for the Northern District of Mississippi in July 2008 against the Company's subsidiary, RSLIC. The action challenges RSLIC's ability to pay certain insurance policy benefits through a mechanism commonly known in the insurance industry as a retained asset account and contains related claims of breach of contract, breach of fiduciary duty and unjust enrichment. While this action is in its preliminary stage, the Company believes that it has substantial defenses to this action and intends to defend it vigorously. Although it is not possible to predict the outcome of any litigation matter with certainty, the Company does not believe that the ultimate resolution of this action will have a material adverse effect on its financial condition.

Item 4. Submission of Matters to a Vote of Security Holders

The Company held its Annual Meeting of Stockholders on May 6, 2008. The directors elected at the meeting will serve for a term ending on the date of the 2009 Annual Meeting of Stockholders. The directors elected at the meeting were Philip R. O Connor, Robert Rosenkranz, Donald A. Sherman, Kevin R. Brine, Lawrence E. Daurelle, Edward A. Fox, Steven A. Hirsh, Harold F. Ilg, James M. Litvack, James N. Meehan, Robert M. Smith, Jr. and Robert F. Wright. In accordance with the Company's Restated Certificate of Incorporation, Mr. O Connor's election was acted upon by the holders of the Company's Class A Common Stock, voting separately as a class.

The voting results for all matters at the meeting were as follows:
