FLEXSTEEL INDUSTRIES, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

FOR THE PERIOD ENDED DECEMBER 31, 2015

The consolidated financial statements included herein have been prepared by Flexsteel Industries, Inc. and Subsidiaries (the “Company” or “Flexsteel”), without audit, pursuant to the rules and regulations of the Securities and Exchange Commission (“SEC”). The information furnished in the consolidated financial statements includes normal recurring adjustments and reflects all adjustments, which are, in the opinion of management, necessary for a fair presentation of such consolidated financial statements. Operating results for the three and six month periods ended December 31, 2015, are not necessarily indicative of the results that may be expected for the fiscal year ending June 1.30, 2016. Certain information and footnote disclosures normally included in the consolidated financial statements prepared in accordance with accounting principles generally accepted in the United States of America (“GAAP”) have been condensed or omitted pursuant to such rules and regulations, although the Company believes that the disclosures are adequate to make the information presented not misleading. Except to the extent updated or described below, the significant accounting policies set forth in Note 1 to the consolidated financial statements in the Company’s Annual Report on Form 10-K for the year ended June 30, 2015, appropriately represent, in all material respects, the current status of accounting policies and are incorporated by reference.

DESCRIPTION OF BUSINESS – Flexsteel Industries, Inc. and Subsidiaries (the “Company”) was incorporated in 1929 and is one of the oldest and largest manufacturers, importers and marketers of residential and commercial upholstered and wood furniture products in the United States. Product offerings include a wide variety of upholstered and wood furniture such as sofas, loveseats, chairs, reclining and rocker-reclining chairs, swivel rockers, sofa beds, convertible bedding units, occasional tables, desks, dining tables and chairs and bedroom furniture. The Company’s products are intended for use in home, office, hotel, healthcare and other commercial applications. A featured component in most of the upholstered furniture is a unique steel drop-in seat spring from which our name “Flexsteel” is derived. The Company distributes its products throughout the United States through the Company’s sales force and various independent representatives.

2.

INVENTORIES

The Company values inventory at the lower of cost or net realizable value. Raw steel is valued on the last-in, first-out (“LIFO”) method. Other inventories are valued on the first-in, first-out (“FIFO”) method. Inventories valued on the LIFO method would have been approximately \$1.3 million and \$1.6 million higher at December 31, 2015 and June 30, 2015, respectively, if they had been valued on the FIFO method. At December 31, 2015 and June 30, 2015, the total value of LIFO inventory was \$3.7 million and \$2.6 million, respectively. A comparison of inventories is as follows:

(in thousands)

	December 31, 2015	June 30, 2015
Raw materials	\$14,311	\$12,663
Work in process and finished parts	7,142	5,772
Finished goods	89,744	95,407
Total	\$111,197	\$113,842

3. FAIR VALUE MEASUREMENTS

The Company's cash, accounts receivable, other current assets, accounts payable and certain accrued liabilities are carried at amounts which reasonably approximate their fair value due to their short-term nature. Generally accepted accounting principles on fair value measurement for certain financial assets and liabilities require that each asset and liability carried at fair value be classified into one of the following categories: Level 1: Quoted market prices in active markets for identical assets and liabilities; Level 2: Observable market based inputs or unobservable inputs that are corroborated by market data; or Level 3: Unobservable inputs that are not corroborated by market data. The Company has not changed its valuation techniques in measuring the fair value of any financial assets and liabilities during the period.

The Company maintains supplemental retirement plans, collectively referred to as the Supplemental Plan, which provides for additional annual defined contributions toward retirement benefits to certain of the Company's executive officers. Funds of the Supplemental Plan are held in a Rabbi Trust. The assets held in the Rabbi Trust are not available for general corporate purposes. The Rabbi Trust is subject to creditor claims in the event of insolvency, but otherwise must be used only for purposes of providing benefits under the plans. As of December 31, 2015, the Company's Supplemental Plan assets, held in the Rabbi Trust, were invested in stock and bond funds and are recorded in the Consolidated Balance Sheets at fair market value. As of December 31, 2015, the Supplemental Plan Assets were \$3.4 million, with \$1.8 million of the Supplemental Plan assets classified as "other current assets" and \$1.6 million as "other assets" in the Consolidated Balance Sheets. As of June 30, 2015, the Supplemental Plan assets were \$3.5 million, with \$1.1 million classified as "other current assets" and \$2.4 million classified as "other assets" in the Consolidated Balance Sheets. These assets are classified as Level 2 in accordance with fair value measurements as described above.

4. CREDIT ARRANGEMENTS

The Company maintains a credit agreement which provides unsecured short-term working capital financing up to \$30.0 million with interest of LIBOR plus 1% (1.43% at December 31, 2015), including up to \$4.0 million of letters of credit. Letters of credit outstanding at December 31, 2015 totaled \$2.3 million. At December 31, 2015, outstanding borrowings were \$5.6 million, which is classified as "notes payable – current" in the Consolidated Balance Sheets, in addition to the aforementioned letters of credit, leaving borrowing availability of \$22.1 million. The credit agreement expires December 31, 2016. At December 31, 2015, the Company was in compliance with all of the financial covenants contained in the credit agreement.

A director of the Company is a director at a bank where the Company maintains an additional unsecured \$10.0 million line of credit, with interest at prime minus 2% (1.50% at December 31, 2015), and where its routine banking transactions are processed. As of December 31, 2015, \$0.3 million was outstanding on the line of credit. This line of credit matures December 31, 2016. In addition, the Supplemental Plan assets, held in a Rabbi Trust, of \$3.4 million are administered by this bank's trust department. The Company receives no special services or pricing on the services performed by the bank due to the directorship of this director.

Fair value of the Company's debt approximates the carrying value.

5. STOCK BASED COMPENSATION

The Company has two stock-based compensation methods available when determining employee compensation.

(1) Long-Term Incentive Compensation Plans

Long-Term Incentive Compensation Plan

The long-term incentive compensation plan provides for shares of common stock to be awarded to officers and key employees based on performance targets set by the Compensation Committee of the Board of Directors (the “Committee”). In December 2013, the Company’s shareholders approved 700,000 shares to be issued under the plan. As of December 31, 2015, 2,594 shares have been issued. The Committee selected fully-diluted earnings per share as the performance goal for the three-year performance periods July 1, 2013 – June 30, 2016 (2014-2016), July 1, 2014 – June 30, 2017 (2015-2017) and July 1, 2015 – June 30, 2018 (2016-2018). Stock awards will be issued to participants as soon as practicable following the end of the performance periods subject to Committee approval and verification of results. The compensation cost related to the number of shares to be granted under each performance period is fixed on the grant date, which is the date the performance period begins.

The Company recorded expense of \$0.2 million and \$0.1 million for the quarters ended December 31, 2015 and December 31, 2014, respectively. For the six month periods ended December 31, 2015 and December 31, 2014, the Company recorded expense of \$0.5 million and \$0.2 million, respectively. If the target performance goals for 2014-2016, 2015-2017 and 2016-2018 would be achieved, the amount of compensation cost recognized over the requisite service periods would be \$1.0 million for each of the three service periods.

2007 Long-Term Management Incentive Plan (2007 Plan)

The plan provided for shares of common stock and cash to be awarded to officers and key employees based on performance targets set by the Compensation Committee of the Board of Directors (the “Committee”). The Company’s shareholders approved 500,000 shares to be issued under the plan. Due to the adoption of the Long-Term Incentive Compensation Plan in December 2013, no additional shares can be awarded under the 2007 Plan. As of December 31, 2015, 240,325 shares have been issued. The Committee selected consolidated operating results for organic net sales growth and fully-diluted earnings per share as the performance goal for the three-year performance periods. Payouts for awards earned in these performance periods were 60% stock and 40% cash. Awards were paid to participants as soon as practicable following the end of the performance periods subject to Committee approval and verification of results. The compensation cost related to the number of shares granted under each performance period was fixed on the grant date, which was the date the performance period began. The short-term portion of the recorded cash award payable is classified within current liabilities, “payroll and related items”, and the long-term portion of the recorded cash award payable is classified within long-term liabilities, “other liabilities” in the Consolidated Balance Sheets. As of December 31, 2015 the Company had no liability outstanding for the plan. As of June 30, 2015, the Company recorded cash awards payable of \$0.7 million within current liabilities. The Company recorded no expense during the three and six months ended December 31, 2015. The Company recorded \$0.5 million and \$0.8 million during the three and six months ended December 31, 2014, respectively.

(2)

Stock Plans

Omnibus Stock Plan

The Omnibus Stock Plan is for key employees, officers and directors and provides for the granting of incentive and nonqualified stock options, restricted stock, restricted stock units, stock appreciation rights and performance units. In December 2013, the Company’s shareholders approved 700,000 shares to be issued under the plan. The options are exercisable up to 10 years from the date of grant. It is the Company’s policy to issue new shares upon exercise of stock options. The Company accepts shares of the Company’s common stock as payment for the exercise price of options. These shares received as payment are retired upon receipt.

At December 31, 2015, 570,562 shares were available for future grants. During the quarter ended December 31, 2015, no expense was recorded related to this plan. During the six months ended December 31, 2015, the Company recorded expense of \$0.2 million related to this plan. During the quarter and six months ended December 31, 2014, the Company recorded expense of \$0.4 million related to this plan.

2002, 2006 and 2009 Stock Option Plans

The stock option plans were for key employees, officers and directors and provided for granting incentive and nonqualified stock options. Under the plans, options were granted at an exercise price equal to the fair market value of the underlying common stock at the date of grant and exercisable for up to 10 years. All options were exercisable when granted. No additional options can be granted under the 2002, 2006 and 2009 stock option plans.

There were no options granted and no expense was recorded under these Plans during the three and six months ended December 31, 2015 and December 31, 2014.

A summary of the status of the Company's stock plans as of December 31, 2015, June 30, 2015 and 2014 and the changes during the periods then ended is presented below:

6. EARNINGS PER SHARE

Basic earnings per share (EPS) of common stock are based on the weighted-average number of common shares outstanding during each period. Diluted earnings per share of common stock include the dilutive effect of potential

Edgar Filing: FLEXSTEEL INDUSTRIES INC - Form 10-Q

common shares outstanding. The Company's potential common shares outstanding are stock options, shares associated with the long-term management incentive compensation plan and non-vested shares. The Company calculates the dilutive effect of outstanding options using the treasury stock method. Anti-dilutive shares are not included in the computation of diluted EPS when their exercise price is greater than the average closing market price of the common shares. The Company calculates the dilutive effect of shares related to the long-term management incentive compensation plan and non-vested shares based on the number of shares, if any, that would be issuable if the end of the fiscal period were the end of the contingency period.

In computing EPS for the quarters and six months ended December 31, 2015 and 2014, net income as reported for each respective period is divided by the fully diluted weighted average number of shares outstanding:

	Three Months Ended		Six Months Ended	
(in thousands)	December 31, 2015	December 31, 2014	December 31, 2015	December 31, 2014

7. LITIGATION

Indiana Civil Litigation – During the quarter ended December 31, 2013, the Company entered into an agreement to settle the Indiana Civil Litigation for \$6.3 million. During the quarter ended December 31, 2015, the Company received \$0.25 million for recovery of litigation settlement costs from insurers. This amount is recorded as “litigation settlement reimbursements” in the Consolidated Statements of Income.

During the quarters ended December 31, 2015 and 2014, the Company recorded \$0.2 million of legal expenses incurred pursuing insurance coverage. During the six months ended December 31, 2015 and December 31, 2014, the Company recorded \$0.2 million and \$0.3 million of legal expenses. These expenses are included in “selling, general and administrative” (SG&A) expense in the Consolidated Statements of Income.

The Company will continue to pursue the recovery of additional defense and settlement costs from insurance carriers. Based on policy language and jurisdiction, insurance coverage is in question. The Iowa District Court dismissed litigation filed by the Company’s insurance carriers in Iowa after the Iowa Court of Appeals found that Indiana law applied to the insurance policies in question and the Iowa Supreme Court denied further review. The dismissal has been appealed by the insurance carriers to the Iowa Supreme Court. Concurrently, coverage litigation is proceeding against the insurance carriers in Indiana.

Other Proceedings – From time to time, the Company is subject to various other legal proceedings, including lawsuits, which arise out of, and are incidental to, the conduct of the Company’s business. The Company does not consider any of such other proceedings that are currently pending, individually or in the aggregate, to be material to its business or likely to result in a material effect on its consolidated operating results, financial condition, or cash flows.

Item 2. Management’s Discussion and Analysis of Financial Condition and Results of Operations

Contractual Obligations

As of December 31, 2015, there have been no material changes to our contractual obligations presented in our Annual Report on Form 10-K for the year ended June 30, 2015.

Outlook

The Company believes that demand for furniture products in the United States is moderating. The prior fiscal year West coast port congestion resulted in lower second quarter net sales and higher net sales in the subsequent quarters as the congestion cleared. As a result, the Company expects moderate top line growth for the balance of the fiscal year. Residential growth is expected to continue with existing customers and products, and through product portfolio and customer base expansion. The Company believes this growth will be led by increased demand for upholstered and ready-to-assemble products. The Company is confident in its ability to take advantage of market opportunities.

The Company continues to proceed on two multi-year initiatives, designed to enhance customer experience and increase shareholder value. The Company continues to execute its logistics strategy and develop its business information system requirements. The timing and level of additional investment required for these initiatives will be evaluated as the projects progress. The Company believes it has adequate working capital and borrowing capabilities to meet these requirements.

The Company remains committed to its core strategies, which include providing a wide range of quality product offerings and price points to the residential and commercial markets, combined with a conservative approach to business. We will maintain our focus on a strong balance sheet through emphasis on cash flow and increasing profitability. We believe these core strategies are in the best interest of our shareholders.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

General – Market risk represents the risk of changes in the value of a financial instrument, derivative or non-derivative, caused by fluctuations in interest rates, foreign exchange rates and equity prices. As discussed below, management of the Company does not believe that changes in these factors could cause material fluctuations in the Company’s results of operations or cash flows. The ability to import furniture products can be adversely affected by political issues in the countries where suppliers are located, disruptions associated with shipping distances and negotiations with port employees. Other risks related to furniture product importation include government imposition of regulations and/or quotas; duties and taxes on imports; and significant fluctuation in the value of the U.S. dollar against foreign currencies. Any of these factors could interrupt supply, increase costs and decrease earnings.

Inflation – Increased operating costs are reflected in product or services pricing with any limitations on price increases determined by the marketplace. Inflation or other pricing pressures could impact raw material costs, labor costs and interest rates which are important components of costs for the Company and could have an adverse effect on our profitability, especially where increases in these costs exceed price increases on finished products.

Foreign Currency Risk – During the six months ended December 31, 2015 and 2014, the Company did not have sales, but has purchases and other expenses denominated in foreign currencies. The market risk associated with currency exchange rates and prices is not considered significant.

Interest Rate Risk – The Company’s primary market risk exposure with regard to financial instruments is changes in interest rates.
