RBS US Large Cap Trendpilot ETN
TRND

Product Detail

The RBS US Large Cap Trendpilot(TM) ETNs are designed for investors who seek exposure to the RBS US Large Cap Trendpilot(TM) Index (USD) (the "Index"). The Index utilizes a systematic trend-following strategy to provide exposure to either the S and P 500[R] Total Return Index (the "Benchmark Index") or the yield on a hypothetical notional investment in 3-month U.S. Treasury bills (the "Cash Rate"), depending on the relative performance of the Benchmark Index on a simple historical moving average basis. If the level of the Benchmark Index is at or above its historical 200-Index business day simple moving average for five consecutive Index business days (i.e., a "positive trend" is established), the Index will track the return on the Benchmark Index, and will have no exposure to the Cash Rate until a negative trend occurs. Conversely, if the level of the Benchmark Index is below such average for five consecutive Index business days (i.e., a "negative trend" is established), then the Index will track the Cash Rate instead of the return on the Benchmark Index and will have no exposure to the Benchmark Index until the next positive trend.

the terms and conditions described in the pricing supplement and prospectus. The amount reflects the Daily Redemption Value at the close of the market on the prior trading day in the United States.

"Shares Outstanding" means to the number of ETN units outstanding at the close of market on the prior trading day in the United States. "Issue Size (USD 000's)" means an amount equal to the Daily Redemption Value multiplied by Shares Outstanding.

"Current RBS Trendpilot Indicator" refers to the trend of the Index. The Index will track the Benchmark Index when it is in a positive trend, and will track the Cash Rate when it is in a negative trend.

CERTAIN RISK CONSIDERATIONS: The RBS ETNs involve risks not associated with an investment in conventional debt securities, including a possible loss of some or all of your investment. The level of the Index must increase by an amount sufficient to offset the aggregate investor fee applicable to the RBS ETNs in order for you to receive at least the principal amount of your investment back at maturity or upon early repurchase or redemption. The Index may underperform the Benchmark Index, and is expected to perform poorly in volatile markets. Liquidity of the market for RBS ETNs may vary over time. The RBS ETNs do not pay interest. Any payment on the RBS ETNs is subject to ability of The Royal Bank of Scotland N.V. (RBS NV), as the issuer, and RBS Holdings N.V., as the guarantor, to pay their respective obligations when they become due. You should carefully consider whether the RBS ETNs are suited to your particular circumstances before you decide to purchase them. We urge you to consult with your investment, legal, accounting, tax and other advisors with respect to any investment in the RBS ETNs.

The RBS ETNs are not suitable for all investors. You should carefully read the
