#### HERCULES REPORTS FIRST QUARTER 2001 RESULTS; CONTINUES PROCESS TO SELL OR MERGE COMPANY

WILMINGTON, DE, MAY 7, 2001 ... Hercules Incorporated (NYSE: HPC) today reported sales for the first-quarter ending March 31, 2001 of \$702 million, down 4% on a comparable basis from the prior year. The company recorded a loss of \$.09 per diluted share in the quarter on a reported and recurring basis. This compares to diluted earnings per share in the first quarter 2000 of \$.34 on a reported basis and \$.35 on a recurring basis.

Earnings during the quarter included a non-cash loss of \$.03 per diluted share from the company's equity interest in C.P. Kelco.

The company reported recurring profit from operations of \$63 million, 34% lower than the same period last year on the same business basis. This reflects the impact of challenging conditions in the chemical industry as well as soft demand in key markets. A number of factors including higher energy, freight and raw material costs, as well as unfavorable foreign currency exchange translation further reduced results.

The slowing worldwide economy particularly impacted Pulp and Paper and Aqualon. However, BetzDearborn delivered results in line with last year's performance and the company's FiberVisions unit reported improved performance.

Thomas L. Gossage, chairman and chief executive officer, said, "Difficult economic forces in the chemical industry and in our businesses continued in the first quarter. Although we are cautious looking forward, we expect business

conditions to improve as the year progresses. To offset higher costs, we are raising prices across our divisions. In addition, we are attacking costs in every operation and maximizing cash flow as we simultaneously move ahead in our efforts to sell or merge the company.

"We closed the sale of the majority of our resins business to Eastman Chemical Company last week. During the first quarter, we also signed a definitive agreement to sell the peroxides business to GEO Specialty Chemicals, Inc. Steps are also well underway to divest our wood rosin and terpenes business," Gossage said.

(continued)

2

"The process to merge or sell the company and its businesses is ongoing," he said. "We are evaluating and pursuing a number of alternatives. Although the timetable has not met our original plans, the process continues to move forward."

Gossage pointed out that cash flow from operating activities, which excludes capital expenditures, was positive for the quarter versus a deficit last year. He described that as "strong performance given the difficult operating environment for the industry and Hercules." Effective steps to improve cash included trimming of capital expenditures, active management of working capital, a company-wide restriction on hiring, and a firm hold on all discretionary expenses. Interest expense and preferred security distributions rose \$15 million in the quarter as a result of higher interest rates as compared to the first quarter 2000.

# SEGMENT AND REGIONAL RESULTS

In the Process Chemicals Segment, sales in the first quarter were down 2% and profit from operations declined 18% versus the same quarter 2000. The Pulp and Paper Division was hurt by weak demand in the North American and European markets. In North America, industry production of paper and paperboard declined 10% in the quarter. Volumes for Hercules Pulp and Paper Division were off 4% from last year's first quarter.

BetzDearborn, also part of Process Chemicals, reported sales and profit from operations essentially even with last year's results. Higher costs borne by this division for freight and utility charges were offset by improved pricing, a 4% rise in volumes and positive changes in product mix.

In the Functional Products Segment, first quarter sales and profit from operations, excluding the divested food gums and nitrocellulose businesses, were down 4% and profit from operations fell 38% compared to the same quarter 2000. Slower sales in emerging international regions and to the U.S. paint market were only partially offset by strong sales to the oilfield sector and to a rebounding construction market in Europe. Higher raw material and energy costs impacted results during the quarter. In addition, we had additional costs during the quarter as we commissioned our new methylcellulose facility in Belgium. Overall,

on the same business basis, Aqualon's volumes rose 1% in the quarter versus a year ago.

In the Chemical Specialties Segment, sales dropped 7% in the first quarter versus the same period a year ago, although profits from operations increased 6% compared to the first quarter 2000. Higher pricing and lower overhead expenses led to this improvement, despite being partially offset by higher costs for raw materials and energy. FiberVisions volumes were lower as this unit exited a number of lower margin textile sectors.

(continued)

3

Within this segment, on May 1st, the company closed the sale of its hydrocarbon resins and portions of its rosin resins business to Eastman. Also, the peroxides sales to GEO and the auction of wood rosins and terpenes businesses are progressing.

In the company's largest market, North America, sales declined 3%. In Europe, sales fell 4%; in the emerging markets of Latin America and Asia Pacific, sales in the quarter fell 4% and 6%, respectively.

<sup>(</sup>A) Effective with the second quarter 2000, we changed our policy regarding the classification of shipping and handling expenses. Accordingly, net sales and cost of sales for the first quarter 2000 have been restated to reflect this change for purposes of comparability. There is no impact on profit from operations as a result of this change.

<sup>(</sup>B) Calculated as profit from operations plus depreciation and amortization, net of amortization of debt issuance costs.
