PATHFINDER BANCORP, INC. ANNOUNCES FIRST QUARTER EARNINGS

Oswego, New York, May 5, 2005 Pathfinder Bancorp, Inc., the mid-tier holding company of Pathfinder Bank, (NASDAQ SmallCap Market; symbol: PBHC, listing: PathBcp) announced reported net income of \$149,000, or \$0.06 per share, for the three months ended March 31, 2005 as compared to \$323,000, or \$0.13 per share for the same period in 2004.

"Strong deposit growth, soft loan demand, and a flattening yield curve have combined to further compress net interest rate spread and reduce earnings", according to Thomas W. Schneider, President and Chief Executive Officer. "Deposit growth of 4% during the first quarter, and some significant loan payoffs in the commercial portfolio, led to excess liquidity throughout much of the quarter. Most of this liquidity was placed into short-term securities at

## Edgar Filing: PATHFINDER BANCORP INC - Form 8-K

low yield levels as we expect loan demand to accelerate during the spring and summer months."

"Expense increases associated with an expanding commercial lending sales force, information services upgrades and internal training programs also contributed to a decline in net earnings over the prior quarter and the prior year", stated Schneider.

"Lower charge-offs, improved asset quality and higher revenue from fees offset some of the adverse impact from lower margins and higher expenses. We expect fee income to continue to grow and margins to improve from a better asset mix during the next quarter. The addition of a new branch scheduled to open in the latter part of the second quarter will decrease earnings on a net basis over the near term."

Net interest income for the three months ended March 31, 2005, remained relatively constant at \$2.2 million when compared to the same period during 2004. Interest income increased \$137,000, or 4%, offset by increased interest expense of \$142,000, or 10%. Net interest rate spread decreased to 3.06% for the first quarter of 2005 from 3.23% for the same period in 2004. Average interest-earning assets increased 6% to \$280.2 million at March 31, 2005 as compared to \$264.7 million at March 31, 2004, while the yield on those assets decreased 8 basis points to 5.34% compared to 5.42% for the same period in 2004. The increase in average earning assets is primarily attributable to a \$16.1 million increase in average investment securities and a \$2.3 million increase in average interest earning deposits, offset by a decrease in average net loans receivable of \$3.0 million. Average interest-bearing liabilities increased \$15.9 million and the cost of funds increased 8 basis points to 2.27% from 2.19% for the same period in 2004. The increase in the average balance of interest-bearing liabilities resulted primarily from a \$22.3 million growth in average deposits. The growth in deposits primarily resulted from the Company's focus on attracting new municipal deposit customers, as well as expansion of our retail deposit base.

Provision for loan losses for the quarter ended March 31, 2005 decreased to \$72,000 from \$188,000 for the same period in 2004, primarily as a result of a decrease in non performing loans and total loans. The Company's ratio of allowance for loan losses to period end loans has increased to 1.01% at March 31, 2005 from 0.98% at December 31, 2004. Nonperforming loans to period end loans has decreased to 0.94% at March 31, 2005 from 0.99% at December 31, 2004.

Other income, net of gains and losses from the sale of securities, loans and other real estate, increased 13% to \$501,000 for the quarter ended March 31, 2005 compared to \$444,000 for the same period in the prior year. The increase in other income is primarily attributable to a \$39,000 increase in service charges on deposit accounts and a \$22,000 increase in other charges commissions and fees. Net gains and losses from the sale of securities, loans and foreclosed real estate decreased \$246,000 to a net loss of \$12,000 for the quarter ended March 31, 2005 compared to a net gain of \$234,000 for the same period in the prior year.

Other expenses increased 8% to \$2.4 million for the quarter ended March 31, 2005, when compared to the same period in the prior year. The increase in other expenses was primarily due to an \$82,000 increase in data processing expenses, a \$61,000 increase in salary and employee benefits, a \$43,000 increase in professional and other expenses and an \$18,000 increase in other expenses. These increases were partially offset by a \$34,000 decrease in building occupancy expenses. The increase in data processing expenses was primarily due to software purchases and related annual maintenance charges, along with increased internet banking and check processing charges. The increase in professional and other services primarily resulted from costs associated with a leadership
