Company Press Release

CNOOC Limited Reported Offshore China Production Growth for Q1

(Hong Kong, 29 April 2004) CNOOC Limited (the "Company" or "CNOOC Ltd."; NYSE "CEO", SEHK "883") today reported a 7.2% increase in oil and gas production offshore China in the first quarter of 2004 as compared to the same period last year, reaching 314,382 barrels of oil equivalent (boe) per day. Crude oil and liquids production was 273,054 barrels per day and natural gas production was 237 million cubic feet per day. The increase was largely due to an 11.8% increase in crude oil and liquids production in the Eastern South China Sea and a 98.1% increase in natural gas production in the Western South China Sea.

In the first quarter of 2004, overseas assets recorded a total working interest production of 9.1 mmboe and EBITDE of RMB627.8 mm (US\$75.8 mm), stronger than what was expected. Reported net entitlement production for the Company was 362,672 barrels of oil equivalent (boe) per day. Crude oil and liquids production and natural gas production were 306,980 boe per day and 323 mmcf per day, respectively.

Total unaudited revenues were RMB7.78 billion (US\$940.2 million) for the first quarter of 2004, representing a 3.8% increase from the first quarter of 2003. The revenue growth was a result of higher production volume, which was partially offset by the slight decrease in realized oil and gas prices. The average realized oil and gas prices for the first quarter were US\$29.79 per barrel and US\$2.8 per thousand cubic feet, respectively. "This quarter's production growth offshore China was encouraging. The key value driver for overseas operations, cash flow, performed better than expected. We had a good start," commented Mr. Fu Chengyu, Chairman and Chief Executive Officer, "We are however not relaxing."

"Offshore China costs were under effective control in the first quarter of 2004. We will continue to manage our costs closely. Production offshore China is back-loaded this year, some costs components are expected to increase as well," said Mark Qiu, Chief Financial Officer.

WZ 12-1N came on stream earlier this year with an estimated peak production of 14,400 boe per day. CNOOC Limited confirmed a number of discoveries in Bohai Bay. "It was another solid quarter, all 13 major development projects are progressing on track. We expect to meet our key operating targets for the year," commented Mr. Zhou Shouwei, President of the Company.

In February, the Company acquired additional equity interest in the Tangguh LNG Project in Indonesia. As a result, CNOOC's stake in the project increased from 12.5% to 16.96%.

Notes to Editors:

CNOOC LIMITED - BACKGROUND

Incorporated in Hong Kong in August 1999, CNOOC Limited (SEHK: 883; NYSE: CEO) is the dominant producer of crude oil and natural gas offshore China. CNOOC Limited is also one of the largest independent crude oil and gas exploration and production companies in the

world.

Edgar Filing: CNOOC LTD - Form 6-K

As of December 31, 2003, its net proved reserves were 2.1 billion barrels-of-oil equivalents and its net production averaged 356,729 BOE per day.

CNOOC Limited is currently engaged in exploration, development and production in four major areas offshore China, which cover Bohai Bay, Western South China Sea, Eastern South China Sea and East China Sea. The Company is also one of the largest offshore crude producers in Indonesia.

The Company has about 2,447 employees.

CNOOC LIMITED -RELATIONSHIP WITH ITS PARENT COMPANY

CNOOC Limited, incorporated in Hong Kong, is a 70.6% held subsidiary of China National Offshore Oil Corporation ("CNOOC"). CNOOC Limited is the sole vehicle through which CNOOC carries out oil and gas exploration, development, production and selling activities offshore China and internationally.

CNOOC, the parent company, is involved in the administrative, research, and services functions for the China offshore petroleum industry as well as other mid- or downstream petroleum projects.
