SEMIANNUAL REPORT

MARCH 31, 2001

To our Shareholders:

At quarter-end on March 31, 2001, the net asset value of your Fund was \$26.34 per share. Performance data for the fiscal year and the quarter ended March 31 compared to the indices is as follows:

	FISCAL YEAR TO DATE 9/30/00 - 3/31/01 -----	QUARTER ENDED 3/31/01 -----
Net Asset Value	-35.2%	-20.7%
Dow Jones Industrial Average	-7.3%	-8.4%
NASDAQ Industrials	-39.9%	-17.1%
Russell 2000	-13.6%	-6.8%

The collateral damage to other over-the-counter stocks from the declines in electronic and e-trade equities in the quarter ended March 31 is reflected in these performance data. Of some encouragement is the somewhat improved performance of healthcare stocks relative to the NASDAQ index toward the end of the quarter.

The overall state of the economy and the levels of common stock valuation seem to us to still be fragile. For example, consumer sentiment polls seem to present a positive outlook. That seems inconsistent with the fact that almost every announcement of corporate earning disappointment is coupled with a layoff announcement. Under such conditions, how long are consumers going to continue to spend beyond their incomes? Corporate and consumer debt are at record levels.

Edgar Filing: H&Q HEALTHCARE INVESTORS - Form N-30D

The Federal Reserve Board appears convinced that the wealth effect of the level of the stock market has to be sustained by lower interest rates to assure continued consumer confidence. While consumers are roughly two-thirds of the economy, it is troubling that the capital expenditure portion of the economy (and electronic equipment, computers, communications equipment, semi-conductors etc. are cyclically sensitive capital items) is in apparent recession. Perhaps we, as a country, have over the last several years added all the productivity that we can utilize until the next major technology product cycles come along.

We are, therefore, concerned about the general valuation levels of the market and, from our experience, believe that there is no way even a specialized portfolio such as your Fund's can be totally immune to the effects of any future general decline in the

1

overall market. Accordingly, we are maintaining a larger than historic liquid asset position in anticipation of future opportunities to purchase good companies at depressed valuations in this sector. We believe the portfolio companies currently held already represent value at the current price levels of their stocks, especially in view of our expectations of their fundamental outlook.

We continue to believe that it is important to keep in mind the differences in the long-term business models of the companies meeting the investment objectives of your Fund as compared to other types of "technology". While the development risks are high and attainment of FDA market approvals are a challenge, patent positions are generally more enforceable and product life cycles, especially in therapeutic products, are much longer. Market demand for approved products that improve the human condition usually is very responsive soon after introduction.

In the quarter, our venture investment activity included follow-on commitments in Ceres, CytoLogix, KVM Technologies and Sontra Medical. The Fund also made new private investments in two public companies, ENDOCARDIAL SOLUTIONS and ORTHOVITA, at discounts to their public market prices and in one new private company, Novacept. NOVACEPT has an innovative minimally invasive catheter system to treat excessive menstrual bleeding that appears to be a dramatic improvement over currently available therapies for a large patient population.

In no way are our expectations diminished that the future value creation from the inventions in biotechnology and genomics, instrumentation and devices and the growth of the healthcare sector will lead to vast improvements in the span and quality of life and present significant investment opportunities in the future.

H&Q HEALTHCARE INVESTORS

NOTES TO FINANCIAL STATEMENTS
March 31, 2001
(UNAUDITED)

(1) ORGANIZATION

H&Q Healthcare Investors (the Fund) is a Massachusetts business trust registered under the Investment Company Act of 1940 as a diversified closed-end management investment company. The Fund's investment objective is long-term capital appreciation through investment in securities of companies in the healthcare industries. The Fund invests primarily in securities of public and private companies that are believed to have significant potential for above-average growth. The Fund was organized on October 31, 1986 and commenced operations on April 22, 1987.

The preparation of these financial statements requires the use of certain estimates by management in determining the entity's assets, liabilities, revenues and expenses. Actual results could differ from these estimates. The following is a summary of significant accounting policies consistently followed by the Fund, which are in conformity with those generally accepted in the investment company industry.

INVESTMENT SECURITIES

Transactions related to the investments of the Fund are recorded on the date the securities are purchased or sold. Investments traded on national securities exchanges or in the over-the-counter market that are National Market System securities are valued at the last sale price or, lacking any sales, at the mean between the last bid and asked prices. Other over-the-counter securities are valued at the most recent bid prices as obtained from one or more dealers that make markets in the securities. As indicated in Note 5, investments for which market quotations are not readily available are valued at fair value as determined in good faith by the Board of Trustees of the Fund. Temporary cash investments with maturities of 60 days or less are valued at amortized cost.

Gains and losses from sales of investments are recorded using the "identified cost" method for both financial reporting and Federal income tax purposes. Investment income and expenses are recorded on the accrual basis.

FEDERAL INCOME TAXES

It is the Fund's policy to comply with the requirements of the Internal Revenue Code applicable to regulated investment companies and to distribute to its shareholders substantially all of its taxable income and its net realized capital gains, if any. Therefore, no Federal income tax provision is required.

DISTRIBUTIONS

The Fund records all distributions to shareholders from net investment income and realized gains on the ex-dividend date. Such distributions are determined in conformity with income tax regulations. Due to permanent

Edgar Filing: H&Q HEALTHCARE INVESTORS - Form N-30D

book/tax differences in accounting for certain transactions, certain distributions may be treated as distributions from capital as opposed to distributions of net investment income or realized capital gains.

DISTRIBUTION POLICY

The current distribution policy is to declare distributions in stock. Stock distributions will automatically be paid in newly issued shares of the Fund unless otherwise instructed by the shareholder. The shares will be valued at the lower of net asset value or market price on the pricing date. The Fund has implemented a fixed distribution policy that permits the Fund to make quarterly distributions at a rate of 2% of the Fund's net assets to shareholders of record. The Fund intends to use net realized capital gains when making quarterly distributions. This

14

H&Q HEALTHCARE INVESTORS

NOTES TO FINANCIAL STATEMENTS

March 31, 2001

(continued)

could result in a return of capital to shareholders if the amount of the distribution exceeds the Fund's net investment income and realized capital gains. It is anticipated that net realized capital gains in excess of the total distributed under this policy would be included in the December distribution.

If a distribution were to be declared in cash, it would then be subject to the Dividend Reinvestment Plan. Under the Dividend Reinvestment Plan, distributions will automatically be paid in additional shares of the Fund, unless State Street Bank is otherwise instructed.

Shareholders may request to be paid in cash instead of shares by responding to the bank, brokerage or nominee who holds the shares if the shares are in "street name" or by filling out a form received from State Street Bank if the shares are in registered form.

(2) PURCHASES AND SALES OF INVESTMENT SECURITIES

The aggregate cost of purchases and proceeds from sales of investment securities (other than temporary cash investments) for the period from October 1, 2000 through March 31, 2001 totaled \$27,684,259 and \$60,508,953, respectively.

(3) TAX BASIS OF SECURITIES

At March 31, 2001, the total cost of securities for Federal income tax purposes was \$156,666,722. The aggregate gross unrealized gain on securities in which there was an excess of market value over cost was \$132,416,394. The aggregate gross unrealized loss on securities in which there was an excess of cost over market value was \$28,895,378. The net unrealized gain on securities held by the Fund was \$103,521,016.

(4) ADVISORY AGREEMENT

The Fund has entered into an Investment Advisory Agreement (the Advisory Agreement) with Hambrecht & Quist Capital Management Incorporated (the Adviser). Pursuant to the terms of the Advisory Agreement, the Fund pays the

Edgar Filing: H&Q HEALTHCARE INVESTORS - Form N-30D

Adviser a monthly fee at the rate when annualized of (i) 2.5% of the average net assets for the month of its venture capital and other restricted securities up to 25% of net assets and (ii) for the month, for all other assets, 1.0% of the average net assets up to \$250 million, 0.9% of the average net assets for the next \$250 million, 0.8% of the average net assets for the next \$500 million and 0.7% of the average net assets thereafter. The aggregate fee may not exceed a rate when annualized of 1.375%. Certain officers and Trustees of the Fund are also officers of the Adviser. The Adviser is an indirect wholly owned subsidiary of J.P. Morgan Chase & Co.

(5) VENTURE CAPITAL AND OTHER RESTRICTED SECURITIES

The Fund may invest in venture capital and other restricted securities if these securities would currently comprise 40% or less of net assets. The value of these securities represents 23.1% of the Fund's net assets at March 31, 2001.

The value of the venture capital and other restricted securities is determined in good faith by the Board of Trustees. However, because of the inherent uncertainty of valuations, these estimated values may differ significantly from the values that would have been used had a ready market for the securities existed, and the differences could be material. The following table details the acquisition date, cost, carrying value per unit, and value of the Fund's venture capital and other restricted securities at March 31, 2001, as determined by the Board of Trustees of the Fund.
