Switzerland

MEDIA RELEASE COMMUNIQUE AUX MEDIAS MEDIENMITTEILUNG

Novartis reports strong operating performance as 9-month 2002 sales climb 11% in local currencies

Group sales up 11% in local currencies (4% in CHF) driven by strong growth in Pharmaceuticals and Generics

Pharmaceuticals outperforms industry average in all major markets throughout 2002, delivering sales growth of 13% in local currencies (+5% in CHF), driven by the cardiovascular and oncology franchises

Operating income continues to grow at double-digit rate (+11%)

Net income up 4%, reflecting strong operating performance and an attractive level of financial income despite continued difficult market conditions

Earnings per share rose 6%, supported by share repurchase program

Switch to reporting in US dollars foreseen as of first quarter 2003

PRESS BRIEFING: 08.00 EST (14.00 CET) by internet and phone see www.novartis.com

Phone-in: US +1412 858 46 00; Europe & elsewhere +41 91 610 41 35

Basel, 17 October 2002 Referring to the business results published by Novartis AG (NYSE: NVS) today, Dr. Daniel Vasella, Chairman and CEO, commented: "Our strong results were mainly driven by the performance of our Pharmaceuticals business, which gained market share based on the expansion of our cardiovascular and oncology franchises. The introductions of innovative products, such as *Gleevec* and *Zometa*, for cancer patients, and *Zelnorm* and *Elidel* will help support the pace of growth, while we continue to invest heavily in Research and Development focussing on our long-term future"

Novartis currently generates 43% of its sales in the US, which continues to be the world's largest and fastest growing pharmaceutical market. To better reflect the performance and to lessen the impact of currency volatility, the Group foresees reporting its financial results in US dollars beginning with the first quarter results in 2003.

Group sales up 11% to CHF 24.2 billion (USD 15.3 billion)

Group nine-month sales rose 11% in local currencies (4% in CHF), with a third-quarter increase of 10% in local currencies (-2% in CHF) above the high levels achieved last year. Strong volume increases, especially in Pharmaceuticals and Generics, contributed 10 percentage points to sales growth, more than offsetting the negative currency impact of 7 percentage points due to the strength of the Swiss franc. The remaining one percentage point of sales growth came from price increases.

Operating income rises 11% to CHF 5.9 billion (USD 3.7 billion)

Investments were stepped up in Research & Development as well as in Marketing & Distribution to support product launches and key growth drivers. Overall, based on productivity gains and improvements in the product mix, expenses increased at a slower rate than sales, with the result that operating income climbed 11% in Swiss francs to CHF 5.9 billion (USD 3.7 billion).

Net income rises 4% to CHF 5.6 billion (USD 3.5 billion)

The strong operating performance coupled with an attractive level of net financial income (CHF 836 million; USD 529 million), achieved in a difficult environment, lifted nine-month net income 4% in Swiss francs to CHF 5.6 billion (USD 3.5 billion). Taxes amounted to CHF 1.2 billion (USD 730 million), corresponding to a tax rate of 17.0% (17.7% in the prior year).

Outlook 2002 (barring any unforeseen events)

Novartis expects good sales growth for the full year, driven by Pharmaceuticals. Based on the sales growth of key brands, supported by new product introductions, the Group expects to meet its full-year target for Pharmaceuticals sales growth of about 10% in local currencies.

As previously forecast, the sustained strength of the Swiss franc against the US dollar and the Japanese yen will have a significant impact on Novartis' full-year results, although this will be softened because transactional exposures in US dollars and Japanese yen for the current year have been fully hedged.

Edgar Filing: NOVARTIS AG - Form 6-K

Net financial income, which is difficult to predict in the prevailing environment, is expected to be slightly lower than last year's record level.

Barring any unforeseen events, both operating and net income are expected to exceed the previous year's levels.

1

Including Health & Functional Food

Pharmaceuticals

Sales

Edgar Filing: NOVARTIS AG - Form 6-K

Novartis' core Pharmaceuticals business increased sales by 13% (5% in CHF) to CHF 15.7 billion (USD 9.9 billion) in the first nine months and 10% (-1% in CHF) in the third quarter, with dynamic momentum in the key cardiovascular and oncology businesses, where *Diovan*, *Lotrel*, *Glivec/Gleevec*, *Zometa* and *Sandostatin* are the main growth drivers.

5

The successful introduction of new products, such as *Elidel*, *Zometa* and *Zelnorm*, a new strength of *Lotrel*, new indications for *Visudyne*, and the increasing popularity of *Lescol* all contributed to lifting sales. Double-digit sales growth was achieved in all regions, including Japan (+14%) despite government mandated price decreases. In Europe, strong performances in France and Spain offset the effects of pricing pressures in several countries, mandatory generic substitution in Germany and the effects of parallel imports both in Germany and the UK.

Operating income

Pharmaceuticals' operating income climbed 9% to CHF 4.5 billion (USD 2.9 billion) in the first nine months. As a percentage of sales, the cost of goods sold improved slightly due to product mix changes and productivity gains. Marketing & Distribution investments increased as a percentage of sales to drive the introduction of *Elidel* and the launch of *Zelnorm* in the US. Implementation of the new research strategy and the establishment of the new Boston facility led to a 4% increase in Research & Development investments, which remained at 17% of sales.

Highlights

Primary Care

Diovan/Co-Diovan (+52%, US: +48%; hypertension) further extended its category leadership in the US to more than 38% of new prescriptions. In August, Novartis' flagship antihypertensive became the first and only drug of its kind to receive approval for treatment in heart failure. A new higher dose (160/25) formulation of Co-Diovan was launched in the US adding to the broad choice and flexibility for patients and physicians.

Lotrel (US: +39%; hypertension), also extended its share of new prescriptions. A new formulation (10 mg amlodipine + 20 mg benazepril HCl) was launched in July and has been well received by physicians and patients, reflecting the fact that 90% of Lotrel patients achieve their blood pressure goal with the additional benefits of an ACE inhibitor.

Lescol (+22%, US: +19%; cholesterol reduction) sales grew dynamically in Europe and strongly in other regions, reflecting the drug's particularly favorable risk/benefit profile and convenient XL extended-release formulation. In August, a new indication in angioplasty patients was filed for regulatory approval in the US.

Lamisil (0%, US: -8%; fungal infections) sales dropped in the US, owing to the declining onychomycosis market.

Elidel (eczema) has now been launched in 23 countries, including the US, and has completed the mutual recognition procedure in Europe. Sales to the end of September reached CHF 88 million (USD 56 million). Within just six months, this highly effective, non-steroid cream has become the number-one branded topical treatment for eczema in the US, where it has captured 55% of new prescriptions.

Exelon (+20%, US: +20%; Alzheimer's disease) continued to post good sales growth as new marketing initiatives are instigated to counter increased competition in its fast-growing segment. Studies have revealed that Exelon inhibits an additional enzyme (butyrylcholinesterase) that causes neurological dysfunction in Alzheimer's disease. Based on these findings an expansion of the product's labeling has been approved in Europe to include its unique dual inhibition properties.

Zelmac/Zelnorm (constipation related irritable bowel syndrome) has now gained approval in 23 countries and the US launch is under way following approval in July. With progress being made on reimbursement, sales this year reached CHF 55 million (USD 35 million). Marketing investments over the third and fourth quarters for the launch of *Zelnorm* in the US are estimated at CHF 200 million (USD 127 million).

6

Oncology

Edgar Filing: NOVARTIS AG - Form 6-K

Novartis Oncology gained further market share and posted strong sales growth of +27% in local currencies (+19% in CHF). In the oncology segment, Novartis now ranks as the third largest and fastest growing of the world's top-five oncology companies.

Glivec/Gleevec, for treating certain forms of chronic myeloid leukemia (CML) and gastrointestinal stromal tumors (GIST), continued to bring benefits to thousands of patients in more than 80 countries. Exceeding expectations, nine-month sales topped CHF 661 million (USD 418 million). Major progress was achieved on reimbursement, especially in the UK, Australia and New Zealand. The application for approval as first-line treatment has been granted priority review in the US and has already received a positive opinion from the CPMP in Europe.

Zometa (complications of a broad range of cancers), the more potent and convenient successor to *Aredia*, achieved sales of CHF 505 million (USD 320 million), making it the world's leading bisphosphonate. The bone metastases indication was approved in Europe in July for a broad range of cancer settings, following US approval earlier this year.

Aredia (bone metastases; -60%; US: -78%) sales reflect the anticipated competition from multiple generic entrants in several markets and the impact from the launch of Zometa.

Femara, the first-line therapy for advanced breast cancer in postmenopausal women, posted a 43% (US: +66%) rise in sales to CHF 199 million (USD 126 million). *Femara* is the US leader in the first-line metastatic cancer setting.

Sandostatin continues to post substantial double-digit growth, with sales up 24% (US: +37%) to CHF 719 million (USD 455 million) driven by continued market penetration of the convenient, long-acting, once-a-month "LAR" formulation.

Ophthalmics

Ophthalmics' sales rose 13% local currencies (5% in CHF), driven by *Visudyne*.

Visudyne (+29%; US: +23%; treatment in macular degeneration) sales topped CHF 332 million (USD 210 million). *Visudyne* therapy has now been approved in more than 65 countries for its main indication and in more than 40, including the EU, US and Canada, for additional indications. EU approval for use in occult age-related macular degeneration was granted in August.

Transplantation

Nine-month sales were down just 2% in local currencies (-9% in CHF). Generics and branded competitor products had limited impact on the *Neoral* franchise, owing to the importance of avoiding fluctuations in drug concentrations in patients who are stable and doing well on *Neoral*.

Sales of *Neoral/Sandimmun*, the cornerstone of immunosuppression, (-4%; US: -9%) were underpinned by market share gains in Japan, which partly offset price pressures and generic erosion in other regions.

Simulect, the induction immunosuppressant designed to complement *Neoral*, posted a 24% rise in sales (US: +10%) following its successful launch in Japan and continued market segment share gains from established competitor brands in most regions.

Mature Products

The mature brands continued to report only a modest decline in overall sales as a result of focused investments on selected key products and markets.

Voltaren (-4%, anti-inflammatory) continued to compete well against generics and the COX-2 inhibitor class of drugs. The product gained a lift from the launch of the migraine indication in Germany.

Generics

Sales

Edgar Filing: NOVARTIS AG - Form 6-K

Generics' sales jumped 24% in local currencies (15% in CHF) to CHF 2.0 billion (USD 1.3 billion), driven by increased volumes, while prices eroded by 2%. The performance was led by sales growth in the US, supported by new product launches and expansion into new markets.

The retail business with finished forms continued to post exceptionally strong gains with nine-month sales up more than 30%, due to the US performance and the July launch of Geneva's generic form of the anti-infective Augmentin®. Sales were also fuelled by recently introduced products, including mefloquine (malaria), nabumetone (inflammation), metformin (diabetes), and fluoxetine (depression). Dynamic sales were also posted in Europe, particularly in the UK, France, and the Netherlands, due to the success of the ulcer treatment omeprazole.

The industrial business was lifted by sales of high-value compounds under third-party manufacturing contracts in the early part of the year and was again driven by continued strong sales of bulk antibiotics and the penicillin franchise.

In August, Novartis announced a friendly take-over bid for Lek, Slovenia's leading drug-maker. The offer price of 95 000 Slovenian Tolars per share implies a market capitalization for Lek of about CHF 1.2 billion. The offer expires on 28 October 2002.

Operating income

Operating income soared 40%, fuelled by top-line growth, productivity gains and a stronger focus on higher margin products. Although regional sales forces were expanded and new markets entered, Marketing & Distribution expenses were reduced as a percentage of sales. Research & Development investments increased 9% to CHF 143 million to fund the new R&D center in Vienna. The positive trend of sales and functional costs, and the non-recurrence of acquisition-related costs last year, lifted the operating margin 2.6 percentage points to 14.5%.

OTC

Sales

OTC (over-the-counter medicines) sales reached CHF 1.8 billion (USD 1.1 billion).

Excluding terminated, acquired and transferred (*Denavir*) businesses, underlying sales grew 4% in local currencies, driven by the key brands *Nicotinell/Habitrol* (smoking cessation), *Lamisil* (antifungal), *Otrivin* (nasal decongestant). The growth of these products compensated for the weak cough and cold season in the US earlier this year and a drop in calcium sales resulting from reimbursement issues in Europe.

Operating income

Operating income dropped 8% to CHF 255 million (USD 161 million), as a result of lower volumes and increased General & Administration expenses due primarily to the Divisional reorganization announced in February. These were partially offset by reduced Marketing & Distribution expenses. The operating margin eased down just 0.4 percentage points to 14.5%.

Animal Health

Sales

With nine-month revenues up 12% in local currencies (4% in CHF) to CHF 0.7 billion (USD 0.5 billion), Animal Health outpaced its market. US sales grew strongly, supported by the acquired vaccine businesses, which contributed 5 percentage points to the Business Unit's sales growth.

The companion animal franchise was driven by strong sales of the key brands *Interceptor* (worm treatment), *Sentinel* (combined worm and flea treatment) and *Fortekor* (cardio-renal drug). A number of new products were launched in key markets in the third quarter, including *Atopica*, a novel treatment for atopic dermatitis in dogs, *Deramaxx*, a novel COX2 inhibitor product for pain control in dogs, and *Milbemax*, a worm treatment for cats and dogs.

The farm animal franchise benefited from the recovery from the UK foot and mouth epidemic and continued to grow dynamically, led by the therapeutic anti-infectives.

Edgar Filing: NOVARTIS AG - Form 6-K

The vaccines and aquahealth franchise posted a strong rise in sales and now represents 8% of the Business Unit's revenues.

Operating income

Nine-month operating income jumped 28% to CHF 123 million (USD 78 million), leading to an operating margin of 16.5%. Apart from acquisition-related charges, operating costs were reduced significantly as Marketing & Distribution investments were focused on key new launches, whilst Research & Development investments were maintained as a percentage of sales.

Medical Nutrition and Health & Functional Food (HF&F)

Sales

Combined Medical Nutrition and Health & Functional Food (HF&F) sales grew 3% in local currencies (-2% in CHF) to CHF 1.1 billion (USD 0.7 billion).

Boosted by a particularly strong third quarter, Medical Nutrition posted a high single digit rise in nine-month sales, led by the strong performance of Enteral Nutrition (*Isosource* and *Novasource*). Additional sales impetus came from the Medical Food franchise (*Resource*), which continued to benefit from the expansion of the home-care channel.

In HF&F, sales growth from the core-brands offset the impact of distributor changes in China and Italy, while Sports Nutrition sales were lifted by the introduction of *Isostar "Fast Hydration"*. The HF&F divestment moved a step closer to completion with the recently announced sale of the Food & Beverage business (including the *Ovaltine*, *Caotina*, *Lacovo* brands) for approximately CHF 400 million to Associated British Foods. The transaction is expected to close before the end of the year.

Operating income

Operating income was up 14% to CHF 67 million (USD 42 million) as a result of productivity gains and favorable raw material prices. The operating result was impacted by a one-time provision for potential value-added tax charges in Germany, as a result of VAT rate issues affecting the industry in general. This was partially offset by one-time divestment gains in the UK associated with the consolidation of *Ovaltine* production in Europe and the non-recurrence of related restructuring costs. As a result, the operating margin expanded to 6.0%.

Infant & Baby

Sales

Infant & Baby continued to post above-industry growth, as nine-month sales climbed 5% (-3% in CHF) to CHF 1.6 billion (USD 1.0 billion). The major contributor to the continued solid performance was Gerber in the US, spurred by innovations in the Juice, *Graduates*, and *Tender Harvest* lines. An outstanding success has been *Li'l Entrees*, a new line of microwavable convenience trays targeted at the toddler segment.

While the Baby Care business contended with intensified competition, private label entries, and category decline, the *Gerber Wellness* line of skincare and healthcare products continued to achieve good sales growth.

Operating income

Nine-month operating income increased 1% to CHF 291 million (USD 184 million), achieved mainly through sales expansion, improved productivity, and reduced General & Administration costs. As a result, the operating margin improved to 18.3%.

CIBA Vision

Sales

Edgar Filing: NOVARTIS AG - Form 6-K

Nine-month sales climbed 5% in local currencies (-2% in CHF) to CHF 1.3 billion (USD 0.8 billion), driven by the high-volume lens franchise, which outpaced the competition.

Focus DAILIES and *NIGHT & DAY* lenses continued to perform dynamically, and demand for cosmetic lenses grew, with *FreshLook* colored lenses remaining the segment leader. *FreshLook Radiance* cosmetic lenses were launched in several markets, with US approval expected later this year. *Focus DAILIES Toric*, the world's first and only daily disposable lens for astigmatism correction, was introduced in Europe.

The ophthalmic surgical business was lifted by several innovative products including *VisThesia*, a combination viscoelastic and anesthetic, which may help shorten cataract surgeries, *Vivarte PRESBYOPIC* phakic refractive lens; and an improved convenient injector system for the *PRL* phakic refractive lens. CIBA Vision also obtained exclusive rights in the US and Canada to market the *Ex-PRESS* mini glaucoma shunt, an innovative and minimally invasive approach for treating glaucoma.

The lens-care franchise continued to compete in a shrinking market particularly in the US. As a result sales declined, but were underpinned by other regions and the roll-out of *FreshLook Care* in Japan.

Operating income

Operating income reached the prior nine-month level of CHF 156 million (USD 99 million). Investments in Marketing & Distribution were increased to power new launches and advertising campaigns. Research & Development investments were maintained at the previous nine-month level and focused on the development of new products and lens production technology. Operating margin increased to 11.6%.

Corporate

Corporate income, net

This includes the costs of corporate management, income resulting from charging share and share option plan costs to the operating companies, and pension income. Net corporate income increased CHF 80 million (USD 51 million) in comparison with the previous nine months.

10

Income from associated companies

Income from associated companies totalled CHF 28 million (USD 18 million). The Novartis stake in Chiron Corporation contributed CHF 103 million.

Financial income, net

An attractive level of financial income net, CHF 836 million (USD 529 million), was generated in a difficult environment due to good currency management and equity strategies. This is lower than the CHF 1 149 million in the comparative period of last year, when financial income came mainly in the first six months in contrast to the more even distribution this year. At CHF 982 million, gross financial income on the Group's liquidity was CHF 542 million lower than in 2001 because the average level of liquidity has been lower and interest rates substantially lower in the current year. This was, however, partially offset by currency hedging gains mainly from US dollar and Japanese yen. Taking losses in emerging markets into account, net currency gains were CHF 97 million (up CHF 214 million from last year).

Balance sheet

On 22 July, Novartis initiated its third share buy-back program to repurchase shares via a second trading line on the SWX Swiss Exchange for up to a total of CHF 4 billion. On 30 September, approximately 23 million shares had been repurchased for a total of CHF 1.4 billion. The repurchased shares will subsequently be cancelled in order to reduce the Group's issued share capital.

The Group's equity decreased CHF 4.0 billion (USD 2.5 billion) to CHF 38.2 billion (USD 24.2 billion) at 30 September 2002 compared to the year end, as nine-month net income (CHF 5.6 billion) only partially offset dividend payments (CHF 2.3 billion), the acquisition of treasury shares (CHF 5.2 billion), translation losses (CHF 0.9 billion) and a CHF 1.2 billion reduction in the fair value reserve for marketable securities and other equity movements. The debt:equity ratio improved from 0.21:1 at the end of 2001 to 0.19:1 on 30 September 2002.

Cash flow

Despite increased net income, cash flow from operating activities declined CHF 174 million (USD 110 million) to CHF 5.0 billion, principally owing to a CHF 635 million increase in net current assets due mainly to sales growth. Free cash flow reached CHF 2.0 billion.

Net liquidity (i.e. marketable securities including derivatives plus cash and cash equivalents less financial debt and derivatives) amounted to CHF 8.0 billion (USD 5.1 billion) at 30 September 2002.

Novartis AG (NYSE: NVS) is a world leader in pharmaceuticals and consumer health. In 2001, the Group's businesses achieved sales of CHF 32.0 billion (USD 19.1 billion) and a net income of CHF 7.0 billion (USD 4.2 billion). The Group invested approximately CHF 4.2 billion (USD 2.5 billion) in R&D. Headquartered in Basel, Switzerland, Novartis Group companies employ about 74 000 people and operate in over 140 countries around the world. For further information please consult <http://www.novartis.com>.

This release contains certain "forward-looking statements", relating to the Group's business, which can be identified by the use of forward-looking terminology such as "will", "Outlook", "expects", "predicts", "estimates", "forecasts", or similar expressions, or by discussions of strategy, plans or intentions. Such statements include descriptions of new products and new indications to be approved for existing products, expected to be introduced or have been introduced by the Group and anticipated customer demand for such products. Such statements reflect the current views of the Group with respect to future events and are subject to certain risks, uncertainties and assumptions. Many factors could cause the actual results, performance or achievements of the Group to be materially different

11

from any future results, performances or achievements that may be expressed or implied by such forward-looking statements. Some of these are uncertainties relating to clinical trials and product development, unexpected regulatory delays or government regulation generally, and obtaining and protecting intellectual property, as well as factors discussed in the Group's Form 20-F filed with the US Securities and Exchange Commission. Should one or more of these risks or uncertainties materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those described herein as anticipated, believed, estimated or expected.

FURTHER REPORTING DATES

2002 full-year results will be published on 23 January 2003 in conjunction with Novartis' Financial Results Conference in Zurich.

Due to new accounting rules, 2001 sales have been restated to reflect a change in the classification of certain sales incentives and discounts to retailers. This restatement amounted to a reduction of CHF 300 million in 2001 nine-month sales (CHF 103 million in the third quarter) with a corresponding reduction in Marketing & Distribution expenses.

All USD figures are convenience translations of CHF into USD at a rate of 1.58. These translations should not be construed as representations that the CHF amounts could actually have been converted into the USD amounts indicated.

Notes to the interim financial report for the nine months ended 30 September 2002

1. Basis of preparation

This unaudited interim financial report has been prepared in accordance with the accounting policies set out in the 2001 Annual Report and International Accounting Standard 34 on Interim Financial Reporting.

There were no significant changes in accounting policies or estimates or in any contingent liabilities from those disclosed in the 2001 Annual Report.

2. Changes in the scope of consolidation

The following significant changes were made during the nine months to 30 September 2002 and in 2001:

2002

Animal Health

In January, the sector completed the acquisition of two US farm animal vaccine companies, Grand Laboratories Inc., Iowa and ImmTech Biologies Inc., Kansas. The combined 2001 revenues were approximately CHF 55 million (USD 33 million) and the combined purchase price is a minimum of CHF 168 million of which CHF 140 million was settled in Novartis American Depositary Shares. The final purchase price may increase depending on whether certain future sales and other targets are met.

Medical Nutrition including Health & Functional Food (HF&F)

In February, Novartis announced its intention to divest the HF&F businesses by the end of 2002. The revenues of these businesses amounted to approx. CHF 850 million in 2001. Following regulatory approvals, the announced sale of the Food & Beverage part of HF&F to Associated British Foods for approximately CHF 400 million is expected to be completed by early December, when these activities will no longer be consolidated. The Food & Beverage businesses reported sales of approximately CHF 370 million in 2001.

2001

Generics

Edgar Filing: NOVARTIS AG - Form 6-K

In January, Generics acquired the generic business line in the USA of Apoteco Inc., from Bristol Myers Squibb and BASF's European generic activities. In April, Generics acquired Labinca SA, Buenos Aires, Argentina and Lagap Pharmaceuticals Ltd., UK.

Corporate

During 2001, the Group acquired 21.3% of the voting shares of Roche Holding AG, which represents approximately 4% of its total shares and equity securities.

17

3. Significant differences between IAS and United States Generally Accepted Accounting Principles (unaudited)

The Group's consolidated financial statements have been prepared in accordance with IAS, which, as applied by the Group, differs in certain significant respects from US GAAP. The effects of the application of US GAAP to net income and equity are set out in the tables below:

	Nine months 2002 CHF m	Nine months 2001 CHF m
Net income under IAS	5 603	5 412
US GAAP adjustments:		
Purchase accounting: Ciba-Geigy	-222	-241
Purchase accounting: other acquisitions		-301
Purchase accounting: IAS goodwill amortization	143	
Available-for-sale securities	-549	-166
Pension provisions	-2	-35
Share-based compensation	-162	-52
Consolidation of share-based compensation foundations	-24	-27
In-process Research & Development	-11	-691
Deferred taxes	-136	-130
Other	-81	15
Deferred tax effect on US GAAP adjustments	-6	33
Net income under US GAAP	4 553	3 817
	30 Sept. 2002 CHF m	30 Sept. 2001 CHF m
Equity under IAS	38 203	36 437
US GAAP adjustments:		
Purchase accounting: Ciba-Geigy	4 604	4 906
Purchase accounting: other acquisitions	4 760	5 057
Purchase accounting: IAS goodwill amortization	143	
Pension provisions	1 430	1 706
Share-based compensation	-188	-118
