Notes to Consolidated Financial Statements

- (1) The Consolidated Balance Sheet at December 31, 2003 has been derived from the audited financial statements of Patriot National Bancorp, Inc. (Bancorp) at that date, but does not include all of the information and footnotes required by accounting principles generally accepted in the United States of America for complete financial statements.
- (2) The accompanying unaudited financial statements and related notes have been prepared pursuant to the rules and regulations of the Securities and Exchange Commission. Accordingly, certain information and footnote disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States of America have been omitted. The accompanying consolidated financial statements and related notes should be read in conjunction with the audited financial statements of Bancorp and notes thereto for the year ended December 31, 2003.

The information furnished reflects, in the opinion of management, all normal recurring adjustments necessary for a fair presentation of the results for the interim periods presented. The results of operations for the three months ended March 31, 2004 are not necessarily indicative of the results of operations that may be expected for the remaining quarters of 2004.

- (3) Bancorp is required to present basic income per share and diluted income per share in its income statements. Basic income per share amounts are computed by dividing net income by the weighted average number of common shares outstanding. Diluted income per share assumes exercise of all potential common stock in weighted average shares outstanding, unless the effect is antidilutive. Bancorp is also required to provide a reconciliation of the numerator and denominator used in the computation of both basic and diluted income per share. The following is information about the computation of income per share for the three months ended March 31, 2004 and 2003.

- (4) Bancorp has two reportable segments, the commercial bank and the mortgage broker. The commercial bank provides its commercial customers with products such as commercial mortgage and construction loans, working capital loans, equipment loans and other business financing arrangements, and provides its consumer customers with residential mortgage loans, home equity loans and other consumer installment loans. The commercial bank segment also attracts deposits from both consumer and commercial customers, and invests such deposits in loans, investments and working capital. The commercial bank's revenues are generated primarily from net interest income from its lending, investment and deposit activities.

The mortgage broker solicits and processes conventional mortgage loan applications from consumers on behalf of permanent investors and originates loans for sale. Revenues are generated from loan brokerage and application processing fees received from permanent investors and gains and origination fees from loans sold.

Information about reportable segments and a reconciliation of such information to the consolidated financial statements for the three months ended March 31, 2004 and 2003 is as follows (in thousands):

- (8) Pursuant to FASB Interpretation No. 46R, Consolidation of Variable Interest Entities, issued in December 2003, the Company deconsolidated Patriot National Statutory Trust I (the Trust), of which the Company owned 100% of the Trust's common securities, on December 31, 2003. As a result, the Statement of Cash flows for the three months ended March 31, 2003, which previously presented the issuance of trust-preferred securities of \$8,000,000, has been restated to separately present the issuance of \$8,248,000 of subordinated debentures by the Company, and the Company's \$248,000 investment in the Trust.

Item 2. Management's Discussion and Analysis or Plan of Operation

(a) *Plan of Operation*

Not applicable since Bancorp had revenues from operations in each of the last two fiscal years.

(b) *Management's Discussion and Analysis of Financial Condition and Results of Operations*

Summary

Bancorp had net income of \$196,000 (\$0.08 basic income per share and \$0.08 diluted income per share) for the quarter ended March 31, 2004, compared to net income of \$366,000 (\$0.15 basic income per share and \$0.15 diluted income per share) for the quarter ended March 31, 2003.

Total assets increased \$4.6 million from \$342.5 million at December 31, 2003 to \$347.1 million at March 31, 2004. Cash and cash equivalents remained largely unchanged at March 31, 2004 as compared to December 31, 2003. The available for sale securities portfolio decreased \$2.1 million to \$88.5 million at March 31, 2004 from \$90.6 million at December 31, 2003. The net loan portfolio increased \$6.8 million from \$214.4 million at December 31, 2003 to \$221.2 million at March 31, 2004. Deposits increased \$4.5 million to \$294.5 million at March 31, 2004 from \$290.0 million at December 31, 2003. Borrowings remained relatively unchanged at March 31, 2004 as compared to December 31, 2003. Total shareholders' equity increased \$531,000 to \$19.3 million at March 31, 2004 from \$18.8 million at December 31, 2003.

Financial Condition

Assets

Bancorp's total assets increased \$4.6 million from \$342.5 million at December 31, 2003 to \$347.1 million at March 31, 2004. Cash and cash equivalents remained largely unchanged at March 31, 2004 as compared to December 31, 2003. Cash and due from banks decreased \$2.2 million; federal funds sold is unchanged at \$15.0 million and short term investments increased \$2.1 million.

Investments

The following table is a summary of Bancorp's available for sale securities portfolio, at fair value, at the dates shown:

	March 31, 2004	December 31, 2003
U. S. Government Agency Obligations	\$ 15,026,798	\$ 11,865,618
Mortgage Backed Securities	62,498,249	66,696,465
Money market preferred equity securities		11,000,000
		12,000,000
Total Investments		
\$		88,525,047
\$		90,562,083

Available for sale securities decreased \$2.1 million from \$90.6 million at December 31, 2003 to \$88.5 million at March 31, 2004. This net decrease represents the excess of mortgage backed principal repayments and called securities over the purchase of additional government sponsored agency bonds.

At March 31, 2004 gross unrealized holding gains and gross unrealized holding losses on available for sale securities totaled \$316,930 and \$270,274, respectively (Note 7); none of the losses existed for a period of twelve months or more. Management does not believe these unrealized losses are other than temporary as they relate to debt and mortgage-backed securities issued by U.S. Government and U.S. Government sponsored agencies. Bancorp has the ability to hold these securities to maturity if necessary and expects to receive all contractual principal and interest related to these investments. As a result, management believes that these unrealized losses will not have a negative impact on future earnings and capital.

Loans

The following table is a summary of Bancorp's loan portfolio at the dates shown:

March 31,	December 31,
-----------	--------------

<hr/>		
Total Loans	\$ 221,173,608	\$ 214,420,528
<hr/>		

Bancorp's net loan portfolio increased \$6.8 million from \$214.4 million at December 31, 2003 to \$221.2 million at March 31, 2004. Increases in construction loans of \$4.4 million, commercial real estate loans of \$2.3 million and commercial and industrial loans of \$1.1 million were partially offset by decreases in residential real estate and home equity loans of \$534 thousand and \$401 thousand, respectively. A favorable interest rate environment for borrowers combined with a strong real estate market continues to contribute to the overall growth in the loan portfolio.

At March 31, 2004, the net loan to deposit ratio was 75.1% and the net loan to total assets ratio was 63.7%. At December 31, 2003, the net loan to deposit ratio was 73.9% and the net loan to total assets ratio was 62.6%. Based on loan applications in process and the planned hiring of additional loan officers, management anticipates continued loan growth during the remainder of 2004.

Critical Accounting Policies

In the ordinary course of business, Bancorp has made a number of estimates and assumptions relating to reporting results of operations and financial condition in preparing its financial statements in conformity with accounting principles generally accepted in the United States of America. Actual results could differ significantly from those estimates under different assumptions and conditions. The Company believes the following discussion addresses Bancorp's only critical accounting policy, which is the policy that is most important to the presentation of Bancorp's financial results and requires management's most difficult, subjective and complex judgments, often as a result of the need to make estimates about the effect of matters that are inherently uncertain.

Allowance for Loan Losses

The allowance for loan losses, a material estimate susceptible to significant change in the near-term, is established as losses are estimated to have occurred through a provision for loan losses charged against operations and is maintained at a level that management considers adequate to absorb losses in the loan portfolio. Management's judgment in determining the adequacy of the allowance is inherently subjective and is based on the evaluation of individual loans, the known and inherent risk characteristics and size of the loan portfolios, the assessment of current economic and real estate market conditions, estimates of the current value of underlying collateral, past loan loss experience, review of regulatory authority examination reports and evaluations of specific loans and other relevant factors. The allowance for loan losses is maintained at a level that management believes is adequate to absorb probable losses on existing loans based on an evaluation of the collectibility of loans and prior loan loss experience.

The allowance consists of specific, general and unallocated components. The specific component relates to loans that are considered impaired. A risk rating system is utilized to measure the adequacy of the general component of the allowance for loan losses.

Under this system, each loan is assigned a risk rating between one and nine, which has a corresponding loan loss factor assigned, with a rating of "one" being the least risk and a rating of "nine" reflecting the most risk or a complete loss. Risk ratings are assigned by the originating loan officer or loan committee at the initiation of the transactions and are reviewed and changed, when necessary, during the life of the loan. Loan loss reserve factors are multiplied against the balances in each risk rating category to arrive at the appropriate level for the allowance for loan losses. Loans assigned a risk rating of "six" or above are monitored more closely by the credit administration officers. The unallocated portion of the allowance reflects management's estimate of probable but undetected losses inherent in the portfolio; such estimates are influenced by uncertainties in economic conditions, delays in obtaining information, including unfavorable information about a borrower's financial condition, difficulty in identifying triggering events that correlate perfectly to subsequent loss rates, and risk factors that have not yet manifested themselves in loss allocation factors. Loan quality control is continually monitored by management and reviewed by the board of directors and loan committee on a monthly basis, subject to oversight by the board of directors through its members who serve on the loan committee. The methodology for determining the adequacy of the allowance for loan losses is consistently applied; however, revisions may be made to the methodology and assumptions based on historical information related to charge-off and recovery experience and management's evaluation of the current loan portfolio.

Based upon this evaluation, management believes the allowance for loan losses of \$3.1 million at March 31, 2004, which represents 1.38% of gross loans outstanding, is adequate, under prevailing economic conditions, to absorb losses on existing loans. At December 31, 2003, the allowance for loan losses was \$2.9 million or 1.35% of gross loans outstanding.

Non-Accrual, Past Due and Restructured Loans

The following table presents non-accruing and past due loans:

<i>(Thousands of dollars)</i>	March 31, 2004	December 31, 2003
Loans delinquent over 90 days still accruing	\$ 330	\$ 165
Non-accruing loans	2,866	150
Total	\$ 3,196	\$ 315
% of Total Loans	1.43%	0.14%
% of Total Assets	0.92%	0.09%

Potential Problem Loans

The \$2.8 million in non-accruing loans at March 31, 2004 is comprised of two loans that are well collateralized and in the process of collection.

In addition to the loans disclosed in the table above, Bancorp, at March 31, 2004 had one loan in the amount of \$641,000, which was 30 days past due at the end of the quarter, which management has significant doubts as to the ability of the borrower to comply with the present repayment terms; this loan is also well collateralized and in the process of collection. This loan was subsequently placed on non-accrual status.

Deposits

The following table is a summary of Bancorp's deposits at the dates shown:

	March 31, 2004	December 31, 2003
Non-interest bearing	\$ 33,218,691	\$ 30,477,295
Interest bearing		
Time certificates, less than \$100,000	91,110,700	92,574,784
Time certificates, \$100,000 or more	50,585,365	50,793,863
Money market	72,148,006	69,503,859
Savings	23,859,321	23,792,811
NOW	23,544,280	22,849,570
Total interest bearing	261,247,672	259,514,887
Total Deposits	\$ 294,466,363	\$ 289,992,182

Total deposits increased \$4.5 million from \$290.0 million at December 31, 2003 to \$294.5 million at March 31, 2004. Noninterest bearing deposits increased \$2.7 million due primarily to increases in official checks and consumer demand deposit accounts. Interest bearing deposits increased \$1.7 million. Money market fund accounts and NOW accounts increased \$2.6 million and \$694 thousand, respectively, while certificates of deposit decreased \$1.7 million. Due to the uncertainty in short term interest rates, many depositors have been keeping funds liquid which has resulted in an increase in money market fund accounts and a slight decrease in certificates of deposit.

Off-Balance Sheet Arrangements

There have been no significant changes in Bancorp's off-balance sheet arrangements during the quarter ended March 31, 2004.

Results of Operations

Interest and dividend income and expense

Bancorp's interest and dividend income increased \$874,000 or 25.5% for the quarter ended March 31, 2004 as compared to the same period in 2003. Interest and fees on loans increased 21.7% or \$629,000 from \$2.9 million for the quarter ended March 31, 2003 to \$3.5 million for the quarter ended March 31, 2004. These increases are the result of the increase in the investment and loan portfolios, net of decreases in the yields on interest earning assets.

Bancorp's interest expense increased 41.8% or \$484,000 for the quarter ended March 31, 2004 as compared to the same period in 2003. Increases in interest bearing deposits accounts resulted in an increase of 34.3% or \$364,000 in interest expense for the quarter ended March 31, 2004 compared to the same period last year. Increases in outstanding borrowings resulted in an increase of \$120,000 in interest expense for the quarter ended March 31, 2004 as compared to the same period in 2003. These increases in interest expenses are due to higher levels of interest bearing liabilities partially offset by lower interest rates on interest bearing liabilities.

Non-interest income

Non-interest income decreased \$591,000 or 44.0% to \$752,000 for the quarter ended March 31, 2004 as compared to the same period last year. Mortgage brokerage and referral fees decreased by 46.9% or \$437,000 to \$496,000 for the quarter ended March 31, 2004 as compared to \$933,000 for the same period last year. This decrease was due primarily to an increase in interest rates which resulted in a decrease in the volume of refinance transactions. As a result of the decrease in refinance transactions, there was also a decrease in loan origination and processing fees of \$59,000 or 33.1% to \$119,000 for the quarter ended March 31, 2004 as compared to \$178,000 for the quarter ended March 31, 2003. The results for the three months ended March 31, 2003 reflect gains on the sale of investment securities of

\$125,000 which included a gain of \$117,000 on an investment security for which Bancorp recorded a write-down in 2001 made for the other-than-temporary impairment of such security due to the deterioration in the financial condition of the issuer. In March 2003, Bancorp received the proceeds from a tender offer made by the issuer at a price of 100% of par for the above security under a comprehensive refinancing plan. During the quarter ended March 31, 2004, there were no sales of investment securities.

Non-interest expenses

Non-interest expenses increased 2.4% or \$68,000 to \$2,924,000 for the quarter ended March 31, 2004 from \$2,856,000 for the quarter ended March 31, 2003. Salaries and benefits expense decreased 4.8%, or \$89,000 to \$1.8 million for the quarter ended March 31, 2004 from \$1.9 million for the quarter ended March 31, 2003. Increases in salaries, due primarily to staff additions resulting from the opening of three branches in 2003, were more than offset by lower levels of commissions and production related incentive compensation accruals resulting from the decrease in the volume of residential refinance transactions. Occupancy and equipment expense, net, increased \$111,000 or 41% to \$381,000 for the quarter ended March 31, 2004 from \$270,000 for the quarter ended March 31, 2003 due primarily to the establishment during 2003 of three additional branch locations. Advertising and promotional expenses increased 62.2% to \$112,000 for the three months ended March 31, 2004 from \$69,000 for the three months ended March 31, 2003 due primarily to increased newspaper and radio advertisements. Loan administration and processing expenses decreased 37.2% to \$66,000 for the three months ended March 31, 2004 from \$105,000 for the three months ended March 31, 2003 due to the decrease in the volume of residential refinance transactions. Other non-interest expenses increased \$28,000 or 11.6% to \$270,000 for the quarter ended March 31, 2004 from \$242,000 for the quarter ended March 31, 2003 due primarily to increases in software and telecommunications expenses.

Bancorp has received regulatory approval to establish two additional branch locations which will result in additional capital expenditures as well as increases in salaries and benefits and occupancy and equipment expenses. Management anticipates that one branch will open in the third quarter of 2004 and the second branch in the fourth quarter of 2004.

Income Taxes

Bancorp recorded income tax expense of \$139,000 for the quarter ended March 31, 2004 as compared to \$233,000 for the quarter ended March 31, 2003. The effective tax rates for the quarters ended March 31, 2004 and March 31, 2003 were 41% and 39%, respectively. These changes are related primarily to the change in pre-tax income and the exclusion for state tax purposes of certain holding company expenses.

LIQUIDITY

Bancorp's liquidity ratio was 34.0% and 28.8% at March 31, 2004 and 2003, respectively. The liquidity ratio is defined as the percentage of liquid assets to total assets. The following categories of assets as described in the accompanying consolidated balance sheets are considered liquid assets: cash and due from banks, federal funds sold, short term investments and available for sale securities. Liquidity is a measure of Bancorp's ability to generate adequate cash to meet financial obligations. The principal cash requirements of a financial institution are to cover downward fluctuations in deposit accounts and increases in its loan portfolio. Management believes Bancorp's short-term assets have sufficient liquidity to cover loan demand, potential fluctuations in deposit accounts, the costs related to opening new branch offices and to meet other anticipated cash requirements.

CAPITAL

The following table illustrates Bancorp's regulatory capital ratios at March 31, 2004 and December 31, 2003 respectively:

	March 31, 2004	December 31, 2003
Total Risk-based Capital	11.70%	11.87%
Tier 1 Risk-based Capital	9.85%	10.00%
Leverage Capital	7.27%	7.51%

The following table illustrates the Bank's regulatory capital ratios at March 31, 2004 and December 31, 2003 respectively:

	March 31, 2004	December 31, 2003
Total Risk-based Capital	11.50%	11.67%
Tier 1 Risk-based Capital	10.27%	10.47%
Leverage Capital	7.58%	7.85%

Capital adequacy is one of the most important factors used to determine the safety and soundness of individual banks and the banking system. Based on the above ratios, the Bank is considered to be "well capitalized" at March 31, 2004 under applicable regulations. To be considered "well-capitalized," an institution must generally have a leverage capital ratio of at least 5%, a Tier 1 risk-based capital ratio of at least 6% and a total risk-based capital ratio of at least 10%.

Management continuously assesses the adequacy of the Bank's capital to ensure that the Bank remains a "well capitalized" institution. Management's strategic and capital plans contemplate various options to raise additional capital to support the planned growth of the

Bank.

IMPACT OF INFLATION AND CHANGING PRICES

Bancorp's consolidated financial statements have been prepared in terms of historical dollars, without considering changes in the relative purchasing power of money over time due to inflation. Unlike most industrial companies, virtually all of the assets and liabilities of a financial institution are monetary in nature. As a result, interest rates have a more significant impact on a financial institution's performance than the general levels of inflation. Interest rates do not necessarily move in the same direction or in the same magnitude as the prices of goods and services. Notwithstanding this, inflation can directly affect the value of loan collateral, in particular, real estate. Inflation, or disinflation, could significantly affect Bancorp's earnings in future periods.

"SAFE HARBOR" STATEMENT UNDER PRIVATE SECURITIES LITIGATION REFORM ACT OF 1995

Certain statements contained in Bancorp's public reports, including this report, and in particular in this "Management's Discussion and Analysis of Financial Condition and Results of Operation," may be forward looking and subject to a variety of risks and uncertainties. These factors include, but are not limited to, (1) changes in prevailing interest rates which would affect the interest earned on Bancorp's interest earning assets and the interest paid on its interest bearing liabilities, (2) the timing of repricing of Bancorp's interest earning assets and interest bearing liabilities, (3) the effect of changes in governmental monetary policy, (4) the effect of changes in regulations applicable to Bancorp and the conduct of its business, (5) changes in competition among financial services companies, including possible further encroachment of non-banks on services traditionally provided by banks, (6) the ability of competitors which are larger than Bancorp to provide products and services which it is impracticable for Bancorp to provide, (7) the effects of Bancorp's opening of branches, and (8) the effect of any decision by Bancorp to engage in any business not historically permitted to it. Other such factors may be described in Bancorp's future filings with the SEC.

Item 3. Controls and Procedures

Based on an evaluation of the effectiveness of Bancorp's disclosure controls and procedures performed by Bancorp's management, with the participation of Bancorp's Chief Executive Officer and its Chief Financial Officer as of the end of the period covered by this report, Bancorp's Chief Executive Officer and Chief Financial Officer concluded that Bancorp's disclosure controls and procedures have been effective.

As used herein, "disclosure controls and procedures" means controls and other procedures of Bancorp that are designed to ensure that information required to be disclosed by Bancorp in the reports that it files or submits under the Securities Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the Commission's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by Bancorp in the

reports that it files or submits under the Securities Exchange Act is accumulated and communicated to Bancorp's management, including its principal executive and principal financial officers, or persons performing similar functions, as appropriate to allow timely decisions regarding required disclosure.

There were no changes in Bancorp's internal control over financial reporting identified in connection with the evaluation described in the preceding paragraph that occurred during Bancorp's fiscal quarter ended March 31, 2004 that has materially affected, or is reasonably likely to materially affect, Bancorp's internal control over financial reporting.

PART II - OTHER INFORMATION.

Item 2. Changes in Securities

- (a) Not applicable
- (b) Not applicable
- (c) During the three months ended March 31, 2004, Bancorp issued 11,667 shares of its Common Stock upon the exercise of certain warrants that were granted by the Bank in 1994 in connection with its organization to persons who assisted the Bank in meeting its pre-opening expenses. The exercise price per share of these warrants is \$6.00. The obligations under these warrants were assumed by Bancorp at the time the Bank became a wholly owned subsidiary of Bancorp.

The total amount received by Bancorp for these shares was \$70,002. No underwriter was used in connection with the sale of these 11,667 shares nor were any underwriting discounts or commissions paid. Bancorp claims an exemption from registration for the sale of these shares under Rule 504 under the Securities Act of 1933, on the basis that the aggregate price for all of the warrants issued to individuals involved in the organization is less than \$1,000,000.
