TOP TANKERS REPORTS FIRST QUARTER OF 2006 FINANCIAL RESULTS

ATHENS, GREECE (May 11, 2006) ... TOP Tankers Inc (NasdaqNM:TOPT) today announced its operating results for the first quarter ended March 31, 2006.

For the three months ended March 31, 2006, the Company reported net income of \$30,404,000, or \$1.06 per share, compared with net income of \$19,121,000, or \$0.69 per share, for the first quarter of 2005. The weighted average numbers of basic shares used in the computations were 28,099,212 and 27,830,990 for the first quarters of 2006 and 2005, respectively. The results for the first quarter of 2006 include net charges of \$3,246,000, or \$0.12 per share of special items that affected the Company's net income for the first quarter of 2006 that are typically excluded by securities analysts in their published estimates of the Company's financial results, which are described in Appendix A of this release. For the three months ended March 31, 2006, operating income was \$38,213,000, compared with \$20,975,000 for the first quarter of 2005. EBITDA(1) for the first quarter of 2006 was \$55,850,000, compared with \$29,719,000 for the first quarter of 2005. Voyage revenues for the first quarter of 2006 were \$101,746,000, compared to \$47,291,000 recorded in the first quarter of 2005.

Evangelos J. Pistiolis, President and Chief Executive Officer of TOP Tankers Inc, commented, "The first quarter of 2006 was one of the most important periods in our history. Not only did we achieve our highest quarterly EPS of \$1.06, but we also concluded a significant \$550 million sale and leaseback transaction which has resulted in a significant return of \$7.50 per share to our shareholders.

"We have entered into the seasonal lower period for the tanker market and are experiencing a correction in the crude spot rates. We intend to take advantage of the temporary slowdown and bring forward most scheduled dry-dockings for our Suezmaxes. As a result, we expect to enjoy the benefit of our full fleet's availability during the next winter period, which is traditionally the strongest period of the year."

"I also wish to inform our shareholders that I am currently involved in a project which involves the listing of a real estate fund on the Alternative Investment Market of the London Stock Exchange. It is envisioned that I will act as Chief Executive Officer of a private company that will manage that fund. I discussed my prospective involvement in this management company with our Board of Directors earlier in this year. Both the TOP Tankers Board and I are comfortable that my duties for the fund will not interfere with the continued performance of my duties for TOP Tankers."

"You probably have questions relating to the fund, but beyond telling you that this project does not involve a public offering in the United States, I am not able to give you any more details at this time due to regulations governing securities offerings both in London and in the United States."

The following key indicators serve to highlight changes in the financial performance of the Company's fleet during the first quarters ended March 31, 2005 and 2006:

Forward-Looking Statements

Matters discussed in this release may constitute forward-looking statements. Forward-looking statements reflect our current views with respect to future events and financial performance and may include statements concerning plans, objectives, goals, strategies, future events or performance, and underlying assumptions and other statements, which are other than statements of historical facts.

The forward-looking statements in this release are based upon various assumptions, many of which are based, in turn, upon further assumptions, including without limitation, management's examination of historical operating trends, data contained in our records and other data available from third parties. Although TOP Tankers believes that these assumptions were reasonable when made, because these assumptions are inherently subject to significant uncertainties and contingencies which are difficult or impossible to predict and are beyond our control, TOP Tankers cannot assure you that it will achieve or accomplish these expectations, beliefs or projections.

Important factors that, in our view, could cause actual results to differ materially from those discussed in the forward-looking statements include the strength of world economies and currencies, general market conditions, including changes in charterhire rates and vessel values, failure of a seller to deliver one or more vessels, failure of a buyer to accept delivery of a vessel, inability to procure acquisition financing, changes in demand for oil and petroleum products, the effect of changes in OPEC's petroleum production levels and worldwide oil consumption and storage, changes in demand that may affect attitudes of time charterers, scheduled and unscheduled drydocking, changes in our voyage and operating expenses, including bunker prices, dry-docking and insurance costs, changes in governmental rules and regulations including requirements for double-hull tankers or actions taken by regulatory authorities, potential liability from pending or future litigation, domestic and international political conditions, potential disruption of shipping routes due to accidents and political events or acts by terrorists.

Risks and uncertainties are further described in reports filed by TOP Tankers with the US Securities and Exchange Commission, which are available in the SEC's "EDGAR" database on its website, www.sec.gov.

- (1) See Appendix A to this release for information about special items and reconciliation of EBITDA.
- (2) Consistent with general practice in the tanker shipping industry, time charter equivalent, or TCE, is a measure of the average daily revenue performance of a vessel on a per voyage basis. Our method of calculating TCE is consistent with industry standards and is determined by dividing net voyage revenue by voyage days for the relevant time period. Net voyage revenues are voyage revenues minus voyage expenses. Voyage expenses primarily consist of port, canal and fuel costs that are unique to a particular voyage, which would otherwise be paid by the charterer under a time charter contract, as well as commissions.
